An application was received from the employees of the Canadian Pacific Railway Company, B. C. Lake and River Service, Nelson, B.C., members of the National Association of Marine Engineers of Canada, for a Board to deal with a demand for increased wages. Pending the result of resumed negotiations looking to a settlement of the dispute, no Board was established.

An application was received from the British Columbia Electric Railway Company, operating at Vancouver, Victoria and New Westminster, for a Board to deal with a dispute between the company and its employees concerning a demand for increased wages and changes in working conditions. A Board was established as follows: Honourable Mr. Justice W. A. Macdonald, chairman, appointed by the Minister in the absence of a joint recommendation, and Messrs. Frederick Buscombe and Thos. J. Coughlin, nominees of the company and the employees respectively. All the Board members are residents of Vancouver.

An application was received from the employees of the Winnipeg Electric Railway Company, members of the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers, concerning the alleged dismissal of certain trackmen on account of their connection with the union, and a demand for their reinstatement with full pay for time lost. Shortly after the receipt of the application a message from the employees' representative requested a stay of proceedings, and action was accordingly stayed. It is understood the company and employees effected an agreement.

An application was received from the telegraph operators of the Canadian Pacific Railway, members of the Commercial Telegraphers' Union of America, for a Board to deal with a dispute regarding proposed amendments to the existing wage schedule and rules. A Board was established as follows: Mr. W. N. Tilley, K.C., of Toronto, and Mr. David Campbell, K.C., of Winnipeg, appointed on the recommendation of the company and employees respectively. Shortly after the close of the month the Minister appointed His Honour Judge Scott, of Perth, Ont., chairman, in the absence of a joint recommendation.

An application was received from the British Columbia Electric Railway, operating at Vancouver, Victoria and New Westminster, for a Board to deal with a dispute as to wages and working conditions. A Board was established as follows: Honourable Mr. Justice W. A. Macdonald, chairman, and Messrs. Frederick Buscombe and Thos. J. Coughlin, nominees of the company and employees respectively.

An application was received from the employees of the Grand Trunk Pacific Railway, members of the Canadian Brotherhood of Railway Employees, for a Board to deal with a dispute concerning wages and working conditions. The application was under consideration at the close of the month.

An application was received for a Board to deal with a dispute between various employers concerned in water transportation between British Columbia ports and American ports in Puget Sound and Alaska, and certain of their employees, being masters and mates, members of an organization known as the Canadian Merchant Service Guild. The application was received from the employees and stated the cause of the dispute to be in regard to wages and working conditions. There being numerous employers who were not joined as one the dispute was not within the Industrial Disputes Investigation Act; it was therefore decided to have the dispute dealt with by a Commission.

The Western Power Company of Canada, Limited, made application for a Board to deal with a dispute between the company and its employees, members of Local Union No. 213 of the In-

ternational Brotherhood of Electrical Workers, concerning wages and working conditions. A Board was established as follows: His Honour Mr. Justice W. A. Macdonald, chairman, appointed on the recommendation of the other two nominees, and Mr. Frederick Buscombe and Mr. Thomas J. Coughlin, appointed on the recommendation of the employers and employees respectively.

An application was received from the employees of the York Knitting Mills, Limited, of Toronto, members of Local Union No. 1063 of the United Textile Workers of America, for a Board to deal with a dispute concerning wages and union affiliation. The dispute did not fall within the scope of the statute, the work on which the employees had been engaged not being war work.

An application was received in connection with a dispute between Fraser, Brace & Company, Limited, Montreal, and its employees engaged in shipbuilding, concerning wages and working conditions. No Board was established at the close of the month, pending direct negotiations between the parties concerned looking to adjustment of the dispute.

Other Proceedings under Act

During June the Honourable Mr. Justice W. A. Macdonald, of Vancouver, was appointed chairman of the Board established to deal with the dispute between the Canadian Pacific Railway and its dining car employees running between Calgary and Vancouver. The appointment was made by the Minister in the absence of a joint recommendation from the other Board members.

During June Messrs. Frederick Buscombe and James H. McVety, of Vancouver, nominees of the employers and employees respectively, were appointed members of the Board established to deal with a dispute between the Vancouver Gas Company and its employees.

A Board was established during June to deal with a dispute between the Corporation of Victoria and its civic employees, as follows: Mr. W. E. Burns, Vancouver, chairman, appointed by the Minister in the absence of a joint recommendation, and Mr. R. F. Taylor and Mr. James Dakers, of Victoria, nominees of the employers and employees respectively.

During June His Honour Judge R. Ruddy, of Whitby, Ont., was appointed chairman of the Board established to deal with a dispute between the Toronto Railway Company and its machinists. The appointment was made by the Minister in the absence of a joint recommendation.

Report of Board in Dispute between the Pere Marquette Railway Company and its Maintenance-of-way Employees

A REPORT was received from the Board of Conciliation and Investigation appointed to deal with the dispute between the Pere Marquette Railway Company and its maintenance of way employees, numbering 150, concerning wages and working conditions. The Board was composed as follows: His Honour Judge Dromgole, of Sandwich, chairman, appointed by the Minister in the absence of a joint recommendation from the other Board members, and Messrs. R. L. Brackin, of Chatham, and J. G. O'Donoghue, of Toronto, appointed on the recommendation of the company and the employees respectively. The award was unanimous and contained a proposed schedule of rules and rates of pay, which the employees expressed their willingness to accept.

Report of Board

The Honourable,
the Minister of Labour,
Ottawa.

Sir,—

The undersigned, a Board constituted under the Industrial Disputes Investigation Act, to inquire into the differences existing between the Pere Marquette Railway Company and its employees, being members of the International Brotherhood of Maintenance of Way Employees, met at Chatham on Monday and Tuesday, the twenty-seventh and twenty-eighth days of May, 1918, for the purpose of carrying on the investigation.

The following appeared on behalf of the company: H. A. Cassel, engineer, maintenance of way; R. S. Black, superintendent, and Hy. Morris, roadmaster.

The representatives of the employees were: Alphonso Allen, chairman; Stephen Tilley, secretary; Henry McLaughlin and Arthur Mancell, members of committee; H. V. Turnbull, representative of the Brotherhood.

The matters in dispute were very fully enquired into, all parties manifesting a spirit of fairness and conciliation that made the work of the Board far from arduous. The parties were not able to agree, but the Board has much pleasure in recommending the adoption of the following schedule:

PERE MARQUETTE RAILWAY COMPANY

RULES AND RATES OF PAY.

Section Foremen and Section Men in Canada.

Effective January 1, 1918.

The following rules and rates of pay will govern the service of "permanent maintenance of way employees" on the Canadian lines of the Pere Marquette Railway Company:

SECTION 1.

By "permanent maintenance of way employees" is meant employees who take their orders from the road masters and bridge and building master on such parts of the line as are open for traffic, and who have been in the maintenance of way service continually for one year or more, or who have had one year cumulative service during the three years immediately preceding and the same will hereinafter be referred to as "employees." Labourers in extra gangs unless those practically engaged all the year round will not be ranked as "permanent employees."

SECTION 2.

Ten hours shall constitute a day's work excepting for pumpmen. Twelve hours either continuous or intermittent shall constitute a day for a pumpman.

SECTION 3.

Section foreman and sectionmen travelling on orders of the company to and from work after regular hours outside of their regular sections will be allowed straight time.

SECTION 4.

In computing time four hours will be the minimum allowed for every call to duty between the hours of 6 p.m. and 7 a.m.

SECTION 5.

(a) Employees will be promoted hereafter on the Canadian lines in order of seniority, provided they are qualified in the opinion of the roadmaster.

(b) Employees refusing promotion become junior to employees accepting such promotion.

(c) Employees unable to read or write English need not be promoted.

(d) In the event of reduction in the number of men employed, those longest in the service shall have preference of employment, provided they are qualified in the judgment of the roadmaster.

SECTION 6.

Employees suspended or dismissed or who consider that they have been unjustly treated will receive full and impartial hearing, and will be advised of decision within 15 days of such hearing. Should investigation show suspension, dismissal or treatment unjust, full time will be allowed and employee reinstated. Appeals from decisions must be made in writing through his roadmaster within 15 days after advised of such decision.

SECTION 7.

Employees taken off their regular sections temporarily to work on show or tie trains or other work will be compensated for the board and lodging expense they necessarily incur.

SECTION 8.

The company will keep company's section houses in good repair; the cost of repairs occasioned by default or neglect of the occupant shall be charged to him.

SECTION 9.

(a) Overtime shall be paid at the rate of time and a half for actual work and straight time travelling to and from the work. Holidays shall be granted after patrolling section and everything safe, as follows: Xmas, New Year's, Dominion Day, Labour Day and Thanksgiving Day.

(b) Quarterly passes will be issued to employees living at flag stations and outside sections for marketing purposes.

(c) Half rates will be granted on household goods of employees when moving and remaining in the company's service. When moved under agreement with or on the company's orders, household goods will be carried free and free transportation for wife and family.

These rules will not take away any of the privileges that are now in effect with the employees. They will become effective on January 1, 1918, and will remain in force until a new schedule is agreed upon.

WAGE SCHEDULE OF SECTIONMEN IN CANADIAN LINES.

Section Foremen.

1.	St. Thomas	$95.00
	Assistant	80.00
2.	Sarnia and Walkerville	90.00
	Chatham E and H 3	87.50
	Wallaceburg E and H 5	87.50
	Windsor yard	87.50
	Leamington L E 5	87.50
3.	Chatham E and H 2	85.00
	Blenheim L E 9	85.00
	Blenheim E and H 1	85.00

Lawson yard	85.00
Other points	80.00

Sectionmen, 25.5 cents per hour at St. Thomas, Sarnia, Chatham, Wallaceburg, Windsor, Leamington, Blenheim, Lawson and Walkerville.

Sectionmen 25 cents per hour at other points.

Merlin pumpman, $50.00 a month.

(Sgd.) JNO. O. DROMGOLE, Chairman.
(Sgd.) R. L. BRACKIN, Member.
(Sgd.) J. G. O'DONOGHUE, Member.

Dated at Chatham, the twenty-eighth day of May, 1918.

Report of Board in Dispute between the Grand Trunk Railway and its Stationmen

A REPORT was received from the Board established to inquire into a dispute between the Grand Trunk Railway and its stationmen, concerning wages and rules. The Board was composed as follows: His Honour Judge J. G. Wallace, of Woodstock, chairman, appointed by the Minister in the absence of a joint recommendation, and Mr. F. H. McGuigan, of Toronto, and Mr. Bernard Rose, of Montreal, nominees of the company and employees respectively. The award was unanimous and contained a schedule of rules and regulations covering working conditions and rates of pay. The whole schedule was accepted by the employees, but only that portion relating to rules and regulations was accepted by the company.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Grand Trunk Railway System, employer, and certain of its employees, being members of the International Brotherhood of Railroad Stationmen and Railroad Employees Alliance, employees.

To the Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa.

Sir,—

The Board of Conciliation and Investigation to enquire into the above dispute was appointed by the Honourable the Minister of Labour on the nineteenth day of April, A.D. 1918. His Honour Judge J. G. Wallace, of Woodstock, Ont., was appointed chairman of the Board on the twenty-ninth day of April, A.D. 1918, the other members of the Board being Mr. F. H. McGuigan, of Toronto, representing the Grand Trunk Railway System, and Mr. Bernard Rose, of Montreal, representing the employees.

Meetings of the Board were held at Toronto on the fourth, tenth, eleventh, thirteenth, fourteenth, twentieth, twenty-first and twenty-second days of May, A.D. 1918.

The men were represented by Messrs. J. L. Burger, C. R. Koybler, F. E. Seagar, J. J. Redhead, Charles Smith and F. S. Walker, and the company by C. G. Bowker, J. D. McMillan, C. Forrester, R. H. Fish, J. H. Gordon, P. J. Lynch, W. H. Farrell, D. W. Hay, A. M. Adams, J. R. Melville and W. S. Cookson.

The Board is pleased to report that the representatives of the railway company and of the employees, acting upon suggestions made by the chairman, agreed upon a schedule of rules and regulations covering working conditions, a copy of which is appended to and is a part of this report and bears the signature of Messrs. Howard G. Kelley, president, representing the company, and J. L. Burger, representing the employees.

The representatives of the company and of the men were unable to agree upon the question of wages, and the determination of this matter was left with the Board.

The Board had a very long discussion as to the increases to be allowed to the employees, and is pleased to report that it finally was able to come to an agreement based upon the evidence submitted by the parties interested, and the following is the report of the Board as to the increases:

EMPLOYEES PAID ON A MONTHLY BASIS.

To those receiving from $25.00 to $50.00 per month (inclusive) an increase of 20 per cent is recommended.

To those receiving over $50.00 to $60.00 per month (inclusive) an increase of 12 per cent is recommended.

To those receiving over $60.00 to $75.00 per month (inclusive) an increase of 10 per cent is recommended.

To those receiving over $75.00 to $100.00 per month (inclusive) an increase of 8 per cent is recommended.

To those receiving over $100.00 per month an increase of 5 per cent is recommended.

EMPLOYEES PAID ON A DAILY BASIS.

To those receiving from $1.40 to $2.00 per day (inclusive) an increase of 30c per day is recommended.

To those receiving over $2.00 to $2.50 per day (inclusive) an increase of 25c per day is recommended.

To those receiving over $2.50 to $3.00 per day (inclusive) an increase of 20c per day is recommended.

To those receiving over $3.00 to $4.00 per day (inclusive) an increase of 15c per day is recommended.

The increases recommended in this report are to apply to all positions shown on attached list, not covered by other schedules, except positions of chief clerk, accountant, and private secretary to superintendents and other divisional officers.

These increases are to be on basis of wages paid in January, 1918.

These rates are understood not to decrease any amount granted as increase since January 1, 1918.

This schedule of wages shall continue in effect for one year, commencing May 1, 1918, and thereafter unless terminated or revised by 30 days' notice to be given by either party to the other in writing.

The Board has taken recognition of Rule 14 of the Rules and Regulations covering working conditions, which is apparently in conflict with the Board's recommendation as to wages. The Board would recommend that this rule be amended to read as follows:

RULE 14.

Notice of Changes.

The foregoing rules have been agreed to and are to remain in effect for a period of one year from May 1, 1918, and thereafter, until terminated or revised by thirty (30) days' notice given in writing by either party to the other.

(Sgd.) J. G. WALLACE,
Chairman of the Board.

(Sgd.) BERNARD ROSE,
Member of the Board.

(Sgd.) F. H. MCGUIGAN,
Member of the Board.

GRAND TRUNK RAILWAY SYSTEM.

Schedule for employees of the Grand Trunk Railway System in the following departments:

Transportation (including Maintenance of way),
Motive Power and Car,
Passenger (including Dining Car).

Effective May 1, 1918.

RULE 1.

Clerks Defined.

All employees whose duties require the performance of clerical work for a period of three hours or more daily shall be classed as clerks, within the meaning of these rules.

Whenever the word (clerks) appears in this schedule it shall be construed to mean the employees designated in this rule.

RULE 2.

Basis of a Day's Work.

(a) Ten (10) hours' service, not including the meal hour, shall constitute a day's work.

(b) In all cases service shall be continuous, except at points where it is not practicable to confine the service continually, and in such cases the hours of service shall be within a limit of twelve (12) consecutive hours, provided actual hours of work do not exceed ten (10) hours, as provided in paragraph (a).

(c) In the case of employees now paid an hourly rate, their rate under this rule shall be the same for ten hours' service.

(d) In all cases where employees are now working on shifts longer than ten (10) hours, this practice will be continued, and overtime will not start until after the expiration of the regular assigned hours.

(e) It is understood that the present practice will be continued in effect where employees are now working less than ten (10) hours per day.

RULE 3.

Meal Hour.

All employees shall be entitled to one hour for meals during each day, except where it will interfere with present practices.

RULE 4.

Overtime.

(a) Employees required to work after the expiration of the regular hours will be paid overtime for this service at the pro rata rate.

(b) When employees are absent from work temporarily without deduction in pay, they will be expected to work outside of their regular assigned hours, without payment of overtime, to bring their work up to date, when necessary.

(c) In computing overtime, overtime shall begin at the expiration of time as per paragraphs (a), (b) and (d) of Rule 2.

(d) Claims for overtime must be submitted to the officer in charge within forty-eight (48) hours from the time overtime service was performed.

(e) Employees will be notified when overtime claims are not allowed and a reason given therefor.

(f) When employees whose regular duties do not require them to work on Sundays and holidays are required to work on these days, as shown in Rule 5, they shall be paid overtime for such service.

RULE 5.

Sunday and Holiday Work.

Only such employees as shall be necessary to perform the business of the company shall be required to work on Sundays or legal holidays, namely:

New Year's Day,
Good Friday,
Empire Day (Decoration Day in United States),
July 1st (July 4th in United States),
Labour Day,
Thanksgiving Day,
Christmas Day.

RULE 6.

Vacations.

Clerks who have been in the service of the company two years or over will be granted six working days' vacation each year with full pay.

Clerks who have been in the service of the company four years or over will be granted twelve working days' vocation each year with full pay.

If the company finds it inconvenient to grant leave of absence during any year to a clerk who is entitled to it under this rule, the clerk shall at his option receive compensation at his regular salary for the period, or in the next year additional leave of absence for a like period.

In the event of a clerk being discharged, or leaving the service on proper notice before obtaining the deferred leave of absence, he will be paid for same.

Officer in charge to arrange leave of absence, senior clerks to be given the preference.

RULE 7.

Attending Court.

Employees attending court or inquests by instructions of the company will be paid full salary for the time lost and reasonable expenses if away from home.

RULE 8.

Reductions in Staff.

(a) In all cases of making reductions in force, or making promotions, other things being equal, employees longest in continuous service shall be given preference.

(b) In cases of reduction in force, employees relieved on account of such reduction will retain their right to re-enter the service, if again needed, the last man laid off being the first man hired, provided they keep the immediate official in charge advised of their address. Should employees fail to return to work promptly when notified, they shall lose their rights under these rules.

RULE 9.

Discipline.

Employees, after having been in the service six (6) consecutive months will not be suspended, removed or dismissed from the service of the company without just cause. In case of suspension, removal or discharge of an employee, he may, if he desires, have a thorough investigation by proper officers and such desire shall be signified within five days after the date of suspension or removal, and the investigation shall be begun as soon as practicable, but within ten (10) days of the date of such notice, and proceed with as little interruption as practicable until completed. The employee shall have full authority to present his case and offer testimony and may be accompanied by a fellow employee.

If the suspension or removal is found to have been without just cause, employee shall be reinstated and paid for the time lost.

Employees will have the right to appeal their case to higher officials in their regular order up to the Vice-President.

RULE 10.

Service Letters.

(a) When employees who have been in the service three months or more leave the employ of the company, they shall, if so desired, be furnished with service letter showing length and kind of service rendered and whether leaving on account of resignation or dismissal.

(b) Employees securing employment with this company will upon request have returned to them all service cards, letters and recommendations or any other papers which have been furnished by them to the company for investigation.

RULE 11.

Employees and Officers to Confer.

When difference as to schedule and practices under it arise it is deemed best for employees and local officials to confer individually, and in fair spirit dispose of the matter. If, however, employees desire to present their views to any officer of the company by means of a committee selected from the employees of the company, they may do so.

RULE 12.

Free Transportation.

Employees will be granted free transportation and leave of absence to attend their meetings, such transportation will not extend beyond the next division adjoining their superintendent's division, and leave of absence will not exceed two (2) days, and will only be granted when it will not interfere with the requirements of traffic and the service, and provided the company is not put to additional expense.

RULE 13.

Notice of Changes.

The foregoing rules, interpretations and rates of pay have been agreed to and are to remain in force subject to thirty (30) days' notice given by either party desiring a change.

Grand Trunk Railway Company of Canada:

(Sgd.) HOWARD G. KELLEY,
President.

For the employees:

(Sgd.) J. L. BURGER,
General Chairman B. of R. S.

Report of Board in Dispute between the London Street Railway and its Motormen, Conductors and Barnmen

A UNANIMOUS report was received from the Board of Conciliation and Investigation appointed in connection with a dispute between the London Street Railway and its motormen, conductors and barnmen, relating to wages. The award was accompanied by an agreement signed by both parties. The Board was composed as follows: His Honour Judge L. B. C. Livingstone, of Welland, chairman, and Messrs. F. H. McGuigan, of Toronto, and Chas. Ferguson, of London, appointed on the recommendation of the company and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other Board members.

Report of Board

To the Honourable T. W. Crothers, K.C., M.P.,
Minister of Labour,
Ottawa, Can.

Sir,—

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the London Street Railway Company, employer, and certain of its employees, being motormen, conductors and barnmen, members of Local Division No. 741, Amalgamated Association of Street and Electric Railway Employees of America, employees.

The Board of Conciliation herein beg to report as follows: On being notified of their appointment, the members of the Board held a preliminary meeting at London on the sixteenth day of May, 1918, when it was found that the parties were not quite ready to proceed, and it was arranged to hear the parties, and any evidence that might be adduced, on the twenty-third day of May, 1918. The Board accordingly met on the twenty-third day of May, and continued its sittings on the twenty-fourth and twenty-fifth days of May, and at these sittings it heard what evidence was adduced on behalf of the parties, as well as the arguments advanced. The Board's efforts to bring about a settlement between the parties were not successful up to that time, and the Board therefore adjourned until the 28th day of May, when it resumed its sittings, and meetings were held on that day and on the twenty-ninth, thirtieth and thirty-first days of May.

As a result of the negotiations conducted by the Board we are pleased to be able to report that all matters in dispute have been finally adjusted and reduced to agreement in writing, in triplicate, one original copy of which is enclosed herewith, signed by the manager of the company and by the representatives of the employees.

We have the honour to be,
Sir,
Your obedient servants,

(Sgd.) L. B. C. LIVINGSTONE,
Chairman.
(Sgd.) F. H. MCGUIGAN,
For the Company.
(Sgd.) C. C. FERGUSON,
For the Employees.

THE LONDON STREET RAILWAY COMPANY.

Working Conditions for the Motormen and Conductors.

Effective May 1, 1918.

This agreement entered into in triplicate this thirty-first day of May, A.D. 1918, between the London Street Railway Company, its successors and assigns, hereinafter called the company, of the first part, and certain of its employees, being motormen, conductors and barnmen, represented by the parties who sign this agreement, being their duly accredited representatives, hereinafter called the employees, of the second part.

Witnesseth:

That the parties hereto mutually agree to and with each other as follows:

SECTION 1.

The company has no objections to any of the motormen and conductors, or any other employees of this company, both present and future, joining the Amalgamated Association of Street and Electric Railway Employees of America, each employee being at liberty to use his own judgment in this regard.

SECTION 2.

The company agrees to meet and treat with any committee of its motormen and conductors, or any other committee of its employees (whether they are the properly accredited officers of the association or not), on all matters and grievances affecting them, which may arise from time to time, said committee or committees to consist exclusively of employees of this company.

SECTION 3.

In the event of a motorman or conductor being suspended or discharged from the service of the company, and if he feels such suspension or discharge to be unjust, he shall have the right to have his case taken up by any committee of the employees, and his case brought before the superintendent within three (3) days of such suspension or dismissal. If upon

further investigation, first by the superintendent, and then, if necessary, by the manager, such employee is, in the judgment of such official, found not guilty of such cause to warrant such suspension or discharge, he shall be reinstated to his proper place in the service of the company, and shall be paid for all the time lost during such suspension or discharge at the rate of his regular daily schedule run.

SECTION 4.

Seniority in service of the company shall govern so that motormen and conductors may select their runs in accordance with this principle, that is: When the board is made up the men longest in the service shall first select his choice of run, the second in service shall next select, and so on down the list until all scheduled runs shall have been filled. A service seniority list shall be posted near the board for the purpose of assisting the men to select their runs. Selection of runs as here indicated shall be made each time the board is changed. Board to be changed once a month.

SECTION 5.

From the first day of May, 1918, until the termination of this agreement, the wages of the employees shall be as follows:

For motormen and conductors:

For the first year ..... 30c per hour.
For the second year ..... 33c per hour.
For the third and subsequent years.... 35c per hour.

Regular motormen and conductors shall receive 10c per hour in addition to their regular rates for service performed after their scheduled working hours.

The wages of barnmen and linemen shall be increased 3½c an hour over and above the present schedule of rates, and the wages of trackmen shall be increased 2c per hour over and above the present schedule of wages paid to them.

SECTION 6.

The company will pay one-half of such uniforms as may be from time to time required. Orders for such uniforms being obtained from the superintendent. All caps after first to be provided free.

SECTION 7.

The company will immediately take steps to provide proper lavatory accommodation on the respective car lines for necessity of employees on duty.

SECTION 8.

Men off sick, when ready to go to work shall be permitted to report for duty on or before four o'clock of the day previous to their starting.

SECTION 9.

All spare motormen and conductors who are booked for show up shall be paid for each show up (unless he gets a run) as follows: one hour for each show up on week days and from time ordered to report until released on Sundays.

SECTION 10.

All conductors shall be supplied by the company with twenty dollars ($20.00) with which to purchase tickets and change necessary for the operation of their cars.

SECTION 11.

Satisfactory arrangements will be made by the company for compliance with the law of letting men off one day each week, when working on Sunday, and a list shall be posted sufficiently far in advance notifying the men of their off-day.

SECTION 12.

Day men "missing" will show up before 10 a.m. and relief men missing before 5 p.m., and will take such work as the car starter may allot to them, provided, however, that the spare men shall have first choice in allotting any such work. Should the car starter provide no work for such day men who have slept in by 10.30 a.m., then such day men shall be relieved from further duties that day, and shall take his car at the usual time the following morning. All men who do not report as required in this section will be placed at the foot of the spare board for the day following.

SECTION 13.

Motormen or conductors training students, working snow plows, or sweepers, shall be paid 3c per hour in addition to regular wage.

SECTION 14.

Any motorman or conductor re-entering the service of the company within six months from date of resignation shall receive their seniority rate of pay, when the time of his absence from the service is deducted, but he shall forfeit all rights on the seniority board.

SECTION 15.

The company will provide stools for all motormen, free of charge, on all cars of the company, and also standard stools for conductors on P.A.Y.E. cars.

SECTION 16.

Motormen and conductors shall be given reasonable leave of absence to transact any business of Div. No. 741 of the A. A. of S. & E. R. E. of America, and when returning shall have the same seniority standing.

SECTION 17.

No partiality or discrimination shall be shown to employees in regard to discipline and working conditions.

SECTION 18.

Regular motormen and conductors are to be paid for the present 10 minutes reporting time, during which each crew is to inspect the car and its equipment to make sure it is safe for service.

Sunday time paid each motorman and conductor to be at least equal to his respective week day run. No regular week day runs to pay less than nine hours, including the above 10 minutes reporting time.

SECTION 19.

An effort will be made to have the present order of the Dominion Railway Board relating to the crossing of the St. Mary's branch of the Grand Trunk Railway on Rectory street changed so that the conductors will not have to operate this derail.

SECTION 20.

Inspectors will be required to see to it that the Provincial law prohibiting passengers riding on the steps of open cars is enforced.

SECTION 21.

(a) After the present stock of so-called hard brake shoes and those already on order shall have been used up, no more such shoes are to be used on hand brake cars.

(b) Heaters or other methods are to be adopted as will prevent the complete frosting of the front vestibule windows.

(c) The installation of double sand boxes on each car will be continued as rapidly as possible, these sand boxes to be filled and in proper working condition when the car is ready to leave the barn. The motorman before starting out to inspect the same and report to the contrary.

SECTION 22.

That the entrance by front door of P.A.Y.E. cars of motormen and conductors and policemen be made a matter of adjustment from time to time, as practice may determine the best.

SECTION 23.

That switches at the corner of Dundas and Richmond streets be operated by the inspector on duty, when possible to do so without causing delay.

SECTION 24.

Any member of Division 741 desiring protracted leave of absence not exceeding 90 days shall make application for same in writing to the superintendent and then to the executive board of Division 741, specifying for what purpose said leave of absence is desired, and if permit is granted it shall be in writing, bearing signatures of superintendent and president of Division 741. Any time over fifteen days to be considered a protracted leave of absence.

SECTION 25.

This agreement and provisions thereof shall continue in force and be binding on the respective parties hereunto from May 1, 1918, to the first day of May, 1919, and from year to year thereafter unless changed by the mutual consent of the parties hereunto. Either of the parties hereunto desiring a change on any section or sections of this agreement shall notify the other party in writing of the desiring changes 30 days prior to May the first, 1919. Upon such notice the agreement shall be open to consider the change or changes desired. If not opened at that period it shall continue to the next year, and so on.

The London Street Railway Company:
(Sgd.) C. B. KING,
Manager.

Witness:
(Sgd.) L. B. C. LIVINGSTONE.

For the employees:

Chairman.
(Sgd.) J. REITH,
Secretary.

Dated at London, Ont., this thirty-first day of May, A.D. 1918.

Report of Board in Dispute between the Corporation of Winnipeg and its Employees

A REPORT was received from the Board established to deal with a dispute concerning wages between the Corporation of Winnipeg and its employees, members of Civic Employees Federation No. 4. The Board was composed as follows: Mr. F. M. Black, of Winnipeg, chairman, and Messrs. James Auld and Roland F. McWilliams, both of Winnipeg, appointed on the recommendation of the Corporation and employees respectively. The award was unanimous and was accompanied by a proposed schedule of rates to be effective from May 1, 1918. The award also recommended that civic employees, members of unions other than Federation No. 4, who had gone on strike, but had returned to work, be given increased wages.

Report of Board

Winnipeg, Manitoba, 21st June, 1918.

To the Honourable
the Minister of Labour,
Ottawa, Ont.

Sir,—

Re Industrial Disputes Investigation Act, 1907, and *re* differences between the Corporation of the city of Winnipeg and civic employees, being Civic Employees Federation No. 4.

The Board of Conciliation appointed herein begs to report as follows:

Application For and Constitution of Board.

The application herein was forwarded by the Civic Employees Federation No. 4, and dated thirteenth May, 1918. In such application it was stated that the employees directly and indirectly affected numbered 321.

The chairman received his appointment on May 21, 1918. In the instructions received from the Minister of Labour, attention had been called to the fact that a somewhat difficult industrial situation existed in the city of Winnipeg, and that it was desirable that work be proceeded with as quickly as possible. The other members of the Board, Mr. R. F. McWilliams for the Federation, and Mr. James Auld for the city of Winnipeg, having already been appointed, it was possible to hold the first session of the Board of Conciliation and Investigation on the afternoon of May 21, 1918. At the request of both parties the sittings were adjourned for a week to permit preparation of material.

Work and Scope of Inquiry.

Since then sessions have been held on May 27, 28, 29, 30, 31, and on June 6, 7, 10, 12, 13, 14, 15, 17, 18, 19, 20 and 21. By agreement of both parties all sessions were held in private.

Very early in the proceedings it was announced by the representatives of the city that the City Council expected that the scope of the Board's work would include an investigation into the entire relationship between the city and its employees, the status of each employee, the class of his duties, the remuneration which he should be paid, and his hours of labour. At

the opening of its case the Federation filed a schedule and supplementary schedule containing an exhaustive classification and grading of its members and a definition of the duties to be attached to their respective positions, which would have necessitated an inquiry of similar scope. In short, it was apparently desired by both parties that the Board should perform the functions of a Civil Service Commission.

The Board very clearly and definitely pointed out that it had no such powers or instructions, but it was informed that the same idea was again voiced at a special meeting of the City Council held to consider the report of its own committee, on June 19.

At the second session the question was asked as to whether either party were willing to bind itself to accept the findings of the Board, under section 62 of the Act. At that time neither would do so, but at the last session of the Board a letter was received from the Employees Federation, dated June 19, agreeing to abide by the terms of the recommendation which the Board may make to the Minister of Labour.

The Board would call attention to the fact that the city of Winnipeg apparently did not file a statement in reply to the Federation's application in terms of section 19 of the Act. In consequence when the Board commenced its work, considerable time was taken in an endeavour to find out just where the city stood with relation to the application.

The Federation, on the other hand, had given its case considerable attention and appeared at all times to have it well in hand and ready to be advanced rapidly.

Results.

In spite of the numerous sessions which have been held, the Board regrets to report that a final settlement of the dispute has not been reached. However, it cannot be said that the work done has been in any sense a failure, as the representatives of the Federation and the city finally reached a common basis for a settlement of the matters in dispute. A special informal meeting of the City Council, called to receive the report of its representatives, did not ratify it. The Board believes that such action has arisen from a misconception of the duties and scope of a Board of Conciliation. Possibly the removal of this misconception will pave the way to the acceptance of the tentative basis of agreement reached between the city's representatives and those of the Federation.

History of and Nature of Dispute.

The Federation making the application came into existence in April, 1917, and, in November, 1917, had presented to the Board of Control of the city of Winnipeg a schedule showing the various classes of employees graded in positions and salary according to the importance of their employment. Apparently this communication was not acknowledged by the Board of Control. In March, 1918, a further revised schedule was submitted to the Board of Control, without any further progress being made, and, on April 26, 1918, a delegation from the Federation met the Board of Control with a view to establishing the salaries to be paid for the fiscal year commencing May 1, 1918.

Certain others of the departments of the city having later gone on strike, and a special committee having been appointed in this connection, such committee was approached by the Federation to deal with their claims, but the committee informed them that their dispute had better be left to an independent Board. Application was then made to the Minister of Labour for a Board of Conciliation and Investigation.

It is material to note that, pending adjustment of the dispute, and although other city departments were on strike, the employees, who are the applicants in this case, remained at work.

The matters in dispute related to the schedule before referred to and a supplementary schedule filed during the investigation which covered:

(a) A classification of the grades of the different members of the Federation in various city departments.
(b) A definition of their duties.
(c) The minimum and maximum salaries to be attached to the various grades of employment and annual increases.
(d) Hours of labour and holidays.

The case as originally presented by the Federation involved the adoption of a scheme of organization of the city departments modelled along the lines recommended in a report prepared at the request of the Milwaukee Board of City Service Commission, after a survey of the municipal organization of the city of Milwaukee.

The Federation subsequently withdrew its claim for the adoption of the schedule and the system of classification and grading outlined in the supplementary schedule under the arrangements outlined hereafter.

In the course of early discussions on the schedule the fact emerged that a report referred to as the "Equalization Report" existed, which, subsequently, upon request, was produced by the city's representatives. This report, which was dated April 9, 1918, was made by the heads of the various departments affected by this investigation, upon the instructions of the Board of Control, "to consider the matter of equalizing the salaries of the different staffs and of bringing up to the average rate those which appear to be below standard," and suggesting that the department heads confer together with the object of establishing a uniform salary rate for all positions in the Civil Service." In the letter forwarding it to the Board of Control, it is stated that it is "the result of careful analysis by the department heads in their work of co-ordinating and equalizing the wages paid to the different staffs."

It was learned that this report had been received, but was not acted upon by the Board of Control, except to a limited extent.

After due consideration it seemed reasonable to the Board of Conciliation that the heads of the various departments should be better acquainted than any others with the respective value of the members of their staffs, and the Board therefore decided to recommend that any possible settlement should be based upon this Equalization Report.

With this in view each member of the Board of Control was asked to confirm or otherwise the recommendation of the heads of the departments for which he was responsible. Objection was raised by the Federation to several of these recommendations on the instructions of the members affected. Such contentions have been considered by the Board of Conciliation, and it has accepted the Equalization Report except as to certain special cases which have been amended in accordance with the evidence, as set out in the schedule appended hereto.

Increased Salaries and Wages.

With regard to the salary question, as already indicated, a critical industrial situation had been confronting the city. Applications for increases in wages had been made by several departments. The city did not deny the reasonableness of requests for increased wages, but had adopted a plan which was not acceptable to the Federation or to the four unions which ultimately went on strike. This was what was known as the "War Bonus System." Under it $3.00 per week was to be granted to all married men earning less than $1,200.00 per annum, and $2.00 per week to all unmarried men earning less than $1,200.00 per annum; also, $2.00 per week to all men between $1,200.00 and $1,600.00 per annum, but in any event the aggregate of the wage or salary as augmented was not to exceed $1,600.00. This was passed by the City Council on April 29, 1918. At the same time they increased the salaries of 15 employees and the pay of junior clerks and messengers, the latter, however, to receive no war bonus.

Thus the city had quite clearly committed itself to the principle of increasing wages and salaries on account of the abnormal conditions prevailing, the only real difficulty on their part being as to how these should be adjusted.

The Strike Settlement.

A settlement with the striking employees was made by the city on the basis of substantial increases in wages. The four unions involved were those of the electrical workers, who obtained an average increase of 12 per cent; the firemen, whose average increase varied according to method of figuring, between 11.98 per cent and 12.38 per cent; and the teamsters and water works employees, who received increases on their hourly wages, which in the former case averaged 16 per cent, and in the latter case averaged 17.03 per cent.

It was stated by the city's representatives that the average increase to the four striking unions on their total payroll was 13.33 per cent.

At the time that the settlement of the strike was effected, it appeared to be the concensus of opinion among the Mayor and Aldermen of the city and the public generally that the men who did not strike should not be dealt with on any basis of increase which was less favourable than that granted the strikers. This suggestion, accordingly, afforded ground for a possible settlement between the Federation and the city.

The Basis of Conciliation.

On the fourth of June, 1918, therefore, the following tentative basis of settlement was put forward for consideration:

(1) An expression of opinion was desired as to:

"The wisdom of a schedule being established, but not in war time, and that a committee should be appointed to discuss it between now and the possible date of establishment."

This proposal was accepted by the representatives of both parties on June 6, 1918, and was again discussed with the Mayor and with the members of the Board of Control as individual members of Council at the session of June 13, and confirmed by them.

(2) "That the percentages of increases granted individually should not be less than the percentages granted to striking employees."

This proposal was accepted by the city's representatives on June 6, 1918, and confirmed by the Mayor at the session of June 13.

(3) "That the dispute then be narrowed down to the adjustment of the equalization brought in by the heads of departments."

This was accepted by both parties at the session of June 6, on the basis of the recommendations to be confirmed by the department heads and the Controllers in charge.

The action taken by the Board of Conciliation under the last clause has already been referred to, while the principle enunciated in clause 2 served as the ground upon which the representatives of the Federation and the city finally reached an agreement.

Clause 1 was not finally agreed upon at the close of the sittings. The Council voiced, through its representatives, a strong objection to any committee dealing with the schedule, for the following reasons:

(a) That no matter what might be done all might be changed when the war ends, and

(b) The city would retain the right to set the duties of its own employees.

The representatives of the city and the Federation conferred together as to the percentages of increase which should be given to the members of the Federation upon the basis agreed upon outlined above in the second proposal. The Board was informed that as a result of the conference between the representatives of the city and the Federation the following rates of increase had been tentatively agreed upon, viz.:

(a) On salaries below $85.00 per month an increase of $13.00 per month.

(b On salaries from $85.00 to $100.00 per month an increase of 16 per cent.

(c) On salaries from $100.01 to $133.35 per month an increase 12 per cent.

(d) On salaries from $133.34 to $166.66 per month an increase of 10 per cent.

The maximum salaries covered by this arrangement was $2,000.00 per annum. No increases were to be allowed on salaries over $2,000.00 per annum, and the maximum increase, when made on a percentage basis, to employees in one class was not to exceed the minimum increase of the class immediately above.

A comparison of these suggested increases with the increases granted to the striking employees shows a slight advantage in favour of the Federation.

As already stated, this tentative agreement was at the request of the Board of Conciliation submitted to an informal meeting of Council, at which the city's representatives sought to get authority to make a settlement with the Federation. The Board was informed, however, that the City Council at that stage had decided not to give this authority to its representatives, and desired the opinion of the Board on the whole matter.

At the next session the city's representatives expressed a desire to introduce evidence as to salaries paid by private employers in the city of Winnipeg to employees performing similar duties to those of the members of the Federation. The Board, however, was of the opinion that in order to consider this matter it would be necessary to make a lengthy inquiry into this and other questions pertinent to that issue, which would be more properly a subject for consideration by a special commission. It was thought that, in view of the tentative understanding arrived at by both parties as above outlined, the existing salaries paid to members of the Federation (subject to equalization in certain cases) was, for the purposes of this investigation, a reasonable basis for a settlement of the matters in dispute for the current fiscal year.

During the proceedings the advisability of establishing a permanent committee to be appointed by both parties to deal with grievances of employees and any questions of a similar character was discussed. The representatives of both parties expressed their concurrence in the desirability of having such a committee, and that the arrangements already made for the appointment of a similar committee between the city and the striking employees should be made applicable between the city and the Federation.

Conclusion.

Having regard to all the foregoing circumstances, the Board of Conciliation and Investigation begs to report and recommend:

(1) That the Equalization Report submitted by the heads of the departments with the amendments set out in the schedule hereto should be adopted.

(2) That the various members of the Federation be given the percentage increases tentatively agreed upon by the representatives of the Federation and the city, as a fair settlement, viz:

(a) On salaries up to and including $1,200.00 per annum, an increase of 16 per cent, with a minimum increase of $13.00 per month.

(b) On salaries above $1,200.00 up to and including $1,600.00 per annum, an increase of 12 per cent.

(c) On salaries above $1,600.00 up to and including $2,000.00 per annum, an increase of 10 per cent.

Such increases to take effect as from May 1, 1918.

(3) That the arrangement for the appointment of a committee to deal with grievances of employees and matters of a similar character made between the city and the striking employees be made applicable as between the city and the Federation.

(4) That a committee should be appointed representing both the city and the employees, and preferably with an outside chairman, to consider how far it is practicable during war time to establish a classification of civic employees along civil service lines.

(Sgd.) F. M. BLACK,
Chairman.

(Sgd.) JAMES AULD,
Member of Board.

(Sgd.) R. S. MCWILLIAMS,
Member of Board.

Dated at Winnipeg, this twenty-first day of June, A.D. 1918.

Copy "Equalization Report" referred to in Report of Board of Conciliation, dated June 21, 1918.

City of Winnipeg, Manitoba,
April 9, 1918.

To the Chairman and Members,
Board of Control,
City Hall, City.

Gentlemen,—

On March 21, your Board, by letter, instructed the department heads to consider the matter of equalizing the salaries of the different staffs and of bringing up to the average rate those which appear to be below standard. Your letter also suggested the department heads conferring together with the object of establishing a uniform salary rate for all positions in the civic service.

Attached herewith please find a list of all monthly salaried employees of the city of Winnipeg. This schedule indicates the present salary and the necessary adjustment, which is the result of careful analysis by the department heads in their work of co-ordinating and equalizing the wages paid to the different staffs. These adjustments, embracing a total staff of 745 employees, call for a total increase of $13,935.80, on a total yearly paylist of $896,088.72.

We recommend that these adjustments be approved by your Board to become effective May 1, 1918, and we further recommend that a bonus of 12 per cent, which does not include the above mentioned adjustments, be awarded to all civic staffs (department heads included), to become effective May 1, 1918.

We have not endeavoured to equalize the salaries of the heads of departments, as we think this is a matter that should be dealt with by your Board, but the general increase applicable to all civic employees can be taken into consideration in the event of subsequent adjustments which your Board may make from time to time in individual cases.

Yours respectfully,

(Sgd.) A. J. DOUGLAS.
(Sgd.) L. W. DONLEY.
(Sgd.) J. E. BUCHANAN.
(Sgd.) J. H. MCCARTHY.
(Sgd.) R. RIDD.
(Sgd.) J. S. NICHOLAS.

Report of Board in Dispute between A. Davis and Sons, Ltd., of Kingston, and their Leather Workers

A REPORT was presented by each of the three members of the Board of Conciliation and Investigation appointed to deal with a dispute between A. Davis & Sons, Limited, and their leather workers, regarding the alleged dismissal of an employee on account of his affiliation with the union. The Board was composed as follows: His Honour Judge R. D. Gunn, of Ottawa, appointed by the Minister in the absence of a joint recommendation, and Mr. J. F. Whiting, of Kingston, and Mr. Tom Moore, of Niagara Falls, appointed on the recommendation of the company and employees respectively. The reports showed a difference of opinion as to whether the workman in question was dismissed on account of his connection with the union, and also in regard to the question of his re-instatement. A strike occurred on June 18, but the employees resumed work on June 25, after an adjustment by direct negotiations, in which assistance was rendered by an officer of the Department of Labour.

Report of Board

In the matter of the Industrial Disputes Act and amendments, and in the matter of a dispute between A. Davis & Sons, Limited, employers, and their leather workers, being members of the Leather Workers' Union, employees.

To the Hon. T. W. Crothers,
Minister of Labour,
Ottawa, Canada.

The employees made application for a Board of Conciliation and Investigation, which you duly appointed on May twenty-ninth, 1918, and the nature of the dispute to be investigated as set out in their statement is "the dismissal of an employee, to wit, James Kennedy, for taking part in organizing a local union, coupled with a demand by the Leather Workers' Union for his reinstatement with compensation for loss of time," and in the efforts made to adjust the dispute it is alleged that "a committee of the central body, to wit, the Kingston Trades and Labour Council, was appointed to interview the employers, but the employers refused to meet the committee." The employers, on the eighteenth of May, 1918, advised your Department that "the employee was not discharged on the grounds set out in the application, namely, for participation in the formation of a union—as no union either existed or was contemplated by the employees at the time of his discharge, but that he was discharged for misuse of a portion of the time for which the employers were paying him to work in their interests."

After arranging preliminaries, the Board met at the City Hall, in the city of Kingston, where all parties reside, on the third day of June, 1918, and having made all earnest efforts that should be made to effect an amicable settlement of the trouble, were requested to hear the representations and evidence, and proceeded to do so in the presence of both sides interested. Mr. William Baxter, Mr. Hugh Ferguson and Mr. William Morris appeared for the union employees, and Mr. Elmer Davis, the president of the Davis Company, represented the company.

Mr. Baker shortly explained the origin and nature of the dispute as heretofore described, explaining that steps had been taken to form and incorporate the leather worker employees of the A. Davis & Sons Company, Limited, operating at Kingston, into a union affiliated with the Trades and Labour Council of the city, and a formal meeting was to be held on Saturday afternoon, the twenty-seventh day of April, 1918, and on the morning of the same day James Kennedy, who had been active in the promotion of the formation work amongst his fellow employees, was dismissed and paid off by the secretary-treasurer of the company for the reason that he was active, as stated, and on his case being taken up by a committee appointed to wait on Mr. Davis, they did get no hearing, and the matter was carried into your Department and a Board appointed.

Mr. Davis stated that he refused to hear the committee, as there were men on it who were not his employees, and, further, that he refused to hear any committee as a committee, but would not refuse to hear his own employees or any one of them having a complaint.

These statements so far very fairly outline the whole situation and dispute which resulted in these proceedings, and one cannot refrain from stopping just long enough to say it was of minor magnitude and interest to all but those concerned, but we had to deal with it in a public way and with hopeful results if sane counsels only prevailed.

After some discussion on those representations, the Board heard the evidence under oath

of James Kennedy, Harold Case and George Babcock, and Harold Davis, secretary of the company.

Kennedy stated that he had been in the employ of the company from 1908 to 1912, when he and his brother ventured into a small leather business for some years, and both went back to the company in 1917, and he was still there till the twenty-seventh of April, 1918. He is a currier by occupation. Prior to dismissal he had been speaking to his fellow employees about benefits of organizing a union to get better terms and conditions, and three held a meeting and called a general meeting for Saturday afternoon, twenty-seventh April last, by personal invitation. There are 90 to 100 men employees to organize as leather workers. About 9.30 in the morning of the twenty-seventh of April last he was called to the office and met Mr. Harold Davis and Mr. Williams. Mr. H. Davis said to him, "It is a well known fact to us that you are dissatisfied with present conditions here. We are sorry that this should happen, as you have been in our employ a number of years. We are and have been well satisfied with you, and any time in future you are of a different opinion come back, see Mr. Williams, and a job is waiting." He then gave him his pay and said he was discharged. He invited Kennedy to sit down and say anything he had to say and he would be pleased to hear him. Kennedy said nothing and went out. Kennedy further said a notice had been put up in the factory on same day shortly before he was called. Kennedy denied he had done any organization work on the company's time and gave the information above set out afterwards to the other men. The notice referred to as furnished reads: "The policy of this firm in connection with every phase of administration will be directed by the management in future as in past: Employees who from any source have been led to believe otherwise will please note carefully and govern themselves accordingly."

"A. Davis & Sons, Limited."

"April 27, 1918."

Harold Cass stated he had been three years with the company, and was called to the office after Kennedy, on same day, when Harold Davis said to him, "He (Cass) was an agitator for nine hours a day with ten hours' pay. Further, the company was running and going to run the tannery without any outside interference. He had discharged one man that day and didn't care if he discharged 25." He asked if I was going to the meeting in the afternoon. I said "No." He says, "You have a change of heart and if Mr. Williams is agreeable you can go back to work."

George Babcock stated that Mr. Davis called him one day about dinner time and asked him how he stood in the agitation and was told Babcock belonged to union. He further complained to Babcock that he had been unfriendly in joining union.

Mr. Harold Davis stated he had heard the statements of men. He said he discharged Kennedy because in the judgment of firm he was neglecting work and they were not satisfied with his work the last week of April. He was not turning in the quantity and was interfering with the other men in performance of their duties, which in judgment of firm he had no right to do, and told him (Kennedy) he could get other employment elsewhere. He denied some of Cass's statements in minor parts.

Mr. Elmer Davis stated that his brother Harold had full authority to discharge Kennedy, and further that he had refused to meet the committee or discuss employees' affairs with any committee, but if any employee desired to present any grievance he could do so, and, if need be, might have others with him, but not as a committee. His objection was against any recognition of any committee as such and that Kennedy had not sought any conference with the company and had not been discharged for his activity in connection with formation of union—as also did Mr. Harold Davis.

Again at this point the Board desired any present to add anything further in shape of evidence that was material, but all agreed that there was nothing further to present. The situation was reviewed by the Board and the chairman urged the parties to meet and arrange in a friendly manner their differences, and time was given for that purpose with a strong exhortation that the parties come together, but recent advices permit of no hope of any satisfactory adjustment.

In accordance with the agreement of the Board, if no settlement was arrived at, then each member should write his report. I now furnish mine.

It will be quite apparent to any unprejudiced mind that the proper inference to draw from the whole testimony and relevant representations is that the company, employers, were aware that steps were being taken by and among their employees to organize the employees into a labour union with the end in view of agitating for shorter hours and better rates, if possible, involving, as the employers apprehended, unrest and disturbing influences between them and their men, and objected to such efforts, and it must also be assumed, and with reasonable certainty, that the firm knew Kennedy had been taking some active part in the agitation with his fellow employees to organize them into a union, and it is not unfair or improper to conclude that the employers were dissatisfied with Kennedy's action, and it was for such reason largely, if not entirely, that Kennedy was discharged, as nothing was shown to warrant dismissal of Kennedy except the very general statement that Kennedy during the last week of April had failed to turn out his fair share of work and had in some unexplained way interfered with some of his fellow workmen during working hours. In reaching these conclusions, no violence is done any part

of the evidence, including the statements contained and the terse and autocratic words of the notice of twenty-seventh April, 1918, posted so shortly preceding the calling in of Kennedy and Cass and the contemplated meeting of employees on same day. Having arrived at these conclusions, I merely desire to add that in my opinion the complaint of the employees that Kennedy was dismissed principally for the reason that he was active in promoting the formation of his fellow employees into a labour union was well founded.

I take it as conceded that the employees were not members of the Leather Workers' Union and did not have any schedule of rules governing their employment with their employers on twenty-seventh of April, 1918, and though a union was formed and a charter granted to the members on or since the date of the dismissal of Kennedy I am not clear that there is any authority to recommend a reinstatement of Kennedy with or without compensation, or that any benefits would arise from such recommendation, as the employers under the contract of hiring might do just what they did and cannot be required to reengage him unless there is some agreement or provision or rule to such an effect with or without compensation for time lost; but I see no reason why the employers should not reengage Kennedy in the circumstances, as I am quite satisfied that had there been no activity on Kennedy's part about the formation of the union amongst employees, there would have been no dismissal on the twenty-seventh of April, 1918.

I did not carry the enquiry into any other questions than the one outlining the dispute and do not know anything about the intentions of the employees upon and after the incorporation of the union, or upon the suggestion as to hours or wages, leaving these demands, if they ever arise, to be disposed of as might be directed, as such demands can only be of importance when presented, and, if refused, may be dealt with in the usual satisfactory manner provided, and are at present at least premature and outside the dispute to be investigated.

(Sgd.) R. D. GUNN,
Chairman.

Dated twelfth June, A.D. 1918.

Judge R. D. Gunn,
Ottawa.

Dear Sir,—

As a member of the Board appointed by the Hon. T. W. Crothers, Minister of Labour, to investigate and report upon the dispute between the Davis Company, Limited, of Kingston, and certain of their employees, members of the Leather Workers' Union, also of Kingston, I have the pleasure to submit to you as chairman the conclusions which I have arrived at, after fully considering the evidence given at the enquiry held in Kingston, Ont., on the third of June.

The charge that one James Kennedy was discharged for his activity in getting the employees of this firm to form a union for their mutual advantage was fully borne out. It was admitted by the company that this man had been a satisfactory employee for seven years, and only became objectional to them when a meeting was arranged by the men to jointly discuss their conditions and the formation of a union. Evidence which was not disputed was given by fellow employees of Kennedy's that Mr. Harold Davis, the secretary-treasurer of the company, had tried to induce other employees to have nothing to do with the formation of a union.

At the time of Kennedy's discharge, another employee took oath that Mr. Davis had told him, "We already have discharged one man and we can do the same to another 25 if necessary." The only thing apparently that saved this man's job being a promise from him not to attend the meeting called for the organization of a union.

I was also very much impressed with the acknowledgment of the company's representatives that a notice warning men that no recognition of other agencies than the company's management in regard to working conditions would be given, and for them "to note carefully and govern themselves accordingly." This notice, being posted simultaneously with the dismissal of Kennedy, to my mind was meant and possibly in some cases acted to deter others from joining a union, and impressing them with the drastic action taken with Kennedy in this respect.

Reviewing all the above, I am of the opinion that we should recommend that the company reinstate James Kennedy to his former employment, and, in view of the fact that this man has not been able because of the peculiar nature of his trade to secure employment in Kingston as a currier in the interval, that he be reimbursed for wages lost pending the hearing of this case.

Special mention should be made of the fact that, because of this firm being engaged on material necessary to the carrying on of the war, the action of the men in remaining at work under the provocation offered by the company should be commended.

It was to be deplored that the president of the company, Mr. Davis, still maintained an attitude of hostility to receiving any committee representing his employees as a union, and even further refusing to consider meeting them even as a committee of his employees, insisting that any who approached him must do so as individual employees, thus shouldering all the responsibility of assisting each other on the employees selected to do so, without allowing him

the protection he would receive as a member of a grievance committee of a union.

This attitude cannot do otherwise than lead to continued friction, not only in the factory directly concerned, but, as it strikes at the root of all rights of men to organize, must have a disturbing effect on other employees in a whole community, as recently witnessed in Winnipeg. I would recommend that this action of the company be brought to the attention of the Militia Department and other Government bodies purchasing supplies of the nature made by this company, to the end that supplies for the use of our gallant men so nobly defending the rights of a free democracy should be made under conditions where the basic principles of such a democracy are recognized—"the right to organize, and the right to bargain collectively for improvement of their living conditions."

I would be pleased to attach my signature to any report you may deem it advisable to draft providing that it incorporates the sentiments expressed in the above as fully as possible. If you cannot do that, then I would respectfully suggest that this letter be passed on with your report to the Minister of Labour for his information as to my conclusions.

I have the pleasure to remain,
Yours very truly,

(Sgd.) TOM MOORE.

June third, 1918.

To the Honourable
the Minister of Labour.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between Messrs. A. Davis & Son, Limited, Kingston, Ont., employer, and their leather workers, being members of the Leather Workers' Union, employees.

The reference in this matter having closed without our being able to bring the parties to agree, I beg leave to report that in my judgment the cause of the dismissal of James Kennedy was not "his taking part in organizing a local union," as alleged, but his using his time during working hours to express in the shop his dissatisfaction with the existing hours of labour and to his trying to create among the 90 odd other employees a similar dissatisfaction and secure a general demand for a nine hour day with a ten hour pay.

I am further of opinion that the company were under these circumstances justified in saying to him, as they did, that if he was dissatisfied with the existing conditions and was trying to create dissatisfaction while in the shop, they thought it better he should go elsewhere.

It appears that all the other tanneries in Canada work for 10 hours and pay their men wages similar to those paid by the Davis Company, and that to run on a nine hour schedule and continue to pay the existing wages would subject them to a 10 per cent handicap and prevent their ability to compete with their rivals in business.

(Sgd.) JOHN L. WHITING.

Kingston, fifth June, 1918.

Reports of Royal Commission appointed to deal with disputes in industries engaged in coal mining, steel making and shipbuilding in Nova Scotia

REPORTS were received from the Royal Commission appointed to investigate the disputes existing in industries engaged in coal mining, steel making and shipbuilding in Nova Scotia. The Commission was composed as follows; The Honourable Mr. Justice Joseph A. Chisholm, chairman, Rev. Dr. John Forrest and Mr. J. B. McLachlan. Disputes were investigated and reports rendered thereon affecting the following companies and their employees:

1. The Nova Scotia Steel and Coal Company, Limited, and its employees in the steel plant at Sydney mines, N.S.
2. The Nova Scotia Steel and Coal Company, Limited, and certain of its employees, being washplant men, section men, shippers and trimmers at North Sydney, N.S., members of the Amalgamated Mine Workers of Nova Scotia, and road makers engaged at the Florence Colliery.
3. The Nova Scotia Steel and Coal company, Limited, and its employees in the steel plant at Trenton, N.S.
4. The Eastern Car Company, Limited, and its employees at Trenton, N.S.
5. J. W. Cummings and Son, Limited, New Glasgow, N.S., and its employees being members of certain trade organizations.
6. The Dominion Iron and Steel Company, Limited, and its employees in the steel plant at Sydney, N.S.

Report re Nova Scotia Steel and Coal Company, Limited, and Employees at Sydney Mines, N.S.

In the matter of the Inquiries Act, Chapter 104, Revised Statutes of Canada, 1906, and in the matter of the Industrial Disputes Act, 1907, and in the matter of the disputes between the Nova Scotia Steel and Coal Company, Limited, and its employees in the steel plant at Sydney Mines, Nova Scotia.

To the Honourable T. W. Crothers, Esq., K.C., M.P.,
Minister of Labour,
Ottawa.

Sir:—

The undersigned, members of a Commission appointed by His Excellency the Governor General in Council on the 22nd day of April, 1918, to inquire into the above disputes, among others, have the honour to report as follows:

The members of the Commission met at the Town Hall, Sydney Mines, N.S., on Tuesday, April 30th, at 10 a.m. After having taken the prescribed oath, the Commission proceeded to hear the evidence of the employees and of the Company. The demands of the employees were as follows:

"1st. We want the Company to meet the committee representing all the men on the Steel "Plant to discuss any grievances which may "arise or for the adjustment of wages.

"2nd. That the Company collect our Union "dues with the understanding that we pay the "regular commission charged for other collections.

"3rd. In the event of any workman being "called out on emergency work on Sunday or "Holiday, the Company pay for ten hours for "working five or less hours, and double the time "for all work over five hours, and time and one-"half for regular work, and on all other days, "time and one-half shall be paid for overtime.

"4th. For all unskilled labour in and around "the Steel Plant the Company shall pay Thirty "Cents per hour.

"5th. For all men working in and around the "Steel Plant, not specified below, the Com-"pany grant an increase of 20 per cent on their "day rate.

"6th. All men working in and around the ore "pier shall be granted an increase of 20 per cent.

"7th. For all brick layers the Company shall "grant an increase of 10 per cent.

"8th. For mechanical repair men of the

First class.....50c per hour.
Second class.....45c per hour.
Helpers .....35c per hour.

"9th. That the rates hereinbefore mentioned "shall become effective on and after the 16th "day of February, A.D. 1918."

The Commission was in session on the 30th day of April and the 1st and 2nd days of May, 1918, and after hearing the evidence and the argument on both sides deferred the preparation of its report until the hearings were had at New Glasgow and Sydney where many of the same questions were involved. In the course of the proceedings the members of the Commission endeavoured to find a way to a mutual settlement of all the disputes but without result. On May 18th, the Commission was engaged in the consideration of the matters which are the subject of this dispute and in the preparation of this report.

Items 1 and 2. Recognition of Unions, etc.

This is and has long been a vexed question and any declaration in favour or against the claim to recognition would, the Commissioners think, be of little value in this case. The Commission, however, recommends that the Company be requested to receive and hear from time to time a committee of its own employees attending as such upon the officers of the Company for the discussion, and where they are conceded to exist the adjustment of any grievances which the employees complain of. Such grievances may be first presented to the immediate superior, and if the committee is not satisfied with his decision, it may be carried to the superintendent of the department, and from him, if need be, to the president of the Company. The details of the procedure may be left to the Company and its employees to settle upon; the only point which the Commission would urge, until another plan is agreed upon, is that the employees select from among themselves a small committee for mutual conferences, as grievances arise.

Item No. 3. Work on Sundays and Holidays.

In the Company's plant there is what is known as seven day work, that is, work carried on every day and night in the week. The rates for such work are fixed and fixed on the basis of its being seven day work. There is also repair work which is performed on Sunday, for which a rate and a half is paid. The Commission is of opinion that the existing arrangement should not be disturbed.

Items No. 4 to 8., inclusive—Wages.

The Commission recognizes the force of the argument made with respect to the great increase in the cost of living, and takes into account the increases made in recent years by the Company. The burden resulting from the increased cost of living falls most heavily upon the common labourer. The more highly paid men, of course, feel it also, but they share it in a degree common to all other citizens. We desire to see the common labourer who works in a straight rate receive at least a living wage and with that in view we recommend that the Company be requested to grant the increases hereinafter mentioned, the same to date from the first day of April, 1918:

Common labourer receiving—

24c an hour to receive....	27½c	an	hour.
25c an hour to receive....	28c	an	hour.
26c an hour to receive....	28½c	an	hour.
27c an hour to receive....	29c	an	hour.
28c an hour to receive....	29½c	an	hour.
29 and under 30c to receive	30c	an	hour.

As to any other increases asked for the Commission does not see its way to recommend them under existing circumstances.

If the parties to these disputes accept the recommendations of the Commission, the Commissioners wish to give expression to the hope that both parties will observe the terms of the settlement thus made for at least one year from April 1st, 1918.

All of which is respectfully submitted.

Dated this 18th day of May, 1918.

(Sgd.) JOSEPH A. CHISHOLM, Chairman
(Sgd.) JOHN FORREST.
(Sgd.) J. B. MCLACHLAN.
Commissioners.

Report re Nova Scotia Steel and Coal Company, Limited, and Employees at North Sydney, N.S., and Road Makers at the Florence Colliery

In the matter of Inquiries Act, Chapter 104. Revised Statutes of Canada 1906, and in the matter of the Industrial Disputes. Act, 1907, and in the matter of the disputes between certain employees of the Nova Scotia Steel and Coal Company, Limited, Sydney Mines, N.S., and the said Company.

To the Honourable T. W. Crothers, Esq., K.C., M.P.,
Minister of Labour,
Ottawa.

Sir:—

Two disputes between the above employees and the said Company have been referred to the Commission by a telegram from the Deputy Minister. One is from certain members of the Amalgamated Mine Workers of Nova Scotia, being washplant men, section men, shippers and trimmers at North Sydney, who claim the benefit of an agreement dated the day of March, 1918, and signed by the said Company and representatives of the said Amalgamated Mine Workers of Nova Scotia. The other relates to the complaints made by road makers engaged at the Florence Colliery with respect to the last mentioned matter.

A brief history of the case may explain the difficulty that has arisen. Up till April last the road makers or track layers in the Florence Mine received $2.39 per day, and two shifts for laying turns and sweeps, and one shift for lifting turns and connecting up road. In April this year a contract was signed between the representatives of the Company and the representatives of the Miners. In this contract the following paragraph refers to track laying.

c. "All track laying for the section will be done "by the datal rate until such time as a tonnage "contract is agreed upon."

The tracklayers of the Florence Mine south slope maintain thay they never have agreed to the present rate.

The Company holds that the seam in the south slope is about 5 feet 6 inches, while in the other slope it is only about 4 feet 6 inches. The tonnage rate in the south slope should be lower than in the case of the smaller seam.

The track layers of the south slope maintain that owing to the rolling character of the bottom of their seam, not only is the work heavier, but the cutting of coal is more difficult, and consequently a small quantity of coal is cut, and that even if they receive the same tonnage rate their pay would be smaller than that of the other track layers and considerably smaller than the pay they received under the old arrangement.

Your Commissioners feel that this is a matter that should be carefully considered by the officers of the Company, that the exceptional character of the mine slope should be taken into account and the tonnage rate be so increased as to give the men a wage rate something like that of the workman in the other slope, and at least something near what they had received before this change was introduced.

The other claim is that certain men, members of the Amalgamated Mine Workers of Nova Scotia, who are classed by the Company as being attached to the steel department, should have the benefit of the agreement above referred to. The agreement purports to be with the Amalgamated Mine Workers of Nova Scotia. These men are members of that body and are known to be such for their dues to the union are deducted at the Company's office. If these facts are as stated, the Commission thinks that their claim is well founded and recommends that the Company be asked to give the men the benefit of the agreement.

All of which is respectfully submitted.

Dated this 18th day of May, 1918.

Report re Nova Scotia Steel and Coal Company, Limited, and Employees at Trenton, N.S.

In the matter of the Inquiries Act, Chapter 104, Revised Statutes of Canada, 1906, and in the matter of the Industrial Disputes Act, 1907, and in the matter of the disputes between the Nova Scotia Steel and Coal Company, Limited, and its employees in the steel plant at Trenton, Nova Scotia.

To the Honourable T. W. Crothers, Esq., K.C., M.P.,
Minister of Labour,
Ottawa.

Sir:—

The undersigned, members of a Commission appointed by His Excellency the Governor General in Council on the 22nd day of April, 1918, to inquire into the above disputes, among others, have the honour to report as follows:

The members of the Commission met at the Town Hall, Trenton, and afterwards at the Town Hall, New Glasgow, N.S., Friday, May 3rd, 1918, at 10 a.m. and 2 p.m., respectively. The demands of the employees are set forth minutely in a memorandum accompanying this report. They relate principally to recognition of the various labour unions to which the employees belong, and the collection of the union dues, work on Sundays and legal holidays, certain increases in the wages, and a number of minor matters, which will be found in the memorandum.

The Commission was in session on the 3rd, 4th, 6th, 7th and 8th days of May, 1918, and after hearing the evidence and the argument on both sides, deferred the preparation of its report until the hearings were had respecting the disputes, at Sydney, where many of the same questions were involved. In the course of the proceedings the members of the Commission endeavoured to find a way to a mutual settlement of all the disputes but without result. On May 18th, the Commission was engaged in the consideration of the matters which are the subject of these disputes and in the preparation of this report.

Recognition of Unions, etc.

This is and has long been a vexed question, and any declaration in favour of or against the claim to recognition would, the Commissioners think, be of little value in this case. The Commission, however, recommends that the Company be requested to receive and hear from time to time a committee of its own employees attending as such upon the officers of the Company for the discussion, and, where they are conceded to exist, the adjustment of any grievances which the employees complain of. Such grievances may be first presented to the immediate superior, and if the committee is not satisfied with his decision, it may be carried to the superintendent of the department, and from him, if need be, to the president of the Company. The details of the procedure may be left to the Company and its employees to settle; the only point which the Commission would urge, until another plan is agreed upon, is that the employees select from among themselves a small committee for mutual conferences, as grievances arise.

Work on Sundays and Holidays.

In the Company's plant there is what is known as seven day work, that is, work carried on every day and night in the week. The rates for such work are fixed and fixed on the basis of its being seven day work. There is also repair work which is performed on Sunday, for which some mechanics are given a rate and a half, and some two rates. The Commission is of opinion that the existing arrangement should not be disturbed.

Wages.

The Commission recognizes the force of the argument made with rspect to the great increase in the cost of living, and takes into account the increases made in recent years by the Company. The burden resulting from the increased cost of living falls most heavily upon the common day labourer. The more highly paid men, of course, feel it also, but they share it in a degree common to all other citizens. We desire to see the common day labourer who works in straight rate or check time, as it is sometimes termed, receive at least a living wage and with that in view we recommend that the Company be requested to grant the increases hereinafter mentioned, the same to date from the first day of April, 1918:

Common labourers receiving

24c or under an hour to receive	27½c	an	hour.
25c an hour to receive	28c	an	hour.
26c an hour to receive	28½c	an	hour.
27c an hour to receive	29c	an	hour.
28c an hour to receive	29½c	an	hour.
29 and under 30c to receive	30c	an	hour.

As to any other increases and changes asked for the Commission does not see its way to recommend them under existing circumstances.

If the parties to these disputes accept the recommendations of the Commission, the Commissioners wish to give expression to the hope that both parties will observe the terms of the settlement thus made for at least one year from April 1st, 1918.

All of which is respectfully submitted.

Dated this 18th day of May, 1918.

(Sgd.) JOSEPH A. CHISHOLM, Chairman.
(Sgd.) JOHN FORREST.

Commissioners

Report re Eastern Car Company, Limited, and Employees at Trenton, N.S.

In the matter of the Inquiries Act, Chapter 104, Revised Statutes of Canada, 1906, and in the matter of the Industrial Disputes Act, 1907, and in the matter of the disputes between the Eastern Car Company, Limited, and its employees at Trenton, Nova Scotia.

To the Honourable T. W. Crothers, Esq., K.C., M.P.,
Minister of Labour,
Ottawa.

Sir:—

The undersigned, members of a Commission appointed by His Excellency the Governor General in Council on the 22nd day of April, 1918, to inquire into the above disputes, among others, have the honour to report as follows:

The members of the Commission met at the Town Hall, Trenton, N.S., on Friday, May 3rd, 1918, at 10 a.m., and afterwards at the Town Hall, New Glasgow, N.S., at 2 p.m. The demands of the employees are set forth minutely in a memorandum accompanying this report. They relate principally to recognition of the

various labour unions to which the employees belong, and the collection of the union dues, work on Sundays, and legal holidays, certain increases in wages, and a number of minor matters, which will be found in the memorandum. This Company is engaged in building cars and also in building ships.

The Commission was in session on the 3rd, 4th, 6th, 7th and 8th days of May, 1918, and after hearing the evidence and the argument of both sides deferred the preparation of its report until the hearings at other places respecting these disputes were over. In the course of the proceedings the members of the Commission endeavoured to find a way to a mutual settlement of all the disputes but without result. On May 18th the Commission was engaged in the consideration of the matters which are the subject of this dispute and in the preparation of this report.

Recognition of Unions, etc.

This is and has long been avexed question, and any declaration in favour of or against the claim to recognition would, the Commissioners think, be of little value in this case. The Commission, however, recommends that the Company be requested to receive and hear from time to time a committee of its own employees attending as such upon the officers of the Company for the discussion, and, where they are conceded to exist, the adjustment of any grievances which the employees complain of. Such grievances may be first presented to the immediate superior, and if the committee is not satisfied with his decision, it may be carried to the superintendent of the department, and from him, if need be, to the president of the Company. The details of the procedure may be left to the Company and its employees to settle; the only point which the Commission would urge, until another plan is agreed upon, is that the employees select from among themselves a small committee for mutual conferences, as grievances arise.

Work on Sundays and Holidays.

The Commission is of the opinion that the present arrangement at these plants as to work on those days does not call for any recommendation from the Commission.

Wages.

The Commission recognizes the force of the argument made with respect to the great increase in the cost of living, and takes into account the increases from time to time made by the Company. The burden resulting from the increased cost of living falls most heavily upon the common day labourer. The more highly paid men, of course, feel it also, but they share it in a degree common to all other citizens. We desire to see the common day labourer who works wholly on straight rate or check time, as it is sometimes termed, receive at least a living wage, and with that in view we recommend that the Company be requested to grant the following increase, the same to date from the first day of April, 1918, namely, common labourers receiving less than 27½c an hour be paid 27½c an hour.

Most of the men employed receive more than that rate as they work on what is called contract work and are paid according to results. Our recommendation is that men who have not an opportunity to make that amount should be advanced to that wage.

As to any other increases and changes asked for, the Commission does not see its way to recommend them under existing circumstances.

If the parties to these disputes accept the recommendations of the Commission, the Commissioners wish to give expression to the hope that both parties will observe the terms of the settlement thus made for at least one year from April 1st, 1918.

All of which is respectfully submitted.

Dated this 10th day of May, 1918.

(Sgd.) JOSEPH A. CHISHOLM, Chairman.
(Sgd.) JOHN FORREST.
(Sgd.) J. B. MCLACHLAN.
Commissioners.

Report re J. W. Cumming and Son, Limited, New Glascow, N.S., and Employees

In the matter of the Inquiries Act, Chapter 104, Revised Statutes of Canada, 1906, and in the matter of the Industrial Disputes Act, 1907, and in the matter of certain demands made by certain trades organizations for the employees of J. W. Cumming & Son, Limited, New Glasgow, Nova Scotia, upon the said Company.

To the Honourable T. W. Crothers, Esq., K.C., M.P.,
Minister of Labour,
Ottawa.

Sir:—

The undersigned, members of a Commission appointed by His Excellency the Governor Geceral in Council on the 22nd day of April, 1918, to inquire into the above mentioned demands, interalia, have the honour to report as follows:

On the 7th day of May we heard the parties to this dispute very fully at the Town Hall, New Glasgow, Nova Scotia. The demands are set forth in detail in the papers accompanying this report. They relate principally to the question of the recognition of the various labour unions to which the employees of the company belong, the collection of union dues by the company, and certain increases in the wages of the employees. We do not deem it expedient to make any recommendations respecting these matters. The employees receive good wages, and are well treated by the Company. We were unable to discover any evidence of discontent on the part of the men. The relations between the Superintendent and the employees are most friendly, and any grievances, real or supposed, arise, they are

immediately dealt with and corrected or explained to the satisfaction of the workmen.

All of which is respectfully submitted.

Dated this 18th day of May, 1918.

(Sgd.) JOSEPH A. CHISHOLM, Chairman.

Report re Dominion Iron and Steel Company, Limited, and Employees at Sydney, N.S.

In the matter of the Inquiries Act, Chapter 104, Revised Statutes of Canada 1906, and in the matter of the Industrial Disputes Act, 1907, and of the disputes between the Dominion Iron and Steel Company, Limited, and its employees in the steel plant at Sydney, Nova Scotia.

To the Honourable T. W. Crothers, Esq., K.C., M.P.,
Minister of Labour,
Ottawa.

Sir:—

The undersigned, members of a Commission appointed by His Excellency the Governor General in Council on the 22nd day of April, 1918, to inquire into the above disputes, among others, have the honour to report as follows:

The members of the Commission met at Sydney on Tuesday, May 14th, 1918, and proceeded to hear the evidence in connection with the said disputes. The Commission was in session on the 14th, 15th, and 16th days of May and on those days heard the statements of some thirty witnesses from among the steel workers and three witnesses on behalf of the Company. On May 17th, the members of the Commission were engaged in consultation and in preparing this report. In the course of the proceedings the members of the Commission endeavoured to find a means to affect a settlement by mutual agreement, and found that such a settlement could not be arrived at.

The claims of the steel workers are summarized in a memorandum presented by them and which is as follows:

"(1). In order to establish our right to collective bargaining we want the Dominion Iron and Steel Company, Limited, through their management, to meet committees appointed by the majority of their employees to discuss any grievances that may from time to time arise, the adjustment of wage scale and general working conditions in and about the works.

"(2). That the Company agree to collect the dues from the members of our society, the Company to receive the same remuneration for so doing as is now paid in the case of the Steel Workers Mutual Benefit Association.

"(3). We also ask for an increase in wages at the following rates:

"15% for men earning .40c and over per hour.
"20% for men earning .39c to 30c per hour.
"30% for men earning .29c and under per hour

"This to apply to men who have not sent in a schedule. This increase to date from March first, 1918.

"(4). We also ask for double time for Sunday and legal holidays, time and one-half for all overtime, this to apply to all workmen.

"(5). Any man taken from his regular work to work on any other job to be paid his regular rate.

"(6). We have just cause to suspect that the police employed by The Dominion Iron and Steel Company have a system of espionage over the employed when off duty, and would respectfully request that the Commission make a thorough inquiry into this matter. As free born British subjects we protest with all the power we possess against being subjected to police surveillance when outside the Company's property.

"(7)—Machine Shop. Helpers working at machines and doing other work in this way they are able to learn the trade, while apprentices are helping or putting in their time in such a way that they cannot expect to become efficient tradesmen. Machinists demand that a helper learning the trade be paid apprentices' pay. Helpers will not be advanced to the detriment of mechanics or apprentices."

Attached to the above quoted memorandum is a memorandum setting forth the claims made by the men employed in the railway yard; a memorandum also of the claims made by the moulders and one from the bricklayers. These memoranda, together with the other papers submitted by the parties are transmitted to your Department with this report.

Items 1 and 2. Recognition and Collection of dues.

As to the question of recognition the members of the Commission recognize that this is an old question, and without deciding for or against the right to recognition as a general matter, the Commission recommends that the Company be requested to make provision for meeting at seasonable times as occasion may require Committees of its employees applying as such for an opportunity to discuss and if possible adjust any grievances they may wish to bring to the notice of the management. Such grievances may be first made to the immediate superior, and if the committee is not satisfied with his decision, then it may be carried to the superintendent of the department, and from him, if necessary, to the highest official of the Company. A grievance originating or relating to a particular depart-

ment shall be presented by a committee of the employees of that department. If the grievance or questions to be discussed should not appertain solely to any one department, but to two or more departments, the committee presenting it may be selected from all the departments affected. From statements made on both sides, the Commission is of opinion that the arrangement suggested above will be acceptable to both parties to this dispute.

No. 3. Increase in Wages.

While the Commissioners feel the force of the contention that there has been a great increase in the cost of living, they are assured by the Company that since the beginning of 1916, besides individual increases and in some cases departmental increases average general cumulative increases were made agregating 55 per cent to all employees and 71 per cent to all ordinary unskilled day labourers. These increases have been five in number. The burden of the increased cost of living obviously falls most heavily upon the low paid men. The higher paid men are of course, also affected; but they experience the same burdens in that respect as all other citizens throughout the land. The Commission, wishing to see the ordinary labourer who is on a straight rate, receive a living wage, recommends that the Company be requested to grant the increases hereinafter mentioned, the same to date from the first day of May, 1918.

Common labourers receiving

24c an hour to receive....	27½c	an hour.
25c an hour to receive....	28c	an hour.
26c an hour to receive....	28½c	an hour.
27c an hour to receive....	29c	an hour.
28c an hour to receive....	30c	an hour.
29c an hour to receive....	30½c	an hour.
30c an hour to receive....	31c	an hour.
31c an hour to receive....	31½c	an hour.
Between 31½ and 32c an hour to receive.....	32c	an hour.

On inquiry we are informed that these increases will apply to and benefit 2,765 men out of about 4,000 and will involve an estimated daily increase of $814.36; and monthly increase of $24,430.80, and yearly increase of $297,241.00.

As to the other increases looked for, the Commissioners do not see their way clear under existing conditions to recommend them.

Item No. 4. Work on Sundays and Legal Holidays.

In the Company's plant there is work known as continuous work, that is, work carried on every day and night throughout the week. The continuous nature of this work is taken into consideration in fixing the rates of the men employed. The rates are the same whether the work be performed on Sundays, legal holidays or week days. Besides work of this kind, there is also considerable repair work performed on Sundays and legal holidays, and for such Sunday and holiday work, some mechanics are now paid a rate and a half and some a double rate. The Commission is of opinion that the arrangement now existing should not be disturbed for the present.

Item No. 5.—Change of Work.

The Commission recommends that in case a man is taken temporarily from his regular work and put on some other work, he should be paid at the higher rate, whether it be the rate pertaining to the work which he has left or the rate pertaining to the work to which he is put.

No. 6.—Police.

Explanations were made and undertakings given by the representatives of the company which are mutually satisfactory to all parties.

No. 7.—Apprentices.

The Mechanical Superintendent stated to the Commission that their apprentices are urged to attend the classes in technical instruction at Sydney carried on under the direction of the Technical College, and the company pays the apprentices their regular wages for the time in attendance at this instruction. Other things being equal, the Commission recommends that the helpers be not advanced to the detriment of the apprentices.

No. 8.—Railway Yardmen.

In as much as the questions raised by the railway yardmen are largely of a technical character and would require investigation and explanation by expert railway men, and assistance of that character is not at present available to the Commission, it is recommended that a committee of the men of this department take up the question with the management of the company. The conditions involved appear to the Commission to be different from the conditions in a trunk railway system acting as a common carrier.

If the parties to these disputes accept the recommendation of the Commission, the Commissioners desire to express the hope that both parties will observe the settlement thus made for at least one year from May, 1918.

All of which is respectfully submitted.

Dated this 22nd day of May, 1918.

(Sgd.) J. A. Chisholm, Chairman.

(Sgd.) John Forrest.

(Sgd.) J. B. McLachlan.

Commissioners.

SETTLEMENT OF STRIKES OF CIVIC EMPLOYEES AT WINNIPEG, MAN.

DURING May the city of Winnipeg was seriously affected by a number of industrial disputes which, commencing with a strike of civic employees in the Municipal Light and Power Department and Works Department, extended to other branches of civic employees and to various railway employees. Statistical particulars of these several disputes were given in the June issue of the LABOUR GAZETTE, but as additional information has been since received by the Department, it is possible to give in the present issue a fuller account of the situation.

The waterworks employees, city electricians, city teamsters and the fire department men had on various dates from November, 1917, submitted proposals to the city asking for increased rates of pay and improved working conditions, to be effective as of April 1, 1918. The employees reported that no acknowledgments of their communications had been received, though the City Council claimed replies were sent; in March the employees' requests were repeated. It was not until late in April, however, that notice was taken of the employees' communications. Notice had been given to the city that unless negotiations were entered into immediately, the city employees would withdraw from service, and on May 2 the classes named above, except the firemen, ceased work. Negotiations between committees of the City Council and of workmen followed, and on May 13 a unanimous agreement was reached; the City Council approved the draft agreement, but added thereto a proviso that the same would be made effective subject to the understanding that under no conditions would the city employees resort to strikes. This modification was not acceptable to the employees who declared themselves willing to submit all disputes to negotiations direct with the proper authorities, and failing a settlement to carry the disputes to a Board of Conciliation, machinery for which it was proposed to arrange locally, it being understood that the Industrial Disputes Investigation Act did apply where the employer is a municipality. The city declined to make effective the recommendations of its committee, unless the employees would unconditionally waive the right to strike, and on the city taking this position, the firemen also ceased work. The dispute became especially notable from this point for the reason that some 36 other trade unions, including thousands of street and steam railway employees and the provincial telephone operators, declared a sympathetic strike, and in a few days approximately 15,600 workmen were on strike. Business in Winnipeg was badly disorganized and trade throughout the Western Provinces was seriously affected owing to interruptions in the shops and freight sheds of transportation companies.

After the civic employees had gone on strike the city authorities made application for a Board of Conciliation, but the Act being applicable only by mutual consent of the parties concerned, and the employees being unwilling, no Board could be established. At the same time, however, an application for a Board of Conciliation was received from others of the civic employees who had remained at work, and the city authorities agreeing, a Board was established in this case. The Minister of Labour, also, on learning the serious situation resulting from the extension of the civic employees' strike, appointed Mr. David Campbell, K.C., a special mediator. Mr. Campbell was for several days in constant conference with committees representing the employers and employees and also with a conciliation committee of the Citizens' Committee of One Hundred which had been formed. No basis of agreement being reached, Senator Robertson, at the request of the Government, ar-

rived in Winnipeg to take up with Mr. Campbell the work of mediation. Eventually on May 24 an agreement was effected.

The memorandum of agreement contained provisions that the recommendations of the sub-committee of Council, submitted to Council May 13, should be made effective and the increases in wages named therein go into force; that all employees on strike should be reinstated in their former positions and rank without prejudice; that the Council's resolution denying civic employees the right to strike under any conditions be withdrawn, but that officers of the fire brigade, including lieutenants and captains, should not be members of the union.

The recommendation of the sub-committee of the City Council, submitted to Council May 13, which, under the memorandum of settlement was to govern wages and working conditions, is as follows:

Winnipeg, May 11th 1918.

His Worship the Mayor and Council,

Your Committee appointed by Council at its special meeting on the 9th instant to meet the employees of the City with a view to settlement of the strike, egs leave to report that it has met with the representatives of the several organizations and had fully considered the various matters in dispute, and as a result of its negotiations begs to recommend the following settlement, namely:

Water Works Operators

(1) An increase in wages of 5c per hour to date from May 1st, 1918.

(2) Two weeks annual holidays with pay for employees who have been in the service of the Department 10 years or over. One week annual holidays with pay for employees who have been in the service of the Department 5 years and under 10 years.

(3) Four Statutory Holidays with pay, i.e., Christmas Day, New Year's Day, Good Friday and Labour Day.

In granting the annual holidays it is on the understanding that the same will involve no extra cost to the Department, except for emergency work.

Electrical Workers

An increase in wages of 12 per cent for schedule adjustments.

Fire Department Employees

(1) The following schedule of monthly pay to date from May 1st, 1918:

First year men taken on after May 1st, 1918	$ 92.00
Men now receiving $85.00 to be increased to	100.00
Men now receiving $91.00 to be increased to	106.00
Men now receiving $97.00 to be increased to	112.00
Men now receiving $103.00 to be increased to	114.00
Men now receiving $110.00 to be increased to	121.00

Lieutenants to be increased to $1,600.00 per year.

Adjustments of salaries of Captains and Engineers to be taken up with the Fire, Water, Light and Power Committee.

(2) All prior scales of wages are hereby cancelled.

Teamsters, Chauffeurs, Stablemen, Etc

Health Department.

(1) The following schedule of wages to date from May 1st, 1918:

Teamsters (double)	$23.00	per week.
Teamsters (single)	22.00	"
Assistant Stable Foreman	26.25	"
Stablemen	23.00	"
Night Soil Helper	22.00	"

(2) Pay for two additioal statutory Holidays, making a total of 8 Statutory Holidays during the year.

(3) Teams to stop work on Saturdays at 12 l'oclock noon during the months of June, July and August, as an experiment.

Light and Power Department

(1) The following schedule of wages to date from May 1st, 1918:

Chauffeurs, Auto Truck, 3 tons and over	$25.00	per week.
Chauffeurs, Auto Truck, under 3 tons	23.00	"
Drivers, single horse	22.00	"
Stablemen	90.00	per month

Reinstatement of Men

Your Committee favours the total re-instatement of all men.

Notice re Furure Revision of Schedule

It is understood and agreed that in future the City will receive notice of any application for revision of schedules with reasons therefor at least sixty days prior to termination of existing schedules and if not accepted, the City and the Union shall forthwith each appoint three representatives who shall proceed to inquire into the matters in dispute without any delay by either party, and reach a conclusion thereon before April 15th, failing which notice shall at once be given to the City Clerk and during such inquiry and up to the 1st day of May, 1919, no strike shall take place.

(Sgd.) Arthur W. Puttee.

INDUSTRIAL DISPUTES DURING JUNE, 1918

EIGHTEEN strikes affecting approximately 5,093 employees were reported as having commenced during June. There were in existence at some time or other during the month 28 strikes directly affecting 11,105 workpeople. The total time loss on account of industrial disputes was estimated at 40,929 working days, as compared with 104,661 in May, and 240,260 in June, 1917. The time loss occasioned by the 18 strikes which began in June was 23,630 working days, while a loss of 17,299 days is charged to the ten strikes commencing prior to June. Termination of dispute was reported in the case of seven of the disputes commenced prior to June. Thirteen of the strikes which commenced in June terminated during the month, leaving the eight following unterminated strikes affecting approximately 352 workpeople on record June 30: plumbers and steamfitters, St. John, N.B.; metal polishers and buffers, Weston; machinists, Montreal; carpenters, Port Arthur and Fort William; painters and decorators, Calgary; machinists and tool makers, Toronto; bakers, Vancouver, and knitting mill operatives at Toronto.

INDUSTRIAL DISPUTES, JUNE, 1918

Industry or Occupation	Particulars	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO JUNE, 1918—		
BUILDING AND CONSTRUCTION—			
Plumbers and steamfitters, St. John, N.B.	Commenced April 23, 1917. Demand for increased wages. Unterminated.	11	275
Labourers, Port Arthur, Ont.	Commenced May 29, 1918. Demand for increased wages. Partial increase granted. Work resumed June 3.	50	50
METALS, MACHINERY AND CONVEYANCES—			
Metal polishers and buffers, Weston, Ont.	Commenced February 12, 1918. Against a reduction in wages. Unterminated.	33	825
Machinists, Montreal, Que.	Commenced May 23. For increased wages and nine-hour day. Unterminated.	45	1,125
Machinists, Victoria, B.C.	Commenced May 1. For increased wages and shorter hours. Settlement affected through mediation, Department of Labour. Increases and shorter hours granted. Work resumed June 4.	180	360
Moulders, Toronto, Ont.	Commenced May 4. Demand for increased wages. Settled by negotiations between the parties; partial increase granted. Work resumed June 3.	340	340
Moulders, Hamilton, Ont.	Commenced May 5. Demand for increased wages. Settled by negotiations between the parties; partial increase granted. Work resumed June 8.	200	1,600
Boilermakers, Ottawa, Ont.	Commenced May 23. Demand for increased wages. Increases granted. Work resumed June 11.	53	424
Shipyard employees, Vancouver, Victoria and New Westminster, B.C.	Commenced May 23. Demand for increased wages and 44-hour week. Settlement affected through mediation, Department of Labour. Increases and shorter hours granted. Work resumed June 4.	4,800	9,600
TRANSPORTATION—			
Coal handlers, Port Arthur and Fort William, Ont.	Commenced May 27. Demand for increased wages. Increase granted. Work resumed June 12.	300	2,700
	DISPUTES COMMENCING DURING JUNE, 1918.		
MINES, SMELTERS AND QUARRIES—			
Coal Miners, Brulé Mines, Alta.	Commenced June 13. Objection to work while body of miner accidentally killed, lay in camp. Remains sent to relatives and work resumed June 19.	330	1,540

INDUSTRIAL DISPUTES, JUNE, 1918

Industry or Occupation	Particulars	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING DURING JUNE, 1918— *(Continued)*		
BUILDING AND CONSTRUCTION—			
Carpenters, Port Arthur and Fort William, Ont.	Commenced June 19. Demand for increased wages. Unterminated.	.....	.....
Painters and decorators, Calgary, Alta.....	Commenced June 29. Demand for increased wages and reduction in hours. Unterminated.	40	20
Machinists and tool-makers (Willys-Overland Company), Toronto, Ont	Commenced June 12. Demand for standard rates of wages, hours and other working conditions. Settled by negotiations between the parties and Department of Labour. Work resumed June 19.	700	4,200
Machinists and toolmakers, (Russell Motor Company), Toronto, Ont.	Commenced June 25. Against dismissal of employee. Unterminated.	135	675
Moulders, Peterborough, Ont.....	Commenced June 6. Demand for increased wages. Settled by negotiations between the parties; increase granted. Work resumed June 24.	58	812
Steelworkers, New Glasgow, N.S.....	Commenced June 14. Demand for increased wages and other working conditions. Settled by negotiations between the parties. Partial increase granted. Work resumed June 19.	2,700	9,450
FOOD, TOBACCO AND LIQUORS—			
Bakers, Vancouver, B.C.....	Demand for increased wages, shorter hours and "closed shop.".....	.....	.....
TEXTILES, CORDAGE AND CARPETS—			
Knitting mill operatives, Toronto, Ont.....	Commenced June 12. Demand for increased wages. Unterminated..	88	1,364
LEATHER, BOOTS, SHOES AND RUBBER—			
Tannery, employees, Kingston, Ont.....	Commenced June 17. Against dismissal of employees. Settled by negotiations between the parties and Department of Labour. Men were re-instated. Work resumed June 28.	40	400
TRANSPORTATION—			
Machinists, Canadian Pacific Railway, Winnipeg, Man., Moose Jaw and Regina, Sask.	Commenced June 21. Demand for discharge of non-unionist employee. Settled by negotiations between the parties; employee retained in the company's service. Work resumed June 28.	500	3,000
Machinists, Canadian Pacific Railway, Nelson, B.C.	Commenced June 22. In sympathy with the strike at Winnipeg. Work resumed June 28.	25	125
Freight handlers, Toronto, Hamilton and Buffalo Railway, Hamilton, Ont	Commenced June 1. Demand for increased wages. Settled by negotiations between the parties. Partial increase granted. Work resumed June 6.	40	140
Warehousemen, Vancouver, B.C.....	Commenced June 1. Demand for increased wages and shorter hours. Settled by negotiations between the parties. Men returned to work at existing wages; hours reduced by one half-hour per week. Work resumed June 10.	7	49
Teamsters, Montreal, Que.....	Commenced June 19. Demand for increase in wages. Men returned to work at existing wages June 22.	225	675
Truckmen, Sydney, N.S.....	Commenced June 1. Demanded that Union have charge of issuing licenses for truckmen and hackmen. Settled by negotiations between the Police Commission and City Council. Work resumed June 8.	95	570
MUNICIPAL EMPLOYMENT—			
Civic employees, teamsters, London, Ont...	Commenced June 3. Demand for increased wages. Increase granted. Work resumed June 18.	30	360
MISCELLANEOUS—			
Labourers, Regina, Sask.....	Commenced June 4. Demand for increased wages and recognition of union. Settled by negotiations between the parties. Partial increase granted. Work resumed June 7.	100	250

CREATION OF A WAR LABOUR BOARD AND A LABOUR POLICIES BOARD IN THE UNITED STATES

THE May issue of the LABOUR GAZETTE (page 365) contained the report of the War Labour Conference Board, which recommended the creation, for the period of the war, of a national war labour board. The report outlined in detail the purposes and functions of the proposed Board.

On April 8, President Wilson, by proclamation, formally created such a Board as an integral part of the Department of Labour, and named as its members the same representatives of the employers and workers, who, together with ex-President Taft and Frank P. Walsh, representing the public interests, had composed the old Conference Board. The powers, functions and duties of the new National War Labour Board, and the methods by which they shall be put into effect, are those specified in the report of the Conference Board. The governing principles of the new Board are: That there shall be no strikes or lockouts during the war; that the right of workers to organize in trade unions is recognized; that the right of employees to organize associations or groups is recognized; that employers shall not discharge workers for membership in trade unions; that the workers in recognizing their right to organize shall not use coercion to induce persons to join their organizations.

A number of disputes have already been heard by the Board, including that between the Commercial Telegraphers' Union and the Western Union Company. In this dispute the right to organize appears as the issue. Complaint was made to the Board that the company refused to employ members of the Telegraphers' Union, and had discharged about 700 operators for belonging to it. No dissatisfaction appears to exist among the employees; and the company is willing that they should organize for collective bargaining and adjustment of disputes, provided they refrain from striking and from affiliation with outside organizations using or advocating strikes. The company claims that it will be unable to give effective and uninterrupted service with unionism entrenched in its establishment.

The employers' representatives on the Board sustained the company, while the employee members and Messrs. Taft and Walsh advocated that the company should withdraw its objection to any of its employees joining unions, provided that they agree not to strike. The Board in its report states that the Western Union Company has refused to accept the compromise offered, "and no further action of the Board is therefore recommended." Later, however, in response to the special request of President Wilson, the company agreed to refrain, during the war, from discharging employees who are, or who may become, members of unions.

A recent announcement has also been made of the appointment of a new La-

bour Policies Board, composed of representatives of the War Department, of the Navy Department, of the Department of Agriculture, of the War Industries Board, of the Federal Fuel Administration, of the United States Shipping Board, of the Emergency Fleet Corporation, of the Fuel Administration and of the Railroad Administration; with Felix Frankfurter, assistant to the Secretary of Labour, as chairman. The Labour Policies Board is quite distinct from the War Labour Board already described: the work of the latter is both judicial and legislative, while that of the Labour Policies Board is administrative. It will bring together and co-ordinate into one consistent policy the various methods adopted by the different governmental departments in dealing with labour problems that affect production, always excepting disagreements between employers and workers.

Weekly meetings of the Board are being held and immediate attention is being given to the consideration of plans for the standardization of working conditions, the establishment of an agency through which prompt information regarding labour supplies, etc., may be given to industries, and the study of provisions affecting industrial relations to be incorporated in Government contracts.

The Board has recommended that all recruiting of labour for war industries shall be done through the central agency of the Employment Service of the Department of Labour (see LABOUR GAZETTE for February, 1918, page 148): that such a central agency must have sole direction of all recruiting of civilian workers for war work; and must, at the same time, have power to assure to essential industry an adequate supply of labour, even to the extent of withdrawing workers from non-essential production. Acting upon this recommendation, President Wilson has recently made a public statement drawing attention to the changed conditions which the war has created in the labour market, and urging all employers engaged in war work to refrain, after August first, from recruiting unskilled labour in any manner except through this central agency.

Standardization of wages for all skilled and unskilled labour engaged in war work is now under consideration by the Board as the second step in the labour stabilization programme.

REPORTS OF EMPLOYMENT OFFICES

DURING May there was a decrease of about 9 per cent in the demand for labour as compared with April on the basis of the daily average of vacancies notified to 110 employment offices (80 commercial, 17 public and 13 philanthropic.) As compared with the demand reported for May of last year by practically identical offices, there was an increase of slightly over 1 per cent. The total number of vacancies notified to all offices in May was 43,700, a daily average of 1663.1, as compared with 1834.2 in April, 1918, and with 1646.1

in May, 1917. The number of persons placed was 17,846, a daily average of 691.9, as compared with averages of 897.1 and 843.3 in the preceding month and in May of last year. The proportion of the total vacancies filled to the total vacancies notified was 41.6 per cent, as compared with 48.9 per cent in April and with 51.2 per cent in May, 1918.

As to employment for woman and girl workers, the number of vacancies notified was 6,269, a daily average of 256.1, as compared with 268.7 in April and with 297.5 in May, 1917. The number of such workers placed was 2,271, a daily average of 88.3, as compared with 97.4 in April and with 105.8 in the corresponding period of 1917.

The proportion of vacancies filled to vacancies notified for men and boys was 41.6 per cent and for women and girls 36.4 per cent, as compared with 51.0 per cent and 36.2 per cent, respectively, for April, and with 60.4 per cent and 39.6 per cent, respectively, for May, 1917.

Of the five principal centres of labour distribution — Montreal, Toronto, Winnipeg, Edmonton and Vancouver — Toronto showed increases in the demand for labour both as compared with April, 1918, and with May, 1917, Montreal recorded a gain in the first comparison and a decline in the second, Winnipeg and Edmonton showed decreases as compared with the preceding month and increases as compared with May of a year ago, while at Vancouver there were declines in both cases. Of the smaller centres, Hamilton and Calgary reported increases as compared with April, 1918, and also with May, 1917.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christain Association and other offices, was 1,959, a daily average of 75.3, as compared with averages of 68.3 in April and 69.5 in May, 1917. The number of casual jobs secured was 5,960, a daily average of 229.2, as compared with averages of 225.7 in the preceding month and with 194.6 in May of last year.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

REPORTS from fifteen cities showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in June, showed a very inconsiderable decrease in the number of workers and an increase of nearly 5 per cent in the wages paid. In June, 7,686 persons were temporarily employed in the two weeks, and the pay-rolls amounted to $276,358.42, as compared with 7,696 employees and an aggregate pay-roll of $263,848.57 in May.

St. John, Hamilton, London, Winnipeg, Brandon, Regina, Vancouver and Victoria all showed increases, both in the number of workers and in the wages paid. Montreal and Ottawa reported smaller numbers of employees and larger pay-rolls, while Toronto, Moose Jaw, Saskatoon, Calgary and Edmonton recorded declines in both cases.

The accompanying table summarizes reports from the nine cities for which returns are available since July, 1916. The table shows that as regards the number of workers, a decline began in January, 1917, and continued almost without interruption to November. During December, January, February and March an upward tendency was evidenced, but in April, May and June there were again decreases. As to wages, the total reported for June is larger than that for May, but it is smaller than the total for April and for the preceding months to January, 1918.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS. MAY AND JUNE, 1918

City	Number of employees temporarily employed in first fortnight in:		Amount of wages paid employees temporarily employed in first fortnight in:

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 35 cities, showed a decrease during June as compared with the previous month, the total value of building permits falling from $4,838,953 in May to $3,667,399 in June, a decrease of $1,171,554, or 24.2 per cent. Manitoba and Alberta recorded increases, while Saskatchewan remained practically stationary. As compared with the corresponding month of 1917, there was a decline of 9.2 per cent, the value for June, 1917, being $4,038,511. In this comparison there were gains in Nova Scotia, Ontario, Saskatchewan, Alberta and British Columbia.

Of the larger cities, Toronto reported increases both as compared with the preceding month and with June, 1917. Winnipeg showed a gain as compared with May, but a decline as compared with June of last year. Montreal recorded decreases in both cases, while at Vancouver there was a decline as compared with May and an increase in comparison with June, 1917. Of the smaller centres, Three Rivers, Fort William, Peterborough, Regina, Calgary and Edmonton all showed increases in both comparisons.

FAIR WAGES CONTRACTS, JUNE, 1918

DURING June the Department of Labour received for insertion in the LABOUR GAZETTE information relative to five fair wage contracts, three of which were awarded by the Department of Public Works and the remaining two by the Department of Railways and Canals. All these contracts contained the usual fair wage clause.

DEPARTMENT OF PUBLIC WORKS.—Supply of ice to Public Buildings for 1918-1919, Ottawa, Ont. Name of contractor, Geo. E. Kingsbury, Ottawa, Ont. Date of contract, May 21, 1918. Amount of contract, $0.22½ per 100 pounds.

DEPARTMENT OF PUBLIC WORKS.—Construction of three (3) hospital buildings for quarantine station, William Head, B.C. Name of contractors, Robertson and Partners, Limited, Vancouver, B.C. Date of contract, May 28, 1918. Amount of contract, $9,295.

DEPARTMENT OF PUBLIC WORKS.—Breakwater, Margaree, N.S. Name of contractor, Maurice A. Condon, Digby, N.S. Date of contract, June 7, 1918. Amount of contract, $12,690.

DEPARTMENT OF RAILWAYS AND CANALS.—Erection of No. 5 station building and platform at Belledune, County of Gloucester, N.B. Name of contractor, J. R. Hamilton, Point la Nim, N.B. Date of contract, June 20, 1918. Amount of contract, schedule rates.

DEPARTMENT OF RAILWAYS AND CANALS.—Construction, erection and completion of the superstructure of a wooden freight shed at Halifax Deepwater Terminals. Name of contractors, Nova Scotia Construction Company, Limited. Date of contract, June 27, 1918. Amount of contract, $32,000 bulk sum, and schedule rates for additions.

POST OFFICE DEPARTMENT.—The following is a statement of the payments made in June for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions.

Nature of orders.	Amount of orders
Supplying new mail bags	$1,444.73
Repairing mail bags	3,549.34
Supplying mail bag fittings	1,833.95
Supplying stamping material	1,068.01
Making and repairing rubber stamps	21.97
Making metal dating stamps and type and making other hand stamps and brass crown seals	485.63
Making and supplying articles of official uniforms	9,717.85
Repairing mail clerk's tin boxes and steel portable boxes	49.20

INVESTIGATION INTO THE LAUNDRY INDUSTRY BY THE MANITOBA MINIMUM WAGE BOARD

THE Manitoba Minimum Wage Act, 1918, the full text of which will be printed in the August issue, provides for the appointment of a Board which shall have power to make orders as to minimum wages, hours of employment and conditions of labour for female employees in mail order houses, shops and factories within the province.

A Minimum Wage Board consisting of five members has therefore been appointed as follows: Dr. J. W. Macmillan, chairman; Mrs. Claude Nash and Edward Parnell, representing employers; and Miss Lynne Flett and James Winning, representing employees. E. McGrath, of the Bureau of Labour, has been appointed secretary to the Board.

The first investigation made by the Board was in connection with the laundry industry. As a result of the conference between three representatives of the women laundry workers, three representatives of the employers, and the members of the Board, the minimum wage for a woman worker over eighteen years of age in the laundry industry has been fixed at $9.50 per week. This minimum wage was based on a cost of living schedule drawn up by the Board and approved by the conference. It was estimated that a girl could live decently on $493.25 a year, or $9.48 a week.

The following is the schedule:

Board and lodging $5.50 per week	$286 00
Footwear and repairs	20 00
Stockings	4 00
Underwear and nightgowns	10 00
Petticoats	4 25
Suit, at $25 (coat and skirt, to last two years)	12 50
Coat and possibly summer suit at $25 (to last two years)	12 50
Dresses and aprons	15 00
Shirt waists	6 00
Handkerchiefs	1 25
Corsets	4 00
Gloves	2 25
Corset waists	2 00
Neckwear	1 00
Hats	10 00
Umbrella	1 00
Sweater at $7.50 (to last three years)	2 50
Laundry	15 00
Doctor and Dentist	15 00
Street car fares	20 00
Magazines and postage	5 00
Association dues and insurance	8 00
Recreation and amusements	18 50
Church and contributions	5 00
Incidentals	12 50
Total expenditure for the year	$493 25
Total weekly expenditure	9 48

In the case of inexperienced employees of 18 years of age or over a probation period of six months is allowed, in which the minimum wage shall be $8 for the first three months, and $9 for the second three months, after which they shall be considered as experienced employees. In the case of employees under 18 years of age a probation period of eighteen months is allowed, in which the minimum wage shall be $7 for the first six months, $7.50 for the second six months, and $8 for the third six months. After eighteen months employment such employees shall be paid at the experienced rate of $9.50 a week. These concessions were given the laundries because of the huge increase in the cost of doing business, also the competition of the Chinese laundries which are held down no standards of hours, wages or conditions of labour. It is also stipulated that the wages shall be paid weekly; and that one week's notice shall be given by the employer in dismissing an employee, and by the employee on leaving employment; except in the case of flagrant insubordination or unjust treatment. The findings of the Board also provided for shorter hours of labour in laundries, for improvements in lighting, heating, ventilation, cleanliness and protection from injury.

THE UNITED STATES WAR LABOUR BOARD ORDERS A GENERAL WAGE INCREASE TO NEWS PRINT PAPER WORKERS

THE National War Labour Board, the formation of which was outlined in a preceding article, rendered June 27 a final decision and award in the wage controversy between the manufacturers of news-print paper and their employees in the United States. Nineteen paper manufacturing companies scattered throughout the country are affected by the decision the principal features of which are as follows:

A general increase of 10 cents an hour is made in the wages of the workers throughout the industry.

Minimum rates of pay are established both for men and for women workers, based upon the prevailing cost of living.

Payment on the basis of an eight-hour day to all employees working inside the mills, with time and a half for overtime; and on the basis of a nine-hour day to outside employees, with time and a half for overtime.

It is provided in the award that upon January 1 and July 1 of each year, during the period of the war and for six months after, there shall be a readjustment of wages, providing statistics compiled by the government show an increase in the cost of living of 10 per cent in excess of the cost on July 1, 1918. In such a case the workers shall receive a wage advance to cover the increased cost of living.

The right of the workers to organize into trade-unions and to bargain collectively with their employers through chosen representativs is upheld.

The decision and award is effective in th paper, pulp, and sulphite mills of the following companies: Abitibi Power & Paper Co., Fort Francis Pulp & Paper Co. (Ltd.), St. Regis Paper Co., Tidewater Paper Mills Co., International Paper Co., St. Maurice Paper Co., De Grasse Paper Co., High Falls Pulp & Paper Co., Spanish River Pulp & Paper Mills (Ltd.), Taggarta Paper Co., E. B. Eddy Co. (Ltd.), Ontario Paper Co. (Ltd.), Falls River Co. (Ltd.), Union Bag & Paper Co., Lake Superior Co., Itasca Paper Co., Pejepscot Paper Co., Powell River Co. (Ltd.), Finch Pruyn Co.

The full text of the decision and award follows:

Working Conditions

The hours of employment and general working conditions in force April 30, 1918, except as herein provided, whether based upon written or verbal agreement or general understanding, shall remain in full force for and during the period of the war and for six months thereafter, unless changed by mutual consent of the committees of the employers and employees respectively, referred to in the following subsection (a):

(a) It is recommended that a committee of five representing the employers and a similar committee representing the employees be formed by the respective groups, which said committee shall make careful investigation and study in the industry and endeavor to submit a uniform classification of employees, establish proper wage differentials between the various classes, the various grades in each class, and to formulate a schedule of working conditions that can be adopted by all the mills with a view of establishing uniform classification working conditions and wage schedules throughout the industry. These committees should be appointed at once and endeavor to reach a conclusion and report within six months from July 1, 1918.

Hours of Labour

(a) All hourly employees working inside the mills shall be paid on the basis of eight hours per day, with time and one-half for overtime. Mechanics or repair men when working outside the mill shall be paid on the same basis as if they were working inside.

(b) All employees regularly working outside the mills shall be paid on the basis of nine hours per day, with time and one-half for overtime.

Basis of Wage Scale

(a) The basis of the new scale of wages for tour workers shall be 41 cents per hour.

(b) The basis of the new scale of wages for inside day workers, except girls employed in finishing room, shall be 38 cents per hour.

(c) All female employees doing the same work as males shall receive the same rate of pay as males receive for the same work.

(d) The minimum rate for mechanical repair men shall be 50 cents per hour and for their helpers 39 cents per hour.

Rates of Wages

The rate of wages shall be 10 cents per hour higher than the rates shown in the International Paper Co.'s schedule of October 21, 1917, except when the addition of 10 cents per hour does not equal the minimums herein elsewhere established. Schedules showing these rates are attached hereto and made a part of this report.[1] This schedule is used for the purpose of establishing as nearly as possible at the present time and pending the report of the joint committee herein provided for a uniform classification and wage rate. It is understood that all rates of wages are to be considered as minimum rates for the various classifications to which they are appended. In mills where the classification does not now exactly conform to the attached schedule an equitable adjustment of such minor differences as may exist shall be made, using said scale as a basis.

Adjustment of Wages

The wage scale adopted herein is based upon the present cost of living. On January 1 and July 1 of each year during the period of the war and for six months thereafter, there shall be an adjustment of wages which shall automatically take place on the above dates, providing Government statistics show an increase in the cost of living not less than 10 per cent in excess of the cost on July 1, 1918, in which case the employees shall receive an increase in wages equal to said increase in cost of living. Should said statistics show a decrease of not less than 10 per cent in the cost of living then the rate of wages shall be correspondingly decreased.

Overtime for Tour Workers

Whenever tour workers are required to work overtime for more than two weeks to fill a vacancy all overtime over two weeks shall be paid for at double-time rates. If, however, the employer is unable to fill such vacancy he may apply to the Union to furnish a suitable man to fill same and if the union is unable to furnish the required man the employer shall only be required to pay at the rate of time and one-half until the vacancy is filled.

Designation of Hours of Work

In cases of day workers working eight (8) hours per day the employer shall have the right to designate the particular hours to be worked without overtime allowance, between 7 a.m. and 5 p.m., providing the employee works eight consecutive hours with time out for lunch.

Foremen and Boss Machine Tenders

Foremen and boss machine tenders shall not do manual labour in excess of 1 per cent of the time.

1. The schedules are omitted in this report.

Holidays

The number of holidays shall be four in each year, viz.: Fourth of July, Labour Day, Thanksgiving and Christmas. These holidays may be changed by mutual consent of employer and employees in each mill. Thirty-six hours shall be allowed for the Christmas holiday only.

Right to Organize

The right of the workers to organize in trade-unions and to bargain collectively through chosen representatives is hereby recognized and affirmed. This right shall not be denied, abridged or interfered with by the employer or the representatives in any manner whatsoever.

The right of employers to organize in association or groups and to bargain collectively through chosen representatives is recognized and affirmed. This right shall not be denied, abridged, or interfered with by the workers in any manner whatsoever.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JUNE, 1918, AND IN OTHER COUNTRIES

PRICES continued upward, both the family food budget and the index number of wholesale prices showing increases. Meats were upward, but there were decreases in hogs, some hog products, milk, butter and potatoes. Wool, cotton and other textiles advanced considerably as well as metals and building materials. Some grains and fish were lower.

In retail prices the average cost of a family budget of staple foods in some 60 cities averaged $12.77 at the middle of June as compared with $12.66 in May, $11.88 in June, 1917, and $7.35 in June, 1914. The chief increases for the month were in meats, but there were some decreases in milk, butter and potatoes. In coal, wood and coal oil there were some increases. Rent was higher in Ontario and British Columbia.

In wholesale prices the Department's index number reached 280.6 as compared with 275.8 in May, 242.7 in June, 1917, and 135.3 in June, 1914. The chief increases for the month appeared in the groups: Fruits and Vegetables, Textiles, and Fuel and Lighting, the last being due to a rise in the price of matches. Slight increases in Metals and Implements, Building Materials, House Furnishings, and Drugs and Chemicals occurred, with decreases in Grains and Fodder, Animals and Meats, and Fish.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba

and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

Retail Prices

In meats, prices continued to rise in several of the cities, following the advances in May. The increases were greatest in beef, but were not so general as in the previous month. Some advances also occurred in mutton.

Eggs were up in several of the cities, but they declined in some localities. Milk was lower at St. John's, Que., Orillia, Ont., Medicine Hat and Edmonton, Alta., but at Windsor, Ont., the price advanced from 14c to 14-15c per quart. Butter fluctuated, being up in some cities and down in others. At Sorel, P.Q., the price of bread decreased from 25c per loaf of 4 pounds to 16-17-17½-18c per loaf as a new shop was opened where bread was sold at 16c per loaf. At Nanaimo, B.C., the price was reduced from 25c for two loaves of 1¼ pounds each to 10c per loaf, being a reduction from 10c to 8c per pound. Flour was slightly higher at London, St. Thomas and Owen Sound, but was lower at Port Arthur and Fort William. Prices also increased at Victoria, B.C. Rice was higher at Newcastle, N.B., Orillia, Niagara Falls, London, Port Arthur and Fort William. Tapioca advanced in some localities.

Sugar was almost unchanged throughout the country. In tea and coffee, prices advanced in nearly all of the cities owing to the new duties in May, but in some localities they were advanced in June.

Potatoes were somewhat higher in some of the cities and lower in others, but were steady in most localities. The average for the Dominion was lower as there were a number of decreases in Ontario particularly.

Anthracite coal was higher at St. John and Fredericton, N.B., Sherbrooke and St. John's, P.Q., Ottawa, Peterborough and St. Thomas, Ont., and Winnipeg, Man. Soft coal showed very little change, except in Western Canada, where advances occurred at Calgary, Lethbridge and Nanaimo. Wood and coal oil were very little changed.

Rent advanced at Sault Ste. Marie, Ont., and Vancouver, B.C.

Wholesale Prices.

GRAINS AND FODDER.—Prices of wheat were unchanged at the level fixed in September. Barley at Winnipeg continued to fall, being down from $1.30 per bushel to $1.17. Ontario barley fell from $1.40 to $1.24. Oats were firmer, western oats being up from 82½c per bushel to 85c at Winnipeg. American corn was slightly higher at $1.77. Flaxseed was firmer at $3.76½c per bushel. Rice at Toronto was down from $2.10 per bushel to $1.80. Hay was easier at Toronto and Montreal, being down to $15.50.

ANIMALS AND MEATS. — The best butcher cattle at Winnipeg declined from $16.00 per hundred to $15.00. At Toronto the best butchers were down from $16.25 per hundred to $16.00, and had risen to $17.00 in the second week. Dressed beef, hindquarters, advanced at Toronto from 28-30c per pound to 30-33c. Forequarters rose from 17-19c per pound to 20-22c. Veal was slightly firmer at $15.00-25.00. Hogs were down from $19.50 to $17.50 at the beginning of the month, and later declined to $17.00. Dressed hogs declined from 26-27c per pound to 24-25c per pound. Breakfast bacon was firmer at 41-42c per pound as compared with 40-42c. Lard was 1c lower at 30-31c per pound. Sheep were lower at $14.00-16.00 per hundred. Dressed lamb was higher at $32.00-34.00 per hundred.

DAIRY PRODUCTS. — Butter, finest creamery, at Montreal, was 1c higher at 44-44½c per pound. Dairy butter at Toronto was easier at 38-42c per pound. Cheese was unchanged at Montreal at 23c per pound. Fresh eggs at Toronto were 1c higher at 45-46c per dozen. Eggs at Montreal rose from 40c to 44c per dozen.

FISH.—Salmon trout and whitefish were 1c lower at 14-16c and 15-16c respectively. The export fish trade in Nova Scotia was greatly hampered by the lack of ships. The catch on the spring trip of the Lunenburg fleet was reported to be somewhat lower than previously expected and to average about 550 quintals per vessel. Sales were made at $12.75 per quintal, ex-vessel at Lunenburg. The Porto Rico market continued dull. The supply of salt fish was lower as the small quantities of mackerel caught were sold fresh. The catch of herring was smaller. The catch of alewives was lower than usual and the price was up to $8.00 per barrel.

FRUITS AND VEGETABLES. — Strawberries came on the market at a very high price as compared with previous years. In the third week of June the price at Toronto was up to 30-33c per box as compared with 16-18c a year before. Bananas continued high at $4.00-4.50 per bunch. Lemons advanced from $6.00 to $11.00 per box. Oranges rose from $7.00 to $8.50 per box. Dried fruits were steady. Potatoes at Toronto declined from $1.65 per bag to $1.50-1.60. At Montreal potatoes were down to $1.40-1.45 in car lots, but rose 15c in the last week. Onions were easier at $2.00 per hundred. Canned vegetables were steady.

MISCELLANEOUS GROCERIES.—Soda biscuits advanced to 15c per pound. Rolled oats and oatmeal were easier. Tea was upward. A brand of chocolate advanced 2c per pound. Sugar was unchanged.

TEXTILES.—Washed wool was up to 83-85c per pound and unwashed wool to 60-68c per pound. Raw cotton advanced to 30.4c per pound. Manufactured cottons averaged higher. Japan raw silk advanced to $7.05 per pound. Flax fibre was up to 65-70c per pound. Fine tow rose to 24-28c per pound. Flax sewing twine was up to 50c per pound.

HIDES, LEATHER, BOOTS AND SHOES.—A good demand for green hides was reported, but prices were steady.

METALS AND IMPLEMENTS.—Iron black sheets and boiler plates were firmer. Wrought iron scrap was lower at $28.00 per ton. Aluminum was up to 32c per pound. Lead was higher at 10-12½c per pound. Quicksilver was up to $125 per flask. Spelter was firmer, but tin was easier. Grindstones advanced.

a July of each year. *b* Foods. *c* 1901-1900—. *Quarter beginning that month

FUEL AND LIGHTING.—Matches advanced from two to three hundred per cent. One line rose from $6.60 per case to $21.45c.

BUILDING MATERIALS.—Spruce deals at St. John, N.B., rose from $27.00 per thousand to $28.00. No. 1 pine at Toronto was $1.00 per thousand higher. Sash weights advanced from 4½c per pound to 5½c. White lead rose to $16.75 per hundred pounds. Linseed oil eased off 3c per gallon at Montreal. Turpentine was up. Shellac was easier. Putty advanced 5c per hundred.

HOUSE FURNISHINGS. — Crockery and silver-plated cutlery advanced 10 per cent. Brooms were up from $7.00 per dozen to $8.50.

DRUGS AND CHEMICALS. — Glycerine rose from 80c per pound to 85c. Opium was down to $27.00 per pound. Quinine was up to $2.25 per ounce.

MISCELLANEOUS. — British Columbia hops were down to 28c per pound at Montreal. Malt was lower at $1.95 per bushel. Sulphite pulp, bleached, was $5.00 lower at $110.00-115.00 per ton. Rubber was higher at 59c per pound.

Prices in Other Countries

In the United Kingdom, the *Labour Gazette,* issued by the Ministry of Labour, reported a slight increase in the retail prices of staple foods at the beginning of June, there having been increases in the price of potatoes and eggs and decreases in those of fish and milk. In wholesale prices the index number of the London *Economist* at the end of June was considerably higher, nearly all the groups being upward.

In the United States the index number of wholesale prices in *Bradstreet's Journal* and *Dun's Review* showed little change, the former being slightly higher, the latter slightly lower. Both journals reported that the influence of Governmental regulation of prices was being reflected more in the price levels.

In Switzerland the figures compiled by the Swiss League to Reduce the Cost of Living showed the cost of food on March 1, 1918, to be 3.5 per cent above that on December 1, 1917, and 96.6 per cent above that on June 1, 1914. The total cost of living was estimated to be 103.7 per cent higher than in June, 1914, and 3.2 per cent higher than in December, 1917.

FATAL INDUSTRIAL ACCIDENTS DURING JUNE, 1918

DURING June the Department received reports of the occurrence of 67 fatal accidents; as compared with 52 in May, and 104 in June, 1917. The Department is unable to secure reports of all fatal industrial accidents, but reports are received monthly from all available sources.

FATAL INDUSTRIAL ACCIDENTS, JUNE, 1918.

Trade or industry	Locality	Date	Cause of fatality.
AGRICULTURE—			
Farmer	Aurora, Ont.	June 25	Struck by a train.
Farmer	St. Mary's, Ont.	" 26	Caught in a gasoline engine.
Farmer	Hanover, Ont.	" 24	Caught in a gasoline engine.
Farmer	St. Williams, Ont.	" 18	Kicked by a horse.
Farmer	Durham, Ont.	" 7	Dragged by team of horses.
Farmer	Minto, N.B.	" 11	Runaway.
FISHING AND HUNTING—			
Fishermen (4)	Caraquet, N.B.	" 20	Drowned.

FATAL INDUSTRIAL ACCIDENTS, JUNE, 1918.—*Continued.*

Trade or Industry.	Locality	Date	Cause of fatality.
LUMBERING—			
Sawmill employee	Mont Laurier, Que.	June 20	Explosion.
Sawmill employee	Horton, Ont.	" 4	Caught in belt.
Riverman	Tewkesbury, Que.	" 21	Drowned.
Employees of lumber company (4)	Banff, Alta.	" 11	Drowned.
MINES, SMELTERS AND QUARRIES—			
Gravel pit employee	Mitchell, Ont.	" ..	Crushed by a crane.
Miner	Sydney, N. S.	" 12	Caught in machinery.
Miner	Sydney, N. S.	" 20	Caught under a hoisting crane.
Miner	Sydney, N. S.	" 22	Struck with shaft of pit box.
Miner	Extension, B. C.	" 7	Fall of coal.
Miner	Nanaimo, B. C.	" 22	Fell off trip.
BUILDING AND CONSTRUCTION—			
Bricklayer	Ottawa, Ont.	" 27	Fell from scaffold.
Labourer	Winnipeg, Man.	" 13	Burned.
METALS, MACHINERY AND CONVEYANCES—			
Shipyard employee	Kingston, Ont.	" 3	Drowned.
Shipyard employee	Toronto, Ont.	" 25	Falling plank.
Shipyard employee	Port Arthur, Ont.	" 10	Hernia.
Shipyard employee	Victoria, B. C.	" 24	Dashed against smokestack.
Foreman of sheet metal plant	Toronto, Ont.	" 6	Skull crushed by press.
Pipe fitter	Vicotria, B. C.	" 25	Fell into hold of vessel.
Employee of steel plant	Lachine, Que.	" 6	Steel fell on head.
Employee of steel plant	Longue Point, Que.	" 15	Piece of steel fell on leg.
Employees of steel plant (3)	Montreal, Que.	" 21	Burnt with molten metal.
Employee of steel plant	Montreal, Que.	" 4	Falling steel.
Employee of steel plant	Hamilton, Ont.	" 16	Struck on head by crane.
Employee of steel plant	Hamilton, Ont.	" 3	Falling crane.
Employee of steel plant	Toronto, Ont.	" 26	Electrocuted.
Employee of steel plant	Toronto, Ont.	" 1	Repairing chimney; fell.
Employee of steel plant	Hamilton, Ont.	" 25	Run over by electric crane.
Employee of can plant	Simcoe, Ont.	" 20	Fell from gang plank.
WOODWORKING TRADES—			
Cooper	Whitehead, N. B.	" 19	Struck by flying stone.
PULP AND PAPER—			
Paper factory employee	Valleyfield, Que.	" 12	Caught in a machine.
TEXTILES—			
Woollen mill employee	Hespeler, Ont.	" 3	Crushed by elevator.
CHEMICALS AND EXPLOSIVES—			
Employee of explosive manufacturing plant	Trenton, Ont.	" 2	Overcome with gas fumes.
STEAM RAILWAY SERVICE—			
Engineer	Welland, Ont.	" 6	Fell from locomotive.
Engineer	Niagara Falls, Ont.	" 2	Crushed by locomotive.
Fireman	Cedars, Que.	" 10	Run over by locomotive.
Fireman	St. Pacome, Que.	" 25	Derailment of train.
Brakeman	Elora, Ont.	" 1	Fell between cars.
Sectionman	Fernie, B. C.	" 22	Collision.
Sectionman	Laggan, Alta.	" 4	Attempting to cross track.
Sectionman	Montrose, Ont.	" 10	Derailment of velocipede.
Bridgeman	Ft. Saskatchewan, Sask.	" 3	Struck by train.
Car inspector	Montrose, Ont.	" 15	Thrown from motor car.
Labourer	Nutana, Sask.	" 8	Passing between cars.
Labourer	Vancouver, B. C.		
MISCELLANEOUS TRANSPORT—			
Liveryman	Teeswater, Ont.	" 12	Thrown from vehicle.
Driver	Montreal, Que.	" 17	Fell from vehicle.
Driver	Montreal, Que.	" 19	Fell from vehicle.

REPORT ON THE OPERATIONS OF THE WORKMEN'S COMPENSATION BOARD OF MANITOBA

IN the February issue of the LABOUR GAZETTE, page 62, mention was made of the appointment by the Manitoba Government of a Commission to inquire into the executive and judicial acts of the Board administering the Workmen's Compensation Act. After spending some time in taking evidence, the Commission submitted a report dated February 5, 1918, in which it found that the administration of the Act had not been altogether satisfactory.

In referring to the changes in insurance rates made by the Board, and the reasons therefor, the report states that on December 20, 1917, the Board issued an order raising all insurance rates ten per cent and stated that this was done at the urgent request of the insurance companies. A week later, after protest had been made, this order was rescinded. Upon investigation it was shown that the "urgent request" of the insurance companies was merely a request for consideration. The report states that there was no investigation into the facts in connection with the reasons advanced for a general increase in rates, and that there was no compliance on the part of the Board with the requirements of subsection 6 of section 71 of the Act as to a hearing, so that the order making a general increase of rates was not justified.

In the case of another order issued, it is stated that the evidence showed that the former Commissioner ordered rates considerably in excess of the figures at which an insurance company offered to accept the risk and that experience had shown that the rates ordered were excessive.

Referring to the appointments of officers, salaries paid, office accommodation, etc., the report finds that the evidence showed a want of organizing ability on the part of the administration; that the staff was unduly large and that the salaries paid in some cases were out of proportion to the responsibility and work performed.

The necessity for the appointment of an assistant Commissioner was questioned and the services of the statistician were admittedly superfluous while one well qualified inspector should have been sufficient under present conditions. It was also questioned whether the daily attendance of a medical officer was necessary. In regard to office accommodation the evidence showed that the space now under lease is probably double what is necessary and that a saving might have been effected by renting smaller offices in less valuable property where the business of the Board could have been carried on with equal facility. "The whole evidence," says the report, "shows an apparent disregard of economy in the establishment of a Workmen's Compensation Board, which like any other organization, should have been building up gradually as necessity demanded it."

Referring to the heavy estimate of administration expenditure for the year 1918, amounting to about $75,000, the report stated that "a lack of ability to organize the Compensation Board on an economical and efficient basis has been clearly shown by these unduly extravagant estimates which are not justified by present conditions or reasonable hopes of future expansion." It was also pointed out that while two inspectors were employed, there had evidently been some laxity in the matter of inspection and following up of claims.

The following is recommended as an approximate estimate of administration cost to meet the present requirements of the Board:

Two directors	$2,000.00
One commissioner	6,000.00
One secretary	3,000.00
One inspector	2,100.00
One medical officer (part time)	1,500.00
Accountant, claims clerk and general office staff (estimated)	6,640.00
Rent, stationery and office expense (estimated)	4,760.00
Estimated total administration cost..	$26,000.00

Complaints have been made, according to the report, that awards had been given

by the Board before the insurance companies or employers liable had been notified. It is suggested that an addition be made to section 29 of the Act to the effect that when compensation is awarded the insurance company or employer liable shall be notified and shall be entitled to a hearing if the award is objected to within three days. Other minor changes to the Act were also suggested.

In conclusion, the report states, "that from evidence and general expression of opinion, it is apparent that the principles of the Workmen's Compensation Act are highly satisfactory to both the employers and workmen in that the provisions for adjustment and payment of claims tend to improve relations by the removal of controversial points, but naturally the success of the Act depends upon efficient administration."

RECENT LEGAL DECISIONS AFFECTING LABOUR

Negligence of workman in joint service of two employers is negligence of employer in whose general service he is

A WORKMAN was killed in a collision between a train and a light engine, due to the neglect of a signal by an employee of the Central Vermont Railway Company when running on the line of the Grand Trunk Railway, where according to operation arrangements the Central Vermont Railway becomes the Grand Trunk Railway. The widow sued the former Company and was awarded damages. In the Superior Court of Quebec, the Grand Trunk Railway Company was condemned to indemnify the Central Vermont Railway Company against the Court's order for the payment of $10,000. The case was taken to the Court of Appeal, and it was submitted that the widow could not have recourse against the Central Vermont Railway Company, but must proceed only against the Grand Trunk Railway Company and be content with ordinary damages under the Workmen's Compensation Act. The Court held there was no error in the judgment of the Court of first instance and confirmed the ruling that in the circumstance of the joint service of the man responsible for the accident, the widow had a legal right to recourse under article 7334 of the Revised Statutes of the province against third parties for the accident. It was observed that the Central Vermont Railway Company retained a measure of control of the man, whose negligence was held to have resulted in the accident, there being no covenant whereby the services of engine men in the general service of one company were to pass into the sole control of the other company when the men came upon the railway tracks of the latter notwithstanding that the latter was to pay the wages. The principle was laid down that the man's negligence was the negligence of the company in whose general service he was, even if also imputable to the other company. The appeal of the Central Vermont Railway Company was therefore dismissed with costs. An appeal from the Grand Trunk Railway Company as defendants-in-warranty also failed. (*Quebec.—Bain v. Central Vermont Railway Company.*)

A railway company is responsible for safe condition of highway beside its tracks

A railway conductor when switching cars slipped on a ridge of ice and mud on a highway beside the track and was run over by a car and killed. His widow brought an action against the railway company for damages under an Act Respecting Compensation to the Families of Persons killed by Accident, and was awarded damages. The company appealed against the judgment on two grounds: (1) That there was no evidence that the defendants knew of this accumulation of ice and mud along the track, and the jury was not asked to

make any finding upon this question, and (2) that the accident happened on a part of the highway over which defendants has no control. With regard to the first contention, it was held by the Appeal Court that the jury having found that the defendants were negligent in not removing the snow and ice, it followed that they could have seen it and ought to have known it existed and was a source of danger. It was therefore not necessary to ask the jury the question whether the defendants knew of this danger. With regard to the second contention it was held by the Court that the fact of the accident happening on the highway did not affect the defendants' liability, since it was not being used as a highway, but as part of the premises on which the defendants' servants had to work. The company was obliged by the Act to "provide protection, safety and convenience for the public," and the evidence showed that that portion of the roadway was not safe for the public. Where the company had such an obligation to the public, it was bound to see that the roadway was in such a condition that its servants could discharge their duties with safety. The appeal was therefore dismissed with costs. (*Saskatchewan. — McEntee v. Grand Trunk Pacific Railway Company.*)

British Columbia Employers' Liability Act does not apply to seamen

A deck-hand was knocked overboard and injured when helping to put out a gang plank at a dock. He sued the company for damages under the Employers' Liability Act of British Columbia on the ground of negligence on the part of the second officer, who ordered the plank to be put out. Judgment was given for the plaintiff on the verdict of a jury, who found the second officer's negligence to have been "neglect and lack of proper supervision." The company appealed against the judgment and their appeal was allowed. The decision of the Court of Appeal was based on the grounds that the evidence did not support the claim that the plank was undermanned, which was the only neglect and want of supervision suggested, and that the Employers' Liability Act does not apply to a seaman. (*British Columbia.—Cleugh v. Canadian Pacific Railway.*)

REVIEWS

MANITOBA.—Second Annual Report of the Bureau of Labour of the Department of Public Works for the year ending November 30, 1917. 32 pp.

Work of the Manitoba Bureau of Labour

IN the second Annual Report of the Manitoba Bureau of Labour it is stated that a satisfactory standard of conditions has been maintained, and there was a pronounced improvement in the observance of "The Passenger and Freight Elevator Act" and "The Steam Boiler Act." By amendments to the Manitoba Factories Act in 1917, an employer was obliged, before employing any young person under the age of 16 years, to obtain a birth certificate or a written statement from the child's parents, and all persons under the age of 17 years were exempted from working overtime. Only two prosecutions for infringement of the Act were made during the past year. During the year 1,478 inspections of factories were made, and 1,369 orders were issued with regard to safety, 157 with regard to health and sanitation, and 49 with regard to child labour.

An inspectress attached to the Bureau has extended her work to include the promotion of welfare schemes in the establishments which she visits. As a result of this phase of her work, 20 employers during the past year have provided lunch rooms, and several of these have also provided hot soup, tea and coffee for lunch, free of charge.

During the year, 539 industrial acci-

dents were reported, of which six were fatal. This is an increase of more than 75 per cent over the previous year, due to a better observance of the law with regard to reporting.

There were no serious labour troubles in Manitoba during the year, but there were several disputes in which the Bureau helped to effect a settlement. Among these were a strike of several hundred Government telephone girls, and a strike of about 2,500 men in the building trades.

An investigation as to the extent of unemployment was made in Winnipeg during February, 1917. Within four days after opening offices for this purpose over 300 men registered as unemployed. After the registration every possible assistance was rendered to obtain employment for them, but the majority remained idle until the spring. It is suggested that the question of public employment bureaux should be taken up by either the Provincial or Dominion Governments, whereby statistical data could be gathered and actual conditions tabulated with a view to reducing the evils of unemployment to a minimum.

Owing to complaints relative to wages paid to women workers in the province, the Secretary of the Bureau of Labour was instructed to ascertain the facts in this connection. Accordingly, a special investigator was engaged for this purpose. She worked in ten industrial plants, and received a maximum wage of $7.00 per week, and a minimum wage of $5.00 per week, or an approximate weekly average of $6.00. The average number of hours worked in a week was 52. By practical experience she found that the bare cost of living for two weeks was $9.87, leaving a balance for clothes and other necessities of only $2.13 for the fortnight. The standard of living she was compelled to adopt to keep within this sum did not allow sufficient food to satisfy her hunger, although she saved by spending Sundays with friends. As a result of this investigation the Minimum Wage Act was introduced by the Government and became law.

NEW SOUTH WALES.—The New South Wales Strike Crisis, 1917. The New South Wales Industrial Gazette. February, 1918. Special Supplement. 190 pp.

The Strike Crisis in New South Wales during 1917

On August 2, 1917, a strike of railway employees took place in New South Wales, Australia, which rapidly spread until many of the most important industries of the State were affected. A special report on this strike crisis has been issued as a supplement to the New South Wales Industrial Gazette. The cause of the trouble was the introduction at the Randwick Tramway workshops of what was known as the "card system," by which the time of the workers would be kept by the foremen instead of by the men themselves. It was claimed by the men that the system favoured by the Railway Commissioners aimed at an unfair speeding up of the work, that they could exercise no check over it as the cards would not be open to their inspection, and the foremen would be likely to make serious errors to the prejudice of the men, and that the Commisisoners were bound by a pledge not to introduce innovations as between employer and employee during the war. The object of the Commissioners in introducing this system was to provide a more satisfactory way for recording workshop costs, as the former system by which the workmen filled in their own cards entailed on them burdensome clerical work, and the Commisioners alleged it was withdrawn on the understanding that a scheme would be substituted which would relieve the men from keeping their own cards. On the first day of the strike, 5,780 men stopped work, and before its termination on September 11 about 73,500 employees were involved. These included large numbers of employees who went out in sympathy with the original strikers, belonging principally to the mining, transport, engineering and food supply industries.

While the dispute was in progress, the Government managed to carry on the essential industries of the State by or-

ganizing substitute labour recruited largely from country districts, and located in large camps at Sydney, Newcastle and elsewhere. Large sums were raised for the relief of distress owing to the strike. For this purpose the Government voted £20,000, the combined trade unions appropriated £23,000, and the Lord Mayor of Sydney raised a fund of £5,931. The Benevolent Society of New South Wales, largely subsidized by the Government, provided 750 families, or about 3,000 people, with food each week in Sydney, and no case of distress was turned away by the Society.

Various efforts to settle the dispute were made through the mediation of the Lord Mayor of Sydney and the chairman of the State Recruiting Committee, and finally a basis of settlement was reached on September 8 through the mediation of the Industrial Commissioner under the Industrial Arbitration Act, 1912, according to which the card system as existing on August 1 was to be continued, and at the end of three months a Royal Commission would be appointed to determine whether its operations are just or otherwise and should be continued. Every man should have the opportunity every day of inspecting and initialling his card relating to the previous day's work. Negotiations were then carried on with the other organizations that had declared sympathetic strikes, and, by October 22, normal conditions were resumed in all the industries that had been affected.

SWEDEN.—Arbetartillgang, arbetstid och arbetslon inom sveriges jordbruk ar 1916. Sveriges officiella statistik. Socialstatistik. Stockholm, 1918. 49 pp.

Farm Labour in Sweden during 1916

An official report has been issued in Sweden dealing with labour conditions in agriculture in Sweden during 1916, information for which was gathered in the same manner as in the previous year. Questionnaires were filled in by the presidents of assemblies in 2,179 rural communes, which represent 93.3 per cent of the rural communes included in the inquiry. With regard to the supply of labour, 58 communes, or 2.7 per cent, replied that it was good; in 966, or 44.3 per cent, it was sufficient; in 1,125, or 51.6 per cent, it was insufficient, and in 30 communes, or 1.4 per cent, a definite reply could not be given. Compared with the previous year there was a great decrease in the supply of farm labour. This was attributed chiefly to the increased demand for labour in industries due to the war, which could only be satisfied at the expense of agriculture; but it was also due to the exceptionally great demand for labour to harvest the crops of 1916, owing to the bad weather.

The hours of labour in agriculture have been unchanged in the six years during which these reports on farm labour have been issued. The average for the whole country during the three summer months is 12.3 hours per day less 2.2 hours of rest, making 10.1 hours net. The rates of wages vary greatly in different parts of the country, and it was only possible to take into account the lowest wages paid in a small number of the more important groups of workmen who are found in all parts of the country, or at least in most parts. Farm labourers, as a rule, receive a mixed wage, being paid partly in money and partly in food and lodging. In the north country they generally receive clothing also. In addition, there are labourers with permanent abodes who are paid straight wages, also labourers who work by the day for different employers. In the years 1913 to 1916, the total earnings of farm servants and labourers with mixed wages increased about 35 per cent. This was largely due to the increased value of goods supplied in lieu of wages. The wages of day labourers increased from 26 to 38 per cent, the increase being greater for winter days than for summer and for men than women.

Volume 18 AUGUST, 1918 Number 8

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

The percentage of unemployed among the members of trade unions at the beginning of July was 0.5, as compared with 1.3 at the same time last year, and 1.7 at the beginning of April, 1918.

During July, there was a steady demand for workers throughout the country, more particularly in the mining industry. A slight advance in civic employment in comparison with June was indicated, but a decline in comparison with July, 1917.

There was an advance over both May and June in the value of building permits issued, also an increase in comparison with July, 1917.

The time loss on account of industrial disputes during July was much greater than in June, and greater than in July, 1917. There were in existence during the month 39 strikes, affecting 15,848 workpeople and involving a time loss of 123,511 working days. At the end of the month there were 15 unterminated strikes on record affecting approximately, 4,049 yorkpeople.

The average cost of the weekly budget of staple goods was $13.00, as compared with, $12.77 for June; $11.62 for July, 1917; and $7.42 for July, 1914. The index number of wholesale prices was 284.0, as compared with, 280.6 for June; 242.6 for July, 1917; and 134.6 for July, 1914.

Proceedings under the Industrial Disputes Investigation Act

During the month of July the Department received reports from six Boards of Conciliation and Investigation appointed to inquire into disputes affecting (1) The British Columbia Electric Railway Company, Limited, and its street railway employees at Vancouver, Victoria and New Westminster; (2) The British Columbia Electric Railway Company, Limited, and its electrical workers; (3) The Western Power Company of Canada, Limited, and its electrical workers; (4) Corporation of Victoria and its civic employees; (5) The Toronto Street Railway Company and its machinists; and (6) Canadian Pacific Railway Company and its Dining Car Employees.

Ten applications were received for the establishment of Boards, and a Royal Commission was appointed to investigate certain unrest in the shipbuilding indutry in the Province of Quebec. Four disputes, regarding which the Department had received applications for Boards of Conciliation and Investigation, were referred to this Commission, namely; (1) The Quinlan and Robertson Shipbuilding Co., Quebec, and its carpenters and joiners; (2) The Davie Shipbuilding Co., Lauzon, Que., and its boilermakers, iron shipbuilders, blacksmiths, carpenters, etc.; (3) The Quebec Shipbuilding Co., and its employees;

and (4) Fraser, Brace & Co., and its employees.

Advice was received during the month of an amicable settlement of the dispute between the Vancouver Gas Co. and its employees.

Housing programme of the Ontario Government

The Ontario Government has notified the chairman of the recently formed Housing Section of the Organization of Resources Committee, that governmental action is being taken in connection with the shortage of workmen's dwellings in the province. An appropriation of $2,000,000 is being set aside by the Provincial Government, out of which loans will be available to municipalities, under certain conditions, at an interest rate of 5 per cent. The plan, which is a temporary one to assist in meeting the pressing emergency at present existing in Ontario, will be effective only until January 1, 1920. The terms and conditions under which loans will be made are as follows:

1. The total amount loaned by the province shall not exceed $2,000,000.

2. Any municipality receiving a loan from the Government must add at least 25 per cent to the amount received, so that for every $1,000 received by way of Government loan, at least $1,250 shall be expended in home construction.

3. The money shall be loaned to the municipalities by the Provincial Government on the credit of the municipalities in a manner to be hereafter arranged.

4. The rate of interest payable by the municipalities shall be 5 per cent per annum.

5. The type of houses to be constructed with the proceeds of the aforesaid loan shall

(a) Not exceed in cost for each house $2,500;

(b) The houses to be offered to workingmen and women on easy terms of payment;

(c) Where the house and land are rented, the monthly rental shall not exceed $25;

(d) The building scheme of each municipality, including the plotting of the buildings on the land, the plans of the houses, the form of construction, the location of the land to be developed, shall be approved by the Government of Ontario.

6. The period of the loans above mentioned shall be for a term of 20 years, or for such less period as may be decided upon by the municipalities and the Government.

7. The municipalities shall not charge against houses erected under proposed scheme more than 5 per cent, either in respect of the money received by way of loan from the Government or money contributed by the municipality.

Minister of Labour urges employers to recognize labour unions

The following statement, relative to the present state of labour unrest in Canada, was recently given to the Canadian press by the Hon. T. W. Crothers, Minister of Labour:

"Perhaps in larger numbers than ever before complaints reach the Minister of Labour from working men that their employers forbid, upon penalty of dismissal, their becoming members of any labour organization. Upon investigation such complaints are generally found to have been well founded.

"The Minister deeply regrets this attitude on the part of so many employers, believing it too well calculated to produce serious labour disturbances. He maintains that every man must be at perfect liberty to associate himself with his fellow-workers in any legitimate labour organization without thereby subjecting himself to penalties or discriminations of any character. He expresses the hope that employers may accept his attitude in this regard, and that hereafter no just cause for such complaints may arise."

Canada Food Board Regulations

On July 31 the Canada Food Board issued Order No. 58 removing the restrictions on the consumption of pork.

Whereas, the successful efforts in production and conservation by the people in the Dominion of Canada and United States of America permit for the time being the removal of the restriction on the consumption of pork,

The Canada Food Board hereby orders:

1. Notwithstanding anything contained in Order No. 46, relating to public eating places, pork, as defined therein, may be served at any time.

On August 1 the Board issued a statement as to what should be considered reasonable retail prices for certain substitutes for wheat flour, specified in Orders No. 50 and 55 requiring their use in baking, in households, in bakeries, etc. A table of these prices may be found in the article on Retail and Wholesale Prices. It was stated that these prices were not fixed and would vary with the changes in the price of grain. It was pointed out that exorbitant prices for these substitutes must not be charged, that dealers in such products must have a sufficient stock of these substitutes for sale at reasonable prices, that heavy penalties, including fine and imprisonment, were provided for infraction of this or any other Order, and in addition the Board might cancel the license of any offending dealer.

Departmental Cabinet of the United States Department of Labour

The latest step in the organization of the war labour administration of the United States has been the formation of what is becoming known as the "departmental cabinet," composed of the executives of all the branches of the Department of Labour. Many of the production departments and boards of the Government will also be represented in this departmental cabinet in the person of Felix Frankfurter, assistant to the Secretary of Labour and chairman of the Labour Policies Board which consists of the production chiefs of the War, Navy, and Agriculture Departments, the Shipping and War Industries Boards, and the Food, Fuel, and Railroad Administrations. (See July issue, page 530.)

Weekly meetings of the departmental cabinet are being held.

The full membership of the cabinet follows:

W. B. Wilson, Secretary of Labour.

Louis F. Post, Assistant Secretary of Labour.

John W. Abercrombie, Solicitor.

Felix Frankfurter, assistant to the Secretary and chairman of the War Labour Policies Board.

Anthony Caminetti, Commissioner General of Immigration.

Dr. Royal Meeker, Commissioner of Labour Statistics.

Richard K. Campbell, Commissioner of Naturalization.

Miss Julia C. Lathrop, Chief Children's Bureau.

J. B. Densmore, Director General United States Employment Bureau.

Roger W. Babson, Director Division of Education and Information.

Hugh L. Kerwin, Director of Labour Adjustment.

Dean Herman Schneider, Director Division of Training and Dilution.

Ethelbert Stewart, Chief Investigation and Inspection Service.

Grant Hamilton, Director Conditions of Labour Service.

Miss Mary Van Kleck, Director Woman in Industry Service.

Otto M. Eidlitz, Director of Industrial Housing and Transportation.

Charles T. Clayton, Director of Civilian Insignia.

S. J. Gompers, Chief Clerk, Department of Labour.

Of the departmental bureaus enumerated above, the Immigration, Naturalization, Labour Statistics and the Children's Bureaus have been in existence for some time. The other bureaus have been

established since the beginning of the year as machinery for the execution of the war labour programme.

* * *

General Bureau of Social Affairs in Finland

The many various departments of the Finnish Government engaged on work of an industrial and social character have lately been brought together into one comprehensive department known as the General Bureau of Social Affairs.

The new bureau covers a very wide field, having under its direction and control the following activities:

1. The inspection of labour and protection of workers, including the supervision and improvement of workingmen's lodgings.

2. The organization and inspection of social insurance.

3. The organization and inspection of public assistance.

4. Labour placing and the prevention of unemployment.

5. Abstinence, and the supervision of affairs relating to alcoholic beverages.

6. Social statistics and social publications.

7. Arbitration in industrial disputes and relations between employers and workers.

8. Associations.

9. Registration of relief funds and of funds against unemployment.

10. Emigration, and the control of emigrants.

* * *

Rent profiteering in United States

A few weeks ago the Governor of Connecticut appointed a Commission to investigate and report upon the alleged rent profiteering in various Connecticut factory towns where munitions are being made. The Commission upon investigation found that in one town rent increases had averaged 84 per cent during the past two years, and that in 34 per cent of the cases investigated the rents had been doubled or more than doubled.

Similar allegations have also been made that a large number of employees engaged in essential Government work in shipyards and other plants at Wilmington have been notified by their landlords to move out of their homes on a specified date, unless they agree to the payments thereafter of grossly exorbitant increased rentals. In consequence of these allegations the director of transportation and housing in the Emergency Fleet Corporation has requested the mayor of Wilmington, if the information should be correct, to notify all shipyard employees "that the Emergency Fleet Corporation will not permit them to be evicted from their homes under such conditions and that any landlord who attempts to profiteer at the expense of the shipyard employee will be dealt with summarily by the Government."

In this connection the federal Department of Labour has also made an official statement, as follows: "The Housing Bureau of the Department of Labour is giving this subject careful consideration, and intends to co-operate to the fullest possible extent with the authorities of the Shipping Board in an effort to curb the activities of landlords who are charging excessive rentals to employees engaged in the manufacture of war products."

* * *

Policies of the United States Railroad Administration outlined

In a recent statement outlining the policy of the Railroad Administration, Mr. McAdoo, the Director General of Railroads, says that the prompt movement of men and material necessary to win the war is the first consideration, to which everything else must be subordinated. Then comes service to the public, which means adequate transportation facilities at the lowest cost, the object of the Government being to furnish service

rather than to make money. Other policies are the promotion of a spirit of sympathy and understanding between the administration of the railways and their two million employees; and the application of sound economies, including (a) the elimination of superfluous expenditures; (b) the payment of a fair and living wage for services rendered and a just and prompt compensation for injuries received; (c) the purchase of material and equipment at the lowest prices consistent with a reasonable but not an excessive profit to the producer; (d) the adoption of standardized equipment and the introduction of approved devices that will save life and labour; (e) the routing of freight and passenger traffic with due regard to the fact that a straight line is the shortest distance between two points; (f) the intensive employment of all equipment and a careful record and scientific study of the results obtained, with a view to determining the comparative effiiency secured.

The Director General concludes his statement by saying: "It is as yet too early to judge of the results obtained, but I believe that great progress has been made toward the goal of our ideals."

* * *

Labour Jottings

The tenth annual convention of the Canadian Federation of Labour will meet in the city of Toronto on September 3 next.

The thirty-fourth annual session of the Trades and Labour Congress of Canada will convene in the Provincial Parliament Buildings in the city of Quebec on September 16 next, and will continue in session from day to day until the business of the convention has been completed.

The first provincial convention of the machinists' unions in Ontario, held in Toronto on July 20, was attended by more than 100 delegates from unions throughout the province. The object of the convention was to discuss the question of wages and working conditions generally, with a view of taking action to bring about uniformity throughout the province.

The Workmen's Compensation Act of Alberta, as passed by the last session of the legislature, came into effect on August 1 for those workers covered by schedule 1 of the Act, which includes employment in or about coal mines, coke ovens, briquetting plants, and mines other than coal. For workers covered by schedule 2, the Act comes into effect on January 1, 1919.

A judge of the Supreme Court of Alberta has quashed the conviction, by a Calgary magistrate, of a labour union official charged with not being engaged in some useful occupation. Details of the case are given on page 683 of this issue.

The Director of Coal Operations for southeastern British Columbia and southwestern Alberta has issued an order that in future no increase in the price of coal at the pit mouth shall be made unless by his authority.

John R. Clynes, M.P., the recently apponted British Food Controller, in succession to the late Lord Rhondda, is prominent in Great Britain as a trade unionist. At the time of his appointment he was president of the National Union of General Workers, a union of 164,000 members.

The Secretary of the United States Treasury has submitted to the Senate Appropriations Committee an estimate of $100,000,000 for the housing programme of the Department of Labour for war workers.

A Women's Division has been added to the United States Department of Labour. Its immediate task will be to develop policies and devise methods by which the services of women may be used effectively in war production, while at the same time preventing their employment under injurious conditions. Because of its policy-making function, the new division will be represented by its

chief, Miss Mary Van Kleek, on the Labour Policies Board.

The German Emperor has given his assent to a law, the effect of which is to repeal section 153 of the Imperial Criminal Code, and thereby remove what has been considered by organized labour in Germany to be a restriction upon their freedom of action.

INDUSTRIAL CONDITIONS DURING JULY, 1918

I.—GENERAL REVIEW

The Labour Market

The demand for workers during July was more pronounced in the case of mining than in that of other industries. There was a slight increase over the two preceding months in employment in the building trades. The demand for labour in the West was somewhat reduced, as, owing to the failure of some of the western crops, some farm labour was released for other work. There was a demand for women in munition and aeroplane factories and for farm work. The need for fruit pickers was reduced in some parts of the country, owing to the partial failure of fruit crops.

The steel plants and foundries generally were well employed and there was some shortage of skilled hands. Skilled electrical workers were in demand. Plenty of employment was offered in the shipyards, and railway car builders were needed. Owing to industrial troubles in the automobile factories the demand for workers in that industry decreased to some extent.

In the food group, the sugar refineries at St. John and Vancouver ran steadily, while the flour and feed mills showed an increase in activity over last month, and the biscuit factories were all busy. Employment in the abattoirs and packing houses was well maintained. Fruit and vegetable canners were all well employed. Confectioners were rather quiet, owing to the sugar restrictions; but the aerated water and soft drink plants were all busy, and the breweries were more active than during the preceding month.

In the textile group employment continued to be very good; female help, skilled and unskilled, was in demand. The shirt and whitewear factories were well employed, but the ready-made clothing factories were quieter than during the previous month. The laundries were active and in need of female help.

The pulp, paper and fibre mills were well employed and there was considerable scarcity of labour. The newspaper and job printers, and paper box and bag manufacturers generally, were active.

The sash, door and planing mills in the Maritime Provinces were working to capacity, and throughout the country generally they were active. The wooden box factories were well employed. There was some demand for skilled furniture hands, and in a few instances women were employed.

In the leather group, activities in the tanneries varied; but the boot and shoe factories were, in some instances, advertising for skilled help. The rubber tire companies generally were busy.

There was a big demand for stone and granite cutters at Halifax, and some demand in parts of Ontario. There was a slight improvement in employment in the brickyards, but generally they were dull.

The paint works at Halifax were very busy, and in other parts of the country the paint, varnish and chemical works were well employed, although there was some shortage of material.

The steam and electric railways did the usual business for the season, except that passenger traffic was slightly less

than in former years. The railway repair shops were busy, in some cases getting cars ready for the fall rush. The street railways had some difficulty in getting men. 'Longshore work was rather dull, except at Sydney, Hamilton and Kingston, where it was good. The Inland Navigation Lines did a capacity business in freight, and navigation generally was good.

Metal mining showed some improvement over the previous month, particularly in the East Kootenay district. The shortage of labour was general except that in the Cobalt district it was not so acute as it had been formerly. The new refining plant of the International Nickle Company at Port Colborne commenced operations. Gold mining was practically at a standstill, due partly to high costs and partly to lack of efficient labour. Coal mining showed an increase in output over the previous month, although the shortage of labour continued to be acute.

Employment in the lumbering industry varied, but generally it was quieter than it had been for some weeks; labour, however, was in demand. As a result of heavy rains during the month some later drives were brought in.

Employment in the building trades, as indicated by the value of building permits issued in 35 cities, increased 59.9 per cent as compared with June, and increased 27.7 per cent as compared with July, 1917. Reports from 15 cities, showing the number of civic employees temporarily engaged and the wages paid these employees during the first payroll period of two weeks of July, indicated a very slight increase in the number of workers and an increase of nearly 4 per cent in the wages paid.

Strikes

The loss of time on account of industrial disputes during July, was much greater than in June, and greater than in July, 1917. There were in existence at some time or other during the month 39 strikes, affecting 15,848 workpeople and involving a time loss of 123,511 working days; as compared with 28 strikes, 11,105 workpeople and 40,929 working days in June; and 35 strikes, 24,986 workpeople and 62,484 working days in July, 1917. On July 1, there were on record eleven strikes affecting 784 workpeople. Twenty-eight strikes were reported as having commenced during July, as compared with eighteen in June; eighteen of the strikes commencing during July and six of those commencing prior to July were reported teminated, leaving fifteen unterminated strikes, affecting approximately 4,049 workpeople on record at the end of July.

Prices

During the month there was an upward movement in wholesale prices and in retail food prices. In the former the increases were chiefly in dairy products, fresh and canned vegetables, textiles, and lumber. There were decreases in fodder, livestocks and meats. In retail prices there were increases in meats, eggs, and potatoes, with slight decreases in milk and in dairy butter. Coal, wood and coal oil, and rent showed slight increases. The index number of wholesale prices for July reached 284.0 as compared with 280.6 for June, and 242.6 for July, 1917. The cost of a weekly supply of food at the middle of July averaged $13.00 in some sixty cities as compared with $12.77 for June and $11.62 for July, 1917.

Changes in Wages and Hours of Labour

During the second quarter of 1918, sixty changes in rates of wages and hours of labour, affecting approximately 26,500 workpeople, were reported to the Department, as compared with 26 changes affecting approximately 18,800 workpeople in the first quarter of 1918, and 150 changes affecting approximately 81,900 workpeople in the second quarter of 1917. Of the 60 changes, 57 were wage

increases, two an increase in wages with a reduction in hours and one a reduction in hours. In the mining industry only three changes took place, yet 10,765 workpeople were affected. Approximately 9,150 workpeople were affected by 17 changes in transportation, while 19 changes occurred in the building trades affecting approximately 2,500 employees.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

Sydney reported the production of the Dominion Steel Company for July in tons, as follows: pig iron, 24,000; ingots 28,000; blooms 25,000; rails, 16,000; merchant bars, 2,750; rods, 1,700; wire and nail 130; blast furnaces, 4. The new coke ovens were reported as being near completion. At the Sydney Mines Plant the production of iron was 6,900 tons, and steel 11,000 tons and one blast furnace; as compared with 7,550 tons of iron and 11,000 tons of steel last month. At Halifax the machinery group was reported very active in all its branches. The shipyards were working day and night on repairs. The Nova Scotia Steel Company at Trenton, reported a very busy month in all departments. At Amherst the Canada Car and Foundry Company were very busy on an order for stock and refrigerator cars and were advertising for carpenters and car builders. The shipyards at Amherst were all well employed on a number of small vessels. Some firms formerly engaged in lumbering have now taken up shipbuilding. Truro reported a shortage of steel workers. The Portland Rolling Mill at St. John continued to be active, and the shipyards were well employed. Newcastle reported that the shipbuilding plants were busy and that the carriage shops and auto repair shops were well employed. At Fredericton the machine shops and foundries were very busy and looking for more help, especially for machinists. The machinery group generally was active in Montreal, and expert mechanics were in great demand; there was also great activity in both steel and wooden shipbuilding. Quebec reported that the boat and shipbuilding and repairing yards had a very busy month; also that automobile engine repair shops were very well employed. Sherbrooke reported that most of the iron industries were busy, both with ammunition orders and in their own lines. The Canada Iron Foundries Limited, at Three Rivers, continued to employ about 500 men making castings. The other companies were also very busy. The Tydewater Shipbuilding Company employed about 700 hands and launched their first steel boat during the month. This company is at present building fifty brick tenement houses for their employees. The Three Rivers Shipyards Limited employed 600 hands in the construction of some large wooden boats. The machine shops and foundries were all very active. At Sorel the various foundries and steel works gave employment to about 800 men, and paid wages of from $2 to $5 per day. The shipyards, both Government and private, were very busy and gave employment to about 1,200 hands. The mica factory closed for two weeks for holidays. Toronto reported that the metal and machinery industries were busy, and expanding, and that many additions were being made to plants. The Dominion Shipbuilding Company, which has under construction several steel freighers, made rapid progress towards the completion of its plant and largely increased its working forces. Structural Steel manufactures were operating more steadily than last month, owing to the better supply of material. Engine and boiler works, agricultural implement, automobile and bicycle plants were all active, with skilled labour in great demand. Hamilton reported the machinery group, boatbuilding and conveyances all active, with a demand for

labour in electrical apparatus plants. St. Catharines reported that electrical workers are well employed. The Canadian Locomotives Works and the Kingston Shipbuilding Company at Kingston were reported active. The rolling mills at Belleville were running day and night shifts. Machinists and tool makers were in good demand at Peterborough, and electrical workers were well employed. The Waterous Engine Company of Brantford was very busy on an order for castings for the United States. The Buck Stove and Range Company were very busy though handicapped by a shortage of skilled and unskilled labour. The Massey-Harris Company were also short of labour. The Waterloo Manufacturing Company, at Kitchener, were very busy on threshers and portable engines for their Western trade. The Regal Motor Company were busy making motor trucks and in need of experienced mechanics. At Guelph the agricultural implement makers were very active. At Woodstock there was a demand for moulders and polishers in the stove and furnace factories. London reported the rolling mills and engine and boiler makers were all active, while the Ford Company were working night and day assembling automobiles. Chatham reported that the various branches of iron workers were well employed, but that there was a shortage of material. The automobile works were practically closed down. Windsor reported that owing to an impending strike, and also to the difficulty of securing materials promptly, the Ford Company laid off over 2,000 men. This action on the part of the Ford Company seriously effected the Fisher Body Company and the Kelsey Wheel Company. Most of the men laid off were absorbed by other companies. Orillia reported a considerable falling off in the demand for agricultural implements and wagons, with a consequent reduction in staff. There was a demand, however, for moulders at the stove foundry.

Winnipeg reported that the metal industries group was well employed during the early part of the month. The employees quit work later, however, and this was the state of affairs at the close of the month. In the automobile industry, all repair shops were affected by the strike, while in the assembling plant of the Ford Company practically no work was done. At Brandon the agricultural implement firms were only fairly well employed, but at Regina they were busy. Saskatoon reported the automobile business had dropped considerably during the month. The rolling mills at Medicine Hat were reported active, but the other metal working industries were rather quiet. The Edmonton Iron and Machinery Company at Edmonton gave employment to some fifty hands. Vancouver reported that the boat and shipbuilding and repairing yards were very active, with a shortage of labour. At New Westminster, shipbuilding continued to be very quiet but there was continued activity in boatbuilding. The machine shops all reported business very active, with some scarcity of men. Victoria reported that work in the iron foundries continued to be fairly brisk. Owing to the near completion of present contracts at the wooden shipbuilding yards a large number of men were laid off.

Foods, liquors and tobacco

Sydney reported the abattoirs and packing houses active; while at Halifax the bakers were very busy and the soft drink establishments worked to capacity. The flour and feed mills at Westville reported only a fair month. Truro reported that the condensed milk factory worked full time, and that help was scarce. Charlottetown reported the abattoirs busy, but meat packing houses quiet; the canning factories were active. St. John reported the flour and feed mills running steadily and the sugar refinery busy. The breweries reported increased business. At Moncton the flour mills were quiet. The biscuit manufacturers continued to employ about 140 hands, mostly female; they were in need of additional help. The creameries and cheese factories were very active. At Newcastle the flour mill was closed down. The meat packing houses

at Fredericton were fairly well employed. Montreal reported the flour mills quiet. There was fair activity in tobacco factories with the exception of the Tuckett Cigar Company and the Andrew Wilson Company, whose employees went out on strike; an increasing number of women were employed in this industry. Quebec reported that bakers were active but that confectioners were dull. The breweries were also dull. Sherbrooke reported the food group active and that the breweries were well employed. Three Rivers reported that the brewery had closed down. Toronto reported that the flour and feed mills were quiet, owing both to the shortage of wheat and the impending adjustments in connection with the new regulations as to wheat substitutes. The abattoirs and meat packing houses were all very busy on Government contracts. Bakers were active, and confectioners did a fair business though affected by the restrictions imposed on the use of sugar. Fruit and vegetable canners were very busy. Cigar makers were fairly well employed. There was a demand for women and girls in the biscuit factories. The food groups at Hamilton were reported as all being well employed. The breweries and distilleries reported business fair, but the tobacco factories were embarrassed by strikes. Niagara Falls reported that the fruit and vegetable canning industry was hampered by lack of labour for factory work, and by lack of fruit pickers in the gardens. The flour and feed mills at Kingston were well employed, and the breweries were active. At Belleville the feed mills were very busy. Peterborough reported the flour, feed and cereal mills working to full capacity. The Campbell Milling Company and the Peterborough Cereal Company are building additions to their plants. Galt reported that the flour mills were not so busy as they were last month. The preserving company at Brantford were very busy, but the soft drink establishments were forced to close down owing to a shortage of sugar. Kitchener reported that all the flour mills in the vicinity were running full time; also that the wholesale sausage and meat packing houses and abattoirs were exceptionally active. The cigar factories and breweries were running full time. London reported that the Hunt Flour Mill Company ran their new mill at fullest capacity, and that the biscuit factories were very busy and in need of more help. The Empire Flour Mill Company, at St. Thomas, was very busy during the month, and the tobacco workers were well employed. Chatham reported that the Dominion Sugar Company were employing the usual number of hands in their Wallaceburg branch. The abattoir and packing house remained closed. At Windsor the flour mills were practically closed down. Winnipeg reported that employment in the abattoirs and meat packing houses continued to be well maintained, also that the vegetable canners were working with a full staff. Regina reported that the flour mills were only running about two days a week, owing to the scarcity of wheat. The flour mills and abattoir at Moose Jaw reported business quiet. Saskatoon reported the Interprovincial Flour Mills closed down owing to the shortage of wheat. The Quaker Oats Company continued to run, but with a reduced staff. Medicine Hat reported the flour mills active, but that the supply of wheat was nearly exhausted. Edmonton reported the Swift Canadian Packing Company was busy on orders for the British Government; they had some 500 employees on their payroll but needed additional help. Fernie reported that the breweries were active. Vancouver reported that much overtime was worked in the fruit and canning factories and that there was an increased demand for women and girls. Women were fully employed in dairies and creameries, several women having taken the place of men on the delivery of milk. At New Westminster the meat packing plant ran full time, while the vegetable evaporating plant ran double shifts. The breweries ran full time, but the cigar factories laid off several men. At Nanaimo the cigar makers were fairly well employed but the breweries were idle. Victoria reported the flour

and cereal mills and the fruit and vegetable canneries steadily employed.

Textiles, cordage and carpets

Truro reported that the woollen mills worked full time, but were handicapped by inexperienced help. St. John reported the cotton mills running steadily. At Moncton the woollen mills were active, while the underwear factory ran day and night and advertised for female help. The Maritime Linen Company was in active operation with some forty looms running. The cotton mills at Fredericton were well employed. Montreal reported the cotton mills very active, but that the oilcloth and linoleum factories were tied up owing to the embargo upon jute. Quebec reported the cotton mills very busy, and that the sail makers, tent and awning manufacturers were actively engaged. Sherbrooke reported the textile group active in all its branches. The Pennman Manufacturing Company at St. Hyacinthe reported orders on hand for several months ahead. The Wabasso Cotton Company at Three Rivers continued to employ about 1,200 hands, with plenty of orders ahead. Toronto reported the woollen mills very busy on Government orders but handicapped in obtaining supplies of wool. The hosiery and knitted goods manufacturers were also short of raw material. There was a constant demand for experienced operators in the knitting mills. Tent and sail makers were active, and took on some extra workers. Hamilton reported general activity in the textile group with some shortage of weavers. Brockville reported that the tent, awning and sail makers were only fairly well employed. The textile mills at Kingston were reported active. Peterborough reported that employment was very good in the woollen mill. Galt reported that the cotton and woollen mills and underwear and knitted goods factories were all very busy and short of hands. The woollen and silk mills at Brantford were advertising for both skilled and unskilled help. The Brantford Cordage Company had to employ Chinamen in order to fulfil their orders. Kitchener reported the Dominion Twine Company busy. Guelph reported a demand for female help in this group. At Stratford the woollen, hosiery and knitting factories were busily employed on war orders. London reported ten hosiery companies very busy and takihg on new help. Windsor reported employment good in the tent and awning business. Chatham reported the Taylor woollen mills very active. At Orillia the woollen factory made a slight reduction in their staff. Winnipeg reported that the knitting factories were very quiet on account of lack of material, but that tent and awning manufacturers were steadily engaged. Vancouver reported employment good in the knitting factories; also that the tent, awning and sail manufacturers found difficulty in obtaining skilled operators.

Clothing and laundering

Ready-made clothing manufacturers at Halifax had plenty of employment for all the help available; the steam launderies, dyeing and cleaning establishments were very busy. The shirt and cap factories at Truro reported a falling off in business. Ready-made clothing firms at St. John reported business steady, while the steam laundries were busy and in need of expert help. Moncton reported that the hat and cap factory continued to employ about 40 persons on piece work At Fredericton there was a demand for women garment workers. Montreal reported the ready-made clothing factories rather quiet, though most of the workers were employed. Quebec reported the clothing group active and the laundries busy. The clothing factories at St. Hyacinthe were very active and short of help. Three Rivers reported that the glove factories gave employment to over 300 workers. The Cluett-Peabody Company at St. Johns closed down during part of the month on account of holidays. Toronto reported that the ready-made clothing trade was dull and that some shops had been closed for short periods; the whitewear firms, however, were active and steam laundries very busy. Hamilton reported the clothing group generally as active, with

some demand for labour. The ready made clothing firms at Kingston reported business fair. The Deacon shirt factory at Belleville was busy on a militia order. At Brantford the overall, shirt and dress factories continued to be very busy. The robe and clothing company at Kitchener continued to be fairly well employed. The shirt and collar factories were all busy; the button factories were advertising for boys and girls; and the glove and whitewear factories were short of experienced help. The felt hat factory at Guelph was very active. The button factory at Windsor reported trouble in getting material but business was good. Winnipeg reported that employment in the ready-made clothing factories continued steady. The shirt companies were working overtime, and operators were in great demand. The cap factories took on additional girls, while the glove manufacturers continued to increase their staffs. The furriers reported an unsually busy season and were taking on extra hands. The whitewear factories continued to be steadily employed. Experienced help was in demand in the laundries, while the cleaning establishments gave employment to their regular staffs. Regina reported that steam laundries were in need of experienced help. At Edmonton, the Great Western Garment Company was well employed with some 250 hands on their payroll. Vancouver reported that the overall and shirt factories were very busy with a shortage of skilled operators; but in the ladies garment houses there was very little employment. The dyeing and cleaning establishments reported trade good while the steam laundries were exceptionally busy and short of help. At Victoria the shirt and overall factories continued to be very busy.

Pulp, paper and fibre

St. John reported that the pulp mills ran continuously night and day; and that the paper box factories were busy. Newcastle reported that the pulp and paper mills continued to be active with a scarcity of both skilled and unskilled labour. Sherbrooke reported the pulp, paper and fibre mills actively engaged. At Three Rivers the Wayagamack Pulp and Paper Company gave employment to over 800 men. The E. B. Eddy Company at Hull reported that the usual midsummer lull in the paper industry was not so much in evidence this year as in former years. Hamilton reported activity in the felt and tarred paper establishments. St. Catharines reported the pulp, paper and beaver board manufacturers well employed. Fire at a loss of between $150,000 and $200,000 destroyed practically the whole plant of the Peerless Pulp and Paper Company at Thorold. The Canadian Roofing Company, at Windsor, reported a good month in felt and tarred paper, and in beaver board. At Sault Ste. Marie the mills of the Spanish River Pulp and Paper Company ran full time. Vancouver reported that the pulp and paper mills up the coast continued to be very active; and Victoria also reported a continued demand for pulp and paper.

Printing, publishing and paper goods

Halifax reported a considerable shortage of compositors in both newspaper and job plants. The binderies, paper box and lithographing departments were very active. St. John reported activity in the printing business, while the binderies were busy. Moncton, Newcastle and Fredericton all reported that printing offices were well employed. Montreal reported that there was a shortage of skilled help in the printing plants and publishing houses notwithstanding the usual summer slackness. Quebec and Sherbrooke reported the newspaper and printing offices active. The paper box factory at St. Hyacinthe was well employed. In Toronto, the printers, bookbinders and lithographers were all steadily employed. The paper box concerns were reported as active with a shortage of experienced workers. Hamilton reported the paper box and bag and novelties firms well employed. Brockville and Kingston reported the newspapers and job printing houses as fairly busy. Galt reported that the

printing business was not so active as formerly, but that the paper box factory was busy. Paper box factories at Kitchener and Guelph were active. There was a demand for job printers at Woodstock. Chatham also reported a shortage of experienced hands. Windsor reported that printers and publishers were fairly busy, but that the binderies were dull. Winnipeg reported that the book binderies were busy and that the paper box manufacturers had plenty of work. Regina reported that the job printing houses were fully employed, while the publishing houses and binderies were in need of additional help. Lethbridge reported the printing establishments very busy. Vancouver and New Westminster reported employment good in the printing offices. Victoria reported job printing quiet, but the paper box and bag factories well employed.

Woodworking and furniture

At Halifax, the sash, door and planing mills were working to capacity night and day and at Sydney they were also very busy. Charlottetown reported planing mills active and the broom factory very busy. St. John reported that the brush and broom factories were well employed, and that the wooden box factory was advertising for help. Moncton reported that the cooperage plant was steadily engaged. The sash, door and planing mills at Fredericton were very busy. Quebec reported the woodworking plants and broom factories active. Sherbrooke reported the chair factories well employed. At St. Hyacinthe the wooden box factories were fairly busy. Three Rivers reported the sash and door factories steadily employed. Toronto reported the sash, door and planing mills active, while the furniture factories were operating steadily. Box factories, piano and gramophone manufacturers were working to capacity. The Dominion Toy Company was fairly busy with a reduced staff. Hamilton reported the woodwork and furniture groups actively engaged. St. Catharines, Brockville and Kingston reported the sash, door and planing mills well employed. Belleville reported the furniture factories rather dull. Peterborough reported good employment in the woodworking industry. The wooden box factory at Galt was busy. The sash, door and planing mills at Brantford were running to their full capacity. At Kitchener the wooden box and furniture factories were running full time, and there was a demand for cabinet makers, polishers and stainers. At Guelph the piano factory was very active. Stratford reported that the furniture and chair factories were steadily employed and that the cooperage firms were busy. Woodstock reported a demand for skilled finishers and bench hands in the chair and furniture factories: some women were employed in the furniture factories. London reported the piano and organ company busy, and the barrel company very busy. Windsor reported dullness in the sash, door and planing mills. Winnipeg reported the sash, door and planing mills steadily employed, while at Brandon and Regina they were reported as busy. The planing mills at Prince Rupert were reported busy, but at Medicine Hat they were reported quiet. Fernie reported some slackness in the sash and door factories. At Vancouver the sash, door and planing mills and wooden box factories were running steadily. At New Westminster the sash and door factories were working to capacity and the wooden box factory continued to be very active. Victoria reported that the wooden box factories were working steadily, and the cooperage factories were busy on a number of barrels to be used for packing fish and for whale oil.

Leather, boots, shoes and rubber

St. John reported that the tannery was active, but that help was scarce; also that the boot and shoe factory and harness makers were stea ily employed. Fredericton reported that the shoe and larrigan factories worked full time, and that the tanneries were busy. The tanneries in Montreal reported a quiet month, but the makers of the cheaper lines of boots were moderately busy. Waterproof manufacturers were active. Quebec reported that the tanneries were

active, and the boot and shoe, and bag and harness makers were well employed. Sherbrooke reported that the boot and shoe industry was only fairly well employed. St. Hyacinthe, however, reported that the leather industry had a very active month, but that the scarcity of help impeded operations. The boot and shoe establishments at Three Rivers were busier than usual during the month. In Toronto the boot and shoe, harness, and rubber industries were busy. At St. Catharines the rubber footwear factories were well employed. Hamilton reported activity in belting and tires. The tanneries at Kingston were well employed. The boot and shoe factories at Galt were advertising for help in all departments, and at Brantford the shoe factories were well employed. Kitchener reported the tanneries and boot factories working full time with a demand for female sewing machine operators. The tire and rubber companies were very busy. There was some demand for unskilled labour in the tanneries at Woodstock and London. At St. Thomas there was a demand for skilled workers in the shoe factories. The tanneries at Brandon reported business fair, while the horse goods manufacturers were quite active. At New Westminster the tanneries were fully employed.

Clay, glass and stone

Halifax reported a big demand for stone and granite cutters. At St. John the cut stone and granite workers and brick and tile workers were dull. The Humphreys glass works at Môncton was destroyed by fire on July 26th, and about 35 workers thrown out of employment. Quebec reported that the cut stone and granite workers were dull, but that the brick tile and sewer pipe plants were active. Toronto reported that the brick and sewer pipe plants were increasingly active. Hamilton reported the cut stone and glass group generally as being active, but Brockville reported this group as being quiet. Belleville reported that the pottery was busy in the manufacture of small ware and tiling. At Kitchener the brick, tile and sewer tile makers were dull, but at Stratford the brick and tile makers were active. London reported the brick yards were idle. Regina reported the cut stone and granite workers busy. At Prince Albert the brick makers were dull, but at Medicine Hat they were well employed. At Vancouver, the cut stone and granite workers were quiet, while at Nanaimo the brick yards were practically closed down.

Paints, oils chemicals, explosives

Halifax reported that the Brandram-Henderson Paint Company was operating to capacity. Newcastle reported the Miller Extracts Limited were well employed. St. John reported a great demand for lubricating oils and greases. At Montreal the paint factories were busy. Sherbrooke reported activity in gun powder extracts and drugs. At Three Rivers the paint works was well employed and much red oxide was shipped. Toronto reported that the paint, varnish and chemical works were well employed. Hamilton reported that the soap, gun powder and drug companies were actively engaged. At Niagara Falls the electric chemical plants were all busy. At Brantford the Scarfe Varnish Works were well employed, while the Canada Glue Company were working day and night. The Standard Paint and Varnish Company, at Windsor, were fairly busy but handicapped by shortage of material. The soap and perfume manufacturers were quiet. At Regina the oil works were running full time and the soap works reported business fair. Vancouver reported the paint manufacturers active. At Victoria the chemical and explosive plants were busy and in some cases working double shifts.

Railways, shipping and 'longshore work

Earnings of the Canadian Pacific Railway during June were $12,577,286, as compared with $13,556,979 for the same month in 1917. Sydney reported activity in navigation and 'longshore work. At Halifax the street railway company continued to employ women conductors in increasing num-

bers. Charlottetown reported that the railway repair shops were very busy, but that there was no scarcity of labour; 'longshore work was very dull. At St. John the steam railways reported passenger traffic brisk but the street railway ran with a reduced number of cars: 'longshore work was very dull. Moncton reported that the Canadian Government railways were utilizing all the available labour upon the work of putting the recently acquired branch lines into proper shape for operation. Employment continued steady in the railway shops, principally upon repair and remodelling work. Montreal reported the steam railways busy but that there was some decrease in passengers on the street railways. Quebec reported the steam railways very busy, and that there was some increase in the number of freight train crews. The railway repair shops were busy; coast navigation was very active, but ship labour and 'longshore work was very dull. St. Hyacinthe reported the railways active, with some extra men employed on emergency work. Three Rivers reported the railways and steamship lines very active. Toronto reported the railways busy with increased freight and passenger traffic; the street railway also had an active month. Railway repair shops gave plenty of employment. Navigation was active with extensive movement of freight. Garages were increasingly busy. Hamilton reported that the Inland Navigation Lines did a capacity business in freight, and that there was a demand for 'longshoremen. The steam and electric railways in and near the city were active. St. Catharines reported that all branches of the railway system were steadily employed. 'Longshore work at Brockville was rather dull, owing to the small quantities of coal arriving. Kingston reported the railway repair shops well employed, and that navigation was fair and employment at 'longshore work was good. Belleville reported navigation rather dull. The Grand Trunk Railway at Brantford reported a very busy month both in freight and passenger traffic. The electric line running from Galt to Port Dover also reported business good. Stratford reported that freight handlers and repair shop workers were fully employed. The Grand Trunk Railway carshops at London were busy. The street and electric railways at Windsor experienced difficulty in obtaining men and anticipated having to employ women. Winnipeg reported conditions on the street railway were normal. The railway repair shops at Regina were busy getting cars ready for the wheat rush. The railway repair shops at New Westminster in some cases made slight reductions in staffs. The street and electric railway business reported heavier traffic than for some years past. Victoria reported that passenger travel on coasting steamers was rather quiet, but that freight business was fairly good, and 'longshore work was steady.

Mining

Quebec reported activity in stone quarrying. Sherbrooke reported chrome iron, copper and asbestos mining active, but granite quarrying quiet, though the gravel pits were well employed. Niagara Falls reported that the new refining plant of the International Nickle Company at Port Colborne commenced operation: its capacity is estimated at about 24,000,000 pounds of refined nickle and 12,000,000 pounds of refined copper per annum. The Cobalt mines reported that the shortage of labour was not so acute as in the previous month. During July a total of 44 cars containing approximately 3,166,328 pounds of ore were shipped, as compared with 42 cars containing 3,280,017 pounds in June. Bullion shipments during July totalled 1,020,650 ounces of silver, as compared with 418,689 ounces in June. At Porcupine the Hollinger Consolidated and the McIntyre continued their usual production of gold, but the Schumacher closed down, and arrangements were being made to close the Porcupine Crown. At Kirkland Lake, the Lake Shore Mine produced a little over $43,000 in gold, as compared with an even $43,000 the month preceding. Sault Ste. Marie reported that prospecting in the new gold region

around Goudreau was going ahead and that good finds were being reported. Fernie reported that in the East Kootenay District there was a very considerable increase in ore shipments during the month. Rossland reported that there was practically nothing but development work being done in the gold mines. At Trail there were only two lead and one copper furnaces running. The refineries were operating but at low capacity. There was a general shortage of mine labour all through this district. Nanaimo reported that the Ladysmith smelter was idle but that it was expected it would start running before long. There was a little metallic mining done during the month. The local quarries were idle.

Sydney reported the output of the Dominion Coal Company as 280,000 tons, against 276,000 in June. The output at the Sydney mines was 46,450 tons, against 42,800 tons in June. The coke output of the Dominion Coal Company was 42,000 tons with 535 ovens operating; the coke output of the Sydney mines was 10,000 tons with 182 ovens in operation. Westville reported that the Albion coal mines worked full time; that the Intercolonial Mining Company raised 15,000 tons; and that the Acadia Coal Company had been steadily increasing the output at all their mines. Fredericton reported that the Minto mines continued to increase their output, but that there was a considerable shortage of labour. Lethbridge reported coal mining very active, and that the mines had absorbed many of the men who became unemployed as a result of the crop failure. Fernie reported that the coal mining and coke manufacturing had continued steadily without serious interruption. Nanaimo reported that the coal mines of the district worked full time but complained of the shortage of labour, especially skilled miners.

Building and construction

Halifax reported that a great deal of repair work was done and a considerable number of new buildings started during the month; also that there was plenty of employment for all classes of workers, skilled and unskilled. Truro reported that carpenters were busy, and that skilled labour was scarce in every branch of the building trade. Charlottetown reported that several houses and warehouses were in course of erection. St. John reported that the building trade was fairly well employed. Moncton reported a fair amount of work on private dwellings. Quebec reported considerable repair work on private dwellings, but very little new work being done. Sherbrooke and St. Hyacinthe reported building very quiet. At Three Rivers there was an increase over last month in the number of buildings in course of erection: the Tydewater Shipbuilding Company commenced work on fifty dwelling-houses for their employees. The building trades in Toronto continued to be active in the construction of small dwelling houses; there was also a considerable increase in construction of industrial buildings, and work was begun on the new military hospital. Hamilton reported that the building trades were all well employed, both on dwelling houses and industrial work. A number of workmen's dwelling houses were being erected at Kingston. A large number of men were employed on the new isolation hospital near Kingston. Peterborough reported building very active on dwelling houses and extensions to factories. The building trades were steadily employed at Galt and Brantford. London reported the building trades were practically idle. Chatham reported the building trades were very active, a large number of new buildings having been started; contractors, however, were experiencing difficulty in getting material. At Windsor building was confined to a few dwelling houses. Winnipeg reported the building trades were fairly well employed. The Imperial Oil Company at Regina started work on the thirty dwelling houses for their

employees; these are to cost about $80,000. At New Westminster and Nanaimo building was practically at a standstill.

The value of building permits issued in 35 cities increased from $3,667,399 in June to $5,863,834 in July, or 59.9 per cent. As compared with July, 1917, there was an increase of 27.7 per cent.

Lumbering

Westville reported that lumbering was decidedly duller during July than during the last few months. St. John reported that the saw and shingle mills were steadily employed but that skilled mill men were scarce. Newcastle reported that practically all the local mills worked full time and that there was a scarcity of unskilled labour. Heavy rains during the month enabled operators to bring into the booms several drives that were abandoned during the spring. Fredericton reported that employment was good around the mills and logging booms. Quebec reported that the saw mills of the district were not as busy as in previous years; but that the mills were working short handed, notwithstanding. Sherbrooke reported the camps for railway ties, telegraph poles etc., were quiet but that the saw and shingle mills were fairly well employed. Three Rivers reported that the saw mills of the district, employing over 600 men, had been very busy. Peterborough reported activity in the lumbering industry; some big drives having come in. Owen Sound reported that the lumber camps are not active, a few men only being employed to take care of the material; the saw mills were active but the tie mills were not running. The mills of the Spanish River Pulp and Paper Company at Sault Ste. Marie were working full time. The lumber mills at Prince Albert continued to run day and night shifts. Fernie reported that the lumber industry had rather a dull month. New Westminster reported that the saw mills were all actively engaged. The eight hour day has been extended to include the engineers in saw and shingle mills. The logging camps in the Nanaimo district were working to capacity but were badly handicapped by the shortage of men. The saw mills were fully engaged with all the labour available, but the shingle mills were not quite so active. Victoria reported that the logging camps were very busy, particularly those getting out spruce for airplanes. Saw mills were also busy on foreign orders.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING JULY, 1918

DURING the month of July the Department received reports from six Boards of Conciliation and Investigation appointed to inquire into disputes affecting (1) The British Columbia Electric Railway Company, Limited, and its street railway employees at Vancouver, Victoria and New Westminster; (2) The British Columbia Electric Railway Company, Limited, and its electrical workers; (3) The Western Power Company of Canada, Limited, and its electrical workers; (4) The Corporation of Victoria and its civic employees; (5) The Toronto Street Railway Company and its machinists; and (6) Canadian Pacific Railway Company and its dining car employees.

Ten applications were received for the establishment of Boards, and a Royal Commission was appointed to investigate certain unrest in the shipbuilding industry in the province of Quebec. Four disputes, regarding which the Department had received applications for Boards of Conciliation and Investigation, were referred to this Commission, namely: (1) The Quinlan and Robertson Shipbuilding Company, Quebec, and its carpenters and joiners; (2) The Davie Shipbuilding Company, Lauzon, Que., and its boilermakers, iron ship-

builders, blacksmiths, carpenters, etc.; (3) The Quebec Shipbuilding Company and its employees; and (4) Fraser, Brace & Company and its employees.

Advice was received during the month of an amicable settlement of the dispute between the Vancouver Gas Company and its employees.

Applications Received

An application was received from the employees of the Quinlan and Robertson Shipbuilding Company, Quebec, being carpenters and joiners, members of Local No. 730 of the United Brotherhood of Carpenters and Joiners of America, for a Board to deal with a dispute concerning wages and hours. This dispute was referred to the Royal Commission which had been appointed to investigate certain unrest in various shipbuilding industries in Quebec. The Commission was composed of the following members: the Honourable Mr. Justice F. S. Maclennan, of Montreal, chairman; Mr. Thomas E. Robb, of Montreal, and Mr. John M. Walsh, of Quebec.

The following applications were also referred to this Commission: Application from the employees of the Davie Shipbuilding Company, Lauzon, Que., being boilermakers and iron ship builders, blacksmiths, carpenters, etc., members of the following organizations: International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America, Local No. 380, International Brotherhood of Blacksmiths and Helpers, Local No. 235, and United Brotherhood of Carpenters and Joiners, Local No. 2033, for a Board to deal with a dispute concerning wages, hours and working conditions; application from the employees of the Quebec Shipbuilding Company, members of Local No. 730 of the United Brotherhood of Carpenters and Joiners of America, for a Board to deal with a dispute concerning wages and hours.

An application was received from the employees of the New Brunswick Power Company, St. John, N.B., being conductors, motormen, powerhouse men, shop and barn men, trackmen, etc., for a Board to deal with a dispute concerning wages. A Board was established as follows: the Honourable Mr. Justice W. B. Chandler, Moncton, chairman; Messrs. Geo. E. Day and W. Frank Hathaway, St. John, nominees of the company and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board.

An application was received from the employees of the Ottawa Electric Railway Company, members of Division No. 279 of the Amalgamated Association of Street and Electric Railway Employees of America, for a Board to deal with a dispute concerning wages and conditions of employment. A Board was established as follows: His Honour Judge R. D. Gunn, of Ottawa, chairman; Mr. Geo. F. Henderson, K.C., Ottawa, and Mr. Fred. C. Bancroft, Toronto, nominees of the company and employees respectively. The chairman was appointed on the joint recommendation of the other two Board members.

An application was received from the employees of the Canadian Pacific Railway running on lines East of Fort William, being locomotive engineers and members of the Brotherhood of Locomotive Engineers, for a Board to deal with a dispute concerning wages and working conditions. A Board was established, Mr. David Campbell, of Winnipeg, being appointed a member on the recommendation of the employees. Before the Board was completed advice was received that direct negotiations between the parties concerned had resulted in a settlement of the dispute.

An application was received from the employees of the Canadian General Electric Company at Peterborough, Ont., being machinists, specialists and electrical workers, for a Board to deal with a dispute concerning wages and working conditions. A Board was established as follows: His Honour Judge Colin G. Snider, Hamilton, chairman; Messrs. James H. Merrick and Fred. C. Ban-

croft, Toronto, nominees of the company and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two Board members.

An application was received from the Alberta Coal Company, Limited, Edmonton, Alberta, for a Board to deal with a dispute arising from the company's objection to the check-weighman appointed by the employees. No Board was established, as, in the Minister's view, the dispute fell within the jurisdiction of Mr. W. H. Armstrong, Director of Coal Operations, Calgary, and the question was accordingly referred to Mr. Armstrong.

An application was received from the employees of the Quebec Railway, Light, Heat and Power Company, being mechanics of various classes, namely: toolmakers, machinists, blacksmiths and helpers, air brake testers, carpenters, car repairers, oilers and repairers, painters and helpers, sheet metal workers, pipe fitters, millwrights, electricians, car inspectors and apprentices of all trades. A Board was established, Mr. Fred. C. Baneroft, Toronto, being appointed a member thereof on the recommendation of the employees.

An application was received from the employees of the Winnipeg Electric Street Railway Company, being machinists, blacksmiths, electricians, trackmen, carpenters, painters, car cleaners, switch greasers, specialists and helpers to these crafts, for a Board to deal with a dispute concerning wages, hours and working conditions. A Board was established, Messrs. John C. Sullivan and Ernest Robinson, of Winnipeg, being appointed members thereof on the recommendation of the company and the employees respectively. The chairmanship had not been filled at the end of the month.

Other Proceedings under Act

A dispute concerning wages and working conditions between Fraser, Brace & Company, Limited, Montreal, and its employees, in regard to which an application for a Board had been received, was referred to the Royal Commission appointed to investigate the unrest existing in the shipbuilding industry in the province of Quebec.

Advice was received during July that the dispute between the Vancouver Gas Company and its employees had been adjusted by direct negotiations between the parties concerned.

Report of Board in Dispute between B.C. Electric Railway Company and Street Railway Employees

A REPORT was received from the Board established to deal with the dispute concerning working conditions between the British Columbia Electric Railway Company, operating at Vancouver, Victoria and New Westminster, and its street railway employees. The Board was composed as follows: the Honourable Mr. Justice W. A. Macdonald, of Vancouver, chairman, appointed by the Minister of Labour; Mr. Frederick Buscombe and Mr. T. J. Coughlin, of Vancouver, appointed on the recommendation of the employer and employees respectively.

The award contains certain recommendations for the adjustment of the dispute. A minority report was presented by Mr. Coughlin, accompanied by the original proposed agreement of the employees, which he supported in its entirety.

The award was not acceptable to the employees, who declared a strike, which was adjusted at the end of a few days.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the British Columbia Electric Railway Company, Limited, hereinafter called the "Company," and the Amalgamated Association of Street and Electrical Railway Employees of Canada,

represented by Local Division No. 101 of Vancouver, British Columbia; Local Division 109 of Victoria, British Columbia, and Local Division No. 134 of New Westminster, British Columbia, comprising employees of various departments of the British Columbia Electric Railway Company, Limited, hereinafter called the "Employees."

To the Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ont.

A Board of Conciliation and Investigation was constituted in this matter, consisting of the Honourable Mr. Justice W. A. Macdonald, chairman, appointed by the Minister of Labour; Mr. Frederick Buscombe, the representative of the company, and Mr. T. J. Coughlin, the representative of the employees. A majority of such Board beg to report as follows:

The company was represented before the Board by Messrs. J. G. Murrin and William Saville, and the employees were represented by Messrs. F. A. Hoover, W. H. Cottrell and William Yates.

The company, in 1915, under provisions of a then existing agreement with the employees, gave notice of its intention to cancel such agreement, but at the same time the company declared its willingness to enter into a new agreement, subject to reduction in the wage schedule and certain changes in the working conditions. There were negotiations for settlement between the parties, but without result, and a Board of Conciliation then made recommendations which were, with some changes, adopted as the basis of a new agreement, dated the first of September, 1915. This agreement was varied by a supplemental agreement, dated September 16, 1916, by which the wages of the employees were increased. Then in June, 1917, after a strike had occurred, a Commission was appointed by the Provincial Government to inquire into the economic condition of the company's transportation system. The company, on its part, undertook to grant certain increases in the wages until June 30, 1918, and the employees then resumed work. The company now seek a renewal of the agreement, with the same working conditions, but offered the employees, in addition to the increase in wages already granted, an additional 10 per cent. This offer was refused and a counter-proposal submitted, containing important changes in the working conditions and also a large increase in the scale of wages. The parties, after various efforts, failed to adjust their differences, and this Board is the result.

At the initiation of our proceedings, it was apparent that we could not be of assistance in bringing about an amicable agreement concerning the important issues involved. The parties, however, in a proper spirit, endeavoured to settle between themselves as to some of the changes in the working conditions. This resulted in an agreement on certain points and a united expression of opinion, that all matters in difference, as to working conditions, could be arranged between the parties, except the question of an eight-hour day and the inclusion of certain classes of employees within the scope of the agreement. We were thus, under this satisfactory arrangement, only required to deal with these two matters, in addition to the important question of the scale of wages.

After the lengthy oral and documentary evidence, coupled with argument, had been concluded, the Board undertook the difficult task of making a report, which it was hoped would contain recommendations, forming the basis of a settlement of the dispute. After discussion, towards this end, had proceeded with a conciliatory spirit, and with a fair possibility of success, adjournment took place over Sunday. In the meantime, the same Board held sittings to consider the differences between this company as well as the Western Power Company of Canada and their electrical workers. This latter dispute was closely connected with that pertaining to the street railway, and in fact it developed that all the employees were acting together. On Sunday, June 30, the employees, although they had taken part in the sittings, and submitted evidence, determined not to await the report of the Board, but to go on strike at the close of the following day. Efforts were made to avert this course being pursued, but without avail. Upon the Board resuming consideration of its report, Mr. Coughlin, representative of the employees, frankly stated that he would only agree to recommendations favouring the demands of the employees in their entirety. He admitted that further discussion would be of no benefit and thus left the other members of the Board to make their report after due consideration.

As to an eight-hour day: It was contended by the employees that the Board should lend its weight to its adoption, as constituting a day's work in street railway employment, by making a recommendation in its favour. There is no doubt that the trend of legislation, and practice, is in favour of such period representing a day's work. It was submitted, on the part of the company, that such a course would be an innovation, as applied to a street railway, and that in very few instances did eight hours constitute a day's work for motormen and conductors. This is worthy of consideration, but in normal times should not of itself operate as a bar to a change taking place which is beneficial to employees. In the cities of Canada, nine hours seems to be the prevailing period for a day's work for such employees, and this applies even with respect to systems controlled and operated by municipalities. It was declared by the representatives of the employees that an eight hour day was not desired for the purpose of creating overtime, at increased rates of wages; but simply to compel the company to adopt "running sheets" which would enable the employees to complete a day's work within such shortened period. It would also limit the "spread-over," or time within which

motormen and conductors are required to be available for duty. Accepting this assurance of the representatives and assuming that the company, in order to efficiently carry on its transportation business, would require to operate the same number of car miles, then, in order to accomplish this result, it would, under an eight hour day, entail the employment of further motormen and conductors. It is agreed that the number so required would exceed one hundred. Competent men for such a purpose could not be easily obtained and the question is whether, even if available, the man-power of Canada should thus be curtailed. It has been sought in every way possible, since the commencement of the war, and the necessity is now becoming more apparent, to conserve our manhood, in addition to our food supply, in order that Canada may bear its proper share and render its most effective aid in the great struggle. It would be an abandonment of its policy, if any industry needlessly employed any considerable number of men. In 1915, the employees pressed for the adoption of an eight hour day and men were then more easily obtainable for the service of the company, but they were eventually satisfied to accept the previous arrangement as to hours of labour. The working strain upon the employees has not been materially increased in the meantime, and if you compare the work of the motormen and conductors with other cities it does not appear to be more arduous. For instance, in the neighbouring city of Seattle, with vehicle and pedestrian traffic more congested, the average rate of speed for street car is 10 miles per hour, while in Vancouver it is 9.2 per hour. Then in Seattle nine passengers are carried per car mile while only seven passengers are carried in Vancouver for the same distance. This accounts to some extent for the earnings of the Seattle system being 32 cents per car mile, as compared with 23 cents in Vancouver. We have, in the circumstances, formed the opinion that the principle of an eight hour day should be accepted for street railway workers in common with other classes of labour; but until the termination of the war the length of time to constitute a day's work should not be altered. We recommend, however, that in compiling the "running sheet" the "spread-over" should be decreased as much as possible and that overtime should be chargeable after nine hours instead of nine and a half hours, as at present. In coming to a determination in this matter, we have considered that one of the conclusions arrived at by the National Industrial Conference Board in the United States in dealing with labour, as affecting efficient production, presented a proper basis, viz., that "applied to hours the standard shall be those established by statute or prevailing in the establishment at the beginning of the war, subject to change only when, in the opinion of the Council of National Defence, it is necessary to meet the requirements of the Government."

We were also, in this respect, impressed with a portion of the report of the Railway Wage Commission, commonly called the "McAdoo Commission," stating that: "With overtime, as with hours of service, however, the Commission believes that the existing rules and conditions of payment should not be disturbed during the period of the war."

We are thus in accord with the views of Mr. Mahon, the president of the association, of which the employees are members, as voiced in his report to the biennial convention of such association of September 10, 1917. A portion of this report is well worthy of quotation, as follows: "At a meeting of our convention two years ago we were sad and downhearted because of the fact that a great number of our Canadian brothers were then upon the battlefield of Europe. We felt many of them would never return."

After dealing with the advent of the United States into the war in the meantime, he then expresses himself, as to the duty of the organized workers and the stand taken as to not insisting on any change in the hours of labour as follows: "It is a serious and solemn hour to the organized workers of this North American continent. As citizens, we are called upon and must do our full duty towards our Government in this our solemn hour. It is our solemn duty, as delegates to this convention to do everything within our power to maintain and uphold this organization and its splendid achievements—at the same time to do our full duty towards our Government in this struggle and to destroy Imperialism and establish world-wide democracy. During the latter year (of the two years) owing to the war and the contemplated shortage of labour, we have not insisted strongly upon our original change in the hours of labour, but have aimed to maintain our present work day."

While the convention approved of the principle of an eight hour day, still they have not insisted upon its acceptance during the war. Mr. Mahon is reported, as late as the month of June, to have reiterated his position in his statements before the War Labour Board of the United States when it was considering the wages of Detroit and Cleveland street railway employees. It is to be hoped that his sentiments, so patriotically expressed, will have equal force in Canada and induce the members of his association in this loyal portion of the Empire to accept the recommendation of the majority of the Board in this matter.

As to the inclusion of other employees in the agreement: It was sought to have certain employees of the freight shed department and station agents included within its terms. This question was presented towards the close of the proceedings, when the time was growing short, in view of the necessity for an early report from the Board. As a consequence, sufficient evidence was not submitted to enable us to intelligently form a conclusion on this point. We think it advisable to now call for further evidence and suggest that such a matter ought, if approached in a reasonable spirit, be capable of satisfactory settlement between the parties.

As to an increased wage scale: The advance in wages since the agreement of 1915 has already been referred to. The motormen and conductors in the three cities affected by the dispute form the great bulk of the employees, so a discussion of their rate of wages will be typical of the general conditions in this respect and any advance in their wages will naturally have a reflected effect upon other employees. When a reduction in wages was obtained by the company in 1915 it was based upon several grounds, some of which might well be considered in now determining the proper amount of increase. The depression that then existed has practically disappeared and wages generally have materially advanced. This change, combined with an increased population, has afforded an additional revenue to the company, but the added outlay for wages and material has destroyed the benefit that otherwise would have resulted. Comparison was then made between the wages paid motormen and conductors in other cities and those prevailing under the company's scale. It was pointed out that such comparison still favours the contention of the company and shows that the present wages are higher than those paid for similar work elsewhere in Canada, with the exception of Windsor and by the street railways, controlled and operated by a municipality. The wages paid by the municipality owned or controlled street railways, it was submitted, should not be compared with a private company, as any loss in operation is borne by the community as a whole. It appeared that the maximum rates paid to motormen and conductors in several Canadian cities is as follows: Winnipeg 39c, Toronto 37c, Ottawa 30c, Windsor 40c, Fort William 36c, Hamilton 37c and Halifax 32½c, while in the cities where street railways are operated by the municipality the following maximum rates prevail: Edmonton 40c, Regina 41¼c, Saskatoon 41c, and Calgary 45c. The rate now paid in Vancouver to such employees is 40c an hour, but the company offers to increase this to 44c. The employees, however, claim that they are entitled to 51c an hour as a maximum rate. If 44c were adopted as the maximum rate in Vancouver to motormen and conductors it would exceed the rate at present paid in all cities of Canada, except Calgary, where the cost of operation is reduced by the use of "one-man cars." Then, again, in the larger cities of the Pacific coast in the United States the maximum rate paid to such employees is as follows: Tacoma 38c, Seattle 40c, Everett 37c, Portland 45c, San Francisco 43¾c, Los Angeles 37c, and Oakland 42c. The only one of those cities that exceeds the rate offered is Portland, where the working hours per day were reduced and the rate of wages raised to 45c under an arrangement, by which the fares were increased to meet the additional cost of operation.

It is urged by the company that it should not be expected to go beyond the rate offered by reason of the continued loss in operation. This fact is so well known that elaboration is not necessary. Suffice to say that an auditor's report was submitted showing that for the 12 months ending March 31, 1918, the revenue received by the company in the operation of its street railway was $2,985,620, while the expenditure during such period of operation for wages and material amounted to $3,361,294; thus creating a deficit of $375,674. Even if the jitney traffic were eliminated, it is improbable that this result would be materially changed. Unquestionably, if the increased wages offered are paid, the company, if it continues to operate, will have a more unsatisfactory financial showing at the end of the current year.

The company, in addition to operating its street railway, has, through various franchises, the right to supply electric light, gas and power throughout the cities of Vancouver, Victoria, New Westminster and adjoining districts. If the earnings of these various undertakings were taken into account, it would appear from statements submitted that after paying interest on bonds, the entire business of the company, even with its remunerative rates for lighting unimpaired, is not profitable. It contends that it should not for these reasons be expected to incur further outlay for wages beyond its offer. We do not think that this position is tenable and consider that the ability of the company to pay wages is, as far as the employees are concerned, nothing more than an incident in connection with the dispute. The position of employees in disposing of their labour has to be dealt with irrespective of the financial standing of an employer. When material is sold to a company the manufacturer does not, as a rule, reduce his price to suit the financial requirements of the purchaser. The employees in question should not be called upon to bear a share in the loss resulting from an unremunerative business undertaking, which serves the citizens as a whole. While the company does not, like a merchant, possess the power of its own volition to raise the price of its commodity, in the shape of transportation, still, it accepted this impediment as forming a part of the agreement under which it obtained a franchise, allowing the use of the streets. We have then to ascertain upon what reasonable basis the rate of wages can be fixed. We are quite satisfied that, under present conditions, the minimum wage of 30 cents per hour, now paid to motormen and conductors, should be very materially increased, so as to offer an inducement for men to enter the service of the company and remain in its employment, with the prospect of receiving proper compensation. We also feel that the term of service necessary before an employee can receive the maximum rate of wages is unreasonable. If a motorman or conductor is competent to take charge of a car, after two or three months' trial, he should be entitled to an advance in wages at the expiration of his first year of service and be considered to have reached full efficiency at the end of the second year. If this recommendation be accepted it would shorten the

term of service in order to reach the maximum rate from four years to two years. Then as to the maximum rate to be paid, the local scale of wages, especially for skilled labour, is very high at present. At first thought one would conclude that this should have an important bearing upon the wages of street railway employees. This condition, however, is abnormal and due, in a great measure, to the war. There is no industry in our province sufficiently similar to that of the company, in its service and terms of employment, to afford any material assistance by way of comparison. We think, therefore, that the guiding, if not the controlling factor, in forming an opinion as to the rate of wages to be paid to the employees, must be the cost of living. This ground was taken by the company in 1915, in seeking a reduction of wages, and can well be applied at the present time. In the first place, we have to consider whether the cost of living is greater in Vancouver, Victoria and New Westminster than in other cities of Canada where street railway employees receive less wages than those offered by the company. In arriving at such cost, it is almost impossible to reach any degree of accuracy, as so much depends upon the personal equation. The LABOUR GAZETTE affords a means of information as to the increase or decrease from time to time of the cost of living in Canada. The statistics there presented form as reliable a guide as can be obtained. Some years ago certain quantities of food were allotted, with rent, fuel, etc., as necessary for a family of five persons. In order to afford a proper basis of comparison, this formula requires to be permanently adhered to, though the quantities, *e.g.*, of meat required, for such a family, may have been lessened in the meantime. Any change of this kind, however, does not destroy the usefulness of the GAZETTE in comparing the rise and fall of cost of living in different cities throughout Canada. Resorting then to this source of information, we find that in the month of March of this year the cost of living was greater in Montreal, Toronto, Ottawa, Winnipeg, Regina, Edmonton and Calgary than in Vancouver, and if the cities of Victoria and New Westminster be included in the comparison, as the cost of living in those cities was less than Vancouver, it would emphasize the comparison in favour of the British Columbia cities. The high cost of living which has prevailed throughout Canada is still increasing, but it does not seem to have materially affected the wages of street railway employees in Eastern Canada. This point was recently exemplified by the unanimous report of the Board of Conciliation, which was accepted by the employees, fixing the minimum rates of wages in Hamilton to motormen and conductors at 30 cents per hour and the maximum at 37 cents.

It would thus appear that a comparison of the cost of living in this province with other Canadian cities would not support a recommendation beyond the increased wages offered by the company; still we think, under existing circumstances, that the company should be called on to go further in its offer. In order to retain the service of employees, they should receive a fair rate of wages, which will enable them, with proper economy, to meet the high cost of food and other necessaries. We propose, therefore, to deal with the situation as it is presented locally, though from the standpoint of the company this will doubtless be open to objection. During the course of the proceedings we required statements to be submitted, based on the LABOUR GAZETTE, showing a comparison of the cost of living in Vancouver, extending over a number of years. We find that in March, 1913, the cost of living per week, as applied to a typical family of five persons, was $16.28, while it had risen to 519.34 in March, 1918. This represents an increase of 18.80 per cent. The maximum wage to motormen and conductors in 1913 was 35 cents per hour, as compared with 40 cents per hour in 1918, thus showing an increase of 14.29 per cent. If the additional percentage of cost of living between the two periods be added to the 35 cents, the wages now payable should be 41.58 cents per hour. If the cost of living in March, 1915, be compared with March, 1918, it shows an increase of 46.30 per cent in the meantime, then the wages should, in the same manner, be adjusted so as to establish a rate of 46.82 cents per hour. Then the cost of living in June, 1917, as compared with March, 1918, shows an increase of 11.94 per cent and the maximum wages fixed in June, 1917, should in the same manner, if based upon this increase, be established at 44.78 cents per hour. The company complained that the reduction of wages obtained in 1915 was not commensurate with the decreased cost of living. We think a fair way, in order to determine the admitted increased cost of living in previous years, as compared with that now existing, would be to average the results shown by these three comparisons, and, if so, it would indicate a maximum rate of 46.64 cents per hour. We consider, however, that there has been a further increase in cost of living since March, and thus recommend a maximum rate to motormen and conductors of 47 cents per hour. The increased cost of living must of necessity, in view of their lower wage scale, bear heavily upon the employees of the company during the first year of service. We recommend a very substantial increase in the wage of such employees and that they should be paid 40 cents an hour, thus agreeing with the request of the employees in their proposed agreement. Then, on a line with this recommendation, they should, after the first year, and during the second year of service, receive 43½ cents per hour.

If it were not for the existing strike and the information imparted by the representative of the employees, we would submit a detailed wage schedule, showing how the increases which are recommended to motormen and conductors should be applied to other employees. We do not, however, consider the delay necessary for that purpose is warranted, as if our recom-

mendation be accepted as a basis for settlement then it is simply a matter of adjustment.

In thus recommending increased wages beyond those offered by the company, we are not overlooking the fact that such rates are in excess of those paid by any street railway on the continent, except Anaconda and Butte, where the mining companies own the street car systems and operate them, practically as adjuncts to the mines. It may be important, as supporting the statement, that we are dealing very fairly with the employees, to shortly compare the maximum rates of wages which would thus be established, with those prevailing upon street railways in other cities, coupled with some features of their operation. In the United States there are 141 companies operating from 50 miles to 500 miles track and the average maximum rate of wages is 32.1 cents per hour. In Canada there are nine companies operating from 50 to 500 miles of track, and the average maximum rate of pay is 34.2 cents per hour. Then treating the matter geographically: In the Pacific coast cities there are 29 companies operating with an average maximum rate of 37.2 cents per hour. In Canada, east of Port Arthur, there are 21 companies operating with a maximum rate of 28.7 cents per hour. While, west of Port Arthur, there are nine companies operating with an average maximum rate of 37.4 cents per hour.

In conclusion, the query may naturally arise in view of such recommendation for increases of the rate of wages and the granting of other benefits to the employees, as to how the additional burden is to be borne by the company. We are, however, only dealing with the matter in dispute between the parties and endeavouring to afford a solution. It is not within our province to discuss how the company can, from a business standpoint, continue its operations and afford transportation to the public in the face of the increased deficit which is bound to follow. There is no doubt that the earning power of the company is affected in a great measure by the extensive use of privately owned automobiles. They have seriously invaded the constituency from which street railways were accustomed to look for support. The jitney has also had the same effect. Whether, under the circumstances, the company will attempt to meet the heavy loss in operation by curtailment of its lines, reduction of the number of cars, elimination of jitney traffic, increase of fares or adoption of the "carry for cost" scheme is not for us to determine. Still, we do not think it out of place to thus briefly refer to the matter and express an opinion as to the improbability of a company continuing for any period of time to afford transportation to its patrons at less than cost. At present it is in the unfortunate position of being unable—under existing agreements—to pass the enormously increased cost on to the public, upon whom, however, it must inevitably fall in the end, for if the public want the service it must pay for it.

In submitting this conciliatory report we trust it will be accepted on the part of the company as a matter of expediency, due to the situation caused by the war. We hope that the employees will also agree to its terms and in coming to a favourable decision that may be influenced by placing a money value upon the numerous privileges incident to their employment, such as free transportation, reduced cost of gas and light, right of seniority, share in expense of uniform and also the importance of permanent employment. We recommend that the agreement should be for a year at least with a proviso as to variation, of proper notice, in the event of the cost of living appreciably increasing.

(Sgd.) W. A. MACDONALD,
Chairman of Board.
(Sgd.) FREDERICK BUSCOMBE,
Representative of the Company.

Dated at Vancouver, B.C., this sixth day of July, 1918.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the British Columbia Electric Railway Company, Employers, and its employees, members of the Amalgamated Association of Street and Electric Railway Employees.

To the Honourable Thos. W. Crothers,
Minister of Labour,
Ottawa, Canada.

Dear Sir,—

In accordance with the provisions of the Industrial Disputes Investigation Act, 1907, a Board of Conciliation and Investigation was, on the nineteenth day of June, 1918, constituted on the application of the above named employers to investigate and report upon a dispute between the above named parties, arising out of a revised schedule of wages, hours and working conditions submitted by the employees to the employer on May 14.

While I appreciate the desirability of a unanimous report, I regret exceedingly that I cannot agree with my colleagues on the above Board and am obliged to make this Minority Report in fairness to the men I represent, as the increases asked are only fair and one of two things must happen, either their wages must be very materially increased, or else they must accept a very low standard of living.

At the first sitting of the Board, held on June 19, the employer was represented by Messrs. W. G. Murrin, general manager, and W. Saville, and the employees by Messrs. F. A. Hoover, Wm. Yates and W. H. Cotterill.

Sittings were held daily from June 19 to June 21 inclusive, when at the suggestion of the Board it was mutually agreed by all concerned that the employer and employees would get together on June 22 and devote their time to arriving at a solution of the working con-

ditions as presented, and also a request from Mr. Murrin that he be given more time to prepare his case, as he had no more information to go on with. The Board adjourned until Monday, June 25, at which sitting the representatives of the employer and employees reported good progress on their working conditions from the meeting held on June 21. A similar meeting was held in the forenoon of June 27, the last day of the sitting, to take evidence, at which the employer and employees show still further progress of their working conditions. Many of the working conditions were discussed at this sitting with the Board, when a statement was made by the men that the working conditions could be satisfactorily adjusted with the employer irrespective of whether it took a month, six months or a year, they did not consider them as vitally important as the question of hours and rates of pay. Now it appears to me that the questions before the Board were the eight hours and the elapsed hours in which a motorman and conductor would have to work in order to get in their eight hours, a reduction of time on which the sliding scale of pay for motormen, conductors, shop and barn men, apprentices and trackmen were to apply and the wage rates asked for by the men were the vital questions for the Board to decide on.

At the last sitting for the hearing of evidence on June 27 the men pressed for a decision to be made on June 29, stating that under their agreement with the Department of Labour made through fair wage officer Mr. Bulger, that an award would be made by June 30, and they stated frankly that they could not be responsible for any action that their men would take after that date. On June 28 the Board had a session reviewing the evidence which was submitted in a stenographical report and by exhibits. A general discussion of same took place, but no decision was arrived at, and the Board adjourned to meet on July 2. According to press reports, the men held a midnight session on June 30, and at that meeting, by a 96 per cent vote, they decided to go on strike midnight July 2. The chairman of the Board called a meeting of the Board on the afternoon of July 1 at which meeting it was thought advisable to bring in all the parties concerned, including the electrical workers, for a conference. At this meeting both the company, the street railway men and the electrical workers were represented, but efforts to avert the strike were unavailing, both the employer and employees refusing to recede from the stand they had taken and the matter was at a deadlock. The strike being on when the Board met again, I took the position in order to facilitate matters and save a waste of time that I would make a Minority Report, accepting all of the men's contentions as to wages and hours, to which my associates did not agree, I therefore attach the request of the men in connection therewith.

Section 2. Proposed agreement covers the rates of pay and the time at which they will apply on the sliding scale. The rates as set forth, starting with 40 cents to conductors, motormen, shopmen and trackmen, is the absolute minimum that the employer should ask men to work for, as the present cost of living does not give them any margin whereby they could lay aside something to meet the proverbial rainy day, and the maximum of 51 cents for motormen and conductors provides only a fair standard of living and of the scale for the skilled workers are not excessive for the class they represent.

In the question of eight hour day, this is the basic day as admitted by the Governments of Canada and the United States and by the larger employers of labour in both countries, some of whom have voluntarily given their men an eight hour day, and it is unfair at this time to ask street railway employees to work a longer day without punitive time for all time in excess of the eight hours, nor is it fair to ask men on regular runs to work over nine elapsed hours to get eight hours' work. A conductor or motorman take full charge of a car on three weeks' tuition, so there is no valid reason for the long period of waiting to reach the maximum; in fact to be in line with the times there should be only one rate of pay for this class of work and the men should enjoy it from the moment they are placed in charge of a car. Also that extra men should be guaranteed at least six hours' work per day.

The employees, members of the Amalgamated Association of the Street and Electric Railway Employees, to whom the employer had taken exception to their positions being included in the wage agreement presented by the employees, special reference being made to these men, being in a measure officials of the employer, such as rate and chief clerk, cashier, accountant, switching clerk, first abstract clerk, second abstract clerk, billing clerk, demurrage clerk and station agents at Cloverdale, Milner, Langley Prairie, Sardis, Clayburn, Abbotsford, Huntingdon, Chilliwack, and assistant agents, and in the employers' opinion outside the jurisdiction of the employees' association. To this I take exception as those positions similar in character on steam service railroads all enjoy the privileges of their respective unions without question from the employers, but in this connection the men stated to the Board that they were willing to insert a saving clause in the interest of the employer in respect to a closed shop and seniority privileges granted in the agreement. With respect to salaries as presented, they are beyond question entitled to the amount set forth.

In conclusion, I desire to record my appreciation of the efforts of the employees and employers at presenting their evidence in an amicable manner and for the kindness extended to me by my associate arbitrators.

All of which is respectfully submitted.

(Sgd.) T. J. Coughlin,
Ref. for Employees.

DRAFT OF PROPOSED AGREEMENT

Agreement entered into in duplicate, this first day of July, One Thousand nine hundred and eighteen.

The BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY, LIMITED, their successors, lessees, or assigns, hereinafter called the Company,

and

The AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, representing the employees of said Company affected by this agreement, hereinafter called the Association.

WAGE SCHEDULE

Sec. 1. This wage schedule and the working conditions submitted herewith shall be binding on the Company and its employees from the first day of July, 1918, until changed by the parties hereto.

Either of the parties desiring to change same or open up the Agreement or wage schedule shall notify the other party in writing of the desired changes at least thirty days before the expiry of the same.

Sec. 2. The following rates of wages shall be paid from and after July first, 1918, during the life of this Agreement.

(*a*) On City and Suburban Lines, Motormen and Conductors shall receive

First six months	40c per hour.
Second six months	45c "
Third six months	48c "
Thereafter	51c "

(*b*) Motormen and Conductors in work train service shall receive 2c per hour in addition to above rates.

(*c*) On Suburban lines, being Dist. 1, Dist. 3, Saanich lines, 16th St. Yard and Carrall St. Yard;

Passenger Motormen and Conductors.

First six months	40c per hour.
Second six months	46c "
Third six months	50c "
Thereafter	53c "

Freight motormen and conductors:

First six months	42c per hour.
Second six months	48c "
Third six months	52c "
Thereafter	55c "

Passenger Brakemen:

First six months	40c per hour.
Second six months	44c "
Third six months	47c "
Thereafter	50c "
Freight brakemen	50c per hour.
Trolleymen	45c "

d) All work done on Sundays and Holidays to be paid time and one nalf.

(*e*) Extra men to be guaranteed six hours work per day.

(*f*) Shop and barn wages; motorcar repairers, armature winders, helpers, blacksmiths' helpers, carpenters' helpers, machinists' helpers, sawyers, janitors, car cleaners, freight-car repairers and freight car inspectors;

First six months	40c per hour.
Second six months	45c "
Third six months	48c "
Thereafter	51c "
Freight car repairers' helpers	45c "
Painters	60c "
Freight car painters	45c "
Brushhands	45c "
Freight car carpenters	52½c "
Carpenters	60c "
Machinists	62½c "
Babbiter	52½c "
Trolley retriever repairer	55c "
Blacksmiths	62½c "
Carwiremen	55c "
Airbrakes fitter	55c "
Armature winders (first class)	62½c "
Armature winders (second class)	58c per hour.
Armature winders (third class)	55c "
Leading hands while so acting to receive	3c " extra.

(*g*) Apprentices:

First year	20c per hour.
Second year	25c "
Third year	30c "
Fourth year	35c "

(*h*) Freight Shed Department:

Checkers	48c per hour.
Truckers	45c "
Auto drivers	$90.00 per month.
Rate and chief clerk	125.00 "
Cashier	120.00 "
Accountant	115.00 "
Switching clerk	100.00 "
1st abstract clerk	100.00 "
2nd abstract clerk	95.00 "
Billing clerk	90.00 "
Demurrage clerk	90.00 "
Shedman (Chilliwack)	90.00 "

(*i*) Track maintenance men:

Open track men:

First three months	40c per hour.
Thereafter	45c "
Foreman	$100.00 per month.

Block pavement men, switch tenders and greasers:

First three months	45c per hour.
Thereafter	50c "
Track welders	53c "
Track welders helpers	50c "
Track bonders	50c "

(*j*) Baggage room men (Vancouver) $100.00 per month.

Baggageroom men (Westminster)	95.00 "
Autodrivers	90.00 "
Interlocking towermen	85.00 "

(*k*) Bridge and Building Master's maintenance gang 58c per hour.

(*l*) Station Agents:

Cloverdale	$95.00 per month.
Milner	95.00 "
Langley Prairie	95.00 "
Sardis	95.00 "
Clayburn	100.00 "
Abbotsford	100.00 "
Buntington	100.00 "
Chilliwack	115.00 "
Assistant Agents	95.00 "

PART TWO.—WORKING CONDITIONS.

(Applying to all employees).

Sec. 1. The Company recognizes the employees Association and will not discriminate against any employee because of his connection with the same.

The Company agrees that a condition of employment shall be that all persons employed by them in any capacity, in any of the departments affected by this agreement shall become members of the Association within one month of entering employment.

The Company agrees that a condition of remaining in employment shall be continuous membership in the Association.

In case of suspension or expulsion of any of its members by the Association, the Company agrees to suspend or dismiss from their service such members upon the satisfactory proof of such misconduct alleged, for which suspension or expulsion is made.

The Company agrees that no person after securing employment shall be allowed to start work until they have secured a permit from the Association signed by one or more of the officers of the Association.

Sec. 2. The Association agrees that it will not interfere with, or limit the right of the Company to discharge or discipline its employees where sufficient cause can be shown to the Association.

Sec. 3. The Company shall have the absolute right to dismiss any employee for inefficiency, provided an employee so dismissed shall have an appeal to the General Manager. In event of the General Manager's decision not being satisfactory to the Association, the case shall be subject to arbitration under sub-section C of Sec. 5 of this Agreement.

Sec. 4. The Company shall forward the names of all employees entering their employ in any of the departments covered by this Agreement to the Secretary of the Association the same day such employee is placed on the payroll.

Sec. 5. (*a*) Properly qualified officers of the Association Divisions shall be recognized by the Company in discussing any grievance of any employee. Grievances will first be presented to the Local Manager or Superintendent, and if a satisfactory adjustment cannot be obtained an appeal will be made to the General Manager.

(*b*) Any employee suspended or dismissed for cause, and upon investigation not being proved guilty, shall be reinstated and paid for all time lost through suspension or dismissal. Investigation of the charge in cases of suspension or dismissal shall be held within forty-eight hours. The suspended or dismissed employee shall be notified at least twenty-four hours in advance when and where to attend, and also be notified of the nature of the charge laid against him. He shall have the right to produce witnesses and evidence thereat, and also the privilege of having officers of the Association present, if he so desires. Final decision in all cases of suspension or dismissal shall be given within forty-eight hours after the hearing of the charge is closed.

(*c*) In the event of a decision given by the Company under the foregoing sub-section not being considered just and equitable by the Association, the Company agrees to refer the same to a Board of Arbitration, which Board shall consist of one officer of the Company and one officer of the Association. These two shall meet within forty-eight hours and select a third arbitrator or umpire; in event of the selection not being made within five days the appointment shall be referred to the Provincial Minister of Labour immediately to select the third man. The decision of a majority of the Board shall be final and binding on all the parties. Each party shall bear the expenses of its own arbitrator and the expenses of the umpire shall be paid equally by the parties hereto.

(*d*) If an employee has been suspended or dismissed for any violation of duty constituting in the opinion of the Company an indictable offence, the Company shall immediately inform such employee to that effect, designating such violation, without being required to furnish the evidence there of in support. If the Association s not satisfied with such suspenion or dismissal, it shall within seven days notify the Company in writing to that effect and if within seven days after receiving such notice, the Company does not criminally prosecute the employee for such alleged violation, then such suspension or dismissal shall be subject to arbitration and dealt with under the foregoing sub-section.

It is understood that the provisions of this sub-section are not in any way to impair, affect or delay criminal proceedings being taken at any time against any employees.

Sec. 6. Should the business of the Association so increase that it becomes necessary to have a business agent, and an employee is appointed then the Company shall recognize the employee so appointed, as such business agent, and he shall retain his seniority in the Company's service and have access to the Company's premises at all reasonable times.

Sec. 7. Officers of the Association shall be granted leave of absence on Association business in so far as the regular operation of the service will prmit, and shall be given preference over any other applications for leave on the same day.

Sec. 8. Any employee elected to office in the Association which requires his absence from the Company's employ shall retain his seniority rights and shall upon his retirement from such office return to the Company's employ.

Sec. 9. Any employee shall be granted leave of absence on application to their respective foreman or superintendent where such leave of absence does not exceed fourteen days, in so far as the proper operation of the service will permit. All applications for a longer period shall be made through the business agent or president of the Association and taken up with the proper official of the Company, and dealt with in accordance with the priority of the application. Three months absence shall be granted if desired after one year service. No leave of absence will be recognized unless jointly approved of by the Company and the Association. Leave granted for the business of the Association shall not be included in the foregoing.

Sec. 10. All complaints to the Company brought against employees must be in writing and open to the inspection of the officers of the Association.

Sec. 11. In accordance with the past policy of the Company promotion will, as far as possible, and having due regard to the needs of the service be governed by seniority and proficiency, but in all matters of promotion and appointments the Company reserves the right of absolute freedom in selection. When vacancies occur, notice of same will be given on the bulletin boards so that the employees may make application for same.

Sec. 12. Monthly men will be given fourteen days holidays each year, after one year service, and shall be paid for same. Public holidays not included in the fourteen days.

Sec. 13. Payment of wages shall be made in cash on every second Friday. Shortages or omissions in pay caused by the fault of the Company shall be paid, on demand, if requested by the employee. A clerk shall be stationed in the New Westminster office to deal with adjustment of wages of employees on interurban lines, Westminster city lines, and Westminster car shops and barns. Victoria to have the same system of timekeeping as Vancouver and Westminster.

Sec. 14. Fifteen minutes will be paid for making out accident reports; when motormen and conductor make out statement of accidents both shall receive the fifteen minutes pay. All time reporting to head office to be paid straight time and in no case to be paid less than one hour.

Sec. 15. Duplicate record cards of employees service will be kept, one copy of which will be retained by the Company and one copy furnished to the employee; all entries and notations placed on the Company's copy must be put on the employees copy at the same time. Only such entries as are on both copies will be considered as part of the employees record of service.

Sec. 16. Any employee covered by this agreement will be entitled on becoming a consumer of gas concessions as hereinbefore, and to purchase electric light from the Company for the use of himself and family only on four cents per kilowatt hour, as measured by meter, and subject to such regulations for the use of same as the Company may issue from time to time; the Company to instal meters free and charge no rent for same.

(*b*) Free transportation shall be granted to all employees at all times over all lines within the city on which they are employed or over the interurban district in which they are employed. Under special circumstances the Company may grant, upon request a pass to an employee covering transportation between the nearest interurban station to his home and the place where he is employed, should be he living in a district where city car accommodations will not adequately cover his needs. Trackmen on District Two to have passes good on Vancouver or Westminster car lines.

(*c*) Each employee shall be granted one round trip pass per week for himself, wife and members of his family wholly dependent on him, over Districts one, two, three, and four and Saanich line, good on any day of such week.

(*d*) Any employee residing on the interurban lines shal l be entitled to purchase settlers tickets not exceeding thirty per month at half rate for his wife and membersl of his family wholly dependent on him, except where this provision is contrary to law.

(*e*) Motormen's and conductor's badges will cover transportation at all times over all lines.

(*f*) Any employee making wrongful use of any of the concessions granted by this clause or transferring them to persons not authorized to receive them, shall be dismissed from the service.

Sec. 17. Any work condition at present in force, which is not specifically mentioned in this Agreement and is not contrary to its intention shall continue in effect; provided that should any dispute arise as to the existance of any such working condition then the General Manager shall decide the matter. If the decision is not satisfactory to the Association then it shall have the right of appeal to a Board of Arbitration, to be constituted under and having all powers outlined in Sub-section C, Sec. 5, of this Agreement.

Sec. 18. Employees held off on Company's business by order of the Company officials will be paid schedule rates for time lost and will be reimbursed reasonable expenses when away from home. Like rates and expenses shall be paid to employees when compelled to attend inquests or courts on subpœna requested or procured by the company officials.

PART THREE.—CITY AND SUBURBAN LINES.

Sec. 19. When a man is compelled to work over schedule running time, time and one half will be allowed up to twelve midnight, and double time after twelve midnight until he is relieved from duty (This to apply to men working day runs.)

(*b*) Men working night runs after finishing their run double time thereafter until relieved.

(*c*) When an extra man is required to work over eight and one-half hours he shall receive time and one half up to eleven hours, and double time thereafter until relieved.

(*d*) Men working owl runs shall be allowed time and one-half after running time up to eleven hours, and double time after eleven hours until relieved.

Sec. 20. Eight hours shall constitute a days work, and shall be observed as far as operating conditions will permit. When operating conditions necessitate a longer schedule than eight hours, all such time over eight hours shall be computed as overtime. Travelling time to be included in the eight hours.

Sec. 21. All motormen and conductors on regular runs must be allowed every eighth day off, except on holidays and exhibition week, when all motormen and conductors will be available for service, provided always that the motormen and conductors considered necessary by the Company for service, in these occasions, shall be given three days notice of same.

Sec. 22. All regular runs to be completed in eight hours, with extreme limit of nine hours. In event of a run not being completed within nine hours of the commencement of the first shift, all such time over nine hours shall be computed as allowance time, and shall be paid in addition to the work pay, at the rate of time and one-half.

Sec. 23. The Company shall pay extra to motormen and conductors for breaking in new men at the rate of five cents per hour. Men breaking in new men shall have served at least one year, and will be selected by the Company in accordance with their efficiency.

Sec. 24. When men are required to report ten minutes or more before taking their car they will be paid for such time. Any motorman or conductor pulling car in or out of barn shall get ten minutes pay over scheeule running time; all conductors shall get ten minutes pay for taking out fare box and supplies, and travelling time to be paid in accordance to schédule running time from place where box is received to relief point and from place of relief to point where box is delivered up. All motormen who have to take run ten minutes or more from car barns shall be paid travelling time to and from point of relief. Any motorman or conductor called for work shall be paid for time he reports until relieved, no report to be paid less than two hours. Each conductor on Sixth and Twelfth St. lines in New Westminster, who is required to make out coupon reports shall be paid fifteen minutes for each report.

Sec. 25. Each conductor and motorman if required by the Company, shall wear uniform and cap while on duty and the Company shall provide such employee with one full uniform and one extra pair of pants and one cap each year. One uniform overcoat will be supplied to each conductor and motorman every second year, if requested. The cost of said uniform, overcoat and cap to be in so far as contribution by the Company is concerned based upon a fixed price, that shall be agreed upon by the Company and the Association. The Company's contribution shall be one-half of said fixed price. Union scale of wages shall be paid for the making of the uniforms and overcoats, and the union label must be attached to the garments.

In the event of an employee damaging or destroying his uniform in the execution of his duty the Company will make good the damage or supply free an extra uniform if the case warrants. Any employee who has been in the employ of the Company for six months and has a uniform for three months shall upon leaving the Company's service not be required to pay more than one-half of the cost of such uniform. (This section shall also apply to interurban lines.) Conductors changers to be furnished by the Company and to remain the property of the Company.

Sec. 26. No new men shall be employed as motormen or conductors who are under the age of twenty-one years.

Sec. 27. The Company shall endeavour to maintain at all times an adequate and proper spare list, up to twenty per cent of the regular men if the obtaining of them is practicable. No conductor or motormen after finishing a run shall be required to do extra work, if there are any competent extra men available and the Company will endeavour at all times to provide a sufficient number of extra men so that any motorman or conductor will not be required to work over schedule running time.

Sec. 28. All conductors on passenger runs shall be supplied with change money, up to thirty dollars, according to the requirements of their runs.

Sec. 29. All regular work trains shall be operated by a fully qualified crew, and each line car shall be operated by a fully qualified motorman. Such crews shall sign on a special sheet for a period of six months, from July 1st to December 31st and January 1st to June 30th. Provided, however, the Company reserves the right to withdraw any car or cars referred to in this section, whereupon the crews signed for any car so withdrawn shall be assigned to duty in their proper position in the passenger service, and a new running sheet posted if necessary. And further provided that crews signed as above if not required for work train service or line car on any day may be assigned to duty in the passenger service by the Superintendent for the day or days said work train or line car is temporarily out of service. The Company to put on a pilot when such trains or line cars run over interurban lines.

Sec. 30. Day runs: any run of eight hours or more finishing on or before six-thirty p.m.

Early night run: any run of eight hours or more finishing after one a.m.

Block runs: Block runs shall be classed as regular runs, with the exception of those containing one owl run or more. Block runs containing one owl run or more will be classed as owl runs.

Special runs: Any run of less than eight hours.

Sec. 31. Men compulsory taken from their runs and put into temporary positions shall be paid the same rates as they would receive on their regular work and shall not have their earnings reduced owing to a shortage of hours.

Sec. 32. A new running sheet for city and suburban cars shall be posted every two months, and shall be signed up within five days of posting. Each new running sheet shall take effect on the first day of the month, provided however, the Company reserves the right to extend the time for bringing a new running schedule into effect if foggy weather or other exceptional conditions prevail.

The Company is to have the right to change the running sheet during Exhibition week or on holidays or in the

event of an unforeseen occurrence happening, which so interferes with traffic as to require a change. If the change at any time exceed one week then the Company shall post a new running sheet. Running sheets shall be submitted three days before posting for inspection and approval of the Executive committee.

Sec. 33. All cars to be provided with suitable heaters on front and rear vestibules between October 31st and April 30th each winter. (This section to apply also to interurban cars.)

Hand rails on P. A. Y. E. cars to be covered with felt or leather.

Sec. 34. Lavatories shall be provided at the following points: Vancouver, Fraser Ave. Line, at River Road; Fourth Ave. Line, at Alma Road and Cedar Cottage; Davie St. Line, at 25th Ave; Robson St. Line, at Commercial Drive; Victoria Road Line, at Stanley Park; Fairview Belt line, in the Lee Block; Hastings St. East line, at Trafalgar St; Kitsilano line, at Vine St.; Marpole line, at Marpole; 16th Ave. line, at 16th Ave. and Main. New Westminster: Sapperton-Edmonds line, at Sapperton; Sixth St. line, at Highland Park; Fraser Mills Branch, at Queenshore.

Victoria: No. 1 run at Oak Bay; No. 2 run at Outer wharf; No. 3 run at Fernwood; No. 4 run at Esquimalt; No. 5 run at Gorge; No. 6 run at Foul Bay Road; No. 7 run at Cedar Hill Road; No. 8 run South west of Washington Ave; No. 9 run at Olympia Ave.; No. 10 run at Mount Tolmie; No. 11 run at Exhibition grounds.

Sec. 35. Lockers to be provided where this arrangement is not already in effect.

Sec. 36. Two stools shall be provided for all double enter cars.

PART FOUR—INTERURBAN LINES.

Being District One, District Four, Saanich Lines, 16th St. and Carral St. Yards.

Sec. 37. A new running sheet to go into effect on the first day of each month shall be posted not later than 25th of each month for signing.

(a) Men will sign in order of senority for the run they desire to work for the following month.

(b) Any man who does not wish to sign for a regular run, may sign the spare sheet instead, and will be a spare man for the life of that sign up.

(c) When it is known that a man will be absent for fifteen days or longer in the following month he will be required to sign the spare sheet instead of a regular run.

(d) Every passenger run will be worked by the man signed up for it, when in passenger service, and when he is absent from his run it will be worked by the senior competent man on the spare list.

(e) When a vacancy occurs in freight service through a regular man being absent, or extra trains or cars being put into service, such vacancy shall be filled by the senior competent man in any service who desires the run.

(f) In event of new trains or cars being put into service for a period of six days or longer during the life of a sign-up the senior competent man applying for the run shall take it, and his run shall be worked by the senior competent man on the spare list.

Sec. 38. Work train crews to consist of one conductor, one motorman, and at least one brakesman and one trollyman.

Sec. 39. Line car crew to consist of one conductor and one motorman.

Sec. 40. Freight service: Road crews in freight service when handling from one to five cars in addition to the motor, will consist of one conductor, one motorman, one trolleyman and at least one brakeman. When handling more than five cars in addition to the motor shall consist of one conductor, one motorman, one trolleyman at and at least two brakemen

Sec. 41. A way freight, express or baggage motor crew shall consist of at least one conductor, one motorman and one brakeman, except where business is light, when crew may if consistent with safety, be composed of a conductor and motorman only. If the work on any freight or milk train is unduly heavy it will be lightened by employing additional men.

Sec. 42. Freight and work trains regularly set up, not less than 26 calendar working days to constitute a month at any service and must be paid a proportionate rate for a number of days held in service. (This clause not to apply to the month of February.)

Sec. 43. A passenger crew for one car consists of at least one conductor and one motorman.

(a) Passenger crews for two cars consists of one conductor, one motorman and one brakeman. All other passenger trains to be manned as safety and traffic conditions demand.

Sec. 44. The term trainman means a man employed by the Company exclusively for service as a conductor, motorman or trolleyman, and shown on its lists and records as having been assigned to the train service.

Sec. 45. When a man holding a regular passenger run is compelled to work over eight hours, he will receive time and one-half up to 16 hours, and double time after 16 hours until relieved from duty.

(a) Men holding freight, work train or extra runs if compelled to work over eight hours shall receive time and one-half up to 16 hours and double time after 16 hours until relieved from duty.

(b) All night men engeged in freight service on Dist. One or 16th St. yards shall be paid two cents per hour extra over and above the wages paid to day men. Night is defined to be from 6 p.m. to 6 a.m.

Sec. 46. All regular runs shall be paid not less than eight hours pay.

(a) When schedule runs do not consume eight working hours, Company reserves the right to assign crews holding such runs further duties to complete full days work it being however that such further duties shall be specified when runs are advertised for signing. No freight work to be included in passenger runs; no passenger work to be included in freight runs.

(b) Any man called for duty after 19 shall be paid not less than eight hours for such duty.

(c) When an extra man is called for duty and works less than four hours, he shall be paid four hours pay; in event of his working more than four hours and less than eight hours, he shall receive eight hours pay, unless other work can be provided for him, giving him eight hours work within eleven hours of his first commencing duty.

(d) Trainmen's time shall be computed from the time they are required to report for their run, and shall finish at the time they arrive at their home terminal after they have finished their run, and been relieved of charge of their train.

(e) Fifteen minutes shall be allowed for reporting time for all service on Districts One, Four, and Saanich line.

Sec. 47. A running sheet assigning men to vacant runs shall be posted no later than 17k of the preceeding day, and if an extra man is not marked up correctly according to seniority he shall receive pay equal to the run which the mistake deprived him of, unless other work is provided for him within the same hours, and paying the same amount of time.

Sec. 48. The home terminal of all trains shall be designated when runs are advertised for signing.

(b) New Westminster depot shall be the home terminal for all spare men.

(c) Men working runs whose terminal is other than New Westminster depot shall be entitled to relief for one full day each week, in addition to any relief necessary by sickness.

(d) Any man required to work a run which ties up away from his home terminal shall be paid for the extra expense incurred while away from home.

Sec. 49. In event of trainmen requiring relief the Company will furnish such relief as long as there are competent extra trainmen not working, and the Company will be advised before 16 k. of the day previous that such relief

is required, except in case of emergency. Reliefs will be granted in order in which applications are received; all applications being equal, leave will be granted in order of seniority.

Sec. 50. After 16 hours duty, a trainman may claim eight hours rest.

Sec. 51. In so far as service demands and working conditions will permit all regular runs shall be completed within ten hours of commencement of first shift.

In event of a run not being completed within ten hours, all such time over ten hours shall be computed as allowance time and shall be paid in addition to the working pay.

Sec. 52. Extra men to be called at place of residence for duty if place of residence is within one mile of terminal. Extra board to be placed in men's waiting room.

Sec. 53. Students while breaking in will be paid at least $1.00 per day during probation, provided that they qualify within fourteen days.

Sec. 54. Trainmen on duty shall be allowed time not to exceed thirty minutes for meals, when detained from home terminal in any capacity, and shall be paid for time so consumed. Despatchers permission shall be obtained.

Sec. 55. When a train is being operated over any district other than that over which the crew operating the train is acquainted with the physical characteristics or running rules of such district, a qualified trainman will be supplied as pilot. Pilots will be paid same rate as their seniority entitles them to as conductor.

(*a*) When trains are operated over two or more districts or lines each and every train shall be run by a crew made up from the two seniority districts, pro-rated on a mileage basis as near as possible.

Sec. 56. No employee, not a qualified trainman and member of the Association shall be allowed to operate a train over any district, unless absolutely necessary.

Sec. 57. Conductors shall be provided with $15.00 change money for passenger work.

Sec. 58. Where trip reports detain conductors after days' work they will be paid reasonable time for same.

Sec. 59. A trainman taken from his regular work to other duty shall be paid not less than the same earnings as he would receive on his regular work.

Sec. 60. Runs shall be awarded to qualified trainmen in accordance with their seniority on the district on which they are employed.

Sec. 61. Trainmen deadheading will be paid time for same, to and from their home terminal.

Sec. 62. Trainmen will be notified when time is not allowed as per time slip with reasons therefore, and shortages and omissions in pay will be paid at once if requested by the trainmen.

Sec. 63. Trainmen's seniority shall commence from the time application is accepted and same be furnished to the Association if requested.

Sec. 64. Trainmen sick or unfit for duty will register in a book kept for that purpose, and when they book O.K. for duty again they will take their place in the run list.

Sec. 65. When a trainman is discharged or resigns he will as soon as practicable be paid and given a certificate stating his term of service and in what capacity he was employed; three days to be considered sufficient, if held longer he shall be paid eight hours per day at the rate he was receiving.

Sec. 66. Regular crews after finishing their run will not be required to do extra work if there are any extra men available. The Company will endeavour at all times to provide a sufficient number of extra men so that regular men will not be required to do extra work.

Sec. 67. Seniority lists of trainmen shall be postedu up every six months.

Sec. 68. All reliefs and extra work on District Three shall be assigned to District One man when available. When men are required permanently on District Three, applications will be called for, and preference given to District One man, if competent.

Sec. 69. Men working night runs will not be required to report for duty or to work runs until they have had eight hours rest, after the completion of their night's work.

SHOP AND BARN DEPARTMENTS.

Sec. 70. All mechanics and mechanics' helpers on night duty in mechanical department to receive 5 cents per hour extra over the rates paid for day work.

(*a*) All vacancies for day work to be filled by night men, seniority to govern.

Sec. 71. For all shop and barn employees and freight car repair department:

(*a*) Eight hours shall constitute a day's work.

(*b*) The working hours will be from eight a.m. to five p.m. with one hour off for lunch, between 12 noon and one p.m. for first five days in the week and from 8 a.m. to 12 noon on Saturdays.

(*c*) Night hours shall be from 11 p.m. until 7 a.m. with a half hour off for lunch, for six nights per week.

(*d*) Men required to work other than these specified hours to receive time and one-half for all time worked outside of these hours.

(*e*) All overtime to be paid at double time rates. Day work to be paid overtime after five p.m. the first five days of the week, and after 12 noon on Saturdays. All time worked on Sundays and holidays to be overtime rates.

(*f*) Night men required to work over eight hours to be paid overtime rates, also for the seventh night, when required to work, and overtime rates for all work done on holidays.

(*g*) As large a proportion as possible of the employees shall have their night off at week ends, and provision will be made that employees shall have their leave at week ends in turns.

(*h*) Emergency calls shall be paid not less than four hours time. Notice of emergency calls will be given as early as possible.

Sec. 72. Barnmen on transportation work shall do transportation work only.

Sec. 73. Any man called to work in outside places from his own shop or barn shall receive transportation, and be paid for the time going to and coming from such places, except in the case of a man being transferred from one shop or barn to another for a period of thirty-one days or more.

(*a*) Any man sent to Chilliwack to relieve barnmen there shall have all expenses paid.

Sec. 74. When men are called to places where food is not readily obtained they shall not be required to work more than six hours without meals being supplied by the Company.

Sec. 75. When men engaged in car barns are required to move cars outside of barns there shall not be less than two men in service on such car.

Sec. 76. In reduction of staff through slackness of work, last one, first off; last off, first on, and a man shall not be considered a new man in re-starting. Men in being laid off under this section shall leave an address with the Company. Not less than forty-eight hours notice of resumption of work shall be given by the Company to the men by mailing advice to such address. If men do not appear to resume their positions same shall be deemed to be vacated.

Sec. 77. Blacksmiths shall have own regular helpers when senior man is not laid off.

Sec. 78. Car repairers to be supplied with all tools. Carpenters to be supplied with machinists hammers and monkey wrench and bits for repair work when required.

(*a*) No man other than a carpenter shall be allowed to install glass in doors or windows or do any work pertaining to the body of a passenger car.

Sec. 79. All employees in mechanical staff who are unable to report for duty at specified time for good and valid reasons shall be allowed to start one-half or one hour later.

Sec. 80. Suitable lavatory, toilet and mess room accommodation to be provided.

Sec. 81. The Company shall appoint competent first said men to take charge of the first aid boxes at eachbarn and department.

Sec. 82. Heaters shall be installed inside each barn suitable for drying wet clothes. Each barn shall be heated between November 1st and April 30th each winter.

Sec. 83. All wrecking work shall be paid at the rate of time and one-half from time of leaving until return.

Sec. 84. Service as car cleaners to count on wage scale when cleaners are transferred to car repairing.

Sec. 85. Men who have served an apprenticeship or had four years or over experience in the separate trades or callings as described in the next twelve paragraphs shall be termed mechanics, and any man doing work which is generally accepted in Vancouver, New Westminster and Victoria as mechanics work shall be paid at the minimum rate of pay, and the Company will not employ semi-skilled men for mechanics work or have helpers do mechanics work or any part thereof.

Sec. 86. Men who have served an apprenticeship or had four years or over varied experience in the operation of lathes, planing, slatting, milling, shaping and tire-boring machines or other machine tools, and fitters who are capable of fitting up, assembling and repairing the various parts or details of engines or locomotives, stationary, marine or any kind of machine or machine tools, and vise work generally, shall be designated as machinists.

Sec. 87. Any man who has served an apprenticeship for four years or who has had four years varied experience at the blacksmith trade, and who, by his skill and experience, is qualified and capable of taking a piece of work and with the use of drawings and blueprints or from instructions can transmit work to successful completion within a reasonable time, shall be considered a blacksmith.

Sec. 88. Boys serving an apprenticeship to learn the trade shall be designated apprentices. Any boy hereafter engaging himself to learn any mechanical trade shall be over 16 years of age, and under 21; must serve not less than four years, and must be able to read and write English, and know the first four rules of arithmetic.

(*a*) The number of apprentices in the case of a machinist shall be one for the shop and one for each four machinists employed. Helpers will not be advanced to the work of machinists, and when used in connection with machinists work, will work under the direction of a machinist.

Sec. 89. Any man who has served an apprenceship of four years or over or who has had four years varied experience at the carpenter trade, and who by his skill and experience is qualified and capable of taking a piece of work, and, with the use of drawings and blueprints, or from instructions, can transmit such work to successful completion within a reasonable time, shall be considered a carpenter.

Sec. 90. Any man who shall prove qualified to make satisfactory carpenter repairs to freight car bodies of any class, steel frame work excepted, wherein skill required for joiner or cabinet work is not necessary, and who can perform same within reasonable time, shall be considered a freight carpenter.

Sec. 91. Any man who has served an apprenticeship of four years, or who has had four years varied experience at the painters' trade, and who by his skill and experience is qualified to mix and blend paint to colors required by specifications, or otherwise, and whom can perform successfully within a reasonable time the work usually performed by a skilled painter shall be considered a painter.

Sec. 92. Any man who can prove his qulifications to satisfactorily apply paint to freight car bodies and work of this class and who can perform same within a reasonable time shall be considered a freight car or rough painter.

Sec. 93. Any man who by his qualifications can satisfactorily clean work preparatory to being painted, and also apply paint in a satisfactory manner to parts of car not requiring high grade or varnish finish, such as floors, outside roof, bottom of car, window guards, fenders and piping, shall be considered a brush hand.

Sec. 94. Any man who has full knowledge of all pertaining to mechanical side of air brake equipment and capable of repairing any part of same, shall be considered an air brake fitter.

Sec. 95. Any man who has full knowledge of all pertaining to the wiring of electric cars, and is able to locate and repair all electrical trouble on electric cars and motors, shall be considered a car wireman.

Sec. 96. Any man who is qualified by his skill and experience to satisfactorily repair motor armatures and rewind same shall be considered an armature winder of one of the classes mentioned below, depending upon the number of years service he may have given in any armature room of recognized standing:

First class—One who has served four years or more in an armature room.

Second class—One who has served three years or more in an armature room.

Third class—One who has served less than three years in an armature room.

Sec. 97. A blacksmith's helper shall be permitted to have a fire after he has worked two years continouusly in the shop where he is employed provided there is a vacancy; seniority and competency to govern such advancement. An advanced helper shall agree to work for a term of three years, and each year shall receive an advance of 3c per hour, but not to exceed the minimum rate paid to blacksmiths. After three months trial should he prove incompetent, he may be reduced to helper. It will be the duty of foreman to advance apprentices and advance helpers in all branches of their respective trades. The number of advanced blacksmith helpers of blacksmith apprentices shall not exceed the rate of one to five blacksmiths.

PART SIX.

TRACK MAINTENANCE DEPARTMENT.

Sec. 98. The term track maintenance men means employees who take their orders from the roadmaster and whose duties are to maintain the track in safe condition for operation. This definition to include extra gangs.

Sec. 99. Eight hours shall constitute a day's work. The hours to be from eight a.m. to five p.m. with one hour off for lunch, the first five days of the week, and from eight a.m. to 12 noon for Saturdays.

Sec. 100. In the event of day gangs being required to do night work for a period of two nights or less, they shall not on that account be compelled to lose a day prior to the commencement of that night work, and they shall be paid overtime rates for the two nights.

(*a*) When a day gang is required to work three nights or more in succession, it shall be considered to have been transferred to night work, but shall be paid at overtime rates for the first night's work.

(*b*) Gangs on steady night work to receive 5 cents per hour extra.

(*c*) Provided that the foregoing shall not apply to extra men taken on for emergency work in connection with snow trouble.

Sec. 101. Men required to work after five p.m. to get time and one-half until ten o'clock and after ten o'clock, double time until relieved.

(*a*) If called out before eight a.m. to get double time until eight.

(*b*) Double time will be paid for all work done on Sundays, holidays and Saturday afternoons.

Sec. 102. If called out for emergency or night work men shall be paid not less than four hours' time; no man to be required to work for a longer period than six hours without meals being provided by the Company.

Sec. 103. Section houses to be provided on each section.

Sec. 104. Seniority list of maintenance of way men to be kept by the Company. If through slackness of work a layoff becomes necessary men shall be laid off in the following manner: last on, first off; last off, first on.

When men are needed Sec. 76 to apply in so far as it relates to notices being sent for resumption of work. Provided that in moving men from one gang to another gang preference shall be given to married men, so that they shall not be moved farther from their home. A separate seniority list shall be maintained for Dist. 2 men.

Sec. 105. All vacancies for promotion among track maintenance men to be bulletined. Night watchmen to be appointed from maintenance of way men on maintenance of way work, seniority to govern.

Sec. 106. If men are taken from shops to do blacksmith work or blacksmith helpers work on maintenance of way, they shall receive regular shop schedule wages.

Sec. 107. Men to be paid time for assembling points to and from work.

PART SEVEN

FREIGHT SHED, BAGGAGE ROOM AND STATION AGENTS

Sec. 108. Freight shed and baggage room, eight hours to constitute a day's work; hours to be from eight a.m. to five p.m. with one hour off for lunch.

Sec. 109. Layoffs to be governed by Sec. 76.

Sec.110. All overtime to be paid at the rate of time and one half until ten p.m. and double time thereafter until relieved from duty..

(*a*) All time worked on Sundays or holidays to be paid double time, each man to work in turn.

Sec. 111. Baggage room men shall have every second Sunday off.

Sec. 112. Station agents:

(*a*) Regular working hours per day shall be designated for each agent.

(*b*) Ten hours shall constitute a day's work for all agents, for six days per week.

(*c*) Sunday hours shall not exceed one-half hour for attendance on each regular passenger or express train.

(*d*) Agents required to work outside of regular assigned hours shall be paid overtime for such work at the rate of time and one-half, based on schedule rates for a 25 day month, any portion of an hour less than 30 minutes not to count, any portion of an hour 30 minutes or over to count as one hour.

(*e*) Agents required to work over ten hours per day will be paid overtime at the rate of time and one-half for all time worked in excess of ten hours.

(*f*) All agents will be allowed sixty consecutive minutes for a meal between the hours of 11 K to 13 K.

(*g*) Overtime tickets will be sent in by agents to the proper officials and if overtime is not allowed, agents will be notified in writing within ten days, setting forth the reasons for time not being allowed.

(*h*) All agents will be relieved for two whole days per month, without loss of pay. Sec. 12 of the general agreement to apply to agents for annual holidays.

(*i*) All agents will be furnished with dwelling houses, fuel and light free.

(*j*) Where agents are required to attend switch lamps, they will be paid four dollars per month extra for six or less lamps and fifty cents additional for each lamp in excess of six.

Sec. 113. Bridge and Building Master's department to be included for hours of work and overtime rates same as mechanical department, for these men employed on renewals, alterations and maintenance. Sec. 76 to apply to this Department to govern layoffs.

Sec. 114. Where the word "Holidays" appear in this agreement it shall be deemed to mean New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Dav and Christmas.

Report of Board in Dispute between B.C. Electric Company and Western Power Company and Electrical Workers

A REPORT was received from the Boards established to deal with a dispute concerning wages and working conditions between the British Columbia Electric Railway Company, Limited, operating at Vancouver, Victoria, and New Westminster, and its electrical workers; and the Western Power Company of Canada, Limited, of Vancouver, and its electrical workers. The Board was composed as follows: the Honourable Mr. Justice W. A. Macdonald, of Vancouver, chairman, and Mr. F. Buscombe and Mr. T. J. Coughlin, also of Vancouver, all appointed by the Minister of Labour, with the consent of the parties.

The report was unanimous. In this case the employees ceased work after the Board had been appointed. The Board, after an attempt to avert the strike, which was later adjusted, simply reported the situation.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of differences between the British Columbia Electric Railway Company, Limited, and the International Brotherhood of Electrical Workers through the Pacific District, Council No. 1 of the Third District of the International Brotherhood of Electrical Workers, and in the matter of differences between the Western Power Company of Canada, Limited, and its electrical workers, members of Local Union No. 213 of the International Brotherhood of Electrical Workers.

To the Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Canada.

Boards of Conciliation and Investigation were constituted in these matters, consisting of the Honourable Mr. Justice W. A. Macdonald, chairman, appointed by the Minister of Labour; Mr. Frederick Buscombe, representative of the company, and Mr. Thomas J. Coughlin, representative of the employees, appointed by the Minister of Labour.

After the Boards entered upon their duties it was found that the differences between the two companies and their electrical workers, being practically the same, could be dealt with together. It was understood that the em-

ployees did not desire to take part in the proceedings before the Boards. Mr. E. H. Morrison, their business agent, was notified of the first sitting of the Boards and appeared simply as a spectator. This meeting was held on Saturday, the twenty-ninth of June, 1918. It was apparent that the parties were not ready to proceed and it was intimated that the employees might go on strike at the close of the following day. It was pointed out by Mr. Morrison that if a strike occurred, and later on an adjustment of wages took place, the employees might not be entitled to such wages during the period of the strike. It was arranged, and the companies undertook, that if the employees refrained from striking, the wages rate finally determined would be retroactive and payable in the meantime. The chairman also referred to the fact that it was illegal to strike until the Boards of Conciliation had made their report and asked Mr. Morrison to communicate this fact to the parties he represented. The Boards then adjourned until Wednesday, the third of July. In the meantime, on Monday, the first of July, the newspapers announced that at a meeting held the previous evening the electrical workers, in conjunction with the street railway employees, had resolved to go on strike at the close of that day. A meeting of the Boards was immediately called to avert such strike as it would apparently destroy transportation, light and power throughout the cities affected. The meeting was well attended by representatives of the employees and discussions took place at length to effect a settlement. The fact was not disguised, on the part of the employees, that it was their intention, even in the face of the statute, to go on strike in accordance with their resolution unless their demands were complied with in their entirety. The meeting was without avail.

At the adjourned meeting of the Boards, on the third of July, the situation was discussed and the chairman referred to his inability to find any precedent for a Board of Conciliation continuing to perform its duties, after a strike had occurred during its proceedings. However, it was deemed advisable, even under such circumstances, if possible, for the Boards to act further, in an endeavour to carry out the intention of the Act. The difficulty presented itself that the companies could not give assistance in support of the matters in dispute, because their superintendents, and other members of the staff, who were conversant with the question, were then engaged in manning the plant and providing light and power. Mr. Morrison, on his part, was ready to proceed with the evidence, but it was useless to only hear one side of the question, as the strike had completely altered the situation. It then appeared to us that any efforts in the direction of conciliation might be fruitless. It was impossible, without evidence, to express any opinion on the merits of the application or make any recommendations. We then adjourned *sine die*.

The street railway strike continued and the power and light necessary for the public was supplied through the work of superintendents and other officials of the companies interested; but eventually a settlement was arrived at, in which we understand the demands of the employees were fully conceded. We feel that we cannot do anything further in the matter and thought it well to simply report the situation.

(Sgd.) W. A. MACDONALD,
Chairman.

(Sgd.) FREDERICK BUSCOMBE,
Representative of Companies.

(Sgd.) THOMAS JOHN COUGHLIN,
Representative of Employees.

Dated at Vancouver, this nineteenth day of July, 1918.

Report of Board in Dispute between the Corporation of Victoria, B.C., and Civic Employees

A REPORT was received from the Board established to deal with a dispute concerning salaries and wages between the Corporation of Victoria and its civic employees. The Board was composed as follows: Mr. W. E. Burns, of Vancouver, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members; Mr. R. F. Taylor and Mr. James Dakers, of Victoria, appointed on the recommendation of the employers and employees respectively.

The report was unanimous and contained certain recommendations as to the settlement of the dispute and was accompanied by a proposed schedule of wages.

The dispute was adjusted accordingly.

Report of Board

Victoria, B.C., 19th July, 1918.

To The Honourable Minister of Labour,
Ottawa, Canada.

Sir:

We, the undersigned, Rowland Fennings Taylor, James Dakers and William Ernest Burns, being the Board established under the Industrial Disputes Investigation Act, 1907,

with reference to the dispute between the Corporation of Victoria, Employer, and certain of its Employees, being members of the Civic Employees Protective Association, sat for the hearing of evidence in respect of said dispute, commencing on the 8th day of July, 1918, continuing sitting throughout the week, reconvening on the 17th instant for the conclusion of evidence and consideration of our award. At the request of the City, the scope of the work of the Board was extended to include all employees of the City, outside of the Association.

The case of the Association was set out in the Association's letter, dated 18th May, 1918, and the City's reply in a letter to the Board by the Mayor, dated 5th July, 1918, together with the Estimates By-Law of 1918. The case of the employees was presented to the Board by representatives of the Association and was not confined to Association Members, but dealt, generally speaking, with the employees as a whole. Amplifying the evidence thus obtained, the Board called different employees as witnesses and investigated the different departments of the City sufficiently, in the opinion of the Board, to justify the conclusions the Board has arrived at.

Courtesy and every facility was accorded the work of the Board in its requirements by all the Civic officials involved, from the Mayor down.

In February, 1915, deductions were made in the then prevailing salaries of the civic employees and officials, ranging from five per cent to 20 per cent and more. Since that time action in respect of wages and salaries has been irregular, in some cases the amounts paid before the reduction had been restored, in other cases the reduced salaries had been increased, and in still others there has been no change in the reduced amounts. The filling of some of the higher positions by promotion has introduced a certain difficulty in dealing with individuals and individual positions. In its conclusions the Board has sought to leave unchanged as much as possible the comparative positions of the respective employees, having regard to present salaries and those prevailing before the reduction. Where an adjustment has been made, such has been made by the Board unanimously after careful consideration of applicants facts.

The Board has not felt justified in investigating exhaustively the work of each employee in his Department and the work of each department in regard to efficiency and results, but it is of the opinion that the City has been and is being well served by its officials in the face of conditions as to salaries and wages which would make for the opposite. Where in the same classes of employment outside the City and in other classes increases of pay from time to time have necessarily been brought about during the last three years because of the changes in the cost of living, these have not occurred in the City, except slight increases in the case of the daily wage men, and also except the cases of the Fire and Police Departments, which departments are not within the scope of this investigation.

Subject, of course, to the fact already mentioned, that an expert investigation has not been made of each Department, the Board found in its dealings with the City Hall Staff and those having to do with the outside work whom it interviewed marked loyalty and evident efficiency.

The Board found evidence of the evils of the municipal system at present in vogue in Canada, mainly exemplified by the direct control over individual employees by the Council without regard to the head officials of the respective departments. This was apparently accentuated in the irregular manner in which employees were dealt with since the percentage reduction, which was made upon a graduated scale. While the Board does not deem the discussion or conclusion in respect of the general municipal system within its province, it feels justified in making the comment in this case, that the respective heads of the various departments should have some definite control or authority in respect of the salaries paid, both comparative and otherwise, and over dismissals and appointments. The head officials should be, of course, responsible to the Council.

The Board found no settled conditions governing increase pay for merit and length of service. A salary By-Law was passed by the City Council in 1913 which set out a scheme of yearly pay increase until a maximum was reached for each position. This By-Law was not registered, and consequently did not become effective. It was, in the opinion of the Board, a step in the right direction and action by the City in this respect would be productive of the best results in efficiency, loyalty and economy.

The Board also feels that the City Government would be well advised if a compulsory pension fund were established. The general beneficial results of such a step are so well known and credited that it is not necessary to refer to them.

The existence of these incidents in respect of any body of civic employees, apart from engendering an efficiency and being really economical, makes it possible in stressful times for the City to call for and receive willing sacrifices on the part of the employees. Their absence makes for the contrary. The Board feels that the curtailment of pay, generally speaking, which has been imposed upon the civic employees by the City and continued, was received and has been endured in a most admirable manner by the employees as a whole, and can only be explained by the presence of loyalty and work interest to a mark degree. In many cases it has meant the receipt of wages and salaries less than would cover the cost of living necessities, having regard to the position in the community held by the recipients.

The principal position taken by the City, as set out in the Mayor's letter above referred to, is that the City's financial condition does not warrant payment of increase in wages and salaries. This means that the City's revenues from taxes and other sources have not been, up

to the present, sufficient to enable the City to pay its help adequately, in the Board's opinion, for the services rendered. Some classes of workers, those engaged in trades, have approximated in their wages the wages paid in the same trades outside of the City employment. This is also evidenced in the changes of rates in the Fire and Police Departments. The reason for this is obvious, and the result has been that the other City employees have borne the greater burden since the 1915 reduction.

The Board has given the City's position in this respect careful consideration. It realizes that, as is the case in most other municipalities, the rate of taxation imposed is very difficult to determine satisfactorily, because of the large percentage of taxes which are not paid at all, and of the fact that the exact percentage of unpaid taxes each year in the nature of things must be problematical at the time the rate is struck. This condition, however, has continued for some years now, and must be taken to be capable of being dealt with in the Estimates. From the City's position it must follow that any substantial increase in wages and salaries will mean an increase in the taxation rate. After giving this matter the fullest consideration and with every regard for the City's position, the Board has concluded that the Employees are entitled to increased pay, the increase being more or less substantial. The rate for this year has not yet been struck and this fact relieves the Board from the necessity of contemplating the results of such increases in view of the revenue for this year being already fixed.

The other points raised by the Mayor's letter have to do with the conditions existing in 1915 at the time of wage reduction. He states that owing to the cessation of most public works, the City Staff was over-manned and that a large proportion of the wages paid previous to the reduction were the same as those paid during the period of extreme activity in 1910, 1911, 1912, when conditions were in every way different from those in early 1915. These points were undoubtedly influencing factors in the making of the reductions; the more so in the manner in which the reductions were received by the employees. The Board feels, however, that conditions have so changed in the intervening period in regard to the cost of living that such increases over the reduced rates as have been made were and are inadequate, and this apart from the inequalities created by the manner in which such increases were made.

The Mayor further states that the City Staff, although considerably reduced in its personnel, in at least some instances has not been reduced to the same extent as that a private individual suffering from curtailed finance in his own business would reduce. With reference to this point, as also the statement that the City Staff was over-manned at the time of the reduction, the Board feels that comment should be made. The testimony of Mr. Stewart and Mr. McNeil, Mayor and Chairman of the Finance Committee respectively in 1915 and 1916, was taken by the Board, and the testimony of various officials in the different departments. From the circumstances brought to the attention of the Board in this way and by observation, the Board concludes that in no one instance could the witness have any apparent reason for misstating or colouring the position. From the Board's observation none of these witnesses are of a character which would lend itself to criticism. As a result, the Board has arrived at the general conclusion that at the present time the staffs of the various departments are undermanned rather than over-manned. The curtailment in 1915 had to do with the reduction, not only of pay, but also of numbers. The personal element was apparently not considered as suggested. Dismissals as well as reduction in pay were drastic, and made with the sole object of reducing the City's civil list to the minimum in every department. At the present time combined positions are held in cases and assistants dispensed with. Some of the Departments are not kept up to date, and records which should be on paper are in the heads of respective employees. The Board does not pass any criticism in respect of this position, for it is caused by the unsettled conditions which obtain at present. The point has been dealt with because it has been raised and it has a bearing upon the Board's deliberations with reference to increasing or not increasing wages and salaries. In this connection the Board desires to say that the loyalty and efficiency of the personnel of the respective staffs were, in the opinion of the Board, again in evidence in meeting the situation. The only reservation the Board makes in this connection is that a complete detailed investigation above referred to was not made, therefore there may be isolated cases to which the above remarks may not apply, but the Board's impression is to the contrary.

The claims of the employees include the claim that any increased pay which may be awarded should be retroactive to the 1st January, 1918. In support of this claim have been shown to the Board the activities of the employees since November, 1917, in striving for action on the part of the City Council. These facts, taken with the various conditions which the Board has found as above referred to, have led the Board to the conclusion that some substantial effect should be given this claim. The Board therefore awards the scale of wages and salaries which it has settled upon as at the 1st day of April, 1918. In the case of the Electrical Workers this shall only apply to the extent of the rates as established by B. C. Telephone and B. C. Electric current agreements.

In deciding upon the pay increases, the Board has considered the cost of living as it applies to the respective classes of employees, the claims of the Civic Employees Protective Association, and the reduction of 1915, and the history of each class or individual since then as shown by pay increases. And it has also considered length of service and recent appointment in each case where it applies and the incidents of the employment such as permanency and favourable conditions. It has given careful consideration to the fact that in some cases a higher position is now held by a man who was a junior at the time

of the reduction. It has decided with reference to the salaried men that they should be restored substantially to the salaries obtaining before the reduction in February, 1915, and that the lower paid salaried men should receive a 10 per cent addition to that restored rate. The Board has also had reference to the wages and salaries paid by the City of Vancouver in cases where the Board has felt a safe comparison can be made.

The Medical Health Officer, the City Solicitor and the City Engineer have received separate treatment at the hands of the Board. The salaries paid those officials before the reduction were large and their reductions were at a greater percentage than any others. The Board feels that the City's position has a more apt application possibly in their case than in any others, and the amounts awarded are the results largely of that feeling. This also applies with reference to the head assistants in the Engineer's Department. The figures of the Board in these instances may be capable of merited criticism, but the Board thinks that in the circumstances it could not force the City any larger amounts at the present time.

In the case of the Wiring Inspector who has been reduced to half pay, $52.50 per month, owing to the work being less, the Board considers that he should be restored to full pay. The principle applied, in the opinion of the Board, is not sound, but in this particular case the action cannot be supported. The employee has no means of augmenting a wage which he cannot live on. Either the services of the officer should be dispensed with, or it be paid for in the ordinary way. If the position must be self-supporting as a matter of policy, then the fees must be raised.

It will be seen that the base wage awarded by the Board is $3.75 a day, representing, in the Board's opinion, the minimum wage at the present time, having regard to the cost of living. The ascending scale bears relation thereto and in the Board's opinion the scale settled should be subject to raise or reduction in accordance with definite rise or fall of the cost of living.

The Board decides that overtime in respect of daily employment should be paid as claimed, namely, time and half for overtime and double time for Sundays and holidays.

Schedule to this report is the scale of wages and salaries awarded by the Board.

The Exhibits produced to the Board are submitted herewith.

Respectfully submitted,

(Sgd.) R. F. TAYLOR.
(Sgd.) JAMES DAKERS.
(Sgd.) W. E. BURNS,
Chairman.

SCHEDULE OF WAGES AND SALARIES AWARDED

		Per month.
City Clerk's Office:—		
W. J. Dowler	City Clerk	$200.00
E. W. Bradley	Assistant City Clerk	150.00
Miss O'Rourke	Mayor's Secretary	70.00
F. Hunter	Clerk	50.00
Treasury:—		
J. L. Raymur	Comptroller	$250.00
E. C. Smith	Treasurer	200.00
J. Muirhead	Accountant	150.00
J. L. Grimison	Auditor	100.00
W. A. Hurley	Cashier	135.00
G. W. Andrews	Paymaster and Clerk	110.00
W. A. Lorimer	Tax Clerk	110.00
L. E. Gower	Tax Collector	100.00
J. F. Bel en	License Collector	99.00
W. Wright	Clerk	99.00
G. E. Davis	Clerk	99.00
R. Beggs	Clerk	99.00
H. Smith	Clerk	35.00
Miss Castleton	Clerk and Stenographer	80.00
Miss Dowker	Clerk and Stenographer	70.00
Weights and Measures and Public Market:—		
A. G. Robertson	Inspector	$100.00
Janitor:—		
E. Davies	Janitor	$103.50
Assessor's Office:—		
W. Northcott	Assessor, etc	$200.00
W. Scowcroft	Assistant Assessor	135.00
Geo. McIllmoyle	Clerk	110.00
Store:—		
A. E. Mitchell	Storekeeper	$100.00
Home for Aged and Infirm:—		
J. McIntosh	Superintendent	$80.00
T. Burke	Cook	15.00
Public Market:—		
F. Collier	Weighmaster	$80.00
Cemetery:—		
E. Brandon	Keeper	$99.00
J. Fisher	Assistant	88.00
F. Rampley	Assistant	88.00
Wiring Inspector:—		
J. A. Daly	Wiring Inspector	$100.00
Pound:—		
H. Atkinson	Pound Keeper	$100.00
Engineer's Department:—		
C. H. Rust	City Engineer	$350.00
F. M. Preston	Assistant Engineer	175.00
A. O'Meara	Surveyor	160.00
R. Foulis	Accountant	110.00
Miss Graydon	Eng. Secretary	80.00
J. McIndoe	Cost Data Clerk	110.00
T. R. Purdy	Park Superintendent	130.00
F. Taylor	Carpenter	99.00
H. F. Shade	Plumbing Inspector	150.00
Miss Griffiths	Clerk	60.00
A. Gough	Assistant	99.00
Waterworks:—		
Thos. Preece		$50.00
E. Macdonald	Foreman	150.00
A. Borde	Collector	135.00
W. Engelhardt	Cashier	110.00
J. Walker	Clerk	99.00
F. Shilling	Clerk	93.50
T. Bayley	Clerk	93.50
Miss Moir	Clerk	65.00
Miss Porter	Clerk	45.00
Miss Morton	Clerk	45.00
J. Walker	Meter Reader	93.50
S. McGowan	Meter Reader	93.50
J. Byers	Patrolman	93.50
D. Lehman	Caretaker—Elk Lake	65.00
C. Pratt	Caretaker—Smith's	75.00

		Per month.
W. Campbell	Caretaker—Sooke	92.00
W. Duncan	Caretaker—Humpback	92.00
W. Speed	Patrol Flowline	77.00
A. W. Norman	Patrol Flowline	77.00
J. Cann	Bill Deliverer	88.00

Board of Health:—

Dr. Price	Med. Health Officer	$325.00
Thos. Lancaster	Sanitary Inspector	135.00
Geo. MacKenzie	Asst. Sanitary Inspector	100.00
Mr. & Mrs. Horold	Caretaker, Comfort Stn.	60.00
Miss Hardie	Matron, Isolation	100.00
Miss Cathcart	Nurse	60.00
Miss Thom	City Visiting Nurse	85.00
Miss Lamb	Clerk and Stenographer	60.00
C. Saunders	Janitor	15.00
Miss Lawson	Sec'y Friendly Help	65.00

Legal Department:—

R. W. Hannington	Solicitor	$350.00
Miss Scott	1st Stenographer	80.00
Miss Porritt	2nd Stenographer	65.00

Street Lighting:—

M. Hutchison	Superintendent	$250.00
T. Carson	Operator	121.00
J. Roberts	Operator	121.00
W. Reid	Repair Man	133.50
A. Gibson	Foreman Lamp Trimmer	133.50

Street Lighting:—

F. S. Widowson	Lamp Trimmer	109.50
J. Perkins	Lamp Trimmer	109.50
R. Lorrimer	Lamp Trimmer	109.50
A. McNaughton	Day Man	92.50

Linemen to be paid on basis of B. C. Telephone and B. C. Electric agreements covering 2nd class Stations.

OUTSIDE EMPLOYEES

Parks:—

Foreman	$4.50 per day.
Nurseryman	4.50 "
Labourers	3.75 "
Carters	3.75 "

Boulevard Maintenance:—

Foreman	4.50 "
Labourers	3.75 "

Rock Crushing and Blast:—

Foreman	5.00 "
Drillers	4.50 "
Labourers	3.75 "

Sewer Construction and Maintenance:—

Foreman	5.00 per day.
Pipe-Layers	4.00 "
Labourers	3.75 "

Sidewalk Construction:—

Foreman	5.00 "
Cement finisher and repairer	4.25 "
Labourers	3.75 "

Street Maintenance and Cleaning:—

Foreman	$125.00 per month
Labourers	$3.75 per day.
Carters	3.75 "
Tending pumps	4.00 "

Plank Walks:—

Carpenter	4.50 "
Rough Carpenter, 1st	4.25 "
Rough Carpenter, 2nd	4.00 "

Removal of Garbage and Stables:—

Foreman and Supert. Stables	$125.00 per month.
Truck Driver	99.00 "
Sub-Station Men	88.00 "
Labourers and Carters	3.75 per day
Ploughmen and Teamsters	3.75 "

Blacksmith Shop:—

Foreman	5.50 per day.
Blacksmith	4.75 "
Mechanic	4.75 "
Painter	4.50 "
Floorman	4.00 "
Truck Driver	4.00 "
Roller Engineer	5.50 "
Tool Sharpener	4.50 "
B. S. Truck Driver	4.00 "

Paving Plant:—

Foreman	5.00 "
Tankman	4.00 "
Night Watchman	3.75 "

Water Works:—

General Foreman	$140.00 per month.
Pipe Fitters	4.50 per day.
Meter Repairer	4.50 "
Hydrant Inspector	4.25 "
Mechanic and B. S.	4.75 "
Outside Meterman	4.00 "
Caulkers	4.25 "

Miscellaneous:—

Rod and Chainmen	4.00 "

Report of Board in Dispute between the Toronto Street Railway Company and Machinists

A REPORT was received from the Board established to deal with a dispute concerning wages and working conditions between the Toronto Street Railway Company and its machinists. The Board was composed as follows: His Honour Judge R. Ruddy, Junior County Judge of the County of Ontario, Whitby, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other Board members; Mr. H. H. Dewart, K.C., and Mr.

F. Bancroft, of Toronto, appointed on the recommendation of the employers and employees respectively.

The Board made certain recommendations as to the settlement of the dispute, which were accepted by both parties. A minority report was presented by Mr. Dewart.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Toronto Street Railway Company, employer, and its machinists, employees, being members of the International Association of Machinists.

To the Honourable T. W. Crothers, K.C.,
Minister of Labour.

The Conciliation Board appointed by you to investigate this dispute have, at a time and place agreed upon in the city of Toronto, been in session and were attended by Mr. Harry Harper, International officer of the machinists' organization, and James Brent, representing the men; F. L. Hubbard, assistant manager of the Toronto Street Railway Company; D. C. Deacon, foreman of the machine shop, representing the company. In addition the following witnesses were called and examined by the company's representatives:

J. G. Merrick, secretary of the Toronto Employers' Association.

T. Bates, general superintendent of the Canadian Allis-Chalmers.

W. R. McCrea, master mechanic of the Toronto Street Railway Company.

C. Kelso, master mechanic in the Stratford shops of the Grand Trunk Railway Company.

W. H. Randall, superintendent of the waterworks of the city of Toronto; and the following were called by the men's representatives:

P. C. Young, a Toronto employer of machinists.

Alderman Joseph Gibbons, business manager and treasurer of the Toronto Street Railway's Union.

J. H. Nichols, foreman mechanic of the Canadian Pacific Railway shops, North Toronto.

The dispute seems to be confined to the question as to what rate of wages, hours of labour and other conditions should prevail in the machine shop of the Toronto Street Railway Company. It is admitted by the company's representatives that all the men involved are machinists, doing machinists' work. It is also admitted by the company's representatives that these men are qualified machinists, as generally understood by the trade.

Every opportunity and effort were made by the Board to give opportunity to both sides to reach an amicable settlement. It was found necessary, due to the sharp disagreement between the two parties over several important items to the controversy, to proceed with the taking of evidence, with a view to an award being made by the Board. This position was only arrived at after it was found impossible for the two parties to agree.

Considerable evidence was submitted by both sides covering the question of wages, hours, overtime, general conditions, and as to the cost of living.

The company's representatives sought to show that the machine shop of the Toronto Railway Company was not one which could be compared with a machine shop connected with an industry producing commodities for sale. They also endeavoured to compare the machine shop in question with the roundhouses on the steam railways. The men's representatives, on the other hand, sought to prove that the machinists employed by the Toronto Street Railway Company were doing general machine work for the Toronto Railway Company, and also subsidiary companies associated with it, and also doing machine work for other parties distinct from the Toronto Railway Company.

The most careful consideration has been given to the mass of evidence submitted, and a thorough analysis made of the whole situation. The members of the Board who sign this award are convinced that the men's representatives have established by the evidence adduced that:

First—That the men involved are qualified machinists.

Second—That the standard minimum rate in the city of Toronto for machinists is 55 cents per hour.

Third—That the standard working day for machinists in Toronto is nine hours, and that overtime rates prevail after a regular working day of nine hours for five days per week, and half a day on Saturday.

The company's own witnesses to some extent corroborated these claims. It was established by witnesses for the company that the men in the machine shop of the Canadian Pacific Railway and Grand Trunk Railway enjoy a nine hour day and general overtime rates.

In view of all the evidence which has been submitted, and the most careful consideration given to it, and all the claims made by the company for special treatment by virtue of their charter, the Board recommends the following as terms of employment for the men involved, which ought to be satisfactory to both parties:

1. That the minimum rate of wages shall be 55 cents per hour.

2. Nine hours shall constitute a day's work, for the first five days of the week, and four and one-half hours on Saturday, to be worked as follows: From Monday until Friday inclusive, hours to be worked must be between 7 a.m. and 5.30 p.m., and on Saturday between 7 a.m. and 12 noon.

3. All hours worked in excess of this shall be overtime and paid for as follows: From the end of the regular working day until 10 p.m. on the first five working days of the week, at the rate of time and a half. After 10 p.m. at the rate of double time, until workman is finished and goes off duty.

4. On Saturday time and a half shall be paid for 4½ hours after one-half of the regular day has been worked and then double time until workman leaves duty.

5. Double time shall be paid on Sundays and the following holidays: New Year's Day, Good Friday, Empire Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas Day, and in cases when the holiday falls on a Sunday the overtime rates shall be paid on the day on which the holiday is observed.

6. No man shall suffer a reduction through the adoption of the foregoing rates.

7. If any grievance arises between the parties to this contract, the company shall receive a committee of their machinists, and, if possible, to adjust such grievance.

8. In case of a disagreement over the interpretation of this schedule, there shall be no cessation of work until negotiations between the highest representatives of both parties shall have failed to come to an understanding.

9. No discrimination shall be shown against shop committees elected by the men to transact their business.

10. This award shall remain in force for one year, beginning on the first day of June, nineteen hundred and eighteen, unless 30 days' notice be given by either party of a desired change.

11. While this award is retroactive to June 1, and the machinists have been working 10 hours per day during June, we recommend that the tenth hour from June 1 to July 4 be paid at straight time, and after July 4 overtime rates prevail as herein before recommended.

(Sgd.) ROBT. RUDDY,
Chairman.
(Sgd.) FRED. BANCROFT,
For the Men.

Dated at Toronto, this fourth day of July, 1918.

Minority Report

Toronto, July 3, 1918.

Hon. T. W. Crothers,
Minister of Labour,
Ottawa, Ont.

Dear Sir,—

Re Industrial Disputes Investigation Act, 1907, and *re* differences between the Toronto Street Railway Company and certain of its employees, being machinists and specialists, etc., members of the International Association of Machinists.

I beg to submit my report and recommendation in this matter. Your Board, consisting of His Honour Judge Ruddy, Mr. Fred. Bancroft and myself, have held a number of sittings, have heard the evidence of a number of witnesses and listened to very able presentations of the case by Mr. Harper for the machinists and by Mr. Hubbert for the company. We are unable to agree as to the recommendations that should be made.

The nature and cause of the dispute is stated in the application made to your Department as being for "a recognized nine hour day for five days a week and five hours on Saturday"—"overtime rates of time and half, and double time for Sundays and holidays." Also a minimum rate of 55 cents for machinists and 45 cents for specialists.

In support of these claims the efforts made by the parties concerned to adjust a dispute are outlined and references made to the schedule of rates of wages and hours for 1918 which has been adopted by other employers of labour engaged in industrial work. It is quite clear to me that this schedule is referred to and was served upon an officer of the company for the purpose of considering clauses one to eight, both inclusive, which would affect the matters in dispute in regard to which demands have been made which have not been granted. While this document was filed with us no evidence whatever was given in support of it so far as clauses 9 to 19, both inclusive, were concerned, and they are not within the purview of the reference that was made to your Board. It was distinctly understood that the reference related to the wages, etc., of an approximate 20 machinists in the employ of the company. No difficulty was experienced as to the grading of these men or the definition of the word machinist. The so-called "specialists" were not qualified machinists, but only performed some special operation in which they have developed considerable skill, were not made the subject of consideration, and no evidence was offered with reference to them or as to apprentices, or as to any other of the matters referred to in clauses 9 to 19, both inclusive, of the schedule referred to.

Four items are clearly in dispute in regard to which the Board's recommendation should be made under Section 26 of the Act:

(1) The minimum rate of wages per hour;
(2) The hours of labour per day;
(3) The question of week-day overtime, time and half;
(4) Double time for Sundays and holidays;
(5) The period during which any settlement should continue and a date when it should commence.

(1 and 2.) As to the rate per hour and the number of hours per day. These two matters are so correlated that they should fairly be considered together. The machinists base their claim upon the concession made by a large number of employing firms and corporations in February of 1918, under which machinists were conceded a minimum rate of 55 cents per hour both night and day—49½ or 50 hours per week —being practically a nine hour day. Evidence was offered to show that while this was the accepted wage, and a nine hour day in most shops in which machinists were employed, that they were with few exceptions shops in which the industry was one where the added cost of labour was always included in the cost of production and so formed part of the added cost of the manufactured product. It was contended that so far as the railway company was concerned it stood in a different position, having a fixed tariff of fares by statute and being unable by any addition to its tariff to compensate for advances in the rate of wages.

The evidence showed that so far as the Grand Trunk Railway Company was concerned their minimum rate was 43 cents per hour, which Mr. Kelso testified was equivalent to 48 cents per hour actual average for guaranteed production. Mr. Nichols, machine shop foreman for the Canadian Pacific Railway Company at West Toronto, testified that the minimum rate of wages with their company for machinists was 43 cents an hour. Mr. Thomas Bate, of the Canadian Allis-Chalmers Company, formerly with the Canadian Pacific Railway, gave important evidence. It appeared that there were compensations coming to the men in certain branches of the Canadian Pacific Railway service, so that machinists actually made considerably higher wages than the minimum by reason of a semi-contract system for repairs. Having regard to the two branches of work in the Canadian Pacific Railway shops at Angus, Mr. Bate testified that the street railway company's machinists were more in line with the repairs shop of the running track, where the men worked ten hours a day, while there were men in the back shop who only worked nine hours a day. He did not think that a man working in a street railway shop should get the same pay as in an ordinary manufacturing shop, because the ordinary manufacturer can add the raise in wages to the cost of his product and the consumer pays the increase. He testified that they calculated on the increase in wages in figuring on a contract and that the street railway company should get an increased fare. This under the contract is, of course, impossible. This clearly affects the hours of labour. In addition, there is the fact that under the agreement made by the Toronto Railway Company with its employees last year the ten hour day is recognized and binding upon workmen who practically work alongside of the machinists who are now asking the nine hour day. This condition will continue until the existing agreement with the Toronto Railway Company's employees expires in June of 1919.

The high cost of living in Toronto and the increase that has been granted to machinists in shops where they are not working on the same conditions as in the Toronto Railway Company's machine shop must be taken into consideration as factors in the labour market so far as machinists in question are concerned.

I consider that the evidence justifies the Board in finding that the fair settlement of the questions, both of wages and of the hours of labour, will be:

That the approximately 20 men who are involved, or those who take their places as qualified machinists, shall receive as a minimum rate of wages 55 cents per hour.

That nine hours shall constitute a day's work for the first five days of the week and five hours on Saturday.

(3 and 4.) The conditions under which the Toronto Railway Company operates its service make it entirely different from an ordinary manufacturing or industrial concern. The railway service is operated continuously day and night—week day—Sunday and holiday—alike at a fixed schedule of fares, which is reduced during certain hours of every day and on Sunday.

Upon the question of overtime I am therefore of the opinion that, conforming to the existing conditions in the Toronto Railway's service, the following will be a fair adjustment:

That all hours worked in excess of nine hours per day shall be considered as overtime and paid for the tenth hour at a rate not less than the minimum flat rate of 55 cents per hour.

On Sundays and holidays upon the same scale as upon week days, subject to the provision that no man shall be required to work more than six days in any one week.

That the terms of the award shall be accepted for a period of one year from the first June, 1918, and be binding upon both parties.

Yours faithfully,

(Sgd.) H. H. DEWART.

Report of Board in Dispute between Canadian Pacific Railway Company and Dining Car Employees

A REPORT was received from the Board established to deal with a dispute concerning alleged discrimination against the union and the replacing of white employees by negroes imported from the United States between the Canadian Pacific Railway and its dining car employees of the Western Division. The Board was composed as follows: the Honourable Mr. Justice W. A. Macdonald, Vancouver, chairman, appointed by the Minister of Labour in the absence of a joint recommendation by the other Board members; Mr. Victor R. Midgley, Vancouver, appointed on the recommendation of the employees, and Mr. E. A. James, Vancouver, appointed by the Minister in the absence of a recommendation from the company.

The Board's report found that while coloured men were brought into Canada by the company for use on dining cars in place of white employees the change was not an act of discrimination against the union. A minority report was presented by the nominee of the employees.

The report was not formally accepted by either party, but the enquiry is understood to have had a beneficial effect and no cessation of work was reported.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of the differences between the Canadian Pacific Railway and its Dining Car Employees on the Western Division.

To the Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ont.

A Board of Conciliation and Investigation was constituted in this matter, consisting of the Honourable Mr. Justice W. A. Macdonald, chairman, appointed by the Minister of Labour, Mr. Victor R. Midgley, representative of the employees and Mr. E. A. James representative of the Company, appointed by the Minister of Labour.

The majority of such Board expresses a regret that there could not be unanimity in the conclusions, and begs to report as follows:

In the application for a Board, the nature of the dispute was stated to be: That white employees of the Dining Cars, between Vancouver and Calgary, were being discharged by the company and replaced by negroes imported from the United States and that the employees applying for the Board were being discriminated against, because of their membership in the Brotherhood of Railway Employees. Although the complaint, thus outlined, is apparently two-fold, still, the gravamen of the dispute comes within the Statute and consists of the alleged dismissal or refusal to further retain, in the service of the company, this particular class of employees on account of such membership. It was not, and could not be conetnded, that there was any right or agreement on the part of the employees for continuous employment or that the company could not, without notice, discharge any, or all, of such employees at any time on due notice. It was thus a pure question of discrimination or otherwise, submitted to the Board for its decision. A number of discharged employees gave oral evidence and this was supplemented by affidavits and declarations to the same effect. The evidence established beyond a doubt, and it was practically uncontradicted, that in April, 1918, after officials of the Canadian Pacific Railway Dining Car Department on the Western Division were informed that the employees of the dining cars were becoming members of a Union, a further investigation was held and established the truth of the information. Those inquiries took place at Winnipeg, Calgary and Vancouver. It was found that a great number of such employees had joined this Union at Vancouver. Dealing particularly with Vancouver, Mr. Tingley, Superintendent of the Dining Cars at that point, had advised Mr. Matthews, his superior officer, that he proposed to find out all about the organization. He was instructed to go ahead and Mr. Matthews told him that the company did not want any such organization in the Dining Car Department and would discourage it all they could. This was the course pursued in interrogating the men upon coming to his office. Similar feelings of opposition to the Union were entertained and openly expressed by Mr. Fraser, superintendent at Calgary, and Mr. Simpson, superintendent at Winnipeg. Mr. Tingley was quite frank in his evidence in this connection. He admitted that he had done what he could to discourage

men from becoming members of the Union, though he would not discharge them for joining and that personally he had no objection to Unions, but in this instance he believed that the policy of the company was opposed to such a Union. He had years of experience with dining car employees and said that an organization which would include the stewards with waiters and cooks, and be linked together by bonds secret or otherwise, would be a handicap and destroy the discipline which was essential for proper service. The employees were told by Mr. Tingley, and other officials, that the company would not recognize the Union and that rather than do so it would either replace the white dining car employees with colored or Oriental help or employ women in their stead, or, as a last alternative, would do away with the dining cars altogether on certain portions of the line and arrange for eating houses. Before the company was called upon, or requested, to recognize this Union the situation changed and a large number of colored dining car employees were engaged and brought into Canada from the United States. They were distributed by the company over its Western lines, but practically took the place of all the white employees on that portion of the line between Calgary and Vancouver. While the dining cars running out of Winnipeg were only partially changed, so that now 50 per cent of such crews are manned by white and 50 per cent by colored employees, though in some cases the cars have white cooks and colored waiters. On its face, it would thus appear that the "discouragement" given by the superintendents to the white dining car employees not having proved effectual to dissuade them from joining or ceasing to be members of the Union, that the company had implemented its intentions by pursuing one of the courses indicated. The company contends that such a belief is not well-founded and that, as a matter of fact, it was simply following out a policy formulated in February, 1918, of introducing colored help. The events prior to, and surrounding, the interviews of April, 1918, are inconsistent with this being the true position of affairs. The change followed so shortly after the company, through its officials, had openly declared its opposition to the contemplated organization that one might fairly conclude that the change was not in pursuance with any settled policy in the interest of the company or its passengers, but resulted from the employees joining the Union. The change was one of those mentioned as likely to occur in the event of the organization being perfected and calling for recognition. While the change was rahter an important one, there is a lack of correspondence in connection with the policy stated to have been adopted until after the interviews took place with the employees in April. Then a telegram was produced showing an inquiry from Mr. Matthews to Mr. Tingley, as to obtaining colored help in Seattle. This was followed by a confirming letter, but neither documents referred to any previously settled policy being then brought into operation. It was suggested, as a reason for such policy not being clearly declared and made known, in advance of its actual introduction, that such publicity might cause disruption amongst the dining car employees and not impair the efficiency, but seriously affect, if not completely destroy, the service for a period at any rate. Then again it was pointed out that if the policy of introducing colored help had been decided upon in February, and was known to Mr. Fraser, the superintendent of the Dining Department at Calgary, in March, he would have informed the employees of such change as an event that would actually happen and not that probably might happen, when the summer traffic took place. A letter, however, from Mr. Fraser to one de Pasquale, of Seattle, showed that on the 19th of April, 1918, he was still desirous of obtaining white help, and it was not until the following month that he informed de Pasquale that coloured help was being utilized and that he need not come to Calgary to re-enter the company's service. It is worthy of mention that by the latter month the company, through Mr. Fraser, had been enabled to obtain very extensive colored help and it may have been greater than was expected. It was contended that there was proof of the discrimination because the colored help was almost entirely utilized at the Coast, where the membership was much stronger than in the Prairie Provinces, but it was stated that this course was in pursuance of the usual practice of railroads, where changes take place, to send the requisite supply of material, or men, as the case may be, first, to the farthest point. Then before a complete change from white to colored help took place, so as to affect the Prairie Provinces the same way as the Coast, the application for a Board of Conciliation was filed and the Company may have decided to comply with the Statute and not make any further changes until the report of the Board had been made. There are other presumptions which need not be enumerated, tending towards the conclusion that the change complained of arose through the course taken by the employees. If such presumptions stood alone and uncontradicted, they would, in our opinion, not only warrant the application being made for a Board on the ground of discrimination, but would bring us naturally to the conclusion that the complaint was well-founded. We are met, however, with the flat contradiction of Mr. Matthews, and the suggestion that the events thus following one another as they did were simply coincidents. He firmly denies the allegation that the employees replaced by

colored men were discriminated against through being members of a Union and swears that in fact there was no discrimination. In other words, that in pursuance of the policy decided upon in February, 1918, it was deemed advisable in May to inaugurate the change and most of the white employees, having no right to continued service, were consequently discharged from the dining cars upon receiving two weeks' wages in lieu of notice. It was shown that some of these were reengaged, others promoted and a small number entered the service of the company in other employment. In considering the complaint, and the evidence to support it, we require to bear in mind that where certain events are proved to have occured and certain inferences are naturally and logically to be drawn therefrom, still, that these are only presumptions of fact and are always rebuttable. The question is, does this contraction of Mr. Matthews, corroborated by Mr. Fraser, offset and destroy such presumptions. The burden rests with the employees of proving their assertion as to discrimination and there is no direct evidence that when the change took place it was on account of a large number of the employees thus affected having joined the Union. In order to consider the position, as to the help that would likely be available for the dining cars in the summer of 1918, it is necessary to review the situation as it had existed in previous years. It appears that the summer passenger traffic increases from 25 to 35 per cent over the winter traffic. This necessitates the use of additional dining car employees. They were supplied by bringing in colored men in the summer of 1916 and also during the Christmas holidays of 1917. But in the summer of 1917 an effort was made to carry on the dining car service with a reduced staff. This proved unsatisfactory both to the company and the public. Steps were taken to avert a like result in 1918. Statements filed show that dining car employees are migratory in their disposition and frequent changes take place which militate against efficiency. For example, between January 1st and April 30th, 1918, on the western line there were 64 per cent of the regular crew lost to the service. Sixty-two per cent of a loss occured in British Columbia District and 94 per cent in the Alberta District This is better exemplified by the fact that 305 men were required for the regular crews during this period and that in the meantime 186 men left the service of their own accord. This condition of affairs during recent years must have been very unsatisfactory to the management. The assertion that many discussions took place, to grapple with the situation, seems reasonable. It was suggested that women might be employed instead of men. This was favored in Montreal, but opposed by the officials in Winnipeg. Mr. Matthews states that he supported the scheme of introducing colored help prior to February, 1918, and in that month, after consultation with Mr. Grant Hall, Vice President and General Manager of western lines, the policy of introducing such labour was definitely decided upon by them, to be applied to such portion of the railway. It does not appear that the higher authority in Montreal approved of such policy, because as late as the 22nd of April, 1918, the substitution of eating houses for dining cars on certain portions of the line was advocated. This is proven by the fact that a schedule of a service of this kind was submitted to Montreal, but the scheme was found impracticable. Then it was that Mr. Fraser was instructed to proceed to the United States and employ colored help for the dining cars. Mr. Matthews made an explanation of the reason why the policy decided upon in February was not brought into operation until the end of April. It is reasonable to suppose, that if the policy was decided upon in February, it would not be made public until the company was ready to make it completely effective. In corroboration of Mr. Matthews' statement that upon such policy, having to this extent being decided upon, between Mr. Grant Hall and himself. Mr. Fraser state, under oath, that on the 16th of March Mr. Matthews told him that it had been definitely decided to employ such colored help, and that by the end of the summer all the dining car employees would be manned by colored men. If this evidence be accepted, it is strongly corroborative of the statement made by Mr. Matthews as to the policy of the company having been previously determined. Mr. Hall was not called as a witness to show when the policy was adopted, even so far as it could be, without confirmation in Montreal. A telegram was received from him, but it did not cover the point. A request was made at the close of the evidence by the representative of the company to admit a further telegram more directly bearing upon the subject. In view of the discussion that had taken place this application was refused and such representative declined to make an application for an adjournment for the purpose of Mr. Hall being present to give oral evidence. He stated that Mr. Hall had an enormous amount of important work on hand which occupied his time, and the adjournment that might be asked for would be considered unreasonable. He was pressed again, however, to decide whether he wished to have Mr. Hall called as a witness for the purpose of corroborating the statement of Mr. Matthews, as to when the policy was decided upon. The representative, however, did not think it was of sufficient importance, nor necessary, in order to prove the case from the standpoint of the company, so an adjournment was not sought. In considering our report, when this important feature came up for discussion, it was suggested that an adjournment might even still take

place, so that the Board might itself call Mr. Hall as a witness. In view of what had taken place already in this connection, as the Board was not unanimous in pursuing such a course, the majority did not deem it advisable to pursue it further, so we have to deal with the evidence without any assistance that might have been afforded by Mr. Hall. We also must consider the suggestion that the reason for his absence is that he could not afford any assistance nor corroborate Mr. Matthews.

Then, under these circumstances, are we to disbelieve the emphatic statements of Matthews as to the time when the policy was decided upon? Bearing in mind that the detailed operation of the policy is not so much complained of as that it is brought into play, without a prior decision to that effect, and is simply aimed at the proposed Union of the employees.

Mr. Simpson, as corroborative of Mr. Matthews' evidence, stated that he had a discussion in February, 1918, as to the utilization of colored employees and that Mr. Matthews had then said that he was trying to have the colored men to replace the white help. Mr. Tingley also stated that in February, 1918, Mr. Matthews told him that it had been decided to supply the company's demands with colored help.

We have already referred to the fact that the complaint of the employees is founded on strong presumptions giving it great support, so we must decide whether these presumptions have been rebutted by the positive statement of Mr. Matthews to the contrary, coupled with the corroboration in the manner indicated. Such statements had reference to matters upon which the party making them could not be mistaken. Mr. Matthews did not treat the decision arrived at in February, as far as the western management was concerned, as one of simple discussion, but as a final determination on their part. Honesty of words and acts is taken for granted until the contrary is shown. Did Mr. Matthews, however, falsely state what he knew to be untrue? There is no direct evidence to the contrary, it is only circumstantial, based on presumption. Does his loyalty to the company, and the desire for it to succeed in its contention in this matter, go so far as to destroy his sense of right and wrong and to disregard the sanctity of his oath? — The same remarks apply to Messrs. Fraser, Simpson and Tingley. — It is not likely that persons would act in the reprehensible manner suggested in a matter in which they are not personnally involved. Are these men exceptions? We feel that we should not decide. We believe that the presumptive case made by the employees, on whom the burden rested, has been rebutted by the sworn statements of Mr. Matthews, clearly corroborated by Mr. Fraser, and partially so, by Messrs. Simpson and Tingley. The result is a finding by the majority of the Board that while colored men were brought into Canada by the company for use on the dining cars of the Western Division, in place of white employees, that this change was not intended to be, nor was it, an act of discrimination against the Union to which a large portion of the Dining Car employees had become attached. It was simply in pursuance of a policy, to that effect, decided upon in February, 1918, though only brought into operation in the month of May.

Dated at Vancouver, this 19th day of July, 1918.

(Sgd.) W. A. MACDONALD,
Chairman.

(Sgd.) E. A. JAMES,
Representative of the company.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of the differences between the Canadian Pacific Railway and its Dining Car Employees on the Western Lines.

Labour Temple,
Vancouver, B.C., July 23rd, 1918.

Hon. T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ont.

Dear Sir,

The minority of this Board regrets its inability to agree with the conclusions of the majority, and begs to report as follows:

The question to be decided by this investigation was, as stated in the majority report, whether the employees of the dining cars were discharged and replaced by negroes, because of their membership in a labour organization.

It was clearly established by the men and admitted by the company's officials, that in April, 1918, after the company's officials became aware that a labor union was being formed among the dining car employees,— the superintendents at Winnipeg, Moose Jaw, Calgary and Vancouver interviewed the crews of the dining cars and questioned them as to their membership in this union.

The interviews at these different points were practically identical as to the conversation that took place, in as much as the men were informed or threatened by the four superintendents, Tingley, Fraser, Willard and Simpson, that rather than recognize the union, the company would replace the white men with women, colored help, orientals, or build eating houses along the line; clearly establishing the fact that this 'discouragement' was a previously determined policy of the company.

The organization of these men commenced at the end of February; the interviews were held in April—8th to the 14th, and the men were replaced by colored help at the beginning of May. The colored help was engaged between the last few days of April and the 8th of May.

The company's officials admitted that their policy was to discourage organizations among their employees.

The inferences to be drawn from these undisputed facts, as stated in the majority report, "if uncontradicted, would bring us naturally to the conclusion that the complaint was well founded."

The majority of the Board, however, consider the denial of discrimination made by Mr. Matthews and his declaration that the change from white to colored crews was in pursuance of a policy decided upon in February, 1918, disproves the contention of the men that the change was made because they became members of a labor union.

Mr. Matthews, General Superintendent of the Dining and Sleeping Car Department of the Canadian Pacific Railway Company's Western Lines, in his evidence before the Board, stated that the help situation on the dining cars had been the subject of numerous conferences between himself, Mr. Grant Hall, and others at Montreal, Winnipeg, and other places; that superintedent Fraser had been sent in January, 1918, to a number of the large cities in the United States to investigate the possibility of securing help, and that in February, 1918, it was definitely decided to substitute the white men on the dining cars by colored help.

It was contended by the men that out of all the conferences that had been held by the officials of the company on the subject of dining car help, some correspondence must have arisen, and they argue that it is the custom of large corporations like the Canadian Pacific Railway Company, to exchange a considerable amount of departmental correspondence and to write letters confirming conversations and telegrams. This contention appears to be strongly supported by the only document relating to colored help that the company produced. This was a telegram from Mr. H. F. Matthews, of Winnipeg, to Mr. Tingley at Vancouver, and which was followed by a circular letter addressed to Fraser and Tingley confirming the subject matter of the telegram; and the letter-head shows by the words "Inter-Department Correspondence," that such a custom does exist.

Now the representatives of the men contended, and I think justly, that if no such correspondence existed, it was reasonable to believe that the policy to change from white to colored crews had not been decided in February, 1918; or if on the other hand the correspondence did exist, the company dared not produce it because it would show that the colored men had been introduced because the white men had joined a labour organization.

The telegram and letter referred to are quoted below:

(Telegram from H. F. Matthews to F. A. Tingley, Vancouver, dated at Winnipeg, April 15th, 1918.).

> "What is your dining car help situation for the present. It is our intention as more men or additional crews required, to use colored help. Could you secure a satisfactory colored crew or more in Seattle if required, or would they have to be sent from here."

(Letter from H. F. Matthews to D. S. Fraser and F. A. Tingley, dated at Winnipeg, April 17th, 1918, File A.McG.)

"Canadian Pacific Railway Company, Inter-Department Correspondence.

> "As advised you in my cipher wire 15th inst., the intention hereafter is, as additional crews are required, or as we become short of help and additional men are required for existing crews, to engage and work in colored help, and in figuring requirements for summer train service, figure on using colored help for any additional crews, also as the white help becomes scarce rather than reach out for more white help to keep the present cars crewed, figure on keeping a certain number of the cars crewed with white, by doubling two crews into one when possible, and put a complete colored crew on to a car. It will be necessary for you to give a week to ten days notice of requirements for the colored crew, to secure and send them on to you."

It should be noted that the dates of these communications, April 15th and 17th, are subsequent to the date the men were interrogated by the superintendents as to their union membership.

The majority report states that: "Mr. Fraser's evidence is strongly corroborative of the statements made by Mr. Matthews as to the policy of the company having been previously determined. Mr. Fraser, under oath, satted that on March 16th, 1918, Mr. Matthews informed him that it had been definitely decided to employ colored help, and that by the end of the summer all the dining car employees would be manned by colored men."

Yet we find on April 19th and May 22nd, Mr. Fraser wrote the following letters:

(Letter from D. S. Fraser to Mr. Tony DePasquale, 211½, 7th Avenue, Seattle, Wash., dated at Calgary, April 19th, 1918, File No. A.)

"Your letter of the 14th of March addressed to Mr. Evans, has been wandering around for some time and finally came to hand.

"I note you were ready to start back to work about April 1st, and also note that you could pick up some men in Seattle. We are not requiring any men just at present, but you might get their names and addresses and we may want some around the first of June, and if there are none available here, we might look them up.

"I enclose you a letter addressed to Mr. Tingley, which you will present to him; he will furnish you transportation from Vancouver to Calgary. It will be necessary for you to arrange your own transportation from Seattle to Vancouver."

(Letter from D. S. Fraser, to Mr. Tony DePasquale, 211½, 7th Avenue, Seattle, Wash., Dated at Calgary, May 22nd, 1918, File No. A.)

"I am in receipt of your letter of April 29th, but as I have been away for the past month, have only just received the same.

"As the company in the meantime has decided to change the service from white to colored help, there will be no opening available for you here.

"I have received, through the General Office, the Interim Certificate for your $50.00 Victory Bond. These Bonds will be issued by the Government in a short time now and it will be necessary for you to sign receipt for same when issued, or authorize someone to do so for you. When I hear from you again as to whether you are still in Seattle, and if you wish me to send these papers on, will send them to our General Agent there, where you may obtain same."

Now if Mr. Fraser was aware, as he stated on oath before the Board, that the company had definitely decided to employ colored men, on March 16th, why did he invite a former employee to bring white men from Seattle on April 19th, and then in a letter, May 22nd, state, "the company in the meantime has decided to change from white to colored help?"

This proves that the policy was decided between April 19th and May 22nd, 1918, after the company had discovered that the dining car employees were joining the Brotherhood of Railway Employees.

Mr. Grant Hall was referred to a number of times in the course of the evidence by Mr. Matthews as having been present at numerous conferences at Montreal and Winnipeg when this question of colored help was being discussed, and was stated to have been present when the policy of employing colored help was decided definitely in February. Mr. Grant Hall was not called as a witness and the only statement from him produced before the Board, was the following telegram:

(Telegram from Grant Hall to E. A. James, Vancouver, dated at Winnipeg, July 6th, 1918):

"In connection with employment of colored help on our dining cars: this matter has been receiving more or less consideration for a year or more owing to the difficulty in securing and keeping white help; furthermore I was spoken to frequently by public about use on our dining cars of young white men whom it was felt were required at other necessary and more important work; the matter became so aggravated in early spring this year that something had to be done; the employing of women was seriously considered but the idea was given up for obvious reasons, namely inability to provide proper sleeping quarters; we are employing women on our B. C. Lake boats where it is possible to provide proper sleeping accommodation; the only alternative therefore was to engage colored men who seem more adaptable to that service, and instructions were accordingly given to Mr. Matthews to bring about the change."

This wire does not state when the instructions were given Mr. Matthews to engage colored men, and this is the vital feature of the case. It cannot be said that the company did not have an opportunity of calling Mr. Grant Hall, or of obtaining affidavit from him, because the application for the Board was made on May 11th, and the first session was not held until the end of June. The Board was adjourned from July 3rd o, hte 8th and an extended adjournment was given on the application of the Canadian Pacific Railway Company, to July 15th.

Also, the Chairman repeatedly pointed out to the representative of the company, the advisability of calling Mr. Grant Hall, or securing an affidavit from him, bearing on this important point, as to when the policy of the company was decided upon.

At the conclusion of the evidence, the chairman of the Board made the following observation, in a discussion with Mr. Peters:

"The Chairman:—Perhaps I am too much of a judge in this matter, and am looking at it from that standpoint and measuring up the weak points, but I cannot help but see it is a line of weakness when a man comes forward like Mr. Matthews — and when he says his line of policy was adopted in February, and he has not any letters showing that they went to Montreal, but he says that he conferred with Grant Hall and he approved of that policy, and Grant Hall is not here, and Mr. Hall sent a tele-

gram which does not cover the point at all; and I would think you as a clever man, Mr. Peters, would see the weakness of that position.''

The Chairman later asked Mr. Peters, the representative of the Canadian Pacific Railway, point blank, if he wished to have Mr. Grant Hall called as a witness to corroborate the statements of Mr. Matthews as to when the policy was decided upon. Mr. Peters replied that he did not think it was of sufficient importance.

Mr. Tingley's evidence before the Board could not be claimed to corroborate the evidence of Mr. Matthews, as in an affidavit sworn to on May 15th, in reply to the men's application, Mr. Tingley makes some statements that do not agree with his evidence before the Board, as, for instance, where he states in his affidavit that ''the Railway Company say as to whether the men are members of the union or not, it has no knowledge;'' while before the Board he admitted having conducted an investigation in the early part of April, with a view to finding out how many men had joined the union, and in an endeavor to 'discourage' organization.

One very important point that must be borne in mind when considering Mr. Matthews' honesty, is the question that naturally arises: If the company had definitely decided in February, 1918, to replace all the white men on the dining cars with colored, before the end of the summer, why did Messrs. Matthews, Tingley, Simpson, Willard and Fraser go to the trouble of discouraging the organization of these men?

If such a policy had been definitely decided upon at that time, why did not the company's officials so inform the men, instead of threatening them with a recital of various alternatives that would be tried if they persisted in their membership in the Brotherhood of Railway Employees.

The majority report states: ''Does his (Mr. Matthews') loyalty to the company and desire for it to succeed in its contention in this matter, go so far as to dsetroy his sense of right and wrong, and to disregard the sanctity of his oath? The same remarks apply to Messrs Fraser, Simpson and Tingley. It is not likely that persons would act in the reprehensible manner suggested, in a matter in which they are not personally involved.''

I submit that it is clearly established as far as Mr. Tingley is concerned, that he did violate the sanctity of his oath when in the affidavit above referred to he swore to things which he knew to be false.

Mr. Simpson's evidence it not very clear on this question as to when the policy was decided upon, and I have already disposed of Mr. Fraser's evidence on this point.

That the Chairman of the Board is entirely lacking in an understanding of the reasons actuating men in joining a labor union, and devoid of sympathy with them in their complaint of discrimination, is demonstrated in the following questions addressed by the chairman to witness George Hepburn. (These questions are taken from the transcript of the evidence furnished by courtesy of the Canadian Pacific Railway Company.)

The Chairman: Q.—What was the object of joining the Union, what was the idea? A. Well, to better our conditions.

Q.—Was there any trouble on between you and the Railway Company? I don't mean you, but between the waiters and the railway company? A. Well, the men were not satisfied with the small money they were receiving.

Q.—Why didn't they leave? Why weren't you satisfied to be discharged then, what was the trouble? A. Well, then—

Q.—What is the real trouble, are you spokesman enough to say what is the trouble? You were not satisfied, you got discharged, now you have got this inquiry, what is it? A. Well, the men wanted better conditions, and they didn't like being replaced by black labor as Canadians and white men, as far as I knew.

Q.—But you are an intelligent man, is there any vested right to make the company employ you or any person if they don't want to keep you? A. Well, that is about the only big employing concern in Vancouver.

The Chairman: Is that your stand, Mr. McVety?

Mr. McVety: No sir; I am rather amazed at your line of questioning, sir. You raised the whole question as to the right of the men to organize.

The Chairman: I am not raising any question at all in that way, but I want to know what the trouble is, why they are worrying about a thing like this. They were dissatisfied, they got discharged, now they are complaining.''

There were a number of returned soldiers (some six or eight) among those who were discharged to make room for negroes, and it appears that a large number of men formerly engaged in the dining car service have enlisted or been called up under the Military Service Act. Putting aside entirely for the moment, the question of discrimination, what will be the thoughts of these men when they learn that the jobs formerly held by them have been permanently filled with negroes, while they were shedding their blood and risking their lives in the defence of the Empire of which the Canadian Pacific Railway Company forms no small part?

It should be pointed out here that the men do not object particularly to the importation

of negroes as much, but would have objected just the same if white men had been imported to replace them.

Having regard for the evidence of the employees and the officials of the company that the men were threatened and warned against joining a union, and that the witnesses for the company freely admitted the hostile attitude of the company to any form of organization among the dining car employees, and keeping in mind that the company failed to produce any correspondence on the question although repeatedly requested to do so, and claimed that no correspondence existed, I believe that these facts more than meet the unsupported evidence of Mr. Matthews that the policy had been decided earlier than April and that the employees have made out a prima facie case of discrimination because of their membership in a labor organization.

The Government should therefore at once deport the aliens imported to make the discrimination possible, and insist on the immediate restoration of the employees to their former positions.

Respectfully submitted,

(Sgd.) VICTOR R. MIDGLEY,
Board member representing the employees.

REPORT OF ROYAL COMMISSION APPOINTED TO ENQUIRE INTO DIFFERENCES BETWEEN METAL CONTRACT SHOPS AND AUTOMOBILE REPAIR SHOPS AT WINNIPEG, AND CERTAIN OF THEIR EMPLOYEES

EARLY in June the Winnipeg Metal Trades Council, comprising various metal trades employed in metal contract shops and in automobile repair shops in the city of Winnipeg, presented a new agreement calling for increased wages and improved working conditions. A few firms accepted the agreement, but most of the shops concerned refused to consider the agreement or to hold negotiations with the Metal Trades Council. Information was received that a strike was imminent and the Minister took action immediately to bring the parties together, Mr. R. S. Ward, of Winnipeg, representing the Minister for the purpose. An immediate cessation of work was prevented, but no agreement could be secured. There being numerous employers concerned the Industrial Disputes Investigation Act was inapplicable and the Minister secured the appointment on June 26 of a Royal Commission under the Enquiries Act, composed as follows: The Honourable Mr. Chief Justice Mathers, Judge of the Supreme Court of Manitoba, Chairman, Mr. George Fisher, manager of the Scottish Wholesale Co-operative Society and F. G. Tipping, president of the Winnipeg Trades and Labour Council. The Commission at one time adjourned its public sittings and the members endeavoured by private negotiations to bring about a satisfactory arrangement. These efforts proving unsuccessful sittings were resumed. On July 22, the Commission being still in session, the employees ceased work, some 45 firms and about 1,000 men being affected; at the end of the month the strike was still in existence. The report of the Commission follows:

Report of Commission

To the Honourable Thomas W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ontario.

The undersigned commissioners, appointed by Royal Commission, issued the twenty-sixth day of June, A.D. 1918, to inquire into and concerning causes of friction and unrest alleged to exist between the metal trade contract shops employers and the automobile repair shop employers and their employees, in the city of Winnipeg, respecting wages, piece-work and working hours, and overtime, and other labour conditions, and into the nature and causes thereof, report as follows:

Your telegram to the chairman of the Commission, advising us of our appointment, was received on the twenty-seventh day of June, 1918, and on the following day we held a meeting with the representatives of the employers and the employees for the purpose of outlining the procedure to be followed in the proposed inquiry. The desire was expressed by the representatives of both parties that the proceedings should be open to the public and should be reported stenographically, and William F. Perkins was employed for that purpose.

The chief contract shop employers represented at the first meeting were: the Vulcan Iron Works Company, Limited; the Dominion

Bridge Company, and the Manitoba Bridge and Iron Works Company; the Alaska Bedding Company; the Stewart Sheaf Loader Company; the Northwestern Brass Company, and the Stuart Machinery Company.

The employers announced their intention of being represented by counsel. The representatives of the employees objected that the presence of counsel should not be permitted. Our view was that we could not arbitrarily refuse to any of the parties the right to present their case through whatever medium they might choose to employ, and we decided that any of the parties were at liberty to employ counsel if they saw fit to do so, a ruling in which the employees' representatives acquiesced.

In order that all parties should be free from embarassment in the conduct of the inquiry, we decided that the proceedings should be conducted informally; that any party appearing before us would be permitted to make his statement without oath, and in such manner as he saw fit, and that there should be no cross-examination in the ordinary sense of that term, but that after any party had concluded his statement the other side would be at liberty to ask any questions directly bearing on or relative to the subject of the inquiry.

Having arranged these preliminaries, we appointed June 29, at 10.00 o'clock in the forenoon, for the purpose of proceeding with the investigation. At that time we were attended by Mr. Pitblado, K.C., and Mr. Hugg, K.C., as representing the contract shop employers, no person appearing for the automobile repair shop employers, and by Mr. R. B. Russell, business agent for the Machinists; J. A. McClelland, International vice-president of the Machinists; R. C. McCutcheon, representing the boilermakers and bridge shop men; William Ferguson, representing the patternmakers; J. T. Adair, representing the moulders; J. L. McBride, representing the electricians, and E. Robinson, representing the blacksmiths.

The demands of the men are contained in the following two agreements presented for signature to the contract and automobile shops respectively:

AGREEMENT.

This agreement, made and entered into this ..... day of ....., 1918, by and between the ..... and the Metal Trades Council of ..... and vicinity.

1. That each party to this agreement herein made agrees and consents to the following rules and regulations, which shall govern the mutual relations of the parties hereto mentioned.

2. Eight (8) hours shall constitute a day's work, from 8 a.m. to 17 p.m., with one hour off for dinner between 12 noon and 1 p.m. for the first five days of the week, and from 8 a.m. to 12 noon on Saturdays.

3. (a) All time worked over bulletin hours will be considered overtime, and will be paid for at the rate of doub'e time.

3. (b) Regular night shifts in shops or outside repair work shall be nine hours per night, five nights per week, and shall be paid for ten hours per night.

3. (c) Should a man be working during the day, then be transferred to a night shift, he shall receive the regular rate of overtime for the first night.

4. All grievances which may arise in any shop shall be given consideration as follows: (1) all complaints and grievances to be adjusted by the foreman in charge, if possible; (2) when such adjustment cannot be made between the foreman and the craft directly interested, the matter will be taken up with the company direct, by the business agent and the committee representing the craft having the grievance, and they shall endeavour to reach a mutual understanding; (3) in the event an understanding cannot be reached by the company and the representatives of the craft involved, a committee of representatives from the Metal Trades Council will meet the company and try to bring about an adjustment of the grievance; and in the meantime there will be no lockout on the part of the company or strike on the part of the men.

5. That business representatives of the different crafts shall have free access to the shops at all times, provided they do not interfere or cause the men to neglect their work.

6. (a) Mechanics and all other help shall be hired through the representative organizations; provided, that in cases of emergency the company may hire help, direct, and shall furnish a list of the names and the class of work of those employed to the business office of the organization having jurisdiction over them, within twenty-four (24) hours after their employment.

6. (b) No employee representing his fellow-workmen will be discriminated against.

7. Men receiving rates in excess of the minimum rates herein quoted will suffer no reduction, and will share in the general increases agreed to.

8. This agreement will remain in effect for one year, except that wage rates will be revised every three months, according to the official information on the cost of living.

9. Apprentices shall serve four (4) years, and during said term shall be advanced in all branches of the trade. The ratio of apprentices shall not exceed one for the shop at large, and one for every five journeymen regularly employed.

10. (a) Patternmakers—shall be any person who has served an apprenticeship at patternmaking.

(b) Moulders—shall be any person who has served a regular apprenticeship, or has had four years' varied experience at the trade.

(c) Blacksmiths—shall do all welding by forge, furnace, electric, thermit or acetylene process—all work previously done by blacksmiths—forging, tempering and dressing of tools, case hardening, potash or bychloride tempering, bending and straightening of angle iron, 1 iron channel iron and 1 beams. Any man doing the above work or other work appertaining to the blacksmith trade shall be considered a blacksmith and shall receive the blacksmith rate.

(d) Boilermakers. (1) Boilermakers, bridge shop men and tank men and street railway workers—work consists of testing, laying-out, fitting-up, patching, rivetting, caulking, staybolting, tender, and all tank work, and all work contracted for boiler and contract bridge shops—all acetylene and electric welding. All men coming under this classification shall not receive less than 75 cents per hour.

(2) Specialists' work consists of grate work; punch and shears; multiple and radial drill machines; air motors, screwing machines; nut tapping; grinders; saw operators; reaming; cutting and handling of all flues, and tubes; holders on; switch repairing; bolting together of still or iron rails for street railway; binding rails; cutting rails with hand only. Men doing this class of work to be paid not less than 65 cents per hour.

(3) Helpers' work consists of striking on all handle tools; scaling boilers and tanks; painting interior of tanks where no painters are employed; and generally assisting the mechanic to complete the work —also rivet-heating. Men doing this class of work to be paid not less than 56¼ cents per hour.

(e) Electricians. Men who have served an apprenticeship to the electrical trade or had four years' varied experience in the following branches shall be classed as electricians—armature and coil winding; battery work; lighting systems; power systems, and maintenance of same.

Helpers will be men who assist electricians, but do not use the tools.

(f) Machinists. Machinists' work will consist of the operation of lathes, planers, slotting, milling, shaping, boring or other machine tools requiring skilled operation; laying off work and making and repairing of tools and machinery. Men employed on drills and work not included above, which only requires a portion of skill, shall be designated specialists. Helpers will be men who assist machinists but do not use the tools.

(g) Apprentices' rates: 20 cents per hour for the first year and five cents (5c) per hour increase each additional six (6) months until finish of apprenticeship.

11. The following minimum wage scale shall prevail during the life of this agreement:

Machinists	75c	per hour
Machinists' specialists	65c	per hour
Machinists' helpers	56¼c	per hour
Acetylene welders	75c	per hour
Electric welders	75c	per hour
Moulders	75c	per hour
Patternmakers	75c	per hour
Blacksmiths	75c	per hour
Blacksmiths' helpers	56¼c	per hour
Boilermakers	75c	per hour
Rivetters, chippers and caulkers	75c	per hour
Boilermakers' helpers	56¼c	per hour
Electricians	75c	per hour
Electricians' helpers	56¼c	per hour
General helpers	56¼c	per hour

Etc.

Appendix to Moulders' Classification:

Under the classification of moulders it is to be understood that same includes coremakers.

Foundry specialists shall consist of the following: furnacemen, potcarriers, grinders, millmen, cranemen and weighmasters.

All men coming under this classification shall receive not less than 65 cents per hour.

Machine moulders shall receive not less than 65 cents per hour.

All other foundry help will be designated as general helpers.

AUTO SHOPS AGREEMENT.

This agreement, made and entered into this ..... day of ..... 1918, by and between the ..... and the Metal Trades Council of ..... and vicinity.

1. That each party to this agreement herein made agrees and consents to the following rules and regulations, which shall govern the mutual relations of the parties hereto mentioned.

2. Eight (8) hours shall constitute a day's work, from 8 a.m. to 17 p.m., with one hour off for dinner between 12 noon and 1 p.m. for the first five days of the week, and from 8 a.m. to 12 noon on Saturdays.

3. All time worked over bulletin hours will be considered overtime, and will be paid for at the rate of double time.

4. All grievances which may arise in any shop shall be given consideration as follows: (1) all complaints and grievances to be adjusted by the foreman in charge, if possible; (2) when such adjustment cannot be made between the foreman and the craft directly interested, the matter will be taken up with the company direct, by the business agent and the committee representing the craft having the grievance, and they shall endeavour to reach a mutual understanding; (3) in the event an understanding cannot be reached by the company and the representatives of the craft involved, a committee of representatives from the Metal Trades Council will meet the company and try to bring about an adjustment of the grievance; and in the meantime there will be no lockout on the part of the company or strike on the part of the men.

5. No employee representing his fellow-workmen will be discriminated against.

6. Men receiving rates in excess of the minimum rates herein quoted will suffer no reduction, and will share in the general increases agreed to.

7. This agreement will remain in effect for one year, except that wage rates will be revised every three months, according to the official information on the cost of living.

8. Apprentices shall serve four (4) years, and during said term shall be advanced in all branches of the trade. The ratio of apprentices shall not exceed one for the shop at large and one for every five journeymen regularly employed.

9. (a) Machinists' work will consist of the operation of lathes, planers, slotting, milling, shaping, boring or other machine tools, requiring skilled operation; laying off work and making and repairing of tools and machinery.

(b) Auto mechanics' work will consist of the following:

First class mechanic will be a man who is capable of taking a car and with the aid of tools give same a general repair, to a successful completion.

Second class mechanic will be a man who is not used on general work, but who is confined to the following work: gear, fenders, bodies and tops, radiators, bumpers, mufflers and brakes.

(c) Helpers are men who assist mechanics and work under their direction.

(d) Electricians—Men who have served an apprenticeship to the electrical trade or had four (4) years' varied experience in the following branches shall be classed as electricians—armature and coil winding; battery work; lighting systems; power systems; and maintenance of same; installation of cables, and all electrical devices in connection with cars.

10. When reduction of expenses is necessary, working hours will be reduced to seven (7) hours per day for the first five days of the week before any reduction of staff takes place. Men will be laid off according to their seniority.

10. (a) In the event of the working hours being reduced below eight (8) hours, no men will be hired until the eight-hour day is resumed.

(b) Any man working over thirty (30) days in a shop shall be considered on the staff.

11. Apprentices' rates: 20 cents per hour for the first year and five cents (5c) per hour increase each additional six months until finish of apprenticeship.

12. The following minimum wage scale shall prevail during the life of this agreement:

Machinists	75c	per hour
1st class mechanics	75c	per hour
2nd class mechanics	65c	per hour
Electricians	75c	per hour
Helpers	56¼c	per hour

It was stated that these several agreements did not necessarily represent the minimum which the employees were willing to accept, but that they were tendered as a basis for negotiations.

The attitude of the employers was that they would neither sign the said form of agreement nor make it the basis for negotiations. They stated that they were then, and always had been ready to negotiate with their own men, either individually, or with a committee representing the different crafts in their shops, both as to wages and working conditions; but that they refused to recognize any outside organization, or to negotiate with the representatives of such organization. They stated that no complaint by their own men had been made to them, either concerning wages or shop conditions, notwithstanding that upon receipt of the said draft agreement they had posted in their shops a notice of which the following is a copy:

NOTICE.

The company understands that there is a desire on the part of its employees to take up the question of conditions of employment in this plant, and wishes to state that it is willing to meet representatives from any craft from its own shops to discuss questions relating to the conditions of employment of that craft, with the view of reaching an agreement.

There was no response to the notice, except in one shop, viz., the Dominion Bridge Company's. In that shop a committee of the employees waited upon the manager and asked if he proposed to negotiate the agreement with the Metal Trades Council, but made no further demand or request.

Both forms of agreement above referred to were for a contract between the Metal Trades Council and the several employers, and the agreement tendered to the contract shop employers contained a clause providing that all mechanics should be hired through the representative of the organization.

The representatives of the men finally agreed to waive both of these provisions, and expressed their willingness that the agreement should be negotiated between the several employers and committees of their own men, provided the employers would, if such negotiations resulted in an agreement, enter into an agreement in writing.

The employers appear to have been greatly alarmed by the demands embodied in the forms of agreement presented to them; an alarm that was not allayed by the subsequent withdrawal of the two clauses most seriously excepted to. We think the men would have been better advised had they embodied in the agreement terms more nearly approaching their minimum demands.

At this stage it appeared to us that there was no such serious difference between the parties that a mutually satisfactory understanding might not be arrived at with a little give and take on both sides.

We consequently adjourned, *sine die*, the public sittings of the Commission, and endeavoured, by private negotiations, to bring about a satisfactory arrangement. For this purpose we conferred separately and apart, and in private, with each of the parties for the purpose of ascertaining just how far each was willing to go to meet the other. We ascertained that all the employers, with the exception of the Vulcan Iron Works, expressed a willingness to negotiate with a committee representing the different crafts in their own shops, and to enter into a written agreement with such committee if the negotiations resulted in an agreement. They stipulated, however, that this committee should act entirely independent of the Metal Trades Council, or of any other outside organization, and they declined to negotiate with a committee of all their employees.

The Vulcan Iron Works, while not positively refusing to negotiate with a committee of the different crafts in their shops, did not express a willingness to do so, but were willing to negotiate with their individual employees only.

The representatives of the employees insisted that the committee should be one representing all the employees in the particular shop. They further stated that such committee would be under the direction and control of the Metal Trades Council, and would conduct its negotiations with the employers under the direction of the Metal Trades Council. It thus appeared that the intention of the employees was to conduct negotiations nominally through a committee of the employers' men, but in reality by the Metal Trades Council, acting through this committee.

The difference between the parties may be stated as follows:

1. The employers, with one exception, were willing to negotiate with committees representing the different crafts in their employment, such committee to be appointed and act entirely without interference from the Metal Trades Council, or from any other outside body.

2. The employees insist that such committee be constituted from all the employees of the particular employer, and act under the direction and control of the Metal Trades Council.

After negotiations extending over several days, neither party would recede from the position taken. Both sides seemed to regard the difference between them as fundamental.

Having failed to find any common ground upon which the parties could meet and negotiate with each other directly, we proceeded to inquire into the wages and working conditions in the contract shops. For this purpose we selected the Vulcan Iron Works, the Dominion Bridge Company and the Manitoba Bridge Company. These are the largest of the contract shops, and conditions prevailing in them are admittedly fairly typical of all.

For reasons we shall hereafter explain, we did not visit any of the shops or hear at first hand the demands made by the men, but only through the official representatives of the several unions in the Metal Trades Council.

The wages paid at present vary from 50 cents per hour to the labourer to as high as 70 cents per hour for the skilled mechanic. In this connection it is fair to point out that there has been a very considerable advance in wages from time to time; an advance which has more than kept pace with the increased cost of living. The employers rate and pay their men according to skill and ability. They claim that this is the only manner in which employees can be rated under present day conditions. The war has seriously depleted the country of skilled mechanics, and it is now quite impossible for employers to fully man their shops with men of that class. As a necessary consequence they have had to take in common labourers and give them the necessary training for one operation upon a machine. These men are in no sense skilled mechanics or entitled to be classed as or receive the pay of a skilled mechanic. The great majority of men operating machines in shops at present belong to this class.

The demand of the representatives of the employees is that all employees be divided into three groups: mechanics, specialists, and helpers, with a minimum wage of 75 cents, 65 cents and 56¼ cents per hour respectively.

For several reasons we find it impossible to deal with this question with as much definiteness as we would desire. The representatives of the men refused to consent that we should visit the several shops, get in direct touch with the men and see them at work, and the men subsequently struck just as we had entered upon the inquiry as to wages and working conditions. It is but fair to say that our suggestion that we should meet the men in the shops directly was that we might from themselves learn what their complaints were, if any, and the grounds of such complaints. We thus have been unable to visualize the situation and find it quite impossible to arrive at any satisfactory conclusion as to a classification of the men.

A large number of agreements, entered into elsewhere, were produced to show that the wages paid here are sufficient. These agreements are with railways, shipbuilding yards, and some contract shops, showing a scale of wages in some cases higher and in some cases lower than that prevailing in Winnipeg. The employers object that such agreements cannot be relied upon as evidence that the wages paid here are unreasonable, without knowing the conditions prevailing in the particular place, and the circumstances under which they were entered into. They point out that in some cases the employers may have been forced to agree to the scale demanded because of contracts of war material, and in other cases the employer was a public utility having the right to apply for leave to charge higher rates, and thus take care of the increased wages, as had been done in the case of railways. They point to the fact that they have no such redress, but that they have to sell their manufactured products in competition with others in the United States and Canada where no such wages or working hours prevail.

From the evidence before us we have come to the conclusion that on the whole the mechanics and skilled craftsmen employed in these shops are paid fair wages. To this general rule there appear to be some exceptions where the men are underpaid. The same may be said of the class commonly called specialists. The exceptions in this class appear to be more numerous and the variations in rates of pay greater. In the case of labourers the general rate is 30 cents per hour. This rate appears to us to be too low under present conditions, and we would recommend a minimum of 32½ cents per hour.

For overtime the prevailing rate is time and one-half, with double time for Sundays. This appears to be a fair and reasonable practice and should be continued.

As to the number of working hours per day, we were unable to arrive at a unanimous conclusion. The present working day is ten hours with five hours on Saturday. The evidence disclosed that a reduction of the hours of labour from ten to eight as demanded would add at least 20 per cent to the cost of production. The chairman and Mr. Fisher believe that the reduction asked for would impose upon the local trade too serious a handicap as against their competitors in other parts of Canada and the United States, where the ten hour day prevails. They also believe that when labour is so scarce and the necessity of attaining the maximum of production so great, the time is not opportune for recommending a reduction in the hours of labour, however desirable they might consider the change under other circumstances. Mr. Tipping, on the other hand, holds to the view that, notwithstanding existing conditions, the daily hours of labour in the metal trades is too long and should be reduced at least to nine hours.

During the progress of the inquiry several incidents took place to which we desire to make a brief reference.

At the opening of the proceedings we requested that all parties refrain from doing anything that would in any wise cause irritation, and that the employers refrain from any acts of discrimination against union employees.

The representatives of the employees charged that one of the employers, viz., The North West Brass Foundry, had discriminated against three union men—Adair, Neil and Chomisky—by refusing them employment.

The employers made a counter charge of intimidation against members of the union.

The first charge was that Mr. Adair, a brass moulder, now secretary of the Moulders' Union, who had been in the employ of the company up until the eighth of June last, was refused employment, although the company was at that

very time advertising for moulders. The facts of Mr. Adair's case are these: He entered the employment of the Brass Company in September, 1917. In November several cases of lead poisoning occurred in the foundry, and amongst those who suffered from it was Mr. Adair. After his recovery he was re-employed by the Brass Company in February of this year, and it was stated to him at the time that the shop was an "open shop," and he agreed to accept employment in it upon that understanding. Some time after that he made a claim under the Workmen's Compensation Act because of the lead poisoning, and was awarded damages. In May and June, the Brass Company were carrying out certain changes in its heating plant. These improvements had been going on for some time, and on the eighth of June a notice was posted that the shop would be closed until further notice. Mr. Adair says that he asked the superintendent how long it would be before the men would be required back, and was told that when they were wanted they would be sent for. He asked for something more definite, but the superintendent refused to give any further information on the subject. In a short time afterwards other men were taken on, and Mr. Adair again applied for employment. He was then told that when he was wanted he would be sent for.

The answer which the Brass Foundry Company makes to the charge is that they did not object to Mr. Adair because he was a member, and an active officer of the Moulders' Union, but because it appeared that he was susceptible to lead poisoning, and that the management of the company, after consultation with their solicitor, and upon their solicitor's advice, declined to re-employ him. This statement was confirmed by the company's solicitor.

Although the circumstances under which Mr. Adair was refused employment may excite in our minds a suspicion that the reason assigned for his non-employment was not the only reason, and that the management was actuated by other motives, we cannot, upon the evidence before us, find that the reason given for refusing to re-employ Mr. Adair was not the real reason. We do think, however, that the management might have shown more candour in dealing with Mr. Adair, and more consideration for the men, when it became necessary to close down the shop for repairs. It seems to us absurd to contend that the superintendent could not have given an approximate date when the men would be required again. We have no hesitation in saying that he could have done so, and that the real reason for not telling Mr. Adair when he would be required again was that they did not intend to re-employ him.

The facts as to Neil and Chomisky are these:

Neil was dismissed and the other refused employment when he applied. We cannot find on the evidence that Neil was dismissed because of his membership in the union or that Chomisky was refused employment for that reason.

It was charged that Neil had threatened with personal violence one of the company's employees who remained at work during a strike. While Neil appears to have acted indiscreetly and frankly admitted such to be the fact, the incident was too trivial to be made the subject of a serious inquiry.

The metal trades shops in Winnipeg are and have always been what are known as "open shops." That is to say, both union and non-union men have been employed in them indiscriminately. The employees for some reason came to regard The North West Brass Foundry, although nominally an open shop, in practice a union shop. While the inquiry was proceeding this company put one of its employees, not theretofore employed as a moulder, to do moulder's work. The union employees in the shop objected, and upon the company refusing to stop him doing moulder's work, a strike was declared in that shop at a meeting held on or about the eighth July, to take effect at 10 o'clock in the morning of the tenth. At our request the representatives of the employees undertook to call the strike off and to keep the men at work until we had time to complete our investigation and make our report.

On or about the seventeenth July, at a meeting of the metal trade employees, a general strike was declared, to take effect on the twenty-second July. We were informed that this course had been resolved upon under the mistaken impression that we intended only to report conditions unaccompanied by any recommendations. At a meeting on the nineteenth July, we made it quite clear that we proposed to not only report the conditions as we found them, but to accompany our report by any recommendations that we believed to be justified by the facts disclosed. We earnestly urged the employees' representatives to use their influence to prevent a strike, and they undertook to advise the men to wait until the inquiry had been completed and our report made. At a meeting held the following day, the employees, however, resolved to go on with the strike. Accordingly, on the morning of the twenty-second July, a general strike took place and is still on.

The metal trade employers in this city have hitherto refused to recognize unions of their employees or to collectively bargain with them, and one of the reasons given for not doing so was that employees did not treat such bargains as binding. In view of this contention, we regard it as doubly regrettable that the employees should have adopted a course which might lend colour to the employers' contention. We do not believe the contention is well founded. We believe that employees do as a rule respect their collective bargains. The fact that occasionally such agreements are broken is not a reason for refusing to enter into such agreements any more than the breach by an individual of his agreement should be treated as a reason against individual bargaining.

We find that in the larger contract shops there exists an atmosphere of suspicion and

distrust between employer and organized labour. It is quite impossible to say which party is at fault. If the real cause could be ascertained it would probably be found that both parties had contributed to it. The real purpose of the present movement on the part of the men is, we believe, to secure recognition of the unions, but until the present deep-seated distrust of organized labour is removed from the minds of employers we believe the purpose to be unattainable.

On the whole, we think the relations between individual employers and their men to be fairly satisfactory, and that as a rule the men are treated with kindness and consideration. The fact that some of them have retained the same men for periods ranging from 5 to 35 years can bear no other construction. All the employers have repeatedly expressed their willingness to meet their employees either through craft committees or individually and to comply with any reasonable demands either as to wages or working conditions. We can see no reason why they should not meet a joint committee of all their employees. We believe that a meeting of the several employers with such committees and a frank and free discussion and interchange of views might go far to satisfy the men and to remove the desire to secure expression of their views through their union organization. Entertaining as we do these views, we recommend the employers to abandon their objection to meeting a committee appointed by and representing collectively all their employees. It is our recommendation that the union organizations permit these committees to be formed and conduct their negotiations without interference or direction. If these recommendations are adopted, we confidently hope and believe that satisfactory wages and working conditions can be established in all the contract shops and a better atmosphere created all round. The adoption of these recommendations would, we believe, go far to solve the present difficulties and we can see no other solution.

The unrest which has prevailed in labour circles for the past few months has operated not only to the detriment of both employers and employees, but to the injury of this whole community. Two of the three contract shops under review produced evidence to show that they had been offered very large orders for war munitions, which they had to refuse because they could not, in view of the unsettled conditions of labour, assume the risk of obligating themselves, either as to the price for the work or the time for completion, with the result that the orders went to centres where more settled conditions prevail.

We have not dealt specifically with the automobile shops for the reason that these shops are all small and relatively unimportant and wages for skilled mechanics in them are well maintained by the keen competition between them for such help.

We regret that we have nothing more concrete to offer as a solution of the existing unrest, and that as we write this report the men are on strike; but we have the consolation of knowing that we spared no effort to bring the parties together.

All of which is respectfully submitted.

(Sgd.) T. G. MATHERS,
Chairman.

(Sgd.) GEO. FISHER.

(Sgd.) F. G. TIPPING.

Dated this second day of August, 1918.

INDUSTRIAL DISPUTES DURING JULY, 1918

TWENTY-EIGHT strikes affecting approximately 15,024 employees were reported as having commenced during July. There were in existence at some time or other during the month 39 strikes directly affecting 15,848 workpeople. The total time loss on account of industrial disputes was estimated at 123,511 working days, as compared with 40,929 in June, and 62,484 in July, 1917. The time loss occasioned by the 28 strikes which began in July was 108,033 working days, while a loss of 15,478 days is charged to the eleven strikes commencing prior to July. Termination of disputes was reported in the case of six of the disputes commenced prior to July. Eighteen of the strikes which commenced during July terminated during the month, leaving the fifteen following strikes affecting approximately 4,049 workpeople on record July 31; painters and decorators, Calgary; plumbers and steamfitters, Nobel, Ont.; machinists, Montreal; knitting mill operatives, Toronto; cigarmakers, Toronto and Montreal; steam and operating engineers throughout British Columbia; coal miners, Entwhistle, Alta.; coal miners, Wayne, Alta.; plumbers and steamfitters, Toronto; metal workers, Winnipeg; iron shipbuilders, Lauzon, Que.; papermakers, Fort Frances; pulp and paper makers, Hawkesbury; cap makers, Winnipeg, and cigarmakers, Hamilton, London and Montreal.

INDUSTRIAL DISPUTES, JULY, 1918

Industry or occupation.	Particulars.	No. of employees affected.	Time loss in working days
	STRIKES COMMENCING PRIOR TO JULY, 1918:		
BUILDING AND CONSTRUCTION—			
Carpenters, Port Arthur and Ft. William, Ont.	Commenced June 20. Demand for increased wages and shorter hours. Increased wages and shorter hours granted. Work resumed July 10.	75	600
Painters and decorators, Calgary, Alta.	Commenced June 29. Demand for increased wages and reduction in hours. Unterminated.	40	1,040
Plumbers and steamfitters, St. John, N. B.	Commenced April 23, 1917. Demand for increased wages. Strike declared off July 5, 1918.	11	33
Plumbers and steamfitters, Nobel, Ont.	Commenced June 29. Demand for increased wages. Unterminated.	30	780
METALS, MACHINERY AND CONVEYANCES—			
Machinists, Montreal, Que.	Commenced May 23. Demand for increased wages and nine-hour day. Unterminated.	45	1,170
Machinists and toolmakers, Toronto, Ont.	Commenced June 25. Against dismissal of employee. Settled by negotiations between parties; discharged employee reinstated. Work resumed July 15.	135	1,485
Metal polishers and buffers, Weston, Ont.	Commenced February 12. Against reduction in wages. Information reaching Department indicates conditions are no longer affected by strike.	33	66
Moulders, Wingham, Ont.	Commenced June 21. For recognition of union. Settled by negotiations between the parties; increase granted. Work resumed July 10.	27	216
TEXTILES, CORDAGE AND CARPETS—			
Knitting mill operatives, Toronto, Ont.	Commenced June 12. Demand for increased wages. Unterminated.	88	2,288
FOOD, TOBACCO AND LIQUORS—			
Bakers, Vancouver, B.C.	Commenced June 20. Demand for increased wages, shorter hours and recognition of union. Settled by negotiations between parties; demands of employees conceded. Work resumed July 28.	.....	.....
Cigarmakers, Toronto and Montreal.	Commenced May 16-30. Employees locked out. Unterminated.	300	7,800
	DISPUTES COMMENCING DURING JULY, 1918.		
LUMBERING—			
Steam and operating engineers, Vancouver and other places in British Columbia.	Commenced July 2. Demand for shorter hours and increased pay. Most of companies affected conceded men's demands, but in a few plants the dispute remained unsettled.	1,000	26,000
MINES, SMELTERS AND QUARRIES—			
Coal miners, Minto, N.B.	Commenced July 16. Demand for increased wages. Work resumed July 31.	150	1,800
Coal miners, Entwhiste, Alta.	Commenced July 19. Demand for increased wages. Unterminated.	125	1,250
Coal miners, Wayne, Alta.	Commenced July 19. Refusal to work on screened coal basis, demanding run-of-mine basis. Unterminated.	24	264
Miners and smeltermen, Anyox, B.C.	Commenced July 20. Demand for increased wages. Settled by negotiations between the parties. Work resumed July 26.	2,000	10,000
BUILDING AND CONSTRUCTION—			
Carpenters, Calgary, Alta.	Commenced July 2. Demand for increased wages. Men returned to work July 9, pending findings of Arbitration Board.	300	1,800
Plumbers, Ottawa, Ont.	Commenced July 24. Demand for increased wages. Settled by negotiations between the parties. Partial increase granted. Work resumed July 26.	23	46
Plumbers and steamfitters, Toronto, Ont.	Commenced July 6. Demand for increased wages. Unterminated.	39	780
METALS, MACHINERY AND CONVEYANCES—			
Electrical workers, Vancouver & Victoria, B.C.	Commenced July 2. For increased wages and other working conditions. Settled by arbitration; increase granted. Work resumed July 11.	318	2,862
Electrical workers, Vancouver, B.C.	Commenced July 14. Alleged discrimination and non-compliance with working agreement by company. Negotiations between the parties resulted in a compromise. Work resumed July 16.	215	430
Metal workers, Winnipeg, Man.	Commenced July 22. Demand for higher wages. Unterminated.	1,000	3,000

INDUSTRIAL DISPUTES, JULY, 1918 (Continued)

Industry or occupation.	Particulars.	No. of employees affected.	Time loss in working days
Ship caulkers, Victoria, B.C.	Commenced July 11. Protest against working with caulkers trained in caulking school. Settled by Government adjuster appointed under existing agreement between parties; future applicants to pass examination before Board of qualified caulkers. Work resumed July 22.	80	600
Iron shipbuilders, etc., Lauzon, Que.	Commenced July 26. Demand for re-instatement of dismissed employees and for recognition of International Union. Unterminated.	350	1,750
PULP AND PAPER—			
Paper-makers, Iroquois Falls, Ont.	Commenced July 18. Demand for increased wages. Men returned to work at previous rates, July 22.	94	329
Paper-makers, Thorold, Ont.	Commenced July 2. Employees refused to accept scale of wages fixed by United States War Labour Board. Men returned to work at former rates, with some adjustments, on July 8.	525	2,625
Papermakers, Powell River, B.C	Commenced July 3. Demand for increased wages. Increases granted and work resumed July 7.	.....	.....
Papermakers, Fort Frances, Ont	Commenced July 13	.....	.....
Pulp and paper-makers, Hawkesbury, Ont.	Commenced July 29. For increased wages. Unterminated	500	1,000
PRINTING AND PUBLISHING—	P 740 E		
Printers, Winnipeg, Man.	Commenced July 1. For increased wages and working agreement. Settled by negotiations between the parties; partial increase granted. Work resumed July 5.	250	1,000
CLOTHING—			
Cap-makers, Winnipeg, Man.	Commenced July 17. For increased wages and against alleged discrimination. Unterminated.	8	100
FOOD, TOBACCO AND LIQUORS—			
Cigarmakers, Hamilton, Ont., London, Ont., and Montreal, Que.	Commenced July 10. Employees at Hamilton presented demand for increased wages and one company operating at Hamilton, London and Montreal closed its factories. Employees of another company secured partial increase and resumed work July 30. General strike and lock-out unterminated.	400	7,600
LEATHER—			
Boot and shoe workers, Port Dalhousie, Ont.	Commenced July 2. Demand for increased wages. Some employees secured work elsewhere; others returned at former rates July 8.	71	284
TRANSPORTATION—			
Street railway employees, Vancouver, Victoria and New Westminster, B. C.	Commenced July 2. For an increase in wages and reduction in hours. Settled by arbitration; wages increased and hours reduced. Work resumed July 11.	1,348	12,132
Teamsters, Toronto	Commenced July 11. Demand for higher wages. Partial increase granted. Work resumed July 19.	135	945
NAVIGATION—			
Pier men, North Sydney, N.S.	Commenced July 4. Demand for increased wages. Settled by negotiations between the parties; no change in rates but company improved working conditions. Work resumed July 22.	29	352
PUBLIC UTILITIES—			
Letter carriers, Montreal, Toronto, Winnipeg and other cities.	Commenced July 22. Demand for increased wages and for Board of Investigation. Government arranged to have differences investigated by Civil Service Commission. Employees at some points returned to work July 25 and all had resumed work July 31.	3,102	12,940
Hydro-electric employees, Niagara Falls, Ont	Commenced July 22. Against discharge of employees, extra rate for overtime and shorter hours. Compromised; discharged men not reinstated but general advance of 5 cents per hour granted. Work resumed July 31.	18	144
MUNICIPAL EMPLOYMENT—			
Civic labourers, Toronto, Ont.	Commenced July 5. Men claimed that wage increase had not been made retroactive. Employees returned to work pending findings of Arbitration Board. Work resumed July 12.	3,000	18,000

Disputes by Industries

The following is a review of the disputes by industries in the order in which these appear in the preceding statistical table. A brief summary is given of the more important strikes.

Lumbering.—One strike was reported in this group, that of steam and operating engineers in Vancouver and other places throughout British Columbia, where about 1,000 men went on strike for increased wages and shorter hours. At the end of the month nearly all employees had returned to work, their demands having been conceded; in a few plants at Vancouver, Victoria and Ladysmith where about 50 men were concerned the dispute had not been adjusted.

Mining and Smelting. — There were four strikes in existence, chiefly affecting metal mining and smelting; coal mining was little disturbed, there being only three strikes affecting a small number of employees at Minto, N.B., and Entwhistle, and Wayne, Alta. The most important strike was that at Anyox, B.C., where 2,000 metal miners and smeltermen were out for nearly a week.

Building and construction. — There were in all seven strikes in existence during July; most of them affected few employees and at the end of the month there were but three in existence, those of painters and decorators at Calgary, plumbers and steamfitters at Nobel and plumbers and steamfitters at Toronto.

Metals, machinery and conveyances. —The greatest number of strikes occurred in the metals, machinery and conveyances group, there being nine in existence during the month. Several disputes carried over from the previous month and affecting comparatively small numbers of employees were settled during July. The more important strikes in this class during July were those of metal workers at Winnipeg and iron shipbuilders at Lauzon, Que. The strike of metal workers at Winnipeg which commenced July 22 and affected about 45 metal contract shops and automobile repair shops and approximately 1,000 employees, arose from the demands of the Metal Trades Council for increased wages and improved working conditions, the employers with some exceptions refusing compliance. Prior to the strike a Royal Commission was appointed to investigate the difficulty, but after the Commission had commenced its enquiry the men ceased work. The strike was unterminated at the end of the month. At Lauzon, Que., about 350 employees of a shipbuilding firm went on strike over the alleged dismissal by the company of a number of employees because of their membership in a union. The employees had made application for a Board of Conciliation and Investigation and the application was before the Minister. Information, however, having reached the Minister that disputes existed at other shipyards in the Province of Quebec the Minister had under consideration the appointment of a Commission which would deal with the disputes in the Province as a whole. The Commission was appointed a day or two subsequent to the strike at Lauzon. Besides the above mentioned trikes the only other dispute in the metals group unterminated at the month's close was that of machinists at Montreal where only 45 employees were affected.

Pulp and paper. — Several strikes were reported in this group during July, affecting pulp and papermakers at Iroquois Falls, Thorold, Fort Frances and Hawkesbury, Ont., and Powell River, B.C. All were settled at the end of the month with the exception of that at Hawkesbury.

Printing and publishing.—One strike was reported at Winnipeg, where 250 printers secured a partial increase and returned to work after being out a few days.

Clothing.—One small strike affecting eight employees of a cap factory at Winnipeg commenced during July and was unterminated.

Textiles.—There was only one strike on the Departmental record in this group, that of knitting mill operatives at Toronto affecting about 88 employees. This strike was unterminated at the end of the month.

Food, tobacco and liquors. — There were two strikes of cigarmakers in existence during the month and unterminated at its close. One of these strikes commenced prior to July and affected the establishments of one firm at Toronto and Montreal. The other dispute concerned the factories of another firm at London, Hamilton and Montreal and also affected two other firms at Hamilton. One of the latter firms made a compromise with its employees and work was resumed, leaving about 700 employees still on strike or locked out at London, Hamilton, Toronto and Montreal. The other strike in this group affected bakers at Vancouver in the employ of three establishments, which was adjusted at the end of the month.

Leather.—The leather group was disturbed by one brief strike affecting about 70 employees at Port Dalhousie. The strike was terminated within a week of its commencement.

Transportation.—A strike of street railway employees at Vancouver, New Westminster and Victoria, which commenced July 2 and affected about 1,300 employees, was terminated July 11. A Board of Conciliation and Investigation under the Industrial Disputes Investigation Act had been appointed and was sitting at the time of the strike. During May the street railwaymen's organization had given notice to the company that they desired to open negotiations for a new agreement to take the place of the one expiring June 30. During June the company applied for a Board under the Industrial Disputes Investigation Act, which was established and commenced its sittings. The men, however, ceased work July 2. On July 8 the decision of the Board was handed out and recommended certain increases in minimum and maximum rates; the eight-hour day was approved in principle, but it was recommended that its application be postponed during the war. On July 11 after some negotiations between the parties a settlement was reached on the basis of the Board's award with some further concessions to the employees. The only other strike in this group was one of teamsters at Toronto, which affected about 135 men and lasted about a week.

Navigation. — There was only one strike under this head, that of piermen at North Sydney, N.S.; about 30 men were affected and the strike was adjusted after the men had been out a few weeks.

Public utilities.—Two strikes were reported, letter carriers in various cities of the Dominion and hydro-electric employees at Niagara Falls. During July the letter carriers made a demand upon the Government for increased wages and for the payment of certain bonuses which had been voted by Parliament but had not yet been paid. Their demands not having been conceded, the men asked for a Board of Conciliation and Investigation to look into the questions at issue. It was pointed out by the Acting Prime Minister that the Industrial Disputes Investigation Act made no provision for the establishment of Boards of Conciliation and Investigation between the Government and its employees, also that no additional money could be paid without a further vote of Parliament. On July 22 the men ceased work, Toronto, Hamilton, Winnipeg, Vancouver, New Westminster and Victoria being the cities chiefly affected,

though in all about 15 cities were concerned. In a few Western cities the letter carriers were joined by the postal clerks. On July 25 the Government having promised to have the matter looked into by a sub-committee of the Cabinet, the general secretary of the Letter Carriers' Federation advised the various locals to return to work and this course was followed in Eastern cities, but in most of the Western cities the men remained out. On July 31, through the efforts of the Minister of Labour and the Minister of the Interior, who were in Winnipeg and conferred with the parties, the men in Western cities went back to work, on the understanding that their grievances would be investigated by the Civil Service Commission.

Municipal employment.—A strike of civic employees at Toronto, involving about 1,200 men, after the men had been out about a week, was settled by reference of the matters in question to a local arbitration board. The men had asked that a war bonus of $2 per week from April 1 be made retroactive to January 1, and failing this that they be given a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The men went on strike July 5. Sometime prior to the strike an application had been received by the Minister of Labour for a Board of Conciliation and Investigation. The application was brought to the attention of the municipal authorities and it was pointed out that although the employer being a municipality the Act was without positive jurisdiction, yet with the mutual consent of the parties to the dispute a Board could be established and the Minister expressed his willingness to have the Board procedure instituted immediately. The municipal authorities, however, declined. The offer was renewed by the Minister on the outbreak of the strike, but consent was still refused. Subsequently it was decided to have the dispute adjusted by a local arbitration board.

Labour Controversies

During the month there were a number of important controversies between employers and employees which received considerable attention in the public press and which threatened at times to develop into strikes. Among these may be mentioned disputes affecting railway shopmen throughout Canada, commercial telegraphers in various cities, and street railway employees at Montreal.

Railway shopmen.—Early in July a committee of the Federated Shop Trades Brotherhood, representing men employed in the mechanical departments of the various Canadian railways, presented demands to the Canada Railway War Board for increased wages for machinists, specialists and helpers of approximately 21 cents per hour and for the eight-hour day. Numerous conferences were held, without, however, any settlement being reached, and for a time it appeared likely that the country would be disturbed by a serious railway strike. Later in the month, after further conferences in which members of the Federal Government took part, the Railway War Board issued an order stating that not later than August 1 and as much earlier as the various wage schedules expired, the so-called McAdoo Award affecting the wages and hours of service of railway employees in the United States would be put into force in Canada, the award to apply to all employees earning less than $3,000 per annum. It was provided, also, that where the McAdoo award would give to any workman less than his present earnings, his present rate would not be interfered with, and that all amendments to the McAdoo schedule would be put into effect in Canada. At the time the Canadian Railway War Board put its order into effect, negotiations were pending between the American railway companies and their employees in regard to further increases under the McAdoo schedule, and shortly after the Canadian order was announced further amendments were made in the United States to the schedule by which

the rates for shopmen were increased. Although details of the new increases had not been given out at the end of the month it was stated that the increase amounted to between 5 and 13 cents an hour higher than the general advance given some months before, though the rates were somewhat less than the employees had asked. Shortly after putting into effect in Canada the rates established by the McAdoo schedule and amendments the Federal Government passed an Order-in-Council permitting railway companies to increase their freight rates by an amount sufficient to meet the increased operating costs under the new wage schedule, the increase in freight rates amounting to approximately 20 per cent. At the end of the month it appeared likely that the shopmen would accept the McAdoo award as amended and that danger of a strike had ended.

Commercial telegraphers. — During July difficulties between the Great Northwestern Telegraph Company and its employees culminated in a cessation of work on July 16, which, however, lasted a few hours only. The difficulty arose over the company's dismissal of two operators who were awaiting trial for the alleged dissemination of news relating to horse races. The men were acquitted of the charge and the union requested their reinstatement with full pay for time lost. The company refused to reinstate the men, and for several weeks it appeared likely that there would be a strike involving not only the Great Northwestern Company but all other telegraphers in Canada. Conferences were held between the parties and the Minister of Labour and the Hon. Senator Robertson, and finally after the men had been on strike for a few hours at Ottawa, Toronto and Montreal, the matter was adjusted by the company agreeing to reinstate the discharged men with full pay for time lost.

Street railway employees, Montreal. —Employees of the Montreal Tramways Company on July 25 secured sanction from the international union to go on strike owing to non-payment of an increase which had been granted them, but which the company delayed paying until it received the sanction of the Quebec Public Utilities Commission to increase its fares. The company finally agreed to pay the increase without waiting for the decision of the Commission and no strike took place.

DECLARATION OF A WAR LABOUR POLICY BY THE DOMINION GOVERNMENT

THE Government, acting upon the recommendation of the Minister of Labour, has recently made a formal declaration of certain principles and policies that should govern the relations between employers and workmen engaged in war production, if industrial peace is to prevail during the period of the war. These views of the Government were embodied in an Order-in-Council, the full text of which in given below.

Text of Order

P. C. 1743.

Report of the Committee of the Privy Council, approved by His Excellency the Governor General on the 11th July, 1918.

The Committee of the Privy Council have had before them a report, dated July, 1918, from the Minister of Labour, representing that industrial unrest during the past few months has become more general than formerly, thus causing serious interruption in some lines of war work, and indications are that it will become more widespread still unless successful efforts be made to check it. This unrest has many causes among which are the

shortage of labour, rapid advance in the cost of many of the necessaries of life, employers denying their workmen the right to organize or to meet them in joint conference to discuss requests for improved conditions or to negotiate adjustments of differences; and in others from too hasty action on the part of workingmen in ignoring the provisions of the Industrial Disputes Investigation Act and in adopting drastic measures before exhausting every reasonable effort to reach a satisfactory settlement. Wages alleged to be inadequate together with length of work day said to be too long, are among other frequent causes of such unrest.

The Minister, realizing the necessity of steady work and close and sympathetic co-operation between employers and employees to secure maximum results from war efforts, is of opinion that the Government should forthwith adopt such means as may seem practicable for the prevention of such interruption during the continuance of the war, whether caused by lockouts or strikes, and the establishment of such co-operation, while at the same time striving to ensure to the workmen adequate compensation for their labour and reasonable safeguards for their health and safety, and to employers fair and reasonable treatment.

The Minister is further of opinion that a declaration by the Government of a war labour policy, fair and equitable to all concerned, governing relations between employers and workmen in all industries engaged in war work and including all those mentioned in the Industrial Disputes Investigation Act (except railways), and amendments thereto by Parliament or extensions thereof by Order in Council, for the duration of the war, would materially contribute to the attainment of these objects.

The Minister, therefore, recommends that the Governor in Council declare the following principles and policies and urge their adoption upon both employers and workmen for the period of the war:

1. That there should be no strike or lockout during the war.
2. That all employees have the right to organize in trade unions, and this right shall not be denied or interfered with in any manner whatsoever, and through their chosen representatives should be permitted and encouraged to negotiate with employers concerning working conditions, rates of pay, or other grievances.
3. That employers shall have the right to organize in associations or groups, and this right shall not be denied or interfered with by workers in any manner whatsoever.
4. That employers should not discharge or refuse to employ workers merely by reason of membership in trade unions or for legitimate trade union activities outside working hours.
5. That workers in the exercise of their right to organize shall use neither coercion nor intimidation of any kind to influence any person to join their organizations or employers to bargain or deal therewith.
6. That in establishments where the union shop exists by an agreement the same shall continue and the union standards as to wages, hours of labour and other conditions of employment shall be maintained.
7. That in establishments where union and non-union men and women now work together, and the employer meets only with employees or representatives engaged in such establishments, the continuance of such conditions shall not be deemed a grievance.

   This declaration, however, is not intended in any manner to deny the right, or discourage the practice of forming labour unions, or the joining of the same by workers in said establishments as aforesaid, nor to prevent a Board of Conciliation or other body or adjuster from recommending improvements in the matter of wages, hours of labour, or other conditions, as shall from time to time be found desirable.
8. That established safeguards and regulations for the protection of health and safety of workers shall not be relaxed.
9. That all workers, including common labourers, shall be entitled to a wage ample to enable them with thrift to maintain themselves and families in decency and comfort, and to make reasonable provision for old age.
10. That in fixing wages, minimum rates of pay should be established.
11. That women on work ordinarily performed by men should be allowed equal pay for equal work and should not be allotted tasks disproportionate to their strength.
12. That in all cases where eight hours is by law or agreement the basic day, it shall so continue. In all other cases the question of hours of labour should be settled with due regard to governmental necessities and the welfare, health and proper comfort of the workers.
13. That a maximum production from all war industries should be sought and methods of works and operation on the part of employers or workers which operate to delay or limit production or which tend to artificially increase the cost thereof should be discouraged.

14. That for the purpose of mobilizing the available labour supply with a view to its rapid and effective distribution as well as constant employment, the Managers and Operators of industrial establishments and the trade unions concerned should keep Provincial or Municipal Employment Agencies and the Canada Registration Board fully informed as to labour required or available. Those agencies should be given opportunity to aid in the distribution of labour.

15. That in fixing wages, hours and conditions of labour regard should be had to the labour standards, wage scales, and other conditions, prevailing in the locality affected, always mindful, however, of the necessity of payment of living wages.

16. That to better preserve industrial peace during the war, employers and employees should, after once establishing an agreement as to wages and working conditions, agree to its continuance during the war, subject only to such changes in rates of pay as fluctuation in cost of living may justify.

17. That when employers and employees are unable to arrive at a mutual agreement concerning any existing dispute, unless some other means of settlement is agreed upon by the parties, they should use the machinery provided for in the Industrial Disputes Investigation Act in an endeavour to reach an adjustment.

Should the recommendation of the Board of Conciliation not be accepted either party may appeal to the Board of Appeal who shall review the findings of the Board of Conciliation and hear such further evidence as either party to the dispute may desire to submit at their own expense, the decision of the Board of Appeal to be final.

Any settlement of a dispute referred to the Board of Conciliation, or carried in appeal to the Board of Appeal, shall be effective not later than the date on which the application for a Board of Conciliation was filed.

The Board of Appeal shall be composed of two representatives of labour nominated by the Executive Council of the Trades and Labour Congress of Canada, two representatives of the employers, nominated by the Executive of the Canadian Manufacturers Association, and a Chairman nominated by the said members of the Board, or, in case of failure to agree upon a Chairman, then the Minister of Labour shall appoint such Chairman.

The Minister further recommends that the Minister of Labour be authorized to make regulations governing procedure on appeal provided for by paragraph 17 of the above recommendations.

The Committee concur in the foregoing recommendations, and submit the same for Your Excellency's approval.

RODOLPHE BOUDREAU,
Clerk of Privy Council.

As soon as the policies outlined in the recommendations to council were approved, action was taken towards putting them into effect; and details are given below as to what has been done up to the present in this direction.

Board of Appeal Created

The Board of Appeal, provided for in paragraph 17 of the above Order-in-Council, to hear appeals from recommendations made by Conciliation Boards, is now in process of formation. At the request of the Minister of Labour, the Council of the Trades and Labour Congress of Canada have nominated John W. Bruce, of Toronto, and Gustave Francq, of Montreal, as the representatives of labour on the Board; and the executive of the Canadian Manufacturers' Association have nominated S. R. Parsons, of the British American Oil Company, Toronto, and G. H. Duggan, of the Dominion Shipbuilding Company, Montreal, as the representatives of the employers. The above nominations have been confirmed by the Minister; but the chairman of the Board has not yet been appointed.

This Board of Appeal will not deal with matters arising out of disputes between the railway companies and their employees.

Railway Board of Adjustment, No. 1

For the benefit of the railways and their train service employees a Board has been formed, known as the Railway Board of Adjustment No. 1. This Board consists of six representatives of the rail-

way companies and six representatives of labour, one for each of the railway brotherhoods. The personnel of the Board, at present, is as follows:

For the railway companies: U. E. Gillen, vice-president, Grand Trunk Railway; A. D. MacTier, general manager of eastern lines, Canadian Pacific Railway; F. P. Brady, general manager of western lines, Canadian Government Railways; S. J. Hungerford, general manager, Canadian Northern Railway; George Hodge, eastern lines, Canadian Pacific Railway; A. J. Hills, Canadian Northern Railway.

For the brotherhoods: S. N. Berry, vice-president, Order of Railway Conductors; Ash Kennedy, Brotherhood of Locomotive Engineers; J. M. Mein, deputy president, Order of Railroad Telegraphers; James Murdock, vice-president, Brotherhood of Railroad Trainmen; W. V. Turnbull, vice-president, International Brotherhood of Maintenance of Way Employees.

In the event of the members of the Board being evenly divided in opinion, then, either the Board itself or the Minister of Railways and Canals shall appoint a referee whose decision shall be binding.

The Board will commence work at once on the details in connection with the application of the McAdoo scale of wages.

Labour Sub-committee of the Reconstruction and Development Committee

In order that the Reconstruction and Development Committee of the cabinet may keep in closer touch with labour conditions throughout the Dominion, a sub-committee on labour has been added.

It will be the duty of the Labour Sub-Committee to investigate the social and economic conditions of the workers of Canada; and to recommend for the consideration of the reconstruction committee, policies and measures to be adopted in respect of labour problems both during the war and in the reconstruction period to follow. In conducting its investigations, the sub-committee will co-operate with and, as far as possible, utilize the machinery of the Department of Labour. The members of the Labour Sub-Committee are as follows:

Hon. G. D. Robertson, chairman; Hon. T. W. Crothers, Minister of Labour; Prof. R. M. MacIver, of the University of Toronto; Herbert J. Daly, manufacturer and merchant, of Toronto; J. C. Watters, president of the Trades and Labour Congress of Canada; and Calvin Lawrence, legislative representative of the Brotherhood of Locomotive Engineers. Gerald H. Brown, secretary of the Reconstruction and Development Committee, has been appointed to serve also as secretary of the Labour Committee.

ACTIVITIES OF THE WAR LABOUR BOARD, THE LABOUR POLICIES BOARD AND THE FEDERAL EMPLOYMENT SERVICE IN THE UNITED STATES

IN the July issue of the LABOUR GAZETTE (pages 530 and 538) an account was given of the creation and initial activities of the War Labour Board and the Labour Policies Board in the United States. The present article gives an account of the further proceedings of these Boards, together with those of the Employment Service of the Department of Labour.

War Labour Board

Shortly after its formation, the War Labour Board (sometimes spoken of as the Taft-Walsh Board) was notified by the National Association of Manufacturers that that organization had placed itself on record as being in favour of the policies and principles adopted by the Board and approved by President Wilson; and that it had urged its members to co-operate with the Board, so that its

aims and purposes may be effectuated in their respective industries for the duration of the war. Gratification was expressed by Messrs. Taft and Walsh, joint chairmen of the Board, that such an association should follow the lead of organized labour in "so whole-heartedly pledging support to the great principles upon which the Government had set out to adjust differences arising in the field of industrial relations."

Considerable trouble having existed for some time between the street railway companies of Chicago, Newark, N.J., Scranton, Pa., Portland, Ore., and elsewhere, and their employees in regard to wages, it was eventually agreed to by all parties to the dispute that the adoption of a definite policy was necessary; and that, therefore, the whole question should be referred to the War Labour Board for its decision and ruling. This was done, and Messrs. Taft and Walsh were appointed as a section of the Board with full power to make decisions. During the hearings that have ensued, the street railway corporations, almost without exception, agreed that the increased cost of living necessitated a general wage increase to their employees; but, almost invariably, the corporations protested their inability to meet demands for increased wages unless they were allowed to increase their fares. Counsel on both sides held that the President of the United States has ample power and authority under existing law to assume control of the electric railway systems of the country to the extent of regulating fares for the duration of the war. This opinion was also held by Messrs. Taft and Walsh, who announced that they would not hesitate to ask the President to invoke such powers if it should be shown that the granting of wage increases would threaten the solvency of the operating companies; but they also held that, "the question of providing a fair and living wage for the workers had priority over all other questions, including the financial conditions of the companies." The hearing is still in progress, but a speedy decision is expected.

The General Electric Company and its 21,000 employees at Schenectady and Pittsfield, Mass., have also agreed to submit their differences to Messrs. Taft and Walsh and to be bound by their decision, whatever it may be. The demands of the workers at Schenectady are: a 25 per cent increase in wages throughout the plant; the application of the basic eight hour day; modification of the physical test; equal pay for equal work, whether performed by men or by women. About 2,800 women are employed in the plant. At the preliminary hearing it was brought out that the men had voted to go out on strike, but had reconsidered their action when they were assured that the matter would be taken before the War Labour Board.

At the Pittsfield plant of the General Electric Company it has been the practice to submit individual contracts to the men at the time they were employed. One of the principal demands of the men was that the individual contract should be abolished and that a system be established by which the workers can deal collectively with the company. The order of the Board is that all existing individual contracts shall be eliminated and that the company shall make none in the future. The staff of the War Labour Board will devise a system of election by which workers may choose committees to represent them in dealing with the company. Up to the present the company has not recognized either committees or individuals representing groups of the workers. The wage dispute which forms a part of the controversy at Pittsfield will be adjusted by the Board at the same time as that at Schenectady.

As a result of a recent strike of 10,000 skilled workers in Bridgeport, Conn., the entire existing system of industrial relations in Bridgeport, affecting 53 employing firms and corporations and more than 50,000 workers, has been turned over to a section of the War Labour Board for such changes, corrections or improvements as, after a thorough investigation, it sees fit to make. "This

blanket authority to revise the existing system at Bridgeport," says the Official Bulletin for July 5, "was given to the Board when the employers of the city, most of whom were not affected by the recent strike, made known their belief that it would lead to further instability and unrest in the district if an award involving increased wages and improved working conditions were made in favour of machinists and some other skilled workers in a restricted number of plants. The remainder of the working population, the employers felt, would undoubtedly formulate demands of their own and set out upon a campaign to realize them. Consequently, the employers asked that the Board extend its inquiry to take in the conditions prevailing throughout all of the plants and that such award or decision as it finally arrives at be made applicable to the entire industrial life of the community. Moreover, each of the employing companies signed an agreement binding it to abide by whatever decision is ultimately reached."

One of the grievances of the workers was that employers in Bridgeport maintained a so-called "black list." The Board without hearing testimony on this point pronounced that discriminatory practices against union workmen were forbidden by the principles and policies of the Board by which both capital and labour had consented to be governed. The employers were then asked to reinstate any men the reason for whose discharge had been given on the employers' cards as "belonging to the union." This the employers promised to do. The industries of Bridgeport are almost exclusively engaged upon war production and the award of the Board, when made, will affect nearly 90 per cent of the industrial population of the town.

Other disputes concerning wages, the basic eight hour day, and discriminatory practices are also receiving the attention of the War Labour Board.

Labour Policies Board

At the present time there is hardly a munition plant or shipyard in the United States that is not eagerly seeking for additional workers, and the high wages that are being offered in consequence has caused an abnormal turnover of labour engaged in essential war industries. Thousands of workers are moving from factory to factory and from State to State to secure employment where higher wages are offered; and, as a result, competition among the employers has continued to increase to the extent that even the production departments of the Government have been forced into competition against one another. The demand for common labour is especially acute. And yet the records of the Department of Labour show that from 25 to 40 per cent of the common labour available is not productively employed; that there is such a constant movement of men from place to place as a result of the special inducements offered for their services that they are merely encumbering the railroads and producing nothing.

The problem of how to prevent this increasing competition and waste of labour was given to the Labour Policies Board for solution. The Board, after consideration, recommended that that part of the problem connected with the recruiting of labour should be undertaken by the Employment Service of the Department of Labour, and allocated to itself the task of preparing a standardized scale of wages and working conditions for both skilled and unskilled workers engaged in war production. The Board has not yet completed its study of the question, but in the meantime it has urgently requested the various departments and boards represented on it to refrain from making changes in standardization pending the standardization now under consideration.

In regard to the employment of women, the Board has recommended the

further introduction of women into occupations easily filled by them, thereby releasing additional men for war production; but that women should not be employed to replace men in occupations or places of employment clearly unfit for women owing to physical or moral conditions, as, for instance, bar-rooms, pool-rooms, in or about mines, smelters, quarries, or furnace work in glass works, etc. In addition, girls under 21 years of age should not be employed in occupations or places of employment clearly unfit for them owing to their youth, as for instance in the public messenger service, in street car, elevated, and subway transportation service, as elevator operators, as bell boys in hotels and clubs, etc.

The Board further recommends as follows: The introduction of women into war industries or into employments involving special hazards such as the use of industrial poisons, should be guided by the standards as to health, comfort and safety set up from time to time by the War Labour Policies Board, in addition to the standards already defined by the Federal Government and by State labour departments. The introduction of women into new occupations such as street railway service, public messenger service, etc., should be guided by regulations concerning hours of labour, night work, etc., such, for instance, as those adopted by the Industrial Commission of Wisconsin for street railway service and by the legislature of New York State for messenger service. The recruiting of mothers of young children for war industries should be discouraged. The introduction of women into positions hitherto filled by men should not be made a pretext for unnecessarily displacing men. Services of the Division of Women in Industry should be sought by employers to advise on best methods of introducing women, and the working conditions which should be established. Older men should be more generally employed. They constitute a largely unused labour reserve. In the past they have been considered superannuated at early ages. It is estimated that since the war began the maximum age of engaging men has advanced 10 to 12 years —that is, from about 38 to 50. It has been found that tasks can be graded for these workers according to their strength, and that work unsuitable for women, especially at night, can be performed by them. In many trades their experience is an asset which offsets less physical strength. Thus the productive power of this large class, now wasted, can be utilized.

All the above recommendations have been approved by the production and distribution agencies of the Government.

In regard to the employment of children the Board recommends, and the production departments of the Government have ordered, that "a contractor shall not directly or indirectly employ in the performance of his contract any minor under the age of 14 years, or permit any minor between the age of 14 and 16 years to work more than eight hours in any one day, more than six days in any one week, or before 6 a.m. or after 7 p.m."

The use of prison labour by contractors is not allowed.

Federal Employment Service

As a result of the Labour Policies Board's recommendation, the Employment Service[1] of the Department of Labour is preparing an approximate statement of the common labour requirements of war industries throughout the country for the next three months, and of the common labour resources in each State which may be utilized for war production. The information as to the amount of labour required is being furnished by the industries on a special form issued to each industry through the particular Government department with which its contract is placed; while the estimate of the number of unskilled

[1]See issues of GAZETTE for October, 1917, page 768; February, 1918, page 148, and April, 1918, page 233.

labourers not engaged in war work is being made through the Employment Service of the various states and through other agencies.

Acting on the advice of the Labour Policies Board, President Wilson has ordered that, after August 1, the exclusive centralization of recruiting for common labour shall be vested in the federal Employment Service. This order refers only to manufacturers engaged on war contracts and employing over 100 workers; non-war industries are affected only indirectly. But non-war industries must not offer superior inducements or otherwise prevent the transfer of workers urgently needed for war production, or in any way attempt to compete with the Government for labour.

For the purpose of assisting the federal Employment Service in its task there will be established (1) in each State an advisory board, to be known as the State Advisory Board of the United States Employment Service; (2) in each city or town a labour board, to be known as the Federal Community Labour Board; and (3) a State organization committee to establish the State Advisory Board and the Federal Community Labour Boards, to be known as the State Organization Committee of the United States Employment Service. In selecting the personnel of these boards the Employment Service will see that employers and workers are equally represented. So that, therefore, the plan of the three systems of boards and the equal representation of capital and labour, will give the employers and workers in each State and community a voice in the operation of the labour recruiting and distributing machinery of the federal Employment Service.

While the ban against private labour recruiting for the present applies only to unskilled labour, it must eventually include skilled labour also, and steps are already being taken by the Employment Service to meet the situation when it arises. It might be added that in its mobilization of machinists the Employment Service is receiving the co-operation of the International Association of Machinists, which is putting its whole weight behind the war labour programme; also that employers in several cities have promised their whole-hearted support.

THE FEDERAL TRADE COMMISSION'S REPORT ON PROFITEERING IN THE UNITED STATES

THE United States Senate, in a recent resolution, directed the Federal Trade Commission to furnish all the information in its possession relative to profiteering that would in any way enable Congress to deal with the matter. The Federal Commission has, accordingly, submitted to the Senate a report upon its investigations into the methods of price fixing, based upon the information obtained by it while engaged in the work for which it was created, viz.: (1) Cost-finding for the Food and Fuel Administrations, the War Industries Board and other executive departments; (2) Industrial Surveys made at the direction of the President and upon the Commission's own initiative; (3) Enforcement of the law against unfair competition.

At the outset the Trade Commission states that it has reason to know that profiteering exists, and attributes this partially "to inordinate greed and barefaced fraud," and partially to the "high fixed price" method of fixing a price for the whole industry based on costs at the plant where costs are highest. This

method of price-fixing results in exorbitant profits to the low cost producers.

"The outstanding revelation which accompanies the work of cost finding," says the report, "is the heavy profit made by the low cost concern under a governmental fixed price for the whole country. . . . In the case of basic metals, as in steel, when the Government announced a fixed price it was so high that it would insure and stimulate production. This has resulted in giving a wide range of profits. Under the device of cost plus a margin of profit these profits are necessarily great in the case of the low cost mills. Thus, while the market was prevented from running away, as it would have done undoubtedly if it had not been regulated by a fixed price, the stronger factors in the industry are further strengthened in their position and enriched by profits which are without precedent."

"The outstanding fact in the industrial surveys which the Commission has recently made," says the report, "is the heavy profit made by the meat packers and by those allied with them and by the flour millers."

In the case of flour milling, the report shows that although a Government-fixed price for wheat and an allowance of maximum margin of profit over cost on flour did stabilize the price somewhat, yet, owing to a lack of definition as to what constitutes manufacturing cost, the profits resulting continue to be heavy. "Before the Government interfered," says the report, "flour sold in 1917 with an average profit as high as 52 cents a barrel. After the fixation of the price of wheat and the determination of a maximum profit of 25 cents per barrel of flour, the very high average profit per barrel dropped toward the maximum. Where this decline in price did not bring the price down to the maximum—that is, where the millers continued to exceed the Government maximum, as they did in many instances —many of the millers were actuated by the hope that they would be allowed to include income and excess profit taxes in their costs and pass these on to the consumer. However, if there had been a fairly general compliance with the maximum of 25 cents the profits of the least efficient mills would have been considerable and those of the most efficient mills proportionately heavier. To the extent that the maximum price was exceeded the profits were larger and in general were in fact very great."

Experience with steel and coal also shows that "a high fixed price, while stabilizing an ascending market, produces an economic situation which is fraught with hardship to the consuming public and with ultimate peril to the high-cost companies through increasing the power of their low-cost competitors."

The Commission also points out that in cases where the Government fixes a definite margin of profit above costs, it thereby provides an incentive to companies to juggle their accounts in such a way as to make them show a fictitiously high statement of costs and so add to the volume of profits. "Increase of costs showing on the producers' books can be accomplished," says the report, "in various ways. The item of depreciation can be padded. Officers' salaries can be increased. Interest on investment can be included in cost. New construction can be recorded as repairs. Fic-

titious valuations on raw material can be added, and inventories can be manipulated."

The Commission in support of these statements cites the instance of a Kansas City milling company. "This company," says the report, "padded its costs by heavily increasing all its officers' salaries and manipulating the inventory value of flour bags on hand. As evidence of the length to which padding can be carried, it may be added that this company even included in its costs the gift of an automobile, which it charged to advertising expense. In this case the Federal Trade Commission recommended to the Food Administration that the company's license be revoked, and the recommendation was carried out.

Unlike the situation in steel, flour and coal, no price has been fixed upon petroleum and its products by the Government; but, nevertheless, the situation in the petroleum field is also the subject of criticism by the Trade Commission. In fact, the report—in one single sentence—condemns as devices to prevent inordinate profits both high-price fixing and the leaving of prices uncontrolled when it says that a market under the control of such a dominating factor as Standard Oil "can be one of huge profits without the device of the high fixed price." The Commission points out that when prices remain uncontrolled large profits may eventuate through the bidding up of prices by anxious buyers. Prices may also be forced up by spreading false and misleading information concerning the condition of supply and demand. "Reports have been circulated that the supply of gasoline was endangered for the purpose of maintaining the high price of that product and the heavy profits from it. At different stages of the oil industry different products of petroleum have yielded the heavy profits. Kerosene was once the chief profit producer. Gasoline followed and superseded it as the chief producer of profits. Enormous profits are now being made in fuel oil, with the advantage to the refiner that the high price of that product meets no popular challenge. Gasoline is maintained at its present high price and produces heavy profits for the low-cost refiners."

The Commission makes no specific recommendations bearing upon the elimination of profiteering, except to quote President Wilson, where he says: "The profiteering that cannot be got at by the restraints of conscience and love of country can be got at by taxation. There is such profiteering now and the information with regard to it is available and indisputable."

REPORTS OF EMPLOYMENT OFFICES

DURING June there was a decrease of nearly 8 per cent in the demand for labour as compared with May on the basis of the daily average of vacancies notified to 110 employment offices (81 commercial, 17 public and 12 philanthropic). As compared with the demand reported for June of last year by practically identical offices, there was an increase of almost 4 per cent. The total

number of vacancies notified to all offices in June was 36,946, a daily average of 1510.6, as compared with 1638.5 in May, 1918, and with 1457.5 in June, 1917. The number of persons placed was 16,718, a daily average of 666.1, as compared with averages of 685.1 and 723.7 in the preceding month and in June of last year. The proportion of the total vacancies filled to the total vacancies notified was 44.1 per cent, as compared with 41.8 per cent in May and with 49.7 per cent in June, 1917.

As to employment for woman and girl workers, the number of vacancies notified was 6,497, a daily average of 259.0 as compared with 258.4 in May and with 259.7 in June, 1917. The number of such workers placed was 2,210, a daily average of 90.7, as compared with 88.5 in May and with 95.2 in the corresponding period of 1917. The proportion of vacancies filled to vacancies notified for men and boys was 47.6 per cent, and for women and girls 34.0 per cent, as compared with 41.6 per cent and 36.4 per cent, respectively, for May, and with 51.9 per cent and 35.4 per cent, respectively, for June, 1917.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Edmonton showed increases in the demand for labour both as compared with May, 1918, and with June, 1917. Toronto and Vancouver recorded declines as compared with the preceding month and gains as compared with the same month of last year, while Montreal and Winnipeg reported decreases in both cases. Of the smaller centres, Ottawa and Hamilton showed increases both as compared with May, 1918, and with June, 1917.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 2,162, a daily average of 86.2, as compared with averages of 76.9 in May and 76.1 in June, 1917. The number of casual jobs secured was 4,646, a daily average of 191.2, as compared with averages of 230.7 in the preceding month and with 168.9 in June of last year.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 35 cities, showed an increase during July as compared with the previous month, the total value of building permits rising from $3,667,399 in June to $5,863,834 in July, an increase of $2,196,435 or 59.9 per cent. All the provinces, except Manitoba and Saskatchewan, recorded increases, those in Ontario, Quebec, New Brunswick and British Columbia being especially noteworthy. As compared with the corresponding month of 1917, there was an

Total—35 cities	**$3,667,399**	**$5,863,834**	**$4,590,461**	**+$2,196,435**	**+ 59.89**	**+$1,273,373**	**+ 27.74**

increase of 27.7 per cent, the value for July, 1917, being $4,590,461. In this comparison, Quebec was the only province to indicate a decline.

Of the larger cities, Toronto and Vancouver reported increases both as compared with the preceding month and with July, 1917, Montreal showed a gain as compared with June and a decline in comparison with July, 1917, while at Winnipeg there was a decrease as compared with June and an increase over July of last year. Of the smaller centres, Halifax, Westmount, Brantford, Ottawa and Edmonton all showed large increases in both comparisons.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF JUNE, 1918

THE present article on unemployment among the members of local trade unions, which is the tenth quarterly report on the subject, deals with unemployment as at the end of June, 1918, and is based on returns received from 1,389 labour organizations with a total membership of 160,426, or over 78 per cent of the entire trade union membership of the country. Trade unionists out of work on account of trade disputes or disability were not included. For all occupations represented, 0.5 per cent of the members were unemployed, as compared with 1.7 per cent in March, 1918, 1.3 per cent in June, 1917, and 2.1 per cent in June, 1916. That the percentage unemployed at the end of June is smaller than has ever been reported is due to greater activity in practically all the groups of industries, particularly building and construction, transportation and manufacturing.

Employment in the manufacturing and mechanical industries, as reported by 365 unions, having a combined membership of 42,144, was considerably brisker in June than in March, 1918, and also than in the same quarters in 1917 and 1916, there being only .14 per cent of the members idle. In the first comparison the improvement is chiefly attributable to a greater volume of employment in the leather and clothing trades, while as compared with June of last year the food, tobacco and liquor group and the glass bottle blowers were more active. As to the sub-groups, the percentage of unemployment in the metals, machinery and conveyances industries was smaller than in the preceding quarter and also than in June, 1916, though it was slightly larger than in June of last year. Food, tobacco and liquor workers were somewhat slacker than in March and in June, 1917, but improvement was shown over the same month in 1916. Unemployment in textiles, carpets and cordage remained stationary as compared with March, and in comparison with the preceding Junes the alteration was inconsiderable. Clothing workers were much brisker than at any time since June and September, 1916. Pulp, paper and fibre tradesmen, as reported by 19 unions, appear uniformly well engaged; while in the printing, publishing and paper goods industries the change in the percentage was trifling. Woodwork and furniture workers were better employed than in the preceding quarter, but there was a falling off from June, 1917. Employment in the leather, boots and shoes group appeared much

brisker than in either March, 1918, or June, 1917.

Reports from 569 organizations of transportation workers, having a total membership of 65,018, indicate that .42 per cent of the members were out of work, as compared with 1.22 per cent in March, .51 per cent in June, 1917, and .5 per cent in June, 1916. Steam railway employees, whose returns constitute about 70 per cent of the total group membership reporting, were better engaged than in any previous quarter. Street and electric railway men reported no member out of work as compared with small fractional percentages of unemployment in March, 1918, and in June, 1917 and 1916. Navigation workers and teamsters and chauffeurs were better engaged than in the previous quarter and the percentage altered very slightly from the same periods in 1917 and 1916.

In the mining, quarrying and refining of ores group, reports were received from 59 unions having an aggregate membership of 20,535. The percentage of unemployment was smaller than has ever been reported, there being improvement in each of the sub-groups.

The percentage unemployed in the building and construction trades, as reported by 215 unions with 16,624 members, was 1.57 per cent. That this is the smallest percentage yet recorded is due to the noteworthy improvement in the volume of employment afforded bricklayers, masons and plasterers particularly, while carpenters and joiners, stone and granite cutters, plumbers and steamfitters and other tradesmen in the group, were well employed in comparison with former reports.

In the public employment group, as reported by 48 unions with a combined membership of 4,336, .02 per cent of the members were unemployed as compared with .04 per cent in June, 1917, and with no members out of work in March, 1918, and June, 1916.

Employment in the group of miscellaneous trades, as indicated by returns received from 131 unions with 11,469 members, was brisker than in any previous report, hotel and restaurant workers, musicians and theatre employees and stationary engineers being particularly well engaged. Clerks and barbers, however, were somewhat slacker than in last March or in June, 1917 and 1916.

The percentages reported unemployed in the different groups of occupations are indicated in the following table:

Occupation.	June 1918	Mar. 1918	Dec. 1917	Sept. 1917	June 1917	Mar. 1917	Dec. 1916	Sept. 1916	June 1916

The following table summarizes the returns by provinces. In Quebec, Ontario, Manitoba and Saskatchewan the percentage reported unemployed is smaller than in any previous quarter, while in Alberta, September, 1917, alone recorded fewer members disengaged. Nova Scotia and Prince Edward Island and British Columbia showed larger percentages unemployed than in March, but there were declines as compared with June, 1917 and 1916. In New Brunswick, the percentage was slightly greater than in the previous quarter and in the same period of 1917, while it was less than in June, 1916.

Province.	June 1918	Mar. 1918	Dec. 1917	Sept. 1917	June 1917	Mar. 1917	Dec. 1916	Sept. 1916	June 1916
Nova Scotia and Prince Edward Island	.16	.03	2.64	.11	.23	5.72	.74	.47	.49

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

REPORTS from fifteen cities showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in July, showed increases of not quite 2 per cent in the number of workers and of slightly over 4 per cent in the wages paid. In July, 7,813 persons were temporarily employed in the two weeks and the pay-rolls amounted to $288,464.97 as compared with 7,690 employees and an aggregate pay-roll of $276,950.08 in June.

Montreal, Hamilton, London, Brandon, Regina, Moose Jaw, Edmonton and Vancouver all showed increases, both in the nmber of workers and in the wages paid. At Winnipeg there was a decrease in the number of employees, but the amount of wages paid was larger. St. John, Ottawa, Toronto, Saskatoon, Calgary and Victoria reported declines in both cases. At Toronto this is largely accounted for by the strike which took place there in the early part of last month.

The accompanying table summarizes reports from the nine cities for which returns are available since July, 1916. The table shows that, as regards the number of workers, a decline began in January, 1917, and continued almost without interruption to November. During December, January, February and March an upward tendency was evidenced, but in April, May and June there were again decreases. July, however, records a larger number of employees than in May and June. As to wages, the total reported for July is the largest since that for March.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS. JUNE AND JULY, 1918.

	Number of employees temporarily employed in first fortnight in:		Amount of wages paid employees temporarily employed in first fortnight in:

FAIR WAGES CONTRACTS, JULY, 1918

DURING July the Department of Labour received for insertion in the LABOUR GAZETTE information relative to four fair wage contracts, two of which were awarded by the Department of Railways and Canals and the remaining two by the Department of Public Works. These contracts all contained the usual fair wage clause.

DEPARTMENT OF PUBLIC WORKS. — Repairs to Langevin Pier, Cobourg, Ont. Name of contractor, R. Brewder, Ottawa, Ont. Date of contract, July 18, 1918. Amount of contract, schedule rates.

DEPARTMENT OF PUBLIC WORKS. — Painting of Military Hospital Buildings, Ste. Anne de Bellevue, Que. Name of contractors, Goodwin's, Limited, Montreal, Que. Date of contract, July 6, 1918. Amount of contract, $28,-759.00.

DEPARTMENT OF RAILWAYS AND CANALS. — The rebuilding of the Lower Entrance Pier of Lock No. 23 of the Rapide Plat Canal. Name of contractor, William Bermingham, Kingston, Ont. Date of contract, July 8, 1918. Amount of contract, schedule rates.

DEPARTMENT OF RAILWAYS AND CANALS. — The rebuilding of the North Lower Entrance Pier of New Lock No. 25 at the Village of Iroquois, on the Galops Canal. Name of contractor, William Bermingham, Kingston, Ont. Date of contract, July 8, 1918. Amount of contract, schedule rates.

FURTHER REGULATIONS AFFECTING WESTERN COAL MINES [1]

DURING the month of July, Mr. W. H. Armstrong, Director of coal operations for the mines in southeastern British Columbia and southwestern Alberta, issued a number of orders in regard to working conditions and scales of pay in various mines; also an order in reference to the price of coal at the mouth of the pit.

As the result of a number of complaints that have been received by the office of the Director of coal operations in regard to the increase in the price of coal at the pit mouth, the Director has ordered that in future, before any increase in price is made, it will be necessary to obtain authority from him. If any coal operator desires to increase the price of coal, an application stating the reason therefor shall first be made to the Director, whereupon the matter will receive proper consideration.

A request was received for cost of living increases from the men employed on the Smoky Valley Railway at the mines of the Blue Diamond Coal Company, Limited, Brule Mines, Alberta. The Director, after investigation, was of the opinion that the train crews are employed by the railway company, but that it had not been established that the section men are not employed by the coal company; he, therefore, ordered that the section men should receive cost of living increases, to come into effect from the date of the application for such increases.

A dispute between the McGillivray

[1] See June, 1918, issue, page 439, and preceding issues.

Creek Coal and Coke Company and its employees as to the payment for lagging when put in behind the sides of room timbering. The employees contended that neither by past practice nor under the terms of the tentative agreement are they supposed to do the class of work in question without remuneration. The Director, upon investigation, found that at the mines of the International Coal and Coke Company at Coleman, where conditions were practically the same as those at the McGillivray Mines, practically no side lagging was used behind the room sets; he therefore ordered that the payment of 50 cents per side be made for lagging of the required height.

An order affecting the Monarch Mines of the North American Collieries, Limited, at Drumheller, Alberta, provided that all coal passing over a one-and-half inch screen should be paid for at certain specified screened coal rates; that loading out of machine dirt should be paid for at the rate of 35 cents per car; that over-shovelling beyond 12 feet shall be paid for at the rate of 60 cents per lineal yard. Prices were also specified for other classes of work.

Another order, affecting the Michel mines of the Crow's Nest Pass Coal Company, cancelled a previous order applying to those mines. Owing to the various places where dump cars are used at the Michel mines being of different cubical contents, the Director is of the opinion that, in lieu of the 60 cents per lineal yard provided in the previous order for this class of work, the sum of 6½ cents per cubic yard be paid, and has ordered accordingly.

A dispute having arisen at the Pacific Pass Mine of the North American Collieries at Lovett, Alberta, as to whether "McGintys" should be handled entirely by the company, the Director has ordered that for each time a "McGinty" is moved and properly set the company will pay $3.63, and that the maximum distance it shall be moved shall be 12 feet.

An order applying to the Pembina Mine of the North American Collieries, Limited, at Evansburgh, Alberta, fixed various rates of pay for runners, helpers, scrapers, loaders; also for yardage, track laying, timbering and other work.

A dispute at the mine of the Jasper Park Collieries, Limited, Pocahontas, Alberta, regarding the wages paid to a man driving a horse and cart, the Director is of the opinion that a man so employed is entitled to a teamster's rate of wages, and has ordered that he be paid $3.66 a day.

A dispute arose out of the dismissal of a coal miner, named Robert Taylor, from the employ of The Rosedale Coal and Clay Products Company, Rosedale, Alberta. The reason for the man's dismissal, it is alleged, was because he was connected with trade union affairs. The Director has ordered that the company shall reinstate Taylor in their employ.

A number of minor grievances on the part of the workers at the mines of the Western General Coal Company, Drumheller, Alberta, were investigated and satisfactorily adjusted. Some of the complaints made by the men were that the wash-house was too small; that the house rents charged by the company were too high; that second-hand mattresses in bad condition were being sold to them; that, contrary to general practice, they were charged for carbide for use in mine lamps; that the company's office officials were uncivil. It is stated that a strike was averted through the adjustment of these grievances.

THE MINIMUM WAGE BOARDS OF MANITOBA AND BRITISH COLUMBIA

THE Manitoba Minimum Wage Board has announced a minimum wage for women and girls employed in food stuff factories. Under the new schedule the lowest wage to be paid inexperienced girls under 18 years of age shall be $7.00 a week; while to experienced workers the minimum weekly wage shall be $10.00, except in pickle, macaroni and vermicelli factories, where it shall be $9.50. An investigation conducted last fall disclosed the fact that nearly 300 women and girls were employed in these factories at wages ranging from $5.00 upwards.

An account of the Board's investigation into the laundry industry was given in the July issue of the GAZETTE, and the text of the Manitoba Minimum Wage Act is given elsewhere in this issue.

The Minimum Wage for Women Act for British Columbia, passed at the last session of the Legislature, provides for the appointment of a Minimum Wage Board consisting of three members, of whom one shall be the Deputy Minister of Labour and one shall be a woman. The Board has now been appointed as follows: J. D. McNiven, Deputy Minister of Labour, chairman; Mrs. Helen G. McGill, Judge of the Juvenile Court of Vancouver; and Thomas Matthews, a member of the Board of School Trustees of Vancouver. The Board has power to fix a minimum wage for women engaged in industries, and is also clothed with extensive powers to make investigations into conditions in the various industries in which women are employed.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE SECOND QUARTER OF 1918

DURING the second quarter of 1918, sixty changes in rates of wages and hours of labour, affecting approximately 26,500 workpeople, were reported to the Department, as compared with 26 changes affecting approximately 18,800 workpeople in the first quarter of 1918, and 150 changes affecting approximately 81,900 workpeople in the second quarter of 1917. Of the 60 changes, 57 were wage increases, two an increase in wages with a reduction in hours, and one a reduction in hours. In the mining industry only three changes took place, yet 10,765 workpeople were affected. Approximately 9,150 workpeople were affected by the 17 changes in transportation, while 19 changes occurred in the building trades affecting approximately 2,500 employees.

The particulars of each change, so far as they are known to the Department, are given in the following table:

CHANGES IN WAGES AND HOURS DURING APRIL, MAY AND JUNE, 1918

Class of workpeople affected	Firm or establishment	Approximate number of workpeople affected	Date from which change took effect	Particulars of change
METALS, MACHINERY AND CONVEYANCES—				
Shipbuilders	Collingwood Shipbuilding Co.	375	Apr. 4	Increase ranging from 20 to 30 per cent and hours reduced from ten to nine.
Machinists, etc	Employers Hamilton.	100	May 1	Wages increased five cents per hour.
Metal workers	Employers Hamilton.	50	May 1	Wages increased two and a half cents per hour
Patternmakers	Employers Hamilton.	50	May 1	Increase of 7½ cents per hour.
Moulders, etc	Employers Peterboro.	60	June 24	Wages increased 1.40 per day.
FOOD, TOBACCO AND LIQUORS—				
Brewery workers	Dominion & O'Keefe Brewing Cos.	275	June 1	Increase of $2 per week.
Food factory workers	All employers in Manitoba.	300	June 1	Wages increased from $7.00 to $9.00 and $10.00 per week.
TEXTILES—				
Cotton mill workers	Dom. Textile Co., Montmorency Falls.	1,489	Apr. 8	Increase of 10 per cent.
CLOTHING AND LAUNDERING—				
Garment workers	Turner, Beeton and Co., Limited.	30	June 10	Wages increased $2 per week.
PRINTING, PUBLISHING & PAPER GOODS—				
Job compositors	All employers Hamilton	150	May 1	Wages increased from $19.50 to $24 per week,
Floormen	" " "	.....	.....	Wages increased from $22 to $24.50 per week.
Machine operators	" " "	.....	.....	Wages increased from $22.50 to $25. per week.
Pressmen, etc	All employers Hamilton.	75	May 1	Advanced from $19.50 to $24 per week.
Assistants & feeders	" " "	.....	.....	Advanced from $12 to $17 per week.
WOODWORKING AND FURNITURE—				
Broom makers	Employers, Hamilton.	15	May 1	Increase in wages.
LEATHER, BOOTS AND SHOES AND RUBBER—				
Boot and shoe workers	McPherson Shoe Co.	300	May 1	Wages of cutters increased 4 cts per hour; all others, 10 per cent.
TRANSPORTATION—				
Express employees	Dom. Express Co., Winnipeg.	200	May 1	Increase of 35 per cent.
Stationmen	Grand Trunk Ry., System.	3,000	May 1	Increase in wages.
Conductors and motormen	Dominion Power Co, Hamilton.	100	Apr. 1	Wages increased.
Conductors and motormen	Hamilton St. Ry., Hamilton.	260	Apr. 1	Increase in wages of from 6 to 8 cents per hour.
Conductors and motormen	Sandwich & Windsor Ry., Sandwich.	80	May 1	Increase of 7 cents per hour.
Motormen and conductors	Sherbrooke St. Ry.	30	May 1	Bonus of 5 per cent granted.
Motormen and conductors	Winnipeg St. Ry.	950	May 1	Increase of from 2 to 3 cents per hour.
Motormen and conductors	Port Arthur & Fort William Civic Ry.	33	May 1	Increase of from 4 to 5 cents per hour.
Motormen and conductors	Hull Electric Ry.	130	May 29	Increase ranging from 25 to 50 per cent.

CHANGES IN WAGES AND HOURS DURING APRIL, MAY AND JUNE, 1918.—*Continued.*

Class of workpeople affected	Firm or establishment	Approximate number of workpeople affected	Date from which change took effect	Particulars of change
TRANSPORTATION—*Continued.*				
Motormen and conductors	Brantford Municipal Railway.	35	May 23	Increase in wages.
Motormen and conductors	London St. Ry.	169	May 1	Increase ranging from 5 to 8 cents per hour.
Trackmen and barnmen	London St. Ry.	63	May 1	Increase ranging from 2 to 3½ cents per hour.
Motormen and conductors	Tramway Co., Montreal.	3,129	June 1	Wage increase of 20 per cent.
Marine firemen, oilers, etc	All Companies, Victoria.	300	Apr. 1	Increase ranging from $10 to $15 per month.
Steamer employees	" " "	450	Apr. 1	Increase ranging from $10 to $15. per month.
Longshoremen	Stevedoring Cos.	160	June 1	Wage increase of 20 cents per hour.
Tramsters	Gilles-Guy Coal Co.	60	Apr. 23	Increase of $1 per week.
MINING, QUARRYING & REFINING OF ORES—				
Coal miners	Western Coal Operators Association.	7,000	Apr. 1	General increase.
Coal miners	Western Fuel Co.	1,000	Apr 16	Wage increase of 50 cents per day.
Miners	Dominion Iron and Steel Co.	2,765	June 1	General increase.
BUILDING AND CONSTRUCTION—				
Painters	Employers Winnipeg.	250	Apr. 1	Wage increase of 5 cents per hour.
Bricklayers and masons	" " "	350	" "	Increase of 5 cents per hour.
Bricklayers and masons	Employers Niagara Falls.	35	" 15	Wage increase of 5 cents per hour.
Bricklayers	Employers London.	60	May 1	Increase of 5 cents per hour.
Electric workers	Employers Hamilton.	85	May 1	Increase of 5 cents per hour.
Stonecutters	" " "	23	May 1	Increase of 5 cents per hour.
Painters, etc	" " "	120	May 1	Increase of 5 cents per hour.
Structural iron workers	" " "	40	Apr. 1	Increase of 10 cents per hour.
Lathers	" " "	15	May 1	Wage increase of 50 cents per day.
Bricklayers and masons	" " "	200	May 1	Increase of 5 cents per hour.
Plumbers and steamfitters	" " "	125	May 15	Increase in wages.
Plasterers	" " "	80	May 15	Increase of 10 cents per hour.
Plasterers	Employers Halifax.	215	May 1	Increase of 10 cents per hour.
Carpenters, etc	" " "	308	May 1	Increase of 10 cents per hour.
Painters	" " "	200	May 1	Wage increase of 10 cents per hour.
Carpenters	Employers Niagara Falls.	225	May 1	Wages advanced 5 cents per hour.
Carpenters	Employers Bridgeburg.	20	May 1	Increase of 10 cents per hour.
Carpenters	Employers Port Colborne.	50	May 1	Wage increase of 10 cents per hour.

CHANGES IN WAGES AND HOURS DURING APRIL, MAY AND JUNE, 1918.—*Concluded.*

Class of workpeople affected	Firm or establishment	Approximate number of workpeople affected	Date from which change took effect	Particulars of change.
BUILDING AND CONSTRUCTION—*Continued.*				
Carpenters	Employers.....Welland.	35	1 May	Increase in wages and reduction in hours.
Bricklayers and masons	Employers.....Windsor	60	June 15	Increase of 5 cents per hour.
LUMBERING—				
Mill hands, etc	Stilson Co.,.....St. John.	257	May 23	Wage increase of 45 cents per day.
PUBLIC EMPLOYMENT—				
Street cleaners	City of Vancouver.	300	May 4	Increase of 25 cents per day.
Foremen, labourers, etc	City of St. John....	44	May 15	50 cents per day increase.
Firemen	City of Victoria....	60	June 1	General increase.
Firemen	City of Peterboro..	17	May 28	War bonus of 15 per cent.
Firemen	City of Brantford...	21	June 14	Increase of 15 cents per day.
MISCELLANEOUS—				
Cooks and waiters	Employers.....Victoria.	65	Apr. 15	Hours reduced from 9 to 8 per day.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JULY, 1918, AND IN OTHER COUNTRIES

THE movement was upward in retail prices as well as in wholesale prices. Many of the changes were seasonal, including increases in certain grains, dairy products, potatoes, and fuel as well as decreases in livestock and meats.

In retail prices the average cost of a weekly family budget of staple foods was $13.00 as compared with $12.77 in June, and $11.62 in July, 1917, $8.46 in July, 1916, and $7.42 in July, 1914. The increases for the month were in meats, eggs, and potatoes with slight decreases in milk and dairy butter. Coal, wood, coal oil, and rent showed increases.

In wholesale prices the index number reached 284.0 for July as compared with 280.6 for June, 242.6 for July, 1917, and 134.6 for July, 1914. The chief increases for the month were in dairy products, fresh and canned vegetables, textiles, and lumber but there were decreases in livestock, meats, and fresh fruits.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other

important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

On August 1st, the Canada Food Board issued a statement as to what the highest prices of certain substitutes for flour should be at retail, in view of existing wholesale prices, east and west of Fort William. It was pointed out that these were not fixed prices and would vary with changes in the prices of grain.

WHOLESALE AND RETAIL PRICES OF FLOUR SUBSTITUTES

	Wholesale (Per bbl. of 196 lbs.)		Retail (Per lb.)	
	East	West	East	West
Corn flour, white	$11.50-12.10	.....	6¾c	....
Corn flour, blended	10.50—11.10	11.80—12.80	6¾c	8c
Rye Flour	13.00	12.00*	7½c	8½c
Barley Flour	11.00	11.50	6¾c	6c

*$13.50 in British Columbia.

Retail Prices

Sirloin steak was higher in price in several of the cities east of Fort William, but west of that city, there were several decreases. Similar changes occurred in other lines of meats, except salt pork and bacon which were comparatively steady throughout the Dominion.

Eggs, fresh, were higher throughout the Dominion. Milk was lower in price at St. John's, Montreal, and Regina. Dairy butter averaged slightly lower, being down in several cities and up in others. Creamery butter was also higher in some of the cities but lower in others but averaged the same as in June. Cheese was almost unchanged.

Bread was lower at Sorel, having declined toward the end of June. At Prince Albert, the price was higher. Flour changed slightly in some of the cities east of Fort William. Tapicoa showed some increases. In canned vegetables there were some advances.

Potatoes rose considerably in some localities as the stock of old potatoes became exhausted and new potatoes were not yet being marketed in large quantities. In some localities the prices were lower as supplies were good.

Coal, anthracite, was higher in several of the cities by 50c or $1.00 per ton but, at Belleville the price was reduced from $12.00 to $11.50 per ton, the same

*December only. †Charlottetown and Saskatoon omitted.

rate as at Kingston and other cities in that neighborhood. Coal, bituminous, showed some advances in Western Canada. Wood was also higher in several of the cities.

Rent was higher at Guelph and Windsor, Ont.

Wholesale Prices.

GRAINS AND FODDER.—Wheat was unchanged at the prices fixed in 1917. Barley at Winnipeg rose from $1.18 per bushel to $1.35 but declined 10c later. Barley at Toronto advanced from $1.26 to $1.37. Oats at Winnipeg rose from 85c to 90c per bushel but eased off. Oats at Toronto advanced from 80c to 88c but eased off 1c. Corn advanced from $1.70 to $2.00 but eased off to $1.87. Flaxseed advanced from $3.76 to $4.53. Rye advanced from $1.80 to $1.90. Hay was easier at Montreal and Toronto being down to $14.50 and $14.00. Straw was 50c per ton lower.

ANIMALS AND MEATS.—Cattle, choice butcher, had fallen toward the end of June at Winnipeg to $15.00 per hundred but in the middle of July advanced to $15.25 for best quality. At Toronto, cattle declined from $12.75-16.00 to $12.00-15.00. Beef, hindquarters, declined from 33c per pound to 32c at the beginning of the month and each week thereafter, coming down to 28c at the end of the month. Forequarters declined from 22c per pound to 18c. Hogs advanced from 17c per pound to 17½c. Salt pork declined from $58.00 per barrel to $56.00. Sheep were again lower, being down to $13.50-15.00. Mutton was down from $20.00-25.00 to $19.00-24.00 per hundred. Dressed lamb declined from 32-34c per pound to 29-31c.

DAIRY PRODUCTS.—Finest creamery butter at Montreal was easier at 43¾-44c per pound. Eggs advanced from 45c per dozen to 55c at Montreal and from 44c to 49c at Toronto.

FISH.—Fresh lake trout at Toronto rose 1c but white fish declined an equal amount. The trade in dried fish on the Atlantic Coast was hindered by lack of dry weather for drying the fish. Stocks of fish for export were reported to be almost bare and large supplies of the spring catch were not being dried owing to the damp weather. Reports of the summer catch indicated favourable conditions. In pickled fish the catch of mackerel and herring was reported to be short. The lobster catch for the season was reported to be smaller than a year before.

FRUITS AND VEGETABLES.—Strawberries were down to 20-23c at the beginning of July at Toronto as compared with 11-13c a year before. Cherries were up to $1.35-1.50 per eleven quart basket as compared with 75c-$1.00 a year before. Raspberries came on at 28-30c per quart as compared with 20c in 1917. Bananas were unchanged at the high levels reached in May. Lemons declined from $9.00-11.00 per box to $8.00-9.00. Valencia oranges were on at from $4.00 to $8.50 per box. Evaporated apples were down to 19c per pound. Potatoes were up to $2.50 per bag at Montreal and Toronto. Beans were lower at $6.50-7.50 per bushel. Canned corn rose 5c per dozen and canned peas advanced 25c per dozen for one line. Rolled oats advanced to $6.00 per bag. Some brands of sugar were up to $9.32 per hundred at Toronto in barrels. Salt was higher; also pepper and cream of tartar.

TEXTILES.—Unwashed wool was higher at 60-72c per pound. A line of woollen underwear was slightly easier at $20.00-20.50 per dozen. Raw cotton was 2½c per pound higher at 32.95c per pound. Manufactured cottons were also higher. A line of silk thread advanced $1.00 per pound. A line of table oilcloth advanced by 10 percent.

HIDES, LEATHER, BOOTS AND SHOES.—No changes were reported.

METALS AND IMPLEMENTS.—A brand of pig iron declined $2.00 per ton to $49.50. Antimony advanced to 18-21c per pound. Brass rose to 39½c per pound. Copper, lead, quicksilver, silver, and spelter were also higher. Grindstones and horseshoes were firmer.

FUEL AND LIGHTING.—Bituminous coal at Montreal advanced 35c per ton

a July of each year. *b* Foods. *c* 1901-1900—. *Quarter beginning that month.

and anthracite coal advanced 60c per ton. A line of matches was higher.

BUILDING MATERIALS.—Spruce deals at St. John were down from $38.00 per thousand to $26.00. Box boards at Ottawa rose to $38.00 per thousand. British Columbia fir and shingles also advanced. Coal tar was higher but soil pipe declined. Lead pipe advanced to 15c per foot. Wire nails and copper wire were up. White lead, linseed oil, putty, and turpentine advanced.

HOUSE FURNISHINGS.—No changes were reported.

DRUGS AND CHEMICALS.—On outside markets opium eased off slightly but carbolic, muriatic, and sulphuric acids advanced.

MISCELLANEOUS.—In raw furs, racoon was slightly higher. Sulphite pulp was firmer.

Prices in Other Countries

In the United Kingdom prices of foods averaged higher at the first of July than a month before, there having been increases in milk, eggs, and potatoes with a decrease in butter as reported by the Ministry of Labour in the *Labour Gazette*. In wholesale prices the index number of the *Economist*, London, showed increases at the end of June and again at the end of July. During July the chief increase appeared in minerals.

In the United States the index number of wholesale prices showed increases. *Bradstreets* reported an upward movement in bread stuffs, provisions, fruit, hides and leather, textiles, metals, coal, oils, naval stores, and building materials and in the miscellaneous groups. Livestock and chemicals, however, were downward.

In Italy the index number of wholesale prices computed by Professor Bachi on the model of that of the *Economist*, London, was up to 523.0 for May as compared with 462.3 for January, 290.0 in January, 1917, and 132.7 in January, 1915.

In Japan the index number of the *Oriental Economist* reached 203.6 for June as compared with 204.8 for May and 140.0 in February, 1917.

THE FIRST ANNUAL REPORT OF THE WORKMEN'S COMPENSATION BOARD OF BRITISH COLUMBIA

THE LABOUR GAZETTE for January, 1917 (page 2) gave a brief description of the personnel of the Board of Commissioners appointed to administer the new Workmen's Compensation Act of British Columbia[1] which came into effect on the first day of January, 1917. The first annual report of the Board is of more than usual interest, due to the fact that the commissioners are invested with many arbitrary powers in their administration of the Act.

The field of operation covered by the Board includes an annual pay-roll of approximately $100,000,000, and approximately 75,000 workmen, and about 6,000 employing firms.

[1]The Act is printed in "Labour Legislation in Canada for 1916," published by the Department of Labour, Ottawa.

The first work of the Board on assuming office was to make the terms and provisions of the Act known to all those who were likely to be affected by it. This was accomplished by means of addresses, circular letters and personal interviews. Particularly, was it pointed out to labour unions that injured workmen would no longer need to seek assistance of the Courts and the legal profession in order to get fair compensation for their injuries.

The moneys from which compensation and administration expenses are paid is received from the employers by means of assessment upon their pay-rolls. Basic rates were adopted in accordance with what is believed to be the hazard in each particular industry. The annual assessments are payable in instalments as the needs of each class of industry require;

but so long as the funds to the credit of any particular class are sufficient, no further instalment will be collected from the employers within that class. "By this means," says the report, "any efforts of employers which result in prevention of accidents result immediately and automatically in a lessening of the strain upon the funds of the class in which their industry is listed, and therefore makes it just so much the longer before it will be necessary to replenish the class funds by paying another instalment." The assessment is divided annually into four instalments, but in the case of one class only—that in which the operation of coal mines was listed—was it necessary to collect all four instalments. The collection of the full basic rate from employers in this class last year was directly attributable to the disaster at Fernie, in which 34 coal miners were killed.

In other classes, which include the lighter forms of wood manufacturing and also navigation, stevedoring and wharf operation, it was necessary to collect three instalments owing to serious accidents which occurred in the work of these classes. In most of the other classes two instalments were sufficient to pay the losses during the year.

In addition to the 12 classes named in the Act, the Board has created four new classes, namely: Class 13, the Provincial Government employees; Class 14, municipalities; Class 15, canning and fishing, and Class 16, explosives.

For the purpose of pay-roll audits a number of field auditors have been appointed. These auditors call upon employers and inspect and audit their pay-rolls. It is the intention of the Board that the pay-roll of every employer shall be inspected and audited at least once a year.

In regard to a proposed system of rating industries by merit, the Report says: "In order to introduce the merit-rating system contemplated by the Act, a complete record of the accidents happening in each employer's plant is being carefully kept. Rates may then be equitably adjusted to the particular conditions of individual plants. This plan is designated to enable employers who have reduced the hazards in their plants, by the installation of safety devices and by measures for accident prevention, to secure a proportionate reduction on rates through merit credits; and on the other hand penalize employers who neglect safety equipment in their plants and tolerate conditions dangerous to life and limb of their employees, by imposing a demerit differential in addition to the regular rate.

The Board experienced some difficulty at first in connection with the varying fees charged by medical men for rendering practically the same service. This difficulty, however, was finally adjusted by the establishment of the medical fee tariff, which has eliminated most of the difficulties in regard to medical fees.

After very careful investigation, the Board has added to the industrial diseases specified in the Act those of sulphur poisoning, trinitro-toluene poisoning, and cedar poisoning.

The total number of fatal accidents during 1917 was 217. These were distributed as follows: coal mining, 44 (38 of which were due to explosion); metal mining, 19 (5 due to explosion); logging industry, 43 (12 caused by falling trees); sawmills, 18; and of the remaining 93 fatal accidents in other industries, 22 were caused by drowning.

The total number of non-fatal accident claims reported during the year was 12,467. Of these, 5,483 were awarded compensation and finally disposed of during the year, the remainder being either still in receipt of compensation or in process of adjustment at the end of 1917. The average accidents per month were 1,140; but during the last six months the average slightly increased, "due to the fact that the workmen are becoming conversant with the Act and therefore are now making claims where in the past they said nothing."

The compensation payable is as follows: (a) In the case of total permanent

disability—a periodical payment to the injured workman of 55 per cent of his average earnings. The minimum shall not be less than $5 per week. (b) In case of permanent partial disability—a periodical payment to the injured workman of 55 per cent of his lost earnings. (c) In case of facial disfigurement, impairment of earning capacity may be recognized, and a lump sum allowed in compensation. (d) In the case of temporary total disability the compensation shall be that as outlined in (a). (e) In the case of temporary partial disability, the compensation shall be that as is outlined in (b).

The total amount of assessment received from the industries during 1917 (including interest on cash balances) amounted to $939,800. The compensation claims paid out for accidents during 1917 amounted to $358,200. The cost of administration (excluding permanent equipment) amounted to $48,200. The actual cost to the industries for administration amounted to 4.94 per cent of the moneys collected from assessments.

The report contains a paragraph on accident-prevention, from which the following extracts are taken:

"The primary purpose of workmen's compensation legislation should be to prevent injuries to workmen. . . . We have from time to time urged upon them to write us confidentially, making suggestions as to how best to improve their conditions, as well as to protect against injuries to their fellow-workmen. In order to further encourage suggestions from injured workmen as to the best course to be adopted to prevent against accidents of the nature of which befell him, a question was placed on his claim form in these words: "Suggest anything you can to prevent such accident"—at the same time advising the workman that his suggestion would be treated as absolutely confidential. Many valuable suggestions have been made by workmen, and in the case of every suggestion the same has been carefully inquired into and in many cases adopted.

"Rules for accident-prevention have been drafted by the Board for submission to public hearings which will shortly be held in accordance with the requirements of the Act.

"Some of the employers in the Province have their plants well safeguarded and also have their employees organized along safety lines. In the last six months of this year considerable work along these lines has been perfected. It has also developed another peculiar phase of the situation. An employer who has adopted measures is active in seeing that other employers in his class do likewise, and therefore it quite frequently happens that an employer takes up with other employers in his class the advisability of installing certain safety devices, and in some cases have reported to our Board the failure of some other employer in his class as not being active in that regard; in other words, we find an active co-operation on the part of the employers in the majority of classes towards adopting the most recent safety apparatus and devices."

MIGRATION AND SETTLEMENT

THE usual renewal of the Dominion Order-in-Council continuing the prohibiting of artisans and labourers from entering British Columbia was passed on May 18. Some reductions, however, were made in the renewal in the number of prohibited ports. The new Order-in-Council gives the prohibited ports as follows: Vancouver, Victoria, New Westminster, Nanaimo, Prince Rupert, Port Simpson, Anyox, Atlin, Comox, Ganges Harbour, Ladner, Ladysmith, Steveston, Chemainus, Powell River, Rykerts, Stewart, Union Bay, Whales Island, Newport, Alberni, White Pass.

IMMIGRATION AND EMIGRATION.—During April and May, 1918, 2,293 and 2,683 persons respectively (other than citizens of the United States) left the United States to take up permanent residence in British North America, as compared with 2,111 and 1,681 persons during February and March, 1918, and 1,043 and 1,043 persons during the corresponding period of 1917.

During April and May, 1918, 3,452 and 3,439 persons respectively (other than citizens of the United States) departed from British North America to take up permanent residence in the United States, as compared with 2,264 and 2,439 persons during February and March, 1918, and 7,304 and 6,204 persons during the corresponding period of 1917.

During April and May there was an outward balance against British North America of 1,915 persons.

HOMESTEAD ENTRIES. — During the second quarter of 1918 there were 258 homestead entries in Manitoba, 374 in Saskatchewan, 815 in Alberta and 25 in British Columbia, a total of 1,472 for the three months, as compared with 863 for the first quarter of 1918 and 2,777 for the corresponding period of 1917. The following statement shows the number and nationality of those who took up homesteads in the various provinces during the second quarter of 1918, with a comparison of the figures for the same period in 1917:

LANDS PATENTED. — According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the second quarter of 1918, the number of patents was 4,784 and the number of acres 792,863.83, as compared with 6,306 patents and 1,002,761.88 acres in the first quarter of 1918, and 5,850 patents and 949,710.80 acres in the corresponding quarter of 1917. The following statement gives details of lands patented during the second quarter of 1918, with a comparison of the figures for the same period in 1917:

LABOUR LAWS OF 1918

THE article on labour legislation which appeared in the April issue of the LABOUR GAZETTE was prepared at a time when several of the provincial legislatures were still in session. Since then these legislatures have been prorogued, and the present article indicates what part of the labour legislation programme of each was actually written into the statutes.

Of the laws noted in April as being under consideration by the Nova Scotia legislature, neither the Act relating to the closing of shops nor the Stationary Engineers Act has become law. The Coal Mines Regulation Act, however, was amended and consolidated, and amendments to the Workmen's Compensation Act, the Mechanics' Lien Act and the Railways Act were enacted. Two other bills of labour interest received a

first reading in the House, but were lost on subsequent readings. The first of these measures was an amendment to the Factory Act providing for minimum wages, weekly payment of wages and the maintenance of first aid chests in factories. The second bill provided that employers in certain specified industries must grant a hearing to a properly appointed committee of employees in the event of an industrial dispute.

New Brunswick enacted a Vocational Education Act constituting a Vocational Education Board and providing for the establishment of local vocational schools under the management of local committees. The Act authorizes provincial aid for such schools provided that the total amount expended under the Act shall not exceed $50,000 per annum. The most important Act passed in New Brunswick during the last session, however, was the Workmen's Compensation Act. Although the new law is similar in principle to the compensation laws enacted in recent years by Ontario, Nova Scotia, Manitoba and British Columbia, certain features of the new Brunswick Act deserve special mention. The list of industries to which Part I is applicable includes lumbering, but among those enumerated as being outside the scope of the Part are "persons employed in the woods in logging, cutting of timber, pulpwood, firewood, railroad ties or sleepers, or river driving, rafting, booming or the transportation of logs, timber, pulpwood, firewood, railroad ties or sleepers." Compensation is not payable under Part I if the injury is, in the opinion of the Board, intentionally caused by the workman, or wholly or principally due to intoxication or serious or wilful misconduct on the part of the workman, or to a fortuitous event unconnected with the workman's employment. The law provides for periodical compensation payments on a basis very similar to that of the Ontario and Nova Scotia Acts, with this important difference, that it is stipulated in the New Brunswick statute that the total aggregate amount of compensation paid shall not exceed the sum of $3,500. Industrial diseases are provided for in the Act on the same basis as accidents and the Board is empowered to declare by regulations what diseases shall be deemed industrial diseases. The various provisions of the Act become effective from a day to be named in a proclamation by the Lieutenant-Governor in Council. The text of this Act and also of the new Alberta Workmen's Compensation Act is reproduced at the end of this article.

Some aspects of the Alberta Workmen's Compensation Act were referred to in the April Gazette, but one or two additional points may be noted here. Whereas in Ontario, Nova Scotia and New Brunswick, the waiting period is seven, in Manitoba six and in British Columbia three days, the Alberta law provides that if a workman is disabled for ten days or more compensation is payable from the day of the accident, but if he is disabled for less than ten days compensation is payable from the fourth day. Compensation is payable under the new law in respect to industrial diseases and the schedule of diseases appended to the Act includes anthrax, lead poisoning, arsenic poisoning, mercury poisoning, phosphorus poisoning, ankylostomiasis and miners' phthisis. The Act is to come into force for mines, coke ovens and briquetting plants on August 1, 1918, and for the other industries within its scope on January 1, 1919. The Act does not apply to the various railways operating in the province. The new Boilers Act was passed by the legislature, and also an amendment to the Factories Act of 1917. This amendment extends the application of the principal Act and prohibits the employment of women between the hours of 11 p.m. and 7 a.m. except by special permission of an inspector. The Act is further amended by the inclusion of "war production necessities" among the special reasons for which an inspector may permit longer working hours than those prescribed by the statute. A fair wage clause in the Public Highways Act and an amendment to the Mines Act

complete the list of recent labour laws in Alberta.

The majority of the bills previously noted as being before the British Columbia legislature have become law. The Eight Hour Day Act, however, was lost and the Dangerous Employments Act was set aside for six months upon the proposal for a second reading. In addition to the bills mentioned in April, three amendments to labour laws were enacted. The Weekly Half-holiday Act of 1916 was amended so that the regular half-holiday which falls nearest any public holiday is to be cancelled, and the seven days immediately preceding Christmas are also exempted from the provisions of the Act. An amendment to the Factories Act orders the installation of suitable devices for carrying off noxious fumes and gases in printing-offices where there are three or more type-setting machines. The third amendment makes several changes in the Workmen's Compensation Act of 1916. Any employment under "the Crown in right of the Province" to which Part I would apply if the employer were a private person is now included within the scope of that Part. The section respecting the waiting period of three days is repealed and a new section substituted. Formerly no compensation other than medical aid was payable under Part I unless the workman was disabled for longer than three days from earning wages at his usual employment. In the new section the word "wages" is changed to "full wages." The amendment also empowers the Board to require employers in any industry to maintain first aid appliances and service and to install safety devices for the prevention of accidents or of industrial diseases.

The three Federal labour laws summarized in the April issue were passed by the Dominion Parliament, but two of the bills, the Employment Offices Co-ordination Act and the Act to provide compensation where employees of His Majesty are killed or suffer injuries while performing their duties, were amended during the third reading. Under the former Act as finally passed by the House, the allotment to a province must not exceed one half the amount expended by the province. A proviso added to the latter Act stipulates that employees on Government railways must elect between the benefits of the Railway Provident Societies and those of the new law. The Industrial Disputes Investigation Act amendment was passed without change. The text of the Employment Offices Co-ordination Act was printed in the May issue of the GAZETTE as part of a special article on the subject. The text of the two other Acts follows, and the text of the Manitoba Minimum Wage Act referred to in the April issue is also given.

The Act amending the Industrial Disputes Investigation Act

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

Chap. 27, Sec. 1. The following paragraph is inserted immediately after paragraph (d) of section two of The Industrial Disputes Investigation Act, 1907:

"(dd) A lockout or strike shall not, nor, where application for a Board is made within thirty days after the dismissal, shall any dismissal cause any employee to cease to be an employee, or an employer to cease to be an employer, within the meaning and for the purposes of this Act."

2. Section six of the said Act is repealed and the following is substituted therefor:

"6. (1) Whenever, under this Act, an application is made in due form for the appointment of a Board of Conciliation and Investigation, the Minister shall, within fifteen days from the date at which the application is received, establish such Board under his hand and seal of office, if satisfied that the provisions of this Act apply.

"(2) The decision of the Minister as to the granting or refusal of a Board shall be final, and when a Board is granted by the Minister, it shall be conclusively deemed to be authorized by and to be in accordance with the provisions of this Act, and no order shall be made or process or proceeding had or taken in any court to question the granting or refusal of a Board, or to review, prohibit, or restrain the establishment of such Board or the proceedings thereof."

3. Section ten of the said Act is amended by adding at the end thereof the following: "and for the purposes of subsection two of section twenty-nine of this Act, from the time the Board is reconvened by the Chairman until the report required under such section is transmitted to the Minister."

4. Section twenty-two of the said Act is amended by adding thereto the following subsection:

"(2) Should it at any stage of the proceedings be made to appear to the Minister that it is necessary, in order to deal satisfactorily with the matters in dispute, that some other matter or matters involved in or incidental to those appearing in the application and statement in answer, if any, should also be referred to the Board, the Minister may under his hand and seal of office refer such matters to the Board accordingly."

5. Section twenty-nine of the said Act is repealed and the following is substituted therefor:

"29. (1) For the information of Parliament and the public, the report and recommendations of the Board, and any minority report, shall, without delay, be published in the LABOUR GAZETTE, either verbatim or in summary form as the Minister may determine.

"(2) Where any question arises as to the meaning or application of, or as to anything relating to or connected with,—

(a) any recommendation made by the Board, or,

(b) any settlement agreement drawn up by the Board under section twenty-four of this Act,

the Minister, where he deems it expedient, may, on the application of either party or of his own motion, request from the chairman of the Board an expression of the Board's opinion upon such question, and the chairman shall upon receipt of such request reconvene the Board, and the Board shall as soon as practicable report to the Minister its opinion upon such question."

6. The said Act is amended by inserting the following sections immediately after section sixty-three thereof:

"63A. Where in any industry any strike or lockout has occurred, and in the public interest or for any other reason it seems to the Minister expedient, the Minister, on the application of any municipality interested, or of the mayor, reeve, or other head officer or acting head officer thereof, or of his own motion, may, without application of either of the parties to the dispute, strike, or lockout, whether it involves one or more employers or employees in the employ of one or more employers, constitute a Board of Conciliation and Investigation under this Act in respect of any dispute, or strike or lockout, or may in any such case, if it seems to him expedient, either with or without an application from any interested party, recommend to the Governor in Council the appointment of some person or persons as commissioner or commissioners under the provisions of the Inquiries Act to inquire into the dispute, strike or lockout, or into any matters or circumstances connected therewith.

"63B. The Minister, where he deems it expedient, may, either upon or without any application in that behalf, make or cause to be made any inquiries he thinks fit regarding industrial matters, and may cause such steps to be taken by his department and the officers thereof as seem calculated to secure industrial peace and to promote conditions favourable to settlement of disputes."

The Act for the Compensation of Employees of the Dominion Government

An Act to provide Compensation where Employees of His Majesty are killed or suffer injuries while performing their duties.

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

Chap. 15, Sec. 1. (1) An employee in the service of His Majesty who is injured, and the dependents of any such employee who is killed, shall be entitled to the same compensation as the employee, or as the dependent of a deceased employee, of a person other than His Majesty would, under similar circumstances, be entitled to receive under the law of the province in which the

accident occurred, and the liability for and the amount of such compensation shall be determined in the same manner and by the same Board, officers or authority, as that established by the law of the province for determining compensation in similar cases, or by such other Board, officers or authority or by such court as the Governor in Council shall from time to time direct.

(2) Any compensation awarded to any employee or the dependents of any deceased employee of His Majesty by any Board, officer or authority, or by any court, under the authority of this Act, shall be paid to such employee or dependent or to such person as the Board, officer, or authority or the court may direct, and the said Board, officer, authority and court shall have the same jurisdiction to award costs as in cases between private parties is conferred by the law of the province where the accident occurred.

(3) Any compensation or costs awarded hereunder may be paid by the Minister of Finance out of any unappropriated moneys in the Consolidated Revenue Fund of Canada.

(4) Provided that no employee on the Canadian Government Railways, who is an employee within the meaning of the Intercolonial and Prince Edward Island Railways Employees' Provident Fund Act, shall be entitled to compensation under this Act for or on account of any injury for which an allowance is provided under the provisions of the said Provident Fund Act, unless such employee has, prior to the date of the injury for which compensation is sought, given notice in writing to the General Manager of the said railways under whom he is employed, electing to accept the compensation under this Act instead of such allowance, and no person who has so elected shall be entitled to any such allowance; and provided further, that no dependent of any such employee who is killed shall be entitled to any compensation under this Act unless such employee has made election as aforesaid.

2. The Governor in Council may make regulations as to the title of the defendant and the effecting of service of process in proceedings under this Act.

The Alberta Workmen's Compensation Act

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Alberta, enacts as follows:

SHORT TITLE.

Chap. 5, Sec. 1. This Act may be cited as "The Workmen's Compensation Act, 1918."

INTERPRETATION.

2. In this Act, unless the context otherwise requires—

(a) "Accident" shall include a wilful and intentional act, not being the act of the workman, and shall also include a chance event occasioned by a physical or natural cause;

(b) "Accident funds" shall mean the funds provided for the payment of compensation, outlays and expenses and the cost of installation and operation of mine rescue stations under this Act;

(c) "Board" shall mean the commission as constituted under this Act;

(d) "Compensation" shall include medical aid except where such interpretation is inconsistent with the context;

(e) "Dependants" shall mean such of the members of the family of a workman as were wholly or partially dependent upon his earnings at the time of his death or who but for the incapacity due to the accident would have been so dependent;

(f) "Employer" shall include every person having in his service under a contract of hiring or apprenticeship, written or oral, express or implied, any person engaged in any work in or about an industry to which this Act applies and includes municipal corporations, school boards, commissions and boards having the management of any work or service operated for a municipal corporation; and where the services of a workman are temporarily let or hired to another person by the person with whom the workman has entered into such a contract the latter shall be deemed to continue to be the employer of the workman while he is working for that other person;

(g) "Employment" shall include employment in an industry or any branch, part or department of an industry;

(h) "Industry" in this Act shall include establishment undertaking, trade and business as included in the schedules hereto;

(i) "Industrial disease" shall mean any of the diseases mentioned in the form hereto and any other disease which by the regulations is declared to be an industrial disease;

(j) "Invalid" shall mean physically or mentally incapable of earning;

(k) "Medical referee" shall mean medical referee appointed by the Board;

(l) "Member of the family" shall mean and include wife, husband, father, mother, grandfather, grandmother, stepfather, stepmother, son, daughter, grandson, granddaughter, stepson, stepdaughter, brother, sister, half-brother, half-sister and a person who stood *in loco parentis* to the workman or to whom the workman stood *in loco parentis*, whether related to him by consanguinity or not so related and where the workman is the parent or grandparent of an illegitimate child shall include such child, and where the workman is an illegitimate child shall include his parents and grandparents;

(m) "Mine" shall mean mine as defined by An Act respecting Mines, being chapter 4 of the Statutes of Alberta, 1913;

(n) "Regulations" shall mean regulations made by the Board under the authority of this Act;

(o) "Workman" shall include a person who has entered into or works under a contract of service or apprenticeship, written or oral, express or implied, whether by way of manual labour or otherwise, but shall not include an outworker or a person engaged in clerical work if not exposed to the hazards incident to the nature of the work carried on in the employment, and shall also include any person engaged in training for mine rescue work or who with the knowledge and consent of the management is doing recovery work after an explosion, accident or catastrophe;

(p) "Construction" shall include reconstruction, repair, alteration and demolition;

(q) "Outworker" shall mean a person to whom articles or materials are given out to be made up, cleaned, washed, altered, ornamented, finished, repaired or adapted for sale in his own home or on other premises not under the control or management of the person who gave out the articles or materials.

THE BOARD.

3. There is hereby constituted a commission for the administration of this Act, to be called The Workmen's Compensation Board, which shall consist of not more than three members to be appointed by the Lieutenant-Governor in Council and shall be a body corporate.

4. One of the commissioners shall be appointed by the Lieutenant-Governor in Council to be chairman of the Board and he shall hold that office while he remains a member of the Board.

5. In case of the death, illness or absence from Alberta of a commissioner or of his inability to act from any cause, the Lieutenant-Governor in Council may appoint some person to act *pro tempore* in his stead and the person so appointed shall have all the powers and perform all the duties of a commissioner.

6. Each commissioner shall hold office during good behaviour, but may be removed at any time for cause.

7. The presence of two commissioners shall be necessary to constitute a quorum of the Board.

8. A vacancy in the Board shall not if there remain two members of it impair the authority of such two members to act.

9. The office of the Board shall be situated in the City of Edmonton, and its sittings shall be held there except where it is expedient to hold sittings elsewhere, and in that case sittings may be held in any part of Alberta.

10. The members of the Board shall receive such salaries as may be fixed by the Lieutenant-Governor in Council.

11. The Board shall have like powers as the Supreme Court for compelling the attendance of witnesses and of examining them under oath, and compelling the production of books, papers, documents and things.

(2) The Board may cause depositions of witnesses residing within or without the province to be taken before any person appointed by the Board in similar manner to that prescribed by the Rules of the Supreme Court for the taking of like depositions in that court before a commissioner.

12. The Board may appoint such officers as the Board may deem necessary for carrying out the provisions of this Act and may prescribe their duties and fix their remuneration.

(2) Every person so appointed shall hold office during the pleasure of the Board.

13. The Board shall have exclusive jurisdiction to examine into, hear and determine all matters and questions arising under this Act, and the action or decision of the Board thereon shall be final and conclusive and shall not be open to question or review in any court, and no proceedings by or before the Board shall be restrained by injunction, prohibition or other process or proceedings in any court or be removable by *certiorari* or otherwise into any court.

(2) Nothing in subsection (1) shall prevent the Board from reconsidering any matter which has been dealt with by it or from rescinding, altering or amending any decision or order previously made, all of which the Board shall have authority to do.

14. The Board may act upon the report of any of its officers and any inquiry which it shall be deemed necessary to make may be made by a commissioner, or by an officer of the Board or some other person appointed to make the inquiry and the Board may act upon his report as to the result of the inquiry.

(2) The person appointed to make the inquiry shall for the purposes of the inquiry have all the powers conferred upon the Board.

15. The Board may make such regulations and prescribe such forms as may be deemed expedient for carrying out the provisions of this Act and any such regulations shall come into force at the expiration of thirty days from the date of their publication in The Alberta Gazette.

16. The Board may add to, withdraw or re-arrange any industries which are or may be included in the schedules hereto.

17. If any question arises as to whether an industry or any part thereof is an industry to which this Act applies, the question shall be decided by the Board whose decision shall be final.

18. The accounts of the Board shall be audited by the Provincial Auditor.

19. The Board shall on or before the fifteenth day of February in each year make a report to the Lieutenant-Governor in Council of its transactions during the next precedingq calendar year.

(2) Every such report shall be forthwith laid before the Legislature if the Legislature is then in session and if it is not then in session, within fifteen days after the opening of the next session.

ASSESSMENT.

20. Within a reasonable time after the first day of July, 1918, the Board shall make an assessment on the employers for the purposes of this Act and to cover the cost of the administration thereof of such amount as the Board may consider necessary.

(2) The Board shall from time to time thereafter as it may deem expedient and at least quarterly make an assessment on each employer for the period which has elapsed since the next preceding assessment was made but in no event shall the amount assessed be less than $5.

(3) The sums to be so assessed may be either a percentage of the payroll of the employer or a specific sum as the Board may determine.

(4) Where the payroll includes the wages or salary of a workman who has been paid more than at the rate of $2,000 per annum the excess shall be deducted from the amount of the payroll and the assessments shall be based on the amount of it as so reduced.

(5) The assessment may be made in such manner and form as the Board may deem adequate and expedient.

21. Every employer shall pay to the Board the sum payable by him within fifteen days after the notice of the assessment of the amount so payable has been given to him.

(2) The notice may be sent by registered post to the employer and shall be deemed to have been given to him on the day on which the notice was posted.

22. If for any reason an employer liable to assessment is not assessed he shall nevertheless be liable to pay to the Board the amount for which he should have been assessed and payment of that amount may be enforced in the same manner as the payment of an assessment may be enforced.

23. Notwithstanding that the deficiency arising from a default in the payment of the whole or part of any assessment has been made up by a special assessment the defaulting employer shall continue liable to pay to the Board the amount of every assessment made upon him or so much of it as remains unpaid.

24. If in the opinion of the Board it is necessary to provide and maintain a reserve fund to meet the payments to be made in respect of compensation as they become payable and so as not unduly or unfairly to burden the employers in future years with payments which are to be made in these years in respect of accidents which have previously happened, the Board may from time to time set apart an amount from the assessments for that purpose and the amount so set apart shall form a reserve fund and may be invested by the Board in securities in which a trustee may by law invest moneys.

25. An order of the Board for the payment of money made under the authority of this Act or a copy of any such order certified by the secretary of the Board to be a true copy may be filed with the clerk of the Supreme Court or of any District Court and when so filed shall become an order of the court and shall be enforced as a judgment of the court.

26. When any industry coming under the provisions of this Act is established or commenced the employer shall forthwith notify the Board of the fact and furnish to the Board an estimate of the probable amount of his payroll for the remainder of the year, verified by a statutory declaration, and shall pay to the Board a sum equal to that for which he would have been liable if his industry had been established or commenced before the last assessment was made or so much thereof as the Board may deem reasonable.

(2) The Board shall have the like powers and be entitled to the like remedies for enforcing payment of the sum payable by the employer under subsection (1) as it possesses or is entitled to in respect of assessments.

27. Subject to the regulations of the Board every employer included in this Act shall before the twentieth day of June, 1918, prepare and transmit to the Board a statement of the total amount of wages earned by all his workmen during each of the twelve calendar months then last past and shall monthly thereafter before the twentieth day of each month prepare and transmit to the Board a statement of the total amount of wages earned by all his workmen during the calendar month then last past and such statements shall be accompanied by such additional information as the Board may require and shall be verified by a statutory declaration of the employer, or his representative, or where the employer is a corporation by an officer of the corporation having a personal knowledge of the matter to which the declaration relates.

(2) If an employer does not make and transmit to the Board the prescribed statement or cause same to be done within the prescribed time the Board may base any assessment thereafter made upon such sum as in its opinion is the probable amount of the payroll of the employer and the employer shall be bound thereby, but if it is afterwards ascertained that such amount is less than the actual amount of the payroll the employer shall be liable to pay to the Board the difference between the amount for which he was assessed and the amount for which he should have been assessed on the basis of his payroll.

28. The Board or any member of it or any officer or person authorized by it for that purpose shall have the right to examine the books and accounts of the employer and to make such other inquiry as the Board may deem necessary for the purpose of ascertaining the amounts of the payroll of any employer and for the purpose of any such examination and inquiry the Board and person so appointed shall have all the powers which may be conferred on a commissioner appointed under An Act respecting Inquiries Concerning Public Matters.

(2) No person shall obstruct or hinder the making of an examination or inquiry mentioned in subsection (1) or refuse to permit it to be made.

(3) If a statement is found to be incorrect the assessment shall be made on the true amount of the payroll as ascertained by such examination and inquiry or if an assessment has been made against an employer on the basis of his payroll being as shown by the statement, the employer shall pay to the Board the difference between the amount for which he was assessed and the amount for which he should have been assessed.

29. The Board or any member of it or any officer or person authorized by it for that purpose shall have the right at any time to enter into the establishment of any employer who is liable to contribute to the accident fund, and the premises connected with it and every part of them for the purpose of ascertaining whether the ways, works, machinery or appliances therein are safe, adequate and sufficient and whether all proper precautions are taken for the prevention of accidents as to the workmen employed in or about the establishment or premises and whether the safety appliances or safeguards prescribed by law are used and employed therein, or for any other purpose which the Board may deem necessary for the purpose of determining the proportion in which such employer should contribute to the accident fund.

30. Every employer shall keep in such form and with such detail as may be required for the purposes of this Act a careful and accurate account of all wages paid to his employees and such account shall be kept within the province and shall be produced to the Board or its officers when so required.

ACCIDENT FUND.

31. A separate accident fund shall be provided for each schedule by contributions to be made in the manner herein provided, by all employers included in that schedule and compensation payable in respect of accidents under each schedule and the costs of administration shall be paid out of the accident fund provided for by that schedule.

32. Where at any time there is not money available in any accident fund for payment of the compensation which has become due, the Lieutenant-Governor in Council may direct that the same be advanced out of the Consolidated Revenue Fund and in that case the amount advanced shall be repaid to the Provincial Treasurer after the next assessment, together with interest at the rate of six per centum per annum.

33. Separate accounts shall be kept of the amounts collected and expended in respect of each employer, but for the purpose of paying compensation each accident fund shall nevertheless be deemed one and indivisible.

(2) Where a greater number of accidents has happened to workmen in the employ of any employer than in the opinion of the Board ought to have happened, the Board may add to the amount of any contribution to the accident fund for which such employer is liable such a percentage thereof as the Board may deem just and may assess and levy the same upon such employer.

(3) The powers conferred by the preceding subsections herein may be exercised from time to time and as often as in the opinion of the Board occasion may require.

COMPENSATION.

34. Where in any employment to which this Act applies personal injury by accident arising out of and in the course of the employment is caused to a workman compensation shall be paid in the manner and to the extent herein mentioned—

(a) If a workman is disabled for a period of ten days or more he shall be paid compensation from the day of the accident, but if he is disabled for a period of less than ten days he shall be paid for and from the fourth day after the accident;

(b) Except where the injury is attributable solely to the serious and wilful misconduct of the workman unless the injury results in death or serious disablement.

(2) An employer or a member of his family may be deemed to be a workman within the meaning of this Act, provided that at the time of the accident he was carried on the payroll of the employer and his wages were included in the then last statement furnished to the Board under sections 26 and 27, and he or his dependants shall be entitled to compensation accordingly.

35. This Act shall not apply to—

(a) A person whose employment is of a casual nature and who is employed otherwise than for the purposes of the employer's trade or business;

(b) Non-residents of the Dominion of Canada who are dependants after one year after the arrival of the workman in Canada; provided this subsection shall not apply to the father and mother of the workman.

(2) Clause (b) of this section shall not take effect until January 1st, 1920.

36. Employers to whom this Act applies shall be liable to contribute to the accident funds, as herein provided.

37. Where an accident happens while the workman is employed elsewhere than in the province which would entitle him or his dependants to compensation under this Act if it had happened in the province, the workman or his dependants shall be entitled to compensation under this Act—

(a) If the place or chief place of business of the employer is situate in the province and the residence and the usual place of employment of the workman are in the province and his employment out of the province has immediately followed his employment by the same employer within the province and has lasted less than six months; or

(b) If an accident happens to a workman who is a resident of the province and the nature of the employment is such that in the course of the work or service which the workman performs it is required to be performed both within and without the province.

(2) Except as provided by subsection (1) no compensation shall be payable under this Act where the accident to the workman happens elsewhere than in the province.

(3) Where by the law of the country or place in which the accident happens the workman or his dependants are entitled to compensation in respect of it they shall be bound to elect whether they will claim compensation under the law of such country or place or under this Act and to given notice of such election and if such election is not made and notice given it shall be presumed that they have elected not to claim compensation under this Act.

(4) Where the compensation is payable out of the accident fund notice of the election shall be given to the Board within three months after the happening of the accident or in case it results in death within three months after the death or such longer period as either before or after the expiration of such three months the Board may allow.

38. No action shall lie for the recovery of compensation but all claims for compensation shall be heard and determined by the Board.

(2) The provisions of this Act shall be in lieu of all rights and rights of action, statutory or otherwise, to which a workman or his dependants are or may be entitled against the employer of such workman for or by reason of any accident happening to him while in the employment of such employer and no action in respect thereof shall lie.

39. If a workman receiving periodical payments ceases to reside in the province he shall not thereafter be entitled to receive any such payments unless a medical referee certifies that the disability resulting from the injury is likely to be of a permanent nature and if a medical referee so certifies and the Board so directs the workman shall be entitled quarterly to the amount of the periodical payments accruing due if he proves in such manner as may be prescribed by the regulations his identity and the continuance of the disability in respect of which the same is payable; provided, that a workman who claims compensation or to whom compensation is payable under this section shall if so required by the Board submit himself for examination by a medical referee.

40. It shall not be competent for a workman to agree with his employer to waive or to forego any of the benefits to which he or his dependants may become entitled under this Act and every agreement to that end shall be absolutely void.

41. No sum payable as compensation or by way of commutation of any periodical payment in respect of it shall be capable of being assigned, charged or attached nor shall any claim be set off against it by operation of law or otherwise unless with the approval of the Board.

42. Subject to subsection (4) compensation shall not be payable unless notice of the accident is given to the employer or his representative before the injured person leaves the works on the date of the accident, if he is able to do so, and in every case before he has voluntarily left the employment in which he was injured.

(2) The notice shall give the name and address of the workman and shall be sufficient if it states in ordinary language the cause of the injury and where the accident happened.

(3) All claims for compensation shall be made to the Board within three months from the happening of the accident or in case of death within three months from the time of death.

(4) Failure to give the prescribed notice or to make such claim or any defect or inaccuracy in the notice shall not bar the right to compensation if in the opinion of the Board the claim for compensation is a just one and ought to be allowed.

43. A workman who claims compensation or to whom compensation is payable under this Act shall if so required by the Board submit himself for examination by a medical referee.

(2) A workman shall not be required to submit himself for examination otherwise than in accordance with the provisions of subsection (1) of this section.

44. The medical referee who has examined a workman by direction of the Board under subsection (1) of section 43 shall certify to the Board as to the condition of the workman and his fitness for employment, specifying where necessary the kind of employment, and if unfit the cause of such unfitness and his certificate unless the Board otherwise directs shall be conclusive to the matters certified.

(2) If a workman does not submit himself for examination by a medical referee as provided by subsection (1) of section 43 or in any way obstructs an examination his right to compensation or if he is in receipt of a periodical payment his right thereto shall be suspended until such examination has taken place.

45. Where in any case, in the opinion of the Board, it will be in the interest of the accident funds to provide a special surgical operation or other special medical treatment for a workman, and the furnishing of the same by the Board is in its opinion the only means of avoiding heavy payment for permanent disability the expense of such operation or treatment may be paid out of the accident fund.

46. Any payment to a workman may be reviewed on the Board's own motion or at the request of the workman and on such review the Board may put an end to or diminish or may increase such payment to a sum not beyond the maximum hereinafter prescribed.

47. Where compensation is payable the Board may commute the payments payable to a workman or a dependant to a lump sum.

(2) The Board may in any case where in its opinion the interest or pressing need of the workman or dependant warrants it, advance or pay to or for the workman or dependant such lump sum as the circumstances warrant and as the Board may determine.

SCALE OF COMPENSATION.

DEATH.

48. Where death results from an injury the amount of compensation not exceeding $2,500 in the whole shall be—

(a) The necessary expenses of the burial of the workman not exceeding $75;

(b) Where the widow or invalid husband is the sole dependant, a monthly payment of $20;

(c) Where the dependants are a widow or an invalid widower and one or more children a monthly payment of $20 with an additional monthly payment of $5 for each child under the age of sixteen years to be increased upon the death of the widow or invalid widower to $10, not exceeding in the whole $40 per month;

(d) Where the only dependants are children a monthly payment of $10 to each child under the age of sixteen years, not exceeding in the whole $40 per month; provided that where there are more than four children the payments may be proportioned;

(e) Where the only dependants are persons other than those mentioned in the foregoing clauses, a sum reasonable and proportionate to the pecuniary loss to such dependants occasioned by the death, to be determined by the Board, but not exceeding to the parents or parent $20 per month, and not exceeding in the whole $30 per month.

(2) In the case provided for by clause (e) of subsection (1) the payments shall continue only so long as in the opinion of the Board it might reasonably have been expected had the workman lived he would have continued to contribute to the support of the dependants.

(a) Compensation shall be payable to an invalid child without regard to the age of such child, and payments to such child shall continue so long as in the opinion of the Board it might reasonably have been expected had the workman lived he would have continued to contribute to the support of such child.

(3) Where there are both total and partial dependants the compensation may be allotted partly to the total and partly to the partial dependants.

(4) Where the Board is of the opinion that for any reason it is necessary or desirable that a payment in respect of a child should not be made directly to its parent, the Board may direct that the payment be made to such persons or be applied in such manner as it may deem most for the advantage of the child.

(5) Where a payment to any one of a number of dependants ceases the Board may in its discretion readjust the payments to the remaining dependants so that the remaining dependants shall thereafter be entitled to receive the same compensation as though they had been the only dependants at the time of the death of the workman.

49. Subject to the provisions of section 48 if a dependant widow marries, the monthly payments to her shall cease, but she shall be entitled in lieu of them to a lump sum equal to the monthly payments for two years and such lump sum shall be payable within one month after the date of her marriage.

(2) Subsection (1) shall not apply to payments to a widow in respect of a child but the payments provided in section 48 subsection (1) clause (c) in respect of a child shall cease when the child attains the age of sixteen years or dies.

50. Where a workman leaves no dependants such sum as the Board may deem reasonable for the expenses of his medical attendance, nursing, care and maintenance shall be paid to the persons to whom such expenses are due.

PERMANENT TOTAL DISABILITY.

51. Where permanent total disability results from the injury the amount of compensation shall be a weekly payment of $10; provided that in a case where a workman has a child or children dependent upon his earnings, the weekly payment shall be $12, but not exceeding in either case in the whole $2,500.

(2) In the following cases it shall be conclusively presumed that the injury is permanent and results in total incapacity, to wit:

(a) Total and permanent loss of sight of both eyes;

(b) The loss of both feet at or above the ankle;

(c) The loss of both hands at or above the wrist;

(d) The loss of one hand at or above the wrist and one foot at or above the ankle;

(e) Any injury to the spine resulting in permanent and complete paralysis of legs or arms or one leg and one arm;

(f) Any injury to the skull resulting in incurable imbecility or insanity;

Provided that this enumeration shall not be conclusive but in other cases the Board shall find the facts.

PERMANENT PARTIAL DISABILITY.

52. Where permanent partial disability results from the injury the total compensation shall be:

(a) For the loss by separation of one arm at or above the elbow joint or the permanent or complete loss of the use of one arm, $1,000;

(b) For the loss by separation of one leg at or above the knee joint or the permanent or complete loss of the use of one leg, $860;

(c) For the loss by separation of one foot at or above the ankle or the permanent or complete loss of the use of one foot, $625;

(d) For the permanent or complete loss of hearing, $600;

(e) For the permanent and irrecoverable loss of sight of one eye, $550;

(f) For the loss by separation of a thumb, $150;

(g) For the loss by separation of a finger or a great toe, $100;

(h) For the loss by separation of any toe except the great toe, $50;

(i) The loss of one phalanx of a thumb or two phalanges of a finger shall be considered equal to the loss of half a thumb or of a finger and compensation shall be one-half that of the loss of a thumb or of a finger;

(j) The loss of more than one phalanx of a thumb and more than two phalanges of a finger shall be considered as the loss of an entire thumb or finger.

(2) In all other cases of injury resulting in permanent partial disability the compensation shall be fixed by the Board and shall be as near as possible in proportion to the amounts fixed herein for specified cases.

TEMPORARY TOTAL DISABILITY.

53. Where temporary total disability results from the injury the compensation shall be the same as that prescribed by section 51 subsection (1) but shall be payable only so long as the disability lasts.

(2) Provided that in the case of any person who is under the age of twenty-one years and has no person wholly dependent upon him the amount shall be $7.50 per week.

TEMPORARY PARTIAL DISABILITY.

54. Where temporary partial disability results from an injury and the workman is at work at reduced earnings which are less than 90 per cent of the earnings he was receiving at the time of the injury he shall receive compensation equal to 55 per cent of the difference between the average weekly earnings received at the time of the injury and the average weekly earnings at which he is actually employed computed in accordance with the provisions of this Act.

(2) For the purposes of the provisions of this section relating to "earnings" and "average weekly earnings" of a workman the following shall be observed:

(a) Average weekly earnings shall be computed in such manner as is best calculated to give the rate per week at which the workman was being remunerated; provided that where by reason of the shortness of the time during which the workman has been in the employment of his employer, or the casual nature of the employment, or the terms of the employment, it is impracticable at the date of the accident to compute the rate of remuneration, regard may be had to the average weekly amount which during the twelve months previous to the accident, was being earned by a person in the same grade employed at the same work by the same employer, or, if there is no person so employed, by a person in the same grade employed in the same class of employment and in the same district;

(b) Where the workman had entered into concurrent contracts of service with two or more employers under whom he worked at one time for one such employer and at another time for another such employer, his average weekly earnings shall be computed as if his earnings under all such contracts were earnings in the employment of the employer for whom he was working at the time of the accident;

(c) Employment by the same employer shall be taken to mean employment by the same employer in the grade in which the workman was employed at the time of the accident, uninterrupted by absence from work due to illness or any other unavoidable cause;

(d) Where the employer has been accustomed to pay to the workman a sum to cover any special expenses entailed on him by the nature of his employment, the sum so paid shall not be reckoned as part of the earnings.

55. In fixing the amount of a payment regard shall be had to any payment, allowance or benefit which the workman may receive from his employer during the period of his disability, including any pension, gratuity or other allowance provided wholly at the expense of the employer.

56. Where a workman or a dependant is under the age of twenty-one years or under any other legal disability the compensation to which he is entitled may be paid to such person or be applied in such manner as the Board may deem most for his advantage.

57. All compensation due from the first day to the fifteenth day of a month, both days inclusive, shall be paid on the first Saturday of the month following and all compensation due from the sixteenth to the last day of a month, both days inclusive, shall be paid on the third Saturday of the month following.

(2) For the purpose of ascertaining the amount of compensation due such amount may be computed on a daily basis and regard may be had for a week of six days.

MEDICAL AID.

58. Any plan for providing medical aid to the workmen existing at the time of the coming into force of this Act or which is hereafter put into force and made available to the workmen and which in the opinion of the Board, after investigation of the facts is found on the whole to be efficient in the interests both of the employer and of the general body of the workmen may by order of the Board subject to such conditions as it may require be declared to be a plan approved by the Board:

Provided, however, that for the purpose of rendering immediate medical aid where no such plan as aforesaid is in force, in addition to any compensation payable under this Act the cost of medical attendance, nursing, care and maintenance rendered necessary by accident, as the Board may deem reasonable, shall be paid by the Board out of the accident fund to the persons to whom the same may be due and payable.

INDUSTRIAL DISEASES.

59. Where—

(a) A workman suffers from an industrial disease as defined by this Act and is thereby disabled from earning full wages at the work at which he was employed; or

(b) The death of the workman is caused by such industrial disease,

and the disease is due to the nature of the employment in which the workman was employed at any time within the twelve months previous to the date of the disablement, whether under one or more employments, the workman or his dependants shall be entitled to compensation under this Act as if the disease were a personal injury by accident arising out of and in the course of that employment, subject to the following modifications:

(c) The disablement shall be treated as the happening of an accident; and

(d) If the workman has at the time of entering the employment wilfully and falsely represented himself in writing as not having previously suffered from the disease, compensation shall not be payable.

(2) If the workman at or immediately before the date of the disablement was employed in any process mentioned in the second column of the form hereto and the disease contracted is the disease in the first column of the form set opposite to the description of the process the disease shall be deemed to have been due to the nature of that employment unless the contrary is proved.

(3) The Board may by the regulations require every physician treating a patient who is suffering from an industrial disease to report to the Board such information relating thereto as it may require.

(4) Nothing in this section shall affect the right of a workman to compensation in respect of a disease to which this section does not apply, if the disease is the result of an injury in respect of which he is entitled to compensation under this Act.

NOTICES AND RECEIPTS.

60. Every employer included in this Act shall keep posted in a conspicuous place on the premises where the work is carried on where it may be seen a certificate or duplicate of his last assessment receipt issued by the Board.

(2) Every workman shall before entering into any employment to which this Act applies satisfy himself that his employer has paid his assessment and that the same is paid thereafter when due, so that he may receive compensation in case of injury.

(3) Any person knowing of any violation of the provisions of this Act shall immediately report same to the Board or to some person appointed by the Board.

61. No employer as defined by this Act shall keep or have in his employment any workman unless such employer has complied with the provisions of this Act.

(2) When an employer as defined by this Act ceases to be an employer he shall within ten days notify the Board by registered mail of his ceasing to be an employer within the meaning of this Act.

62. Every employer to whom this Act applies having knowledge of the happening of an accident to a workman in his employment by which the workman is disabled from earning full wages shall notify the Board by registered mail within twenty-four hours of—

(a) Name and postal address of employer;
(b) Name and postal address of person killed or injured;
(c) Occupation;
(d) Age;
(e) Date of accident;
(f) Time of accident;
(g) Cause of accident;
(h) Date of first employment;
(i) Nature of injury;
(j) Place of accident;
(k) Name and address of the physician or surgeon, if any, by whom the workman was or is attended for the injury.

(2) The physician or surgeon who attends an injured workman shall forward to the Board a report within seven days after the date of his first attendance upon such workman on a form prescribed by the Board.

PENALTIES.

63. Any person who violates any of the provisions of this Act or any regulations made thereunder shall be liable on summary conviction to a penalty not exceeding five hundred dollars and costs and in default of payment to imprisonment for a period not exceeding three months.

64. The penalties imposed by or under the authority of this Act shall be recoverable on summary conviction before a justice of the peace or a police magistrate and the provisions of Part XV of Chapter 146 of the Revised Statutes of Canada, 1906 (The Criminal Code), shall apply to all prosecutions under this Act.

(2) All penalties imposed by this Act shall when collected be paid over to the Board and form part of the accident fund.

65. The Supreme Court or any judge thereof, whether any other proceedings have been taken or not may upon the application of the Board prohibit by injunction the employment of any person in contravention of this Act and may award such costs in the matter of the injunction as the court or judge thinks just; but this provision shall be without prejudice to any other remedy permitted by law for enforcing the provisions of this Act.

66. No prosecution shall be instituted for a violation against this Act except by some person appointed by the Board.

67. This Act shall except as provided in sections 20 and 27 come into force and effect on the first day of August, A.D. 1918, in so far as it applies to employment covered by the first schedule hereto, and on the first day of January, A.D. 1919, in so far as it applies to employment covered by the second schedule hereto.

68. On the coming into force of this Act, so far as it relates to any employment covered thereby, the provisions of The Workmen's Compensation Act, being chapter 12 of the Statutes of Alberta, 1908, and any amendments thereto, are hereby repealed so far as the provisions

thereof relate to such employment; provided that in the case of any accident occurring in any employment before the bringing of such employment within this Act the provisions of said chapter 12 of the Statutes of Alberta, 1908, relating to compensation and the recovery thereof, shall still apply.

69. Save and except the industries included in schedule 1 hereto, this Act shall not apply to employment by—

(a) The Canadian Pacific Railway Company;

(b) The Canadian Northern Railway Company;

(c) The Grand Trunk Pacific Railway Company;

(d) The Edmonton, Dunvegan and British Columbia Railway Company;

(e) The Central Canada Railway Company;

(f) The Alberta and Great Waterways Railway Company.

SCHEDULE 1.

Class 1.—Employment in or about coal mines.

Class 2.—Employment in or about coke ovens.

Class 3.—Employment in or about briquetting plants.

Class 4.—Employment in or about mines other than coal.

SCHEDULE 2.

Any trade or business connected with the industries of lumbering; fishing; manufacturing; building; construction; engineering; transportation; operation of electric power lines and power plants; waterworks and other public utilities; navigation; operation of boats, ships, tugs and dredges; operation of grain elevators and warehouses; teaming; scavenging and street cleaning; painting; decorating and renovating; dyeing and cleaning; planing mills; flour milling; packing plants; printing; lithographing and engraving; telephone and telegraph systems; laundries run by mechanical power; excavation; well drilling; operation of gas and oil wells; quarrying; lumber yards; ice or any occupation incidental thereto or connected with the industries enumerated in this schedule, also including moving pictures and theatres, but not including any players connected with the cast of any performance or play.

DESCRIPTION OF DISEASE.	DESCRIPTION OF PROCESS.
Anthrax.	Handling of wool, hair, bristles, hides and skins.
Lead poisoning or its sequelae.	Any process involving the use of lead or its preparations or compounds.
Mercury poisoning or its sequelae.	Any process involving the use of mercury or its preparations or compounds.
Miners' Phthisis.	Mining.
Phosphorus poisoning or its sequelae.	Any process involving the use of phosphorus or its preparations or compounds.
Arsenic poisoning or its sequelae.	Any process involving the use of arsenic or its preparations or compounds.
Ankylostomiasis.	Mining.

The New Brunswick Workmen's Compensation Act

An Act to provide for Compensation to Workmen for injuries sustained and industrial diseases contracted in the course of their employment.

Be it enacted by the Lieutenant-Governor and Legislative Assembly as follows:

PRELIMINARY.

Chap. 37, Sec. 1. This Act may be cited as the Workmen's Compensation Act, 1918.

2. In this Part, unless inconsistent with the context,

(a) "accident fund" shall mean the fund provided for the payment of compensation under Part 1 of this Act;

(b) "association" shall mean any association or body of employers whose constitution shall have been approved by the Board as entitling such association to represent any of the classes provided for in this Act or any sub-division or group of employers in such class;

(c) "average earnings" and "earning capacity", when used in reference to the time of or before the injury, shall be calculated upon the daily, weekly, monthly or other regular remuneration which the workman was receiving at the time of the injury or had received previously, as may appear to the Board best to represent the actual loss of earnings suffered by the workman by reason of the injury, and in reference to the time after the injury shall take into account any military or other pension, allowance or payment which the workman may receive apart from Part I of this Act;

(d) "Board" shall mean Workmen's Compensation Board;

(e) "construction" shall include reconstruction, repair, alteration, renovating, painting and decorating;

(f) "dependents" shall mean such of the members of the family of a workman as were wholly or partly dependent upon his earnings at the time of his death, or who but for the incapacity due to the accident would have been so dependent;

(g) "employer" shall mean any person, firm, association or body having in service any workman in any industry within the scope of this Part, and shall in respect of any such industry include municipal corporations and the Crown as represented by the Province, and may include the Crown as represented by the Dominion of Canada in so far as it may, in its capacity as employer, submit to the operation of this Act;

(h) "industrial disease" shall mean any disease which by the regulations is declared to be an industrial disease;

(i) "industry" shall mean and refer to the whole or any part of any industry, operation, undertaking or employment within the scope of this Part; and in the case of any industry, operation, undertaking or employment not as a whole within the scope of this Part, shall mean any department or part of such industry, operation, undertaking or employment as would, if carried on by itself, be within the scope of this Part;

(j) "invalid" shall mean physically or mentally incapable of earning;

(k) "manufacturing" shall include making, preparing, altering, repairing, renovating, dyeing, cleaning, ornamenting, printing, finishing, assembling, packing, and adapting for use or sale any raw material, goods, article or commodity;

(l) "member of the family" shall mean and include wife, husband, father, mother, grandfather, grandmother, stepfather, stepmother, son, daughter, grandson, granddaughter, stepson, stepdaughter, brother, sister, half-brother, and half-sister, and a person who stood in *loco parentis* to the workman or to whom the workman stood in *loco parentis* whether related to him by consanguinity or not so related, and where the workman is the parent or grandparent of an illegitimate child, shall include such child, and where the workman is an illegitimate child, shall include his parents and grandparents;

(m) "mining" shall include mine rescue work;

(n) "navigation" shall mean the operation of any ship, boat, tug, dredge or other vessel owned in New Brunswick, while such vessel is within the limits of the said province;

(o) "outworker" shall mean a person to whom articles or materials are given out to be made up, cleaned, washed, altered, ornamented, finished, repaired or adapted for use or sale, in his own home or in other premises not under the control or management of the person who gave out the articles or materials;

(p) "person" shall include any person, whether male or female, or any corporation, and the heirs, executors, administrators or legal representatives of such person, or the successors of such corporation;

(q) "quarrying" shall include excavation for any purpose, drilling, and the removal or transportation of any rock, shale, gravel, sand, earth or other material;

(r) "regulations" shall mean regulations made by the Board under the authority of this Part;

(s) "stevedoring" shall mean the loading or unloading of vessels and railway cars and the handling of goods, articles and commodities on or about any dock, wharf or quay;

(t) "teaming" shall include all kinds of work done by workmen with teams, carts (including hand carts), drays, trucks, cabs, carriages, automobiles and other vehicles;

(u) "workman" shall include a person who has entered into or works under a contract of service or apprenticeship, written or oral, express or implied, and whether by way of manual labour or otherwise, in any industry within the scope of this Part.

PART I.

SCOPE OF THIS PART.

3. This Part shall apply to employers and workmen in or about the industries of lumbering, mining, quarrying, manufacturing, building, construction, engineering; operation of any railway, tramway, telegraph, telephone, cable or electric light or power line or system; operation of any water works, gas works or sewerage plant or system, or other public utility; operation of any refrigeration, storage or terminal warehouse, elevator or plant; operation of any passenger or freight elevator; operation of any theatre or place of public amusement; scavenging and street cleaning; horse-shoeing; operation of any lumber yard, or fuel yard; stevedoring; or navigation; and any employment incidental thereto or immediately connected therewith; provided that, subject to sections 4 and 5 this Part shall not apply to the following:

(a) Persons engaged as travelling salesmen or in office or other clerical work, and not exposed to the hazards incident to the nature of the work carried on in the industry;

(b) Persons whose employment is of a casual nature, and who are employed otherwise than for the purposes of the industry;

(c) Outworkers;

(d) Persons employed by a city, town or municipal corporation as members of a police force or fire department;

(e) Members of the family of the employer residing with the employer;

(f) Persons employed as farm labourers or domestic or menial servants;

(g) Persons employed in the woods in logging, cutting of timber, pulpwood, firewood, railroad ties or sleepers, or river driving, rafting, booming or the transportation of logs, timber, pulpwood, firewood, railroad ties or sleepers.

4. Where it shall appear to the Board that any kind of industry not within the scope of this Part may properly be brought within the scope of this Part, the Board may so report to the Lieutenant-Governor in Council, who may thereupon, by Order in Council, declare such industry to be within the scope of this Part, and from and after the date of such Order in Council, or such date as may be named therein, such industry shall be deemed to be within the scope of this Part.

5. (1) Any industry or workman not within the scope of this Part by virtue of section 3 may, on the application of the employer, be admitted by the Board as being within the scope of this Part on such terms and conditions, and for such period, and from time to time, as the Board may prescribe, and from and after such admission, and during the period of such admission, such industry or workman shall be deemed to be within the scope of this Part.

(2) Any employer in any industry within the scope of this Part may be admitted, on such terms and conditions, and for such period, and from time to time, as the Board may prescribe, as being entitled, for himself or his dependents, as the case may be, to the same compensation as if such employer were a workman within the scope of this Part.

(3) Such admission may be made in such manner and form as the Board may deem adequate and proper.

6. The Board may by regulation exclude from the scope of this Part any industry or industries in which not more than a stated number (fixed by such regulation) of workmen are usually employed, and the Board may from time to time revoke, alter or modify any such regulation; provided that any industry so excluded may be re-admitted by the Board as being within the scope of this Part.

COMPENSATION.

7. Where personal injury or death is caused to a workman by accident arising out of and in the course of his employment in any industry within the scope of this Part, compensation shall be paid to such workman or his dependents, as the case may be, as hereinafter provided, unless such injury was, in the opinion of the Board, intentionally caused by such workman, or was wholly or principally due to intoxication or serious and wilful misconduct on the part of the workman, or to a fortuitous event unconnected with the industry in which the workman was employed.

8. Where it appears that by the laws of any other province, state or country, a workman or his dependents, if resident in New Brunswick, would be entitled in respect of death or injury in such province, country or jurisdiction to compensation corresponding or similar to that provided in this Part, and an Order in Council to that effect is passed by the Lieutenant Governor in Council, the Board may order that payments of compensation under this Part may be made to persons resident in such province, country or jurisdiction in respect of any workman killed or injured in New Brunswick; but save as in this section provided nothing in this Part shall entitle any person not resident in New Brunswick to compensation payments; provided that the Board may upon application grant leave from time to time to any workman or dependent resident in New Brunswick at the time of the accident to reside out of New Brunswick without thereby forfeiting the right to compensation payments under this Part.

9. Where an accident occurs to a workman in the course of his employment in such circumstances as to entitle him or his dependents to any claim or right of action against his employer under, or in virtue of, any statute of the Parliament of Canada, or of the United Kingdom of Great Britain and Ireland, such workman or dependents shall be entitled to compensation under this Part to the extent to which the compensation under this Part would exceed in amount or value the amount or value of such claim or right of action; provided that if such workman or dependents shall execute and give a full and effectual release of the employer from any such claim or right of action the Board may pay to such workman or dependents the full amount of the compensation provided by this Part.

10. (1) Where an accident occurs to a workman in the course of his employment in such circumstances as to entitle him or his dependents to an action against some person other than his employer the workman or his dependents if entitled to compensation under this Part may claim such compensation or may bring such action.

(2) If such workman or his dependents bring such action, and less is recovered and collected than the amount of the compensation to which such workman or dependents would be entitled under this Part, such workman or dependents shall be entitled to compensation under this Part to the extent of the amount or amounts of such difference.

(3) If such workmen or dependents, or any of them, have claimed compensation under this Part, the Board shall be subrogated to the position of such workman or dependent as against such other person for the whole or any outstanding part of the claim of such workman or dependent against such other person.

11. Nothing in section 10 shall give any right to an employer or to a workman within the scope of this Part to bring an action against any employer within the scope of this Part; but in any case where it appears to the satisfaction of the Board that a workman of an employer in any class was injured or killed owing to the negligence of an employer or the workman of an employer in another class, the Board may direct that the compensation awarded in any such case shall be charged against the class to which such last mentionel employer belongs.

12. Except as provided by section 61 the provisions of this Part shall be in lieu of all claims and rights of action, statutory or otherwise, to which a workman or his dependents are or may be entitled against the employer of such workman for, or by reason of any accident in respect of which compensation is payable under this Part.

13. It shall not be competent for a workman to agree with his employer to waive or forego any of the benefits to which he or his dependents are or may become entitled under this Part, and every agreement to that end shall be absolutely void.

14. It shall not be lawful for an employer, either directly or indirectly, to deduct from the wages of any of the workmen any part of any sum which the employer is or may become liable to pay into the accident fund or otherwise under this Part, or to require or to permit any of his workmen to contribute in any manner towards indemnifying the employer against any liability which he has incurred or may incur under this Part.

15. Unless with the approval of the Board, no sum payable as compensation or by way of commutation of any periodical payment in respect of it shall be capable of being assigned, charged or attached, nor shall it pass by operation of law except to a personal representative.

16. No compensation shall be payable under this Part in respect of any injury unless application for such compensation is made within one year after the occurrence of the injury.

THE WORKMEN'S COMPENSATION BOARD.

17. There is hereby constituted a commission for the administration of this Part to be called the "Workmen's Compensation Board," which shall be a body corporate, and shall have a seal which shall be judicially noticed.

18. (1) The Board shall consist of three members to be appointed by the Lieutenant-Governor in Council.

(2) Each commissioner shall hold office during good behaviour, but may be removed at any time for cause.

(3) Unless otherwise directed by the Lieutenant-Governor in Council, a commissioner shall cease to hold office when he attain the age of seventy-five years.

19. In case of the death, illness or absence from New Brunswick of any commissioner, or of his inability to act from any cause, the Lieutenant Governor in Council may appoint some other person to act *pro tempore* in his stead.

20. (1) One of the commissioners shall be appointed by the Lieutenant-Governor in Council to be the chairman of the Board, and another of the commissioners shall be appointed by the Lieutenant-Governor in Council to be vice-chairman of the Board.

(2) In case of the absence of the chairman or of his inability to act, or of a vacancy in the office, the vice-chairman may act as and shall have all the powers of the chairman.

(3) Where the vice-chairman appears to have acted for or instead of the chairman, it shall be presumed that he so acted for one of the reasons mentioned in the preceding subsection.

21. The presence of two commissioners shall be necessary to constitute a quorum of the Board.

22. A vacancy in the Board shall not, if there remain two members of it, impair the authority of such two members to act.

23. (1) The offices of the Board shall be situated at the city of St. John or at such other place as the Lieutenant-Governor in Council shall designate and its sittings shall be held there, except where it is expedient to hold sittings elsewhere, in which case sittings may be held in any part of New Brunswick.

24. The commissioners shall sit at such times and conduct their proceedings in such manner as they may deem most convenient for the proper discharge and dispatch of business; provided that in respect of any matter coming before the Board for decision, any employer, association, workman or dependent interested in such decision, shall be entitled, upon application, to a public hearing, before such decision is made by the Board.

25. The Board shall appoint a secretary and a chief medical officer and may appoint such auditors, actuaries, accountants, inspectors, officers, clerks and servants as the Board may deem necessary for carrying out the provisions of this Part, and may prescribe their duties, and every person so appointed shall hold office during the pleasure of the Board.

26. It shall be the duty of the Secretary to cause proper reports or minutes to be made of all meetings or sittings of the Board, to cause all decisions and findings of the Board to be duly recorded, and to cause all claims and communications to be brought before the Board or its proper officers and to prepare and make such reports and communications as are required by law or may be required from time to time by the Board.

27. The salaries of the commissioners, and of the Secretary, chief medical officer, auditors, medical inspectors, officers, clerks, and servants, together with the necessary expenses of administration of this Part, shall be paid out of the revenue of this province, provided that the Lieutenant Governor in Council may in any year order the payment of any portion of such salaries or expenses out of the Accident Fund.

28. (1) The accounts of the Board shall be audited by a chartered accountant to be appointed by the Lieutenant-Governor in Council for that purpose.

(2) Any association may appoint an auditor to act in conjunction with such chartered accountant or to make an independent audit of the funds of any class or sub-class represented by such association.

29. (1) The Board shall on or before the first day of April in each year make a report to the Provincial Secretary of its transactions during the last preceding calendar year, and such report shall contain a statement of the receipt and disposition of funds for the said year in each of the classes and sub-classes established in sections 45 and 52, together with such other particulars as the Lieutenant-Governor in Council may prescribe.

(2) Any association applying therefor shall be entitled to receive from the Board, on or before the first day of April in each year, a detailed statement of the receipts and disbursements during the preceding calendar year on account of each employer in the class or sub-class represented by such association.

JURISDICTION OF BOARD.

30. (1) The Board shall have jurisdiction to inquire into, hear and determine all matters and questions of fact and law necessary to be determined in connection with compensation payments under this Part and the administration thereof, and the collection and management of the funds therefor; provided that no decision or ruling of the Board shall be binding upon it as a precedent for any other decision or ruling, the intent of this proviso being that each case shall be decided upon its own merits.

31. The Board shall have the like powers as the Supreme Court for compelling the attendance of witnesses and of examining them under oath, and compelling the production of books, papers, documents and things.

32. (1) The Board may act upon the report of any of its officers, and any inquiry which it shall be deemed necessary to make may be made by any one of the commissioners or by an officer of the Board or any other person appointed to make the inquiry, and the Board may act upon his report as to the result of the inquiry, and any person so appointed to make the inquiry shall for the purposes of the inquiry have all the powers conferred upon the Board by section 31.

33. (1) Except as provided in sections 35 and 66 the decisions and findings of the Board upon all questions of law and fact shall be final and conclusive, and in particular, but not so as to restrict the generality of the powers of the Board hereunder, the following shall be deemed to be questions of fact;

(a) The question whether an injury has arisen out of, or in the course of an employment within the scope of this Act;

(b) The existence of, and degree of disability by reason of any injury;

(c) The permanence of disability by reason of any injury;

(d) The amount of average earnings;

(e) The degree of diminution of earning capacity by reason of any injury;

(f) The existence of the relationship of member of the family;

(g) The existence of dependency;

(h) The character, for the purpose of this Act, of any industry, and the class to which such industry should be assigned.

34. The Board may in any case where it is deemed necessary, and shall on the application of any employer, association or workman interested in any order, ruling or decision of the Board, issue a certificate under the seal of the Board, embodying the substance of any such order, ruling or decision.

35. (1) An appeal shall lie to the Supreme Court, Appeal Division, from any final decision of the Board upon any question as to its jurisdiction or upon any question of law, but such appeal shall be taken only by permission of a judge of the Supreme Court, given upon a petition presented to him within fifteen days after the rendering of the decision, and upon such terms as said judge may determine. Notice of such petition shall be given to the Board, at least two clear days before the presentation of such petition.

(2) Where an appeal has been granted, the appeal shall be brought by notice served on the chairman or vice-chairman of the Board, within ten days after the permission to appeal has been granted. The notice shall contain the names of the parties and the date of the order appealed from, and such other particulars as the judge granting the appeal may require.

(3) The Board may of its own motion state a case in writing for the opinion of the Supreme Court, Appeal Division, upon any question which in the opinion of the Board is a question of law.

(4) On the hearing of such appeal or stated case any association representing a class interested in the result of the case shall be entitled to appear and be heard.

(5) The Supreme Court, Appeal Division, shall hear and determine the question or questions of law arising thereon and remit the matter to the Board, with the decision of the Court thereon, and such decision shall be binding upon the Court.

(6) No costs shall be awarded in any appeal or case stated under this section.

SCALE OF COMPENSATION.

36. (1) The compensation payable under this Part to an injured workman or to the dependents of a deceased workman shall be as follows:

(a) In case of temporary partial disability continuing for more than seven days after the accident and diminishing the earning capacity of the workman by more than ten per cent, a payment or payments, at a rate equal to 55 per cent of such diminution of earning capacity, calculated on a basis not exceeding $125 per month;

(b) In case of total disability, continuing for more than seven days after the accident, a payment or payments, equal to 55 per cent of the average earnings of the workman, but not less than $6 per week or more than $125 per month, such payments to be continued during the life of the workman or the duration of such disability;

(c) In case of permanent partial disability, payments on a scale to be established by the Board and proportioned upon the diminution of earning capacity and the degree of disfigurement, but not exceeding in any case $1,500;

(d) In case of death of the workman as a result of the injury, in addition to any payments under (a) or (b);

(I) Necessary and proper expenses of burial, not exceeding $75;

(II) Where the sole dependent is a widow or invalid widower, payments during the life of such widow or widower, at the rate of $20 per month;

(III) Where the dependents are a widow or invalid widower and one or more children under the age of sixteen years, payments at the rate of $20 per month, with an addition of $5 per month for each of such children;

(IV) Where the dependents are persons other than those mentioned in the foregoing clauses, payments at a rate reasonable and proportionate to the pecuniary loss to such dependents, on a scale to be determined by the Board, having in view the scale of payments laid down in clauses (II) and (III);

(2) In the case provided in item (IV) of clause (d) of sub-section (1), the payments shall continue only so long as in the opinion of the Board it might reasonably have been expected had the workman lived he would have continued to contribute to the support of the dependents;

(3) Where there are both total and partial dependents the compensation may be allotted partly to the total and partly to the partial dependents;

(4) Exclusive of the expenses of burial, the compensation payable as provided by sub-section (1) shall not in any case exceed 55 per cent of the average earnings of the workman, and if the compensation payable under that sub-section would in any case exceed that percentage it shall be reduced accordingly, and, where several persons are entitled to monthly payments, shall be reduced proportionately;

(5) If a dependent widow marries, the monthly payments to her shall cease, but she shall be entitled in lieu of them to a sum equal to the payments for two years, provided this sub-section shall not apply to payments to a widow in respect of a child;

(6) Payments in respect of a child shall cease when the child attains the age of sixteen years or dies;

(7) The total aggregate amount of compensation paid under this section shall not in the case of any workman, or his dependents, exceed in the aggregate the sum of $3,500.

37. (1) In fixing the amount of any payment, regard shall be had to any payment, allowance or benefit which the workman may receive from his employer during the period of his disability, including any pension, gratuity or other allowance provided at the expense of the employer.

(2) Where the compensation is payable, any sum deducted from the compensation under sub-section (1) may be paid to the employer out of the accident fund.

38. The Board may in its discretion:

(a) Commute the whole or any part of the payments due or payable to any workman or dependent for a lump sum; or

(b) Substitute for such payments any other scheme of periodical payments; or

(c) Substitute for any lump sum or sums any scheme of periodical payments; as may be deemed most expedient in the interest of such workman or dependent.

(2) Where in any case, in the opinion of the Board, it will conserve the accident fund to provide a special surgical operation or other special medical treatment for a workman, the expense of such operation or treatment may be paid out of the accident fund.

39. The Board may in its discretion, by regulation, provide for the payment of the cost of first aid to workmen in case of injury and should such workman require hospital care, to pay cost of such care; but no such regulation shall come into force until three months after proclamation thereof by the Lieutenant-Governor in Council.

PAYMENT OF COMPENSATION.

40. (1) Where any workman or dependent is entitled to compensation under this Part he shall file with the Board an application for such compensation, together with the certificate of the attending physician, if any, and such further or other proofs of his claim as may be required by the Board.

(2) It shall be the duty of every physician or surgeon attending, or consulted upon, any case of injury to any workman to furnish or cause to be furnished from time to time, such reports, and in such form, as may be required by the Board, in respect of such injury and the resulting condition of the workman.

(3) It shall also be the duty of every physician in attendance upon any injured workman to give all reasonable and necessary information, advice and assistance to enable such workman or his dependents, as the case may be, to make application for compensation, and to furnish such proofs as may be required by the Board.

(4) It shall be the duty of every employer, within three days after the happening of an accident to a workman in his employment by which the workman is disabled from earning full wages, to notify the Board in writing of the:

(a) happening of the accident and nature of it;

(b) time of its occurrence;

(c) name and address of the workman;

(d) place where the accident happened;

(e) name and address of the physician or surgeon, if any, by whom the workman was or is attended for the injury;

(f) any other particulars required by regulation of the Board.

(5) It shall be the duty of the employer to make such further and other reports respecting such accident and workman as may be required by the Board.

(6) It shall also be the duty of every employee within fourteen days after any accident entitling him to compensation, or so soon thereafter as his claim to compensation shall have accrued, to make due application under sub-sec. 1 or to notify the Board of such accident.

41. Payments of compensation shall be made in such manner and in such form as may appear to the Board to be most convenient, and in the case of minors or persons of unsound mind, payments may be made to such persons as, in the opinion of the Board, are best qualified in all the circumstances to administer such payments, whether or not the person to whom the payment is made is the legal guardian of such minor or person or unsound mind.

42. The Board may re-open, re-hear, re-determine, review or re-adjust any claim, decision, or adjustment, either because an injury has proven more serious than it was deemed to be, or because a change has occurred in the condition of a workman or in the number, circumstances or condition of dependents, or otherwise.

43. The Board may require such proof from time to time of the existence and condition of any dependents in receipt of compensation payments as may be deemed by the Board necessary, and may from time to time require any workman applying for or receiving compensation payments to submit to medical examination by the Board or its duly appointed officers, and in default of such requirement being complied with, may withhold such compensation payments.

CLASSIFICATION.

44. Subject to section 61, the compensation provided for in this Part shall be paid out of a fund to be called "The Accident Fund."

45. For the purpose of creating and maintaining the Accident Fund, all industries within the scope of this Part shall be divided by the Board into classes in the discretion of the Board.

(2) The Board may by regulation re-arrange such classes or withdraw from any class, any industry or group of industries included therein, and transfer such industry or group of industries to any other class, or form it into a separate class.

46. The Board shall assign every industry within the scope of this Part to its proper class; and where any industry includes several departments assignable to different classes, the Board may either assign such industry to the class of its principal or chief department, or may, for the purpose of this Part, divide such industry into two or more departments, assigning each of such departments to its proper class.

ASSESSMENT.

47. The Board shall on or before the first day of January of each year make an estimate of the assessments necessary to provide funds in each of the classes sufficient to meet all claims for compensation payable during the succeeding year.

48. (1) Every employer shall, on or before a date to be fixed by the Lieutenant-Governor in Council, and thereafter on or before the first day of January in each year, or whenever he shall have become an employer within the meaning of this Part, or whenever required from

time to time by the Board so to do, cause to be furnished to the Board an estimate or estimates of the probable amount of the payroll of each of his industries within the scope of this Part, together with such further and other information as may be required by the Board for the purpose of assigning such industry to the proper class or classes, and of making the assessments hereunder; provided that the Board may also require any employer not within the scope of this Part to furnish from time to time such information as may enable the Board to determine whether such employer is or is not within the scope of this Part;

(2) Every employer wilfully neglecting or refusing to furnish such estimates or information shall be liable to a penalty of $20 per day for each day of such default;

(3) Every assessor appointed under Chapter 21 of the Acts of 1913, or any other Act respecting assessments for taxation, shall yearly, within ten days after the completion of the assessment roll, make a return to the Board upon forms provided by the Board, for the purpose of showing the names, addresses, nature of business and usual number of employees, if known, of all employers of labour carrying on any industry or business, other than farming or mercantile business, within the district of such assessor, together with such other information as the Board may require;

(4) Within three days after the granting of any building permit in any city, town or parish, notice thereof, together with such particulars as the Board may require, shall be given to the Board by the person whose duty it is to keep a record of such permits;

(5) Every steam engineer employed in connection with the operation of any portable sawmill shall before such operation is begun in any particular locality or place, or within three days after such operation is begun, report to the Board that such operation will be or has begun, and shall likewise from time to time report to the Board upon the cessation of such operation, and furnish to the Board such further and other information with respect to such operation as the Board may by regulation require.

49. The Board shall every year assess and levy upon and collect from the employers in each class, by an assessment rated upon the payroll, or otherwise as the Board may deem proper, sufficient funds to meet all claims payable during the year.

50. Separate accounts shall be kept of the amounts collected and expended in respect of every class and of every fund set aside by way of reserve, but for the purpose of paying compensation the accident fund shall, nevertheless, be deemed one and indivisible.

51. (1) The Board may, in addition to the amount actually required in each class for the year, assess and levy upon and collect from any class or classes a surcharge or surcharges to be set aside as a reserve or reserves—

(a) by way of providing a contingent fund in aid of industries or classes which may become depleted or extinguished; or

(b) by way of providing a sinking fund for the capitalization of periodical compensation payments payable in future years; or

(c) by way of setting up a reserve fund for the equalizing of assessments.

(2) The Board may, in respect of any industry or class where it is deemed expedient, assess, levy and collect in each year a sufficient amount to provide capitalized reserves which shall be deemed sufficient to meet the periodical payments accruing in future years in respect of all accidents during such year.

(3) Upon any such change being made as provided for in sub-section (2) of section 45 the Board may make such adjustment and disposition of the funds, reserves and accounts of the classes affected as may be deemed just and expedient.

52. The Board may establish such sub-classifications, differentials and proportions in the rates as between the different kinds of employment in the same class as may be deemed just; and where any particular industry is shown to be so circumstanced or conducted that the hazard is greater than the average of the class or sub-class to which such industry is assigned, the Board may impose upon such industry a special rate, differential or assessment, to correspond with the excessive hazard of such industry.

53. If authorized by the Lieutenant-Governor in Council the Board may make or sanction any arrangement for the insurance or re-insurance, with an underwriter or underwriters, of any employer or class under this Part, subject to such terms and conditions as the Board may prescribe, and may make any necessary or equitable adjustment of the assessment of such employer or class, having in view any premium paid on such insurance or re-insurance; provided that all claims for compensation shall be adjusted and paid by the Board.

54. Assessments shall be made under seal, and may be general as applicable to any class or sub-class, or special as applicable to any industry or part or department of an industry.

(2) Any general assessment may be made in the manner and form set forth in Schedule A.

(3) Notice of any general assessment may be in the form set forth in Schedule B, and shall be published in the Royal Gazette and in such other newspapers, and in such other manner, as the Board may deem adequate or expedient.

55. The Board shall give notice to each employer, in such manner as may be deemed by the Board adequate and proper, of the amount of the assessments due from time to time in respect of his industry or industries, and the time or times when such assessments are due and payable.

56. (1) Notwithstanding any provisions of this Part respecting estimates or payrolls and notice to employers, it shall be the duty of every employer, without demand from the Board, to cause to be paid to the Board the full amount of every assessment assessed or levied in accordance with this Part in respect to workmen in his employ who are entitled to compensation hereunder, and every such assessment, whether the employer have notice thereof or otherwise, shall be a debt unliquidated until the amount thereof shall have been ascertained by adjustment as provided by this Act, and payable by the employer to the Board.

(2) The Board shall have a right of action against the employer in respect of any amount unpaid, with costs of such action.

57. (1) At or before the first of January of each year, or as soon thereafter as any industry shall have begun operation, the Board may levy upon each employer a provisional amount based upon the estimates and information furnished by such employer or upon such further or other information as the Board may obtain, and such provisional amount shall be presumed to be the amount due by any such employer and may be collected from such employer as hereinafter provided.

(2) In case of the refusal or neglect of any employer to furnish any estimate or information as required under section 48, the Board may make its own estimates of the amount due by such employer and may levy and collect such amount.

(3) Such provisional levies may, wherever it is deemed expedient, be collected in half-yearly, quarterly or monthly instalments, or otherwise; and where it appears that the funds in any class are sufficient for the time being, any instalment may be abated or its collection deferred.

58. If in any class the estimated assessments shall prove insufficient the Board may make such further assessments and levies as may be necessary, or may temporarily advance the amount of any deficiency out of any reserve provided for such purpose, and may add such amount to any subsequent assessment or assessments.

59. In the case of any industry which, in the opinion of the Board, is to be carried on only temporarily, the Board may, instead of collecting a provisional amount, require or take from the employer security in such form and amount as the Board may deem adequate, until the cessation of the industry and final report and audit of the payroll therefor.

60. If any assessment is not paid at the time when it becomes payable, a percentage prescribed by regulation of the Board, and not exceeding in the whole twelve per cent per year, may be added to such assessment, by way of penalty, and collected and enforced as part of such assessment.

61. (1) Any industry in respect of which the employer neglects or refuses to furnish any estimate or information as required by section 48 shall, during the continuance of such default, be deemed to be an industry within Part II, and such employer shall be liable for damages as provided in Part II, and except as provided in sub-section (3) no compensation shall be payable under Part I during the continuance of such default;

(2) Notwithstanding sub-section (1) such employer shall be liable to pay to the Board the full amount or capital value of any compensation payments to which any workman would be entitled under Part I by reason of any accident occurring during the continuance of such default, and such amount or capital value may be assessed against, and collected from, such employer by like process and means as in the case of other assessments under Part I.

(3) If, and to the extent that, such employer shall pay to the Board such amount or capital value he shall cease to be liable under sub-section (1) and such workman shall be entitled to compensation under Part I.

(4) If satisfied that such default was excusable, the Board may relieve such employer in whole or in part from liability under sub-section (1) or sub-section (2), or both, on such terms as the Board may deem just.

LIABILITY FOR ASSESSMENTS.

62. Where any work within the scope of this Part is performed under contract for any municipal corporation or public service commission, any assessment in respect of such work may be paid by such corporation or commission, as the case may be, and the amount of such assessment may be deducted from any moneys due the contractor in respect of such work.

63. (1) Where any work within the scope of this Part is undertaken for any person by a contractor, both the contractor and the person for whom such work is undertaken shall be liable for the amount of any assessment in respect thereof, and such assessment may be levied upon and collected from either of them or partly from one and partly from the other; provided that in the absence of any term in the contract to the contrary the contractor shall, as between himself and the person for whom such work is performed, be primarily liable for the amount of such assessment.

(2) Where any work within the scope of this Part is performed under sub-contract, both the contractor and the sub-contractor shall be liable for the amount of any assessments in respect of such work; and such assessments may be levied upon and collected from either, or partly from one and partly from the other; provided that in the absence of any term in the sub-contract to the contrary the sub-contractor shall as between himself and the contractor be primarily liable for such assessments.

64. In the case of any work or service performed by an employer in any of the industries within the scope of this Part, for which the employer would be entitled to a lien under the Mechanics' Lien Act, it shall be the duty of the owner as defined by that Act, to see that the amount of any assessment in respect of such work or service is paid, and if any such owner fails to do so he shall be personally liable to pay it to the Board, and the Board shall have the like powers and be entitled to the like remedies for enforcing payment as it possesses or is entitled to in respect of an assessment.

65. There shall be included among the debts which under the Act Respecting Assignments and Preferences by Insolvent Persons, "The Companies' Winding Up Act," and "The Trustee Act," are, in the distribution of the property in the case of an assignment or death or in the distribution of the assets of a company being wound up under the said Acts respectively, to be paid in priority to all other debts, the amount of any assessment the liability wherefor accrued before the date of the assignment or death or before the date of the commencement of the winding up, and the said Acts shall have effect accordingly.

66. Where default is made by any employer in the payment of any levy the Board may, after ten days' notice to such employer of its intention so to do, issue its certificate specifying the amount of such levy and the person by whom it is payable, and such certificate, or a copy thereof under the seal of the Board, may be filed with the Clerk of any County Court or with the Registrar or Assistant Registrar of the Supreme Court, and such Clerk, Registrar or Assistant Registrar shall thereupon issue a judgment of such Court against such person for such amount, and such judgment shall be enforceable in the same manner as other judgments of such Court, subject to such appeal as in the case of other judgments of such Court.

ADJUSTMENT OF ASSESSMENTS.

67. On or before the first day of April in each year the amount of the assessment for the preceding calendar year shall be adjusted upon the actual requirements of the class and upon the correctly ascertained payroll of each industry, or otherwise as the case may require, and the employer shall forthwith make up and pay to the Board any deficiency, or the Board shall refund to the employer any surplus, or credit the same upon the succeeding assessment as the case may require.

68. (1) Every employer shall, at or after the close of each calendar year, or at such other times as may be required by the Board, furnish verified copies or reports of his payroll or payrolls, together with such other information as the Board may require, verified by statutory declaration, for the purpose of enabling the Board to adjust and compute the amount of the assessment as provided in section 67.

(2) In computing and adjusting the amount of the payroll of any industry, regard shall be had only to such portion of the payroll as represents workmen and work within the scope of this Part, and where the wages of any workman exceeds the rate of $125.00 per month, due and proper deduction may be made in respect of any such excess.

69. Where in any industry a change of ownership or employership has occurred, the Board may levy any part of such deficiency on either or any of such successive owners or employers, or pay or credit to any one or more of such owners or employers such surplus as the case may require, but as between or amongst such successive owners or employers the assessment in respect of such industry shall, in the absence of an agreement between the respective owners or employers determining the same, be apportionable, as nearly as may be, in accordance with the proportions of the payrolls of the respective periods of ownership or employment.

70. (1) The Board and any member of it, and any officer of the Board or person authorized by it for that purpose, shall have the right to examine the books and accounts of any employer and to make such other inquiry as the Board may deem necessary for the purpose of ascertaining whether any statement furnished to the Board under the provisions of section

68 is an accurate statement of the matters which are required to be stated therein or of ascertaining the amount of the payroll of any employer, or of ascertaining whether any industry or person is within the scope of this Part.

(2) Every member of the Board and every officer or person authorized by it to make examination or inquiry under this section shall have power and authority to require and to take affidavits, affirmations or declarations as to any matter of such examination or inquiry, and to take statutory declarations required under section 68, and in all such cases to administer oaths, affirmations and declarations and certify to the same having been made.

71. The Board and any member of it and any officer or person authorized by it for that purpose shall have the right at all reasonable hours to enter into the establishment of any employer and the premises connected with it, and every part of them, for the purpose of ascertaining whether the ways, works, machinery or appliances therein are safe, adequate and sufficient, and whether all proper precautions are taken for the prevention of accidents to the workmen employed in or about the establishment or premises, and whether the safety appliances or safeguards prescribed by law are used and employed therein, or for any other purpose which the Board may deem necessary for the purpose of determining the amount of the assessment of such employer.

72. No officer of the Board and no person authorized to make an inquiry under this Part shall divulge or allow to be divulged, except in the performance of his duties or under the authority of the Board, any information which has been obtained by him or which has come to his knowledge in making, or in connection with, an inspection or inquiry under this Part.

INVESTMENT OF FUNDS.

73. (1) The Board may in its discretion invest any part of the accident fund, and under its control in any securities which are under the "Trustee Act" a proper investment for trust funds, except mortgages on real estate.

(2) No part of the accident fund, whether so invested or not, shall be subject to any municipal or other tax.

REGULATIONS.

74. (1) The Board may make such regulations, approved by the Lieutenant-Governor in Council, as may be deemed requisite for the due administration and carrying out of the provisions of this Part, and may likewise prescribe the form and use of such payrolls, records, reports, certificates, declarations and documents as may be requisite.

(2) Such regulations, when so approved, shall forthwith be published in the Royal Gazette.

(3) Any such regulation may at any time be revoked or amended by the Lieutenant-Governor in Council.

PENALTIES.

75. The Board may, by regulation, prescribe penalties for the violation of any of the provisions of this Part, or for the breach of any rules, regulations or orders made under the authority of this Act, provided that such penalties shall be approved by the Lieutenant-Governor in Council.

76. The penalties imposed by or under the authority of this Part shall be recoverable under the Summary Convictions Act or by an action brought by the Board in any court of competent jurisdiction, and such penalties when collected shall be paid over to the Board, and shall form part of the accident fund.

ASSOCIATIONS.

77. (1) Where any Association shall make rules for the prevention of accidents in the industry or industries represented by such Association, such rules shall, if approved by the Board, be binding on all the employers included in the class, sub-class or group represented by such Association whether or not such employers are members of such Association.

(2) Where an Association under the authority of its rules appoints one or more inspectors, engineers or experts for the purpose of accident prevention, the Board may pay the salary and necessary expenses of any such inspector, engineer or expert out of the accident fund and charge the same to the account of the proper class, sub-class or group.

(3) The Board may on the application of any Association make an allowance to such Association to meet any expenses of such Association and pay such allowance out of the accident fund and charge the same to the account of the class, sub-class or group represented by such Association.

INDUSTRIAL DISEASES.

78. (1) Where a workman suffers from an industrial disease and is thereby disabled from earning full wages at the work at which he was employed, or his death is caused by an industrial disease, and the disease is due to the nature of any employment in which he was engaged at any time within twelve months previous to the date of his disablement, whether under one or more employments, the workman or his dependents shall be entitled to compensation as if the disease were a personal injury by accident and the disablement were the happening of the accident, subject to the modifications hereinafter mentioned, unless at the time of entering into the employment he had wilfully and falsely represented himself as not having previously suffered from the disease.

(2) Nothing in this section shall affect the right of a workman to compensation in respect of a disease to which this section does not apply, if the disease is the result of an injury in respect of which he is entitled to compensation under this Part.

PROCLAMATION OF PART ONE.

79. The provisions of this Part relating to the organization of the Board, the classification of industries, and levying and collecting of assessments, or any of them, shall become effective from and after a day to be named in a proclamation by the Lieutenant-Governor in Council; the provisions of this Part respecting the payment of compensation and the right of the workmen thereto shall become effective from and after a day to be named in any subsequent proclamation by the Lieutenant-Governor in Council, and compensation shall be payable in respect of injuries occurring on and after the day named in such last mentioned proclamation, on which day also the Workmen's Compensation for Injuries Act, being Chapter 34 of the Acts of the Legislative Assembly, passed in the fourth year of His present Majesty's reign, and amendments thereto shall stand repealed.

PART II.

80. Subject to section 84, this Part shall apply to industries to which Part I does not apply.

81. (1) Where personal injury is caused to a workman by reason of any defect in the condition or arrangement of the ways, works, machinery, plant, buildings or premises connected with, intended for or used in the business of his employer or by reason of the negligence of his employer or any person in the service of his employer, acting within the scope of his employment, the workman, or if the injury results in death, the legal personal representative of the workman, and any person entitled in case of death shall have an action against the employer, and if the action is brought by the workman he shall be entitled to recover from the employer the damages sustained by the workman by or in consequence of the injury, and if the action is brought by the legal personal representatives of the workman or by or on behalf of persons entitled to damages under the Act respecting compensation to relatives of persons killed by wrongful act, neglect or default, they shall be entitled to recover such damages as they are entitled to under that Act.

(2) Where the execution of any work is being carried into effect under any contract, and the person for whom the work is done owns or supplies any ways, works, machinery, plant, building or premises, and by reason of any defect in the condition or arrangement of them, personal injury is caused to a workman employed by the contractor or by any sub-contractor, and the defect arose from the negligence of the person for whom the work or any part of it is done or of some person in his service and acting within the scope of his employment, the person for whom the work or that part of the work is done shall be liable to the action as if the workman had been employed by him, and for that purpose shall be deemed to be the employer of the workman within the meaning of this Act, but any such contractor or sub-contractor shall be liable to the action as if this sub-section had not been enacted, but not so that double damages shall be recoverable for the same injury.

(3) Nothing in sub-section (2) shall affect any right or liability of the person for whom the work is done and the contractor or sub-contractor as between themselves.

(4) A workman shall not by reason only of his continuing in the employment of the employer with knowledge of the defect or negligence which caused his injury be deemed to have voluntarily incurred the risk of the injury.

82. A workman shall hereafter be deemed not to have undertaken the risks due to the negligence of his fellow-workmen, and contributory negligence on the part of a workman shall not hereafter be a bar to recovery by him or by any person entitled to damages under the Act respecting compensation to relatives of persons killed by wrongful act, neglect or default, in an action for the recovery of damages for an injury sustained by, or causing the death of the workman while in the service of his employer, for which the employer would otherwise have been liable, but the damages that may be recovered under the provisions of this section shall not exceed the sum of $3,500.00.

83. Contributory negligence on the part of the workman shall nevertheless be taken into account in assessing the damages in any such action. In such cases when tried by a Judge

with a jury, the jury shall assess the damages sustained, and the deductions to be made therefrom because of contributory negligence, separately. The Court of Appeal may review such deduction upon the evidence, drawing such inferences therefrom as a Judge sitting without a jury might do, and increase or decrease the amount of such deduction.

84. This Part shall not apply to farm labourers, domestic or menial servants, or their employers, or fishermen.

85. This Part shall take effect on, from and after a day to be named in a proclamation by the Lieutenant-Governor in Council.

(Schedules omitted.)

The Manitoba Minimum Wage Act

Whereas it is expedient to create and provide for a Minimum Wage Board to investigate and fix in accordance with conditions in Manitoba standard minimum wages and standard hours of employment and standard conditions of labour for female workers employed in shops, factories and mail order houses in cities in Manitoba.

Therefore His Majesty, by and with the advice and consent of the Legislative Assembly of Manitoba, enacts as follows:

Chap. 38, Sec. 1. This Act may be cited as "The Minimum Wage Act."

2. In this Act unless the context otherwise requires:

(a) "Minister" means the Minister of Public Works for the Province of Manitoba.

(b) "Board" means the Board created by this Act for the purposes herein stated.

(c) "Bureau of Labour" means the Bureau of Labour created under Chapter 6 of 5 George V, Statutes of Manitoba or any Act substituted therefor.

(d) "Employer" means and includes every person, firm or corporation, agent, manager, representative, contractor, sub-contractor or principal, or the person responsible directly or indirectly for the payment of the wages of one or more female workers in any shop, mail order house or factory in any city in Manitoba.

(e) "Employee" means and includes every worker employed in any mail order house, shop or factory in any city in Manitoba who is in receipt of or is entitled to compensation for labour performed for any such employer.

(f) "Shop" means and includes any barber shop and any building or portion of a building, booth, stall or place where goods are exposed or offered for sale by retail and without limiting the generality of the foregoing means and includes all places where the trade or business carried on is that of a tobacconist, news-agent, messenger service, hotel, inn, tavern, victualling house, restaurant, or refreshment house, and sale by retail shall be deemed to include sale by auction.

(g) "Factory" means the same as in "The Manitoba Factories Act."

(h) "Occupation" means and includes any and every vocation, pursuit, trade and industry in any mail order house, shop or factory in any city in Manitoba.

(i) "Wage" or "Wages" means any compensation for the labour of an employee.

3. (1) For the purposes of this Act there is thereby created a board, to be called "The Minimum Wage Board," to be appointed by the Lieutenant-Governor in Council, on the recommendation of the Minister, and to consist of five persons, as follows:

(a) Two representatives of employers, one of whom shall be a female.

(b) Two representatives of employees, one of whom shall be a female.

(c) One disinterested person to be chairman of the Board, who shall not be directly or indirectly connected with employers or employees.

(2) The members of the Board shall be paid such compensation for their services and expenses as may be determined by the Lieutenant-Governor in Council.

4. The said Board is hereby authorized and empowered to ascertain and declare, and to make all necessary orders relative to:

(a) Standards of minimum wages for employees, and what wages are adequate to supply the necessary cost of living to employees, and maintain them in health.

(b) Standards of hours of employment for employees, and what are reasonable hours for employees in any occupation within the meaning of this Act.

(c) Standards of conditions of labour for employees, and what surroundings or conditions, sanitary or otherwise, are essential to the health or morals of employees in any such occupation.

Any order or orders made hereunder shall become effective, and shall be in full force and effect one month after the publication of same in the Manitoba Gazette.

5. For the purpose of carrying out this Act the Bureau of Labour, by its secretary or other officers, shall, from time to time, at the request of the Board, procure and transmit to the Board all possible procurable data and statistics in the possession of said Bureau. Provided, however, that the Board shall not be limited to the information furnished by the Bureau of Labour as aforesaid, but it may procure such other or further information as it deems necessary.

6. The Lieutenant-Governor in Council, on the advice of the Minister, may from time to time authorize the expenditure of such moneys of the Province of Manitoba as may be necessary to enable this Act to be carried out, and as may be appropriated by the Legislature for the purposes of the Bureau of Labour.

7. The Board shall have the power to conduct all necessary inquiries and investigations respecting all matters and things appertaining to or in any way connected with the subject matter of this Act, and shall, for the purposes of its investigations under this Act, have, in addition to the special powers herein provided, all such powers, rights and privileges as are vested in the Court of King's Bench of Manitoba, or in any judge thereof in civil cases, in respect of the following matters:

(a) Enforcing the attendance of witnesses and examining them on oath, affirmation or otherwise.

(b) Compelling the production of such documents and things as are necessary to effectually complete any inquiry or investigation.

(c) Punishing persons guilty of contempt of said Board.

(d) A summons or subpoena signed by one or more of the members of the Board may be substituted for and shall be equivalent to any form of process capable of being issued in any action for enforcing the attendance of witnesses or compelling the production of such documents and things as are necessary to effectually complete the said inquiries and investigations.

8. If any person who has been served with a summons or subpoena under this Act fails without reasonable excuse to appear according to the tenor thereof, the Board or a majority thereof shall have power to issue a warrant for the arrest of such person, so as to have him brought before the Board to give evidence or produce documents or other things.

9. The Board may at its discretion make an order extending the provisions of this Act to any portion of Manitoba not in any city, and any such order made shall have the same force and effect as if such portion of Manitoba were part of a city.

10. The Board may issue to any employee physically defective, or to a female learner in such class or occupation as usually requires to be learned, a special license authorizing the employment of the licensee under such rules and regulations as may be made under this Act.

10. The Board may issue to any employee physically defective, or to a female learner earnings of all his employees, and shall on request permit any member of, or any representative of, the Board to inspect and examine such register.

12. The said Board is hereby authorized and empowered to prepare, adopt and promulgate rules and regulations for the carrying into effect of the provisions of this Act, which shall have the same force and effect as if incorporated herein, after same have been published in the Manitoba Gazette.

13. The Board shall from time to time ascertain and determine whether employers are obeying the provisions of this Act and of any order made by the Board.

14. If any employee be paid by her employer less than the minimum wage to which she is entitled she may recover in a civil action the full amount of her said minimum wage less any amount acually paid to her by the employer together with such costs as may be allowed by the court, and any agreement made by any employee to work for less than the fixed minimum wage shall be no defence in any such action.

15. After any order of the Board becomes effective and while it is effective, it shall be unlawful for any employer to violate or disregard any of the terms or provisions of the said order.

16. It shall be unlawful for any employer to discharge or threaten to discharge, or in any other manner discriminate against any employee because such employee has testified, or is about to testify, or because such employer believes that said employee may testify in any investigation or proceedings relative to the enforcement of this Act.

17. Any employer who violates any of the provisions of this Act or of any order, rule, or regulation of the Board, shall be guilty of an offence and upon conviction thereof, before a Police Magistrate shall be punished by a fine of not less than $25.00, nor more than $100.00, and in default of payment by imprisonment for not less than ten days nor more than three months or by both such fine and imprisonment in the discretion of the Police Magstrate trying the charge.

18. In case of conflict between this Act or any orders made thereunder and any other Act or any order or regulation made under the authority of said other Act, the provisions of this Act and of the orders made thereunder shall supersede and repeal any such other conflicting provisions.

19. This Act shall come into force on a day to be fixed by proclamation of the Lieutenant-Governor in Council.

RECENT LEGAL DECISIONS AFFECTING LABOUR

SHORTLY after the passage of the order-in-council for the suppression of idleness, a man was arrested in Exshaw, Alberta, and taken to Calgary for trial before a magistrate on the charge that he was "not regularly engaged on some useful occupation, contrary to Section 1 of the Regulations made and issued under Order-in-Council No. 815, dated April 4, 1918."

Conviction under the "anti-loafing law" quashed upon appeal

From the evidence, it appeared that the defendant had come to the United States from Russia shortly before the war, and that since that time he had been engaged in various occupations, both in the United States and in Canada. During the three weeks previous to his arrest he had been engaged, at a salary of $20.00 per week, to collect dues and to obtain new members for an organization of unskilled workers known as "The Federal Workers' Union of Canada."

The magistrate found that the defendant was not engaged in some useful occupation, and fined him $10.00 and costs. The defendant, thereupon, appealed to the Supreme Court of Alberta, with the result that the magistrate's finding was not upheld and the conviction was quashed.

The judgment of the Supreme Court was, in part, as follows:

"It appears that the accused was employed by a labour organization known as "The Federal Workers' Union of Canada" to canvass for members, and to collect fees. He was paid $20.00 a week for this work.

"One paragraph of the preamble of the order-in-council under which the charge was laid, reads as follows: "And, whereas, these regulations are not intended to affect any right of members of organized labour associations to discontinue their work in the employment in which they have been engaged when such discontinuance is occasioned by differences actually arising between the employer and the employed. The purpose is to prevent persons capable of useful work from remaining in idleness at a time when the country most urgently requires the service of all human energy available."

"It is apparent from the foregoing that the maintenance of an organized labour union or association is not to be considered as in any sense violating the letter or the spirit of the law. If I mistake not, a member of a labour union is a member of the Committee of the Privy Council, that is the Cabinet, which passed the order-in-council and is a member of that body just because he is a member of a labour union and held at one time a high office in labour union circles.

"Now a labour union cannot be maintained, no organization of any scope can be maintained, without officials and paid servants. The Law Society of Alberta, of which the magistrate and the prosecuting and defending counsel are members, needs to have a paid secretary. I should be surprised to hear it suggested that Mr. Adams, while doing his work is not engaged in any useful occupation, or that the secretary of the United Farmers of Alberta or of the Canadian Manufacturers' Association is liable to conviction under this law. But it is possible, of course, that to a certain aristocracy of labour some reluctant recognition is to be extended by that class of the community which exercises the social privilege of 'recognizing' other people or other classes. If 'skilled' labourers organize themselves into labour unions and by the means of united action succeed in getting themselves 'recognized' to the extent of having representatives

[1]See LABOUR GAZETTE, June, 1918, p. 378.

in cabinets and legislatures, then, of course, we must reconcile ourselves to it with a sigh. But when it comes to 'unskilled' labour, to men who merely dig sewers, although we really must have sewers for the enjoyment of the refinement of our social life, or men who merely shovel coal and cut wood, although these are also necessary to our comfort, it seems, according to the tenor of the evidence of this case, that these men must work separately and alone. The 'privilege' of organizing is not to be extended to them, they are not to be 'recognized' as entitled to act together like farmers and manufacturers and bricklayers, and if they attempt to organize themselves any official whom they employ for that purpose is open to conviction under this order-in-council if the magistrate's view of the matter is correct.

"Of course there was a great deal of irrelevant evidence admitted which was intended to raise suspicions against the accused. Hints were made of connections with other organizations which are fairly well known, as a matter of general knowledge, to be of doubtful usefulness and perhaps of harmful tendencies or purposes. But these were hints only and should have been excluded.

"If the accused had been shown to be actually engaged in seditious propaganda he could have been dealt with under another law. But it seems to me to be contrary to the proper administration of the law when a man is accused of not being engaged in a useful occupation, to pass beyond the enquiry as to what he was doing and indulge in hints, insinuations and suspicions of connections with some organizations whose nature and purposes are but vaguely understood.

"The witnesses, the counsel and the magistrate are probably all in the same position as myself. I really do not know the difference between the Red Guard of Russia and the social democratic party there, and both of these, with other things of a like kind, were flung into the evidence quite irrelevantly and seemingly with some deliberate purpose.

"Bosoms swelling with patriotism must not forget that even in time of war civil courts continue to act on judicial principles, and properly so. The order-in-council says that the question of what is a useful occupation shall be a question of fact for the magistrate. It is not for me to speculate on the vast variety of opinion on this economic subject which may exist among the justices of the peace in Canada. The law has left it to them to decide. But the magistrate must have some evidence upon which to base his opinion. All the relevant evidence he had as to the occupation of the accused was that he was a paid official of a labour organization and these organizations are recognized in the order-in-council itself as not illegal. I am unable to see, therefore, how any reasonable inference could be made that their paid servant is not engaged in a useful occupation. I leave aside, therefore, the general question whether under this order-in-council the Court is entitled to go behind the fact that a man is doing honestly otherwise lawful work for which he is paid by his employer and, as against the employee, declare that his employer's business or occupation is not a useful one.

"The conviction will be quashed, and as to costs I think the applicant is entitled to them as against the informant who I understand is a member of the Provincial Police, and as against the Crown, which appeared and prosecuted. The man was arrested on the request of a manufacturer at Exshaw who asked to have him 'investigated.' 'He was picked up' and taken by the Provincial Police to Calgary and the impression I get from the evidence is that a prosecution under this order-in-council was an afterthought and that he was not arrested in the first place for an infringement of it.

"The only safe path is to put all on an equal equality before the law. Any other course will inevitably ultimately lead to the very evils which this prosecution was evidently intended to help avert." (*Alberta—Rex v. Ruttke.*)

Coal miner fined for claiming pay at contract rate when on company's time

A coal miner was prosecuted on a charge of obtaining money under false pretenses. It appears that while employed by the company at a stated rate of wages, he was accused of placing his tally check on a number of cars that he was loading, claiming extra pay under the contract system. It was alleged by the defence that sub-officials would frequently allow contract miners while working on company time credit on coal loaded on contract basis in addition to their regular pay. The existence of such a system, however, was denied by company officials. It was held by the Court that if this custom did exist it was a criminal one and the accused was found guilty of attempting to obtain money under false pretenses. He was fined $100, or six months' imprisonment. (*British Columbia—Rex v. Hnatz Melnik.*)

REVIEWS

UNITED KINGDOM.—Health of Munition Workers Committee. Final Report. Industrial Health and Efficiency. 1918. 182 pp.*

Industrial health and efficiency of munition workers

THE Health of Munition Workers' Committee of the British Ministry of Munitions has issued its final Report, which consists largely of a recapitulation of the conclusions reached in its earlier Reports and Memoranda.

It also contains a historical survey of Factory Acts and other legislation affecting employees passed in Great Britain since the beginning of the nineteenth century. There are also a number of appendices to the Report, which include Reports by Dr. Janet Campbell on the Health of Women Munition Workers, Plans and Equipment of Canteens and Hostels, A Memorandum of the Ministry of Munitions on the Duties of Welfare Supervisors for Women, and Concessions in Regard to Expenditure on Provision of Welfare Facilities, Canteens, etc.

In summarizing the results of the investigations of the committee, the following conclusions were reached: Fatigue and ill-health in relation to industrial efficiency is in large degree a subject of preventive medicine, a question of physiology and psychology, of sociology and industrial hygiene. Fatigue may spring from the maintained use of intelligence, the continued use of special senses, or from monotonous work. It should be detected and its causes dealt with before it becomes excessive. The tests of fatigue are diminished output, the failure of concentration as shown in increased accidents and spoiled work, staleness, ill-health and lost time. The conditions essential to the maintenance of health are: first, personal conditions such as food, fresh air, exercise, warmth and adequate rest, and, secondly, a satisfactory environment, such as a safe and sanitary factory, suitable hours of work, good housing accommodation, and convenient means of transit.

With regard to the hours of labour, the committee in January, 1916, provisionally recommended that the average weekly hours of employment of men should be limited to 65-67, that the

*Reviews of previous reports and memoranda issued by the British Health of Munition Workers' Committee have appeared in the LABOUR GAZETTE, as follows: Report on Sunday Labour, January, 1916, p. 846. Report on Industrial Canteens, February, 1916, p. 950. Report on Juvenile Employment, November, 1916, p. 1791. Reprints of the Memoranda in Bulletin of United States Bureau of Labour Statistics, June, 1917, p. 502. Output in Relation to Hours of Work, August, 1917, p. 659. Industrial Efficiency and Fatigue, Reprints in Bulletin of United States Bureau of Labour Statistics, September, 1917, p. 763. Weekly Hours of Employment, January, 1918, p. 57. Health of the Munition Worker, a Handbook, February, 1918, p. 154. An Investigation of the Factors Concerned in the Causation of Industrial Accidents, June, 1918, p. 463.

hours of women should be limited to 60 per week, as prescribed by the Factory and Workshops Act, 1901, that the employment at night of girls under 18 should be limited so far as possible, and that while boys should be allowed to work for the same hours as men, it was urged that so far as possible boys under 16 should not be employed for more than 60 hours a week or at night. Scientific data since collected for the committee support the view that these hours which were provisionally recommended are too long and can be reduced without loss of output. What the extent of the reduction should be in any particular case can only be determined after considering a number of factors such as the physical or mental strain of the work, the extent to which the pace of the work is governed by the machine, the factory environment, the physical capacity, age, sex, and experience of the worker, the arrangement of hours, and outside conditions such as housing and transit. The daily employment of workers is organized in single shifts, double shifts, or in three shifts. From the point of view of output, single shifts are open to objection owing to the large number of hours during which the machinery lies idle. Double shifts are most commonly adopted, and under reasonable conditions they are undoubtedly productive of increased output. Wherever possible an interval should be left between the two shifts. The shorter hours are widely recognized to be advantageous from the point of view both of the health of the worker and of output, and an opportunity is thus afforded for cleaning and ventilating the shops. The system of beginning work at 6 a.m. with a break of half an hour for breakfast has been found to be a mistake as only a few can put in their best work before having a proper meal in the morning. It is best to commence after breakfast at 7 or 8 a.m. Many women and young persons cannot profitably be employed on continuous work for the full spell of five hours allowed by the Factory Act. Employers frequently allow short intervals for rest and refreshment in the afternoon, and also in the morning. All workers should be allowed periodic holidays, preferably of several days' duration. At the commencement of the war Sunday labour, especially for men, was widely adopted in the hope of increasing output. The evidence, however, proves conclusively that Sunday labour is unpopular, uneconomical and not productive of increased output. Where Sunday labour becomes necessary, arrangements should be made by a system of relief shifts, that no individual worker is employed more than six days in the week. Night work is open to serious objection even for men. It has been illegal for women and girls for over 50 years. Although inevitable for adult women under existing conditions, it should be stopped as soon as it ceases to be essential. Night work for girls under 16 has now been entirely stopped. For girls between 16 and 18 it has been largely curtailed and should be ended as soon as possible. Night work for boys is only legal in certain continuous processes. It has already been curtailed for boys under 16 and should be altogether stopped. Investigations suggest that continuous night work is productive of less output than the system under which a worker is engaged on day and night shifts alternately.

For the maintenance of industrial efficiency, proper and adequate food is essential. Many workers do not obtain suitable food owing to domestic difficulties, distance of the home from the factory, night work, and ignorance of the need, in the case of women. The only satisfactory way of providing suitable food at low prices for large numbers at convenient times lies in the establishment of industrial canteens. At the end of 1917, there were about 840 canteens in munition works and docks. The committee are convinced that they have very materially contributed to the maintenance of the health of the worker, to the prevention of a serious breakdown under the strain imposed by war conditions, and to increased efficiency and energy and corresponding output.

A large amount of interruption to work is due to industrial accidents. The principal causes of accidents are speed of working, fatigue, psychical influences, alcoholic consumption, lighting and temperature. Success in the prevention of accidents depends largely upon the intelligent co-operation of workers and foremen. In each shop there should be one or two workers trained to render first aid in case of accidents. Leaflets of instruction and advice should also be issued. Great improvements are expected to result from a recent Home Office Order requiring employers in certain industries to provide and maintain: (a) first-aid posts or local dressing-stations for every 150 workers; and (b) an ambulance room or central dressing station in charge of a nurse or other person trained in first-aid work. Records of all cases treated are to be kept. Provision is also made for the conveyance to hospital of the more serious cases.

The increased employment of married women and young girls led the committee in January, 1916, to recommend the appointment of welfare supervisors in all factories where women were employed. The exact duties of a welfare supervisor will to some extent depend upon the circumstances of the factory and her own capacity, but experience shows that her duties may properly include the engagement of workers, so far as their general suitability is concerned; keeping of records of individual workers; investigation of cases of lost time, sickness, low output or wages, incapacity, dismissals or withdrawals, working conditions, home visiting, feeding arrangements, training and instruction, housing, transit and recreation. The welfare supervisors should undergo a preliminary course of training of not less than one year, which should be grounded on a wide study of social questions, and should include practical work for a large part of the time. A definite judgment cannot yet be passed on the development of welfare work during the past two years, and the confident support of the workers has still to be obtained, but the conditions of employment of women have vastly improved, and it has been and is likely to be of material advantage that there should exist a body of persons specially concerned to promote the health and well-being of the worker.

United States.—Labour in War Time. The American Labour Legislation Review, March, 1918. 119 pp.

Labour in War Time: Conservation, mobilization, health insurance

The American Labour Legislation Review for March, 1918, contains an account of the proceedings of the eleventh annual meeting of the American Association for Labour Legislation, which was held in Philadelphia in December, 1917. This meeting was devoted to a discussion of labour problems in war time, the principal subjects of debate being Health Insurance, Mobilizing of the Labour Supply, Labour Conservation in War Time, and Problems and Methods of Legislative Investigating Commissions. The need for a system of state health insurance is emphasized in the opening address by Irving Fisher, president of the association. The great wastage of men in the war, and the discovery that about one man out of three, medically examined, is rejected as unfit for the army, have shown the need for better conservation of health, to which end health insurance would be the greatest stimulus. Already nine States of the Union have Commissions working on this subject.

The discussion on mobilizing the labour supply was held at a joint session with the American Economic Association and the American Farm Management Association. Henry R. Seager, Secretary of the United States Shipbuilding Labour Adjustment Board, stated that the Department of Labour was planning to open war emergency employment bureaus in all centres where war industries were actively carried on. An account of English war experience in the employment of labour is given by M. B.

Hammond, of Ohio State University. The following lessons are drawn from this experience: (1) Any country possesses in its industrially unemployed women a vast reserve of productive power on which it can call in times of emergency, and which possesses a mobility hitherto unsuspected. (2) For the utilization of such labour there is no limit except that set by the physical capacity of the worker and the extent of her training. (3) The effective utilization of women's labour requires the Government and private employers to give unusual consideration to problems relating to the health and fatigue of the workers, lest the effort to secure maximum productivity over-reach itself. (4) Among peoples trained in self-government, governmental efforts to secure co-operation of organizations of employers and of employees will win better results than will measures of compulsion. (5) For the effective mobilization of its labour forces a well integrated system of employment bureaus is essential, and employers should be encouraged to rely upon these bureaus to secure the extra labour required. (6) The need of men for military service should not be allowed to outweigh the need of men for the production of those things upon which military success is dependent.

Volume 18 SEPTEMBER, 1918 Number 9

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

During August the most noticeable feature in the labour market was the scarcity of skilled workers in the coal and metal mining industries. There was also a steady demand for farm hands and lumbermen. In civic employment a slight decline in comparison with July, and a considerable decline in comparison with August, 1917, was noted. There was a decline in the value of building permits issued as compared with July, but an increase as compared with August, 1917.

The time loss on account of industrial disputes during August was not as great as during July, but greater than in August, 1917. There were in existence at some time or other during the month 33 strikes, affecting 8,638 workpeople and involving a time loss of 94,040 working days.

The average cost of the weekly budget of staple goods was $13.41 as compared with, $13.00 in July; and $7.68 in August, 1914. The index number of wholesale prices was almost unchanged, standing at 284.3 for August as compared with, 284.0 for July; and 136.3 for August, 1914.

Proceedings under the Industrial Disputes Investigation Act

During August the Department received reports from five Boards of Conciliation and Investigation appointed to inquire into disputes affecting: (1) The Canadian Northern Express Company and its employees; (2) The New Brunswick Power Company and its conductors, linemen, power-house men, shop and barn men, trackmen, etc.; (3) The Canadian General Electric Company, Limited, Peterborough, Ont., and its machinists, specialists and electrical workers; (4) The Canadian Pacific Railway Company and its commercial telegraphers, and (5) The Ottawa Electric Railway Company and its employees; also a report from the Labour Appeal Board, to which the last mentioned dispute was referred.

Ten applications were received for the establishment of Boards; and one other Board of Conciliation and Investigation established during the preceding month, also the Labour Appeal Board, were completed by the appointment of chairmen.

Co-ordination of Employment Offices in Canada

Considerable progress has been made under the Employment Offices Co-ordination Act passed at the last session of the Dominion Parliament. The Act set aside $50,000 in 1918, $100,000 in 1919, and $150,000 in 1920, and each year thereafter for distribution among the provincial governments to assist them in their employment office work. Under section 6 of the Act the annual grants to the provinces were made conditional on an agreement between the Minister of Labour and the governments of the provinces as to the terms, conditions and purposes within the meaning of the Act for which the payments were to be made. The Act further empowered the Minister to promote uniformity of methods among employment offices and generally to standardize their work. The Minister has been in communication with the various provincial governments and as the plan has been warmly commended the closest co-operation is anticipated. In fact, the provincial government of Quebec has already created the office of Inspector-General of the Government Labour Bureau, to which office it is reported Mr. Joseph Ainey, of Montreal, has been appointed. Other provinces have also begun to extend their employment services and a large measure of agreement has been reached as to the standards under which they shall operate. The Department of Labour has prepared a set of forms for use in the local employment offices, and the adoption of these forms is now being considered by the provincial officials. The Department is also giving attention to the matter of employment office routine. As soon as the provincial organizations are well under way a Dominion clearing-house will be established at Ottawa.

Employment of women in industries in Canada

Female labour in industries in which formerly men only were employed has become so common in Great Britain, as no longer to excite comment. In Canada, however, the employment of women, except in certain kinds of industries, is as yet in an experimental state; therefore the following experiences of Canadian manufacturing concerns will be of interest.

The Massey-Harris Company have, for the first time, lately employed young women, about 100 in number, to perform work for which men would have been hired had they been available. The women are engaged in drilling plates, bending metal sheets, sharpening mower blades and collecting goods for shipment. They are not employed in the blacksmith shops, where the heat is extreme and the physical strain severe; but it is expected that they can be employed in piling lumber in the yards, as this open-air work should not prove too arduous. One of the officials of the company is reported as saying that the employment of women for work formerly done by men "must still be regarded as an experiment—though apparently a successful one. The girls are physically fit for the work and seem to have taken to it well." It is stated that in all cases the women are being paid the same wages as would be paid to men doing similar work.

A few weeks ago a Canadian wholesale shoe company undertook to teach girls the art of shoe cutting. For this work, which requires considerable skill and intelligence, a higher scale of wages is paid than for other less skilled work. It is further claimed that the work is not arduous but is, in fact, well adapted for young women. One of the officials of the company is reported as saying that the pupils are showing an adaptability which is very encouraging.

It should be added that, according to the latest statement of the Inspector of Industrial Establishments for Montreal, there are in and around that city 2,315

women in the employ of railway, steel and cement companies who are engaged on work for which hitherto men only were employed. In addition to the above there are some 1,500 women engaged in munitions work.

The Co-operative Movement in Canada

The September issue of the *Canadian Co-operator* prints a summary of an address recently delivered by George Keen, the general secretary of the Co-operative Union of Canada, in which the speaker, in indicating the growth of the movement, pointed out that during the past year the organized co-operative movement of Canada did business to the amount of $1,264,246; and that in share capital the members had invested $146,522 and had made a profit of $91,079. The speaker also stated that of the 13 societies which had reported to the Union, only two had failed to show a surplus; also that if the net surplus had been divided on capital it would have been equal to an average of 61 per cent, as compared with the British average of 30.6 per cent.

As an instance of the rapidity with which the movement is spreading, reference was made to the latest quarterly report of the British Canadian Co-operative Society in the mining town of Sydney Mines, N.S. According to the report the sales for the second quarter of 1918 amounted to $181,793, which was an increase of $64,091 over the corresponding quarter of last year. At the end of June the share and loan capital of the Society amounted to $126,836, showing an increase for the year of $42,067; and the membership amounted to 1,409 persons out of a total population of about 10,000. A dividend of 12 per cent was declared on general purchases and 10 per cent on meat purchases made by members during the quarter. The Society at Sydney Mines proposes to expend about $44,000 in purchasing land, in building store extensions and in additional equipment in their bakery.

The Canada Food Board's Sugar Regulations

Still further restrictions on the use of sugar by manufacturers, confectioners, bakers, etc., were imposed by the Canada Food Board early in September. Restaurants are now restricted to two pounds of sugar for every ninety meals served, while soda fountains and ice cream establishments are restricted to 25 per cent of the average monthly amount of sugar used during 1917. Manufacturers of bread and bread rolls may use only one-half pound of sugar to one hundred pounds of flour and all of this amount must be yellow or brown sugar. Similar restrictions have been placed on other manufacturers using sugar. The Board also issued a statement asking the public to voluntarily ration their ordinary household consumption of sugar on the basis of two pounds per head per month, including the quantity served at meals and in cooking, except that used for preserving fruit.

The Board pointed out that the use of only one teaspoonful of sugar instead of two to a cup of tea by the people of Canada would save three times the amount of sugar now allowed to candy and confectionery manufacturers in the Dominion for one year. Householders were also requested to use yellow and brown sugar as much as possible, and in cooking to substitute honey, corn syrup, etc. For preserving, yellow sugar, white corn syrup, or a syrup made from sugar and glucose or white corn syrup is recommended.

Trade Boards Act, 1918, of the United Kingdom

The Trade Boards Act, 1918, amending the Act of 1909, will come into effect in October next. The passage of this new Act is directly attributable to the recommendations of the Whitley Committee (which are considered elsewhere in this issue) that Trade Boards should be established for the purpose of regulating conditions of em-

ployment in trades that are not sufficiently well organized to justify the formation of Joint Industrial Councils. Under the original Act of 1909 the establishment of Trade Boards could only be accomplished after considerable delay, and, when they were established, their powers were limited. The main objects of the new Act are to simplify and expedite the procedure required (a) for setting up new Trade Boards, and (b) for the fixing of minimum rates of wages by such Boards.

The functions of the Act and the advantages that will result from it are summarized in the *Labour Gazette* of the British Ministry of Labour, as follows:

In view of the dislocation of industry which it is apprehended may occur after the war, there is reason to fear that the problem of inadequate wages for unskilled and unorganized workers —particularly women—may be rendered exceptionally acute. On the one hand there are a large number of women who have left such occupations as dressmaking in order to work in munition works and other war industries; and on the other hand large numbers of women have entered occupations which were formerly confined to men. The first class will tend to try to find work in their old trades when the demand for war material slackens, with keen competition for employment in these trades as a result; and the second class will in many cases be driven to compete for employment with the returning soldiers. In both cases the competition for employment may reduce wages to an unduly low level, unless precautionary measures are taken.

The eight years' experience of the satisfactory results achieved by the Trade Boards, whose activities have proved of benefit not merely to the workers but to all sections of the trades which have worked under them, pointed to an extension of the Trade Boards Act, 1909, as the best means of meeting the situation. . . .

The new Act of 1918 widens the power of the Minister to apply the Act of 1909 to new trades, as it enables him to apply it to any trade in which, on account of defective organization, wages are unduly low, or there is reason to apprehend an undue fall in wages when the special war conditions have passed. This provision removes the limitation imposed by the Act of 1909, by which the Minister was confined to dealing with trades in which wages were at the time *exceptionally* low as compared with those in other employments. In normal times the wages of large numbers of women workers are very low, and this fact has made it very difficult to urge that the wages of women in any given trade were *exceptionally* low.

Furthermore, the new Act accelerates the machinery for the fixing of compulsory minimum rates, since it will be possible for a rate to be brought into full operation within three months after it has been proposed by a Trade Board, while under the Act of 1909 nine months are required for this purpose.

Other provisions in the Act give Trade Boards additional powers in regard to the fixing of rates of wages and the controlling of the conditions under which particular classes of workers, especially learners, are employed. And, in accordance with a recommendation of the Whitley Committee, the right is conferred on Trade Boards to make recommendations to Government departments with respect to the industrial conditions in their trades.

* * *

Housing Activities of the United States Government

An addition has been made to the organization of the United States Department of Labour appointed to deal with the matter of industrial housing. Shortly after the entry of the United States into the war a branch of the Department of Labour was created, known as the Bureau of Industrial Housing and Transportation, under the direction of Otto M. Eidlitz. This Bureau has had not only executive duties but administrative work to per-

form; and it is in connection with the administrative work that the addition to the organization has been made in the creation of the United States Housing Corporation. It is expected that this new body will afford more facility in operation than was possible under the usual government agency. The articles of incorporation provide for the issuance of 1,000 shares of stock without par value. The stock is held on behalf of the Government by the Secretary of Labour, who is credited with 998 shares, and by the president and treasurer of the corporation, who are credited with one share each. The president of the Housing Corporation is Otto M. Eidlitz, the director of the Housing Bureau.

The Bureau has undertaken to relieve the situation at Bethlehem, Pa., where the need for government houses is very great. It is stated that in Bethlehem there are 7,000 sets of furniture in storage, and that many families have been forced to leave the city because they could find no place in which to live. The Bureau is proposing to build from 1,200 to 1,500 houses, for which about 300 acres of land has been acquired near the steelworks. Because of the large size of this development it is impossible to locate it very near the city; so, in addition to the houses, the Bureau is making provision for community facilities and for supplementing the existing school accommodation. At Bridgeport, Conn., contracts were recently awarded for housing accommodation for 600 families; and work elsewhere on a similar scale is being undertaken.

With the desire to centralize as far as possible the administration of the housing policies of the Government, the Housing Bureau of the Department of Labour has come to an arrangement with the housing and transportation department of the Emergency Fleet Corporation, which will result in complete co-operation, and the avoidance of duplication between the two departments, and which will produce maximum results for the Government with maximum efficiency at minimum cost.

To deal further with the influx of civil servants into Washington, a committee of the Housing Corporation has developed a scheme for the greater use of the housing facilities at present in existence in the city. The committee proposes to assist women to establish boarding and rooming houses and co-operative housekeeping apartments. A revolving fund of $25,000 has been allotted for the purpose of making loans to women of approved qualifications. The committee will approve the rents paid and control the prices charged occupants of these assisted houses. After houses and rents are approved, open letters of credit will, in selected cases, be given the boarding-house keepers for the purpose of purchasing household equipment at approved prices. The underlying purpose of this arrangement is to make available for use buildings which, for one reason or another, are now unoccupied.

Lake Carriers' Association now recognizes Seamen's Unions

The June issue of the Gazette (page 380) contained an account of the controversy between the Lake Carriers' Association and its employees in reference to the Welfare Plan Discharge Book. It was claimed by the employees that the manner in which the discharge books were used virtually amounted to a blacklisting of union men. That the Association was opposed to unionism was plainly evidenced in its refusal to attend a national conference—called by the United States Shipping Board—of the shipping interests and representatives of marine workers, on the ground that such attendance would be a recognition of organized labour.

In September last a strike of the Association's employees was called as a protest against the use of the books; but the Shipping Board intervened, and issued a decision abolishing the continuous discharge book. The Association then issued new discharge books omitting some of the features objected to; but, in

July last, the unions threatened another strike on the ground that the books were still being used to discriminate against union men. The Shipping Board again upheld the men in their contention, and decided that a simple certificate of membership to the Welfare Plan should be issued and that such certificate should not be in book form nor accompanied by a container, and should state on its face that it is the property of the man to whom it is issued. The holder of such certificate should not be required at any time to dispose of his certificate or to deposit it, nor should he be required to produce it at the time of hiring. The decision also stated: "It is the intent of this finding that seamen should be employed solely with reference to their fitness for the work, and not with reference to membership in the welfare plan, nor with reference to affiliation with, or activity in, any union. With the foregoing modification in force, the Shipping Board believes that the welfare plan will not be open to the charge of being an instrument for discrimination against union men."

Finally, on August 1 a conference was held between the Labour Adjustment Commission of the Shipping Board, the union of great lakes seamen, firemen and stewards, and practically all the lake shipping companies, including the Lake Carriers' Association; and a working agreement was signed in which the companies agreed to recognize the great lakes unions and to grant access to their docks and vessels to union representatives. It was also agreed that the question of wage increases and other matters that had been in dispute for some time should be left to the Shipping Board for adjustment.

The British Labour Party Conference

The conference of the British Labour Party, held in London during June 26-28, was attended by delegates representing nearly two and a half million workers, of whom about 2,415,000 were trade unionists, and about 50,000 were "party Socialists." Many of the Socialists, however, were also trade unionists. At times the conference took on something of an international character, for among its speakers were: Kerensky, of Russia; Albert Thomas, Renaudel and Longuet, of France; Hjalmar Branting, minister of state and leader of the Social Democratic Party of Sweden; and Emile Vandervelde, the Belgian Minister of Munitions. The main purpose for which the conference was called was the consideration of the draft report on "The General Policy of the Party on Reconstruction," prepared by a sub-committee of the executive for the consideration of the British Labour Party.

The Labour Party expressed its platform of reconstruction in 26 resolutions, all of which were based upon the well-circulated and widely-read pamphlet, "Labour and the New Social Order." These resolutions are a programme of political, industrial, economic and social reforms. It also expressed its political independence by terminating the truce with the government and announcing some four hundred prospective parliamentary candidates. The attitude of the Labour Party towards the war was stated in unmistakable terms by the chairman, W. Frank Purdy, when he said: "All plans of reconstruction, all hopes of rebuilding a better social and industrial life after the war, depend on one cardinal fact, and that is—winning the war. The trade union and labour movement have declared that they want no inconclusive peace." The resolutions are too numerous and too long to print in full, but some of them are briefly summarized in the following paragraphs.

In the opinion of the conference the task of Social Reconstruction should be undertaken by the government and should involve "the gradual building up of a new social order based... on the deliberately planned co-operation in production, distribution and exchange, the systematic approach to a healthy equality, the widest possible participation in

power, both economic and political, and the general consciousness of consent which characterize a true democracy." In order to help to realize the new social order and to give legislative effect to its reconstruction policy the conference emphasized the necessity for an independent and unfettered Political Labour Party, both in Parliament and in the country.

In regard to the maintenance and protection of the Standard of Living it is the duty of the government to see that, when peace comes, the standard rates of wages shall, relative to the cost of living, be fully maintained; and that the government, for its part, shall insist on the most rigorous observance of the fair wages clause in public contracts. In making provision for the Soldiers and Sailors on demobilization it is imperative that a detailed plan should be worked out immediately, and that it should be published for general information so that mistakes and omissions may be rectified and everyone made acquainted with the steps to be taken. In connection with the discharge of Civilian War Workers, male and female, the same sort of careful provision should be made in advance for systematically replacing them in situations and for their adequate maintenance until situations are found. For the prevention of unemployment the Minister of Labour is urged to arrange, before demobilization is begun, the next ten years' programme of national and local government works and services, and to put this programme in hand at such a rate and in such districts as any temporary congestion of the labour market may require. The government is also asked to restore the subvention for Unemployment guaranteed by the insurance act. A resolution on the Restoration of Trade Union Conditions reminds the Government and the nation that they are pledged to the restoration after the war of all the rules, customs and conditions that prevailed in the workshops before the war. In a resolution on the Complete Emancipation of Women the conference maintains the importance "of securing to women, as to men, the fullest possible opportunities for individual development." With regard to women in industry the conference affirms, among other things, that trade unions should be urged to accept women members in all trades in which they are employed; and that the principle of equal pay for similar duties should be everywhere adopted.

Education is dealt with in a resolution which states that "the most important of all the measures of social reconstruction must be a genuine nationalization of education, which shall get rid of all class distinctions and privileges, and bring effectively within the reach, not only of every boy and girl, but also of every adult citizen, all the training, physical, mental and moral, literary, technical, and artistic, of which he is capable." The Labour Party, whilst appreciating that advances in this direction are being made, cannot be satisfied with a system "which condemns the bulk of the children to merely elementary schooling... in classes too large for efficient instruction, under teachers of whom at least one-third are insufficiently trained; which denies to the great majority of the teachers... any opportunity for all-round culture, as well as for training in their art, an adequate wage, reasonable prospects of advancement and suitable superannuation allowances." The conference recommended that the whole educational system, from the kindergarten to the university, be reorganized on the basis of social equality; and the recognition of the teaching profession, without distinction of grade, as one of the most valuable to the community.

Among the Political Reforms recommended by the conference were: complete adult suffrage; absolutely equal rights for both sexes; adoption of the best practicable arrangements for insuring that every minority in the country shall have its proportionate and no more than its proportionate representation in parliament. Other resolutions had reference to housing, abolition of the poor law, development of the municipal health

service, local government, Ireland, temperance reform, constitutional devolution, life assurance, national finance, agriculture and rural life, control of capitalist industry, electricity supply, railways and canals, and coal and iron mines.

* * *

Labour Jottings

A list of Canadian railways to which it is understood the McAdoo award and its amendments will be applied is given elsewhere in this issue.

Details of the fatal industrial accidents reported to the Department during the third quarter of 1918 will appear in the November issue of the GAZETTE.

The Government will shortly issue an official weekly journal entitled, "The Canadian Official Record." This publication, following the lines of the daily bulletin of the United States Government, will be issued by the Director of Public Information, and will contain information as to the actions and decisions of the Government and the activities and programmes of government departments, more particularly in connection with war efforts.

During the first six months of 1918, the output of coal for the province of Alberta was 2,875,077 tons, and for the province of British Columbia, 1,375,269 tons, an increase of 55 per cent and 22 per cent respectively over the output for the corresponding period of 1917.

The Catholic Board of School Commissioners are to increase the salaries of its female teaching staff. The maximum for teachers holding an academic diploma is $800 instead of $700; for a model diploma, $700 instead of $600; and for all elementary diplomas, $600 instead of $500. The increases will affect some 270 lay women teachers besides those who are members of religious communities.

The Dominion Steel Products Company at Brantford have taken out building permits and started the construction of 40 houses for their employees, each house to cost on an average $3,500.

The Toronto members of the Canadian Manufacturers Association have formed a committee to deal with labour questions and problems that will arise during the reconstruction period that will follow the war.

A Welfare Board has been formed among the officials and employees of the Algoma Steel Corporation, Limited, at Sault Ste. Marie. The general duties of the Board shall be advisory in matters relating to welfare and recreation, and to the maintenance of good relations between the Corporation and its employees. The Board has no executive powers.

Records of the Vocational Branch of of the Invalided Soldiers' Commission show that up to the end of June 4,612 returned soldiers had been approved for courses of re-education. Of this number, 302 have refused the benefit, and 442 have begun their courses and discontinued them.

The American Association of Public Employment Offices will hold its annual convention at Cleveland, Ohio, during September 19, 20 and 21.

A Federal Child Labour Bill is again being introduced into Congress with standards identical to those of the old law recently declared invalid, but providing that they shall be in force only until six months after the war. It is stated that immediate temporary action is necessary to prevent the increasing use of child labour.

INDUSTRIAL CONDITIONS DURING AUGUST, 1918

I.—GENERAL REVIEW

The Labour Market

In the metals and machinery group employment generally was good throughout the country and there was a demand for machinists, metal workers and moulders, and a strong demand for toolmakers. There were some labour disturbances at the Sydney steel plant. A number of women were engaged in the agricultural implement factories on work formerly done by men. In the automobile industry there was a demand for skilled mechanics, notwithstanding the scarcity and high cost of material. Women munition workers were being sought. Employment was very good in shipbuilding, especially in the building of wooden ships. A further extension of employment in wooden shipbuilding is anticipated on the West coast. In the food group the sugar refineries at St. John and Chatham reduced their operations owing to the scarcity of raw sugar. The recent sugar restrictions of the Food Board affected employment in the confectionery establishments and to some extent in the fruit canning factories, although employment in the fruit and vegetable canneries was good. The workers in flour mills were well employed in Ontario; but in other parts of the country the mills were very quiet and in some cases closed down temporarily. There was a slight improvement in employment in breweries and tobacco factories. In the textile group employment was good. Notwithstanding the shortage of raw material there was a steady demand for help, mostly female, in the woollen mills. Additional hands were being sought in the cotton mills. In Hamilton a 10 per cent wage increase, affecting about 1,000 cotton mill workers, was paid. There was some demand for spinners in the knitting mills and carpet factories, and in one factory women were being trained as weavers to take the place of men. Awning and sailmakers were well employed. The clothing manufacturers were active throughout the country, and at Halifax, Toronto and Hamilton there was some demand for whitewear workers. The steam laundries in most cases were in need of expert help. In the pulp and paper mills employment was good and more hands were needed, though a reduction in employment may result from the shortage of pulpwood. There was some demand for printers in the East, and in the West employment was well maintained. The paper box factories were all busy. In the woodworking industry, the sash, door and planing mills in the Maritime Provinces continued to work to capacity, and employment in planing mills generally was good. The furniture and piano factories were all active and those at Toronto were short of skilled labour. In the tanneries, employment was good and some additional hands were needed. The boot and shoe factories were well employed, in some cases on Government orders. The tire and rubber companies were all busy and in need of help. In the clay, glass and stone group, there was a continued demand for stone and granite cutters in Halifax, the brickyards at Quebec were active, and at Toronto the glass factories were well employed; otherwise in this group general quietness prevailed. At Regina and Vancouver the oil works and refineries were busy. Employment in the paint, varnish and soap factories remained normal. There was some demand for help in chemical works. In transportation, the steam railways were

all active, and the repair shops were very well employed. There was some curtailment in the electric railway service in the Maritime Provinces owing to shortage of help. Toronto reported a considerable improvement over the previous month in lake transportation, and Halifax and Sydney reported an increase in 'longshore work. In mining and quarrying, the silver and gold mines of the Cobalt and Porcupine districts were all suffering from a shortage of labour, more particularly of skilled labour, and other branches of metal mining suffered from the same cause. The shortage of labour in the coal mines was very pronounced throughout the country. The labour disturbances at the Sydney steel plant extended to the Sydney coal field. Lethbridge reported that more mines would likely be opened up in the near future. In the lumbering industry there was some increase in activity over the previous month, and a scarcity of labour at some points was reported. Employment was good in the sawmills. It is feared that during the coming fall and winter the lumber camps will be severely handicapped by the shortage of lumbermen. Farm hands, both male and female, were in demand at the different provincial employment offices of Ontario, and there was also a large demand for farm help at points in the prairie provinces. The increased activity in building during July was barely maintained during August, the falling off being mainly in Ontario. Employment in the building trades, as indicated by the value of building permits issued in 35 cities, decreased 14.4 per cent as compared with July, and increased 55.2 per cent as compared with August, 1917. Reports from 15 cities, showing the number of civic employees temporarily engaged and the wages paid these employees during the first payroll period of two weeks in August, indicated a very slight decrease in the number of workers and an increase of about 6 per cent in the wages paid.

Strikes

The loss of time on account of industrial disputes during August was not as great as during July, but greater than in August, 1917. There were in existence at some time or other during the month 33 strikes, affecting 8,638 workpeople and involving a time loss of 94,040 working days as compared with, 39 strikes, 15,848 workpeople and 123,511 working days in July; and 18 strikes, 2,695 workpeople and 26,177 working days in August, 1917. On August 1, there were on record 15 strikes affecting 3,956 workpeople. Eighteen strikes were reported as having commenced during August as compared with 28 in July; 15 of the strikes commencing during August and seven of those commencing prior to August were reported unterminated, leaving 11 unterminated strikes, affecting approximately 1,333 workpeople on record at the end of August.

Prices

In prices of farm products there were the usual seasonal changes during the month. In the case of grain, hay and eggs, the movement was upward; in that of cattle and beef, sheep and mutton, fresh fruit and vegetables, the movement was downward. Metal products and house furnishings were also higher, while some metals and chemicals were lower. The retail prices of potatoes were higher in many of the cities, though they were lower in the province of Quebec. Meats averaged lower in the Western provinces, but higher in the East. Coal, wood and coal oil averaged slightly higher. The index number of wholesale prices was almost unchanged, standing at 284.3 for August as compared with, 284.0 for July; 245.0 for August, 1917; and 136.3 for August, 1914. In retail prices, the average cost in 60 cities of a list of staple foods for a family of five was $13.41 at the middle of August as compared with, $13.00 in July; $11.68 in August, 1917, and $7.68 in August, 1914.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

Sydney reported the production of the Dominion Steel Company for August in tons as follows: pig iron, 35,000; ingots, 24,000; blooms, billets and slabs, 24,000; merchant bars, 2,300; rails, 13,000; wire and wire products, 134; blast furnaces, 3. At the Sydney Mines plant the production of iron was 7,900 tons and steel 10,900 tons, as compared with 6,900 tons of iron and 11,000 tons of steel last month. Construction on the new plate mill at Sydney was reported as progressing. There was some increased activity in boat and shipbuilding and repairing. Halifax reported the rolling mills, boiler shops and stove factories were very busy, with much overtime worked. Electricians were very well employed and the metal roofing and copper work companies were advertising for help. The shipbuilding yards were very busy. At Westville, steel workers and machinists were working overtime. The Portland Rolling Mill at St. John continued to be actively engaged and the wooden shipyards continued to be well employed. Some shortage of galvanized iron, tin and sheet metal workers was reported. Newcastle reported that the shipbuilding plants, carriage shops and auto repair shops continued to be busy, with a scarcity of skilled labour. At Fredericton the machine shops and foundries were looking for more help. Montreal reported considerable activity in all branches of the metals and machinery group, and in the production of engines and boilers and in shipyards generally. The Armstrong-Whitworth Company employed about 800 hands in their new locomotive wheel plant at Longueuil. At Quebec, employment was good in structural steel work and in automobile and motor engine shops, and the shipbuilding and repairing yards were very busy. St. Hyacinthe reported the metals and machinery group were well employed, particularly the agricultural implement factories. At Three Rivers the Canada Iron Foundries, Limited, continued to employ nearly 500 men on castings, and the other companies were also busy. The shipbuilding plants employed several hundred men. At Sorel the shipyards, both Government and private, continued to give employment to about 1,200 hands, the wages ranging from $2 to $5 per day. Toronto reported the metal and machinery industries generally were busy, but that some difficulty was experienced in obtaining raw material, particularly in the steel plants. Great activity prevailed in the shipyards. The Massey-Harris Company employed a number of women to do work formerly done by men. Hamilton reported the metal and machinery industries and shipyards as all well employed. Niagara Falls and St. Catharines reported the metal industires active, and Brockville reported them fairly well employed. At Kingston the locomotive and shipbuilding companies were active. Peterborough reported a demand for moulders and coremakers in the foundries; electric workers were well employed; machinists and toolmakers were in demand. The machine shops at Galt were advertising for help. The agricultural implement makers at Brantford and Kitchener were very busy and short of help. The motor engine works were also well employed. Guelph reported that moulders were being advertised for, and that several foundries were short of pig iron. Stratford reported the machine shops and foundries very busy and in need of skilled help. At Woodstock there was a constant demand for moulders and polishers in the stove and furnace factories. At London the rolling mills and agricultural implement firms were exceptionally busy. At Chatham the Gray Dort Automobile Company, the International Harvesters Company and the

Gray Campbell Carriage Company all worked with very considerably reduced staffs. At Windsor the Ford Automobile Company resumed work during the month with about half the staff formerly employed, and as a result the Kelsey Wheel Company and the Fisher Body Company were busier than during the preceding month; other automobile companies ran on a reduced scale owing to scarcity of material and high cost of parts. The machine shops were all very busy, but the metal roofing and other metal work firms were very dull. Orillia reported a depression in the agricultural implements and carriage plants, but that the stove factories were very busy and short of moulders. Sault Ste. Marie reported that the steel mills were working day and night and very short of labour. The car workers at Fort William were very actively employed; the shipyard was also very busy, and it has been announced that the yard will be worked to full capacity during the whole of next winter. Winnipeg reported considerable disturbance in the metal groups on account of industrial disputes, but towards the end of the month normal conditions prevailed. The Cater Pump and Windmill Company at Brandon have completed their new factory and trebled their capacity. Medicine Hat reported that employment in the rolling mills was good but that the other metal working industries were rather dull. Calgary reported that the iron works and locomotive shops were fully employed. At Vancouver the structural iron workers were quiet, but employment was good in the stationary and portable engine goods. There was a demand for skilled mechanics in the automobile repair shops, and for skilled labour in the shipbuilding and repairing yards. At New Westminster the machine shops are fully employed, with the supply of labour about equal to the demand, and the shipyards were working to full capacity until the latter end of the month, when the number of hands was temporarily reduced. The engine and boiler foundries at Victoria gave steady employment to a large number of men. Employment in the iron foundries was very good and several hundred men were engaged in the shipyards. The outlook for the wooden shipbuilding industry is reported to be very good; it is expected that the several hundred hands already employed will be doubled in the near future.

Foods, liquors and tobacco

Sydney reported the abattoirs and soft drink establishments active. At Halifax the bakeries and confectionery establishments gave employment to all the help available and the soft drink factories worked to capacity, notwithstanding the sugar restrictions. Charlottetown reported that abattoirs and packing houses were dull but that dairies and condensed milk factories were actively employed. St. John reported the flour and feed mills working steadily, but that the sugar refinery ran with a day shift only on account of the scarcity of the raw material. The rest of the food group was well employed and the breweries also reported an improvement in business. Moncton reported the flour mills quiet, but that the cheese factories and creameries had a large output. The flour mill at Newcastle did practically no grinding during the month. Montreal reported a reduction in activity in the food group due partly to the sugar restrictions. At Quebec the abattoirs and confectioneries reported a quiet month, but the creameries and aerated water establishments were busy. The tobacco factories were quiet and the breweries dull. Sherbrooke reported the food groups and breweries active, and the tobacco factories fairly well employed. St. Hyacinthe reported the flour, feed and cereal mills very active, while in the biscuit factory overtime was worked. The cheese and butter factories and soft drink establishments were all busy, and there was some demand for labour in the tobacco factories. At Three Rivers, employment was dull in cigar and tobacco factories, but soft drink

manufacturers were very busy. At Toronto the flour and cereal industries were fairly active and the abattoirs and meat packing houses were busy, with large orders ahead. Bakers and confectioners were steadily employed, though conditions were unsettled owing to food restrictions. Fruit and vegetable canners, soft drink manufacturers and brewers were all busy and cigarmakers had plenty of work. There was a demand for help in the biscuit factories. Hamilton reported the food groups active and the breweries and distilleries fairly well employed. St. Catharines reported the canneries very busy. At Kingston the flour and feed mills, creameries and dairies and breweries were all well employed. At Belleville the flour and feed mills were working overtime, and the bakers and confectioners reported exceptional activity. The fruit and vegetable canneries, creameries, and dairy and soft drink establishments were all well employed. At Peterborough the flour, feed and cereal mills all worked overtime, the condensed milk factory was very busy, and the cheese factory well employed. At Galt there was a demand for help at the creameries and dairies, but fruit canning was affected by the scarcity of sugar. A fire at the plant of the Waddell Preserving Company at Brantford delayed operations considerably, but the flour mills were well employed as usual. At Kitchener the wholesale sausage and meat packing houses were very well employed, and help was in demand at the bakeries and biscuit factories. The cigar factories ran full time and the breweries worked overtime. Guelph reported that the flour and feed mills continued to work to capacity, but that the breweries were quiet. London reported the flour mills and cereal factories working to capacity and the biscuit factories very busy. St. Thomas reported the Empire Flour Company working to capacity. At Chatham the flour mills were busy during the first part of the month, but later closed down for repairs; the abattoirs and packing houses remained closed and the sugar refinery gave employment to a few men only. The canning factories at Windsor were in need of female help. Creameries and dairies and soft drink manufacturers were busy, though the latter had difficulty in securing sugar. Cigar factories were quiet and breweries and distilleries were very dull. At Winnipeg the confectioneries were fairly active, but the vegetable canners reported business dull. At Brandon the flour mills were busy, and at Regina the abattoirs reported business good. At Prince Albert the flour mills and abattoirs were quiet, though soft drink manufacturers were busy. At Saskatoon the flour mills were unable to secure wheat, and the canning and soft drink manufacturers were handicapped by the sugar shortage. At Medicine Hat the flour mills closed down temporarily, and breweries reported business only fair. At Lethbridge the flour mills were fairly well employed, but the macaroni factory was busy. At Calgary the flour mills closed down awaiting the new crop; the abattoir and packing houses were fully employed; cigar factories and breweries and distilleries were dull. The breweries at Fernie reported business very brisk. At Vancouver the flour, feed and cereal mills were steadily employed, and the sugar refinery ran normally, although shipments of raw sugar were becoming irregular. The abattoirs and meat packing houses were busy. There was a constant demand for help in the fruit and vegetable canneries. Confectioners were affected by the sugar regulations, but the soft drink factories were well employed. Cigarmakers were busy. New Westminster reported the abattoir running full time and the fruit canning and vegetable evaporating plants working double shifts. The cigar factories re-employed some of the hands laid off last month. The brewery was very busy, while the distillery was arranging to start the manufacture of alcohol for Government uses. At Victoria the fruit and vegetable canneries were operating to capacity, and the breweries

were well employed making light beers, chiefly for export trade.

Textiles, cordage and carpets

The rope works at Halifax took on additional help during the month. The woollen mills at Truro worked full time and were short of help. St. John reported the cotton mills working steadily. At Moncton the woollen mill ran steadily and the linen factory was well employed, but the underwear company was quieter. Montreal reported a general shortage of raw material, though the cotton mills worked to capacity and had to refuse orders. The woollen mills also worked steadily, though many looms are idle for want of tenders. The cotton mills at Quebec worked overtime and the sail and tent makers were well employed. Sherbrooke and St. Hyacinthe both reported the textile group active in all its branches. The Wabasso Cotton Company at Three Rivers continued to employ more than 1,200 hands. Toronto reported that the knitting mills were busy on Government contracts and a scarcity of spinners was reported by both knitting mills and carpet factories. Many concerns were busy on cotton underwear for the American army. Women were being trained as weavers to take the place of men. Tent and sail makers had plenty of employment. Hamilton reported activity throughout the textile group, with a demand for textile workers. A ten per cent wage increase was given to the employees of both the Canadian Cotton and the Hamilton Cotton Company, affecting about 1,000 workers. Kingston reported the textile mills active. Peterborough and Galt reported the woollen mills working night and day, with a scarcity of female help. At Brantford the textile industries and the cordage company were all busy. The Dominion Twine Factory at Kitchener was short-handed. At Guelph there was a demand for female workers in the linen and carpet mills. Stratford reported that the woollen, hosiery and knitting factories were taking on extra help. At London the hosiery companies worked to capacity and employed extra help, except that at the Penman Company a severe fire caused a reduction in operations. At Chatham the textile company was looking for more help. At Winnipeg the bag companies worked with their regular staffs, though the knitting factory was almost idle and the tent and awning firms reported a decrease in business. The tent, awning and sail makers at Vancouver reported difficulty in getting skilled operators for the heavy machines.

Clothing and laundering

The clothing manufacturers and laundries at Halifax had plenty of employment for the help available. At Westville the steam laundry made some additions to its plant to take care of increased business. At Truro the cap factory worked full time. The ready-made clothing establishments at St. John report an improvement in business over last month, while the steam laundries needed expert help. Moncton and Fredericton reported conditions normal. The fur manufacturers at Montreal reported an increase in business as compared with last year. Quebec reported that the clothing trades, the glove and fur manufacturers were quiet, but that steam laundries were busy. At St. Hyacinthe and Three Rivers the clothing trades and glove manufacturers were actively employed. At St. Jean-Iberville the Cluett-Peabody Company ran with a reduced staff. At Sorel the Poplar Shirt Company gave employment to over 100 hands. Toronto reported that the ready-made clothing firms were all busy and that there was a demand for operators in the whitewear and blouse factories. Hamilton reported a slight demand for labour in the clothing group. The shirt factory at Belleville gave employment to a large number of hands. At Peterborough, Brantford and Galt the clothing firms were active. At Kitchener the shirt, collar and button factories were in need of boys and girls. Winnipeg reported that some of the ready-made clothing factories had increased their staffs, though in the white-

wear, shirt and cap factories they remained as usual. The glove manufacturers found difficulty in getting experienced help, the furriers took on additional hands, and the laundries were in constant need of help. Vancouver reported that the clothing group generally was well employed, and that the laundries, dyeing and cleaning establishments were all busy. New Westminster reported the steam laundry working to capacity. At Victoria the shirt and overall factories continued to be busy.

Pulp, paper and fibre

St. John reported that the pulp mill continued to run steadily. Newcastle reported that the pulp and paper mills continued to be busy. Sherbrooke reported the pulp and paper mills actively engaged. At Three Rivers the Wayagamack Pulp and Paper Company employed nearly 800 men and the St. Maurice Company employed over 500 hands. Hamilton reported the felt and tar paper companies active. St. Catharines reported the beaverboard, paper and other pulp product companies well employed. The paper mills at Sault Ste. Marie were handicapped by shortage of labour. Port Arthur reported that the pulp mill was working to full capacity. Vancouver reported that the pulp and paper mills up the coast were very busy and short of labour, and Victoria reported all the mills working to full capacity.

Printing, publishing and paper goods

Halifax reported a continued shortage of compositors and platen pressmen in newspaper and job plants. St. John reported activity in the printing and binding establishments, with a shortage of job printers. At Newcastle and Fredericton the printers were well employed, and at Montreal employment was maintained. At Quebec and St. Hyacinthe the printing trades and paper box factories reported a busy month. Toronto reported that printers, bookbinders, engravers and lithographers were busy and that there was a shortage of labour in the paper goods manufacturies. Hamilton and Kingston also reported activity in this group. The paper box factory at Galt had a busy month, but the printing business was quiet. The Hampel Paper Box Company at Brantford reported activity. At Kitchener a new job printing office opened during the month, and the paper box factory reported a continuance of last month's activity. The paper box factories at Guelph also were busy. Woodstock reported a demand for experienced printers. At London the paper box companies were very busy. Some slackness in this group was reported at Chatham and Windsor. Winnipeg reported that the newspaper and job printers, bookbinders and paper box makers were well employed. At Calgary the newspaper and job printers were active. Printers generally were fairly busy in Vancouver and New Westminster, and at Victoria the paper box makers were well employed.

Woodworking and furniture

At Halifax and Sydney the sash, door and planing mills continued to work to capacity, but at Westville the woodworking plants reported business quiet. At Amherst the sash, door and planing mills were exceptionally busy, but at Charlottetown they were affected by a scarcity of lumber. At St. John the planing mills were very busy and the broom factories were advertising for boys and girls, and at Newcastle the planing mills and wooden box factory were very active. At Fredericton the sash, door and planing mills worked to capacity. Sherbrooke reported the planing mills and chair factories active. At St. Hyacinthe the planing mills were very active, and the organ and wooden box factories were well employed. At Three Rivers the planing mills and the wooden box and chair factories gave steady employment. At Toronto the box and basket factories were fully employed, and the furniture and piano manufacturers also had a busy month, though short of skilled labour. Hamilton re-

ported the sash, door and planing mills as fairly well employed and the rest of the woodwork and furniture group as active. At St. Catharines the planing mills were busy, but at Brockville they were rather quiet. Kingston reported the planing mills and broom factories active and the piano factories busy. At Peterborough, Brantford and Galt the planing mills and box factories worked to capacity. Kitchener reported a demand for skilled furniture hands, and at the cooperage plant also help was wanted. The piano and organ company worked full time and the toy factory was very busy. Piano workers at Guelph were well employed. The planing mills at London reported business fair, but the piano company was very busy. Chatham reported a scarcity of skilled workers in the sash, door and planing mills; also good employment in the wooden box factories. Windsor reported some improvement over the dullness of last month in the planing mills. The broom factories were very quiet, but the piano factory continued to employ the regular number of hands. At Sault Ste. Marie the sash and door factories were well employed. The sash, door and planing mills at Winnipeg reported business normal and the wooden box factories reported continued activity. At Brandon and Regina the planing mills worked full time, but at Prince Albert and Medicine Hat they were quiet. At Lethbridge the planing mills were kept busy in connection with the new grain tanks. Vancouver reported the sash, door and planing mills working to capacity. At New Westminster the wooden box factories were working on double shifts. At Victoria activity in the sash, door and planing mills continued to increase.

Leather, boots, shoes and rubber

St. John reported the tannery active and in need of help, and the boot and shoe factory well employed. Fredericton reported that the shoe and larrigan factories were running full time. At Montreal the tanneries and shoe factories reported a rather quiet month. At Quebec the boot and shoe factories and tanneries were active, but the trunk and bag factories were quiet. Sherbrooke reported the boot and shoe factories fairly well employed. St. Hyacinthe reported an active month in the leather industry, with a scarcity of help. The boot and shoe factories at Three Rivers employed over 200 hands. Sorel reported normal conditions in the tannery and shoe factory. At Toronto the boot and shoe makers were quiet, but the harness, trunk and leather bag trades were good and the rubber plants were operating to capacity. Hamilton reported activity in this group. Kingston reported the tanneries very active. At Galt the boot and shoe factories were very busy and short of help. Kitchener reported that the tanneries could not get enough help; that the boot and shoe factory was working full time, and that there was some demand for trunk makers. The Dominion Tire factory worked day and night shifts with about 600 hands and were in need of more help, and the Kaufman Rubber factory was also very busy and in need of hands. London reported the tanneries exceptionally busy and the shoe factories well employed. St. Thomas reported some shortage of shoe workers. At Windsor the trunk, bag and harness makers were very quiet. At Brandon and Calgary the leather workers were well employed. At Vancouver the boot and shoe factories were working to capacity. New Westminster reported normal conditions at the tannery. Victoria reported dullness in the harness trade.

Clay, glass and stone

Halifax reported a continued demand for stone and granite cutters, but at St. John the stone and granite workers were dull, as were also brick, tile and sewer pipe makers. Steps were being taken to rebuild the Humphreys Glass Works at Moncton, which was destroyed by fire in July. Quebec reported dullness in this group, except that the brickyards were active. Sherbrooke reported dull-

ness generally, but St. Hyacinthe reported that the stone and granite cutters had a fairly good month, that the brick-makers were busy, and that the lime burners were active. Toronto reported that the glass factories were well employed. Hamilton reported the clay, glass and stone group generally as active. Brockville and Kingston reported it quiet. The pottery at Belleville was steadily employed in the manufacture of smallware and tiles. At Kitchener the Braum Marble Works reported a fair month. Stratford and Chatham reported that the brick, tile and sewer pipe workers were well employed. At Windsor the sewer pipe makers had a fairly good month. At Regina the cut stone and granite workers were fairly well employed. The brick yards at Prince Albert reported a slight improvement over the dullness of last month. At Medicine Hat the brick and tile plants were not so well employed as in the previous month, but the Medalta Stoneware Company was well employed. At Vancouver and Victoria a general dullness prevailed.

Paints, oils, chemicals, explosives

Halifax reported that the paint company was well employed. Newcastle reported that the extract factories were fairly busy. At Montreal the paint factories were steadily employed. At Quebec the soap factories were reported busy and the cartridge factories very busy. Sherbrooke reported general activity in this group. At Three Rivers the two paint factories were well employed. Toronto reported that the paint, varnish and chemical works were all active. Niagara Falls reported that the several big electro-chemical plants were busy and that rapid progress was being made in the erection of a new abrasives factory. Galt reported that the soap factory was busy. Brantford reported that the Scarfe Varnish Company had a very busy month, but that the starch factory had discontinued operations. At Windsor the paint and varnish companies reported that business was only fair, also that the soap and perfumes companies were running short-handed during the holiday season. The soap works at Winnipeg reported that there had been no change in employment during the month. Regina reported that the oil works ran full time with a complete staff and that the soap works were fairly busy. Vancouver reported that the petroleum refinery and oil works generally were busy despite uncertainty in delivery of the raw product. The paint factories were reported busy. At Victoria the powder and explosives factories were busy and in some cases operating two shifts.

Railways, shipping and 'longshore work

The earnings of the Canadian Pacific Railway during July were $12,374,164, as compared with $13,377,860 for the same month in 1917. Sydney reported some increased activity in navigation and 'longshore work. At Halifax the street and electric railways added a few motormen and conductors to their staff, but had not sufficient men to run the usual number of cars. Women conductors were reported to be giving entire satisfaction. 'Longshoremen were well employed. Truro reported that railway trainmen were all working long shifts owing to the shortage of men. Charlottetown reported the steam railways very busy and that the railway repair shops were well employed. 'Longshore work was dull. Liveries reported a dull month, but the garages were very busy. At St. John 'longshore work and navigation were very dull, but the garages were very busy. The street railway service was somewhat disorganized by the shortage of help. At Moncton the electric car service to the suburban villages had been discontinued until after the war. On the steam railways operating crews were very active and were doing much special work. Newcastle reported that railway transport workers were very busy, but that navigation was dull. Fredericton reported that the

railways were doing a capacity business. At Quebec the repair shops reported a very busy month; 'longshoremen and freight handlers were also very busy, but ship labourers were very dull. Garages were very busy. St. Hyacinthe reported that all classes of railway employees were working full time. Three Rivers reported that navigation was dull. Toronto reported that railway employees generally were busy, especially during the latter part of the month; street railwaymen had steady work; lake transportation was more active than in July. Hamilton reported that the inland navigation lines were active and that employment was good in steam and electric railways. Brockville reported a slight improvement in 'longshore work. Kingston reported the railway repair shops active and employment good in navigation and 'longshore work. The Grand Trunk Railway repair shops at Belleville and London were busy. At St. Thomas the railway traffic and shop employees of the Michigan Central Railway were busy, while other railwaymen were fairly well employed. At Windsor the liveries and garages reported a busy month. Sault Ste. Marie reported that 1,546,088 tons of freight were locked through the Canadian canal during the month, as compared with 2,876,582 tons in the corresponding month in 1917. Winnipeg reported considerable activity in the handling of grain, while the railroad repair shops continued to be well employed; in street railway transportation there was a constant demand for men; the liveries and garages reported business normal. Regina reported the steam and electric railways only fairly busy, but the railway repair shops were well employed. Moose Jaw reported that transportation was quiet. The railways at Prince Albert were busy on lumber shipments. The railway repair shops at Calgary were well employed. Fernie reported freight traffic fairly active due to increased lumber shipments. Vancouver reported 'longshore workers well employed. The railway repair shops at New Westminster took on full staffs during the month. The heavy freight business of the past two months continued.

Mining and quarrying

Quebec reported considerable activity in the stone quarries and sand pits. Sherbrooke reported activity generally in the mining group except in granite quarrying which was quiet. It was reported at Cobalt that in order to attract additional labour to the silver mines a daily bonus of 25 cents might possibly be paid. During August the Cobalt mines shipped a total of 36 cars containing 2,554,180 pounds of ore, as compared with 44 cars containing 3,166,328 pounds in July. Bullion shipments for August amounted to 801,356 fine ounces of silver as compared with 1,020,650 fine ounces in July. The Porcupine district continued to suffer from a marked shortage of skilled labour; the Hollinger and McIntyre mines were the only important producers operating. The Dome Lake and the Davidson mines had small mills running at limited capacity. The Kirkland Lake mines were fairly active, but the supply of labour was much below normal. At Boston Creek a 40-ton mill was operating at the Patricia mines. Fernie reported that the shortage of labour very seriously interfered with the workings of the mines of the district. At the Rossland mines about 200 men were employed in development work only. The smelter and refineries at Trail operated on a reduced scale.

Sydney reported the output of the Dominion Coal Company as 292,000 tons as against 280,000 tons in July. The output at the Sydney mines was 42,000 tons as against 46,450 tons in July. The coke output of the Dominion Steel Company was 35,000 tons with 520 ovens operating, as compared with 42,000 tons and 535 ovens in July. The coke output at the Sydney mines was 9,500 tons with 180 ovens in operation, as compared with 10,000 tons and 182 ovens in July. Westville reported that all the coal mines of the district worked full

time, though the shortage of labour curtailed the output. Fredericton reported that the Minto mines worked steadily, but that there was a shortage of labour. Lethbridge reported great activity in coal mining and that more mines were likely to be opened up in the near future. Calgary reported that all the miners of the district were well employed. Fernie reported that the limited supply of available labour seriously affected the production of coal and the manufacture of coke.

Building and construction

Halifax reported great activity in building construction and repair work; also that it was impossible to secure sufficient labour owing to the shortage of housing accommodation for the workers. Moncton reported building operations were quiet, but that carpenters and building labourers were in fair demand. Fredericton reported that all the available labour in the building trades was being absorbed. At Montreal, building and construction was very quiet. Quebec reported that in spite of the small amount of building going on there was difficulty in securing sufficient labour. Sorel reported a good month for carpenters and joiners. Toronto reported that the building trades were actively employed, mainly on additions and extensions to industrial plants. Hamilton reported the building trades all well employed, with a demand for carpenters, plumbers and steel workers. During the month carpenters received an increase of 5 cents an hour and lathers an increase of 2 cents. Niagara reported the building trades busy, mainly on dwelling houses. Kingston reported dullness in the building trades, but Peterborough reported that employment was fairly good. Brantford reported considerable activity in erecting dwelling houses. Kitchener reported building trades well employed and that carpenters and labourers were in demand. At Guelph they were quiet, but at Stratford they were fairly active. Woodstock reported a scarcity of labour. Building was very quiet in London and Windsor, but a little better in Chatham. Port Arthur reported that repair work on buildings was brisk. Winnipeg reported that the building trades continued to be fairly well employed. At Brandon, building labourers generally were in good demand. Regina reported that work on dwelling houses was very limited, but that some additions and repairs to industrial buildings were being made. Prince Albert reported that all the available building labourers were engaged on the new packing house of the P. Burns Company. At Lethbridge and Calgary the building trades were dull; also at Vancouver and New Westminster.

The value of building permits issued in 35 cities decreased from $5,863,834 in July to $5,018,092 in August, or 14.4 per cent. As compared with August, 1917, there was an increase of 55.2 per cent.

Lumbering

Westville reported that the lumbering industry was much more active during August than during July, the demand for export trade being particularly heavy. The lowest grades of rough boards and scantling sold for $32 per M. St. John reported that the sawmills were busy filling English contracts. At Newcastle the sawmills were absorbing all the labour available. Fredericton reported the mills were all in operation and giving employment to a large number of men. Sherbrooke reported that the camps for railway ties, telegraph poles, etc., were quiet, but that the saw and shingle mills were active. Three Rivers reported that the three lumber mills, each employing several hundred men, were working full time. Sorel reported that the lumber mills were busier than for some time past, more especially in the cutting of cordwood. At Peterborough the lumber mills were all working to full capacity, but log driving was impeded by the shortage of men. Prince Albert reported that the lumber mills continued running day and night shifts, but that the Big River mill had to dis-

continue night work owing to scarcity of labour. Fernie reported that the lumber industry showed a decided improvement over last month. The lumber mills in the Nelson and Trail districts curtailed operations slightly. Vancouver reported that all branches of the lumber industry were very busy. New Westminster reported that the saw and shingle mills were running to full capacity with plenty of work ahead. At Victoria the lumber industry continued to be busy in all its branches. The sawmills of the Cameron Lumber Company, which was partially destroyed by fire some months ago, has been rebuilt.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING AUGUST, 1918

DURING the month of August the Department received reports from five Boards of Conciliation and Investigation appointed to inquire into disputes affecting: (1) The Canadian Northern Express Company and its employees; (2) The New Brunswick Power Company and its conductors, linemen, power-house men, shop and barn men, trackmen, etc.; (3) The Canadian General Electric Company, Limited, Peterborough, Ont., and its machinists, specialists and electrical workers; (4) The Canadian Pacific Railway Company and its commercial telegraphers; and (5) The Ottawa Electric Railway Company and its employees; also a report from the Labour Appeal Board, to which the last mentioned dispute was referred.

Ten applications were received for the establishment of Boards; and one other Board of Conciliation and Investigation established during the preceding month, also the Labour Appeal Board, were completed by the appointment of chairmen.

Applications Received

An application was received from the employees of the Dominion Express Company, members of the Canadian Brotherhood of Railroad Employees on lines from Port Arthur to Halifax and Vancouver, for a Board to deal with a dispute concerning the adoption of a new wage schedule governing all employees, to take the place of the one at present in effect, which expires May 31, 1919, also union recognition. In view of the fact that the Dominion Express Company already had an agreement with an organization which embraced the majority of its employees, in the Minister's view, a Board to set aside this agreement did not fall within the scope of the statute.

An application was received from the employees in the Aviation Department of the Imperial Munitions Board, Toronto, members of the United Brotherhood of Carpenters and Joiners of America, for a Board to deal with a dispute concerning a change in their working conditions. The dispute was arranged by mediation of the Department.

An application was received from the employees of the Hamilton Cotton Company for a Board to deal with a dispute concerning alleged discrimination against union members and a demand for the reinstatement of a discharged employee. A strike occurred on August 2, but the employees returned to work pending investigation by a Board of Conciliation and Investigation. A Board was established as follows: His Honour Judge L. B. C. Livingstone, Welland, chairman, and Messrs. S. F. Washington, K.C., and F. J. Flatman, of Hamilton, nominees of the company and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two Board members.

An application was received from the employees of certain firms in Toronto, members of the Employers Association of Toronto, for a Board to deal with a

dispute with their employees, being blacksmiths and helpers, engaged in war work, concerning increased wages. These employees had gone on strike August 7, but returned to work pending an investigation by a Board of Conciliation and Investigation. A Board was established as follows: His Honour Judge Colin G. Snider, Hamilton, chairman; Messrs. James G. Merrick and Fred. Bancroft, of Toronto, nominees of the employers and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two Board members.

An application was received from the Polson Iron Works, of Toronto, for a Board to deal with a dispute concerning a demand for increased wages made by its employees, being marine pipe and steamfitters, members of local union No. 731, United Association of Plumbers and Steamfitters of the United States and Canada, who were engaged in shipbuilding and who had gone on strike on July 6. This dispute was eventually referred to the foregoing Board, the powers of this Board being enlarged accordingly.

An application was received from the employees of the Algoma Steel Corporation and the Algoma Construction Engineering Company, Sault Ste. Marie, Ont., being steel workers engaged in war work, and members of Algoma Lodge No. 5, Amalgamated Association of Iron, Steel and Tin Workers of North America, for a Board to deal with a dispute concerning increased wages and union recognition. A Board was established as follows: His Honour Judge F. R. Powell, Parry Sound, Ont., chairman, and Messrs. Hartley Dewart, K.C., and F. Buscombe, of Toronto, nominees of the company and the employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two Board members.

An application was received from the employees of the Great North Western Telegraph Company, members of the Great North Western System, Division No. 43 of the Commercial Telegraphers' Union of America, for a Board to deal with a dispute concerning wages and rules. The establishment of the Board was stayed on the request of the employees' representative, pending renewed negotiations for settlement.

An application was received from the employees of the Dominion Iron and Steel Company, Limited, Sydney, N.S., being members of Lodge No. 1, Amalgamated Association of Iron, Steel and Tin Workers of North America, for a Board to deal with a dispute concerning wages and Sunday overtime. The men had gone on strike four consecutive Sundays, but remained at work on Sunday, September 1, pending investigation of the dispute by a Board of Conciliation and Investigation. The Board, however, had not been established at the close of the month of August.

An application was received from the employees of the National Manufacturing Company, of Ottawa, engaged in war work, and members of Munitions Workers' Federal Labour Union, No. 56, for a Board to deal with a dispute concerning wages. The application was under consideration at the close of the month.

An application was received from the employees of the Canadian Express Company, members of the Canadian Brotherhood of Railroad Employees, for a Board to deal with a dispute concerning wages and the dismissal of certain employees. A strike occurred on August 2, but the employees returned to work on August 9 pending an investigation of the dispute by a Board of Conciliation and Investigation. The Board, however, had not been established at the close of the month.

Other Proceedings under Act

An application which had been received in July for a Board in connection with differences between the Winnipeg Electric Railway and certain of its employees, being machinists, etc. At the request of both parties the application was held pending resumption of direct negotiations, but these not bringing an agreement procedure was resumed dur-

ing August when a Board was constituted as follows: Mr. Isaac Campbell, Winnipeg, chairman, appointed by the Minister on the joint recommendation of the other two Board members, Messrs. John C. Sullivan and Ernest Robinson, nominees of the company and employees respectively.

Mention is made in the August issue of the LABOUR GAZETTE to the constitution of a Labour Appeal Board. During August Mr. Herbert J. Daly, of Toronto, was appointed chairman of the Board by the Minister of Labour in the absence of a joint recommendation from the other members of the Board.

Report of Board in Dispute between the Canadian Northern Express Company and its Employees

A REPORT was received from the Board established to deal with the dispute concerning wages and conditions between the Canadian Northern Express Company and its employees, members of the Canadian Brotherhood of Railway Employees. The Board was composed as follows: Honourable Mr. Chief Justice Mathers, of Toronto, chairman, appointed on the joint recommendation of the other two Board members, Messrs. C. E. Dafoe and D. Campbell, of Winnipeg, nominees of the company and employees respectively. The report was unanimous and contained certain recommendations as to the settlement of the dispute and was accompanied by a proposed schedule of wages.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and amendments, and a dispute between the Canadian Northern Express Company and certain of its employees, being members of the Canadian Brotherhood of Railway Employees.

To the Honourable Thomas W. Crothers, K.C.,
Minister of Labour,
Ottawa.

The undersigned members of a Concillation Board constituted to investigate the subject matter of said dispute, by order dated fourteenth May, 1918, report as follows:

The members of the said Board were appointed by your order, dated the tenth day of June, 1918, and held their first meeting for the purpose of the investigation on the twenty-second day of June following.

On the said date we were attended by W. C. Muir, general superintendent of the company, and by C. A. Cunningham, superintendent of the Western Division, on behalf of the employer, and by J. W. Watson, general chairman of the employees' committee; N. L. Preston, vice-chairman of the said committee; H. E. Race, general secretary of the committee, and subsequently by W. N. Doane, and by members of the general committee, on behalf of the employees.

Matters in Dispute.

It then appeared that the dispute involved the consideration and adoption of a schedule of rules and rates of pay of the employees of the company from Quebec, in the Province of Quebec, to Vancouver, in the Province of British Columbia.

At the present time there are four schedules in existence, viz.:

1. One for the messengers on the Western Division;
2. One for the messengers on the Eastern Division;
3. One for the office employees on the Western Division;
4. One for the office employees on the Eastern Division;

and it was the desire of the employees, concurred in by the officers of the company, that these four schedules should be incorporated into one.

Meetings of Board.

Meetings of the Board were held on June 22, 27 and 28, July 1, 2, 3, 4, 5, 6, 8, 9, 10, 11, 12, 15, 16, 17, 18, 19, 20, 22, 23, 24, 25, 26, 27, 29 and 30, and August 7, 8, 9, 10.

After prolonged negotiations, we succeeded in effecting an agreement between the parties on all points involved in the dispute with the exception of those points hereinafter specifically referred to. The greatest difference occurred respecting the rates of pay on the Western Division, and the settlement of such rates was left, with few exceptions, in the hands of the Board. With respect to the Eastern Division the parties agreed upon the rates with a few exceptions.

We are pleased to be able to report that upon all the points upon which the parties did not agree we have been able to arrive at a unanimous decision.

Recognition of Brotherhood.

The first point left to us was the question of recognition by the company of the Canadian Brotherhood of Railway Employees. This is a comparatively new organization and it has not hitherto been recognized by any railway except by the Canadian Government railways. It has a large membership amongst the Express company's employees on the Western Division and has also a considerable membership on the Eastern Division. After considering the matter from all angles, we can see no valid reason why the company should not recognize this brotherhood, and we recommend that it be recognized.

Agents and Travelling Agents.

The next point in dispute was the inclusion in the schedule of the company's agents. More than half of the agents on the Western Division are members of the Brotherhood, but it does not appear that any of the agents on the Eastern Division are members. The company strongly objected to including the agents in the schedule. Their contention was that the agents are officers of the company, and, for that reason, it was not desirable that they should be included in a schedule and be subject to the rules and regulations governing other employees. After canvassing the whole situation, and in view of the fact that it does not appear that even a majority of the agents are members of the Brotherhood, we cannot recommend that the agents be included in the schedule. What we have said with respect to agents also applies to travelling agents.

Posting Notices.

The employees asked for the right to post notices of meetings on the company's premises. The premises occupied by the company belongs to the railway company, and as it refuses to consent to such notices being posted, the right cannot be granted.

Half Holiday for Female Employees.

The employees also asked that all female employees be allowed one-half day per week off duty. These employees are occupying the positions formerly held by male employees with the same rate of pay. The privilege asked for is not granted by other companies, and we cannot recommend that it be granted by this company.

Rates of Pay.

The next point to be dealt with was the rates of pay. The points left for our decision are too numerous to be discussed in detail. It will be sufficient to say that we considered each position separately and upon its own merits, and fixed the rate of pay which seems to us to be fair and reasonable under the circumstances.

Coming Into Force of Rules and Rates of Pay.

Both parties agreed that the rules should take effect as of the fifteenth August instant, but there was a difference of opinion as to the date when the rates of pay should take effect. The employees asked that the rates of pay should take effect as of the first March. The company, on the other hand, contended that the time should be the first of the month after this report is made. It appears to us that the normal time for new rates taking effect is upon the first pay-day succeeding the adoption of the new schedule, but that if any delay in the prosecution of the inquiry, for which the employees are not responsible, has taken place, the new rates should be dated back to the date when they would have come into effect had the necessary steps for the constitution of the Board and the prosecution of the inquiry followed after each other in the ordinary and regular course of events. Had the Board been constituted immediately upon the application therefor, and had the inquiry been prosecuted without delay, it could not have been completed before the end of May. We consequently recommend that the rates of pay take effect as of the first day of June.

Duration of Agreement.

We have considered with great care the question of adopting some provision which will, at least during the period of the war, prevent strikes and lockouts and give both employers and employees the assurance that while the nation is engaged in a struggle for its life they may devote their energies to the prosecution of the business of the country in the assurance that their operations will not be interrupted by industrial strife. To us it appears absolutely essential that during this period of peril all the forces of the country should be mobilized and applied towards the successful prosecution of the war, and we believe there is sufficient good sense and patriotism in the ranks of both employees and employers to induce them to adopt some method of settling their disputes without the interruption of industry which is always involved in a strike or a lockout. At an early period in the negotiations we outlined a proposal to this end and it was from time to time discussed by the parties as the investigation proceeded. This proposal involved three considerations, viz.:

1. That during the period of the war there should be no strike and no lockout;
2. That periodically there should be a comparison of the increased cost of living with that existing at the time the scale of wages was adopted, and that an increase sufficient to take care of the increased cost of living, if any, should from time to time be granted;
3. That in the event of any dispute arising as to the interpretation of these rules and rates of pay or their application, a reference should be made to some constituted Board, whose decision should be accepted as final by both parties.

At the suggestion of both the company and Mr. Watson, chairman of the employees' committee, the proposal was put in concrete form and it now appears as the last article of the annexed schedule. After it had been drafted a joint meeting of the members of this Board and of the members of another Board, consisting of the present chairman, Mr. Dafoe, and Mr. F. Urry, then holding an inquiry into a dispute between the Canadian Northern Railway and its clerks and station employees, was held. At this meeting all the members of both Boards were present, together with Mr. Muir, on behalf of the company; Mr. Watson, chairman of the employees' committee; Mr. Dixon and Mr. Howard, chairman and secretary of the clerks' and station employees' committee, and several members of their respective committees. The article appearing in this schedule was read and discussed and it was unanimously adopted by all the members of the two Boards, by Mr. Muir on behalf of the company, by the chairman of both committees, and by all the members of both committees present. The sentiment of all present was that an agreement such as outlined was most desirable. One member of the clerks' committee suggested that it would be wiser not to pledge the Brotherhood to it until it had been submitted to the members of the different organizations and their assent obtained, but neither of the chairmen of the two committees agreed with this view. Both expressed the opinion that it was the patriotic duty of every British subject to do all that was possible to prevent industrial strife, and they could conceive of no reason why the members of the Brotherhood should not concur in a proposal so eminently fair.

We believe that no person who desires to see the Empire successful in the terrible struggle in which we are engaged will hesitate for a moment to agree to the clauses we have drafted. By doing so they will abandon little, if anything, of the rights which they now possess, because in the event of a dispute arising in the future its merits must of necessity be submitted to a Conciliation Board, and the experience of the past has shown that in a large majority of the cases the decision of the Board has been accepted. Under these circumstances, little, if anything, will be lost and much will be gained by agreeing to abide by the decision of such a Board in advance, and thus giving employers the assurance that until victory has been achieved and peace restored, labour and capital will work in harmony for the achievement of that end.

We desire to express our sincere thanks to Mr. Watson and the members of his committee for the manner in which they received this proposal and the readiness with which they agreed to abandon, for the period of the war at least, their right to strike. We believe their patriotic conduct will commend itself to the Brotherhood they represent and to the people of Canada as a whole.

We append hereto a schedule of rules and rates of pay and recommend the acceptance thereof by both parties.

Before closing, we desire to express our appreciation of the courtesy, candour, fairness and good temper with which the representatives of both the company and the employees conducted the negotiations, without which so satisfactory a result could not have been attained.

All of which is respectfully submitted.

(Sgd.) T. G. MATHERS,
Chairman of Board.

(Sgd.) C. E. DAFOE,
Member of Board.

(Sgd.) D. CAMPBELL,
Member of Board.

Dated this tenth day of August, A.D. 1918.

RULES AND RATES OF PAY GOVERNING CERTAIN CLASSES OF EMPLOYEES.

ARTICLE 1.

It is understood that the Canadian Brotherhood of Railway Employees' committee will represent the employees covered by this schedule in matters pertaining to rates, rules, seniority, and general grievances.

ARTICLE 2.

For the purpose of this schedule the word "employee" shall be understood to mean any employee, male or female, filling any position incorporated in these rules, regulations and rates of pay, irrespective of title by which designated.

ARTICLE 3.

Employees governed by this schedule will be required to furnish guarantee bonds in such amount as the Company may deem necessary to fully protect its interest. Premium thereon will be paid by the company.

ARTICLE 4.

Employees will not be discriminated against for being members of a Union or Brotherhood, nor for service on committees representing employees; members of committee shall be relieved when required for committee work and will be furnished necessary transportation. Sufficient notice must be given superintendent so that the service will not suffer, but at no time should it be necessary to give more than 15 days' notice.

ARTICLE 5.

Employees called upon to attend court or investigations at the request of the proper officials of the Express Company will receive pay at their stated rate of salary, and if away from home will be allowed transportation and reasonable hotel and living expenses when supported by proper vouchers.

ARTICLE 6.

Employees off duty on proper leave of absence, or on account of sickness for a reasonable length of time, will not lose their seniority rights. The Company, however, reserves the right to determine seniority rights after six months' absence, except that employees on war leave will retain their seniority.

ARTICLE 7.

(a) Any qualified employee except messengers called on by the proper authority to do relief work will be paid the minimum rate of pay specified for the position filled by the employee he relieves, provided it is not less than his own, and if away from home will be allowed reasonable living and travelling expenses when supported by proper vouchers.

(b) Any qualified employee doing messenger relief work, if required to take a route other than from his home terminal, will be allowed reasonable travelling expenses incurred while going to or from terminal out of which relief work is to be done.

ARTICLE 8.

(a) Right of promotion will extend over each superintendent's division and will be governed by fitness, the senior employee to be given the preference. Promotion rights, however, will not extend to an employee in the service less than six months.

(b) In the case of employees under local agent or claim agent promotion shall be confined to positions under such agent, except where such employee's seniority entitles him to the following positions, namely: messengers, agents, depot or assistant agents, accountants, cashiers and chief clerks.

(c) When a vacancy occurs, or a new position is created to which employees are entitled to promotion as per clause (b) hereof, it will be bulletined for 15 days in all agents' bulletin books in each superintendent's district, during which time employees may apply for same.

(d) When a vacancy occurs in any specified position under a local agent, or a similar new position is created, it will be bulletined in the agent's division book for five days, during which time employees may apply for same.

(e) When there is a change in train service which materially affects messengers' runs, such runs will be bulletined. All runs, however, will be bulletined when the summer time-card is issued. Bulletins covering messengers' routes will state at which end of route the long lay-over will be.

(f) Bulletins will close at the expiration of the time provided in the foregoing clauses, assignments will be made within five days thereafter, and change will take place within ten days from date of assignment. The name of the employee awarded the position shall be immediately bulletined.

(g) It is understood when an employee is promoted to a higher paid position he will, if fully qualified to fill the position, be paid the specified minimum rate for the position. If not fully qualified for the position he will be placed under probation for 30 days. If he qualifies within that time he will be paid the specified minimum rate from the date appointed to the position. If he does not qualify within that time he will be paid only the same rate of pay that he received in former position, and may be removed from the position and revert to his previous one.

(h) Any employee, except chairman of the general committee, refusing promotion offered him, where such promotion would take him into another class, shall become junior (within that class only) to the employee accepting the position.

(i) All temporary vacancies in positions mentioned in clause (b) shall be filled by the Company for any period up to 30 days, thereafter said vacancy to be awarded to senior qualified employee making application.

(j) It will be understood that when owing to special qualifications or length of service, etc., increases of pay are granted to an employee, which makes his monthly pay higher than the specified minimum for the position occupied by him, it will in no way be construed as establishing the rate of pay for the position.

(k) Employees working on an hourly basis shall, after a period of three months, possess seniority entitling them to a monthly paid position should one become vacant, having due regard to their fitness and ability.

(l) Bulletin books shall be supplied at all offices and terminals of the company.

ARTICLE 9.

In the event of a reduction of staff, senior qualified employees will be retained in preferenc to junior employees.

Employees laid off will, if available, be given preference for employment when staff is increased, provided their services were satisfactory, and will retain their seniority.

ARTICLE 10.

(a) A list showing the seniority of all employees (including those on war leave) governed by this schedule, and the date of their last entry into the service of the Company, will be posted by the Company at all offices and terminals in each division within 60 days after the adoption of this schedule, and will be revised and so posted in the month of January in each succeeding year in which this schedule remains in effect. Corrections will be made on proper representation by any employee, but if an employee does not avail himself of the privilege within three months the list shall be considered as accurate and closed. This time limit will be extended in the case of employees on leave of absence.

(b) The seniority of an employee shall date from the time he last entered the service.

(c) The seniority of a messenger will date from the time he was last appointed as messenger, provided, however, that messengers will retain their seniority standing as employees.

ARTICLE 11.

Employees shall, on application, have returned to them all service cards or letters of recommendation that may have been taken up for inspection.

ARTICLE 12.

When an employee is dismissed, or leaves the service, he will immediately be paid all money due him and also be given, upon request, the usual certificate of service, showing capacity in which employed and whether discharged or left of his own accord. If discharged, cause of dismissal to be stated if requested.

ARTICLE 13.

(a) Motormen or wagonmen in permanent service will be supplied each year with a complete uniform made of material as specified in clause (b), which shall consist of one three-piece suit, with one extra pair of trousers of same material, one winter reefer, one winter and one summer cap; to be supplied as follows:

Three-piece suit and summer cap on or about May first of each year, one extra pair of trousers, winter reefer and cap, on or about October first of the same year.

In the case of motormen or wagonmen entering the service, if the date falls between April first and August thirtieth, they will be supplied with one three-piece suit and summer cap. If the date falls between September first and April first, they will be supplied with one pair of trousers, winter reefer and cap; it to be understood, however, that only one complete uniform will be supplied in any one year.

(b) Uniform will be of indigo blue serge, weight to be not less than 19 ounces per yard. The reefer will be of good Irish frieze cloth, weight to be not less than 44 ounces per yard. If possible, material supplied will contain not less than 60 per cent wool.

(c) The employees will pay one-third cost of uniform, which amount will, if the employee so desires, be deducted from his monthly pay in three equal monthly instalments.

In the event of the employee being dismissed or leaving the service before his proportion is paid, any balance due will be deducted at the time he is paid off and he may retain the uniform.

ARTICLE 14.

(a) No employee will be disciplined or dismissed from the service without just cause.

(b) When an employee has been disciplined or dismissed or feels that he has been unfairly dealt with, he will have the right, within ten days, to appeal to his superior officer, and may be accompanied by one or two of his fellow employees.

(c) If the decision is considered to be unjust by the employee affected, an appeal may be made through the chairman of the local committee, who may be accompanied by one or more of the employees to the higher officer of the company. If a charge has been laid against the employee affected, he may require the evidence in support of such charge to be given in his presence and in presence of the investigating officer of the company at the place of investigation. A complete record of the proceedings at this investigation will be taken in writing. If the employee affected feels the decision reached thereat to be unfair he will be furnished a complete copy of such record, and will have the right to appeal through the general committee to the highest officer of the company.

ARTICLE 15.

(a) Female employees, who have been in the service of the company one or more consecutive years, and male employees, who have been in the service of the company two or more consecutive years, will be allowed two weeks' leave of absence each year with full pay.

(b) If the company find it inconvenient to grant leave of absence during any year to an employee entitled to it under this Article, the employee shall, at his option, receive either extra compensation at his regular salary for the period, or in the next year additional leave of absence for like period.

(c) Applications for holidays filed in January of each year will be given preference in order of seniority of applicant, and applicants will be advised in February of dates allotted to them. January applicants will have preference over later applicants, and applicants after September 30 will not be entitled to salary compensation if the company is unable to relieve them that year. The company will, as far as practicable, relieve all applicants during the summer season when so desired.

Holidays or leave of absence, except as provided for in clause (e) will not be granted in the month of December.

(d) Applications received for transfers in the month of December will not be considered or dealt with during that month.

(e) Employees will be granted leave of absence by local agent or official in charge in special cases such as the following: death, serious illness, or unusual event in employee's family.

(f) All employees governed by this schedule shall be subject to the regulations governing Canadian Northern Railway employees as regards transportation for themselves and dependent members of their families.

(g) Employees will be granted transportation of their household goods in accordance with the general regulations of the Canadian Northern Railway Company.

Note.—It is understood that the company's rules in connection with clause (g) of this Article are that when an employee receives his change through bulletin, provided that he has not moved within one year, his household goods will be transported free, otherwise one-half rate will be given.

ARTICLE 16.

The following holidays will be granted with pay to employees not engaged in messenger service, viz.: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day.

When it is necessary to call upon employees to work on the holidays named they will be paid one-half day extra for that day. Employees will not be expected to work on holidays and will not be paid extra unless they are especially instructed by their foreman or head of department to do so.

Night men to receive the same consideration as day men.

Monthly paid employees, except messengers, called to work on Sunday shall be paid one day extra at time and one-half rates. Daily or hourly paid employees shall also receive time and one-half.

Minimum call to be two hours.

ARTICLE 17.

Monthly rated employees, except messengers, who work less than a full month, will be paid *pro rata* on the basis of a 26 day month.

ARTICLE 18.

(a) Ten consecutive hours, exclusive of meal hours, will constitute a day's work for stablemen, motormen, wagonmen and wagon service foremen.

(b) Except as specified in clause (a) of this Article, nine consecutive hours, exclusive of meal hours, will constitute a day's work for all employees except those working at night, when eight consecutive hours, exclusive of meal hours, will constitute a day's work.

This Article does not apply to messengers.

(c) Employees, working days, shall start and quit work between the hours of 6 a.m. and 7 p.m.

Employees, working nights, shall start and quit work between the hours of 5.30 p.m. and 7 a.m.

Employees will not be required to take more than one and one-half hours per day for meals.

(d) Employees required to work more than the specified hours per day, as prescribed in clauses (a) and (b) of this Article, will be paid overtime for such service at time and one-half, based on schedule rates, any portion of an hour less than 30 minutes not to count; any portion of an hour, 30 minutes or more, to count as one hour.

(e) Generally, employees are expected to have one day's rest in seven.

ARTICLE 19.

(a) When a messenger is required to work more than one car containing express matter he will be supplied with a helper when reasonably necessary.

(b) When a messenger or driver is required to handle heavy shipments, either in quantity or weight, he will be supplied with help when reasonably necessary.

ARTICLE 20.

Where a change of business conditions at an office necessitates an addition to the specified positions, the employee appointed will receive the same rate of pay as paid for a similar position at an office of like size and importance.

ARTICLE 21.

(a) Rates of pay for messengers on Western Division will be as follows:

First class routes.....	$135.00 per month
Second class routes	122.50 per month
Third class routes	110.00 per month

Rates of pay for messengers on Eastern Division will be as follows:

First class routes	$130.00 per month
Second class routes	117.50 per month
Third class routes	107.50 per month

(b) Messengers' routes will be classified as follows:

WESTERN DIVISION

FIRST CLASS—
Winnipeg and Kamsack.
Kamsack and No. Battleford.
No. Battleford and Edmonton.
Edmonton and Blue River.
Blue River and Vancouver.
Winnipeg and Regina.
Regina and Prince Albert.
Winnipeg and Dauphin.
Winnipeg and Port Arthur.
Saskatoon and Kindersley.
Kindersley and Calgary.
Saskatoon and Eston.

SECOND CLASSE—
Dfn. and Prince Albert.
Winnipeg and Hartney.
Winnipeg and Virden.
Calgary and Edmonton.
Brandon, Moose Jaw and Gravelbourg.
Winnipeg, Yorkton and Gypsumville.

THIRD CLASS—
Canora and Swan River.
Edmonton and Athabaska.
North Battleford and Prince Albert.
North Battleford and Turtleford.
Winnipeg and Hodgson.

EASTERN DIVISION

FIRST CLASS—
Port Arthur and Foleyet.
Foleyet and Toronto.
Toronto and Ottawa.
Toronto, Napanee and Ottawa.

SECOND CLASS—
Quebec and Chicoutimi.
Montreal and Ottawa.
Montreal and Quebec.

THIRD CLASS—
Toronto and Parry Sound.
Ottawa and Pembroke.

(c) The above rates are for 5,000 miles or less, all mileage in excess of 5,000 miles will be paid *pro rata*.

(d) Messengers and messengers' helpers making less than four thousand five hundred (4,500) miles per month will include detention to make up four thousand five hundred (4,500) miles.

(e) Messengers required to report for duty more than 15 minutes before the starting time of their train will be paid on the basis of 20 miles an hour for all time in excess of said 15 minutes.

(f) Messengers required to remain on duty after the arrival of their train at objective terminal will be paid on the basis of 20 miles per hour.

(g) Messengers will not be required to remain in cars or unload freight after arrival at objective terminal, except where car is taken over by a connecting messenger.

ARTICLE 22.

When the combined extra mileage on any regular run exceeds 5,000 miles per month an additional messenger will be appointed thereto as per Article 8, clause (c) hereof.

ARTICLE 23.

All messengers will be allowed eight consecutive hours' rest in each 24 consecutive hour period except in cases of extreme emergency.

ARTICLE 24.

Messenger's helpers will be paid on the basis of 80 per cent of the rate of pay specified for the route.

ARTICLE 25.

Messengers delayed at initial terminal, after time set for departure of train, will be allowed detention time *pro rata* in addition to pay for the trip, to the extent of such time as is not made up on the trip. Delays of 15 minutes or less not to count.

ARTICLE 26.

When a regular passenger train averages less than 20 miles an hour and a mixed train less than 12½ miles per hour, overtime will be allowed at the schedule rates on the routes on which such overtime is incurred on the basis of 20 and 12½ miles per hour respectively, for the time so occupied from the time train actually leaves initial terminal until arrival at objective terminal.

ARTICLE 27.

(a) Unless notified to the contrary, messengers will be required to report for duty at initial terminals in accordance with time as set forth in bulletin notices, but not to exceed one hour before departure of train.

(b) In the event of a train being cancelled, delayed or set back, and in consequence of not having been so notified, a messenger reports for duty at the regular time, he may, if not required, be then set back to actual time required for duty, but will be allowed one hour's pay at regular schedule rates for having so reported.

ARTICLE 28.

Except three routes denoted by star in specific classification of Article 24, messengers' routes shall cover same divisions and have same terminals and layover as passenger train crews.

ARTICLE 29.

Messengers will not be required to handle Government mail.

ARTICLE 30.

Messengers covering train between Prince Albert and East Prince Albert will be allowed for actual time necessary for the round trip, minimum one hour, at regular schedule rates.

ARTICLE 31.

(a) Messengers will submit tickets for each trip to cover their own time and that of helpers (when helpers are employed on the route). All time tickets as to terminal detention to be certified by agents or their accredited representatives at initial and objective terminals.

(b) If for any reason some portion of time claimed by messengers and messengers' helpers is not allowed they will be advised in writing with the reason for same. Time not in dispute will be paid for in the current pay-roll.

ARTICLE 32.

(a) For the purposes of this schedule, wagonmen, motormen and porters will be divided into two classes, junior and senior.

(b) A wagonman or motorman engaged in that capacity 18 months or more will be classed as senior and will be paid the senior rate of pay.

(c) A wagonman or motorman engaged in that capacity less than 18 months will be classed as junior and will be paid the junior rate of pay.

Note.—In the case of a porter promoted to such position the 18 months will be reduced by 50 per cent of the time served as porter.

(d) Porters engaged in that capacity six months or more will be classed as senior, and will be paid the senior rate of pay.

(e) Porters engaged in that capacity less than six months will be classed as junior and will be paid the junior rate of pay.

(f) Senior wagonman's or motorman's rate of pay will be $101.00 per month; junior wagonman's or motorman's rate of pay will be $85.00 per month. Senior porter's rate of pay will be $87.50 per month; junior porter's rate of pay will be $82.50 per month.

(g) The above classification of wagonmen, motormen and porters and rates of pay pertaining thereto will apply at the following main points:

Brandon.	Ottawa.	Toronto.
Calgary.	Quebec City.	Vancouver.
Edmonton.	Regina.	West Toronto.
Montreal.	Saskatoon.	Winnipeg.
Moose Jaw.		

Note.—The rate for a senior porter at Winnipeg who has served for one year or more in that capacity will be $92.50.

ARTICLE 33.

(a) The minimum rates of pay for clerks and stenographers shall be as follows:

Stenographers' minimum rate, per month....	$77.50
Clerks, under 18 years of age, per month....	50.00
Clerks, over 18 years of age, per month.....	70.00
For first year, and after one year, per month.	80.00

(b) The minimum rate of pay for stablemen will be $77.50 per month.

(c) The minimum rate of pay for porters at points other than those specified in Article 32, clause (g), will be $77.50 per month.

ARTICLE 34.

The rates of pay specified for the different positions at the various offices, as shown herein, will be the minimum rate, and nothing herein contained will be understood as reducing the present rate being paid to an employee in any position.

Note.—At all points other than those specified in clause (g) of Article 32, a junior porter, motorman or wagonman is one who has been engaged in that capacity one year or less, and a senior porter, motorman or wagonman is one who has been engaged in that capacity over one year.

Note.—In the case of a porter promoted to be a wagonman or motorman, the period of one year will be reduced by fifty per cent of the time served as porter.

Western Division.

	Rate per month
Brandon, Man.:	
General clerk	$100.00
Night foreman	87.50
Calgary, Alta.:	
Cashier	105.00
General clerk (2)	90.00
Shed foreman	110.00
Night foreman	95.00
Waybill clerk	97.50
Dauphin, Man.:	
Wagonman, junior	75.00

ARTICLE 35.

Hourly paid employees shall receive 36½ cents per hour.

ARTICLE 36.

Any question of interpretation of this schedule which may arise will be adjusted by the general committee with the superintendent, or, if necessary, with the general superintendent.

ARTICLE 37.

The rates of pay herein provided shall come into force on the first day of June, 1918, and the rules on the fifteenth day of August, 1918.

ARTICLE 38.

This schedule of rules and rates of pay shall continue in force until terminated by a thirty (30) day notice by either party after the conclusion of peace between Great Britain and her present enemy nations, and until that time there shall be no strike of employees and no lockout by the employers.

Provided, that there shall be a revision of the wage scale at the expiration of every six (6) months hereafter if it appears that since the last revision of wages there has been a general increase in the cost of living of ten per cent or more, in which case an increase of wages will be granted sufficient to absorb such increased cost of living. The cost of living statistics tabulated by the Department of Labour and published in the LABOUR GAZETTE first issued after the expiration of such six (6) monthly period, shall be accepted as conclusive as to such increase, if any, and the extent thereof.

Provided, further, that should any dispute take place as to the interpretation of these rules, or as to the right of any employee or employees to an increase in accordance herewith, or as to the carrying out of these rules, the parties agree to refer the same to any Board or other tribunal constituted by the Dominion Government for the settlement of labour disputes, or, if no such Board or tribunal be constituted, then to a Board of Conciliation under the Industrial Disputes Investigation Act, 1907, and to abide by the decision of such Board or tribunal, or a majority thereof.

In the event of it becoming necessary to apply for a Board under the said Act, the application may be made by either party, and in such application it shall not be necessary to make the statements required by s.s 1 (b) of section 15 of said Act as amended.

(Sgd.) T. G. MATHERS,
Chairman.
(Sgd.) C. E. DAFOE.
(Sgd.) D. CAMPBELL.

Mr. J. W. Watson,
General Chairman,
Employees' Committee.

It is understood that in all express depots or sheds, where there is no provision made for drinking water, that the company will provide water tanks and drinking water. That so far as possible, lavatory accommodation will be provided. Also that the railway company will be requested to have all express cars equipped with water tanks and see that they are kept clean and filled with fresh drinking water, and that express cars are kept properly heated, lighted and cleaned.

It is also understood that agents will be instructed not to accept for shipment, or forward by express, any shipments of decomposed matter that emits bad odour or that may be injurious to health, and that such matter will not be kept in sheds or depots.

(Sgd.) W. C. MUIR,
General Superintendent.

Report of Board in Dispute between the New Brunswick Power Company, St. John, N.B., and its Conductors, Motormen, Powerhouse Men, Shop and Barn Men, Trackmen, Etc.

A REPORT was received from the Board established to deal with a dispute between the New Brunswick Power Company, St. John, N.B., and certain of its employees, including conductors, motormen, linemen, powerhouse men, shop and barn men, trackmen, etc. The Board was composed as follows: The Honourable Mr. Justice W. B. Chandler, Moncton, chairman, appointed by the Minister in the absence of a joint recommendation from the

other two Board members, Messrs. Geo. E. Day and W. Frank Hathaway, of St. John, nominees of the company and employees respectively. The award was accepted by the company, although a misunderstanding and delay in the payment of the back pay recommended in the award resulted in a strike of a few hours' duration on Aug. 15. This was adjusted and no further cessation of work occurred. A minority report was presented by Mr. Day.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the New Brunswick Power Company, employer, and certain of its employees, including conductors, motormen, linemen, power house men, shop and barn men, track men, etc., employees.

To the Hon. T. W. Crothers,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation and Investigation constituted in this matter, consisting of the Honourable Mr. Justice Chandler, chairman, appointed by the Minister of Labour; Mr. George Day, the representative of the company, and Mr. W. Frank Hatheway, the representative of the employees, begs to report as follows:

A meeting of the Board was held at the city of St. John, in the Province of New Brunswick, on the thirteenth day of July, 1918, when the members of the Board were sworn in and arranged for a subsequent meeting. The next meeting of the Board took place on the fifteenth day of July, 1918, at the city of St. John, and at this meeting the members of the Board conferred with representatives of the company and with a committee of Division No. 663, Amalgamated Association of Street and Electric Railway Employees of America, to which association the employees interested in this matter belong. At this meeting an attempt was made to bring the parties interested together and to arrive at some conclusion with respect to the matters in difference, but it was found impossible to get the parties to agree, and it was thereupon decided to proceed with the hearing of the parties.

The hearing of the parties to the dispute was proceeded with on the sixteenth and seventeenth days of July, 1918, at the city of St. John, and at this hearing the company was represented by Mr. Fred. R. Taylor, a shareholder and member of the executive committee of the company, and by Mr. Hopper, the manager of the company. The employees were represented at the hearing by Mr. Sinclair. A considerable amount of documentary evidence was adduced by both parties at the hearing, and evidence was taken upon oath as to certain statements alleged to have been made by Mr. Fred. R. Taylor before a committee of the Legislature at Fredericton, but nothing material turned upon this evidence. On the twenty-second and twenty-third days of July, 1918, the Board met at the city of St. John to consider the matters submitted to them at the hearing by the parties, and on the twenty-third day of July an agreement was arrived at between two of the members of the Board, viz., the chairman and Mr. Hatheway, the representative of the employees. Mr. Day, the representative of the company in this matter, found it impossible to agree with the other members of the Board.

The main, and in fact the only question, brought forward by the employees at the hearing was that of wages. The employees asked for an increase of wages of 7 cents per hour for all classes of employees affected, as members of Division No. 663, and desired that the said increase in wages, if granted, should date from the first day of April, 1918. The company, through its representatives, expressed its willingness to increase the wages by 3 cents per hour to conductors and motormen, and to place the lower paid men, conductors and motormen, on a $3.00 a day wage basis, and to give the higher paid conductors and motormen a 3 cents per hour increase. This suggestion on the part of the company was not acceptable to the committee of the Division. At the hearing statements were submitted to the Board, documentary and verbal, as to the present cost of living in the city of St. John, and it was contended on the part of the employees that about $1,600 was the lowest amount on which a man in the position of the conductors and motormen employed by the company could maintain himself and wife and three children, and detailed statements as to the cost of living were submitted to the Board by Mr. Sinclair on behalf of the employees. This amount of $1,600 did not include some expenses, such as those for medicine and taxes, nor any expenditure for amusement, etc. The view of two members of the Board, viz., the chairman and Mr. Hatheway, is that about $1,300 is a low estimate of the annual living expenditure of a man in the position of conductors and motormen of the company in the city of St. John at the present time, having a family composed of himself, his wife and, say, three children. According to a late number of the LABOUR GAZETTE, the average weekly budget for a family of five persons is $20.65 a week—equal to $1,074 a year, which estimate includes food, fuel, light-

ing and rent—and adding to this amount a reasonable sum for clothing and other expenses it seems that $1,374 is about as little as a man with a family of five persons can get along with in the city of St. John at the present time. Living expenses are constantly increasing, and while it seems that the cost of living in St. John is in some respects lower than such expenses in other cities of Canada, still living expenses are increasing and are likely to increase in the future, and the two members of the Board mentioned do not consider that the sum of $1,374 mentioned is an extravagant estimate for living expenses for a year for the average family of five. Under the present scale of wages the conductors and motormen employed by the company are not getting $1,374 a year. The wages of the highest paid men at the present scale average about $3 a day for a day of ten hours, and the annual wages of the conductors and motormen do not exceed $1,000, and if the estimate of living expenses above submitted is correct it seems impossible for the conductors and motormen to maintain themselves at the present scale of wages. The representatives of the company at the hearing contended very strenuously that the company was losing money in its operations at the present time and that it was not in a position to pay any increase in wages. Statements were submitted by the company to the Board which show that the business of the company, so far as the street railway is concerned, is not increasing, that the expenses of operation are increasing, and that the company is going behind so far as the operation of the street railway is concerned. The financial position of the company is now being inquired into by a Royal Commission appointed for that purpose by the Province of New Brunswick, and the members of the Board of Conciliation do not consider it necessary to inquire into these statements of the financial position of the company at any length, as doing so would cause delay and incur considerable expense, and would cover practically the same ground as that now being covered by the Royal Commission.

It may be that the company may succeed in getting an increase in its transportation rates, and will therefore be in a position to pay increased wages, and the situation of the employees of the company is such, under present conditions in the city of St. John, that some increase in wages seems absolutely necessary to enable them to get along. For this reason the two members of the Board who have agreed have come to the conclusion that it is advisable to recommend some increase in wages for all the employees of the company who are members of Division No. 663:

As stated above, two members of the Board have agreed to recommend an increase in wages, and they recommend an advance of 20 per cent upon the present rate of wages for all union men in the employment of the company, such advance to date from the first day of April, 1918, and to continue for the duration of the war and for six months after its termination. This advance will bring nearly every employee of the company who is a member of the union up to at least $3 a day, and will increase the wages of the higher paid conductors and motormen who are now getting 30 cents an hour, from about $3 a day of ten hours to $3.60 per day of ten hours. This rate does not seem extravagant when compared with the rates now paid to conductors and motormen on other street railways in Canada. In most of the street railways in Canada the rate now paid to conductors and motormen who have been in the employment of the same company for over two years runs from 24 cents to 40 cents per hour, and the average rate is over 30 cents per hour, the highest rate at present paid being 47 cents per hour in Vancouver, B.C. The rates paid to conductors and motormen on street railways in the United States are in most cases larger than the rates at present paid in Canada, but it seems that the rate of wages to street railway men in the United States has in many cases been increased to a considerable extent, and that constant applications for an increase in wages are being made by the employees. There does not seem to be much hope of any decrease in living expenses in Canada for some time to come, and the two members of the Board who have agreed are of opinion that the suggested increase, if granted, should continue for the duration of the war and for six months thereafter, as there is no prospect of a reduction in living expenses during that period.

All of which is respectfully submitted.

(Sgd.) WILLIAM B. CHANDLER,
Chairman.

(Sgd.) W. FRANK HATHEWAY.

Dated this sixth day of August, 1918.

Minority Report

Honourable T. W. Crothers,
Minister of Labour,
Ottawa.

Dear Sir,—

I have the honour to submit the following minority report as a member of a Conciliation Board appointed to deal with the claim of certain employees of the New Brunswick Power Company for an increase in wages.

At the first session of the Board a most earnest and strenuous objection was entered by the street railway representatives to the appointment of W. F. Hatheway as a member of the Board for several reasons. He has

always been, in season and out of season, a very bitter opponent of the street railway. Before and since his appointment he has published in a daily newspaper several lengthy letters prejudicial to its interests. These letters were not only misleading but inaccurate in essential particulars and sometimes untruthful. He has gone out of his way repeatedly to injure the railway and apparently would like to see it wrecked and become a bankrupt concern. The chairman ruled that it was entirely a matter for Mr. Hatheway to decide himself.

The case as presented on behalf of the employees was not essentially borne out by the facts. The schedules of cost of living were full of inaccuracies, exaggerations and misstatements. For instance, enough bread was supplied for a family of five, with cake and pastry included, and yet ten pounds of flour were required each week. Three tins of mustard were provided for, when they would not use one a year. The allowance for rent was too high, because I know, as one who has nine tenants, six of whom are on Douglas avenue, a choice residential section of our city, five of these pay less than their schedule and only one above it. One schedule was ridiculous in the impression sought to be conveyed—a verified statement of the cost of three meals for one day—when multiplied by 365 days in a year, a motorman's food bill amounted to $1,265.

In Board conferences I offered to grant an increase of 3½ cents an hour to all 30 cent men and 5 cents an hour to all those getting less. I was largely influenced in this by the fact that what the employees asked was too much, an increase of about $200 to each. My idea was that an increase of $100 a year to a body of over 200 men was a very substantial increase. And then consider that these same employees received a very substantial increase in wages just about a year ago. Consider also the fact that other employees, just as necessary and just as important to the railway as motormen and conductors, were living (and fairly so, too) on less, their contention that they were on the "bread line" falls to the ground.

The financial condition of the company did not warrant any increase. The street railway has been showing a decreased revenue for over a year, some months more and some less, but each and every one showing a deficit against working expenses. They are to-day overdrawn in their bank to the sum of $70,000, besides they have to face an increase in cost of work for the future. Take the case of fuel, which will be $86,000 more this winter than last.

A careful avoidance of Halifax was made by the employees' representative. This is certainly a fair comparison, far more so than any other city in Canada or the United States. It is larger in population and far more wealthy per capita. The cost of living is greater there than here. St. John has been cited as one of the cheapest cities in Canada to live in. The average rent is about one-third more, and yet the motormen and conductors there only get 32½ cents an hour and this figure represents an increase given them about a month ago. Surely if they can "get by" in Halifax under the conditions now prevailing there, and likely to continue for a long while, St. John men in like employ can do the same under far better conditions and with more money at the end of a year than Halifax men have.

The chairman expressed his opinion that there should be an all-round increase of 5 cents an hour. (The 20 per cent represents an increase of 6 cents an hour.) From experts he had satisfied himself that the statements of the financial condition of the railway (falling revenue and borrowed money) were correct, but he allowed himself to be influenced by the erroneous statement that it cost more than $1,000 for a workman to live in St. John. Why, there are thousands of workpeople here living on that with higher social positions to maintain. Another factor that caused him to go higher was the inutility of any award the Board might make. The employees refused to be bound by any award we might make, while the railway was willing to be so bound.

In conclusion, I want to express an opinion that the whole proceedings were somewhat farcial and that the term "Conciliation Board" is a misnomer. Farcial because we got nowhere, and might just as well not have been brought together. Misnomer on account of no great effort being made at conciliation, and this because under the law (a defect that ought to be remedied in the future) the parties to a dispute such as this are not bound by any award that may be made. Before the machinery of such a law as your Department is governed by it should be understood that both parties to a wage dispute will be bound to accept the verdict of a Board appointed to settle the controversy.

Under the conditions little consideration can be given to the result of any verdict. Suppose it results in a strike. Is this not just what such a Board is appointed for to prevent or forestall? In the words of one of our men at the front, "Is this not a hell of a time for men to strike," and yet we have here in Canada labour strikes not justifiable.

Respectfully yours,

(Sgd.) GEORGE E. DAY.

St. John, N.B., August 8, 1918.

Report of Board in Dispute between the Canadian General Electric Company, Limited, of Peterborough, Ontario, and its Machinists, Specialists and Electrical Workers

A REPORT was received from the Board established to deal with the dispute concerning wages and working conditions between the Canadian General Electric Company, Limited, of Peterborough, and its employees, being machinists, specialists and electrical workers. The Board was composed as follows: His Honour Judge Colin G. Snider, of Hamilton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. James G. Merrick and F. Bancroft, nominees of the company and the employees respectively. The report was unanimous and was accompanied by the original schedule of wages, rules and regulations submitted by the employees in their application for a Board, this being considered by the Board to be fair and reasonable. Mr. Merrick dissented on some points.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian General Electric Company of Peterboro, Ont., employer, and its employees, being machinists, specialists and electric workers, employees.

To the Honourable,
The Minister of Labour,
Ottawa.

The Board of Conciliation and Investigation established herein have the honour to report as follows:

On the morning of the fourteenth day of August, 1918, the Board met in the Court House in the city of Peterboro. Notice of the meeting had been given and the representatives of both sides were in attendance.

The members of the Board, James G. Merrick, Fred. Bancroft and Colin G. Snider, were all present, and having been sworn, proceeded with the investigation.

The employer was represented by George W. Watts and E. G. Patterson, and the employees were represented by H. W. Harper, John Noble and John Cairnes.

The Board was in session on the fourteenth, fifteenth, sixteenth, twentieth, twenty-first, twenty-second and twenty-third days of August.

The schedule of wages and shop rules asked by the employees was gone over item by item, and evidence, discussion and agreement heard on all matters on which the Board failed to secure an agreement. From time to time as favourable opportunities offered, the Board encouraged and urged conferences and made suggestions with a view to securing an agreement, and on many points with success.

The greatest difficulty which presented itself was in regard to classifying certain employees, either as machinists or toolmakers, specialists or electric workers. Unless this could be overcome all efforts to restore harmony and avoid further trouble in this factory seemed doomed to failure, and yet the Board as a whole did not feel qualified to decide the standing of individual employees.

Various expedients were tried to make a satisfactory classification, and it was finally agreed to have Robert Dobie, acting for the employer, and Alexander Murray, for the employees, make classification and fix wages for each employee as to whom no agreement had been made, and both sides agreed to accept the decision of these two men if they could agree. Later, Messrs. Dobie and Murray put in their report in writing, having agreed to every man in dispute. This report is attached to and forms part of our report.

This report puts the wages of H. B. Rogers at 45 cents per hour and A. Smeaton at 47½ cents per hour. The employer had at a previous meeting of the Board expressed its willingness to pay each of these men 50 cents per hour, and the Board recommends that as this expectation had been raised it should be carried out with these two men.

Mr. James G. Merrick joins in all of this report excepting the section 10 of the schedule which deals with apprentices, as to which he refuses to place any limitation on the number of apprentices which the company may engage. He also refuses to agree to any increase of

wages being given to the power house operators and objects to the increases in the minimum rates of pay being given from any time previous to the date of this report.

It is a pleasure to us to say that, although conflicting interests, which the men seem to think and the company seem to think were of very great importance to them and were keenly contested throughout, the matter was carried on in a spirit which reflects credit upon the moderation of language that they universally indulged in. Nothing of an unpleasant nature has arisen throughout the long continued discussions which we have had.

The members of your Board signing this report hereby return the schedule of wages and rules and regulations which, with the exception mentioned made by Mr. Merrick, we have agreed upon as being, in our opinion, reasonable at the present time in consideration of all the facts and evidence laid before us, and which we think ought to be accepted by both the parties to this difference.

All of which we submit respectfully.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) FRED. BANCROFT.

(Sgd.) JAMES G. MERRICK.

Peterboro, August 24, 1918.

SCHEDULE OF WAGES, RULES AND REGULATIONS RECOMMENDED BY THE BOARD FOR ACCEPTANCE BY THE PARTIES.

1. Nine hours shall constitute a day's work for the first five days of the week and five hours on Saturday, to be worked as follows: From Monday until Friday inclusive, hours to be worked must be between 7 a.m. and 5 p.m., and on Saturday between 7 a.m. and 12 noon.

The foregoing shall not affect departments now working a shorter day.

2. All hours worked in excess of this shall be overtime and shall be paid as follows: From the end of the regular working day until 10 p.m. on the first five working days of the week at the rate of time and a half. After 10 p.m. at the rate of double time until workman is finished and goes off duty.

On Saturday time and a half shall be paid after 12 o'clock noon, then double time after 5 o'clock p.m.

3. Double time shall be paid on Sundays and the following holidays: New Year's Day, Good Friday, Empire Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas Day, and in cases when the holiday falls on a Sunday the overtime rate shall be paid on the day on which the holiday is observed.

4. Hours to be worked on night shift shall be as follows: Ten hours a night from Monday night until Friday night inclusive, all hours worked in excess of this shall be overtime and paid for as follows: From the end of the regular working night, time and a half for the first five hours, after which no employee should be expected to continue working.

5. When a man working on a night shift is required to work on Saturday night he shall be paid time and a half until midnight, after that double time until he goes off duty, and all time worked Sunday night shall be paid for at the rate of double time. Sunday commences 12 p.m. on Saturday and ends at 12 p.m. Sunday.

6. When men employed on the day or night shift are required to change from one to the other and are required to work two shifts or part of two shifts in any 24 hours the second shift shall be paid for at overtime rates.

7. When a man is called out to work after the close of the regular working day he shall not be paid less than three hours unless he is notified to return to work before leaving the premises, in such a case his time shall start not later than one hour after the close of the regular work day.

8. Rates of pay shall be as follows: Minimum rates for toolmakers, 60 cents per hour; minimum rate for machinists, 55 cents per hour; minimum rate for specialists, 45 cents per hour. Employees in punch press department receiving less than 20 cents per hour to receive 20 per cent increase; those receiving 20 cents and not over 30 cents per hour, 15 per cent increase; those receiving over 30 cents per hour, 12 per cent increase.

Electrical workers receiving less than 20 cents per hour to receive 20 per cent increase; those receiving 20 cents per hour and not more than 35 cents per hour, 15 per cent increase; those receiving more than 35 cents per hour, 10 per cent increase.

Power house operators to receive 10 per cent increase.

Where more than the above rates are being paid no reduction shall take place.

9. During slack periods, before any reduction is made in any branch of its employees the working day shall be reduced to eight hours a day for five days a week.

10. Apprentices shall serve four years at the trade and in no case shall leave their employer without just cause. The number of apprentices shall be as follows: one for the shop and one for every five machinists employed.

11. Apprentices starting the trade in 1918 shall receive 15 cents per hour, and on the expiration of apprenticeship shall receive the standard rate of pay.

12. Specialists shall not be employed on machinist's work to the detriment of machinists or apprentices, or advanced to the detriment of machinists or apprentices.

13. No machinist or apprentice shall be required to operate more than one machine at one time.

14. If any grievance arises between the parties to this contract the employer agrees to receive a committee of its employees from the same department affected, and if possible to adjust such grievance.

15. In case of a disagreement over the interpretation of this schedule, there shall be no cessation of work until negotiations between the highest representatives of both parties shall have failed to come to an understanding.

16. No discrimination shall be shown against shop committees elected by the men to transact their business.

17. This schedule shall remain in force for one year, beginning on the first of June, nineteen hundred and eighteen.

(Sgd. COLIN G. SNIDER,
Chairman.

(Sgd.) FRED. BANCROFT.

(Sgd.) JAMES G. MERRICK.

Peterboro, August 24, 1918.

The men named hereunder have been agreed upon by the employer as toolmakers or to be paid toolmakers' wages:

J. Ahern.	J. Pitchford.	H. Crawford.
F. Cavalear.	G. Snowden.	E. Raheml.
F. Champion.	M. Sharp.	E. Wickland.
W. G. Freeburn.	F. Hiappe.	J. Sager.
J. Grimison.	A. Vass.	A. Gilbert.
C. McKay.		

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) FRED. BANCROFT.

(Sgd.) JAMES G. MERRICK.

These men whose names are hereunder written have been agreed on by the employer as machinists:

E. Baldry.	T. Moor.	H. Donivan.
E. Bartley.	W. Moor.	A. Lastlette.
A. Barnes.	E. Marchand.	D. Memmo.
A. E. Bohn.	A. Millard.	D. Beck.

Report of Board in Dispute between the Canadian Pacific Railway and its Commercial Telegraphers

A REPORT was received from the Board established to deal with the dispute concerning wages and rules between the Canadian Pacific Railway and its commercial telegraph operators, being members of the Commercial Telegraphers' Union of America. The Board was composed as follows: His Honour Judge Jas. H. Scott, of Perth, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. W. N. Tilley, K.C., of Toronto, and D. Campbell, of Winnipeg, nominees of the company and employees respectively. The award contained certain recommendations as to amendments in the rules and rates of wages and was accepted by the company, but the employees refused to accept other than the conditions set forth in the minority report which was presented by Mr. Campbell. Word was received in the Department that negotiations were being renewed in an endeavour to arrive at an amicable settlement of the points in dispute.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific Railway Company (employer) and its commercial telegraph operators, being members of the Commercial Telegraphers' Union of America (employees).

The Honourable T. W. Crothers, K.C., M.P.,
Minister of Labour,
Ottawa.

The Board of Conciliation and Investigation established and appointed by your orders, dated respectively the twenty-sixth day of June, 1918, and the sixth day of July, 1918, and to which the foregoing dispute was referred, beg to submit the following report:

Every effort was made to proceed promptly and expeditiously, and, although the seventeenth, twenty-second and twenty-ninth days of July were fixed successively and by consent for the commencement of the Board's sittings, it was not, until the fourteenth day of August instant, found possible to secure the attendance of all the members. On that day, however, the investigation was opened, after due notice, in convenient quarters in the Canadian Pacific Railway Telegraph Building, No. 4, Hospital street, Montreal. The employer was represented by Mr. J. McMillan, Mr. W. M. Thompson and Mr. W. Marshall, and the employees by Messrs. Thomas Carrothers (Montreal), G. R. Pawson (Toronto) and J. F. Campbell (Vancouver). The usual preliminaries having been disposed of and a general survey made of the differences between the parties and their causes, the luncheon hour was extended at the Board's suggestion in order that the representatives on each side might confer with a view to an adjustment without intervention. This conference having failed, the Board then proceeded from day to day to get at the facts in dispute. The case from each viewpoint was exhaustively and creditably presented. Every facility was given to both parties to emphasize their respective attitudes in any way that appealed to them and to discuss the subject matter without regard to a relevancy or otherwise. The grievance centred in a claim for salary increases and improved working conditions. The conditions of employment between this company and its commercial telegraphers have for some years been embodied in a Schedule of Rules and Wages, and, for the purposes of this Board, it has not been necessary to consider the situation prior to the schedule in effect on first July, 1912. Since that time, as a result of dissatisfaction on the part of the employees, a Board of Conciliation, upon their demand, met in July, 1917, and determined upon certain changes in the rules and increases in the scale of wages which went into effect on first September, 1917. That Board's report was not unanimous, the company's representatives being unable to join in it, but, nevertheless, the company submitted to its recommendations, as amended by consent of the employees. The operators have, within six months of the previous adjustment, renewed their demands in so far as they remain unsatisfied.

Some of the proposed amendments of the rules have been assented to by the company—others have been settled unanimously by the Board. In some important particulars, however, it is to be regretted that all the members are unable to see "eye to eye" and that in the result separate findings and recommendations have to be submitted. It is most satisfactory, however, to observe that the whole proceedings have been characterized by fair consideration, general good humour, and a real desire to work out the spirit of the Act. The

undersigned beg to submit the accompanying proposals as affecting, in their judgment, a fair solution of the alleged grievances.

In the matter of wages the company have acceded to an increase based upon the application of the findings of the McAdoo Commission, and the undersigned are of opinion that this affords a fair adjustment of wages and should be adopted. Their proposal shows some disparity between Toronto and Montreal, which should be adjusted by bringing Toronto wages to a level with Montreal.

The Morkrum operators should be paid $70 on entering the service; $75 after six months' satisfactory service; $80 after one year's service.

The change in wages should be made effective as of first August, 1918.

(Sgd.) J. H. SCOTT,
Chairman.

(Sgd.) W. N. TILLEY.

Montreal, August 20, 1918.

AMENDMENTS TO RULES AND WAGES FOR CANADIAN PACIFIC COMMERCIAL TELEGRAPHERS,

referred to in and forming part of the annexed report, dated August 20, 1918.

ARTICLE 2.

Paragraph 4. Amend to read as follows:

In case of reduction of staff, the junior telegrapher from point of service on the superintendent's district will be dispensed with, and if reduction is necessary in higher grades, the junior in higher grade will have the preference of continuing in the service, but at a reduced salary, and so on through each class until the junior class is reached.

ARTICLE 5.

Paragraph 1. Amend to read as follows:

Telegraphers shall be granted leave of absence each year with pay at regular wages as follows, viz.: one week after the first and second years and two weeks after three years' service.

Paragraph 7. Amend to read as follows:

Where regular relieving agents are appointed, they will not be included in the telegraphers' ratings while engaged in such duties, but will retain all seniority rights and will receive one dollar per day extra expenses while away from headquarters.

Add new paragraph 8 as follows:

On and after the first day of September, 1919, where telegraphers are required to use typewriters, the same shall be supplied and maintained by the company.

ARTICLE 6.

Paragraph 2. Amend to read as follows:

No telegrapher shall be compelled to work more than five consecutive hours without a lunch relief.

Minority Report

In the matter of the Industrial Disputes Act, 1907, and of a dispute between the Canadian Pacific Railway Company, employers, and its commercial telegraph operators, being members of the Commercial Telegraphers Union of America, employees.

To the Honourable Thomas W. Crothers,
Minister of Labour,
Ottawa, Canada.

Pursuant to your appointment, dated the twenty-sixth day of June, A.D. 1918, the Board of Conciliation, to which the above dispute was referred, proceeded with the hearings of the parties in the city of Montreal, on the fourteenth day of August, and concluded on the eighteenth day of August, 1918. Efforts to bring about a settlement by conciliation met with failure, and it then became necessary for the Board to prepare a report setting forth the matters in dispute, and recommending to the parties some basis of a settlement which in its judgment would seem fair and equitable, having regard to all the circumstances.

It is with very deep regret I have found myself unable to agree with my colleagues on the Board, and I therefore beg to submit herewith a minority report, much as I dislike doing so, particularly at a time like the present.

During the hearing of the dispute, the company was represented by its manager, Mr. J. McMillan, and the superintendents, Mr. W. Marshall, of Winnipeg, and Mr. W. M. Thompson, of Montreal. The employees were represented by Messrs. Thos. Carrothers, of Montreal; J. F. Campbell, of Vancouver; G. R. Dawson, of Toronto, and other witnesses were present from St. John, Winnipeg, Moose Jaw and Calgary.

The dispute consisted of a proposal by the telegraph employees of the company, numbering about 500, located at the company's principal offices in Canada from Halifax to Vancouver, whereby important changes in the working conditions and material increases in wages were sought. Quite a large number of the employees concerned are women. Specifically the changes proposed in the working conditions of the employees consists of the following numbered articles, which were to be incorporated into an existing schedule of working conditions.

Article 1. Amend Articles 1 and 8 by striking out the entire two Articles and substituting the following as Article 1:

Paragraph 1. "Employees assigned to commercial telegraph service, whether operated by the Morse system, telephone, or any automatic device of any character, or who are required to devote any portion of their time to the transmission or receiving of telegraph matter, by any device whatsoever, will be considered commercial telegraphers, within the meaning of this schedule. This does not apply to em-

ployees handling such matter by telephone during the act of filing for transmission or delivery.''

Paragraph 2. ''Morse telegraphers shall have the right to operate any automatic device for the purpose of transmitting or receiving telegraph matter, without reduction in salary and seniority shall govern.''

Paragraph 3. ''When additional telegraph positions are created, compensation will be fixed in conformity with that for positions of the same class as shown in this schedule.''

Article 2. Amend Article 2, Paragraph 3, to read as follows:

''A complete list of all telegraphers within each superintendent's district, showing seniority standing and salary, will be supplied monthly to the representative of the telegraphers. This list, compiled according to seniority in the ratings, shall be subject to correction on proper representation from the district chairman.''

Amend Article 2, Paragraph 4, to read as follows:

''In case of reduction of staff, the junior telegrapher from point of service on the superintendent's district will be dispensed with.''

Article 5. Amend Article 5, Paragraph 1, to read as follows:

''Telegraphers, after one (1) year's service, shall be granted two (2) weeks's leave of absence, each year, with pay at regular wages.''

Amend Article 5, Paragraph 4, to read as follows:

''Full holidays will be allowed on the following public holidays: New Year's Day, Good Friday, Victoria Day, or (King's Birthday), Dominion Day, Labour Day, Thanksgiving Day, Christmas Day.''

Amend Article 5, Paragraph 6, to read as follows:

''Telegraphers, when called upon to perform duties at other than their regular place of employment, shall be allowed all necessary expense incurred, and overtime for travelling in excess of their regular tricks. When assigned to such duties, a telegrapher shall be advanced a reasonable amount of expense money.''

Amend Article 5, Paragraph 7, to read as follows:

''Where regular relieving agents are appointed, they will not be included in the telegraphers' ratings while engaged in such duties, but will retain all seniority rights, and will receive one (1) dollar per day extra expense while away from headquarters, and will be paid the same wages as the men they relieve, provided such wages are not less than their own.''

Add to Article 5 a new paragraph as paragraph 8, reading as follows:

''Where telegraphers are required to use typewriters the same shall be supplied and kept in repair by the company.''

Add to Article 5 a new paragraph as paragraph 9, reading as follows:

''Any person not employed as a telegrapher will not be allowed to send or receive telegraph matter. This does not apply to telegraph officials.''

Amend Article 5 by adding a new paragraph as paragraph 10, reading as follows:

''No discrimination shall be shown towards commercial telegraphers in the matter of transportation. They shall be entitled to the same privilege as any other employees.''

Article 6. Amend Article 6, paragraph 1, to read as follows:

''At offices where two (2) or more telegraphers are employed, the hours of duty shall be as follows:

Eight hours shall constitute straight day duty, beginning and ending between 7 a.m. and 6 p.m.

Seven hours shall constitute a day's work on all other tricks, and no trick shall be split more than once, nor extended over ten (10) hours.

At all other offices the hours of duty shall be ten (10) consecutive hours, including one (1) hour for lunch.''

Amend Article 6, paragraph 2, to read as follows:

''No telegrapher shall be compelled to work more than five (5) consecutive hours without a lunch relief.''

Amend Article 6, paragraph 3, to read as follows:

''Overtime will be computed at the rate of five (5) hours per day on regular week days, and at the rate of three and one-half (3½) hours on Sundays and public holidays.''

Add to Article 6 a new paragraph as paragraph 6, reading as follows:

''Overtime shall not be compulsory.''

Add to Article 6 a new paragraph as paragraph 7, reading as follows:

''A telegrapher will be entitled to two (2) short relief periods of a maximum of fifteen (15) minutes each on each trick. He will make application in writing and will be given relief within thirty (30) minutes of such application.''

The wage increases were set out in a lengthy schedule and amounted to an average increase of $23.00 per month to each employee.

It appears that schedule agreements between the company and these employees have been in existence since about 1908, and changes have been sought in 1911, 1912, 1916 and 1917. While some changes either in the working conditions or wages, or in both, have been obtained in each of the above years, there are, however, some improvements sought at this time which have been a matter of dispute on several of the previous occasions. In fact, these disputes were referred to a Board of Conciliation in 1911, and in 1917, and on both occasions it so happened that I was appointed to represent the employees on these Boards. In 1911 a settlement was reached between the parties upon

all matters before the Board. In 1917 no settlement could be obtained and the majority of the Board recommended the adoption of certain rules and rates of pay as the basis of settlement at that time, the employees being urged by the Board to postpone the balance of their demands to some future time. This report was made by the chairman and myself and is contained in the LABOUR GAZETTE of August, 1917. The company's representatives made a minority report which likewise appears in the said number of the LABOUR GAZETTE.

The company refused to adopt the Board's report and (as I am now advised by the employees) rather than engage in a strike or force its adoption, consented to some amendments to it to suit the company's demands.

In the operation of the company's telegraph system, including the transmission and delivery of commercial telegrams and cables, as well as considerable quantity of telegrams that belong to the company's railway service, in addition to the usual Morse system of telegraphy the company operates a mechanical or automatic device known as the Morkrum system, whereby messages are transmitted over the telegraph lines by the operators of a machine having a keyboard somewhat similar to that of a typewriter, and are received by the counterpart of this machine. These automatic machines are now operated by young women who are not familiar with the Morse system, but work in the same offices with the Morse operators. The company contends that with these machines approximately three times as much business can be handled, with a similar number of employees, as can be handled by the Morse system. These machines appear to have been adopted in 1911, and the number in use has been increased from time to time until at the present time a very large proportion of the company's business between its larger offices, such as Montreal, Ottawa, Toronto, Winnipeg, Moose Jaw, Calgary and Vancouver, is handled by them. The installation of a set of these machines, and the employment of young women, is said to have displaced about six Morse telegraphers. The academic qualifications of Morse and Morkrum operators would be about the same. The technical skill of Morse operators is acquired in from four months to a year, while that of Morkrum operators is acquired, according to the company's contentions, in a few days by a person who is a qualified typist, and according to the employees' contention in from several months to a year.

On account of the determination of the employees to include the Morkrum operators in the schedule of working conditions and at the same rates of wages, and the very positive unwillingness of the company to so include them, the foregoing somewhat lengthy explanation seems necessary in order to understand the full nature of the dispute.

By Article 1, as proposed by the employees, the Morkrum operators would be classified with the Morse operators without any distinction as to working conditions and wages. The Board in 1917 recommended their inclusion as far as all the working conditions were concerned, but did not make any recommendation to place them on the same basis as to wages. They, too, contended that the Morkrum operators should not be paid the same wages as the Morse operators because these wages were for skilled work, and also contended that to include them as proposed would give the Morse operators an advantage whereby Morse men senior in the service would crowd out the Morkrum operators who were junior to them.

It was further contended that as clause 4 of Article 6 of the existing schedule provided for a minimum of work of 30 messages per hour for Morse operators, and that this minimum really amounted to a maximum, that its application to the Morkrum operators would reduce their output to about 65 per cent.

On the other hand the employees contended that their wages were so low that they could not be regarded as wages of skilled men; that no unfavourable advantages would result to employees engaged as Morkrum operators, and that inasmuch as both Morse and Morkrum operators were employed in transmitting and receiving the company's telegraph business, their employment was practically the same and that, therefore, they should be classified and paid on the same basis. The company also pointed out that telegraph companies and certain railroad companies in the United States employed Morkrum operators at a lower rate than for Morse operators. The company also objected to making any changes in the working conditions during the war.

The employees also pointed out that the Southern Pacific Railway Company used the Morkrum machines and paid the operators the same rates as were paid to Morse operators. Also that a very undesirable relationship exists between the telegraph companies in the United States and their employees.

So far as the inclusion of the Morkrum operators in the schedule of working conditions is concerned, I can see no valid objection to it if these conditions are fair, and the Board which considered this matter in 1917 so held. The minimum work clause, contained in clause 4 of Article 6 (as the employees suggested) should be amended by adding to the end thereof these words, "this clause is not applicable to Morkrum operators," and thus meet this objection of the company.

The contention that changes in working conditions during the war should not be used by an employer as a basis for refusing fair working conditions any more than the employees should take advantage of the war situation to enforce unreasonable conditions. The wages of Morkrum operators now are $60.00 per month for the first six months; $65.00 per month after six months, and $70.00 per month after one year. The wages of Morse operators range all the way from $55.00 per month up to $105.00 in the unclassified, and from $85.00 to $105.00

in the classified. But these wages are not above those now paid to unskilled labour in this country, and as the work of both Morkrum operators is as arduous and requires as close tension as that of Morse operators, I am unable to make any distinction upon that ground. Moreover, if the workmen are not to suffer injury by the adoption of new and modern inventions or should have their earnings considered at all from the standpoint of productivity or output, then there can be no answer to a demand for paying Morkrum operators fully as much or more than Morse operators.

The company has adopted the principle in this and all other classes of its service that in reducing the staff at any given time, the junior employees in point of length of service should be the first to be laid off, and I can see no reason why any exception should be made in this rule as between the Morkrum and Morse operators, so long as those retained are capable of performing the work required of them. I therefore recommend the adoption of Article 1.

As to Article 2 it was proposed to change the present arrangement of correcting mistakes in seniority lists through the district chairman. The company pointed out that every employee had the right personally to take up with the officers of the company any grievance which he might have, and that this clause would interfere with that. It would seem fair that this right should not be interfered with, and I therefore recommend that paragraph number 3 be not adopted.

It was agreed by the company that paragraph number 4 in the present schedule should be amended by adding the words, "on the superintendent's district" after the word "with" in the second line, and I recommend that this change be made, and that the proposed paragraph 4 be dropped. This should be done.

Amendments to Article 5 of the existing schedule were proposed to paragraphs 1, 4, 6 and 7 thereof, and it was also proposed to add thereto new paragraphs numbering 8, 9 and 10.

With reference to paragraph 1, the company contended that in 1917 the period of service required before the holidays were granted had been reduced from four to three years, and that to further reduce it would entail the employment of additional men at the present time, which was undesirable.

On the other hand, the employees contended that the nature of their work was such that very close tension was required at all times, and that the principle of holidays was generally recognized by all employers of office and clerical help, and that an annual vacation was essential in the interests of their health and well-being, and also that if a vacation period was inaugurated, employees could and would offset the loss of time to the company by increased efficiency.

Having regard to these various representations, and although I believe that not less than two weeks is required for a reasonable vacation, I would, however, agree with the recommendation of my colleagues in the matter, viz., one week's vacation after the first and second year's service respectively, and two weeks after the third and subsequent years.

By the changes proposed in paragraph 4, the employees sought to obtain full relief from work on the ordinary legal holidays, the present practice being that employees are required to work half time on these days. Having regard for the representations made by the parties, it does not appear that it would be unreasonable to expect the present conditions in this regard to continue.

Paragraph 6 provides for the payment of overtime while travelling on the company's business outside of the regular hours of service. The present arrangement provides that time travelling in excess of regular hours of service shall be paid for at overtime rates up to 11 o'clock in the evening. Having regard for all the circumstances in this matter and the comparatively small amount of travelling involved, it would not seem unreasonable that the present conditions should be continued.

Paragraph 7, as proposed, was agreed to by the company, and I therefore recommend its adoption.

The proposed new paragraph 8 provides that where telegraphers are required to copy messages by use of a typewriter, and which is the universal practice at the present time, that the typewriter should be supplied and kept in repair by the company. This matter has been a matter of dispute for at least eight years. The use of the typewriter was necessitated many years ago by telegraphers being afflicted with writer's cramp. It was soon found that once proficiency was acquired, a telegrapher could copy messages more rapidly and accurately by using a typewriter, and at the same time produce in many instances a more legible copy. The companies realized the higher degree of efficiency by the use of the typewriter, and for a time would pay slightly higher wages to an operator who could use a typewriter, but later it became in practically all commercial telegraph offices of this and other companies one of the necessary qualifications for employment. Up to the present time the company has required its employees to furnish their own typewriters and generally to keep them in repair.

The company contends that once having recognized the greater efficiency in the commencement of the use of the typewriter by increasing wages, the cost of the typewriter has been met, and that in any event the company should not now be required to meet the heavy outlay for a supply of typewriters for all its offices.

The employees represent that the recognition given originally for the use of the typewriter has since disappeared, because, in employing new men for service previously paid for at a particular rate the new employee would be compelled to accept a lower rate; that the increased efficiency by using the typewriter more than offsets any outlay in the cost and upkeep of

the typewriter; that some telegraph companies in the United States now furnish their telegraphers with typewriters; that it was part of the necessary equipment in an office for the performance of their service for the company, just as the Morkrum typing machines are essential to the transmission and receiving of telegraph matter by that system, and that in the large majority of cases the typewriters which the telegraphers are now using are worn out in the company's service and must be replaced.

It seems extraordinary that part of the necessary office equipment for transacting telegraph business, as the company requires it transacted, should be purchased and maintained by the employees. If the cost of purchasing the new typewriters constitutes a large sum of money, surely the company is better able to and more entitled to meet this outlay than its employees who are struggling to live and support families upon their meagre wages. The greater the cost the greater would be the obligation upon the company rather than upon the employees, but it was pointed out that a special typewriter is being made, suitable for this service, and that in buying a number of them the cost price was in the neighbourhood of $30.00 each.

It seems that an additional hardship also exists by some telegraphers being required by their chief operators to hand over the use of their typewriters to newly employed operators employed by the company, whose services may not be permanent and who are unwilling or unable to purchase their own typewriters.

It was also pointed out by the employees that if typewriters were supplied by the company, one typewriter for each necessary wire circuit would accommodate an average of about three operators, as the operators follow each other in working different shifts. I therefore recommend that the rule be adopted obligating the company to furnish and keep in repair the required number of typewriters.

The proposed new paragraph 9 contemplates the prevention of check boys, employed at $20.00 and $25.00 a month, from being used to transmit telegraph messages instead of the men who are regularly employed for the service. In a comparatively short time one can learn to transmit by the Morse code, but the receiving process requires a very much longer period of practice, and the company has some of its check boys transmit some of the messages as soon as they are capable of that part of the work.

The company contend that this was necessary in order to give these boys an opportunity of learning the practical part of telegraphy, and that it enabled them to utilize the assistance of these boys to take care of extra business from time to time. The employees contended that by the use of the check boys the regular staff of telegraphers could be reduced and an operator receiving messages transmitted by a check boy was necessarily delayed, to the detriment of the quality of work which was required of him. While it would seem that the employees' objections are reasonably founded, it would not appear that the abuse is of sufficient importance to require the company to discontinue it at the present time.

By proposed new paragraph 10 the employees desired to obligate the company to secure where possible transportation from other railway companies in the same manner as it is sometimes done for employees who are engaged purely in railway work. Having regard to all the representations and the facts thereby in evidence, it would seem that this paragraph could be very well abandoned for the present.

Article 6, paragraph 1, proposes a reduction in hours of service. At the present time there are three shifts working, one known as the day shift which works eight and one-half hours per day, another shift known as the early night staff, working seven and one-half hours per day within a period of ten hours, and a third shift known as the all night men, working a period of seven hours commencing not earlier than eight o'clock in the evening. It was proposed to reduce the eight and one-half hour period to eight hours and the seven and one-half hour period to seven hours. The company contended that this would necessitate the employment of additional men in its larger offices, which were not now available, and that the present hours were not exacting, and that if the eight and one-half hour period were reduced to eight hours there should be the adoption of a universal eight-hour workday.

On the other hand the employees contended that the seven and one-half and the seven hour periods have been in existence for many years; that it was not necessary in commercial telegraph business that the twenty-four hour period of each day should be covered, because from five till eight o'clock in the morning there was practically no business to be transacted, and that in view of the seven and one-half hour period being divided and spread over a period of ten consecutive hours to meet each day's particular periods of peak-load traffic, not more than seven hours should be required. They also urge upon the Board that the work was very exacting and required very close application at all times, so that employees were constantly at work under an exacting strain. The employees further contended that there had been during the past month plenty of telegraphers available, and that men had been laid off on account of so-called lulls in traffic, but that at the very time during which they were working they had worked in the neighbourhood of one hundred hours' overtime per month, and they also mentioned specific cases where telegraphers had applied for employment recently and were informed they were not needed.

In 1917 the Board reduced the hours of the first shift of men from nine to eight and one-half hours, but it was not intended that further consideration should not be given this matter at any future time. There can be no doubt

that a period of eight hours in employment such as commercial telegraph business should constitute a maximum workday. In no case in railway telegraph service, where the work approaches the close tension of the commercial telegraph business, are men required to exceed eight hours per day. I would therefore recommend, in view of these facts, that the eight and one-half hour workday should be reduced to eight hours.

Paragraph 2 of this Article was agreed to by the parties.

It was proposed by paragraph 5 to alter the basis of payment for overtime worked from seven to five hours, and on Sundays and public holidays to three and one-half hours. The present method of computing overtime is to calculate the hours per month on the basis of seven hours per day, twenty-six days per month, dividing this result into the monthly rate to ascertain the hourly rate for overtime.

The company contended that the present rate should not be disturbed because of the reasonably short hours of service, that the employees could very well afford to work overtime at the present rate; that overtime was necessarily incidental to the service, and that, in fact, a great many men were glad of the opportunity.

The employees contended that owing to the exacting nature of their work they should not be required to work beyond their regular hours of service if the health and well-being of the employees were fairly considered, and that the overtime rate ought to be considerably more than the regular hourly rate or the present rate for overtime, so as to compel the company in the interest of economy to reduce overtime to a minimum, and at the same time compensate the employees for having to sacrifice their hours off duty which ought to be devoted to rest and recreation.

My personal experience and observation in the matter of overtime during a period of many years compels me to accept the views of the employees in this regard. It is a well established fact that so long as employers may compel employees to work overtime without any material increase beyond the regular hourly rate, excesses are bound to occur to the detriment of the health of the employees. It has also been well established that low wages force the workmen to the desire to work overtime. The only remedy for these conditions has been the adoption of the almost universally recognized practice of paying for overtime at the rate of regular time and one-half. In fact, this company recognizes the practice with its railway telegraphers, its maintenance of way employees, and in fact practically all employees whether rated by the day or by the month who work a specific number of hours each day. I can therefore see no reason why its commercial telegraphers who, probably above all others, having regard to the nature of their work should not be so paid, and I recommend that the overtime rate be at the rate of time and one-half in all instances.

Paragraph 5 of this Article provides that the working of overtime shall be optional with the employees. But having regard to the representation made by the company and the employees, and realizing that it is to some extent a necessary incident to the employment, I think that for the present such a rule should be adopted.

The proposal to adopt a new paragraph to this Article whereby employees would be allowed a short relief of fifteen minutes twice a day was contended for on the grounds that it was necessary in order to meet the demands of nature, and that in the past instances had occurred where employees had been refused reasonable request in this regard. On the other hand the company contended that the practice of relieving its employees for a few minutes when necessary was followed, and it was shown that in some instances the period of fifteen minutes had been exceeded.

While there may be cases where employees have a grievance in this matter it is difficult to believe that any employer would have so little humane consideration as to refuse reasonable requests in matters of this character. In declining at this time to recommend the adoption of the rule, future consideration thereof should not thereby be precluded if grievances of this character should arise. The discussion of this rule, however, served at least to indicate the close application to duty which the nature of the service demands of these employees.

In the matter of the increase in wages the employees emphasized the extraordinary increase in the cost of living which had occurred during the past four or five years, and more especially in the last two years, and contended that during that time they had not received sufficient increases in wages to nearly meet this increase in the cost of living and that their wages were inadequate for the maintenance of a family, especially in the large cities and towns in which they are generally located.

The company was willing to concede increases which in the aggregate were equivalent to the well known McAdoo award in the United States, plus an additional sum of $1,100. per month, and also agreed to adopt any amendments made to the said award from time to time. The employees contended that the McAdoo award was based upon the working conditions and wages applicable to the four classes of railway transportation employees, whose hours of service, working conditions and wages had been improved and advanced for many years, during which time their working conditions and wages had undergone few improvements. They also pointed out that the United States not being engaged in the war until 1917, these railway employees were making substantial improvements in their working conditions and wages during the years 1914, 1915 and 1916, while they had withheld reasonable demands, largely owing to the fact that Canada during these three years had been engaged in the war, and they claimed that they should not

now be expected to accept the company's proposition. Notwithstanding the possible justification of the employees' contentions it would seem that the company's proposition would bring a substantial measure of relief, and I would therefore recommend its adoption and that the parties arrange the distribution of them according to the local requirements.

The employees also proposed to include in their schedule the chiefs. This was vigorously opposed by the company, and the contention was made that men entrusted with the charge of other employees should not be included in the same schedule.

The employees contended that the wire chiefs and traffic chiefs had nothing to do with the employing or dismissing of the employees, and that there was no obligation due the company by them which such common interests would in any way interfere with.

Having regard to the fact that other classes of employees of the company, such as station agents who have immediate jurisdiction over railway telegraphers, are included in the same schedule with such telegraphers, and also bridge and building foremen and section foremen are continually in charge of and have immediate jurisdiction over large gangs of men and supervise their work and that these are all likewise included in the same schedule, it would seem quite consistent that the wire chiefs and traffic chiefs should be included in the telegraphers' schedule, and I recommend the adoption of that amendment.

A difference exists between the company and the employees as to the date upon which the adjustment of these rules and wages should become effective. The agreement between them provides that the existing schedule may be terminated upon 30 days' notice. It appears this notice was given about the last of March, 1918, and in any event was operative from April thirtieth. The parties should have conferred during the month of April and arrived at a settlement in order to carry out the spirit of the agreement. It seems, however, that some considerable time elapsed before the conferences took place. A dispute resulted and was referred to this Board. The delay thus created should not be charged against the employees as they do not appear to have been in any way responsible. I would therefore recommend that the wage increases should be effective from May first, 1918, and that the changes in the rules should become effective as from August first, 1918.

Respectfully submitted,

(Sgd.) D. Campbell,
Member of Board.

Reports of Board of Conciliation and Investigation and of Labour Appeal Board in Dispute between the Ottawa Electric Railway and its Employees

A REPORT was received from the Board established to deal with the dispute concerning wages and conditions of employment between the Ottawa Electric Railway and certain of its employees, being members of Division No. 279 of the Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: His Honour Judge R. D. Gunn, of Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. Geo. F. Henderson, K.C., of Ottawa, and Fred. Bancroft, of Toronto, nominees of the company and employees respectively. The award was signed by the chairman and Mr. Henderson, and contained recommendations as to settlement and a schedule of rates and rules. The award was accepted by the company, but not by the employees, who ceased work on August 13, resuming work, however, on August 14, pending reference of the dispute to the Board of Appeal constituted by the Order in Council of July 11. The award of the Board of Appeal was unanimous and was accepted by both the company and the employees. No further cessation of work occurred.

Report of Board of Conciliation and Investigation

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Ottawa Electric Railway Company, employer, and certain of its employees, being members of Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Hon. T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ontario.

Sir,—

The members of the Board of Conciliation and Investigation appointed on the fifteenth

day of July, A.D. 1918, met at the Court House in the City of Ottawa, to hear the parties and their representatives, and were attended by Mr. Joseph Gibbons, vice-president, Amalgamated Association of Street and Electric Railway Employees of America, and Messrs. W. G. O'Meara, R. G. Jardine, F. Watters, S. Seguin, J. McGregor, W. Cote and W. J. Jennings on behalf of the employees, and by the president and vice-president and secretary-treasurer of the company, Mr. J. M. Ahearn, and Mr. Lang, superintendent, and other officials of the company, on behalf of the employer, by previous arrangement.

It appeared that in July, A.D. 1916, the parties were before a Board of Conciliation and arrived at an agreement upon their differences, which was duly reported by that Board and has been in existence till terminated by effluxion of time on the first day of July, 1918. By their present demand the employees were seeking not only large increases in rates of pay, but also many important additions and amendments to the provisions of the agreement covering working conditions, all of which had been the subject of conferences between the parties without any satisfactory results.

After the examination of the various agreements and some discussion, at the urgent request of the Board the parties and their representatives again proceeded to revise the proposed amendments and additions to the provisions of the agreement, and as a result were able to reach agreement upon very many of the clauses, leaving a small number to the judgment of the Board. Upon hearing the arguments, contentions and representations of the representatives of the respective parties, and fully considering these representations, the Board have concluded to recommend that the agreement set out in Schedule "A" thereto be adopted and executed by the parties hereto in the place and stead of the agreement heretofore in existence between them. This agreement covers all working conditions, and is practically the result of the conference already mentioned. It covers everything brought to the attention of the Board except the rates of pay, which must be dealt with separately.

RATES OF PAY.

A very thorough and exhaustive enquiry has been conducted into the demand for increased rates of pay. The Board heard the representatives of the respective parties at great length and very much testimony was accumulated on the different contentions and submissions, which were conducted in a very amicable and intelligent manner. The Board again urged that a further effort be made to adjust these rates by agreement and a prolonged conference was held in an honest endeavour to fix rates, but without results, and at the sincere request of all concerned the Board were requested to make their findings and report their recommendations, as it was evident that further attempts to agree would be useless.

The Board then proceeded to consider the whole matters referred to them remaining unsettled, and have made a most careful investigation into all the facts and figures presented and the representations submitted.

It can be stated generally that until recently in no two places where street railways are operated do conductors and motormen receive uniform rates, nor do the service and operating conditions permit of reasonably exact comparison, so that we cannot entirely rely on the rule that is often invoked and grant similar rates for like services on other lines without further enquiry. That principle is not overlooked. It should be pointed out that in Ottawa and suburbs there are about 51 miles of trackage owned by the company, and their revenues flow from passenger traffic only, with a low fixed rate with transfer privileges and an expiring franchise.

The records show that the Ottawa rates for conductors and motormen range from 12 cents per hour in A.D. 1891 to 30 cents in 1916. Increases were granted almost yearly, or over 100 per cent increase in such rates in 15 years, while the demand now presented asks over 60 per cent additional increase for the same employees, entirely based on the present excessive living expenses. Already many beneficial and comfortable concessions are granted these employees by the terms of the agreement recommended herein, while the rapidly advancing cost of every class of material entering into the upkeep, betterment and extension of street railways and the onerous taxation levied upon the earnings of all public utilities by the Dominion, Provincial and municipal authorities make further inroads upon the earnings and receipts. Add to this the serious difficulties regarding more rapidly advancing operating expenses now before us, and the magnitude of the burdens facing all this class of public utility cannot be too strongly emphasized.

On close examination of the material presented, including the recent deliverances on operating expenses on street railways in every province and the more recent disposition of such demands in the larger and more congested American cities, it is safe to assert that in every case the tendency has been always upwards, and varying increases have been conceded for similar reasons to those which prevail here.

The Board therefore have realized, after a most careful analysis of all the facts, circumstances and conditions laid before them, that these employees have established grounds that warrant a recommendation for increased rates of pay, notwithstanding the comparatively reasonable rates agreed on two years ago, yet it is a most difficult and perplexing task to arrive unanimously at the amount of such increases.

Conductors and motormen.—There are 224 conductors and 214 motormen affected by these proceedings, and all but 75 conductors and 59 motormen receive the maximum rates. The weekly earnings at maximum rates equal $16.20, with small additions for overtime and Sunday

rates, and it is alleged with reason this is not adequate under present living conditions. It is also to be remembered that any increase must have regard to the quality of service rendered as well as other considerations, but overtime and holiday labour is not ever intended as a means to work out an existence, even admitting that a junior can qualify for increase in six and the maximum at end of 24 months, and many here are old employees who have enjoyed all the increases granted.

On an examination of the schedules filed with the Board on the hearings, many of which have been revised within the last 90 days by and at the request of the conductors and motormen in the presence of officers of the different companies, we find the rates of pay for junior and senior motormen and conductors in places that fairly, justly and reasonably compare in operating earning power and living conditions with the lines under consideration, to be as follows:

	Junior.	Senior.
Montreal Street Railway	31c	37c
Toronto Street Railway	30c	37c
Hamilton Street Railway	30c	37c
Port Arthur Street Railway ..	30c	36c
Fort William Street Railway..	30c	36c
Hull Street Railway	29c	36c
London Street Railway	30c	35c
Windsor Street Railway	36c	41c

The other centres in the Eastern and Western Provinces all vary widely and offer no fair or reliable comparison in our opinion. In no case has the maximum applied for here been reached, and besides different living conditions, other operating conditions are very dissimilar, as the most superficial enquiry will determine. It is a very important fact that increased rates have been conceded by this company to its employees almost annually and much of the harmony and friendly relations between the parties concerned are due undoubtedly to the fact that all these increases have been the subject of mutual concessions resulting in agreement faithfully observed on both sides from the beginning till now. An inspection of the figures establishes that the increases have more than doubled the hourly rates of pay up to A.D. 1916, when an additional 3 cents brought the maximum rates to 30 cents per hour, so that it might be claimed with considerable force that had living conditions not been disturbed since 1916 there would not be any room for increases in rates of pay for this class of labour.

On the Hull Electric lines an increase in May last of 11 cents, which was considered very high, was granted in the hourly rate, but on scrutiny of the whole figures it will be found that it was a grant made suddenly, but after many years of waiting on the part of the men, of what might be justly claimed "back pay." Six cents per hour to these employees would be equivalent to Hull, Fort William and Port Arthur rates, and 7 cents would level up with Montreal, Toronto and Hamilton maximum rates, while London is 2 cents lower for similar service. Windsor is not comparable for reasons known to all.

The demand here is for a maximum of 13 cents higher than Montreal, Toronto, Hamilton and the others but Windsor rates, and 9 cents higher than Windsor rates. Some reference was made to the revenues of the company, but conclusions based on ability or inability to pay have little or no weight in fixing wages, as a living wage must be paid, not as a favour or gratuity, but irrespective of the revenues on all public utilties, and such as cannot pay such wages to its employees must go under. This point was not developed, as it afforded little or no assistance, though the company desired to go into explanations which were considered irrelevant at the present time.

Having regard therefore to what is paid for similar service on other similar lines that are unquestionably fair guides, and where rates of pay, density of traffic, operating and living conditions are approximately in line, and having given all the facts, figures and representations submitted to the Board the most anxious and careful consideration in our power, no valid reason can be found or is known to us to support lower rates on these lines than on the lines in the other commercial centres referred to.

The undersigned have therefore concluded to recommend that during the existence of the agreement referred to in the schedule or agreement hereunto annexed, the rate of pay for conductors and motormen be increased all around by 7 cents per hour, this being an increase of 20 per cent upon the present maximum, and practically the same proportion of the junior rate.

It is also recommended that overtime be paid for at the rate of time and one half as heretofore and that those working on snow ploughs, sand cars and sweepers receive 5 cents per hour extra.

(See emendation of this paragraph in report of Labour Appeal Board published in this issue.)

Rates for Sundays and holidays have heretofore been time and one half, and it is recommended that this be continued.

Employees other than motormen and conductors.—Inasmuch as the demand of the men is exclusively based upon increased cost of living, it follows that the other employees should receive increases to correspond with those of the conductors and motormen. It was agreed at the hearing that a general increase in the rate of pay to all the men would work out justly, since the present rates of pay are properly in proportion to the earning capacity of the several employees. This renders it unnecessary to go into detail as to the other classes of men in the employ of the company, the recommendation being that each and all receive 7 cents an hour in addition to the rate paid under the former agreement.

While the power house maintenance men who work for this company as well as for other

Chaudiere power owners are not technically employed by this company, and therefore cannot be formally included in this report, the Board recommends that these men should receive the same increase as the others.

All of which is respectfully submitted.

(Sgd.) R. D. GUNN.
(Sgd.) GEO. F. HENDERSON.

Ottawa, August 8, 1918.

Agreement between the Ottawa Electric Railway, hereinafter called "the Company," Party of the First Part, and the Ottawa Railway Employees Union, being Division 279 of the Amalgamated Association of Street and Electric Railway Employees of America, hereinafter called "the Association," Party of the Second Part.

Witnesseth that in the operation of the company's system both parties hereunto agree as follows:

1. The company recommends that all employees affected by this agreement shall become and remain members of the Association during the life of this agreement in accordance with the Constitution and By-laws of the Association, in order that all questions and grievances may be dealt with by one head, and that the standing of employees with the company shall not be affected by the fact of their membership in the Association.

2. The company agrees to meet and treat, through their properly accredited officers, with the properly accredited officers and representatives of the Association upon all questions or differences that may arise during the term of this agreement.

3. Employees who are members of any committee of the Association, or who are officers of any Association of the employees, or are delegates to conventions of the Association, shall be entitled to leave of absence for the purpose of attending conventions, or of doing such other committee work, or other work as may be necessary, without losing any privilege of seniority. Any employee elected to any office in the Association which requires his absence from the company's employ shall retain his seniority rights, and shall upon his retirement from such office have his respective place in the company's employ.

4. In the event of an employee being guilty of violating the rules of the company, he shall be warned, when off duty, by the superintendent, against a recurrence of the same offence, and in the event of the employee being suspended his case shall be dealt with by the superintendent, save that any employee suspended or discharged shall have the right to appeal to the president, in person, or through the Grievance Committee of the employees, and any employee suspended or discharged, and who, upon investigation, is found not guilty of sufficient cause to warrant such suspension or discharge, shall be reinstated to his former position and be paid in full for all lost time caused by such suspension or discharge.

5. All promotions or transfers in all departments shall be based upon seniority and efficiency, and without discrimination, and when an employee who is working on night shift desires a day position, preference shall be given to such night men when vacancies occur.

6. When through slackness of work a reduction of staff becomes necessary in any department, men shall be laid off in the following order: Last on, first off; last off, first on. Men being laid off under this clause shall leave an address with the company, and notice of resumption of work shall be given by the company to the men by mailing advice to such address. If men do not appear to resume their positions, the same shall be deemed to be vacated.

7. No employee, other than those covered by Sec. 3, shall be granted leave of absence exceeding thirty (30) days unless agreed to by both parties.

8. The company shall keep a list of motormen and conductors in order of seniority, posted in the men's waiting room, together with a Run Guide, on which shall be posted the regular scheduled daily service. Motormen and conductors shall then have the right to choose such runs as they may prefer, the senior men on the list to have first choice, and so on down until all have chosen. Booking shall be conducted subject to the approval of both parties. The choosing or picking of runs shall take place every three months, or at such other times as the operating conditions make it necessary for another selection of runs.

9. Nine hours shall constitute a day's work for motormen and conductors. All regular and relief runs shall be paid not less than nine hours as heretofore. No swing run shall pay less than eight and one-half hours. Overtime rates shall be paid for all work in excess of nine hours.

10. All runs shall be classified and listed upon the Run Guide, and shall be known as: Regular day runs; regular relief runs; swing runs, trippers, and extras.

(a) All regular day runs shall be completed within twelve and one-half consecutive hours.

(b) All regular relief runs shall be completed within fourteen and one-half consecutive hours whenever practicable.

(c) All regular swing runs shall have not more than three periods of work. All three period swing runs shall be completed within thirteen and one-half consecutive hours. Two period swing runs shall be completed within fourteen consecutive hours.

(d) Tripper runs shall not exceed four hours' pay time, and may be coupled to the regular day runs, and shall pay the double time rate for time worked.

(e) Extra runs shall be service not regularly scheduled on the Run Guide, and such other runs as cannot be foreseen, and cannot be provided for by the regular time table. No extra run shall pay less than two hours and parts of hours shall count an hour.

11. Where the elapsed time consumed by swing runs exceeds thirteen and one-half hours for three period runs, or fourteen hours for two period runs, overtime shall be paid for such additional elapsed time, and where the break in any run is less than one hour continuous time shall be paid.

12. No period of work shall exceed six and one-half hours, without a break of sufficient time for meals, but no break shall take place between midnight and two a.m.

13. No motorman or conductor shall be compelled to do extra work after his regular scheduled or assigned run has been completed unless he is agreeable to do so.

14. Where motormen or conductors have selected or have been assigned to runs regularly scheduled, and a portion of such runs is cancelled, they shall be paid the full time such run would have paid had full run been completed.

15. All spare men who show up at the shed for work at six o'clock in the morning or six o'clock in the evening, and who fail to procure work, shall be allowed one hour for so turning up at either morning or evening.

16. Whenever the cars are delayed so that a motorman or conductor cannot reach his reporting place on time, no miss shall be marked against him, and if he arrives before his car goes out or is relieved, he shall be allowed to take it. Men to telephone.

17. Motormen and conductors, who are required to report ten minutes before time shown on time table, shall be paid for such additional ten minutes' time. A ten minute allowance time over scheduled time shall be paid on all runs.

18. Uniform clothing for motormen and conductors shall consist as follows:

Summer—Full suit, coat, vest and trousers.

Winter—Trousers every year, overcoat every second year.

All motormen and conductors shall be so provided, the company to pay full cost of such clothing for all men in their service over one year, and half the cost of those in the service first year, said uniforms to be supplied not later than the first of May and fifteenth of October each year. After any article of clothing has been in the possession of a motorman or conductor for a period of three months, it shall become his absolute property. All caps and badges to be supplied by the company without charge. In the event of an employee damaging or destroying his uniform

in the execution of his duty, the company will make good the damage or supply free an extra uniform if the case warrants.

19. Cars shall be sent out each morning and night for the purpose of conveying employees to and from their work; said cars shall be run on Somerset, Bank, Hull, St. Patrick, Sussex, Gladstone and Preston lines.

20. Suitable seats shall be provided for both motormen and conductors on all cars, said seats shall be placed in a position where convenient for motormen and conductors' use in the proper discharge of their duty. Seats to be installed in cars and men allowed to use them on certain parts of the route, to be agreed upon.

21. All cars shall be equipped before taken out with sand, switch bars, brooms, dusters or any other necessary article, and all cars shall be cleaned and in proper condition to go upon the street each morning. This will not relieve the crew of the responsibility of seeing that their car is properly equipped. All equipping and cleaning of cars to be done by shedmen provided for that purpose.

22. All cars shall be properly heated to a reasonable temperature. All cars shall be fitted out with double windows on front vestibule and on one rear window on step side of car. All cars to be so fitted out from November to March of each year.

23. All employees shall be given free transportation at all times on all lines of the Ottawa Electric Railway.

24. For all accident reports conductors and motormen shall be paid for actual time consumed in making such reports.

25. Sunday rate shall be paid for the following holidays: New Year's Day, Victoria Day, Dominion Day, Civic Holiday, Thanksgiving Day, Labour Day and Christmas Day.

26 The company will supply all conductors with tickets and change to the extent of thirty-five dollars ($35.00).

27. The Association shall be allowed to post notices of meetings, bulletins, or any other matter that may be of interest to the members of the Association, at all car barns, power stations, and in the motormen's and conductors' waiting room.

28. Sunday hours for motormen and conductors shall remain as at present. All regular motormen and conductors shall be booked off on each alternate Sunday.

29. The schedule of running time shall be so arranged as to provide for a lay-over of two minutes at the end of each line on each round trip. Sufficient running time shall be allowed at all times.

30. Shop and Shed Men. Nine hours shall constitute a day's work and shall be completed within ten consecutive hours. Overtime shall be paid for all work performed in excess of the regular day's work of nine hours.

31. Overtime shall be paid for all work performed on Sundays and legal holidays, as named in Sec. 25.

32. All special calls for men when off duty shall be paid not less than one half day for so reporting. Present rules for overtime shall remain in force.

33. All shops and sheds shall be heated during the winter months to a reasonable temperature.

34. Wrecking cars shall be equipped with proper protection from inclement weather, and men shall be supplied with rubber coats and boots when working with wrecking cars.

35. All present shop and shed rules shall remain in force unless otherwise amended previous to the acceptance of this agreement, and no individual changes shall be made only through and with the consent of the Grievance Committee.

36. When an employee is engaged in any two or more classes of work for two days or longer he shall be paid the maximum rate for the work performed.

37. Track maintenance men shall mean employees who take their orders from the roadmaster or track foreman, and whose duties are to maintain the track in a safe condition for operation, and switch men employed at switch points.

38. Nine hours shall constitute a day's work for all track maintenance men. All time in excess of nine hours shall be paid at the overtime rate.

39. In the event of day gangs being required to do night work for a period of two nights or less, they shall not on that account be compelled to lose a day prior to the commencement of that night work, and they shall be paid overtime rate for the first night.

40. When a day gang is required to work three nights or more in succession, it shall be considered to have been transferred to night work for the time being, but shall be paid at overtime rates for the first night's work. Provided that the foregoing shall not apply to extra men taken on for emergency work in connection with snow trouble.

41. When day gangs are required to work in excess of the above nine hours, they shall be paid time and one-half for all such overtime up to twelve midnight and double time from twelve midnight until relieved from duty. Double time shall be paid for emergency calls and statutory holidays and straight time will be paid when men are held under foreman's orders, not less than one hour.

42. When trackmen are employed at drain work during the spring and fall of the year, and conditions demand such, rubber boots shall be supplied by the company to all men so employed.

43. One week's holidays, with pay, shall be allowed to all dynamo, generator and switch board attendants at all power stations each year.

44. Wood mats and proper insulation shall be supplied at all sub-stations.

45. No switch board or machinery shall be cleaned while said machinery is running.

46. Rubber gloves, boots and aprons to protect clothes, shall be supplied to men working in the battery rooms.

47. Wire and Conduit Department. Nine hours shall constitute a day's work and the day shall be completed in ten consecutive hours. All work performed in excess of the regular nine hours shall be paid overtime rate.

48. All wire and linemen shall be supplied with rubber coats, boots and gloves.

49. From and after July 1, 1918, until the termination of this agreement, in place of the rates provided by the agreement entered into and dating from July 1, 1917, all men employed in the several departments of the company shall be paid 7 cents per hour in addition to the pay received by them as of June 30, 1918.

50. Any employee of the company enlisting or having been drafted under the Military Service Act, or shall be drafted for military service or duty, shall, at discharge, be given full seniority rights, dating continuously over such period of military service.

51. This agreement and the provisions thereof shall continue in force and shall be binding on the respective parties hereto until the first day of April, A.D. one thousand nine hundred and twenty (1920) and thereafter for another year until terminated on one month's notice.

In witness whereof the parties hereto have signed.

Report of Labour Appeal Board

In the matter of an appeal to the Labour Appeal Board of the Dominion from the findings of a Board of Conciliation and Investigation established under the Industrial Disputes and Investigation Act, 1907, and appointed on the fifteenth day of July, A.D. 1918, by certain employees of the Ottawa Electric Railway Company, being members of Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America.

To the Hon. T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ontario.

Sir,—

The members of the Labour Appeal Board of the Dominion were summoned by the Honour-

able G. D. Robertson, Acting Minister of Labour, to meet in Ottawa in the office of the Acting Minister of Labour, at 10 a.m., Friday, August 16, to hear the parties in the matter of the above mentioned appeal.

The Acting Minister submitted a letter, appended hereto, received by him from the employees (Division 279), dated August 15, 1918, setting their cause for appeal.

The Acting Minister further explained the situation, stating that the Ottawa Electric Railway Company's employees had refused to accept the recommendations of the Board of Conciliation which had recently reported upon them, and that the employees had gone on strike. The strike had been suspended on his promise that the Board of Appeal would consider the matters in dispute at the earliest practicable date.

After receipt of instructions the Board at once proceeded to a consideration of the points at issue, and at 2 o'clock in the afternoon representatives of the employees and of the company were called in to present their cases. On behalf of the employees there appeared Mr. Sinclair, of the Amalgamated Association of Street and Electric Railway Employees of America, and Mr. J. McGregor, an employee of the Ottawa Electric Railway and a member of the Executive of Local No. 279 of A. A. S. & E. R. E. of A.

On behalf of the company there appeared Mr. T. Ahearn, president, and Mr. W. Y. Soper, vice-president.

The written appeal of the employees, appended hereto, was on two grounds: The rate of wages recommended by the Board and the duration of the agreement—the other clauses of the agreement, number from 1 to 48 inclusive, and clause 50, being acceptable to the employees, and, before the strike, to the company.

Representatives of the employees claimed:

(a) That the rates for different classes of motormen and conductors had been 30c, 27c and 26c per hour under the agreement which ran from the first of July, 1916, to the first of July, 1918, and that whereas the employees had asked for an increase of 20c per hour to all classes, bringing the aforesaid rates to 50c, 47c and 46c per hour, the Board of Conciliation had recommended an increase of only seven (7c) cents per hour.

(b) That the cost of living had advanced about 45 per cent since the last agreement was made: stating that careful computations by their committee had shown that to maintain a family of five, consisting of father, mother and three children too young to work, required per annum not less than $1,677.81.

(c) That there were many men with very large families who would find it difficult to live even at the rates they asked.

(d) That the conditions of their employment entitled them to further consideration, as, in order to work the nine hours agreed to, it was necessary for them to be on call from eleven to thirteen hours per day.

(e) That there should be a classification of employees other than motormen and conductors, with rates which they submitted from each class. Generally these rates called for a greater increase than the 20c asked for motormen and conductors.

In the matter of the duration of the agreement, the employees claimed that with conditions changing as rapidly as they now are and with the probability of higher costs in the future, it would be unfair to ask them to be bound by an agreement extending over 21 months or until the first of April, 1920.

THE COMPANY'S CASE.

The representatives of the company stated on its behalf:

(a) That an exhaustive investigation had been made by the Board of Conciliation and that the management had agreed to the report of the Board only on the grounds of conciliation, considering that the rates proposed were comparatively higher than those fixed by recent agreements with the representatives of the same union in Montreal, Toronto, Hamilton and the adjoining city of Hull, submitting the following table in support of this contention:

Wages—Conductors and Motormen.

	Junior.	Senior.	Date of Agreement.
Ottawa	33	37	
Montreal	31	37	June, 1918
Toronto	30	37	June, 1917
Hamilton	30	37	May, 1918
London	30	35	
Hull	29	36	July, 1918

(b) That the Ottawa classification brings the maximum rate into effect after two years' service, while the Montreal and some other classifications do not bring it in until after five years' service, bringing the Ottawa average rate much higher than would appear by the above comparison.

(c) That the recommendation of the Board of Conciliation imposed a very heavy burden upon the company, amounting on its present payroll to, per annum, $158,356.

(d) That the increase of three (3c) cents granted in 1916 was based on the increased cost of living. Nevertheless, the employees at once elected to work nine hours per day instead of the ten hours worked previous to the increase, thus bringing their annual compensation to about the same amount as before the increase.

(e) That the time and a half stated in the agreement for Sunday time had never been conceded by them; was unusual and unjust, the maximum rate in any of the other cities where such is allowed being five (5c) cents per hour against 18½ cents recommended by the Board

of Conciliation, and asked that this clause of the agreement be changed accordingly.

(f) That the employees had privileges not found in other trades, special cars being provided to take them to and from work and no charge being made for travelling on the company's cars at any time.

(g) That the employees are liberally supplied with uniforms.

(h) That consideration should be given to the steady employment given to their men as compared with most trades, and to the very cordial relations that had hitherto existed between the employees and the management.

(i) The company submitted a list of prices of ten commodities obtained from a local dealer showing that the articles on this list now cost $4,085 as against $3,910 in 1916. The company also submitted lists from their payrolls showing the remuneration actually received by a number of their employees and asked attention to a comparison of the remunerations paid to Government employees in Ottawa as shown by the blue-book.

Duration of the agreement.—The company claimed that it should run until the first of April, 1920, stating that the negotiation of a new agreement inevitably interfered with the operations of the railway and that they should take place at periods of least traffic—say, in the early spring or late autumn.

The Board has taken all the arguments of both sides of the controversy under the most careful consideration. The members of the Board have independently informed themselves of the general conditions existing in this employment and of the increased cost of subsistence.

First, as to the duration of the agreement.—It is the opinion of the Board that agreements extending over a period of one year are not in the best interest of either the employer or the employees at the present time, owing to the unusual conditions brought about by the war.

The Board finds that the agreements should run for twelve months from the expiration of the last agreement, until the first of July, 1919, and continue thereafter year by year unless notice in writing is given by either party 30 days in advance of the termination date that such a party desires a change, and that clause 51 should be amended to read as follows:

"This agreement and the provisions therein contained shall be in effect from July 1, 1918, to July 1, 1919, and thereafter from year to year unless either party to this agreement desires a change in any section or sections thereof. Either party desiring such a change shall notify the other party in writing not less than thirty (30) days prior to July 1 of each year, on such notification the changes desired shall be open for amendment."

In the matter of rates.—The Board has given careful consideration to the representation of the railway company as to the financial burdens imposed upon it by the increased cost of all the materials which they use; that the rates recommended are comparable to the rates paid in other nearby Canadian cities, and that the individual income of the employees was voluntarily decreased by adopting a nine instead of a ten hour day. Notwithstanding the financial burden imposed upon the company and the other considerations mentioned above, the Board is of the opinion that the rates recommended by the Conciliation Board do not fully cover the increased cost of living, and that, having regard to the increased cost of all commodities, while making allowance for the economies now practised by all, as well as for the substitution of cheaper commodities, that conditions would be fairly met as regards the men by granting increases as follows:

(a) Motormen and conductors—an increase of nine (9c) cents per hour over existing rates.

(b) Employees other than conductors and motormen.—That men now receiving a rate of twenty-three and a half (23½c) cents, and under, per hour, receive an increase of eleven and a half (11½c) cents per hour. That men now receiving a rate of over twenty-three and a half (23½c) cents and up to and including twenty-five (25c) cents per hour receive an increase of ten (10c) cents per hour. That men now receiving over twenty-five (25c) cents per hour receive an increase of nine (9c) cents per hour. And that clause 49 of the agreement should be amended accordingly.

Referring to the clause in the report dealing with rates for Sundays and holidays, the Board received further evidence, including a communication from the chairman of the Conciliation Board, in which he states that the clause was written in error and unnoticed. Furthermore, that all agreed and understand that the rate for Sundays and holidays be increased from four (4c) cents to five (5c) cents per hour.

The Board therefore finds that the clause should read as follows:

"Rates for Sundays and holidays have heretofore been four (4c) cents per hour extra, and it is recommended that the rate shall be increased to five (5c) cents per hour extra."

The Board does not recommend the adoption of the schedule submitted by the employees for employees other than motormen and conductors, the Board considering that the general increases recommended for all employees substantially covers the claim of the Association. It should be mentioned, too, that the schedule was not referred to in the appeal of the Association, but was introduced in evidence.

(Sgd.) H. J. DALY,
Chairman.
(Sgd.) GUS. FRANCQ.
(Sgd.) G. H. DUGGAN.
(Sgd.) JOHN W. BRUCE.
(Sgd.) S. R. PARSONS.

August 23, 1918.

INDUSTRIAL DISPUTES DURING AUGUST, 1918

EIGHTEEN strikes affecting approximately 4,677 employees were reported as having commenced during August. There were in existence at some time or other during the month 33 strikes directly affecting 8,638 workpeople. The total time loss on account of industrial disputes was estimated at 94,040 working days, as compared with 123,511 in July, and 26,177 in August, 1917. The time loss occasioned by the eighteen strikes which began in August was 31,598 working days, while a loss of 62,442 days is charged to the fifteen strikes commencing prior to August. Termination of disputes was reported in the case of seven of the disputes commenced prior to August. Fifteen of the strikes which commenced during August terminated during the month, leaving the 11 following strikes affecting approximately 1,333 workpeople on record August 31: pipefitters, Nobel, Ont.; plumbers and steamfitters, Toronto; iron shipbuilders, Lauzon, Que.; machinists, Montreal; cap makers, Winnipeg; knitting mill operatives, Toronto; cigarmakers, Toronto and Montreal; cigarmakers, Hamilton, London and Montreal; plumbers and steamfitters, St. Thomas; wharfmen, Quebec, and labourers, Winnipeg.

Disputes by Industries

The following is a review of the disputes by industries in the order in which these appear in the statistical table. A brief summary is given of the more important strikes.

LUMBERING. — There was but one strike in existence involving 50 employees and a time loss of 50 working days, that of steam and operating engineers in British Columbia, which was carried over from the previous month, three plants not having conceded the men's demands at the end of July. The strike, however, so far as it affected these firms was settled August 1.

MINING AND SMELTING.—Four strikes were in existence affecting approximately 2,399 employees and involving a time loss of 14,235 working days. Two of these strikes — those in coal mines at Entwhistle and at Wayne, Alta., were carried over from the previous month, but were settled early in August. Two strikes which occurred during August were adjusted within a short time of their ocurrence — coal miners at Brule, Alta., and at Sydney, N.S.

BUILDING AND CONSTRUCTION. — There were six strikes affecting 575 employees and involving a time loss of 5,925 working days. Three of these strikes— painters and decorators at Calgary, pipefitters at Nobel and plumbers and steamfitters at Toronto were carried over from the previous month; the strike at Calgary was settled, but the others were unterminated. Three strikes occurred during August — carpenters and painters at Vancouver and plumbers and steamfitters at St. Thomas. The carpenters' strike was adjusted through the mediation of an officer of the Department of Labour and the painters' strike at the same place was settled by negotiations between the parties. The strike at St. Thomas was unterminated.

METAL, MACHINERY AND CONVEYANCES. —Six strikes were in existence affecting

2,062 employees and involving a time loss of 48,604 working days. Four of the strikes occurred prior to August—iron shipbuilders at Lauzon (unterminated), machinists, Montreal (unterminated), metal workers at Winnipeg (terminated except in three shops), and steel workers at Sydney, where the men had ceased work for several Sundays to show their dissatisfaction with working conditions. This strike was settled upon the appointment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. Two strikes occurred during August—blacksmiths and helpers in the employ of a number of firms in Toronto which was concluded upon the appointment of a Board of Conciliation under the Industrial Investigation Act, and moulders at St. John, N.B. The latter strike affected only five employees and was terminated shortly after its commencement.

WOODWORKING.—One strike occurred during August involving 160 employees and a time loss of 1,600 working days. The disputes affected millmen at Vancouver and was adjusted through the mediation of an officer of the Department of Labour.

PULP AND PAPER.—One strike was in existence affecting 100 employees and involving a time loss of 200 working days, that of pulp and papermakers at Hawkesbury which was settled in the month. A strike of pulp and paper makers at Fort Frances is given in the table, as particulars of its adjustment had not been received at the end of the previous month; the strike, however, was not in existence during August.

CLOTHING.—One small strike of cap makers affecting only eight employees and involving a time loss of 104 working days was carried over from the previous month and was unsettled.

TEXTILE.—Two strikes were in existence affecting 128 employees and involving a time loss of 2,208 working days. A strike of knitting mill operatives at Toronto was carried over from the previous month and remained unterminated. A strike of textile workers which occurred at Hamilton during August was adjusted after the employees had been out two weeks.

FOODS, TOBACCO AND LIQUORS.—Three strikes were in existence affecting 326 employees and involving a time loss of 13,044 working days. Two of these strikes — cigarmakers at Toronto and Montreal, and at Hamilton, London and Montreal were carried over from the previous month and remained unsettled. A strike of meat packers at Stratford which occurred during August and affected but few employees was settled within a day or two of its occurrence.

TRANSPORTATION. — There were six strikes affecting 1,435 employees involving a time loss of 8,570 working days. All these strikes occurred during August and were terminated at the end of that month except one—wharfmen at Quebec. The most important strikes were those of street railway employees at Ottawa and masters and mates on the British Columbia coast. The street railway employees at Ottawa, numbering over 500 men, refused to accept the award of a Board of Conciliation and Investigation which had been appointed under the Industrial Disputes Investigation Act and ceased work on August 13, but at the end of two days the men resumed work upon the difficulties at issue being referred to the Labour Appeal Board. The award of this Board gave the men some increases over the rates recommended by the Board of Conciliation and both the parties to the dispute accepted the Appeal Board's decision. On August 24 about 400 master mariners and mates members of the Canadian Merchant Service Guild employed in British Columbia coast steamship service ceased work. During June the Guild had applied for a Board of Conciliation under the Industrial Investigation Act,

but owing to the number of employers concerned the disputes was referred to a Royal Commission. While the enquiry was in progress the question of recognition of the Guild became acute, and the employers refusing recognition, the men ceased work. The strike continued, however, only four days when the men returned to work upon the understanding that their organization would be accorded the same recognition as given to the Imperial Merchant Service Guild in England, that a satisfactory adjustment of wages and working conditions would be made and that there would be no discrimination against members of the Guild. A strike of freight handlers at Toronto which commenced August 2 was settled upon the appointment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act after the men had been out about a week. A strike of teamster at Montreal affecting about 200 men was adjusted about two days after its occurrence by negotiations between the parties. The other strike reported in this group was that of piermen at Inverness, N.S., who ceased work for only two days.

MISCELLANEOUS.—Two strikes occurred during August affecting 95 employees and involving a time loss of 1,120 working days—hotel and restaurant employees at Vancouver which was settled by mediation after the employees had been out about a week—and labourers at Winnipeg which was unterminated.

INDUSTRIAL DISPUTES DURING AUGUST, 1918

Industry or Occupation	Particulars	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO AUGUST, 1918.		
LUMBERING:—			
Steam and operating engineers, Vancouver and other places in British Columbia.	Commenced July 2. Demand for shorter hours and increased pay. Most of companies affected conceded men's demands. Work resumed August 1.	50	50
MINES, SMELTERS AND QUARRIES:—			
Coal miners, Entwhistle, Alta.	Commenced July 19. Demand for increased wages. Settled by arbitration under order of Director of Coal Operations. Work resumed August 5.	125	375
Coal miners, Wayne, Alta.	Commenced July 19. Men refused to work on screened-coal basis, demanding run-of-mine basis. Company conceded men's demands. Work resumed August 19.	24	360
BUILDING AND CONSTRUCTION:—			
Painters and decorators, Calgary, Alta.	Commenced June 29. Demand for increased wages and reduction in hours. Settled through negotiaions; partial increase granted. Work resumed August 10.	45	360
Pipefitters, Nobel, Ont.	Commenced June 29. Demand for increased wages. Unterminated...	30	780
Plumbers and steamfitters, Toronto, Ont.	Commenced July 6. Demand for increased wages. Unterminated....	39	819
METALS, MACHINERY AND CONVEYANCES:—			
Iron shipbuilders, Lauzon, Que.	Commenced July 26. Demand for reinstatement of dismissed employees and for recognition of International Union. Unterminated.	350	1,750
Machinists, Montreal, Que.	Commenced March. 23. Demand for increased wages and nine-hour day. Unterminated.	45	1,170
Metal workers, Winnipeg, Man.	Commenced July 22. Demand for higher wages. Dispute in all shops except three settled by mediation through Provincial Bureau of Labour. Partial increases granted. Work resumed August 31.	1,000	27,000
Steel workers, Sydney, N.S.	Commenced July 28. For wage increases. Men ceased work for four consecutive Sundays. Work resumed upon appointment of Board of Conciliation under Industrial Disputes Investigation Act.	1,500	15,000
PULP AND PAPER:—			
Pulp, sulphite and paper mill workers, Fort Frances, Ont.	Commenced July 13. Dissatisfaction with award of United States War Labour Board. Settled by negotiations between the parties and by arbitration. Work resumed July 17.	175	.....
Pulp and papermakers, Hawkesbury, Ont.	Commenced July 29. For regconition of the Union. Men returned to work August 3, under previous conditions.	100	200

INDUSTRIAL DISPUTES DURING AUGUST, 1918—(*Continued*)

Industry or Occupation	Particulars	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO AUGUST, 1918—(*Continued*).		
CLOTHING:—			
Cap makers, Winnipeg, Man.	Commenced July 17. For increased wages and alleged discrimination. Unterminated.	8	104
TEXTILES, CORDAGE AND CARPETS:—			
Knitting mills operatives, Toronto, Ont.	Commenced June 12. Demand for increased wages. Unterminated...	58	1,508
FOODS, TOBACCO AND LIQUORS:—			
Cigarmakers, Toronto and Montreal.	Commenced May 16-20. Employees locked out. Unterminated.....	300	7,800
Cigarmakers, Hamilton, London & Montreal.	Commenced July 10. Employees at Hamilton presented demand for increased wages and one company operating at Hamilton, London and Montreal closed its factories. General strike or lockout unterminated.	287	5,166
	DISPUTES COMMENCING DURING AUGUST, 1918.		
MINES, SMELTERS AND QUARRIES:—			
Coal miners, Brulé, Alta.	Commenced August 21. Demand for better working conditions. Work resumed August 28.	450	2,700
Coal miners, Sydney, N.S.	Commenced August 21. Demand that mine deputies join the Union. Superintendent informed deputies they could join the Union if they so desired. Work resumed August 26.	1,800	10,800
BUILDING AND CONSTRUCTION:—			
Carpenters, Vancouver, B.C.	Commenced August 1. Demand for increased wages and standardization of wages of house carpenters working outside and in shipyards. Settled through mediation of Department of Labour; partial increase granted. Work resumed August 12.	300	2,700
Painters, Vancouver, B.C.	Commenced August 1. Demand for increased wages. Settled by negotiations between the parties; increase granted. Work resumed August 15.	150	1,200
Plumbers and steamfitters, St. Thomas, Ont.	Commenced August 26. For increased wages. Unterminated.....	11	66
METALS, MACHINERY AND CONVEYANCES:—			
Blacksmiths and helpers, Toronto, Ont.	Commenced August 7. For increased wages. Work resumed August 31 upon appointment of Board of Conciliation under Industrial Disputes Investigation Act.	162	3,564
Moulders, St. John, N.B.	Commenced August 17. For increased wages. Settled by negotiations; increases granted. Work resumed August 30.	5	120
WOODWORKING:—			
Millmen, Vancouver, B.C.	Commenced August 1. For increased wages and shorter hours. Settled through mediation of Department of Labour; partial increase granted. Work resumed August 13.	160	1,600
TEXTILES:—			
Textile workers, Hamilton, Ont.	Commenced August 2. Misunderstanding in regard to alleged discharge of an employee. Employees returned under former conditions. Work resumed August 15.	70	700
FOOD, TOBACCO AND LIQUORS:—			
Meat packers, Stratford, Ont.	Commenced August 21. For increase in wages. Increases granted. Work resumed August 23.	39	78
TRANSPORTATION:—			
Freight handlers, Toronto, Ont.	Commenced August 2. Demand for increases in wages and in overtime rates. Men returned upon appointment of Board of Conciliation under Industrial Disputes Investigation Act. Work resumed August 9.	100	650
Street railway employes, Ottawa, Ont.	Commenced August 13. For increased wages and improved conditions. Settled by award of Labour Appeal Board. Partial increase granted. Work resumed August 15.	550	1,100
Teamsters, Montreal, Que.	Commenced August 17. Against dismissal of employee. Settled by negotiations between the parties. Work resumed under former conditions August 22.	200	800
Master mariners and mates, Vancouver and Victoria, B.C.	Commenced August 24. For recognition of the Canadian Merchant Service Guild by the various steamship companies. Settled through mediation of the Dominion Government. Work resumed August 28	425	1,700
Piermen, Inverness, N.S.	Commenced August 16. Misunderstanding concerning foreman who was taken off his regular work. Work resumed August 17.	.....	.....
Wharfmen, Quebec, Que.	Commenced August 1. For increased wages. Unterminated.....	160	4,320
MISCELLANEOUS:—			
Hotel and restaurant employees, Vancouver, B.C.	Commenced August 1. For increased wages. Settled by mediation; partial increases granted. Work resumed August 8.	50	400
Labourers, Winnipeg, Man.	Commenced August 14. For increased wages, shorter hours and recognition of the Union. Unterminated.	45	720

SUMMARY OF REPORTS OF THE "WHITLEY COMMITTEE" ON RELATIONS BETWEEN EMPLOYERS AND EMPLOYED IN THE UNITED KINGDOM

DURING the past year the Sub-Committee on Relations between Employers and Employed (the so-called Whitley Committee), a sub-committee of the Reconstruction Committee of the United Kingdom, have issued a number of reports, some of which have already been discussed in the LABOUR GAZETTE. These reports, which relate to different phases of the question of relationship between employers and workers, will be considered in this article under the various heads to which they are relative.

Joint Standing Industrial Councils Proposed

The August, 1917, issue of the GAZETTE (page 570) contained a summary of an "Interim Report on Joint Standing Industrial Councils." (Cd. 8606), in which the Sub-Committee "recommends that His Majesty's Government should propose without delay to the various associations of employers and employed the formation of Joint Standing Industrial Councils in the several industries where they do not already exist, composed of representatives of employers and employed, regard being paid to the various sections of the industry and the various classes of labour engaged."

The April, 1918, issue of the GAZETTE (page 232) contained a summary of a "Second Report on Joint Standing Industrial Councils" (Cd. 9002) in which the Sub-Committee deals more especially with industries in which organization on the part of employers and employed is less completely established than in the industries covered by the previous report, and with industries in which such organization is weak or non-existent. The Second Report contained the following proposals:

"(a) In the more highly organized industries (Group A.) we propose a triple organization of national, district, and workshop bodies, as outlined in our First Report.

"(b) In industries where there are representative associations of employers and employed, which, however, do not possess the authority of those in Group A industries, we propose that the triple organization should be modified, by attaching to each National Industrial Council one, or at the most two representatives of the Ministry of Labour to act in an advisory capacity.

"(c) In industries in both Groups A and B, we propose that unorganized areas or branches of an industry should be provided, on the application of the National Industrial Council, and with the approval of the Ministry of Labour, with Trade Boards for such areas or branches, the Trade Boards being with the Industrial Council.

"(d) In industries having no adequate organization of employers or employed, we recommend that Trade Boards should be continued or established, and that these should, with the approval of the Ministry of Labour, be enabled to formulate a scheme for an Industrial Council, which might include, in an advisory capacity, the 'appointed members' of the Trade Board."

Adoption of Joint Standing Industrial Councils

The above reports are now followed by a "Memorandum by the Minister of Reconstruction and the Minister of Labour" (Cd. 9085) in which it is stated that the proposals contained in the Interim Report (Cd. 8606) as to the formation of Joint Standing Industrial Councils have been adopted by the Government. The Memorandum, however, goes on to say that it has not been found possible to adopt the whole of the recommendations contained in the Second Re-

port (Cd. 9002). The modifications to these recommendations are set out briefly, as follows:

(1) As regards (b) it has been decided to recognize one type of Industrial Council only, and not to attach official representatives to the Council, except on the application of the Industrial Council itself.

"(2) As regards (c) and (d) the relations between Trade Boards and Industrial Councils raise a number of serious administrative difficulties due to the wide differences in the purpose and structure of the two types of bodies. It is not regarded as advisable that a Trade Board should formulate a scheme for an Industrial Council, nor is it probable that Trade Boards for unorganized areas will be set up in conjunction with a Joint Industrial Council."

The Memorandum then proceeds to point out the fundamental differences between Industrial Councils and Trade Boards as constituted under the Trade Boards Act.* It is pointed out, on the one hand, that a Joint Industrial Council is a voluntary organization created by agreement between employers and organized labour, and that its members are nominated by the people most concerned; and, further, that the activities of these councils cover a very wide range and are concerned with many other matters than wages. On the other hand, it is pointed out that a Trade Board is a statutory body established by the Minister of Labour, and that its expenses are defrayed out of public money; also that its personnel, while probably including representatives of both the employers and workers interested, must also include a number of impartial members, appointed by the Government, who are unconnected with the trade; and, further, that the primary function of a trade board is to fix a minimum rate of wages that are enforceable by criminal proceedings.

The proposal to establish Industrial Councils and Works Committees has already been approved by the British Association of Chambers of Commerce and other great inudstrial organizations; and a plan very similar has been adopted by the Admiralty and the Post Office Department. Further, during the month of July alone, five Joint Industrial Councils were established respectively in the furniture trade, the gold, silver and allied trades, the match manufacturing industry, the rubber industry and the silk industry. Enquiries with regard to the formation of Councils are now proceeding in some thirty other industries; and the Ministry of Reconstruction has formed Interim Reconstruction Committees for about twenty other industries, which may finally develop into Joint Industrial Councils.

Representative opinions

It may be of interest to recapitulate some of the arguments for the adoption of Industrial Councils that have been advanced by representatives of Labour and Capital, and by members of the British Government. It has been said that the modern industrial problem is too large for employers alone; that it demands a co-operative effort on the part of the best brains of Labour as well as of Management and Capital. Such a co-operative effort can best be obtained through the establishment of Industrial Councils in every industry; for an industry knows its own needs better than any government or outside body. An Industrial Council will prepare the way for self-government in each industry. Any persons with ideas regarding the better working of trade, better methods of production, new processes, will have a responsible body to whom they can go. The industry as a whole will have an organization for its own improvement; and the control of that organization will rest, not in the hands of a government department, but with the members of the trade itself.

The State, also, will have a definite advantage, inasmuch as it will have a single organization to approach in all matters relating to a particular industry.

*A summary of the new Trade Boards Act, 1918, appears on page 691 of this issue.

Hitherto, no one body has been in a position to speak with authority as to the needs of a given trade. Industrial Councils will tend to greater simplification and ease of working; the old multiplicity of authorities will disappear and the adjustment of questions between an industry and the Government will be more smoothly and rapidly effected. The Minister of Labour, in discussing this point in an open letter to the leading employers' associations and trade unions in Great Britain, said: "I should now like to explain some of the reasons which have made the Government anxious to see Industrial Councils established as soon as possible in the organized trades. The experience of the war has shown the need for frequent consultation between the Government and the chosen representatives of both employers and workmen on vital questions concerning those industries which have been most affected by war conditions. In some instances different Government departments have approached different organizations in the same industry, and in many cases the absence of joint representative bodies which can speak for their industries as a whole and voice the joint opinion of employers and workmen, has been found to render negotiations much more difficult than they would otherwise have been. The case of the cotton trade, where the industry is being regulated during a very difficult time by a Joint Board of Control, indicates how greatly the task of the State can be alleviated by a self-governing body capable of taking charge of the interests of the whole industry. The problems of the period of transition and reconstruction will not be less difficult than those which the war has created, and the Government accordingly feel that the task of rebuilding the social and economic fabric on a broader and surer foundation will be rendered much easier if in the organized trades there exist representative bodies to which the various questions of difficulty can be referred for consideration and advice as they arise. There are a number of such questions on which the Government will need the united and considered opinion of each large industry, such as the demobilisation of the Forces, the resettlement of munition workers in civil industries, apprenticeship (especially where interrupted by war service), the training and employment of disabled soldiers, and the control of raw materials; and the more it is able to avail itself of such opinion the more satisfactory and stable the solution of these questions is likely to be."

Works Committee Recommended

In the reports already referred to, references were made to the establishment of "Works Committees," representative of both management and workers, and appointed from within the works, as an essential part of the organization suggested.

The May, 1918, issue of the GAZETTE (page 306) contained a summary of a "Supplementary Report on Works Committees" (Cd. 9001) which dealt more fully with the proposal to institute such committees.

A further report, entitled "Works Committees.—Report of an Enquiry made by the Ministry of Labour," containing a summary of the experience available with reference to Works Committees has now been issued. This report—which is based upon enquiries from directors, managers, trade union officials, shop stewards, and others concerned with existing committees—contains particulars of some 20 individual works committees, a summary of a district investigation in the engineering and shipbuilding industries, the constitution of joint timekeeping committees at coal mines and at ironworks, three schemes for district or national arrangements of shop committees or shop stewards, and other material. The July issue of the British *Labour Gazette* summarizes the report, in part, as follows:

The report is divided into seven sections. . . . In Section (3) the forms of constitution are analyzed. Joint committees, at least among committees whose range of functions is not strictly limited,

are comparatively rare. "Even when the committee is a joint committee . . . some provision has generally to be made for separate meetings of the representatives of the workers; and, as a rule, works committees appear to be committees of the workers only, with regular facilities for consultation with the management, either at fixed intervals or whenever occasion arises." Later, in section (5), which deals with functions, it is pointed out that "generally we cannot speak of joint committees, if by joint committees we understand joint executive councils acting by the vote of the majority. On the other hand, there are joint committees, if by joint committees we understand deliberative meetings of both sides, always attended by both sides, though often accompanied by separate meetings of the two sides." The composition of the more usual form of works committee—or of the workpeople's side of a committee which is joint in character—follows a variety of methods of which two are distinguished as the principal methods. One of the two is election "by all the workmen employed, each department or shop being treated as a constituency, and returning a number of members perhaps in proportion to its size"; on the other hand, "the committee may be a committee of the shop stewards of the different unions represented in the works, or, in a large works where shop stewards are numerous, a committee elected by the shop stewards"; this is the second main possibility. In practice the first of these methods commonly results, if the works is strongly trade unionist, in a committee, the members of which are all trade unionists, and also, in large part, shop stewards. Apart from these principal methods of election, others found in practice are election by trade union branches, by the whole of the employees in an establishment voting as one constituency, and by occupations or trades. The report states that "wherever it is possible, a committee of shop stewards or trade union representatives would appear to be the best solution."

Procedure is the subject matter of section (4). Some committees have regular meetings with the management at intervals of a week, a fortnight, or a month; in other cases the meetings are not regular, but are held whenever occasion arises. Arguments for and against regularity of meetings are given, and it is "suggested that the main thing is not so much regularity of meetings as what may be called *the principle of the open door.*" If a works committee is to be successful the position of the officials, in particular that of the secretary, is important; the question of freedom of movement about the works is a contentious matter, but "from the experience of several works . . . it would appear that this freedom of movement is found to be an essential condition of the success of a committee"; the remuneration of the secretary for the time, which may be considerable, spent on committee work, is another problem which is solved in a variety of ways in different establishments. Another question of procedure is concerned with the time of meetings; where there are regular meetings with the management they are commonly held during working hours, and the members are often paid their usual rates for the time spent in attendance. Other aspects of procedure which are touched upon include the method of dealing with grievances, the committees' use of "the referendum" (at shop meetings), and such things as the keeping of minutes, the drawing-up of agenda, and the presentation of complaints in writing. Finally "it is important that the representatives of the firm who meet the committee, or (if it is a joint body), sit on the committee, should belong to the highest rank and should include the general works manager (or, if there is one, the labour superintendent), and one or more of the directors"; the members of the firm as well as the workmen gain from this arrangement.

Under Functions, in section (5) in addition to information as to the subjects actually discussed on works committee, some general problems are dealt

with. "Are these functions always consultative or are they sometimes executive? What, again, are the functions of the management and how far may a works committee trench on these functions?" The answer to the first of these questions is that the functions are practically always consultative; at the same time examples of executive powers are given. The relation of works committees to problems of management is discussed at some length; consultation about the appointment of foremen is already in practice. The report concludes, so far as this question is concerned, in this way: "It has already been mentioned that works committees very often discuss the conduct of foremen. The conclusion then reached that such discussion was a desirable function for a committee would appear to involve as a corollary that of consultation about appointments. This latter function would tend to remove the necessity for the former." The appendices indicate the great range of functions undertaken by works committees; these functions may be connected with, among other matters, wages (*e.g.*, the regulation of piece prices or of a collective bonus scheme), hours, dilution, works organization, discipline, disputes, and welfare.

The next section is concerned with the relations of the works committee with the trade unions. The division of jurisdiction appears to be "that general questions of district or national conditions are left to the trade unions, while the works committee deals with either the detailed application of these general rules within the works or with questions entirely peculiar to the works." While, "on the whole . . . the division of jurisdiction is well understood and closely followed," it is observed that difficulties do arise; there is need for careful definition of a works committee's powers in reference to wages. The number of unions with members in the works may be large—in one example in the appendices the number is 26, and this creates a problem in representation.

In summing up, under General Considerations in section (7) the Report states "that works committees have, in the great majority of cases, tended to introduce greater harmony, and, through it, greater efficiency, is proved by the evidence of those concerned in their working."

Compulsory Arbitration not approved of

The Sub-Committee on Relations between Employers and Employed have also issued a report entitled "Report on Conciliation and Arbitration" (Cd. 9099), which definitely opposes any system of compulsory arbitration. "There is no reason to believe," says the report, "that such a system is generally desired by employers and employed, and, in the absence of such general acceptance, it is obvious that its imposition would lead to unrest. . . . For the same reason we do not recommend any scheme relating to conciliation which compulsorily prevents strikes or lock-outs pending inquiry." The Sub-Committee does not wish to see any elaborate system of conciliation and arbitration imposed upon industry in place of the present well-recognized voluntary machinery which exists in so many of the more important trades. On the contrary, emphasis is placed on the advisability of continuing, as far as possible, the present system whereby industries make their own agreements and settle their differences themselves. The report concludes with the following recommendations:

"Where the parties are unable to adjust their differences we think that there should be means by which an independent inquiry may be made into the facts and circumstances of a dispute, and an authoritative pronouncement made thereon, though we do not think that there should be any compulsory power to delay strikes and lockouts.

"We further recommend that there should be established a standing Arbitration Council for cases where the parties wish to refer any dispute to arbitration, though it is desirable that suitable single arbitrators should be available, where the parties so desire."

REPORTS OF EMPLOYMENT OFFICES

DURING July there was an increase of about 3 per cent in the demand for labour on the basis of the daily average of vacancies notified to 110 employment offices (81 commercial, 17 public and 12 philanthropic). As compared with the demand reported for July of last year by practically identical offices there was a decline of almost 20 per cent. The total number of vacancies notified to all offices in July was 40,843, a daily average of 1570.3, as compared with 1525.3 in June, 1918, and with 1950.7 in July, 1917. The number of persons placed was 20,668, a daily average of 788.9 as compared with averages of 696.2 and 805.6 in the preceding month and in July of last year. The proportion of the total vacancies filled to the total vacancies notified was 50.2 per cent as compared with 45.6 per cent in June and with 41.3 in July, 1917.

As to employment for woman and girl workers, the number of vacancies notified was 5,885, a daily average of 228.5, as compared with 273.7 in June and with 276.9 in July, 1917. The number of such workers placed was 2,549, a daily average of 99.1, as compared with 98.9 in June and with 80.0 in the corresponding month of 1917. The proportion of vacancies filled to vacancies notified for men and boys was 51.8 per cent and for women and girls 43.4 per cent, as compared with 47.6 per cent and 34.0 per cent, respectively, for June, and with 44.2 per cent and 28.6, respectively, for July, 1917.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Toronto alone reported increases in the demand for labour both as compared with June, 1918, and with July, 1917. Montreal, Winnipeg and Vancouver recorded declines in both cases, while at Edmonton there was a decrease in comparison with the preceding month, and an increase in comparison with the same period of last year. Of the smaller centres, Ottawa, Fort William and Port Arthur and Regina all showed increases both as compared with June, 1918, and with July, 1917.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 1,731, a daily average of 66.6, as compared with averages of 86.2 in June and 84.9 in July, 1917. The number of casual jobs secured was 4,485, a daily average of 172.5, as compared with averages of 191.2 in the preceding month and 161.1 in July of last year.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed a decline during August as compared with the previous month, the total value of building permits falling from $5,863,834 in July to $5,018,092 in August, a decrease of $845,742, or 14.4 per cent. All the provinces except New Brunswick, Ontario and Alberta showed increases. As compared with the corresponding month of 1917, there was a gain of 55.2 per cent, the value for August, 1917, being $3,233,922. In this comparison New Brunswick was the only province to indicate a decline, while especially noteworthy gains were recorded in Nova Scotia, Alberta and British Columbia.

Of the larger cities, Montreal-Maisonneuve, Winnipeg and Vancouver reported increases both as compared with the preceding month and with August, 1917, while at Toronto there was a decline in comparison with July, but a gain over August of last year. Of the smaller centres, Halifax, Brantford, Hamilton, Regina and Calgary, all showed large increases in both comparisons.

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

City.	July, 1918	August, 1918	August, 1917	August, 1918, compared with July, 1918 Increase (+) Decrease (—) Amount	Per cent	August, 1918, compared with August, 1917 Increase (+) Decrease (—) Amount	Per cent

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

REPORTS from fifteen cities showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in August showed a decrease of not quite 1 per cent in the number of workers and an inconsiderable increase in the wages paid in comparison with July. In August, 1918, 7,757 persons were temporarily engaged in the two weeks, and the pay-rolls amounted to $290,503.95 as compared with 7,832 employees and an aggregate pay-roll of $290,475.67 in July. In comparison with the same period of last year, declines of about 20 per cent in the number of persons engaged and of slightly over 4 per cent in the wages paid, are indicated, there being 9,702 employees with a total pay-roll of $302,515.00 in the first two weeks in August, 1917.

Montreal, Ottawa, Toronto, Winnipeg and Calgary reported increases in the number of employees as compared with July, while in comparison with August, 1917, Regina alone showed a gain. As to wages, at Toronto, Saskatoon, Calgary and Vancouver, the pay-rolls were larger than in July, 1918, and in only six cities—Toronto, London, Saskatoon, Calgary, Edmonton and Vancouver—were they smaller than in August, 1917. This increase over last year is not entirely due to civic employment being more permanent last month, but also to increases in the rates of wages paid by several cities.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS. AUGUST 1918, COMPARED WITH JULY, 1918, AND WITH AUGUST, 1917.

FAIR WAGES CONTRACTS, AUGUST, 1918

DURING August the Department of Labour received for insertion in the LABOUR GAZETTE information relative to 19 fair wage contracts, 16 of which were awarded by the Department of Public Works, and the remaining three by the Department of Railways and Canals. All but two of the contracts contained the usual fair wage clause, a fair wage schedule being contained in the other two.

DEPARTMENT OF PUBLIC WORKS. — Repairs and placing additional ballast in No. 7 wharf, St. John Harbour, West St. John, N.B. Name of contractors, J. E. Kane & W. R. Ring, St. John, N.B. Date of contract, August 28, 1918. Amount of contract, unit prices.

DEPARTMENT OF PUBLIC WORKS. — Construction of Detention Cell Building, Mellville Island, Halifax, N.S. Name of contractors, M. E. Keefe Construction Company, Ltd., Halifax, N.S. Date of contract, August 27, 1918. Amount of contract, $5,858.00.

DEPARTMENT OF PUBLIC WORKS. — Electric wiring at Orthopaedic Hospital, Toronto, Ont. Name of contractors, Harris & Marson Electric Company, Toronto, Ont. Date of contract, August 21, 1918. Amount of contract, $19,-219.37.

DEPARTMENT OF PUBLIC WORKS. — Heating and plumbing at Orthopaedic Hospital, Toronto, Ont. Name of contractors, Purdy, Mansell, Ltd., Toronto, Ont. Date of contract, August 21, 1918. Amount of contract, $79,044.00.

DEPARTMENT OF PUBLIC WORKS. — Construction of Military Garage, Toronto, Ont. Name of contractor, Wm. Williamson, Toronto, Ont. Date of contract, August 15, 1918. Amount of contract, $13,405.00.

DEPARTMENT OF PUBLIC WORKS. — Supply and delivery of special castings, flanged, for Quarantine Station, William Head, B.C. Name of contractors, Canada Iron Foundries, Ltd., Montreal, Que. Date of contract, July 29, 1918. Amount of contract, per net ton, $220.00.

DEPARTMENT OF PUBLIC WORKS. — Supply and delivery of special castings hub and spigot for Quarantine Station, William Head, B.C. Name of contractors, Canada Iron Foundries, Ltd., Montreal, Que. Date of contract, July 29, 1918. Amount of contract, per net ton, $170.00.

DEPARTMENT OF PUBLIC WORKS. — Dredging in the Eastern Channel, River St. Maurice, Three Rivers, Que. Name of contractors, The Laurin & Leitch Engineering & Construction Company, Ltd., Montreal, Que. Date of contract, July 27, 1918. Amount of contract, Class "A," $4.00 per cu. yd.; Class "B," $0.18½ per cu. yd.

DEPARTMENT OF PUBLIC WORKS. — Interior fittings in Military Hospital Building, Ste. Anne de Bellevue, Que. Name of contractors, Jas. Davidson's Sons & Grant Powley Davidson, Ottawa, Ont. Date of contract, August 15, 1918. Amount of contract, $11,665.00.

DEPARTMENT OF PUBLIC WORKS. — Heating of Recreation and Vocational Building, Military Hospital, Fredericton, N.B. Name of contractors, D. J. Shea & Son, Fredericton, N.B. Date of contract, August 9, 1918. Amount of contract, $5,814.00.

DEPARTMENT OF PUBLIC WORKS. — Heating apparatus and plumbing in County Military Hospital, St. John,

N.B. Name of contractor, R. E. Fitzgerald, St. John, N.B. Date of contract, August 10, 1918. Amount of contract, $6,780.00.

DEPARTMENT OF PUBLIC WORKS. — Electrical wiring to Recreation & Vocational Building (Military Hospital), Fredericton, N.B. Name of contractors, The Vaughan Electric Company, Ltd., St. John, N.B. Date of contract, August 8, 1918. Amount of contract, $2,475.00.

DEPARTMENT OF PUBLIC WORKS. — Supply and delivery of all necessary cast iron pipes required to complete water service at Quarantine Station, William Head, B.C. Name of contractors, National Iron Corporation, Ltd., Toronto, Ont. Date of contract, July 29, 1918. Amount of contract, per net ton of cast iron pipes supplied and delivered, $87.50.

DEPARTMENT OF PUBLIC WORKS. — Construction of Temporary Barracks, Halifax (North Common), N.S. Name of contractors, Bate, McMahon Maritime Company, Ltd., Ottawa, Ont. Date of contract, August 13, 1918. Amount of contract, $169,900.00.

DEPARTMENT OF PUBLIC WORKS. — Repairs to pier, Burlington Channel, Ont. Name of contractors, J. W. McAllister & J. Taylor, Hamilton, Ont. Date of contract, August 22, 1918. Amount of contract, unit prices.

Trade or Class of Labour	Rates of Wages. Not less than the following rate:
Carpenters	60 cents per hour, 8 hours per day.
Blacksmith	40 cents per hour, 9 hours per day.
Blacksmiths' helpers	35 cents per hour, 9 hours per day.
Ordinary labourers	35 cents per hour, 9 hours per day.
Driver with 1 horse and cart	$4.50 per day of 10 hours.
Driver with 2 horses and wagon	$6.00 per day of 10 hours.

DEPARTMENT OF PUBLIC WORKS. — Construction of new Dominion Government Office Building, Ottawa, Ont. Name of contractors, Bate, McMahon Co., Ltd., Ottawa, Ont. Date of contract, August 13, 1918. Amount of contract, $1,000,969.00.

Carpenters are asking 55 cents, which will probably be established, the Corporation of Ottawa having granted this rate.

DEPARTMENT OF RAILWAYS AND CANALS. — Construction of twenty-one section houses on the Transcontinental Railway of the Canadian Government Railways between Moncton, on the Eastern Lines, and Graham, on the Western Lines. Name of contractors, Doran & Devlin, Ottawa, Ont. Date of contract, August 17, 1918. Amount of contract, $82,748.00.

DEPARTMENT OF RAILWAYS AND CANALS. — Construction of fourteen single section houses, C.G.R. type, and five double cottages, C.G.R. type, on the Transcontinental Railway of the Canadian Government Railways (Western Lines) between Graham and Winnipeg and on the Lake Superior Branch. Name of contractors, Doran & Devlin, Ottawa, Ont. Date of contract, August 21, 1918. Amount of contract, $96,800.00.

DEPARTMENT OF RAILWAYS AND CANALS. — Construction of concrete baffle on the sea wall approach to the car ferry landing at Port Borden, P.E.I. Name of contractors, Lynch, Peckman & Gorman, Cape Tormentine, County of Westmorland, N.B. Date of contract, August 21, 1918. Amount of contract, $7.00 per cu. yd. of concrete placed and cost plus 10 per cent for certain other work.

POST OFFICE DEPARTMENT. — The following is a statement of payments made in July for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions:

Nature of Orders.	Amount of Orders
Repairing mail bags	$1,345.57
Supplying mail bag fittings	4,366.35
Supplying stamping material	560.13
Making and repairing rubber stamps	14.87
Making metal dating stamps and type and making other hand stamps and brass crown seals	848.21
Repairing scales	43.50
Repairing mail clerk's tin boxes and steel portable boxes	71.50
Making and supplying articles of official uniforms	11,788.97
Repairing parcel post hampers	16.55
Repairing miscellaneous articles of postal stores	43.55

FURTHER REGULATIONS AFFECTING WESTERN COAL MINES*

IN accordance with the findings of the Commission appointed to inquire every four months into the cost of living in western coal fields, Mr. W. H. Armstrong, the Director of Coal Operations for the mines in southeastern British Columbia and southwestern Alberta, has ordered that all employees of the coal mines in District 18 shall receive an increase of wages of 25 cents per day, dating from August first.

During the month a dispute arose at the Kipp mines of the North American Collieries, Ltd., Coalhurst, regarding the contract rate for the erection of timber for ribbing in stump other than of size 4 inches by 6 inches, for which the rate is 24 cents per set. The Director has ordered that when round timber is used in this work, 48 cents per set shall be paid; also that when 3 inch by 5 inch sets are used the rate of 15 cents per set shall apply. These rates were made retroactive from April first.

A dispute arose at the mines of the Hillcrest Collieries, Ltd. The employees claimed that for driving a new air course they should be paid at counter entry rates, instead of at gangway prices. The Director ordered that in this particular case counter rates should apply, but that deductions should be made for the cubic contents of the cross cut which had already been driven.

In connection with a dispute at the Bellevue Mines of the West Canadian Collieries, Ltd., regarding payment for drawing pillars where a barrier is left to support an adjoining entry, the Director ordered that as such a condition entails more work than ordinarily obtains in drawing pillars, the rate of 56 cents per ton shall be paid instead of the usual rate of 52 cents. This rate was made retroactive from April first.

In connection with a previous order in reference to machine mining at the Pembina mine of the North American Collieries, Evansburgh, Alberta, the Director has now ordered that in the clause relating to runners and runners' helpers the words "where places ordered driven over 12 feet and under 20 feet—yardage to be paid proportionately less" shall be eliminated; also that in addition to the differential of 13½ per cent for Jeffery machine runners and helpers, the same shall apply to the

*See August issue, 1918, page 635, and various preceding issues.

Sullivan iron clad machine, No. C.E. 7. Under the head of loaders' narrow work, the clause yardage is eliminated and the following substituted: "Yardage 72 cents per yard. If gobbing is ordered to be loaded out in cars, to be paid at the rate of 60½ cents per cut or 60½ cents shall be paid for gobbing a 6 foot cut."

The employees of the Bankhead mine complained of the rate being paid for contract work in B level cross cuts in No. 2 seam. These cross cuts were being driven ten feet wide instead of eight feet as provided for in the Tentative Agreement. The Director was of the opinion that a rate should be established for this class of work and decided that the rate for ten foot cross cuts shall be $7.07 per lineal yard. This decision, however, is not to be considered as setting a precedent.

Certain employees working in No. 0000 seam at the Bankhead mine complained regarding the rate paid for breasts that have been narrowed from the usual width of 20 feet down to 10 feet. The men contended that at these places they should be paid the chute rate, which is $4.24 per lineal yard. The Director upheld the men in their contention and ordered that the $4.24 rate shall be paid in breasts where same have been narrowed down to ten feet.

In the Drumheller coal field the Director has ordered that the following pick mining rates shall be in effect up to March 31, 1919:—Run of mine: entry cross cuts, room necks and room cross cuts, 97 cents per ton; yardage, $1.21 per lineal yard; rooms and pillars, 97 cents per ton. Screened coal: entry cross cuts, room necks and room cross cuts, $1.25 per ton; yardage, $1.21 per lineal yard; rooms and pillars, $1.25 per ton.

AMENDMENTS TO THE McADOO AWARD IN THE UNITED STATES

THE June issue of the GAZETTE (pages 432-439) printed the greater part of the text of General Order No. 27 of the Director General of Railroads—now generally known as the McAdoo Award—fixing wages of railroad employees in the United States. There were named in the General Order 165 railroads to which the Order would immediately apply, and it was stated that "such other railroads as may be retained in Federal Control on July 1, 1918," would be subsequently added by order to the list. It was also stated that the Pullman Company would be added, if it should be decided to retain it in Federal Control.

Since the Order was promulgated, amendments to it have been made in the form of supplementary orders, and this article deals with the four supplementary orders to the General Order, which have been passed up to the present time.

Supplementary Orders

Supplementary Order No. 1 provides that for positions created since December, 1915, and for wage increases granted by arbitration since that date, the wages will be readjusted so as to conform to the basis established in the McAdoo Award for positions of similar scope or responsibility.

Supplementary Order No. 2 provides that the McAdoo Award shall apply to the operating department of the Pullman Company, except that on account of the peculiar character of the employment of conductors, porters, and maids, it is impracticable to apply a basic eight-hour day to such service. With respect to conductors, porters and maids, therefore, it is ordered that wage increases shall be upon the monthly wages basis given in section A, but that the basic eight-hour day shall not be applicable thereto.

Supplementary Order No. 3 names 382 additional railroads in the United

States to which the McAdoo Award shall apply.

Supplementary Order No. 4, which provides minimum rates and wage increases for employees of the mechanical departments of the railroads, supersedes the rates, increases and other conditions established by the General Order for this class of employees. The minimum rates, etc., specified in the Supplementary Order may be summarized as follows:

1. Machinists, boilermakers, blacksmiths, sheet metal workers, moulders and first-class electrical workers, 68 cents per hour.

2. Car men and second-class electrical workers, 58 cents per hour.

3. Helpers, 45 cents per hour.

4. Foremen, paid on hourly basis, 5 cents per hour more than respective crafts.

5. Foremen, paid on monthly basis, increases $40.00 per month, minimum $155 and maximum $250.

6. New rates are retroactive to January 1, 1918.

7. Beginning August 1, 1918, eight-hour day, with time and one-half for overtime, Sunday work, and seven specified holidays.

8. Payments of back pay will be made just as soon as they can be calculated.

The full text of the Supplementary Order follows:

Text of Supplementary Order No. 4

In the matter of wages, hours and other conditions of employment of employees in the mechanical department (specified herein) of the railroads under Federal control, it is hereby ordered:

ARTICLE I.—CLASSIFICATION OF EMPLOYEES.

SECTION 1. Machinists.—Employees skilled in the laying out, fitting, adjusting, shaping, boring, slotting, milling, and grinding of metals used in building, assembling, maintaining, dismantling, and installing locomotives and engines (operated by steam or other power), pumps, cranes, hoists, elevators, pneumatic and hydraulic tools and machinery, scale building, shafting and other shop machinery; ratchet and other skilled drilling and reaming, tool and die making, tool grinding and machine grinding, axle, wheel and tire turning and boring; engine inspecting; air equipment, lubricator and injector work; removing, replacing, grinding, bolting and breaking of all joints on superheaters, oxy-acetylene, thermit and electric welding on work generally recognized as machinists' work; the operation of all machines used in such work, including drill presses and bolt threaders using a facing, boring, or turning head or milling apparatus, and all other work generally recognized as machinists' work.

1 (a). Machinist apprentices.—Include regular and helper apprentices in connection with the above work.

1 (b). Machinist helpers.—Employees assigned to help machinists and apprentices. Operators of all drill presses and bolt threaders not equipped with a facing, boring or turning head or milling apparatus, bolt pointing and centering machines, wheel presses, bolt threaders, nut tappers and facers; cranemen helpers, tool-room attendants, machinery oilers, box packers and oilers; the applying of couplings between engines and tenders, locomotive tender and draft rigging work, except when performed by carmen.

SECTION 2. Boilermakers.—Employees skilled in laying out, cutting apart, building or repairing boilers, tanks and drums, inspecting, patching, riveting, chipping, caulking, flanging, and flue work; building, repairing, removing and applying steel cabs and running boards; laying out and fitting up any sheet iron or sheet steel work made of 16 gauge or heavier, including fronts and doors; grate and grate rigging, ash pans, front and netting and diaphragm work engine tender steel underframe and steel tender truck frames, except where other mechanics perform this work; removing and applying all stay bolts, radials, flexible caps, sleeves, crown bolts, stay rods and braces in boilers, tanks and drums, applying and removing arch pipes; operating punches and shears for shaping and forming, pneumatic stay bolt breakers, air rams and hammers; bull, jam and yoke riveters; boilermakers' work in connection with building and repairing of steam shovels, derricks, booms, housings, circles and coal buggies; eyebeam, channel iron, angle iron and tee iron work; all drilling, cutting and tapping, and operating rolls in connection with boilermakers' work; oxy-acetylene, thermit and electric welding, on work generally recognized as boilermakers' work; and all other work generally recognized as boilermakers' work.

2 (a). Boilermaker apprentices.—Include regular and helper apprentices in connection with the above.

2 (b). Boilermaker helpers.—Employees assigned to help boilermakers and their apprentices. Operators of drill presses and bolt cutters in the boiler shop, punch and shear operators (cutting only bar stock and scrap).

SECTION 3. Blacksmiths.—Employees skilled in welding, forging, shaping, and bending of metal; tool dressing and tempering; spring making, tempering, and repairing; potashing, case and bichloride hardening; flue welding under blacksmith foreman; operating furnaces,

bulldozers, forging machines, drop-forging machines, bolt machines, and Bradley hammers; hammersmiths, drop hammermen, trimmers, rolling mill operators; operating punches and shears doing shaping and forming in connection with blacksmiths' work; oxy-acetylene, thermit and electric welding on work generally recognized as blacksmiths' work, and all other work generally recognized as blacksmiths' work.

3 (a). Blacksmith apprentices.—Include regular and helper apprentices in connection with the above.

3 (b). Blacksmith helpers.—Employees assigned to helping blacksmiths and apprentices; heaters, hammer operators, machine helpers, drill-press and bolt-cutter operators, punch and shear operators (cutting only bar stock and scrap), in connection with blacksmiths' work.

SECTION 4. Sheet metal workers.—Sheet metal workers shall include tinners, coppersmiths, and pipe fitters employed in shop yards and buildings and on passenger coaches and engines of all kinds, skilled in the building, erecting, assembling, installing, dismantling and maintaining parts made of sheet copper, brass, tin, zinc, white metal, lead, and black planished and pickeled iron of less than 16 gauge, including brazing, soldering, tinning, leading, and babbitting; the bending, fitting, cutting, threading, brazzing, connecting, and disconnecting of air, water, gas, oil, and steam pipes; the operation of babbitt fires and pipe-threading machines; oxy-acetylene, thermit, and electric welding on work generally recognized as sheet metal workers' work, and all other work generally recognized as sheet metal workers' work.

4 (a). Sheet metal worker apprentices.—Include regular and helper apprentices in connection with the above.

4 (b). Sheet metal worker helpers.—Employees regularly assigned as helpers to assist sheet metal workers and apprentices.

SECTION 5. Electrical workers, first-class.—Employees skilled in repairing, rebuilding, installing, inspecting, and maintaining the electric wiring of generators, switchboards, motors and control, rheostats and control, static and rotary transformers, motor generators, electric headlights and headlight generators; electric welding machines, storage batteries and axle lighting equipment; pole lines and supports for service wires and cables, catenary and monorail conductors and feed wires, overhead and underground; winding armatures, fields, magnet coils, rotors, stators, transformers and starting compensators; all outside and inside wiring in shops, yards, and on steam and electric locomotives, passenger train and motor cars, and include wiremen, armature winders, switchboard operators, generator attendants, motor attendants, sub-station attendants, electric crane operators for cranes of 40 tons capacity or over; cable splicers, linemen and groundmen, signalmen and signal maintainers, where handling wires and apparatus carrying 240 volts or over, or in dense traffic zones, and all other work properly recognized as first-class electrical workers' work.

5 (a). Electrical workers, second class.—Operators of electric cranes of less than 40 tons capacity; linemen and groundmen, signalmen and signal maintainers, where handling wires and apparatus carrying less than 240 volts, and in normal traffic zones, and all other work properly recognized as second-class electrical workers' work.

5 (b). Electrical worker apprentices.—Include regular and helper apprentices in connection with the above.

5 (c). Electrical worker helpers.—Employees regularly assigned as helpers to assist electrical workers and apprentices, including electric lamp trimmers who do no mechanical work.

SECTION 6. Carmen.—Employees skilled in the building, maintaining, dismantling, painting, upholstering, and inspecting of all passenger and freight train cars, both wood and steel; planing mill, cabinet and bench carpenter work, pattern and flask making, and all other carpenter work in shop and yards; carmen's work in building and repairing motor cars, lever cars, hand cars, and station trucks; building, repairing, removing, and applying locomotive cabs, pilots, pilot beams, running boards, foot and headlight boards, tender frames and trucks; pipe and inspection work in connection with air-brake equipment on freight cars; applying patented metal roofing; repairing steam-heat hose for locomotives and cars; operating punches and shears doing shaping and forming, hand forges and heating torches, in connection with carmen's work; painting, varnishing, surfacing, lettering, decorating, cutting of stencils and removing paint; all other work generally recognized as painters' work under the supervision of the locomotive and car departments; joint car inspectors, car inspectors, safety appliance, and train-car repairers, wrecking derrick engineers, and wheel-record keepers; oxy-acetylene, thermit and electric welding on work generally recognized as carmen's work; and all other work generally recognized as carmen's work.

6 (a). Carmen apprentices.—Include regular and helper apprentices in connection with the above.

6 (b). Carmen helpers.—Employees regularly assigned to help carmen and apprentices; car oilers and packers, material carriers, and rivet heaters; operators of bolt threaders, nut tappers, drill presses, and punch and shear operators (cutting only bar stock and scrap).

SECTION 7. Moulders.—Include moulders, cupola tenders, and core makers.

7 (a). Moulder apprentices.—Include regular and helper apprentices in connection with the above.

7 (b). Moulder helpers.—Employees regularly assigned to help moulders, cupola tenders, core makers and their apprentices.

ARTICLE II.—RATES AND METHOD OF APPLICATION.

SECTION 1. For the above classes of employees (except carmen, second-class electrical workers, and all apprentices and helpers), who have had four or more years' experience and who were on January 1, 1918, receiving less than 55 cents per hour, establish basic minimum rate of 55 cents per hour, and to this basic minimum rate and all other hourly rates of 55 cents per hour and above, in effect as of January 1, 1918, add 13 cents per hour, establishing a minimum rate of 68 cents per hour.

1 (a). For carmen and second-class electrical workers who have had four or more years' experience and who were on January 1, 1918, receiving less than 45 cents per hour, establish a basic minimum rate of 45 cents per hour, and to this minimum basic rate and all other hourly rates of 45 cents and above, in effect as of January 1, 1918, add 13 cents per hour, establishing a minimum rate of 58 cents per hour.

1 (b). Rates of compensation exceeding the minimum rates established herein to be preserved; the entering of employees in the service or the changing of their classification or work shall not operate to establish a less favourable rate or condition of employment than herein established.

1 (c). The Director General recognizes that the minimum rates established herein may be exceeded in the case of men of exceptional skill, who are doing special high-grade work, which has heretofore enjoyed a differential. Such cases would include pattern makers, passenger car repair men, oxy-acetylene, thermit, and electric welding in car-repair work, etc., and should be presented to the Board of Railroad Wages and Working Conditions for recommendation as provided in General Order No. 27.

SECTION 2. The above classes of employees (except carmen, second-class electrical workers, and all apprentices and helpers) who have had less than four years' experience in the work of their trade will be paid as follows:

(a) One year's experience or less, 50 cents per hour.
(b) Over one year and under two years' experience, 53 cents per hour.
(c) Over two years' and under three years' experience, 57 cents per hour.
(d) Over three years' and under four years' experience, 62 cents per hour.

2 (a). Carmen and second-class electrical workers who have had less than four years' experience in the work of their trade will be paid as follows:

(a) One year's experience or less, 48½ cents per hour.
(b) Over one year and under two years' experience, 50½ cents per hour.
(c) Over two years' and under three years' experience, 52½ cents per hour.
(d) Over three years' and under four years' experience, 54½ cents per hour.

2 (b). If retained in the service after the expiration of the four-year period the employees mentioned in section 2 and section 2 (a) shall receive the respective minimum of their craft.

ARTICLE III.

SECTION 1. Regular apprentices between the ages of 16 and 21, engaging to serve a four-year apprenticeship, shall be paid as follows: Starting-out rate and for the first six months, 25 cents per hour, with an increase of 2½ cents per hour for each six months thereafter up to and including the first three years; 5 cents per hour increase for the first six months of the fourth year, and 7½ cents per hour for the last six months of the fourth year.

1 (a). If retained in the service after the expiration of their apprenticeship, apprentices in the respective trades shall receive not less than the minimum rate established for their craft.

SECTION 2. Helpers in the basic trades herein specified will be paid 45 cents per hour.

SECTION 3. Helper apprentices will receive the minimum helper rate for the first six months, with an increase of 2 cents per hour for every six months thereafter until they have served three years.

3 (a). Fifty per cent of the apprentices may consist of helpers who have had not less than two consecutive years' experience in their respective trades in the shop on the division where advanced. In the machinist, sheet metal worker, electric and moulder trades, the age limit for advancement will be 25 years; in the boilermaker, blacksmith and carmen trades, 30 years.

SECTION 4. In the locomotive and car departments gang foremen or leaders and all men in minor supervisory capacity and paid on an hourly basis will receive 5 cents per hour above the rates provided for their respective crafts.

SECTION 5. The supervisory forces of the locomotive and car departments, paid on a monthly basis and exercising supervision over the skilled crafts, will be paid an increase of $40 per month in addition to the monthly rate as of January 1, 1918, with a minimum of $155 per month and a maximum of $250 per month.

ARTICLE IV.—GENERAL APPLICATION.

SECTION 1. Each railroad will, in payments to employees on and after July 1, 1918, include these increases therein.

1 (a). The increases in wages and the rates established herein shall be effective as of January 1, 1918, and are to be paid according to the time served to all who were then in the railroad service or who have come into such service since and remained therein. A proper

rateable amount shall also be paid to those who for any reason since January 1, 1918, have been dismissed from the service, but shall not be paid to those who have left it voluntarily. Men who have left the railroad service to enter the military service of the Army or Navy shall be entitled to the pro rata increase accruing on their wages up to the time they left, and the same rule shall apply to those who have been transferred from one branch of the railroad service or from one road to another.

SECTION 2. The hourly rates named herein are for an eight-hour day and one and one-half time will be paid for all overtime, including Sundays and the following holidays: New Year's Day, Washington's Birthday, Decoration Day, Fourth of July, Labour Day, Thanksgiving and Christmas.

SECTION 3. While the specific rates per hour named herein will be retroactive to January 1, 1918, the special overtime provisions established in section 2 of this Article will be effective as of August 1, 1918, with the provision that in computing overtime to determine back pay to January 1, 1918, overtime will be paid at a pro rata rate for all overtime worked in excess of the hours constituting the recognized day or night shift, except where higher overtime rate basis exists, or has been applied, in which event the more favourable condition shall be the basis of computing back pay accruing from this order.

SECTION 4. Employees, except monthly salaried employees, coming within the scope of this order, sent out on the road for emergency service, shall receive continuous time from the time called until their return, as follows: Overtime rates for all overtime hours whether working, waiting, or travelling, and straight time for the recognized straight time hours at home station, whether working, waiting or travelling, except that after the first 24 hours, if the work is completed or they are relieved for 5 hours or more, such time shall not be paid for, provided that in no case shall an employee be paid for less than 8 hours on week days and 8 hours at one and one-half time for Sundays and holidays for each calendar day. Where meals and lodging are not provided by the railroad, an allowance will be made for each meal or lodging. Employees will receive allowance for expenses not later than the time when they are paid for the service rendered.

SECTION 5. Employees specified herein when sent from home point to temporarily fill vacancy or perform work at outside division points, will be paid straight time and overtime rates as per shop rules, including going and return trip, in addition to which they will be paid pro rata at the rate of $2 per day for meals and lodging.

SECTION 6. Carmen stationed at points requiring only one employee on day shift or night shift, or day and night shifts, shall be paid 8 hours at not less than the hourly rate provided herein.

SECTION 7. Mechanics now regularly assigned to perform road work and paid on a monthly basis shall be paid for 8 hours at not less than the hourly rate provided herein.

SECTION 8. Employees on a piecework basis shall receive not less than the minimum rate per hour awarded to the hourly workers, including time and one-half for overtime, as hereinbefore provided; otherwise piecework rates provided in General Order No. 27 shall apply.

SECTION 9. The application of this order shall not, in any case, operate to establish a less favourable wage rate than in effect January 1, 1918.

ARTICLE V.—PAYMENTS FOR BACK TIME.

SECTION 1. As promptly as possible the amount due in back pay from January 1, 1918, in accordance with the provisions of this order will be computed and payment made to the employees, separately from the regular monthly payments, so that employees will know the exact amount of these back payments.

SECTION 2. Recognizing the clerical work necessary to make these computations for back pay, and the probable delay before the entire period can be covered, each month, beginning with January, shall be computed as soon as practicable, and, as soon as completed, payments will be made.

ARTICLE VI.—INTERPRETATION OF THIS ORDER.

SECTION 1. Railway Board of Adjustment No. 2 is authorized by Article IX of General Order No. 27 to perform the following duty:

"Wages and hours, when fixed by the Director General, shall be incorporated into existing agreements on the several railroads, and should differences arise between the managements and the employees of any of the railroads as to such incorporation, such question of difference shall be decided by the Railway Board of Adjustment No. 2 when properly presented, subject always to review by the Director General."

SECTION 2. In addition to the foregoing, other questions arising as to the intent or application of this order in respect to the classes of employees within the scope of Railway Board of Adjustment No. 2 shall be submitted to such Board, which Board shall investigate and report its recommendations to the Director General.

SECTION 3. All rates applied under this order shall be filed by the Regional Directors with the Board of Railroad Wages and Working Conditions.

SECTION 4. The rates, increases and other conditions of employment herein established for the classes of employees herein specified shall supersede the rates, increases and other conditions established by General Order 27, except as provided in section 8, Article IV.

In reaching the conclusions upon which this order is based, I have been keenly conscious not alone of the interests of the large number of railway employees who are greatly benefited thereby, but also of my solemn duty to the American people to see to it that the trust they have committed to me is discharged faithfully, with justice to them as well as to the railroad employees concerned. No right decision can be made which considers only the demands and interests of any class of men apart from the paramount interests of the public and the supreme necessity of winning this war.

Now that the decision has been made, the American people, whose servants we are, expect every railroad employee to devote himself with new energy to his work, and by faithful and efficient service to justify the large increases of pay and the improvement in working conditions hereby granted. The American people have a right to expect this, and they will be content with nothing less.

It is of the utmost importance that motive power and cars shall be kept in repair and that the output of railroad shops throughout the country shall be greatly increased in the future. Unless this is done, the railroads can not efficiently perform the increased duties imposed upon them by the war, and the fighting power of our armies in France and of our navies on the high seas will be seriously impaired.

I am proud of the loyal service the great body of railroad men throughout the country have rendered to their Government since the railroads have come under Federal control. It is a genuine pleasure to make this acknowledgement, but I should not fail to say at the same time that there are instances where agitations and disturbances in some of the locomotive and car shops have been extremely hurtful to the country. The loyal and patriotic employees, who constitute the great majority of the army of railroad workers, have not yielded, be it said to their credit and honour, to these disturbances. But the few who have, have done their country a grievous injury by impairing the efficiency and reducing the output of the shops where these disturbances have occurred.

The loyal and patriotic employees can render a new and powerful service to their country by using their influence to expose any who may become slackers in their work, by co-operating with their officers in the enforcement of discipline, and by increasing, to the utmost limit of their capacity, the output of locomotives and cars which are so essential to the efficient operation of the railroads of the country and to the success of our armies in the field. I know I can count on the patriotism and devotion to duty of every true American engaged in the railway service of the United States.

(Sgd.) W. G. McADOO,
Director General of Railroads.

Application of McAdoo Award to Canadian Railways

On page 615 of the August issue of the GAZETTE it was stated that the application of the McAdoo Award to various Canadian railways had been decided upon. The following is a list of the Canadian railways to which it is understood the McAdoo Award and its amendments will apply:

Alberta Great Waterways.
Algoma Central & Hudson Bay.
Algoma Eastern.
Atlantic, Quebec & Western.
Berlin, Waterloo, Wellesley & Lake Huron.
Brandon, Saskatchewan & Hudson Bay. (Great Northern).
British Columbia Electric.
Canada & Gulf Terminal.
Canada Southern (Michigan Central).
Canadian Government (Intercolonial).
Canadian Northern.
Canadian Pacific.
Cape Breton.
Central Vermont.
Crow's Nest Southern (Great Northern).
Cumberland Railway & Coal Company.
Dominion Atlantic.
Eastern British Columbia.
Edmonton, Dunvegan & British Columbia.
Esquimault & Nanaimo.
Essex Terminal.
Fredericton & Grand Lake.
Grand Trunk.
Grand Trunk Pacific.
Hereford.
Intercolonial of New Brunswick (Canadian Government).
Kettle Valley.
Lake Erie & Northern.
London & Port Stanley.
Maine Central.
Manitoba Great Northern (Great Northern).
Massawippi Valley (Boston & Maine).
Montreal & Atlantic (Canadian Pacific).
Montreal & Southern Counties.
Morissey, Fernie & Michel (Great Northern).
Midland of Manitoba (Great Northern).

Napierville Junction.
National Transcontinental (Canadian Government).
Nelson & Fort Sheppard (Great Northern).
New Brunswick & Prince Edward Island (Canadian Government).
New Westminster & Southern (Great Northern).
Northern New Brunswick & Seaboard.
Ottawa & New York.
Pere Marquette.
Phillipsburg Railway & Quarry Co.
Quebec Central.
Quebec, Montreal & Southern.
Quebec & Oriental.
Quebec Railway, Light & Power Co.
Red Mountain (Great Northern).
Roberval & Saguenay.
St. Lawrence & Adirondack.
Sydney & Louisburg.
St. John & Quebec (Canadian Government).
Temiscouata.
Temiskaming & Northern Ontario.
Toronto, Hamilton & Buffalo.
Vancouver, Victoria & Eastern (Great Northern).
Victoria & Sydney (Great Northern).
Wabash.
Bedlington & Nelson (Great Northern).
Lotbiniere & Megantic.

DECISION OF THE WAR LABOUR BOARD OF THE UNITED STATES IN THE CASE OF THE BETHLEHEM STEEL COMPANY

THE recent decision of the War Labour Board in the dispute between the Bethlehem Steel Company and its employees is in many respects the most important and far-reaching decision that has yet been made by the Board. It grants to workers the right to organize and to bargain collectively; it orders the revision or complete elimination of the bonus system, so strenuously defended by the company, until now in operation at the plant; it orders the revision of piecework rates, and the establishment of a minimum hourly wage rate for some 5,000 machine shop workers; it applies the basic eight-hour day, with time and a half pay for all overtime, and double time pay for Sundays and holidays, and provides for just overtime pay to piece-workers; it stipulates that men and women shall receive the same rate of pay for the same work, and that women shall not be allotted tasks beyond their strength. The decision affects nearly 28,000 workers.

A new and additional feature in the machinery for adjusting disputes between employers and workers is provided in the appointment of an "Examiner," or arbitration administrator, whose duty it will be to supervise the application of the awards of the Board.

The case came before the War Labour Board in May last, following a series of strikes by machinists and electrical workers, and after various Government agencies had failed to effect a settlement. The Board has conducted an exhaustive investigation into the relations between the company and its workers by means of hearings at which testimony was taken, and also by means of first-hand investigations of conditions on the ground. In this latter work the Board was assisted by trained investigators.

With respect to collective bargaining, the attitude of the company has always been, according to its president, one of willingness to receive its employees individually, but not to recognize representative committees or any methods "savouring of organization."

The investigations of the Board revealed conditions resulting in a considerable loss of production of important war materials. It was shown that during the year ended May 31, 1918, the company had employed 57,423 workers, while during the same period 56,771 workers had left their employ. During the month of

May the labour turnover was at the rate of 118 per cent per year.

A charge was made by the men that the company was employing the draft law to coerce workers into remaining at the plant, and testimony in support of this was referred to the War Department for action, if necessary.

"The main cause of the dissatisfaction," states the Board, "is a bonus system so complicated and difficult to understand that almost one-half of the time of the hearings was consumed in efforts to secure a clear idea of the system. The absence of any method of collective bargaining between the management and the employees is another serious cause of unrest, as is also the lack of a basic guaranteed minimum wage rate."

The findings of the War Labour Board are as follows:

1. Piece rates. Bonus and basic hourly rates, machine shops.—(a) That the bonus system now in operation should be entirely revised or eliminated; that piece-work rates should be revised also, and that a designated, guaranteed minimum hourly wage rate be established in conformity with one of the scales now being applied by the War and Navy Departments as most nearly fits the conditions in this particular case. (b) That any necessary revision of piecework rates shall be made by an expert in co-operation with the Ordnance Department, the plant management, and a committee from the shops, such expert to be selected by the National War Labour Board and with the approval of the Secretary of War. (c) That the piece rates thus established shall not be reduced during the period of the war.

2. Overtime.—That the principle of daily overtime should be compensated at the rate of time and a half and double time on Sundays and holidays. That in the fixing of piece rates provisions be made for overtime payment such as are now provided in the case of time workers. The application as to the definition of what days constitute holidays and the division of the weekly work periods can in the opinion of the Board be best settled by conference between committees hereinafter provided and the management of the plant.

3. Committees.—The right of the employees to bargain collectively is recognized by the National War Labour Board; therefore the employees of the Bethlehem plant should be guaranteed this right. The workers at the Bethlehem plant should use the same method of electing committees as is provided in the award of the National War Labour Board for the workers of the General Electric Company at Pittsfield.

4. Employment of women.—That on work ordinarily performed by men, women must be allowed equal pay for equal work and must not be allotted tasks disproportionate to their strength.

5. Military exemption.—That the evidence relative to the complaints of the workers that foremen and other subordinate officials of the plant have made improper use of the selective draft act shall be referred to the War Department for such action as may be warranted by the facts and the law.

6. Electrical workers.—The Board finds in the case of the electrical workers that the following rates should be established: first class, 67½ cents per hour; second class, 62½ cents per hour; helpers, 40 cents per hour. Overtime provisions should be the same as hereinbefore specified.

7. Other departments.—That wages and working conditions of other departments and crafts shall be considered and adjusted by the committees provided for in paragraph "b," subsection 1.

8. Local board.—That a local board of mediation and conciliation, consisting of six members, shall be established, three members of which shall be selected by the company and three by the employees, for the purpose of bringing about agreements on disputed issues not covered by this finding. In the event of the local board failing to bring about an agreement, the points at issue shall be referred to the National War Labour

Board. The members of the local board shall be compensated for their services by the parties whom they represent. This board shall be presided over by a chairman, who shall be selected by and represent the Secretary of War.

9. No reductions.—The revision of wages or earnings provided for in this award shall in no case operate to reduce the wages or earnings of any employee.

10. Discrimination. — The examiner hereinafter provided for shall investigate the charges of discrimination, and shall report his conclusions. with recommendations, in each unsettled case to the National War Labour Board and to the company.

11. Examiner.—The National War Labour Board shall detail an examiner to supervise the application of this finding. The examiner shall hear any differences arising between the parties in respect to this finding, from which an appeal may be taken by either party to the National War Labour Board. Pending the appeal the decision of the examiner shall be enforced.

12. Duration.—This finding is to take effect August 1, 1918, and shall be effective for the duration of the war, except that either party may re-open the case before the Board at periods of six-month intervals for such adjustments as changed conditions may render necessary.

13. The Board desires to point out to both parties to this controversy that the questions raised and for which the Board has endeavoured to find solution have largely to do with matters which will require a reasonable time to satisfactorily adjust, and that in view of the vital importance of the output of the Bethlehem Steel Company both sides should address themselves with patience and good spirit to finding fair and reasonable adjustments of the matters to which the Board here directs attention.

PRICES, RETAIL AND WHOLESALE, IN CANADA, AUGUST, 1918, AND IN OTHER COUNTRIES

THERE were seasonable changes in the prices of farm products and foods, while the cost of materials advanced in several lines, but there were easier tendencies in some articles. Grain was upward, and also hay, while eggs advanced. Cattle and beef were lower, especially in Western Canada, and mutton was also down. Hogs fluctuated but hog products were comparatively steady. The retail prices of potatoes were upward throughout the country but were lower in some parts.

In retail prices of food the average cost of a list of staple foods for a family of five was $13.41, as compared with $13.00 in July, $11.68 in August last year, $8.63 in August, 1916, $7.78 in 1915, and $7.68 in 1914. The chief increases for the month were in potatoes, which were higher in all the provinces except Quebec, but there were also considerable advances in eggs and slight increases in the averages for meats, butter, sugar, and most of the other lines. In coal, wood, and coal oil, slight advances occurred. Rents averaged higher in Saskatchewan.

In wholesale prices the index number stood at 284.3 as compared with 284.0 in July and 245.0 in August last year, 180.7 in August, 1916, 151.5 in 1915, 136.3 in 1914, and 134.1 in 1913. The chief increases for the month appeared in grains, fish, textiles, implements, miscellaneous building materials, and house furnishings, with decreases in cattle and beef, sheep and mutton, fresh fruits and

vegetables, metals, drugs and chemicals, and raw furs.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the Labour Gazette from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

Retail Prices

In meats there were some decreases in the western provinces, but some increases in the east, while prices were changed very little in most of the cities. Eggs were higher throughout the country, being up to 60c per dozen in several cities in the East and 70c in the West. Milk was higher in Orillia, Lethbridge, New Westminster and Victoria, but were slightly lower at Windsor, Port Arthur and Fort William. Butter was higher in several of the cities throughout the Dominion. Cheese was unchanged in most of the cities. Bread and flour were steady. Rice and tapioca were almost unchanged. Canned tomatoes, peas and corn were steady. Beans were steady. Prunes advanced in several cities. Sugar advanced in some of the cities. Tea and coffee were steady. Potatoes were considerably higher in several of the cities as stocks of old potatoes were small and the supply of new potatoes was not large. In some of the cities, however, the prices were lower, chiefly in the Province of Quebec. Anthracite coal was slightly higher in several of the cities. Soft coal also showed some advances. Wood was higher in several of the cities. Rent advanced at Saskatoon.

Wholesale Prices

GRAINS AND FODDER.—At Winnipeg, the price of wheat, No. 1, Manitoba Northern, in store at Fort William or Fort Arthur, advanced from $2.21 per bushel, which had been fixed by the Board of Grain Supervisors for the 1917 crop, to $2.24½, the price fixed for the 1918 crop. The price of Ontario winter wheat for the 1917 crop had been based on a fixed price for the grade No. 2 at $2.22 per bushel in car lots in store at Montreal. The base price for the 1918 crop was raised to $2.26 for No. 2 grade, but an additional premium of 5c was allowed for grades No. 1, 2 and 3, thus making the price for No. 2 grade at Montreal $2.31. Prices of barley declined considerably during the month; at Winnipeg, Western barley, No. 3, falling from $1.25 to $1.00. At Toronto, Ontario barley fell from $1.35-1.37 at the end of July to $1.20-1.22 early in August, and by the end of the month was down to $1.03-1.05. Oats also declined, Ontario oats being down from 85-86c per bushel to 77c-79c. Western oats rose from 89c to 92c, but fell to 88c in the last week. American corn rose from $1.86-1.88 per bushel to $1.93-1.94. Flaxseed had risen to $4.54½ in the last week of July, but declined at the middle of August to $4.23, but rose again to $4.31½. Hay advanced to $15.00-15.50 at Montreal for No. 2, and at Toronto rose to $18.00-19.00 for No. 1.

ANIMALS AND MEATS.—Prime cattle at Wininpeg declined from $15.25 per hundred pounds to $13.00. At Toronto, choice heavy steers advanced from $15.00 per hundred to $16.00. Butcher cattle, however, were steady at $12.00 per hundred. Dressed beef hindquarters declined from 26-28c per pound to 22-25c at the end of July. Forequarters fell from 17-18c to 16-17c per pound. Veal was slightly easier, the highest grade being down from 25c per pound to 24c. Hogs at Toronto had risen in the last week of July and were up to $19.25 at the middle of August, but declined $1.00 in the last week. Dressed hogs were unchanged at 24-25c per pound. Hams and bacon were slightly firmer than in July. Sheep were slightly easier and mutton continued on the lower level of 19-24c per pound reached at the end of July. Dressed lamb also continued lower. Poultry was steady.

DAIRY PRODUCTS.—Butter was slightly lower at Montreal, finest creamery being down to 43½-43¾c per pound. At Toronto, creamery solids and dairy prints were steady. Fresh eggs at Montreal were up to 55c per dozen and were also higher at Toronto at 52-54c.

FISH.—The supply of fish from the Lunenburg fleet was reduced by the loss of several vessels owing to the operations of a German submarine off the banks. The total supply landed, however, was estimated to be as great as the large catch last year. The prices were up to $12.75 per quintal as compared with $9.50-9.75 a year ago. The catch of herring was reported to be disappointing. Salt mackerel and alewives were up to $21.00 and $9.50 per barrel respectively. Dried cod rose from 10c to 11c per pound at Canso, and dried haddock from 18c per pound to 20c.

FRUITS AND VEGETABLES. — Cherries were up to $1.85-2.00 per eleven quart basket at Toronto. Raspberries were slightly easier at 27-30c per quart box. Tomatoes were down to 65-85c per basket at the end of July, but advanced to 75-$1.00 early in August, and by the end of the month they were down to 30-40c per basket. Early peaches came on at 75c-$1.00 per basket. Plums came on at 50-65c per basket of six quarts, but fell to 35-50c. Bananas were slightly easier at 6c per pound. Verdelli lemons were up to $9.00 per box. California Valencia oranges were up to $8.00-10.50 per box. At Toronto, potatoes were slightly lower at $2.25-2.40 per bag. At Montreal, potatoes were lower at $1.75-1.85.

MISCELLANEOUS FOODS. — Flour was steady. Oatmeal was slightly higher at $6.00-7.00 per bag. Rice was up to $9.75-10.25 per hundred. Tapioca was ½c lower at 14-14½c per pound. Granu-

*Preliminary figures. †Seven commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

lated sugar was higher at $9.09-9.39 at Toronto. Molasses rose to $1.06 per gallon at Montreal. Cream of tartar was up to $1.00 per pound and baking soda up to 4c per pound.

Textiles.—Wool was steady. A line of yarn rose to $2.00 per pound. Raw cotton was higher at 33.35c per pound. Manufactured cottons averaged higher. A line of silk thread rose from 52c per dozen to 63c and machine twist rose from $12.25 per pound to $13.25. Flax fibre was easier at 60-75c per pound.

Hides, leather, boots and shoes. — Calfskins were higher at 42c per pound. Men's split boots were lower by 25c per pair. Tan calf and similar lines were 25c per pair higher.

Metals and implements.—Iron black sheets were higher at $7.75-8.80 per hundred. Antimony, lead, quicksilver and tin were lower, while spelter was firmer. A line of axes was easier, but coil chain and crowbars advanced.

Fuel and lighting.—Bituminous and anthracite coal at Montreal were unchanged. Gasoline and coal oil were also steady.

Building materials. — New Brunswick spruce deals were steady. Deals were scarce, but the mills were working on English orders. Pine cuts at Toronto were higher at $75.00-77.00 per thousand. Soft maple was higher at $45.00 per thousand. Cement advanced to $2.80 per barrel. Plaster of Paris was higher at $2.90 per barrel. Building paper advanced to $1.20 per roll. Roofing pitch and coal tar were higher. Soil pipe, sash weights, and hinges advanced. Linseed oil was higher at $2.22 per gallon. Turpentine was lower at 95c-$1.00 per gallon. Prepared paints and varnish advanced.

House furnishings.—Wooden furniture advanced about 10 per cent owing to the higher cost of materials and labour. Iron beds were also higher. Earthenware advanced. Brooms were slightly easier at $7.75-8.50.

Drugs and chemicals.—Carbolic acid was easier at $1.10 per pound. Quinine was down to $1.65 per ounce.

Miscellaneous.—In raw furs, mink was lower, but muskrat was higher. Malt was lower at $1.90 per bushel. Manila wrapping paper rose to 7c per pound. Ground wood pulp was slightly easier, but sulphite pulp was higher.

Prices in Other Countries

In the United Kingdom, the *Labour Gazette* published by the Ministry of Labour reported that the retail prices of foods on the first of August were about 4 per cent higher than a month before. Government margarine and cheese were higher and seasonable advances were made in eggs, milk and potatoes. Butter, however, was slightly lower. It was estimated that while the retail food prices were 118 per cent higher than in July, 1914, allowing for the importance of each article in family consumption before the war, the average expenditure on foods had increased by only 81 per cent owing to the changes in diet, etc.

In the United States retail prices of food averaged higher on June 15 than a month before, as shown by the figures of the Bureau of Labour Statistics in the Monthly Labour Review. Meats, flour and potatoes were higher, but lard, peas, milk and cornmeal were lower. In wholesale prices, the index numbers of both *Bradstreet* and *Dun* showed slight decreases at the first of August as compared with the first of July. Lower prices of textiles, due to governmental regulation, were reported to be the chief cause of the decrease. Increases in livestock, provisions, metals, coal, building materials, and miscellaneous goods were largely offset by decreases in breadstuffs, leather, and naval stores.

In South Africa the level of prices shown in the *Union of South Africa Government Gazette* in Capetown was 42.7 per cent higher in April than before the war and the increase in expenditure including rent would be 35.6 per cent.

In India, the Department of Statistics reported prices at Bombay in December,

*a*July of each year. *b* Foods. *c* 1901-1900—. *Quarter beginning that month.

1917, higher than in July, 1914, as follows: cereals 19 per cent, pulses 18 per cent, sugar 72 per cent, salt 84 per cent, and ghee 29 per cent. Rent advanced 18 per cent. The percentages of increases varied among the cities, being higher in some cases and lower in others.

In Portugal, the Ministry of Labour's index number, showing the changes in the cost of food, lighting, fuel and washing materials in Lisbon, based on the year 1913, rose to 204 in November, 1917, 210 in December, 223 in January, 1918, and 233 in February.

REPORT OF THE COST OF LIVING COMMISSIONER ON THE PRICE OF GASOLINE IN CANADA

THE constantly increasing use of gasoline by industries engaged in war production and by farmers in the processes of agriculture make it essential, not only that the supply be conserved and maintained for these purposes, but also that the price shall be such that farmers and others engaged in necessary production can obtain it at the lowest cost.

So as to conserve as much as possible the gasoline supply, the Fuel Board has issued an appeal to the public to refrain from the unnecessary use of motor cars, and to assist in other ways in the economic use and handling of gasoline.

In order to arrive at a determination of the lowest possible cost at which gasoline ought to be obtainable and to uncover any profiteering that may exist, the Cost of Living Commissioner, acting upon the instructions of the Minister of Labour, has made an investigation into the matter and has submitted a report which deals with the prevailing price of gasoline in Canada.

The investigation centered around the cost of refined gasoline imported from the United States; the cost of domestically refined gasoline was not inquired into. In explanation of this, the report draws attention to the fact that gasoline is produced almost exclusively by the refining of crude petroleum, of which Canada, at present, produces less than five per cent of her requirements; also, that, though the major portion of the gasoline consumed in Canada is refined in the country, the output of our own refineries not being sufficient for our needs we are compelled to import gasoline already refined from the United States; and "since this refined product is subject to a protective tariff, the price of this imported product laid down in Canada becomes the basis for the wholesale price in general throughout the country, and the profits of the refining industry in Canada have no bearing on the case."

The Commissioner finds that the wholesale price of gasoline in Canada is fair and reasonable, but that the retail price "could and should be lowered. Exorbitant prices are being charged by the retailers, especially in Alberta and Saskatchewan, where in many places the retail price charged is 50 cents, the retailer getting 9 and 11 cents for retailing. This form of profiteering is most severe in the smaller towns where there is the least competition and where the ones who pay are the farmers who use gasoline largely for necessary purposes rather than for pleasure seeking."

The Commissioner recommends the establishment of 35 cents as the maximum retail price in Ontario, and 43 cents and 45 cents in Saskatchewan and Alberta respectively.

The text of the findings of the Cost of Living Commissioner follows:

The cost of gasoline imported from specific points in the United States and laid down in Canada at sample points, before recent freight rate increases was as follows:

Gasoline imported into the Canadian prairie would naturally originate near the oil fields in the southwest of the United States. The con-

tracts of the Imperial Oil, Ltd., show costs on May 31, 1918, of refined gasoline to have been 18.50c a gallon wine measure at Caspar, Wyo. Since our Imperial gallon is one-fifth larger, this price amounts to 22.20c for the gallon as sold in Canada. To this cost at that time, to bring this gasoline to Swift Current, Saskatchewan, was added freight at $1.17 per hundred pounds of 8 gallons or 9.36c a gallon; a quarter of a cent a gallon for car rental; a duty of 2.5c a gallon; a war tax at 7½ per cent amounting to 1.67c a gallon; exchange at 2 per cent amounting to .44c a gallon; 2 per cent of all these items must be allowed for evaporation and loss in transit, amounting to .74c a gallon, making a total of 37.16c a gallon in the cars at Swift Current. By the time the gasoline is distributed in tank wagons or steel barrels to the retailer or engine owners, another cost is incurred, which cost must be added before comparison is made with the wholesale or tank wagon price in the United States. The jobbers are allowed 3c a gallon for this work. The Imperial Oil, Ltd., find that such costs of distribution in the West amount to 3.34c a gallon. This makes the cost of imported gasoline laid down at Swift Current 40.50c. The cost at Regina on a similar basis would be 39.11c, at Tompkins 40.13c, at North Battleford 40.34c, and at Edmonton, Alberta, 41.07c. The wholesale price, as charged for all gasoline, is an even 39c for all Saskatchewan points and 41c for Alberta points.

For Ontario points, we have worked out the cost as based upon the United States wholesale or tank wagon rate, thus avoiding working out the last item of cost, which is the distribution by tank wagon in Canada. The tank wagon price in Detroit was 23.20c per wine gallon or 27.84c per Imperial gallon. Add 2.09c for the 7½ per cent war tax, .56c for exchange, 2.5c for duty and the cost laid down at Windsor, Ont., without allowing for freight or evaporation, becomes 32.99c, but 2 per cent for losses should in fairness be added, and the cost would then become 33.66c a gallon. Taking the Buffalo tank wagon price of 23c for a wine gallon or 27.60c for an Imperial gallon, to find the cost laid down at Toronto, we must add freight amounting to 1.16c and a car rental of .25c, a duty of 2.5c, war tax of 2.07c and exchange of .55c a gallon, making the cost laid down to be 34.13c, without allowances for evaporation which would bring it up to 34.83c. The price laid down at Ottawa would be 35.60c and at Kingston 35.11c, including allowance for evaporation. It should be noted, moreover, that these costs are based upon the freight rates before the advance, and upon the United States prices at that time. Since May 31, both freight rates and United States wholesale prices have advanced. In all this territory of Eastern Ontario the tank wagon price is 33c.

These facts show immediately that we could not, even though we possessed price fixing powers, require the refiners, who are jobbers of imported gasoline, to reduce the price. The refiners could not be compelled to import at a loss. A reduction of price would imperil the supply of all the imported refined gasoline. Were our consumption restricted to the output of our refineries, such price reduction might be possible. Doubtless our consumers would prefer their supplies sustained rather than to gain the possibility of a reduction in price which would be slight at best. Moreover, since Parliament has seen fit to establish a protective tariff, we think that it would be unbecoming to suggest that our manufacturers be deprived of this protection.

We should expect under such a protective tariff that our refiners would sell their product at a price approaching the price of the imported articles, the degree of approach, or nearness, being determined very largely by the proportion required to be imported. If there were no independent jobbers in the field, the imported and the domestically refined products might be mixed and so the price fixed somewhat below the import price. Such is the situation. It is to the interest of the refiners to keep their customers supplied, especially since gasoline is an aid to the sale of more lucrative products of refining such as lubricating oil. They, accordingly, supplement the product of their own refineries with the imported finished product, this imported product being sold somewhat below its own cost, but this loss is easily carried by their business in general. Were it not for the fact that the Imperial Oil Company allows the Canadian Oil Company to sell the product of the Imperial refineries as a jobbing proposition, the Canadian Oil Company would either be forced out of the gasoline market in the West and the Maritime Provinces or else be compelled to sell at the full import price. The Canadian Oil Company, being allowed to job part of the output of the Imperial refineries at a fair margin of profit, they are able to supplement this with imported refined products and sell the combined product somewhat below the import price.

Since our investigation opened there have been decided increases on the side of costs on account of increased freight rates, but no increases in the Canadian wholesale price.

On June 25, action of the Director General of the United States Railways increased the freight rates from points of origin in the United States to points of destination in Canada by 25 per cent; since that date this has been modified in part of the territory to an advance of 4½ cents per hundred pounds. These increases caused an advance in the import cost of one-third of a cent and upwards to one cent in addition to one-half cent increase in the price in the United States; making a total increase in cost of imported gasoline laid down in Canada of 5/6 cents upwards to 1½ cents a gallon. It is interesting to note that while the freight rate advance increased the cost in United States points by one-third of a cent, prices in the United States rose by one-half a cent, while prices in Canada

remained the same, although Canadian importers paid the advanced price in the United States and the advanced freight rate in addition. On August 12, the advance in Canadian rates went into effect, increasing the distribution costs of the domestic product in Canada to 25 per cent more in the West and 43 per cent more in the East than early this spring, affecting the profits of the refiners, but not affecting the costs of importation. This caused an increase in cost of domestic gasoline varying from one-half to one cent a gallon besides the 5/6 to 1½ cent increase in the cost of the imported product. These figures look small, but assume importance on a total annual consumption of at least 100,000,000 gallons.

While these advanced freight rates have brought about increased prices in the United States, it has been found that an increase was not necessary in Canada. We have had no powers to require that prices be kept at their present level, but we have received assurances that in addition to the fact that prices have not been raised, no increases in Canada are contemplated. There is thus no chance to further decrease the wholesale price of gasoline in Canada, all increases in price since the war having been required by increased cost of the imported article from the United States, and this phase of the subject is wholly within the jurisdiction of the United States authorities.

We do find, however, that the retail price of gasoline could and should be lowered. Exorbitant prices are being charged by the retailers, especially in Alberta and Saskatchewan, where in many places the retail price charged is 50c, the retailer getting 9 and 11 cents for retailing. This form of profiteering is most severe in the smaller towns where there is the least competition and where the ones who pay are the farmers who use gasoline largely for necessary purposes rather than for pleasure seeking. In the cities where gasoline is used more largely for joy-riding, competition serves to hold the retailers' price more closely to the fair level. In Toronto, gasoline is sold largely at 2c above the wholesale or tank wagon rate. This fact combined with the experience of dealers in the United States and investigation of the books of Canadian retailers, points to the finding that a margin of 3c above the wholesale price in districts where such price is not more than 35c and 10 per cent of such wholesale price as maximum in any case, is a fair allowance for the retail price above the wholesale price for all retailers whose sales are 1,000 gallons a month or more. Such a ruling would establish 36c as a maximum retail price in Ontario, while in Saskatchewan and Alberta it would bring it down from 50c to 43c and 45c respectively.

It is respectfully suggested that such a ruling be immediately embodied in an Order-in-Council, and that the local authorities be empowered to enforce the same, the wholesale price being freely published at the same time.

MIGRATION AND SETTLEMENT

IMMIGRATION AND EMIGRATION. — During June, 1918, 2,162 persons (other than citizens of the United States) left the United States to take up permanent residence in British North America, as compared with 2,683 persons in May and 2,528 persons during June, 1917.

During June, 1918, 3,378 persons (other than citizens of the United States) departed from British North America to take up permanent residence in the United States, as compared with 3,439 persons in May and 2,807 persons during June, 1917.

The following statement shows by months the Immigration and Emigration during the second quarter of 1918, together with a comparison of the figures for the same period in 1917:

1918	Immigration to Canada from United States	Emigration from Canada to United States	Balance	
			inward	outward
April	2,293 persons	3,452 persons	.....	1,159
May	2,683 "	3,439 "	.....	756
June	2,162 "	3,378 "	.....	1,216
2nd quarter 1918	7,138 "	10,269 "	.....	3,131
2nd quarter 1917	6,038 persons	15,152 persons	.....	9,114

RECENT LEGAL DECISIONS AFFECTING LABOUR

Members of local union liable for damages for refusal to admit workmen to membership

TWO coal miners brought suit against a local union of the United Mine Workers of America, and officers and members thereof individually, for wrongful refusal to admit them to membership in the union, as a result of which they were unable to obtain employment. The plaintiffs claimed that they had been members of a local union at the mine where the one involved was situated until January, 1917, when the mine operators discharged the men and closed the mine for three weeks. It was then re-opened as a non-union mine, and the plaintiffs resumed work there. Later on a new local union was formed, and two of the defendants representing the reorganized union insisted that the operators discharge the plaintiffs unless they joined the union. The plaintiffs claimed that they made two applications for admission to membership in the union, but were wrongfully refused on both occasions in violation of the constitution of the local union. They then appealed to the officers of District 18 of the U. M. W. A. to which the local union was affiliated. As a consequence the local union was instructed to reinstate them, but refused to do so as late as January 6, 1918. They were told, however, that the union had no objection to their working in any of the mines. They began to work again about the middle of January, but were boycotted by the other miners, so that they were forced to quit. In the judgment of the Court it was declared that the plaintiffs were deprived of a civil right as a consequence of the defendants' actions, and the defendants were liable. The local union, however, was not liable in regard to anything subsequent to the date when the plaintiffs last returned to work. What took place after that was the individual action of the union men in the camp, and there was no evidence that the local union authorized it. The local union, not being a corporation, a partnership, or a trade union incorporated under the Trade Union Acts, can be reached only by suing the individual members. The officers of the local union were the agents for the individual members, and the principal is bound by the authorized acts of the agent acting within the scope of his authority. The individual members of the local union were each liable for what was done by their agents. Judgment was given against the defendants for each of the plaintiffs for $435.62 for loss of wages and $100 general damages and costs, each judgment to carry one-half of the costs. (*Alberta—Williams and Rees v. Local Union No. 1562, United Mine Workers of America, and Young et al.*)

Liability of street railway company for removal of snow

A teamster was driving a sleigh loaded with wood on a street in Winnipeg beside the car tracks, when it was overturned, and the man received injuries which caused his death. His widow brought suit against the City of Winnipeg and the Winnipeg Electric Railway Company for negligence, and was awarded damages. The questions submitted to the jury and answered by them were as follows:

1. Was the Winnipeg Electric Railway Company guilty of any negligence that caused the accident? A. Yes.

2. And if so, in what did the negligence consist? A. In allowing the snow to be slanted up from the tracks which when it became hard and icy was not safe for public traffic.

3. Was the City of Winnipeg guilty of any negligence that caused the accident? A. Yes.

4. And if so, in what did that negligence consist? A. In neglecting to force the street railway company to remove the snow that caused the danger to traffic, and in not removing it themselves.

5. How, in your opinion, did the accident happen? A. In pulling his team out to pass the milk sleigh the hind bob slid down the slope to Point 1ft. 8in. shown on the model exhibited by Mr. Bower from the city engineer's department, the sudden stop caused the box to overturn.

6. If your verdict be in favour of the plaintiff against either of the defendants, or against both of them, what damages do you award? A. $4,000 in all.

An appeal was taken against this verdict by both defendants. With regard to the Electric Railway Company, it was declared in the judgment of the Court of Appeal that answers to questions 2 and 5 do not disclose a liability. The company was only obliged to keep an 18-inch strip clear of snow, and the point where in the opinion of the jury the upset took place was outside of that strip. If the snow had been wholly removed from the strip the accident would have been aggravated. The plaintiff failed to show any breach by the company of the by-law or contract with the city. According to the findings of the jury, the accident was caused by a condition of the street for which the company was not responsible. For these reasons the appeal of the Electric Railway Company was allowed and the action against it dismissed.

With regard to the City of Winnipeg, the Court agreed with the counsel for the city when he raised the objection that the trial judge had failed to give the jury any definition of negligence, or to indicate what the duty of the city was under section 722 of the Winnipeg charter, which provides that "every public road, street, bridge and highway, and every portion thereof, shall be kept in repair by the city, and in default of the city so to keep in repair, the city shall . . . be civilly responsible for all damages sustained by any person by reason of such default." For this reason it was ruled by the Court that the verdict against the city should be set aside and a new trial ordered. (*Manitoba—Clark v. City of Winnipeg and Winnipeg Electric Railway Company.*)

To recover damages for accident to Government railway employee, negligence must be shown

The widow of a brakeman who was killed while in the discharge of his duties on the Intercolonial Railway, sought by petition of right to recover the sum of $22,000 as damages on account of his death. He was sitting on the last box car of a train which was travelling slowly, when the car suddenly jumped the track, uncoupled and rolled down an embankment, causing him fatal injuries. It was pointed out by the Court that to succeed the claim of the suppliant must arise out of the death of her husband caused by the negligence of any officer or servant of the Crown while acting within the scope of his duties, or employment upon, in or about the construction, maintenance or operation of the Intercolonial Railway or the Prince Edward Island Railway. The suppliant's evidence showed that the roadbed was in perfect condition, the rate of speed was moderate, and the box car which jumped the track was in perfect order. The cause of the accident was unexplained. It was an unforeseen event which was not the result of any negligence or misconduct of an officer or servant of the Crown. It was therefore declared that the suppliant was not entitled to the relief sought by her petition of right, and judgment was given in favour of the Crown.

The above decision was given under the Exchequer Court Act, as amended in 1910. In the present year, however, an Act was passed providing that an

employee of the Dominion Government who was injured, or the dependents of an employee who was killed, would be entitled to the same compensation as other employees under the law of the province in which the accident occurred. Employees on the Canadian Government railways prior to the date of an injury may elect to accept compensation under this Act instead of an allowance under the Intercolonial and Prince Edward Island Railways Employees' Provident Fund Act.* (*Canada—Thibault v. The King.*)

REVIEWS

UNITED STATES.—Wartime Employment of Women in the Metal Trades. National Industrial Conference Board. Research Report Number 8. July, 1918. 83 pp.

Women in Metal Trades in United States

THE National Industrial Conference Board of the United States has issued a report on Wartime Employment of Women in the Metal Trades, based on information from representative manufacturers in those trades in the United States. The report was prepared chiefly for the information of manufacturers who contemplate the introduction of women workers into their establishments. It is confined to a study of results of the employment of women in new occupations as reflected in output and other factors directly contributing to manufacturing efficiency, and does not discuss the broad social aspects of the subject.

The conclusions reached in the investigation are summarized briefly as follows: "Experience of employers in the metal trades in the United States has clearly demonstrated the practicability of employing women in a large variety of manufacturing operations. In a majority of establishments included in this investigation where women were employed in the same work they have equalled or excelled men in respect to output. In some processes their superiority is marked. As a rule, however, they have not been employed on highly skilled work and it is on light repetitive work requiring little experience or initiative that they have made their best record. It is the concensus of opinion that women should not be employed on heavy work, or on machinery where the accident hazard is distinctly high, or on work where extreme temperatures, poisonous fumes, or other serious health hazards are involved. The principle of equal wages for equal work has found fairly general acceptance among employers in the metal trades. Women are somewhat less regular in attendance at their work than men, but the labour turnover thus far has been lower. The attitude of women frequently is reported as more receptive, steadier, and more conscientious than that of new men workers at present available. The proportion of accidents apparently is lower among women than among men, due especially to employment in the less hazardous occupations. In approximately half of the establishments reporting on hours, women were working not over fifty hours per week. Substitution of women for men in the metal trades has not yet been extensive. In the establishments represented in the investigation

women thus far have been chiefly drawn from other industrial occupations rather than from the ranks of those previously unemployed. While the permanent employment of women in the light occupations in the metal trades is regarded by many employers as desirable, their continuance will doubtless depend largely upon the condition of the labour market after the war. As yet little objection has been made by men to the introduction of women into new occupations, but it cannot be assumed that this attitude will remain unchanged if the competition of women workers becomes more keenly felt."

UNITED STATES.—Work of the Free Labour Exchanges of Ohio for the year ending June 30, 1917. The Industrial Commission of Ohio, Department of Investigation and Statistics. Report No. 34. 42 pp.

Free Labour Exchanges in Ohio

A report on the work of the free labour exchanges of the State of Ohio for the year ending June 30, 1917, which has been issued by the Industrial Commission of Ohio, is interesting as showing how they have been utilized to meet the new war conditions which prevailed during that year. The shortage of labour at the beginning of that period, due largely to war orders, became more acute when the United States declared war, owing to thousands of enlistments. In order to provide better means for the distribution of labour, the State was divided into twenty-one employment districts, and in April, 1917, fourteen new employment offices were added to the original seven offices, which were located in the largest cities of the State. Owing to the scarcity of available help there was an increase of only fifty in the total number of applicants for the year, 348,043 having applied for work during 1916-17, and 347,993 during the previous year. Employers requested through the free labour exchanges an average of 832 persons per day, or a total of 253,687. An average of 712 persons per day were referred to them, and an average of 577 were reported placed. The total number reported placed, 175,955, was equal to 50.6 per cent of the total number of applicants for work, and to 69.4 per cent of the number requested by employers. Of the total applicants for work, 246,635, or 70.9 per cent were males, and 101,408, or 29.1 per cent were females.

With regard to the class of labour handled in these offices, the proportion of unskilled and semi-skilled workers dealt with is steadily decreasing. During the year ending June 30, 1917, a total of 4,460 applicants of a high grade were placed in positions, an average of 372 per month. Of these 2,759 were males and 1,701 were females. Of the males placed, 54.8 per cent were labourers, 13.1 per cent were day workers, 2.9 per cent were in skilled building trades, 2.6 per cent were farm and dairy hands and gardeners, and 1.9 per cent were in skilled metal trades. Of the females placed 80.1 per cent were day workers and laundresses, 6.4 per cent were in hotel and restaurant work, 4.9 per cent were in general housework, and 3.2 per cent were factory workers.

SWEDEN.—Kooperativ Verksamhet. I. Sverige Aren 1911-1913. Sveriges officiella Statistik. 597 pp.

Co-operative Societies in Sweden

An official report on co-operation in Sweden brought up to the end of the year 1913 shows that the co-operative movement was making fair progress in that country, although some allowance has to be made for societies which had ceased to exist, but had not

so reported to the Bureau of Statistics. The total membership of co-operative societies at the end of 1910 was 85,358 persons, and during the period from 1911 to 1913 the number rose to 112,694. If each member represented on an average five persons, then at the end of 1913 about 565,000 persons, or ten per cent of the total population of Sweden, were directly interested in co-operation. During the years 1897 to 1913, inclusive, 4,284 workmen's co-operative societies were registered, of which number 522 declared their dissolution, leaving 3,762 officially in existence at the end of 1913. In the same period 2,310 agricultural co-operative societies were registered, 136 reported that they had ceased to exist, leaving 2,174 still in operation. There was thus a total of 6,594 societies registered, out of which number 658 reported that they had dissolved. Many societies, however, went out of existence without reporting, and it was estimated that the actual number of existing societies at the end of 1913 was about 5,000.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

During September employment was good and in most industries there was a demand for labour, particularly in the shipyards, while large numbers of men were being sought for the lumber camps. Employment generally in the districts of Fernie and Michel was disturbed by strikes in the coal mines. In civic employment a slight decline was noted in comparison with August, and a considerably larger decline in comparison with September, 1917.

The time loss on account of industrial disputes during September was greater than during August and much greater than during September, 1917. There were in existence during the month 30 strikes, affecting 7,416 workpeople and involving a time loss of 102,563 working days.

The average cost of the weekly budget of staple foods decreased slightly during the month, the September figure being $13.31, as compared with $13.41 in August, 1918, and $7.83 in September, 1914. The index number of wholesale prices rose from 284.3 in August to 285.3 in September, while the index number for September, 1914, was 141.3.

Proceedings under the Industrial Disputes Investigation Act

During the month of September the Department received reports from three Boards of Conciliation and Investigation appointed to inquire into disputes affecting: (1) The Hamilton Cotton Company and certain of its employees; (2) The Polson Iron Works, Limited, Toronto, and certain of its marine pipe and steam fitters; and (3) Certain firms, being members of the Employers' Association of Toronto, and various classes of their workmen. A report was received from the Board of Appeal to which had been referred the dispute between the Canadian General Electric Company, Peterborough, Ont., and its machinists, specialists and electrical workers; also an interim report from the Royal Commission established under the Inquiries Act to investigate the dispute existing on the British Columbia coast between shipowners and their employees, being masters and mates, members of the Canadian Merchant Service Guild.

Eight applications were received for the establishment of Boards; two Boards were established in connection with ap-

plications which had been received during the preceding month; and advice was received of an amicable settlement by direct negotiations of the dispute between the Quebec Railway, Light, Heat and Power Company and its mechanics of various classes. The powers of the Royal Commission appointed under the Inquiries Act to investigate the dispute existing on the British Columbia coast between various shipowners and their employees, being masters and mates, members of the Canadian Merchant Service Guild, were extended during September to investigate also any differences which might exist on the vessels operating on the lakes and rivers of British Columbia.

Order-in-Council declares certain associations to be unlawful

The Government, on September 28, passed an Order-in-Council declaring that while Canada is engaged in war the following associations or organizations shall be considered to be unlawful: The Industrial Workers of the World, The Russian Social Democratic Party, The Russian Revolutionary Group, the Russian Social Revolutionists, The Russian Workers Union, The Ukranian Revolutionary Group, The Ukranian Social Democratic Party, The Social Democratic Party, The Social Labour Party, Group of Social Democrats of Bolsheviki, Group of Social Democrats of Anarchists, The Workers' International Industrial Union, Chinese Nationalist League, Chinese Labour Association.

And, further, that any association that endeavours to bring about any governmental, political, social, industrial or economic change in Canada by the use of force, or by threats, or which defends the use of force, shall also be considered unlawful. Any person being connected either as an official or a member, or who knowingly allows his premises to be used as a meeting place for such association, or who prints any book or pamphlet in which force is advised or defended, will be liable to fine and imprisonment.

The Order-in-Council also makes it a punishable offence, while Canada is at war, to hold or attend meetings the proceedings of which are conducted in the language of any enemy country or in the Russian, Ukranian or Finnish language. This prohibition, however, does not apply to religious services.

Labour men in British Columbia meet Provincial Cabinet

The British Columbia cabinet recently met a delegation from the British Columbia Federation of Labour to discuss the strike situation in the mining industry, and to consider a number of proposals in the interest of labour generally. The matters under discussion included changes in the Election Act. It was urged on behalf of organized labour that the Proportional Representation system of election be tried in the constituencies of Vancouver and Victoria for provincial elections, and that the law requiring deposits from candidates be amended. With regard to labour legislation, it was urged that the administration of the Factories Act be turned over to the Workmen's Compensation Board. On educational matters the labour men urged that school supplies be free, and that child labour legislation shall be passed raising the age limit to 16 years. Mothers' pensions, State sick benefits, and unemployment were also discussed. For the better protection of street railway employees, legislation making the eight hour day compulsory was asked. The subject of 'company towns' was discussed at length, and in this connection the Minister of Lands stated that, while realizing the advantages that would accrue, there were many difficulties in the way of opening these towns, but stated that practical suggestions would be given consideration.

National Clearing House for labour in Great Britain

The clearing house for the proper distribution of labour in Canada, for which future provision is made in the new Employment Offices Co-ordination Act (see May issue of the Labour Gazette, p. 354) will be modelled along the lines of that already in existence in Great Britain.

The National Clearing House of the British Ministry of Labour was created in 1914 as a section of the Employment Department. Its principal function is to circulate expeditiously to all employment exchanges throughout the country details of vacancies in any of the industries and trades that may be received from districts where there is a shortage of labour. The following details as to its methods of procedure are derived from a recent article in *The Month's Work*, published by the Ministry of Labour.

The whole country is divided up into what are known as "clearing areas." Each of these areas contains, in addition to a number of employment exchanges, a clearing exchange where information is collected for the whole area as to the surface labour available. When an employment exchange has vacancies for labour that it is unable to fill it communicates by telephone with the clearing exchange. If the latter is unable to find sufficient labour within its clearing area to fill the vacancies it at once notifies the National Clearing House, or "N.C.H.," as it is generally becoming known. At the National Clearing House vacancies thus notified are collated and published in what is known as the National Clearing House Newspaper. In this journal the vacancies in each occupation are set out in groups, thus making it possible to ascertain at a glance where vacancies exist in any given occupation. It is issued weekly and is supplemented on the subsequent days of each week by daily sheets; and as each week's issue is cumulative it cancels the whole of the preceding issues. During the past twelve months vacancies have been circulated through the National Clearing House for nearly 370,000 workpeople; on one day alone there were actually in circulation over 22,000 separate advertisements, covering roughly five times that number of vacancies. The following illustrations will serve to show the speed with which the National Clearing House brings man and job together. A certain dockyard put in an application for 150 rivetters to be supplied immediately; and within a few hours the Clearing House was able to state the exact place from which this number of men could be procured. In connection with the construction of large hutments, etc., for immediate military employment, nearly 25,000 men were brought from all parts of the country. From London, through the medium of a single employment exchange, 14,000 men were sent to various parts of the country to build huts, construct military roads, assist in the shipment of goods to the army, etc.

With the progress of the war a system was instituted between the War Production Department and the Ministries of Labour and National Service whereby a National Committee was set up to decide which vacancies were to be accorded "priority" treatment at employment exchanges in accordance with the urgency of the occupation from a national standpoint.

Conciliation Board for Civil Servants in Great Britain

In the early months of the war when the cost of living began to rise, the Government employees of Great Britain sought to impress upon the Government that the position of those having to depend on fixed salaries was far different from those who, owing to the special demand for their services, were able to command an increased wage commensurate with the increase in prices. In January, 1917, the Government, fully conceding to this point of view, authorized the appointment of a "Conciliation and Arbitration Board

for Government Employees." Previous to this, however, the Government had on two occasions, in March, 1915, and in September, 1916, yielded to the request of the lower paid post office employees for wage increases and had granted on each occasion bonuses of from 5 per cent to 7½ per cent for men and about half that amount for women. A third appeal being made in 1917 by six organizations of post office employees, the Government finally authorized the appointment of a conciliation and arbitration board to consider this and other requests for increased wages due to the war that may be preferred by both permanent and temporary employees of the Government. In respect to this third appeal of the post office employees the conciliation board was of the opinion that the continual increase in the cost of living warranted "a (further) temporary increase of remuneration by way of war bonus"* and granted an additional bonus of from 8 per cent to 15 per cent approximately for men and about two-thirds of that amount for women. In the case, however, of employees engaged in the engineering and other departments of the post office under trade conditions this award was made not to apply. It was thought that in these cases wages should follow the decisions of the local industrial tribunals of the districts in which these employees happened to be engaged. Other requests for wage increases were preferred by the Civil Service Federation, the Civil Service Clerical Alliance and the Customs and Excise Officers Association. The board took these cases under advisement and made awards identical to those granted in the cases of the post office employees (Award No. 2).

The first meeting of the Conciliation and Arbitration Board for Government Employees was held during February, 1917, and up to the end of last year 50 claims had been heard, of which 15 were settled by conciliation, 33 by arbitration, and two were outstanding. The board, which consists of three members, was formed "to deal by way of conciliation or arbitration with questions arising with regard to claims for increased remuneration, whether permanent or temporary owing to war conditions, made by classes of employees of Government departments other than classes of employees who are engaged wholly or mainly by way of manual labour of a kind common to Government and other employment and in respect to whom the board are satisfied on the certificate of the Government department concerned, that adequate means for the settlement of such questions have already been provided, or that changes of remuneration always follow the decisions of the recognized machinery applicable to the district generally."

The methods of procedure adopted by the board have been described in an official publication as follows:

"The board, together with not more than three official representatives and not more than three representatives of the class concerned, or their association if one exists, will hear any claim which falls within its terms of reference (cabinet instructions). No stereotyped procedure is followed in its hearings, but the proceedings are kept as informal as possible. The hearings are confidential and no verbatim report is taken, though a record is kept of each one. An agreement is required from representatives of the claimants that they will abide by any decision, and assurance is given that the Government will be similarly bound.

"Since the organization of employees has not made much headway except in the general post office . . . it was decided to deal with the representation for each case on its merits, and in cases where outside associations represent employees to admit one such representative, who, however, cannot be signatory to any agreement arrived at by conciliation."

At the outset of its activities the board differentiated, both in principle and in amount of bonus, between permanent

*Conciliation and Arbitration Board for Government Employees. Award No. 1. London, May 7, 1917. 2 pp.

and temporary employees on the ground that wages for permanent employees had been fixed in times of peace with reference to normal conditions, and had therefore ceased to be a fair wage, while in the case of temporary employees the rates of pay had presumably been fixed by conditions brought about since the war.

* * *

After-the-War Housing in Great Britain

In addition to dealing with the problem of providing housing accommodation for workers engaged in war production, the British Government has also given considerable attention to the emergency housing problem that is bound to present itself at the close of the war when many thousands of men will return to industrial life. The Advisory Housing Panel, appointed by the Ministry of Reconstruction to study and report upon this particular phase of the housing shortage, recently submitted a memorandum (published as a Parliamentary Paper—C. D. 9087) which has been summarized, as follows, in a recent issue of the British *Labour Gazette*:

In order to make up the deficiency in housing caused by the cessation of building during the war, it is estimated that it would be necessary to build, in the year following the war, 250,000 houses, plus an additional 75,000 for each year after 1917 through which the war is continued. Further, in addition to this number, it is considered that 50,000 houses should be built in rural districts over and above what may be regarded as their share of the foregoing. It is not suggested that these figures approach the full need of either urban or rural districts, but they are given as representing the lowest limit to be aimed at. One member of the Panel appends a reservation in support of his belief that the figures are far too low.

The Panel think it clear that whatever other measures may be taken, no considerable number of houses will be built in the year after the war unless financial aid is forthcoming from public funds to make good the inevitable loss due to abnormal prices, and they come to the conclusion that the bulk of the new houses must be provided by local authorities or by the State. This, of course, does not mean that private firms will have no share in the work which has to be carried out; their assistance will certainly be required, and they should be fully employed as building contractors. To meet the financial difficulties which will have to be faced the Panel propose:

(a) That the State should provide the whole cost of the building and should own the houses for a period to be fixed, say five years, at the end of which prices may be expected to have attained a normal level. This period is referred to as the transitional period.

(b) During this period the local authority will act as agents of the State, and will be responsible, subject to the approval of the District Housing Commissioner (appointed by and subject to the control of the president of the Local Government Board), for building and managing the houses and collecting the rents.

(c) At the end of the transitional period the ownership of the houses will be transferred to the local authorities at a figure to be arrived at by deducting from the original cost such a percentage as represents the fall in price of materials and labour, together with fair allowance for depreciation.

(d) During the transitional period the rents, collected by the local authorities as agents, will be paid over to the State. In urban districts the aim should be to fix rents at a figure likely to provide a fair interest, sinking fund, etc., when normal conditions are restored and the abnormal cost has

been written off. In rural districts the rents should be fixed in consultation with the Agricultural Wages Board, and in co-operation with that body raised by stages to a similar figure, which should be reached by the end of the transitional period.

(e) Upon the transfer at the end of the transitional period, it should be incumbent upon the local authorities to secure, as far as may be practicable, rents sufficient to cover the annual charges.

(f) It will be clearly impossible to forecast accurately the date when, conditions having become normal, the transitional period may be equitably considered to be concluded. It may be desirable, therefore, to give power to the Government of the day to postpone by order the date of the transfer of ownership in any district where circumstances might require it.

Great importance is attached to the provision dealing with the raising of rents by stages in rural districts. Until rents can be obtained to cover the annual charges no permanent solution of the housing difficulty will be found. The only possible method of achieving this end is by a deliberate co-ordination between rents and wages.

The present scheme of State building provides an opportunity, which must not be let slip, of securing permanently a greatly improved standard of building, and the Panel recommend that the Government should insist on a high standard of design and lay-out, and, save in exceptional circumstances, on a restriction of the number of houses built to the acre to, say, 12 in the towns and to eight in the country; that the houses must be completed within a definite time, suggesting for this purpose that a year may be fixed; and that the houses built must be for the occupation of the working classes, the definition of which term, as given in the Housing Acts, needs some extension. The right view appears to them to be that adopted in the Workmen's Compensation and National Health Insurance Acts, namely, that all persons should be included whose incomes from all sources are below the limit of 160 pounds per annum. In view of the great rise in prices the limit might possibly be raised to 200 pounds.

Where prompt action cannot be obtained through other agencies, the Panel consider that power should be reserved to the State itself to build the necessary houses. It is not anticipated that this power would often be required, but it is believed that it will prove an effective sanction when dealing in the last resort with unwilling local authorities.

* * *

Housing policy of the United States Government

The creation of the United States Housing Corporation by the Department of Labour (see page 692 of the September issue) followed by the publicly expressed desire of the Government that building operations not required for war purposes should be suspended, has led to some misunderstanding as to the exact function of this corporation. Some communities are apparently under the impression that the Government is prepared to take upon itself the duty of providing housing accommodation for all workers in any locality that may seek its aid. In order to remove all misunderstanding and to make clear the Government's policy, the housing corporation states that the Government will build houses for war workers only as a measure of final relief and not until every community concerned has exhausted its own resources. The Industrial Housing Bureau urges that appeals be made to citizens in these centres, whatever their prior customs may have been, to now open their houses to boarders. It further urges that towns and cities which have profited by the war "could well spend some of their new earnings

upon homes for working people." The bureau points out that in cases where communities engaged on war contracts are suffering from a house famine and are doing nothing to relieve the situation, it is the intention of the War Department to limit, and even withhold, further contracts in order to assist other communities who are saving for the Government not only the cost of providing houses but also the increased cost and delay in the completion of work due to the high labour turnover that always accompanies poor housing facilities.

In order that those communities that are being developed by the Government may be so conducted as to encourage and enable the workers to put forth their best efforts the Industrial Housing Bureau is looking for competent men to undertake their management. "The duties of management," according to the bureau, "will involve not only the collection of rents, the supervision of repairs and the maintenance of buildings, but it will comprise duties similar to those of mayor, including oversight and responsibility for sanitation, cleanliness, fire and police protection and the general health and welfare of the inhabitants." It has been decided as a matter of policy that these communities shall not be managed by local men; it is thought that the transfer of managers from one community to another will develop a number of experts in this line of work.

Italy prepares for Reconstruction

Italy, in common with most other countries involved in the war, is engaged in the formation of a policy to meet the reconstruction period that will follow. Some months ago the Government appointed a reconstruction commission, comprised of some 600 members, which included senators, deputies, civil servants, educationalists and leaders of industrial and commercial life. This Commission was divided into two sub-commissions, one for dealing with judicial, administrative and social questions, and the other for treating industrial, commercial and agricultural problems. These sub-commissions were in turn divided into a number of sections, each section having its own problem with which to deal. As a direct result of the deliberations of the various sections of this Commission having to do with labour problems, the Italian Ministry of Labour has now issued a report containing statements of general principles and proposals in connection with the task of reconstruction after the war, of which report the following is a summary:

In order to ensure an increase in national production, it is stated, as a fundamental principle, that the workers should be made to feel an interest in their country and in society, through having a direct share in public affairs and in the regulation of production; and that to this end they should be granted further economic and political freedom, coupled with a system of general and technical education. The report speaks of the "conflicting interests of consumer and producer," and suggests that in order to bring these interests more into harmony the State shall seek the advice and co-operation of those technical and financial leaders who, in determining what is best for the nation as a whole, "will put aside their adherence to preconceived ideas and political prejudices on behalf of the protectionist system to the disadvantage of the consumer, or on behalf of unrestrained freedom (of trade) to the hindrance of industrial development."

In reference to demobilization and reestablishment of labour in industry, it is recommended that the Government, through the machinery of the Labour Department, proceed immediately to take a census of the number and character of the workers at present under arms and engaged in war production, to determine their intelligence and adaptability and the place and nature of their last employment.

The co-ordination of existing employ-

ment offices and the creation of new ones is recommended, and, in order to cover every district, municipal committees should be formed, under the control of provincial committees which, in turn, will be under the national committee at the Labour Department. Workmen registered for employment and travelling to obtain it should be granted reductions in railway fares. As a guide to the state of the labour market and in order to prevent abuses and parasitism, it is recommended that in the future a census of unemployment be taken periodically.

In reference to the demobilization of war industries, it is suggested that a national fund for unemployment be established, out of which aid may be granted for at least a year after the conclusion of peace to those suffering from unemployment through the effect of the war and of the post-bellum readjustment. It is suggested that all agencies for the control of industry should be reorganized so as to prevent the lowering of wages, and to establish a minimum wage for wounded men rendered less capable as a result of the war, and for industries poorly organized and for home work. It is also recommended that commissions be appointed to judge the cases of those in debt for rents and to provide relief where necessary.

As to the transferring of war industries into other lines of activity, an investigation should be made as to the possibilities of each industrial establishment, the time necessary for the transfer and the amount of labour likely to be re-employed in such establishment.

In order to stem the tide of possible future emigration, it is suggested that conditions at home be so improved as to remove the desire on the part of the industrial population to emigrate. Other recommendations embodied in the report are: the preparation of a well-considered programme of public works, the settlement by boards of arbitration of labour disputes, and the study of the whole question of social insurance.

Labour Jottings

Details of further amendments to the McAdoo Award in the United States and their application to Canadian railways are given in this issue.

The Department of Labour has just published the last of a series of three reports which are a compilation of all the labour laws enacted by the Dominion and Provincial Governments up to the end of 1917.

Hon. Justice F. S. Maclennan, of Montreal, has been appointed permanent chairman of the recently created Labour Appeal Board. In the two cases already heard by the Board the decisions were unanimous.

The United States Employment Service has added to its organization a farm service branch, upon which the National Grange, the National Farmers' Union and the National Dairy Union are represented.

During August, the first month of its extended operations, the United States Employment Service recruited and moved between 50,000 and 60,000 unskilled workers from States having a surplus to other States where unskilled labour was required for Government work.

The first number of "The Canadian Official Record," referred to in the September issue, appeared on October 1. It will be published weekly by the Director of Public Information.

A meeting of selected representatives of the provinces of British Columbia, Manitoba, Alberta and Saskatchewan was recently called to consider the idea of bringing into uniformity the workmen's compensation acts of these provinces. The acts of British Columbia, Manitoba and Alberta are administered by boards specially provided for the purpose, but in Saskatchewan the old form to the act requiring action through the courts to secure compensation is still in force.

Under section 79 of the new Workmen's Compensation Act of New Brunswick the Lieutenant-Governor of that province recently fixed the eighteenth of September as the date upon which the organization of the Workmen's Compensation Board, the classification of industries and levying and collecting of assessments shall be commenced. The right of workmen to receive compensation for injuries shall become effective on a date yet to be fixed, upon which date also the Workmen's Compensation Act of 1914 shall be repealed. The text of the new Act was printed in the August issue of the Labour Gazette.

In July last the British Ministry of Labour issued the first number of a monthly magazine, entitled "The Month's Work." The magazine, though ostensibly "for official use," deals in a very human way with the activities of the labour department and the many various committees and councils for which the department is responsible. The Foreword was contributed by the Minister of Labour, the Right Honourable G. H. Roberts.

Officers of the Civil Service Federation of Canada recently met the Dominion Cabinet in conference, and presented a Memorial signed by all the officers of affiliated associations asking for a bonus of $350 for civil servants to offset in some measure the increased cost of living during the past four years. During the conference it was urged that, for a limited period, a Minister be assigned to deal with Civil Service matters and to be accessible to further representation from the Service. Sympathetic consideration of the Memorial was promised by the Cabinet.

INDUSTRIAL CONDITIONS DURING SEPTEMBER, 1918

I.—GENERAL REVIEW

The Labour Market

Employment in the metals and machinery group was very good in all its branches, except that the structural steel plants in some cases were rather quiet, due to a shortage of material. There was a considerable reduction in the output of the Sydney steel plants, owing partly to industrial unrest. Many additional workers were taken on at the shipyards, and a further expansion of employment was anticipated on the West coast. In the food group, the flour mills were quiet in the Maritime Provinces and Quebec, but in Ontario and the West they were all employed. There was a demand for help in the abattoirs at Toronto. The soft drink plants were quieter owing to the seasonal change and the shortage of sugar. Confectioners were all affected by the sugar shortage. The fruit and vegetable canneries were in need of extra help. Employment was good in the tobacco factories and fair in the breweries and distilleries. In the textile group employment was good, except for some seasonal slackness among tent, awning and sail makers. The cotton mills at Montreal were hindered by the shortage of raw material. There was a fairly pronounced demand for female help in the ready-made clothing and whitewear factories, and employment was good in steam laundries and dyeing establishments. The pulp mills generally were operating to full capacity and there was a demand for both unskilled and skilled labour, especially for the woods. Printers were well employed and there was some demand for girl press-feeders. Experienced help and

apprentices were being sought in some of the paper box factories. In the woodworking industries the activity of last month in the Maritime Provinces was maintained. The wooden box, furniture and piano factories generally were active. In the leather group the tanneries were rather quiet owing to the shortage of raw material, but employment was good in the boot and shoe factories. The rubber workers were actively engaged. In the clay, glass and stone group, there was an advance in employment in cement, lime and plaster works and in the cement block plants, but otherwise the group was dull. In paints, oils and chemicals, the paint factories at Halifax and Toronto continued to be well employed and the Regina oil works continued to run with a full staff. There was some demand by the drug companies at Windsor for female help. In transportation, the heavy shipments of freight on the steam railways gave good employment to operating crews and freight handlers, and the car shops were very busy. There was some reduction in the amount of lake transportation due to unfavourable weather. Electric railways generally were somewhat quieter owing to the close of the tourist season. 'Longshore work was dull at Halifax and St. John, but active at other Eastern ports; at inland ports it was better than in the previous month, due to the arrival of coal shipments. In mining and quarrying there was some demand for labour in the granite quarries near Sherbrooke. In the Cobalt silver mines the supply of labour was fairly satisfactory, due partly to the 25c daily bonus paid to mine workers as a result of the war time high price of silver. In the Porcupine gold area the shortage of labour continued to be pronounced, and there was a steady demand for labour in the mining centre between Fort William and Fort Frances. Nickel refiners were also in demand. In coal mining, labour disturbances and strikes in the Fernie and Michel districts prevailed throughout the month, and at Sydney there were labour disputes also, but in other coal fields there were demands for skilled labour. In the lumber industry there was a decrease in the previous month's activity, although employment was good. It was apparent that operations at the lumber camps would have to be very much curtailed this winter, owing to the great scarcity of skilled men. Employment in the saw and shingle mills generally was good. There was a great demand for farm hands in the Western provinces and a lesser demand in the East. In the building trades, employment generally was good except in Quebec, though in Quebec there was difficulty in securing the small amount of labour required. Building permits fell off slightly during the month, but employment in the building trades was maintained, due to the high total of the permits issued during July. The value of building permits issued in 35 cities decreased from $5,018,092 in August to $2,690,821 in September, or 46 per cent. As compared with September, 1917, there was a decrease of 5.8 per cent.

Strikes

The loss of time on account of industrial disputes during September was greater than during August and much greater than in September, 1917. There were in existence at some time or other during the month 30 strikes, affecting 7,416 workpeople and involving a time loss of 102,563 working days, as compared with 33 strikes, 8,638 workpeople and 94,040 working days in August; and 20 strikes, 2,400 workpeople and 25,288 working days in September, 1917. On September 1, there were on record 11 strikes affecting 1,335 workpeople. Nineteen strikes were reported as having commenced during September as compared with 18 during August; 11 of the strikes commencing during September and four of those commencing prior to September were reported terminated, leaving 15 unterminated strikes, affecting approximately 3,444 workpeople, on record at the end of September.

Prices

In prices, there were decreases in several groups, the most important decline being in Grains—barley, oats, corn and flax all showing decreases. Metals declined on the whole, due to a fall in the price of tin ingots, while carbolic acid and caustic soda caused a decrease in the index number for Drugs and Chemicals. Fruits and Vegetables also showed a decline. Advances in prices were shown in Dairy Products, Miscellaneous Foods, Textiles, Hides and Leather, Implements, Fuel and Lighting, Lumber, Miscellaneous Building Materials, Paints and Oils, and Furs. Meats and House Furnishings remained steady during the month. In the case of Meats, a decline in the price of dressed lamb was offset by the increases in the prices of beef and veal. The index number of wholesale prices rose very slightly, standing at 285.3 in September as compared with 284.3 in August, 1918, 246.1 in September, 1917, and 141.3 in September, 1914. In retail prices, the average cost of a family budget of staple foods in some 60 cities declined from $13.41 in August to $13.31 in September. The cost of the same budget in September, 1917, was $11.65, and in September, 1914, $7.83. The cause of the decrease was the lower prices for potatoes and meats.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

Sydney reported a considerable reduction in the Dominion Steel Company's September output of pig iron, the total being 18,000 tons, as compared with 35,000 tons in August. This reduction was partly attributed to there being two working days less in the month and to the slowing down after-effects of Labour Day. The balance of the company's output for the month was: ingots, 23,000 tons; rails, 12,000 tons; other products, very small quantities; blast furnaces, four, working part time owing to insufficient supply of coke. At the Sydney Mines plant the production of iron was 8,160 tons, and steel 10,300 tons, as compared with 7,900 tons of iron and 10,900 tons of steel last month. At Sydney and Halifax the shipbuilding yards and stove and furnace foundries were all reported very active. At Halifax there was a constant demand for electricians, metal roofers, tin and copper workers. At Westville the steel plants were affected slightly by the fuel shortage. Amherst reported a shortage of car builders and boilermakers. At St. John the Portland Rolling Mills continued to employ about 120 hands, and the wooden shipyards were active. Employment was good in the Government Locomotive Shops at Moncton, where the employees started on the new 47-hour-week schedule. There was a constant demand for help in the machine shops and foundries at Fredericton. Montreal reported that the shipyards and steel plants were very busy. Quebec also reported great activity in the metal and machinery trades and in the ship and boatbuilding and repairing yards. The steel foundry at Three Rivers was well employed, and it was anticipated that there would be an expansion of employment in foundry and machine shop work within a few months. The Tidewater Shipbuilding Company increased the number of their employees. At Sorel the shipyards gave employment to about 1,500 men. Toronto reported the metal and machinery industries generally working to capacity and shipyards increasingly active. Structural steel plants were rather quiet owing to shortage of material. Agricultural implements, engine, boiler, motor and machinery manufacturers were busy, and employment was good in the

electrical trades. Hamilton reported the metal trades very active, with a demand for labour. The output for the month of the Dominion Steel Foundry was 18,000 tons of finished steel, of the Steel Company of Canada 25,000 tons, and of the Hamilton Bridge Company about 3,500 tons. Niagara Falls reported a constant demand for both experienced and inexperienced workers in the machine shops and for cutlery, plating and light metalware factories. Kingston reported that the locomotive company was well employed and that the shipbuilding company was busy. The Canadian Rolling Mills at Belleville were employed day and night in the manufacture of bar iron products. Employment was also good in the automobile, cycle and agricultural implement plants. There was a demand for moulders in Peterborough, but a slight reduction of employment in the electrical plants. Galt reported considerable activity in the metal group. The agricultural implement firms at Brantford were very busy, and in some cases were arranging to employ more female labour. The carriage and stove companies were also very active. Kitchener reported every foundry busy, and in need of additional help. At Guelph the Gilson Works ran overtime three nights a week in the engine and motor tractor departments; and there was a demand for moulders and coremakers in the foundries. Stratford reported a shortage of machinists and blacksmiths. Woodstock reported a constant demand for moulders and finishers in the stove and furnace foundries. London reported the rolling mills working to capacity and the Ford tractor plant working overtime every night. The stove and furnace departments of the McCleary Manufacturing Company were very active. At Chatham the Gray-Dort automobile factory and the carriage and wagon factories were working to capacity. The Canadian Bridge Works of Windsor were in need of additional men and the Maxwell Motor Company and the Kelsay Wheel Company were well employed. There was a constant demand for skilled machinists. Orillia reported that the electro foundries were again operating to full capacity, the heavy rains having overcome the power shortage. The stove factory had many orders ahead. Sault Ste. Marie reported that the steel plants had openings for all classes of labour. At Fort William the car works gave employment to about 1,200 men, and at Port Arthur the shipyards employed about 1,400 hands and needed an additional 300. Winnipeg reported a constant demand for skilled mechanics. Brandon reported that the agricultural implement foundries and machine shops were well employed. Medicine Hat reported that the rolling mills were well employed, but that other metal working industries were rather quiet. At Calgary the iron works were all fully employed, also the automobile and motor engine firms, but employment in the farm implement plants was rather dull. Following the temporary slackness at the end of last month the shipyards at New Westminster were reported as again active, and it was anticipated that more hands would soon be needed. The machine shops continued to be active, with the supply of labour about equal to the demand. The iron foundries and shipyards at Victoria were working to their full capacity and anticipated a further expansion in employment in the near future.

Foods, liquors and tobacco

Sydney reported that the abattoirs and meat packing houses continued to be active, but that due to the seasonal change that aerated waters and soft drink establishments were quieter. At Halifax the Scotia sugar refinery was quiet owing to shortage of raw material. There was a reduction in the manufacture of confectionery owing to the sugar restrictions. The flour and grinding mills at Westville reported a very quiet month owing to scarcity of wheat. Truro reported the milk factory running to capacity. St. John reported the flour and feed mills well employed and the sugar re-

finery running steadily. At Moncton the flour mills were quiet, but the bakeries were all active, and the creameries and cheese factories were very busy. At Newcastle the flour mills commenced grinding the local wheat. The flour mills at Fredericton were quiet, but the soft drink establishments were busy and bakers reported employment steady. Montreal reported most of the flour mills again in operation, but the sugar refineries working on a limited scale. Employment in the confectionery trade was quiet and the aerated water establishments were affected by the cold weather. Tobacco factories were busy, except where there were labour disputes. At Quebec the abattoirs were active, but the bakers and confectioners and tobacco factories were quiet, and breweries dull. Sherbrooke reported the abattoirs and meat packing houses active. In Toronto the flour and cereal industries were active, and the abattoirs, including the municipal abattoir, and meat packing houses had a busy month. Bakers were active, but confectioners were rather quiet. Fruit and vegetable canners were working to capacity, and cigarmakers were well employed. Hamilton reported the food group generally as active. At Niagara Falls and St. Catharines employment was good in the fruit canneries. Kingston reported the flour and feed mills and the breweries active. Belleville reported the flour and feed mills very busy and the fruit and vegetable canneries active. At Peterborough the flour and cereal plants worked to full capacity and the Quaker Oats Company needed additional help. The creameries, dairies and cheese factories were all very busy. Employment was very good in the flour mills and meat packing houses at Brantford. At Kitchener the flour mills ran full time and the wholesale sausage makers and meat packing houses were advertising for help. The cigar factories were advertising for help, while the breweries were running full time. The flour and feed mills at Guelph and Stratford were very active. The biscuit manufacturers at London were reported very busy, although handicapped to some extent by food regulations. The cigar factories were well employed. At Chatham the flour mills were running full time; and the Dominion Sugar Company were advertising for help, the harvesting of the beet crop having commenced during the early part of the month. The abattoir and packing company remained closed down. Windsor reported that the fruit and vegetable canneries were in great need of additional help. The cigar factories were short of rollers, in which work female help is preferred. The breweries and distilleries were fairly busy. At Owen Sound the Harrison flour mills were closed down owing to scarcity of water power, but other flour and oatmeal mills were busy. Employment was very good in tobacco factories. The brewery company at Sault Ste. Marie was working at capacity. The abattoirs and meat packing plants at Winnipeg reported business normal. There was some demand for experienced bakers. Vegetable canners reported help scarce. The flour and feed mills at Brandon and Regina were well employed. Moose Jaw reported that the arrival of new wheat had created activity in the flour, feed and cereal plants. The abattoir was well employed, but there was a falling off in the manufacture of butter. Prince Albert reported flour mills quiet, but the abattoirs very busy. The creameries were very well employed. At Saskatoon there was a shortage of unskilled labour in the flour mills. At Medicine Hat the flour mills resumed operations, and were working to full capacity. At Calgary the flour mills, abattoir and meat packing houses were fully employed, but the cigar factory and breweries were dull. At Edmonton the Swift Canadian Packing Company employed some 540 hands. Vancouver reported bakeries and confectionery houses and fruit and vegetable canneries very busy, while creameries, dairies and soft drink establishments were well employed. In cigar and tobacco factories women were steadily engaged. At New Westminster

employment was good in the meat packing house, the evaporating plant worked full time with two shifts, and the fruit and vegetable canneries were employed to capacity. Employment in the cigar factories was better than for several months past and all available men were employed. Employment was also good in the brewery. At Victoria the fruit and vegetable canneries were working to capacity and the aerated water plants and breweries were steadily engaged.

Textiles, cordage and carpets

The rope and twine works at Halifax were in need of additional help. The woollen mills at Truro worked full time. At St. John the Cornwall and York Cotton mills gave steady employment to about 400 hands. At Moncton the woollen mill ran steadily and the Atlantic Underwear Company was very busy. The cotton mills at Fredericton needed further help. The cotton mills at Montreal reported orders for months ahead, but a great difficulty in securing raw material. Quebec reported that the cotton mills were busy, but that the woollen mills were quiet. The Wabasso Cotton Company at Three Rivers continued to employ over 1,200 hands. Toronto reported that manufacturers of woollens and knitted goods were very busy, with large orders ahead. Hamilton reported the textile groups actively employed, with a demand for weavers in the cotton factories. At St. Catharines employment was good in the silks, knitted goods and woollen goods. Brockville reported some slackness among tent, awning and sail makers. At Kingston the cotton and woollen mills were active and the hosiery mill was short of help. Peterborough reported the woollen mills working overtime. The cotton and woollen mills at Galt were advertising for help. At Brantford the Slingsby Woollen Mills were very well employed on United States army orders. The cordage company was very busy. Kitchener reported the knitting and hosiery company were short of help, and that the felt factory and the Dominion Twine Company continued to be very well employed. The Guelph carpet factory was very active and short of weavers and female help. London reported the hosiery companies very busy. Chatham reported the woollen mills engaged to full capacity. At Winnipeg the knitting manufacturers employed the regular staff, although short of wool. The bag companies were taking on the additional hands available. The tent and awning business was at a standstill. At Edmonton the Great Western Garment Company employed some 250 hands. Vancouver reported employment in knitting factories was good and that tent, awning and sail makers were very well employed.

Clothing and laundering

Halifax reported that ready-made clothing manufacturers were short of female help and that the laundries and dye works continued to be busy. Truro reported that hands were being laid off at the cap factory. The tailor and dressmaking establishments at Moncton reported difficulty in securing help. The Maritime Hat and Cap Company employed about 40 hands as usual, and the laundries were very busy. Fredericton reported that garment workers were in demand, and employment good in the laundries and dyeing establishments. Montreal reported the usual seasonal activity in ready-made clothing establishments, and that laundries were unusually well employed. Quebec reported that the clothing group and steam laundries had a very busy month. Toronto reported a constant demand for female labour in the ready-made clothing and whitewear establishments, while the steam laundries and dyeing establishments had plenty of work. Hamilton reported some demand for help in the clothing group. Niagara Falls reported a constant demand for female help in the knitting, corset and suspender factories. At Peterborough the whitewear factory was well employed. At Galt the ladies' hat factories were active. Kitchener reported the

overall and shirt company very busy, and that help was wanted in the whitewear and shirt factories. At Guelph the whitewear factory was short-handed in the finishing department. London reported great activity in the clothing group. The ready-made clothiers at Winnipeg reported a slight demand for experienced help. The glove manufacturers took on some additional hands, and there was a steady demand for female help in the laundries and dyeing establishments. At Prince Albert the laundries and cleaning works were dull. Vancouver reported difficulty in obtaining skilled operators in the ready-made clothing and overall factories. The steam laundries were closed down owing to industrial troubles, but the cleaning and dyeing establishments were exceptionally busy. At Victoria the shirt and overall factories were operating to full capacity.

Pulp, paper and fibre

St. John reported that the pulp mill was steadily employed. Newcastle reported that the pulp and paper mills were very busy and that unskilled labour was very scarce, especially men for the woods. Sherbrooke reported the pulp and paper mills active. At Three Rivers the Wayagamack Pulp and Paper Company and the St. Maurice Company continued to employ 800 hands and 500 hands respectively. Hamilton reported that the felt and tar paper companies were active. St. Catharines reported that the beaverboard, paper and other pulp product companies were busy. The Spanish Pulp and Paper Company at Sault Ste. Marie were operating day and night and in constant need of additional help. Victoria reported the pulp and paper mills were operating steadily and that the mill which has been under construction at Port Alice was now in operation and that about 600 men were employed.

Printing, publishing and paper goods

Halifax reported a serious shortage of compositors and platen pressmen, and that as a result much overtime was being worked. Employment was very good in the paper box factory. Charlottetown reported that printers and bookbinders were steadily employed. At St. John the paper box factories were well employed on Christmas orders. At Moncton and Fredericton the job printing offices were active. Montreal reported that newspaper offices and job printing plants employed all the men available, although the volume of work was far under pre-war times. Quebec reported a very busy month in the printing trades. Toronto reported that printers, bookbinders and lithographers were well employed, and that there was a general demand for both experienced workers and apprentices in the paper box factories. Niagara Falls reported that skilled labourers and apprentices and girl press-feeders were wanted. Kingston reported newspaper and job printing houses active. Galt reported that the printing business improved during the month, and that the paper box factory was very active. The Hampel Paper Box Company at Brantford was busy. At Kitchener help was wanted in the paper box factory. Woodstock reported a demand for job printers. London reported the printing houses well employed and the paper box companies very busy. Owing to shortage of men the newspaper and job printing houses at Chatham resorted to overtime. At Windsor the newspaper staff was increased and the job printing plants reported an improvement in activity. The paper box and novelty houses were well employed. Winnipeg reported that the publishing houses and binderies gave employment to their regular staffs, and that paper box manufacturers were advertising for help. At Regina the supply of printers was about equal to the demand. Medicine Hat reported some

slackness in the printing business. In the job printing offices in New Westminster employment was normal, but at Nanaimo the printing houses were rather dull.

Woodworking and furniture

At Halifax and Sydney the sash, door and planing mills continued to work to capacity, and at Amherst they were very active, with a shortage of skilled help. Charlottetown reported that woodworkers were well employed. At St. John the sash, door and planing mills were busy, the wooden box factory was active and the broom and brush factories working steadily. Employment was steady in the sash and door factory at Moncton. At Newcastle some overtime was worked in the box factory. Fredericton reported that all woodworking concerns were busy. Quebec reported that the box factories were very well employed. Sherbrooke reported that employment was fair in the planing mills and good in the chair factories. At Three Rivers the sash and door factories were active. Sorel reported employment fairly good in the furniture factory. Toronto reported that woodworkers in all lines were well employed, and that the piano, brush and toy factories had a busy month. The planing mills at Niagara Falls and St. Catharines were actively engaged. At Kingston the sash, door and planing mills and broom factories were active and the piano factory was fairly well employed. The furniture factories at Belleville were well employed on plain furniture. Employment was good in the box factories at Peterborough and at Galt they were looking for help. Planing mills at Brantford were reported very busy. At Kitchener the furniture factories ran full time, also the cooperage company and the piano and organ factory. At Guelph the piano and sewing machine makers were very active. At Stratford the cooperage and stave workers were very well employed. At Woodstock there was a demand for cabinet makers and finishers in the furniture factories, and for action-makers and cabinet makers in the piano and organ factories. A piano company at London reported a labour shortage, but that female help was being used to counteract this. At Chatham some overtime was worked in the sash, door and planing mills and the wooden box factories were well employed. Windsor reported the sash, door and planing mills dull and that the piano factories were busy on exhibits for the fall fair. At Owen Sound there was a slight demand for help in the furniture factories. The sash, door and planing mills at Sault Ste. Marie were working to capacity. At Brandon the sash and door factories were very quiet, but at Regina they ran full time. The planing mills at Medicine Hat were reported as very quiet, but at New Westminster the sash and door factories worked full time, and the wooden box factories were very busy. At Nanaimo the sash and door mills were steadily employed.

Leather, boots, shoes and rubber

The Amherst Boot and Shoe Company, who were working on a Government order, reported a shortage of help; the trunk and bag company was also short of skilled labour. At St. John the tannery was advertising for help and employment was good in the harness shops. The Humphrey Shoe Company was forced to close down permanently on account of the difficulty experienced in keeping employees due to the higher wages being offered elsewhere. At Fredericton the tanneries were fairly busy, and the boot and larrigan factories were very busy. Montreal reported that the tanneries were quiet owing to great difficulty in getting South American hides. In Quebec the tanneries and boot and shoe factories had a quiet month, but at Three Rivers the boot and shoe factories were reported as fairly busy. Sorel reported that employment was good in the leather trades. In Toronto the boot and shoe industry was quiet, though some improvement was reported towards the end of the month. Harness and horse goods

makers were well employed, and rubber manufacturers were operating steadily. The shoe-parts factory at Niagara Falls was advertising for female help. At St. Catharines the rubber footwear factories were well employed. Kingston reported that the tanneries were working overtime, and at Peterborough the leather workers were busy and the boot and shoe factories active. At Galt shoe workers were in demand. Kitchener reported the tanneries running full time and short of help, and that employment was good in the leather group generally. The Dominion Tire Company, with about 400 hands, were in need of more help, and the two rubber factories were very busy. London reported the tannery and shoe factories working overtime. St. Thomas reported some demand for skilled shoe workers. At Brandon the tanneries were fairly active, but trunk and bag makers were busy. At Calgary the horse goods workers were well employed. At Vancouver employment was very good in the boot and shoe factories. New Westminster reported normal conditions at the tannery.

Clay, glass and stone

St. John reported that employment was fairly good in cut stone and granite wear. In brick, tile and sewer pipe work it was slack, but good in the cement, lime and plaster works. At Moncton it was anticipated that the Humpreys Glass Works would shortly recommence operations on a larger scale. The cement block plants were active. Quebec reported that stonecutters had a dull month. Toronto reported that the brick makers were busy and the glass factories active. Hamilton reported the clay, glass and stone group active. Kingston reported that the cut stone and granite trades were dull. The pottery at Belleville was steadily employed. At Kitchener the stonecutters were well employed, but brick and sewer pipe workers were rather dull. Stratford reported the brick and tile yards busy. Chatham reported that the brickyards and tile companies were quiet, but that cement tile and block firms were very active. At Windsor the cement, lime and plaster group was very dull. At Brandon the brick works were closed. Regina reported the cut stone and granite workers well employed. At Medicine Hat the brick and tile plants were rather quiet, but the stoneware industry continued to be well employed. Nanaimo reported that the brickyards were practically closed.

Paints, oils, chemicals, explosives

Halifax reported that the paint factory continued to be well employed. Newcastle reported that the extract factory was working day and night. The cartridge factories at Quebec reported a very busy month. Toronto reported that the paint and varnish plants were in steady operation and that employment was good at the soap factories. Niagara Falls reported that the electro-chemical plants were all busy. The Scarfe Varnish Company at Brantford was very busy. The oil and grease companies at Kitchener were fairly well employed. All the drug concerns at Windsor reported a shortage of female help. The chemical works at Sault Ste. Marie were working day and night. Regina reported that the oil works ran with a full staff. Medicine Hat reported that the linseed oil mills were closed down waiting for the new crop. The paint and soap factories in Victoria were operating steadily, and the power and explosives plants were running double shifts.

Railways, shipping and 'longshore work

The earnings of the Canadian Pacific Railway during August were $13,109,753, as compared with $12,414,537 for the same month in 1917. Halifax reported that employment was good on the steam railways and electric railways and repair shops, but that 'longshoremen had a very dull month. Charlottetown reported that all railway employees were steadily engaged and that

'longshoremen were active. St. John reported that the steam railways were busy, and that electric railways were proposing to run a few one-man cars owing to the shortage of operators. The railway repair shops were busy, but navigation was slack and 'longshore work dull in consequence. Transfers, liveries and garages had a good month. Moncton reported that operating crews and freight handlers on the steam railways were very active. Fredericton reported that railway employees were very busy. Montreal and Quebec reported that the railway companies were doing a record business and that employment was very good in 'longshore work. Three Rivers reported that the steamship lines had all the business they could manage. Toronto reported that railway employees had an active month with a heavy movement of freight, that the repair shops were busy; and that additional help was required for the street railways, the number of men on the operating staff being about 400 fewer than a year ago. Hamilton reported that the inland navigation lines were all active, also that there was a demand for teamsters and 'longshoremen. Navigation was not so active as in the previous month owing to unfavourable weather. Niagara Falls reported that steam railways were busy, and that the new yards of the Toronto, Hamilton and Buffalo Railway were giving additional employment. The electric railways were quieter owing to the close of the tourist season. Brockville reported that 'longshoremen were fairly well employed owing to the arrival of a considerable amount of coal. Kingston reported that the steam railways and repair shops were active, and that the electric railways reported business fair. Employment was fair in navigation and 'longshore work. Peterborough reported the steam railways were very busy shipping grain, mainly oats. Stratford reported railway workers, expressmen and repair shop employees very active. The G.T.R. car shops at London were busy. St. Thomas reported that certain departments of the railroads had some difficulty in obtaining men. Chatham reported that the electric railway was actively engaged in transporting sugar beets. Owen Sound reported that navigation was about normal. All the railway shops at Winnipeg reported normal conditions without any change in employment. The street railway companies were advertising for help. Regina reported a fair amount of activity on the steam and electric railways. Moose Jaw reported that the light crops had affected the usual increase in railway business for the season. Saskatoon reported a considerable shortage of freight handlers. Employment on the C.P.R. at Medicine Hat was normal for the season. Traffic fell off very considerably at Fernie owing to the suspension of coal and coke shipments, although there was some compensatory increase in lumber shipments. New Westminster reported that the railway repair shops were employing men to the limit of their capacity. The street railway business was reported as very active, and the auto garages were working to capacity. Victoria reported some decrease in navigation.

Mining and quarrying

Quebec reported activity in stone quarrying. Sherbrooke reported fair activity in the mining group and that the granite quarries had difficulty in getting help. During September the Cobalt mines shipped 34 cars containing 2,510,270 pounds of ore, as compared with 36 cars containing 2,554,180 pounds in August. Bullion shipments for September amounted to 480,298 ounces as compared with 801,356 ounces in August. The supply of labour during the month was fairly satisfactory, due partly to the 25 cent daily bonus paid to the mine workers as a result of the wartime high prices of silver. In the Porcupine gold area there was still a pronounced shortage of skilled labour, although the Hollinger and McIntyre Porcupine mines continued to maintain a good production. Development work was being extended to greater depth at the

Dome mines. In the Kirkland Lake camp work was resumed at the Teck Hughes mine during the last week of September. The Lake Shore mines produced about $1,400 daily. There was a steady demand for labour in the mining centre between Fort William and Fort Frances. The Mond Nickel Company were also calling for many men. Conditions at the Rossland mines continued to be quiet. A fire at the Trail smelter did some damage, but no men will be thrown out of employment as a result. Nanaimo reported quartz mining was quiet, but that improvement work was going on.

Sydney reported the output of the Dominion Coal Company as 250,000 tons as against 292,000 tons in August. The output at the Sydney mines was 40,250 tons as against 42,000 tons in August. As in the case of steel, these reductions in output were partly attributed to there being two working days less in the month and to the slowing down after-effects of Labour Day. The coke output of the Dominion Steel Company was 33,500 tons as compared with 35,000 tons in August. The coke output at the Sydney mines was 8,800 tons, with 184 ovens in operation, as compared with 9,500 tons and 180 ovens in operation in August. Westville reported a general strike in the coal mines in the vicinity. The mines at Minto continued to increase their output and miners were in demand. The new company who took over the old Ainsley coal mine near Medicine Hat commenced operations during the month. Calgary reported that all the miners of the district were being absorbed and that more were required. In the Fernie and Michel coal fields, strike conditions prevailed during practically the whole month. Nanaimo reported that the coal mines of the district were being worked to capacity, but that skilled labour was very scarce. It was anticipated that the Canadian Western Fuel Company will be getting coal out of their new shafts before the end of the year.

Building and construction

Halifax reported continued great activity in building, construction and repair work. Truro reported that carpenters continued to be well employed, but that painters were rather slack owing to bad weather. Charlottetown reported that building tradesmen had steady employment. St. John reported that a few new contracts had been let. Moncton reported that there was a good demand for carpenters and other building mechanics, and Fredericton reported that the building trades were well employed. Quebec reported a very large falling off in building work, but that there still existed a difficulty in securing sufficient labour. Sorel reported that all branches of the building trade were well employed. The building trades in Toronto were active in the construction of small houses and additions to industrial plants. Work was commenced on the military casualty clearing station and barracks. A number of factory additions in Hamilton gave good employment to the building trades. Niagara Falls reported the building trades all busy. St. Catharines and Brockville reported a fair demand for labour. The building trades at Kingston were well employed on workingmen's dwellings, the addition to the military hospital and on the new barracks at Barriefield. Peterborough and Galt reported that considerable building was going on and that employment was good. At Brantford and Kitchener some factory extensions were being made, but very few dwellings were going up. Guelph reported that outside building trades were fairly well employed and that inside trades were active. Woodstock reported that the supply of building labour was about equal to the demand. London was very quiet. Chatham reported that the building trades were brisk. Windsor and Owen Sound reported that the building trades were practically at a standstill. The building tradesmen at Winnipeg continued to be well employed, due partly to the reduced number

available. Brandon reported a very good demand for skilled carpenters, masons and concrete workers. At Regina the building trades were brisk, but at Moose Jaw they were very dull. Prince Albert reported that the P. Burns Company's packing house was practically completed, but that a number of men were busy on finishing work. Building trades were dull at New Westminster, but at Nanaimo carpenters were steadily employed.

The value of building permits issued in 35 cities decreased from $5,018,092 in August to $2,690,821 in September, or 46 per cent. As compared with September, 1917, there was a decrease of 5.8 per cent.

Lumbering

Charlottetown reported that the saw and shingle mills were quiet. St. John reported the sawmills well employed, and that the lumber mill at Grand Bay started operations for the first time this year. Newcastle reported that with one exception all the mills were still busy. It was anticipated that with the large amount of lumber now on hand and the scarcity of men for the woods that operations would be somewhat curtailed this winter. Fredericton reported that most of the lumber mills were still running, but that the men were preparing to go to the lumber camps. Quebec reported great difficulty in securing sufficient men for the lumber camps, although $80.00 a month and board was being offered. Sherbrooke reported that the saw and shingle mills were active. Peterborough reported the lumber industry was quiet owing to the shortage of men and that most of the lumber used was being shipped in from other points. Sault Ste. Marie reported that owing to the scarcity of skilled men lumbering operations would be carried out on a small scale this season, the operators claiming that with inexperienced men and high wages they would be forced to produce at a loss. The lumber mills at Prince Albert laid off their night shift and were advertising for 5,000 men for the winter camps. Nelson reported that the lumber mills of the district were quiet. At New Westminster the sawmills were very busy, but the shingle mills were held back by a shortage of cars. The logging camps in the Nanaimo district were absorbing all the labour available. The sawmills were working full time, but employment in the shingle mills was rather unsteady. Victoria reported the lumber industry working to capacity, with a large demand for lumber for shipbuilding and aeroplane manufacture.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING SEPTEMBER, 1918

DURING the month of September the Department received reports from three Boards of Conciliation and Investigation appointed to inquire into disputes affecting: (1) The Hamilton Cotton Company and certain of its employees (2) The Polson Iron Works, Limited, Toronto, and certain of its marine pipe and steamfitters; and (3) Certain firms, being members of the Employers' Association of Toronto, and various classes of their workmen. A report was received from the Board of Appeal to which had been referred the dispute between the Canadian General Electric Company, Peterborough, Ont., and its machinists, specialists and electrical workers, also an interim report from the Royal Commission established under the Inquiries Act to investigate the dispute existing on the British Columbia coast between various shipowners and their employees, being

masters and mates, members of the Canadian Merchant Service Guild.

Eight applications were received for the establishment of Boards, two Boards were established in connection with applications which had been received during the preceding month, and advice was received of an amicable settlement by direct negotiations of the dispute between the Quebec Railway, Light, Heat and Power Company and its mechanics of various classes. The powers of the Royal Commission appointed under the Inquiries Act to investigate the dispute existing on the British Columbia coast between various shipowners and their employees, being masters and mates, members of the Canadian Merchant Service Guild, were extended during September to investigate also any differences which might exist on the vessels operating on the lakes and rivers of British Columbia.

Applications Received

An application was received from the employees of the Winnipeg Electric Railway Company, being members of Winnipeg Division No. 99 of the Amalgamated Association of Street and Electric Railway Employees of America, for a Board to deal with a dispute concerning wages. A Board was established as follows: The Honourable Mr. Chief Justice Mathers, Winnipeg, chairman, and Messrs. Isaac Pitblado and R. S. Ward, Winnipeg, nominees of the company and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two Board members.

An application was received from the employees of the Bell Telephone Company, Toronto, being operators, clerks, messengers, etc., members of Local No. 83A of the International Brotherhood of Electrical Workers, for a Board to deal with a dispute concerning wages, hours, payment of overtime and general conditions of employment. A Board was established as follows: His Honour Judge Colin G. Snider, Hamilton, and Messrs. E. H. Ambrose, Hamilton, and Fred. Bancroft, Toronto, nominees of the company and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two Board members.

An application was received from the employees of various firms in Brantford, Ont., members of the Brantford Builders' Exchange, for a Board to deal with a dispute relating to wages, the employees concerned being members of Locals Nos. 498 and 2602, United Brotherhood of Carpenters and Joiners. This dispute did not fall within the scope of the Industrial Disputes Investigation Act and a Board could be established only by mutual consent of the disputants, the employers refusing this consent, no action looking to the establishment of a Board could be taken.

An application was received from the civic employees and labourers of the Corporation of New Westminster, members of the New Westminster Civic Employees' Union, for a Board to deal with a dispute concerning wages. This being a municipal corporation the applicants were advised that the dispute did not fall within the scope of the Industrial Disputes Investigation Act, and that a Board could not be established except by the joint consent of the disputants. The municipality refusing this consent, no action looking to the establishment of a Board could be taken.

An application was received from the employees of the John Inglis Company, the Polson Iron Works and the Canadian Allis-Chalmers Company, Toronto, members of the Brotherhood of Boilermakers and Iron Ship Builders and Helpers of Canada, Local No. 1, for a Board to deal with a dispute concerning wages. The employers were members of the Employers' Association of Toronto, and the secretary of that body was authorized to speak for the employers concerned. A Board was established as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, and Messrs. James G. Merrick and James Higgins, Toronto, nominees of the companies and

employees respectively. The chairman was appointed on the recommendation of the other two Board members.

An application was received from the employees of the Nicholson File Company, Port Hope, Ont., being file workers, for a Board to deal with a dispute concerning wages, union recognition and working conditions. The application was under consideration at the close of the month.

An application was received from the employees of the British Chemical Company, Trenton, Ont., being carpenters and millwrights, members of Local No. 1622, United Brotherhood of Carpenters and Joiners, for a Board to deal with a dispute concerning wages. The application was under consideration at the close of the month.

An application was received from the employees of the Temiskaming and Northern Ontario Railway, being clerks, baggagemen and freight handlers, members of the Canadian Brotherhood of Railroad Employees, for a Board to deal with a dispute concerning wages and working conditions. As this railway operates under the control of the Provincial Government it was ruled that the dispute did not fall within the scope of the Industrial Disputes Investigation Act, and the applicants were advised that a Board could not be established except by joint consent of the disputants.

Other Proceedings under Act

During September advice was received that an amicable adjustment had been made by joint agreement of the dispute between the Quebec Railway, Light, Heat and Power Company and its employees, being mechanics of various classes, who had made application for a Board of Conciliation and Investigation during July.

A Board was established during September to deal with a dispute between the National Manufacturing Company and its employees, members of the Munitions Workers Federal Labour Union, No. 56. The Board was composed as follows: Mr. Hamnett P. Hill, Ottawa, chairman, and Messrs. Geo. F. Henderson, K.C., and Romeo R. Marcil, Ottawa, nominees of the company and employees respectively. The chairman was appointed on the joint recommendation of the other two Board members.

A Board was established during September to deal with a dispute between the Canadian Express Company and its employees. The Board was composed as follows: His Honour Judge R. Ruddy, Whitby, Ont., chairman, and Messrs. F. H. McGuigan and J. G. O'Donoghue, Toronto, nominees of the company and employees respectively. The chairman was appointed by the Minister in the absence of a joint recommendation from the other two Board members.

Report of Board in Dispute between the Hamilton Cotton Company and certain of its Employees

A REPORT was received from the Board established to deal with the dispute between the Hamilton Cotton Company and certain of its employees, concerning alleged discrimination against members of the union and a demand for their reinstatement. The Board was composed as follows: His Honour Judge L. B. C. Livingstone, Welland, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. S. F. Washington, K.C., and F. J. Flatman, Hamilton, nominees of the company and employees respectively. The award was signed by the chairman and Mr. Flatman, and the minority report by Mr. Washington, the point of difference being as to the cause for the dismissal

of the employees involved, Mr. Washington maintaining that the company was justified in the action which it had taken.

Report of Board

Hon. T. W. Crothers,
Minister of Labour, Ottawa.

Sir,—

Re Industrial Disputes Investigation Act, 1907, and of a dispute between Hamilton Cotton Company (employer) and certain of its employees (employees), the undersigned members of the Board of Conciliation beg to report as follows:

1. The members of the Board met at Hamilton on the thirteenth day of September, 1918, and discussed the matters in dispute between the parties, and it was then arranged to hear the parties and their witnesses on the twenty-fifth day of September, 1918, at Hamilton.

2. The Board met accordingly at the Court House, Hamilton, on Wednesday, the twenty-fifth day of September, 1918, and on the following day, when the parties and their witnesses were heard.

3. It was apparent from the first that no amicable arrangement between the parties could be brought about by the Board, and so far as we can see all we can do is to report the facts as they appeared to us, which are as follows:

The Hamilton Cotton Company employs about 500 hands, of whom about 30 per cent are men and boys and the balance women and girls. In or about the month of May certain of these employees, both men and women, formed a union, and James McClymont, Thomas McClymont and Elizabeth Lumsden, who were employees of the company, became respectively financial secretary, recording secretary, and vice-president of the union. On or about the thirteenth day of July, 1918, James McClymont and Thomas McClymont were discharged by the company from its employment. The McClymonts allege that their dismissal took place because of the fact that they were active members of the union. This the company denies and alleges other grounds for the discharge. The evidence offered by the company to show the grounds for the dismissal of these men failed to satisfy us that the grounds alleged by the company were the real grounds upon which they acted. For that reason, and taking into consideration all the surrounding circumstances, we are driven to the conclusion that the McClymonts were dismissed because of their connection with the union.

Following the discharge of the McClymonts, and on or about the second day of August, 1918, the company discharged Mrs. Lumsden from its employment. She was engaged at certain machines for making lamp wicks, and the company contend that they had got ahead of their orders and had accumulated so much of this particular stock that it became necessary to stop the production of it for a time. They notified Mrs. Lumsden to stop work on the machines. We find that the foreman, Brindle, who delivered the message to Mrs. Lumsden, did not, as was afterwards alleged, at that time offer Mrs. Lumsden other work in the factory. This led to the strike, and some 75 employees went out. It is quite possible that the reasons offered by the company for the discharge of Mrs. Lumsden were the true reasons, but on the other hand, in view of what had already transpired, it was natural that the members of the union should come to the conclusion which they seem to have arrived at that Mrs. Lumsden was dismissed for other reasons than those alleged. We are not able to make a more definite finding in this connection.

As to the allegation made on the application for the Board that in addition to the persons already referred to, another member of the union was dismissed by the company, we may say that the only evidence offered in this connection related to the case of one Vassil. He was an employee of the company and a member of the union, and he went out on strike with the others, and was not dismissed. The action of the employees in going out on strike as they did was hasty and inconsiderate, and no doubt occasioned loss and great inconvenience to the company. The company allege that the action of Vassil in leaving as he did occasioned damage to some of the yarn in his charge. This is no doubt correct, and we think under all the circumstances the company was justified in refusing to re-engage Vassil. We do not think that Vassil, in acting as he did, did so with the intention of damaging the company's property.

We may add that nearly all the other employees who went out returned again to work within a week or two.

We remain,

Your obedient servants,

(Sgd.) L. B. C. Livingstone,
Chairman.

(Sgd.) F. J. Flatman.

Hamilton, Sept. 26, 1918.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between Hamilton Cotton Company (employer) and certain of its employees (employees).

The only charge before the Board was that there was discrimination by the employer against the officers of Local Union No. 1140, vice-president, recording secretary, financial secretary and one member having been discharged.

In my opinion there was no evidence whatever to support this charge. There was in fact no direct evidence at all, but it was argued on behalf of the employees that because these employees were discharged shortly after the union was formed, the Board should draw the inference that they were discharged because they were members of the union. I cannot draw that inference, particularly as all the responsible officials of the employer company swore that that was not the reason and gave reasons for the dismissal of two and the refusal to reinstate a third, which appear to me to amply justify their action. As to the fourth, it is extremely doubtful that she was dismissed; her leaving arose really from a misunderstanding, and a little discretion on her part would have led to her reinstatement. In any case the employer was not called upon, or should not have been called upon, to justify dismissals; it could have dismissed on notice for no cause; all it was required to do was to show that there was no dismissal for the reason charged, if there had been any evidence that that was the reason, which there was not.

(Sgd.) S. F. Washington,
Member of Board.

Hamilton, Sept. 26, 1918.

Report of Board in Dispute between the Polson Iron Works, Limited, Toronto, and its Employees

A REPORT was received from the Board established to deal with the dispute between the Polson Iron Works, Limited, Toronto, and its employees, being members of Local Union No. 731, United Association of Plumbers and Steamfitters of United States and Canada.

The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, appointed on the joint recommendation of the other two Board members, Messrs. James G. Merrick and Fred. Bancroft, Toronto, nominees of the company and employees respectively. The report, which was unanimous, contained advice that the matters in dispute had been settled between the parties concerned and a copy of the agreement reached was attached to the report.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Polson Iron Works, Limited (employer) and its marine pipe and steamfitters (employees).

To the Honourable T. W. Crothers, K.C.,
Minister of Labour.

Sir,—

The Board of Investigation and Conciliation appointed in the dispute between certain members of the Employers' Association of Toronto and their employees, being members of the International Brotherhood of Blacksmiths and Helpers and the Amalgamated Society of Engineers, has the honour to report as follows:

Acting upon your appointment and direction in the first above-mentioned dispute referring this dispute to the Board established in the blacksmiths' matter, we entered into communication with Polson Iron Works Company and its steamfitters, notifying them of your reference of the matter, and that this Board would take up their dispute at the first opportunity during the sittings in the blacksmiths' case, and urging a settlement. As it became desirable to give the parties in the blacksmiths' case an opportunity to consult over suggestions made to overcome certain points in dispute, we notified the employer and the employees in the Polson Iron Works dispute to attend before us at the City Hall in Toronto on the twenty-fifth day of September, 1918, at ten o'clock a.m.

Pursuant to this appointment the Board met at the City Hall and was attended by Mr. Henry H. Miller, the assistant manager and vice-president of the Polson Iron Works, Limited, and by Mr. Fred. Newman, president of the shop committee of the Marine Pipe and Steamfitters, for the employees. They announced that they had come to an agreement settling their dispute, and, although no time limit is set in the agreement, both appear satisfied that it will continue operative and productive of harmony for a considerable term. A duplicate original of the agreement entered into is attached to and hereby made part of our report.

We, the members of the Board, have the honour to be,

Your obedient servants,

(Sgd.) Colin G. Snider,
Chairman.
(Sgd.) James G. Merrick.
(Sgd.) Fred. Bancroft.

Toronto, September 25, 1918.

Polson Iron Works, Limited,
Toronto, Can., Sept. 23, 1918.

(Duplicate Original.)

Marine Steam and Pipe Fitters
of Polson Iron Works, Limited.

(Attention, Shop Committee, c/o Mr. Fred. Newman.)

Gentlemen,—

As per my verbal conversation above date, we will agree, providing you return to work Tuesday a.m., September 24, to pay sixty-five (65c) per hour, with conditions remaining same as existed previous to your going on strike.

Trusting this will gain the result that work will be resumed immediately, and the same co-operation will exist as formerly, I remain,

Yours truly,
Polson Iron Works, Limited,
(Sgd.) F. E. Wall,
Works Manager.

Accepted on behalf of men:
(Sgd.) Fred. Newman.
(Sgd.) S. Tippen.

Report of Board in Dispute between certain Firms in Toronto, Members of the Employers' Association of Toronto, and their Employees

A REPORT was received from the Board established to deal with the dispute between certain firms in Toronto, members of the Employers' Association of Toronto, and their employees, being various classes of workmen, members respectively of the International Brotherhood of Blacksmiths and Helpers and of the Amalgamated Society of Engineers.

The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. James G. Merrick and Fred. Bancroft, Toronto, nominees of the employers and employees respectively. The award, which was signed by the chairman and Mr. Bancroft, was accompanied by recommendations as to the settlement of the dispute and a proposed schedule of wages. A minority report was presented by Mr. Merrick.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between certain firms, being members of Employers' Association of Toronto (employer) and various classes of workmen, members respectively of the International Brotherhood of Blacksmiths and Helpers and of the Amalgamated Society of Engineers (employees).

To the Honourable
T. W. Crothers, K.C., M.P.,
Minister of Labour, Ottawa.

Sir,—

The Board of Conciliation herein have the honour to report as follows:

Pursuant to appointment made, after consultation between the members, the Board met in room 220 in the City Hall in Toronto on the morning of Tuesday, September the twenty-fourth, 1918, and continued in session that day and on the twenty-sixth and twenty-seventh days of September instant. The representatives of the employers and of the employees were in attendance at the sittings on the twenty-fourth and twenty-sixth. The firms that were represented were: The Canadian Allis-Chalmers Company, Limited; The John Inglis Company, Limited; The Polson Iron Works, Limited, and John Whitfield Company. The British Forgings, Limited, was not represented before us, but it was stated by those in attendance that this last named company will act in accordance with the four firms that were in attendance.

For the employees Messrs. W. G. Powlesland, vice-president, International Blacksmiths; A. H. McNamee, general organizer, Amalgamated Society of Engineers, and R. H. Gregory, a blacksmith, attended throughout the sittings of the Board on the twenty-fourth and twenty-sixth September last.

The schedule presented by the employees as constituting their demand contains seven rules or paragraphs. On going over these with the employers and employees present, the employers agreed to all excepting the third rule, that as to wages, and the seventh rule, that as to the life of the agreement. The Board heard and encouraged a full statement of the views and reasons for and against rule 7. The employers

desired it to last 12 months, as less, they agreed, would not justify them in risking entering into contracts for work which would require that much time to complete, as most of the desirable contracts offering would do. The employees on the other hand said that the rapidly changing prices of things they must have prevented them from binding themselves for a longer term than six months. We were under the impression that we had secured an agreement between the parties on this rule 7, but at the close of the proceedings the representatives of the employees said they had not agreed to the modified proposition presented. On this rule 7 and on rule 3 (wages) we induced the parties to enter into an effort to settle apart from us, but they reported that no agreement could be arrived at, and that the Board would have to consider the facts, arguments and filings submitted and report the Board's conclusions as to wages and length of time it considered the rates suggested should be in force.

We have added as part of this report the schedule of rules, the five agreed to by the parties, and rule 3 (the rates of wages) and rule 7 (the length of time) recommended by the chairman, Colin G. Snider, and Fred. Bancroft, for acceptance by the employers and the employees as being in the opinion of the Board just and fair according to the facts and arguments submitted and the conditions prevailing and those likely to come during the term mentioned in rule 7.

The employers and employees held a conference on these demands about the fifteenth day of July, when the employers offered an increase in wages, which, after consideration at a general meeting of the employees, they refused to accept and they went out on strike on the seventh of August. On the twenty-second of August, 1918, the employees returned to work and applied to your Department for a Board of Conciliation. The rate of wages they have been receiving since the twenty-second of August is set down the chairman's notes of the proceedings returned among the papers.

James G. Merrick does not join in this report and will submit a minority report. He does agree to all the rules in the schedule attached excepting rule 3 (the wages clause) and rule 7 (the life of the agreement), in neither of which does he concur.

All of which we, the undersigned, have the honour to report.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) FRED. BANCROFT,
for Employees.

Dated at Toronto, this twenty-seventh day of September, 1918.

SCHEDULE OF RULES.

Rule 1.—Nine (9) hours shall constitute a day's work, between the hours of 7 a.m. and 5.30 p.m. for the first five days of the week. On Saturdays, from 7 a.m. to 12 o'clock noon.

Rule 2.—All time worked after the regular working hours, until 10 p.m., for the first five days of the week, and after 12 o'clock noon to 5 p.m. on Saturday, will be paid at the rate of time and one-half time, after which double time will be paid.

Double time will also be paid for all time worked on Sundays and the following holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas Day.

In the event of any of the above holidays falling on Sunday the overtime rates shall be paid for the day on which the holiday is observed.

Rule 3.—The rates shall be as follows:

	Per hour.
First heavy forgers	85c
Second heavy forgers	75c
Heavy fire blacksmiths and toolsmiths	68c
General blacksmiths	68c
Forging machine operators	60c
Heaters and first helpers for heavy forgers and heavy fires	50c
Tip welders	55c
General helpers and hammer drivers	45c

When the helpers are required to build fires before the regular starting time, they will be allowed thirty (30) minutes' extra pay per day.

Rule 4.—When a regular night shift is employed, they will receive 10 per cent in excess of the regular hourly rate of pay.

Clause (a) of Rule 4.—Hours to be worked on night shift shall be as follows: Ten hours per night from Monday night until Friday night inclusive. All hours worked in excess of this shall be overtime and paid for as follows: From the end of the regular working night, time and one-half for the first five hours, after that double time until workman goes off duty. From 12 midnight Saturday to midnight Sunday to be paid double time.

Rule 5.—In the event of grievances arising between parties to this agreement, it is agreed that the employers will meet a committee of their employees, or their accredited representatives, for the purpose of effecting a settlement, and that no suspension of work or lockout shall take place until every effort has been made to settle such grievances.

Rule 6.—No discrimination shall be shown against any committee elected by the men to represent them on any grievances affecting them.

Rule 7.—This agreement to remain in effect for 12 months from the twentieth day of August, 1918, from which day this report is to have effect, with a right to a reconsideration by the parties, of the wage scale, at the end of six months from the twentieth day of August, 1918, if the cost of living has materially increased in the meantime, and in case the parties cannot then agree as to the rate of pay, a third person is to be chosen by them to decide between them.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) FRED. BANCROFT,
for Employees.

Toronto, September 27, 1918.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and *re* differences between certain firms, being members of the Employers' Association of Toronto, and various classes of workmen, members respectively of the International Brotherhood of Blacksmiths and Helpers and of the Amalgamated Society of Engineers.

To the Honourable Thomas W. Crothers,
Minister of Labour, Ottawa, Ont.

Sir,—

I have the honour to submit the following Minority Report as a member of the Board of Conciliation and Arbitration appointed to adjust, if possible, the differences between certain of the employees, being blacksmiths and helpers of the Canadian Allis-Chalmers Company, Limited; The John Inglis Company, Limited; The Pelson Iron Works, Limited; John Whitfield Company, Limited; The British Forgings, Limited.

In order that there may be a clear record of the causes which brought about the reference of the demands of the employees to a Board of Conciliation, I hereby beg to set before you a resumé of the efforts made to arrive at a mutual settlement previous to the strike which occurred on the seventh of August.

A form of agreement was sent to me as secretary of the Employers' Association, from Mr. Powlesland, on behalf of the blacksmiths and helpers, containing nine clauses, to which a reply was requested within 15 days from date. A reply was sent asking for a list of the principal firms where the members of the organization are employed. This list was promptly forwarded, and a preliminary meeting of the firms held to decide upon what action should be taken in connection with the demand.

A sub-committee composed of Messrs. Bates, Inglis, Whitfield, and Miller, was nominated to enter into negotiations with the committee representing the men, in order to see if a settlement could not be arrived at. Several meetings were held, at the first of which an offer of 2½c per hour was made. This was rejected by the unions, and a further offer was made on August 2 of 2½c an hour for helpers and 5c for blacksmiths. This offer was made after the firms had met and secured detailed information as to the wages being paid to the trade in the city, and after a table had been prepared showing the number of firms reporting and the hourly rate being paid to every man in the employ of the nine firms from whom the information was sought, and showing the total number employed under the different wage headings. (Copy of this schedule is attached.)

The blacksmiths' committee agreed to submit this offer of 2½c and 5c per hour to their meeting, which was to be held on the evening of August 6, and to bring back a reply to a meeting of the joint committees which was to have been held on Friday, August 9.

Instead of a reply being received through the committee in joint session with the committee from the employers, the following communication was received, dated August 3:

Dear Sir,—

We have been instructed by a mass meeting of blacksmiths and helpers of the above organizations, held Friday, August 2, to inform you that the wage conditions offered by the Employers' Association of Toronto to meet demands put forward by men in the aforementioned trade as per schedule presented to you are totally inadequate and unacceptable.

Furthermore, it was unanimously resolved that whereas schedule was drafted only after full consideration of requirements to meet the abnormal increases in the cost of living, that the conditions stated therein are the minimum terms that can be accepted.

Therefore, in order to secure these conditions, notice be given to all employers throughout Toronto that, failing a satisfactory settlement along these lines by 8 p.m. Tuesday, August 6, an immediate cessation of work will appertain in all plants not acceding.

In placing this statement before you we suggest a further immediate conference on matters in dispute.

Yours truly,
(Sgd.) W. G. Powlesland.
(Sgd.) A. H. McNamee.

Toronto, October 1, 1918.

In the belief that the negotiations were proceeding towards a prospective settlement, the chairman of the employers' committee was absent from the city when this ultimatum was received. He forwarded the following letter to the two principal representatives of the unions involved:

W. G. Powlesland, Esq.,
Business Agent,
Blacksmiths' Union.

A. H. McNamee, Esq.,
Amalgamated Society
of Engineers.

Gentlemen,—

I was exceedingly surprised on my return to Toronto this morning to find your letter of August 3, stating that unless the conditions set forth in your schedule be complied with by 8 p.m. Tuesday, August 6, the blacksmiths in Toronto would immediately cease work.

I wish to clearly point out to you that this was not according to the agreement made between the manufacturers' committee and you two gentlemen when we met on Friday evening, August 2, at 5 o'clock, in the Employers' Association office. I proposed at that meeting a 5c increase to general blacksmiths, with a 2½c increase to helpers, and intimated that, if the increase was accepted by the men for general blacksmiths, that further negotiations would be carried on immediately with a view to arriving at some further increase for forgers, and it was distinctly agreed that you would carry this proposition back to the men and that we would call together the manufacturers to

discuss a proposed increase above the promised 5c and 2½c advance, and that the manufacturers' committee would meet you two gentlemen again not later than 5 p.m. Friday evening, August 9. In view of this agreement being arrived at between our committees I was very much surprised to learn of the drastic action taken by the men on Tuesday evening. I think this clearly proves to all manufacturers that it is impossible for our committee to do business on a business basis with your committee when you fail to have the men you represent abide by an agreement that you yourselves made with us, namely, that August 9 would be the date on which the wage scale would be settled.

In view of the fact that this agreement has been broken by your committee and the men they represent are out on strike, we feel that there is no need of further conference.

Yours truly,

Canadian Allis-Chalmers, Ltd.,

(Sgd.) T. Bate.

Toronto, August 7, 1918.

Finally a conference was arranged through the Honourable Senator Robertson, with a proposition from the men that they would return to work pending the submission of differences to a Board of Conciliation and Arbitration on the understanding that all those on strike should be taken on at the various shops and that whatever award was made should date from the submission of their demand to the firms. The employers refused to be bound by these two restrictions, and it was finally agreed to submit the differences to a Board without any qualifying clauses.

In the course of the submission of evidence to the Board, the representatives of the men were only able to show that one firm on marine construction work had entered into an agreement with them to pay the scale demanded. The prevailing rates of wages paid in all branches of their trade in the city were submitted by Mr. Bate and showed that the scale paid was in conformity with the wages paid other classes of skilled and unskilled workmen in various manufacturing establishments.

It was contended by the men that the scale of wages known as the McAdoo Award should be paid in industry, as it had been established as the standard wage on the railways. This contention was vigorously opposed by the employers on the ground that the railroads were in a position to increase their freight and passenger rates to meet any material increase in the wage schedule, whereas the manufacturer was bound by the terms of his contract which in many cases extended over a period of years in completion, and therefore the comparison was unfair.

Despite this argument and others advanced, the majority award has determined on the McAdoo scale as in their opinion fair and equitable for blacksmiths and helpers in the manufacturing shops in Toronto.

With this award I certainly cannot agree, as it has advanced the wages between 15 per cent and 40 per cent, and has put them entirely out of conformity with the wages being paid to men of similar skill in our local industries.

It has adopted as a minimum wage for blacksmiths on an average of 16c an hour above current rates; for second heavy forgers, 10c above current rates; for forging machine operators, about 15c above current rates, and for helpers, between 5c and 7½c above current rates.

These wages are greatly in excess of the wages paid to helpers in other lines of employment, which range between 35c and 40c an hour. They are also greatly in advance of the standard minimum wage for machinists of 55c and for toolmakers of 60c, rates which can only be demanded as a minimum in the majority of Toronto shops. They are also in advance of the wages paid to moulders, who earn a minimum of 60c per hour.

I am of the opinion that the offer made by the manufacturers of 2½c and 5c per hour would have been adequate to bring the wages of this class of labour to a parity with men of similar skill.

I cannot agree with the decision arrived at as to the duration of the agreement, because of the fact that it contains a provision to reopen the wage scale after a period of six months. This is at variance with the practice in all industrial agreements, and is unfair to the manufacturer, as he is not at liberty to have his contracts revised at the termination of any period during their continuance. It offers an uncertainty in tendering which will be very prejudicial to the acceptance of contracts where close prices prevail and may even mean a loss where liberal provisions for increases have been made, provided contracts extend beyond the yearly period.

I also cannot agree to the decision arrived at to date the award from the twentieth of August in view of the fact that the men resorted to a strike which had proved unsuccessful at the time it was decided to refer the matter to a Conciliation Board. I am of the opinion that the award, if accepted, should date from the time it was arrived at and no earlier.

I desire to express my appreciation of the very friendly spirit in which the reference was carried on, and to the co-operation of my associates on the Board, who sought to arrive at a mutual agreement, which, however, was found to be impossible.

All of which is respectfully submitted.

(Sgd.) James G. Merrick,
Representative of the Employees.

Report of Board of Appeal in Dispute between the Canadian General Electric Company, Peterborough, Ont., and its Machinists, Specialists and Electrical Workers

A REPORT was received from the Board of Appeal to which was referred the dispute between the Canadian General Electric Company, Peterborough, Ont., and its machinists, specialists and electrical workers. The findings were unanimous.

Report of Board

Present: Honourable Mr. Justice Maclennan, chairman; Gus Francq, S. H. Parsons, John W. Bruce, G. H. Duggan.

In the matter of the Appeal of the Canadian General Electric Company of Peterborough, Ontario, and its employees from the decision and award of the Board of Conciliation and Investigation rendered on August 24, 1918.

The Board of Appeal, having heard the parties through their representatives, examined the decision and award of the Board of Conciliation and Investigation and the reasons of Appeal, and having duly considered the same, renders the following decision:

(1) Paragraph 17 of the schedule attached to the decision of the Board of Conciliation and Investigation, providing that it shall remain in force for one year beginning on June 1, 1918, is confirmed.

(2) Paragraph 10 of the schedule is amended by striking out the last sentence thereof, reading "the number of apprentices shall be as follows, one for the shop and one for every five machinists employed."

(3) Paragraph 9 of the schedule is struck out and replaced by the following: "During slack periods, before any reduction is made in any branch in the number of its employees, the total working hours for the week shall be reduced."

INTERIM REPORT OF ROYAL COMMISSION APPOINTED TO INVESTIGATE THE DISPUTE EXISTING ON THE BRITISH COLUMBIA COAST BETWEEN VARIOUS SHIP OWNERS AND THEIR EMPLOYEES

AN interim report was received from the Royal Commission appointed under the Inquiries Act to investigate the dispute existing on the British Columbia coast between various shipowners and their employees, being masters and mates, members of the Canadian Merchant Service Guild.

The Commission was composed as follows: Messrs. W. E. Burns, James H. McVety and A. E. James, of Vancouver, Mr. Burns being appointed chairman. The powers of this Commission were extended during September to investigate also any differences which might exist on vessels operating on the lakes and rivers of British Columbia.

Report of Board

(Copy.)

To His Excellency
Governor-General for the
Dominion of Canada.

Sir,—

Pursuant to the appointment of your Commissioners, W. E. Burns, chairman; Edwin A. James and James H. McVety, under the "Inquiries Act," to inquire into the unrest existing on the coast of British Columbia as between various employers concerned in water transportation between British Columbia ports and to American ports in Puget Sound and Alaska and certain of their employees, being shipmasters and mates, members of the organization known as the Canadian Merchant Service Guild, and employed in vessels operating out of British Columbia ports in coastwise service, your Commissioners beg to make interim report as follows:

The Canadian Merchant Service Guild was formed in 1917, and on the twenty-eighth day of March, 1918, adopted its constitution and by-laws, which are in the main based upon the objects of the constitution or rules of the Imperial Merchant Service Guild. Its membership is confined to certificated shipmasters, navigating officers and pilots, and at the present time it appears that about 98 per cent of such upon all vessels trading upon the British Columbia coast belong to the Guild.

On the nineteenth of April, 1918, the Guild submitted to the various owners affected a minimum wage scale and working rules, which the Guild had decided upon, with an accompanying letter asking careful and favourable consideration thereof by the owners, and that the same be accepted and recognized by the owners as from the first day of April, 1918.

The owners replied to the communication, taking the position that they had always dealt with their own masters and officers, and indicated that they preferred to deal with them in the premises. In the course of the correspondence which followed with the different owners, the Guild indicated that the schedule had been presented with the idea of opening a discussion in respect thereof, taking a position which, had it been taken at the outset, might have been productive of different results. The correspondence which ensued came to the point where the owners refused altogether to deal with the Guild, although in one case, or perhaps two cases, the owner was willing to discuss matters with a committee of their own employees who were members of the Guild. The Guild demanded the right to have its representative or representatives present at such negotiation and a deadlock occurred, the Guild demanding recognition and the owners declining to confer with any person or body outside of their own employees.

The Guild then applied for a Board of Conciliation under the Industrial Disputes Act, and because of the non-application of that Act to

the situation your Commissioners were appointed to make inquiry as above set out, the inquiry extending to all such matters as wages, hours of work, working conditions and such other matters as might seem to be the occasion of the existing friction.

The taking of evidence was commenced on the twenty-second day of July, and it soon appeared to your Commissioners that the deadlock above mentioned was the primal cause of the existing difficulties. It appeared that most at least of the difficulties regarding wages and working conditions might be successfully arranged by negotiations between the owners and representatives of their respective employees, the status of whom was accepted, and in these circumstances your Commissioners, at a stage of the inquiry, confined the evidence to the question of recognition or non-recognition of the Guild in order that this question might be dealt with as a preliminary point.

The evidence centred mainly on the position of the Imperial Merchant Service Guild, its activities and status in respect of problems of the same nature as indicated in this inquiry. Both sides before your Commissioners took the position that the status of the Imperial Merchant Service Guild as worked out in practice in its relations with ship-owners was acceptable, and the Canadian Merchant Service Guild would be accepted or recognized on the one hand and satisfactory on the other, if its objects were carried out and its influence developed upon the same lines and in the same manner.

After the completion of evidence offered on the question of recognition, and after discussion of same by your Commissioners, the chairman telegraphed to the Imperial Merchant Service Guild at Liverpool and to the Secretary of the Liverpool Steamship Owners' Association, an organization composed of a large number of steamship owners, asking as to the status of the Imperial Merchant Service Guild previous to the appointment of the Shipping Controller in connection with the National Maritime Board, the formation of which, since the beginning of the war, having presumably affected the situation. The telegram read as follows:

> "Shipping Commission here desires information whether before appointment Shipping Controller Imperial Guild was recognized by shipowners to extent of discussion by letter and at times conferences or interviews on questions of wages and working conditions. Cable exact position fully."

This cable was sent on the sixth of August. On the following day a reply was received from Lieutenant Commander Moore, R.M., Secretary of the Imperial Merchant Service Guild, as follows:

> "Imperial Guild fully recognized for many years past by Government and shipowners in all matters concerning captains, officers, British ships."

No reply was received to the other cablegram for some time, although pressed for through the Telegraph Company, and the matter investigated. Finally word was received that the message had been held up by censor, and it was arranged for it to get through, and on the nineteenth of August a reply was received from Sir Norman Hill, the secretary, as follows:

> "Liverpool Steamship Owners' Association have never had any discussions at any time with Guild on questions of wages and working conditions. Association leave all wages questions in hands of Liverpool Employers' Association. Am informed by last named association that they have never had any discussions with Guild. For your information neither association is in any way represented on National Maritime Board. They have both refused to appoint representatives."

In the meantime, feeling that it might be possible for the parties to get together upon the basis of a limited recognition of the Guild as indicated by a memorandum of the views of the chairman submitted to the other Commissioners, the chairman discussed the situation with the executive of the Guild and also with a meeting of the owners. From these discussions it appeared that a limited recognition would be acceptable to the Guild whereby a committee composed solely of employees would be received by the owner involved on the question under discussion, but that this would not be acceptable to the owners at any rate at that time.

The situation was then discussed by your Commissioners and a public session of the Commission called for Wednesday, the twenty-first of August.

At this session the chairman announced that on account of the fact that the views of your Commissioners in connection with the point under discussion were not such as would form a basis upon which the parties in dispute in connection with wages and working conditions could arrange them themselves, your Commissioners proposed to go on and deal with the questions of wages and working conditions which were in difference, not making any finding on the question of recognition in the meantime. After a discussion upon the situation the Guild announced that in view of there being no present finding on the question of recognition it was withdrawing from the proceedings and its members were resigning from service. The chairman stated that the question of recognition was taken up first in the hope that a relationship could be established between the owners and the Guild whereby the questions of wages and working conditions could be readily adjusted; that this had been shown to be impossible and that your Commissioners were accordingly simply proceeding with their work and purposed calling upon the owners for statements of the extent to which they were ready to meet the Guild's claims. The Guild, however, in the face of these circumstances with-

drew from the proceedings and proceeded to carry out its determination in respect of the resignation of its members.

Your Commissioners followed the course which had been announced and called upon the owners to present the following day the statements above referred to. On the twenty-second August, statements with explanatory evidence were presented by the Canadian Pacific Railway Company, the Union Steamship Company, Limited, the Grand Trunk Pacific Railway Company and the British Columbia Tow Boat Owners' Association, setting out scales of wages effective from August 1, 1918, and in the case of the Canadian Pacific Railway Company and the Grand Trunk Pacific Railway Company, a scale of increase effective from April 1, 1918, giving effect thereby to increases which were at that time contemplated but held in abeyance because of the situation. After consideration of the various statements thus submitted and of the evidence given on working conditions, your Commissioners felt that they were in a position to make a report which would substantially cover the whole field of inquiry with the exception of some matters which might well be reserved for further evidence and consideration.

It was felt, however, that the views of the majority of your Commissioners as to recognition of the Guild on the evidence submitted would not be accepted by both parties unless some sanction were imposed which must necessarily involve at best a considerable period of time. The tie-up of shipping and water transportation which had resulted from the action of the Guild had brought about a very serious situation which was fast assuming calamitous proportions. Public and private business and war productions were being seriously interfered with and retarded. In these circumstances the chairman and Commissioner James met the owners on the twenty-sixth of August and obtained from them the following memorandum of agreement:

> "We agree to accept and abide by the finding of the Commission that the Canadian Merchant Service Guild be recognized to the extent of the recognition accorded the Imperial Merchant Service Guild by shipowners in Great Britain in reference to relations between employer and employees on questions of wages and working conditions, the exact status of the Imperial Merchant Service Guild in this respect to be determined by the Commission after further evidence at the instance of either party or on the Commission's own initiative. It is understood that the Commission will make its finding now on the claims of the Guild in respect of wages and in respect of working conditions, reserving only such points as it may desire further information upon.
>
> Dated this twenty-sixth day of August, 1918."

This was taken before the Vancouver section of the Guild on that evening by the chairman and Commissioner McVety, when after an exhaustive discussion a resolution was passed accepting the proposal subject to the approval of the Victoria section of the Guild. Endeavour was made over long distance telephone to obtain action in Victoria with negative results, and on the twenty-seventh August your Commissioners proceeded to Victoria and met the Victoria section of the Guild in meeting at that city. At a following meeting which Commissioner McVety attended, the following resolution was finally passed:

> "Whereas, assurances have been received from Sir Robert Borden, Prime Minister, and also from the Royal Commission, that recognition of the Canadian Merchant Service Guild, on the basis of the Imperial Merchant Service Guild, will be given by the employers, and that a fair and satisfactory adjustment of wages and working conditions will be given promptly;
>
> Resolved that we, the Victoria members of the Canadian Merchant Service Guild, hereby agree to resume our services, believing that by so doing we will secure a prompt and fair adjustment of matters in dispute, and not impede nor interfere with the requirements of the nation at this time."

This resolution was submitted by long distance telephone to a meeting at Vancouver sitting at the same time as the Victoria meeting, and the following resolution was passed:

> "That we adopt and confirm the decision arrived at by the members of the Canadian Merchant Service Guild at Victoria, with recommendation to the Commissioners that the present decision will not be considered a break in service, and that members on the lake and river steamers receive the same consideration as coast members."

A further resolution was adopted at the Vancouver meeting:

> "That the Royal Commission be asked to use its influence to secure a fair and satisfactory adjustment of wages and working conditions for masters and officers in vessels in Government service in proportion to the rates and conditions in other vessels of the same class."

As a result of these proceedings, work was resumed and the shipping tie-up ceased.

Your Commissioners since this result have taken further evidence bearing on adjustments of the statements filed by the owners and the Guild's claims; on questions involved in claims with respect to working conditions; and on the question of recognition. Evidence as to the exact status of the Imperial Merchant Service Guild as aforesaid will have to be obtained from

England, and upon certain other matters which came before your Commissioners to be dealt with in this inquiry further evidence will be required before your Commissioners will feel justified in making definite findings or recommendations with respect thereto.

In accordance with the foregoing, your Commissioners beg to make the following findings and recommendations:

Recognition:

Your Commissioners find that the Canadian Merchant Service Guild should be recognized by shipowners in Canada to the extent of the recognition accorded the Imperial Merchant Service by shipowners in Great Britain in reference to relations between employer and employees on questions of wages and working conditions. The exact status of the Imperial Merchant Service Guild in this respect, your Commissioners, in accordance with the above arragnement, will determine after further evidence on the point has been obtained.

Wages:

After careful consideration of the claims of the Guild and the position of the owners as set out in the statements filed and in the evidence, your Commissioners find that the wages set out in the schedule hereto should apply as indicated.

In this schedule in certain instances retroactive pay is established. In the case of the Union Steamship Company, Limited, and tow boats, the increases in pay which have occurred from time to time are, in the opinion of your Commissioners, satisfactory.

With reference to the vessels which have not been represented before your Commissioners, the classification of the Guild had been accepted. It is felt that this should be satisfactory in reference to tow boats as the Tow Boat Owners' Association, which appeared before your Commissioners, representing 45 tow boats, made no complaint as to this classification. Notice of the proceedings was given to all owners of whom information could be obtained. Your Commissioners will be ready to hear any owner who considers himself aggrieved in reference to this classification, and reservation is made so that any such case may be made the subject of subsequent action and readjustment.

Working Conditions:

Three Watch System: The only objection voiced before your Commissioners to the use of this system on the ships to which it is applicable was that the men were not available. Your Commissioners feel that the three watch system should be inaugurated and sustained where possible and would therefore recommend that this be done wherever and whenever the men are available.

Classification of Officers: Your Commissioners feel that the claim of the Guild in this respect should not be given effect to. Any adjustments which the situation calls for because of difficulties in respect of time to be served for certificates should be made under Government regulations as the present classification in use by the owners is the most sensible and satisfactory.

Holidays: Your Commissioners recommend that masters and mates on all boats should be given annual holidays with full pay to the extent of two weeks. The principle of annual holidays to the extent of a fortnight is in vogue on passenger and freight steamers, and in the opinion of your Commissioners should be applied to all boats. Your Commissioners also recommend that two boat masters and certificated officers away from the home port for fourteen days or more should be given upon their return 24 hours free from the vessel.

Increased percentage for two boat masters and officers operating to the westward of the Jordan River and north of and across Queen Charlotte Sound:

Your Commissioners are of the opinion that the evidence submitted does not disclose any undue or extraordinary hazard for the class of vessels sent to the waters in question, and if such hazard exists the practice of laying up in shelter for favourable weather removes any extra danger likely to be encountered because of weather conditions. Your Commissioners also feel that there has been no good reason shown why the wages on vessels operating out of Prince Rupert should be increased 20 per cent above wages on vessels from others ports in the province. The finding on this point is that the claim is not well founded and should not be granted.

Re Harbour Tugs: The questions in respect to harbour tugs of the working day, overtime and extra pay in lieu of board, are reserved by your Commissioners to be dealt with later upon further evidence.

Towing by Freight Boats: Your Commissioners feel that the claim for extra pay on this score is not well founded and should not be granted.

Number of Officers on Specified Ships: Your Commissioners' position with reference to any claim in this regard is indicated by the officers mentioned in the wage schedule hereto.

Vessels in Government Service: Evidence was given before your Commissioners to the effect that the present rate of wages paid is and has been for some time inadequate. The completion of evidence now would mean considerable delay and your Commissioners reserve this situation to be dealt with subsequently.

Ferry Boats, Fishing Vessels and Barges: Intimation was made to your Commissioners that the present situation with reference to these vessels is satisfactory. The matter was not made absolutely definite, however, and your Commissioners therefore reserve for subsequent attention any questions or difficulties which may be presented to your Commissioners by owners or the Guild with reference to these vessels.

Lake and River Steamers: The Guild has made application to your Commissioners for the extension of the Commission to cover inquiry with respect to wages and working conditions on these vessels. Your commissioners therefore would request that their powers be extended so that what difficulties exist may be dealt with.

Reservations:

Your Commissioners, in view of the fact that subsequent report on the matters specifically reserved will be deferred on account of the necessity, in your Commissioners' opinion, of obtaining evidence from England on the status of the Imperial Merchant Service Guild, desire it to be understood that any questions properly coming within the work of the Commission concerning which no findings or recommendations have been set out will, at the instance of any owner or the Guild, be made the subject of inquiry, if in the opinion of your Commissioners, they are of sufficient importance.

Commissioner James is unavoidably absent from the city, and will be away for a few days, so that his signature to this report will be delayed. He, however, concurs in the findings and recommendations contained herein.

All of which is respectfully submitted.

(Sgd.) JAS. H. MCVETY.
Sept. 27, 1918. (Sgd.) C. A. JAMES.
(Sgd.) W. E. BURNS.
Chairman.

Dated at Vancouver, B.C., this twelfth day of September, A.D. 1918.

SCHEDULE OF SALARIES AWARDED.

Vessels Owned by the Canadian Pacific Railway Company.

PASSENGER AND CARGO VESSELS.

Class 1A.

Princess Charlotte, Princess Sophia, Princess Victoria, Princess Adelaide, and Princess Alice.

	Effective April 1, 1918. per month.	Effective Aug. 1, 1918. per month.
Master	$245.00	$250.00
1st Officer	145.00	160.00
2nd Officer	120.00	135.00
3rd Officer	90.00	100.00

Class 1B.

Vessels of Class 1A that run to Alaska.

Master	$245.00	$300.00
1st Officer	145.00	160.00
2nd Officer	120.00	135.00
3rd Officer	90.00	110.00

Class 2A.

Princess Maquinna when on West Coast service.

Master	$220.00	$250.00
1st Officer	135.00	160.00
2nd Officer	110.00	135.00
3rd Officer	90.00	100.00

Class 2B.

Princess Mary, Princess Royal, Princess Maquinna, and Princess Sophia when on local runs.

Master	$220.00	$225.00
1st Officer	145.00	150.00
2nd Officer	110.00	135.00
3rd Officer	90.00	100.00

Class 3.

Princess Beatrice, Princess Ena, Princess Patricia, Princess May, and Tees.

Master	$195.00	$210.00
1st Officer	135.00	150.00
2nd Officer	110.00	125.00
3rd Officer	90.00	100.00

Class 4.

Princess Patricia (when on single runs) and Charmer.

Master	$185.00	$190.00
1st Officer	125.00	130.00
2nd Officer	105.00	110.00

Class 5.

Island Princess and Otter.

Master	$165.00	$175.00
1st Officer	120.00	120.00
2nd Officer	90.00	100.00

Note.—The April 1 scale will apply to the Island Princess as from the date of acquisition by the Canadian Pacific Railway Company.

TOW BOATS.

Nanoose, Nitinat, and Qualicum.

Master	$180.00	$200.00
1st Officer	90.00	110.00

Vessels Owned by the Grand Trunk Pacific Railway Company.

PASSENGER AND CARGO VESSELS.

Class 1.

Prince Rupert and Prince George.

	Effective April 1, 1918. per month.	Effective Aug. 1, 1918. per month.
Master	$245.00	$250.00
1st Officer	145.00	160.00
2nd Officer	120.00	135.00
3rd Officer	90.00	100.00

Class 3.

Prince Albert and Prince John.

Master	$195.00	$210.00
1st Officer	135.00	150.00
2nd Officer	110.00	125.00
3rd Officer	90.00	100.00

TOW BOATS.

Tug Lorne.

Master	$175.00	$200.00
Mate	90.00	100.00

Vessels Owned by the Union Steamship Company of British Columbia, Limited.

Class 3.

Camosum, Chelohsin, and Venture.

	Effective Aug. 1, 1918.
Master	$210.00
1st Officer	150.00
2nd Officer	125.00
3rd Officer	90.00 to 100.00

Class 4A.

Cheakamus and Cowichan.

Master	$190.00
1st Officer	130.00
2nd Officer	110.00
3rd Officer	90.00 to 100.00

Class 4B.

Cassiar.

Master	$185.00
1st Officer	125.00
2nd Officer	110.00

Class 5A.

Chasina and Chilco.

Master	$175.00
1st Officer	120.00

Class 5B.

Coquitlam.

Master	$180.00
1st Officer	125.00
2nd Officer	90.00 to 100.00

PASSENGER AND CARGO VESSELS OTHER THAN ABOVE MENTIONED.

Class 2.

Amur.

	Effective Aug. 1, 1918.
Master	$225.00
1st Officer	150.00
2nd Officer	125.00
3rd Officer	100.00

Class 3.

British Columbia, Gray, Henriette, Marmion, and Quadra.

Master	$210.00
1st Officer	150.00
2nd Officer	125.00
3rd Officer	100.00

Class 5.

Ballena, Bowena, Britannia, Celtic, Eastholm, and Queen City.

Master	$175.00
1st Officer	120.00
2nd Officer (when carried)	100.00

Class 8.

Cascade, Clansman, Coaster, Forrager, Grainer, Matsqui, Selkirk, Trader, and Westham.

Master	$150.00
Mate (when carried)	110.00

Class 9.

Bentick, Enilada, Fort Langley, Lake Buntzen, Le Olbee, Marine Express, and New Delta.

Outside Harbour.

Master	$150.00
Mate (when carried)	110.00

Inside Harbour.

Master	$125.00
Mate (when carried)	100.00

TOW BOATS OTHER THAN ABOVE MENTIONED.

Effective August 1, 1918.

Tug.	Master.	Mate.
Class 2.		
Commodore	$200.00	$100.00
Sea Lion	200.00	110.00
Class 3.		
Achates	180.00	105.00
Active	180.00	105.00
Czar	170.00	105.00
Chemainus	180.00	105.00

INDUSTRIAL DISPUTES DURING SEPTEMBER, 1918

NINETEEN strikes affecting approximately 6,104 employees were reported as having commenced during September. There were in existence at some time or other during the month 30 strikes directly affecting 7,416 workpeople. The total time loss on account of industrial disputes was estimated at 102,563 working days, as compared with 94,040 in August, 1918, and 25,288 in September, 1917. The time loss occasioned by the 19 strikes which began in September was 75,371 working days, while a loss of 27,862 days is charged to the 11 strikes commencing prior to September. Termination of disputes was reported in the case of four of the disputes commenced prior to September. Eleven of the strikes which commenced during September terminated during the month, leaving the following 15 strikes, affecting approximately 3,444 workpeople, on record September 30: pipefitters, Nobel; iron shipbuilders, Lauzon; machinists, Montreal; knitting mill operatives, Toronto; cigarmakers, Toronto and Montreal; cigarmakers, Hamilton, London and Montreal; wharfmen, Quebec; coal miners, Fernie and

Michel; painters, Toronto; moulders, Sarnia; sash and door mill employees, Winnipeg; tailors, Brockville; freight handlers, Calgary and Lethbridge; laundry workers, Vancouver, and waiters and waitresses, Regina.

Disputes by Industries

The following is a review of the disputes by industries in the order in which these appear in the statistical table. A brief summary is given of the more important strikes:

Mines, smelters and quarries. — There were six disputes in existence during the month, involving 4,117 employees and a time loss of 60,655 working days. All these disputes commenced during September, and in all cases affected coal mines. Five strikes were settled, leaving one unsettled dispute, that at Fernie and Michel, B.C. Three of the strikes adjusted, those, namely, in the Drumheller district and at Wayne, Alberta, lasted for a few days only and affected few employees. The fourth settlement, that of coal miners in Pictou County, N.S., affected about 2,300 miners, having lasted about two weeks. The dispute related to the demand of the men for a wage increase of 15 per cent for day labour and 10 per cent for miners, with a minimum wage for miners of $5 per day. The company offered 20 cents a day to all employees, but the offer was not accepted. Mr. C. A. Magrath, who had been recently appointed Director of Coal Operations for Nova Scotia and New Brunswick, visited the locality and held conferences with the parties, officers of the Department of Labour assisting. Work was resumed on September 30 under an arrangement providing for an investigation into the cost of living by a committee jointly representing operators and miners, with a statistical adviser, and that apart from the wage increase of 20 cents per day which the operators agreed to put immediately into effect, any further wage increase which the cost of living enquiry would justify should take effect as from September 1, and that wages so adjusted should remain in force for four months from that date, when the enquiry would be renewed. The fifth coal strike adjusted was that of about 100 miners at Minto, N.B., who asked that all coal should be weighed, and ceased work September 24. A few days later a working basis was reached and the men returned to work September 30.

The strike remaining unsettled at the end of the month was that of miners at Fernie and Michel, B.C., where approximately 1,400 men ceased work to enforce the adoption of the single-shift method of operating the mines, the men claiming that the existing method of working two shifts did not allow sufficient time to permit gas to escape and that one eight-hour shift per day was the only way in which the work could be made reasonably safe. The question of the single shift had been discussed between the men and the management some time previous to the strike and the company had offered to operate on the single shift system provided three men worked in each working place. This, however, was not acceptable to the men, who on September 4, following a severe "bump," ceased work. Several conferences were held between representatives of the miners

and mine owners in which the Minister of Mines for British Columbia and the Director of Coal Operations for District 18 took part. The Minister of Mines stated he would introduce legislation at the next session of the legislature which would make the single shift system obligatory in all coal mines of the province except in case of national emergency, the system to become effective within one year after the conclusion of the war, and also proposed a commission to take evidence regarding the condition of the mines. This proposal was rejected, but the miners offered to return to work on the single shift basis pending the report of a commission. On September 27 the Director of Coal Operations made an order requiring that the Crow's Nest Pass Coal Company instal the single shift system at its mines, the system, however, not to extend to development work nor to necessary repairs. The order also stated that the Director would ask the Minister of Mines to appoint a Royal Commission to determine the question at issue. At the close of the month the men had not returned to work, but meetings were being held to consider Mr. Armstrong's proposals, and before these pages went to press word reached the Minister that the miners had resumed work.

BUILDING AND CONSTRUCTION.—There were four strikes in existence, affecting, however, but 119 employees and involving a time loss of 2,194 working days. Three of the strikes were carried over from the previous month, and of these two were settled during September, leaving one old strike and one new strike unterminated.

METALS, MACHINERY AND CONVEYANCES.—There were seven strikes in existence, affecting 640 employees and involving a time loss of 8,579 working days. Three strikes were carried over from the previous month—iron shipbuilders at Lauzon, machinists at Montreal, and metal workers at Winnipeg. A strike of rolling mill employees at Amherst was commenced in August, but was not reported to the Department until September. Three new strikes occurred during September—moulders at Sarnia, iron workers at Kingston, and sheet metal workers at Montreal. All these strikes affected comparatively few employees and two of them were settled shortly after their occurrence.

WOODWORKING.—But one strike, affecting 300 employees and involving a time loss of 900 days, was reported in the woodworking group—sash and door mill employees at Winnipeg—which commenced during September. The strike, which involved increased wages and a nine-hour day, was unterminated.

PRINTING AND PUBLISHING.—One strike occurred, affecting 88 employees and involving a time loss of 176 days. Printing pressmen at Ottawa asked for an increase in wages and 45 hours a week for night shifts. A partial increase was granted and work resumed two days after the men went out.

CLOTHING.—One strike of tailors was in existence at Brockville, affecting 15 employees and involving a time loss of 165 working days. A strike of cap makers at Winnipeg, which is noted in the table, began prior to the month of September, but no report of its settlement was received until the end of the month.

TEXTILES, CARPETS AND CORDAGE.—One strike—knitting mill operatives at Tor-

onto—affecting 58 employees and involving a time loss of 1,392 working days, was carried over from the previous month.

FOODS, TOBACCO AND LIQUORS. — Two strikes were in existence, affecting 562 employees and involving a time loss of 13,488 working days. Both these strikes affected cigarmakers and were carried over from the previous month.

TRANSPORTATION. — There were four strikes in existence, affecting 1,020 employees and involving a time loss of 8,052 working days. One strike—wharfmen—(unterminated) was carried over from the previous month, and two strikes occurred during the month, freight handlers employed by the Canadian Pacific Railway at Calgary and Lethbridge and other western cities, and employees of the Dominion Express Company at Montreal and other eastern points. The strike of freight handlers commenced at Calgary and arose out of a demand for reinstatement of a foreman who had been dismissed, and that increases under the McAdoo Award be made retroactive to May 1 instead of August 1; the question of union recognition was also involved. At the end of the month the strike was unterminated and there was the possibility of the difficulty extending to other places on the western lines of the Canadian Pacific Railway. The strike of employees of the Dominion Express Company affected about 600 persons, but lasted only four days. The main question at issue was apparently union recognition, but a revised wage schedule was also brought up. After some negotiations the difficulty was adjusted, the employees withdrawing their claim for union recognition, and the company agreeing to reinstate all strikers and to meet a committee of employees to discuss grievances.

MISCELLANEOUS.—Four strikes, affecting 497 employees and involving a time loss of 6,962 work days, were in existence. One strike—labourers at Winnipeg—occurred during August, but was not reported until September. Two of the strikes, barbers at Moosejaw and at Toronto, were settled shortly after their occurrence, and affected a comparatively small number of men. Strikes of 290 laundry workers at Vancouver and of 50 waiters and waitresses at Regina were unterminated.

INDUSTRIAL DISPUTES DURING SEPTEMBER, 1918

Industry.	Particulars.	No. of employees affected	Time lost in working days.
	DISPUTES COMMENCING PRIOR TO SEPTEMBER, 1918.		
BUILDING AND CONSTRUCTION:—			
Electrical workers, Ottawa	Commenced August 8. For an increase in wages and reduction in hours. Settled through negotiations. Partial increase granted and hours reduced. Work resumed September 30.	27	648
Pipefitters, Nobel, Ont.	Commenced June 29. Demand for increased wages. Unterminated.	30	720
Plumbers and steamfitters, St. Thomas, Ont.	Commenced August 26. For increased wages. Increases granted. Work resumed August 31.	.....	.....
Plumbers and steamfitters, Toronto, Ont.	Commenced July 6. Demand for increased wages. Increase granted. Work resumed September 25.	39	780
METALS, MACHINERY AND CONVEYANCES:—			
Iron shipbuilders, Lauzon, Que.	Commenced July 26. Demand for reinstatement of dismissed employees and for recognition of International Union. Unterminated.	239	5,736
Machinists, Montreal, Que.	Commenced March 23. Demand for increased wages and nine-hour day. Unterminated.	45	1,080
Metal Workers, Winnipeg, Man.	Commenced July 22. Demand for higher wages. Information reaching Department indicates conditions are no longer affected by strike.	12	268
Rolling mill employees, Amherst, N. S.	Commenced August 27. For an increase in wages. Increase granted. Work resumed September 2.	150	150
CLOTHING:—			
Cap makers, Winnipeg, Man.	Commenced July 17. For increased wages and alleged discrimination. Men returned to work July 25.	.....	.....

INDUSTRIAL DISPUTES, DURING SEPTEMBER, 1918—(*Continued*)

Industry.	Particulars.	No. of employees affected	Time loss in working days.
	DISPUTES COMMENCING PRIOR TO SEPTEMBER, 1918—(*Continued*).		
TEXTILES, CORDAGE AND CARPETS:—			
Knitting mill operatives, Toronto, Ont.	Commenced June 12. Demand for increased wages. Unterminated.	58	1,392
FOODS, LIQUORS AND TOBACCO:—			
Cigarmakers, Toronto and Montreal.	Commenced May 16-20. Employees locked out. Unterminated.	300	7,200
Cigarmakers, Hamilton, London and Montreal	Commenced July 10. Employees at Hamilton presented demands for increased wages and one company operating at Hamilton, London and Montreal closed its doors. General strike or lockout unterminated.	262	6,288
TRANSPORTATION:—			
Wharfmen, Quebec, Que.	Commenced August 1. For increased wages. nterminated.	150	3,600
MISCELLANEOUS:—			
Labourers, Winnipeg, Man.	Commenced August 14. For increased wages, shorter hours and recognition of Union. Strikers' places filled.	45	.....
	STRIKES COMMENCING DURING SEPTEMBER, 1918.		
MINES, SMELTERS AND QUARRIES:—			
Coal miners, Drumheller, Alta. (Western Gem Company.)	Commenced September 2. Demand for increased wages and free carbide. A Commission was appointed and pending a decision, work was resumed September 5.	12	30
Coal miners, Drumheller, Alta. (Alberta Black Coal Company.)	Commenced September 5. Dispute among men as to which local Union the company should pay "checkoff." Men returned to work under the conditions prevailing prior to strike; district officials of U. M. W. of A. to decide the question. Work resumed September 8.	85	255
Coal miners, Fernie and Michel, B.C.	Commenced September 4. Demand for the single shift system in operation of mines. Unterminated.	1,400	31,500
Coal miners, Minto, N.B.	Commenced September 24. Demand that coal should be weighed. Men returned to work while scales were being installed. Work resumed September 30.	100	500
Coal miners, Stellarton, New Glasgow, Westville, and Thorburn, N.S.	Commenced September 14. Demand for increased wages and minimum wage. Settled through mediation of Dominion Fuel Controller and Department of Labour. Partial increase granted. Work resumed September 30.	2,300	27,600
Coal Miners, Wayne, Alta.	Commenced September 3. Dissatisfaction over boarding house. Settled by mediation through the efforts of the Department of Labour; a compromise effected. Work was resumed September 7.	220	770
BUILDING AND CONSTRUCTION:—			
Painters, Toronto, Ont.	Commenced September 28. Protest against the use of a spraying machine. Unterminated.	23	46
METALS, MACHINERY AND CONVEYANCES:—			
Iron workers, Kingston, Ont.	Commenced September 12. Against dismissal of employees. Employees re-instated and work resumed September 17.	110	385
Moulders, Sarnia, Ont.	Commenced September 12. For increased wages and recognition of Union. Unterminated.	9	135
Sheet metal workers, Montreal, Que.	Commenced September 3. Demand for increase in wages. Increase granted. Work resumed September 15.	75	825
PRINTING AND ALLIED TRADES:—			
Printing Pressmen, Ottawa, Ont.	Commenced September 10. For an agreement; an increase in wages and 45 hours a week for night shifts. Partial increase granted. Work resumed September 12.	88	176
WOODWORKING:—			
Sash and door mill employees, Winnipeg, Man	Commenced September 27. For increased wages and a nine-hour day. Unterminated.	300	900
CLOTHING:—			
Tailors, Borckville, Ont.	Commenced September 3. Demand for increased wages. Unterminated.	15	165
TRANSPORTATION:—			
Freight Handlers, (C.P.R.), Calgary, Alta., and Lethbridge, Alta.	Commenced September 21. For recognition of the Union and retroactive payment under McAdoo award. Unterminated.	278	2,084
Dominion Express Employees, Montreal and other Eastern localities.	Commenced September 10. For recognition of Union. Question of recognition withdrawn; strikers reinstated and company agreed to discuss grievances with committee. Work resumed September 14.	592	2,368
MISCELLANEOUS:—			
Barbers, Moosejaw, Sask.	Commenced September 16. Demand for increased wages and better conditions. Negotiations between parties resulted in a compromise. Work resumed September 25.	23	184
Barbers, Toronto, Ont.	Commenced September 9. For increase in wages. After negotiations between parties increase granted and work resumed September 11.	134	268
Laundry workers, Vancouver, B.C.	Commenced September 9. For increased wages and Union conditions. Unterminated.	290	5,510
Waiters and waitresses, Regina, Sask.	Commenced September 11. Demand for reduction in working hours. Unterminated.	50	1,000

PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

THE Labour Gazetee for August, 1918 (page 618) printed the names of the six representatives of the railway companies and the six employee representatives who comprise the recently created Railway Board of Adjustment No. 1. Mr. W. M. Neal, the secretary of the Canadian Railway War Board, has now been elected general secretary also of the Adjustment Board, with offices in Montreal.

Two disputes have already been heard by the Board, and in both cases decisions have been given. A summary of each case follows:

Case 1—Dismissal of Brakeman by T. H. & B. Railway

The first case to come before the Board was a controversy between the Brotherhood of Railroad Trainmen and the Toronto, Hamilton and Buffalo Railway, concerning the dismissal of a brakeman on account of an accident on January 29 last, involving a rear-end collision, in which one employee was killed and another injured. The contention of the company was that when his train stopped, the brakeman, although he had ample time at his disposal, did not get back the proper distance required by the rules to flag the oncoming train, and that for this reason he was discharged. The organization on the other hand contended that the brakeman left the caboose of his train as promptly as possible and that he had gone back as far as he could with the time at his disposal before the oncoming train showed around a curve, and that for this reason it was improper to hold him responsible for the accident.

The Board decided, with one member dissenting, that the brakeman had observed the company's flagging rules and that he should be reinstated in the company's employ and be paid according to schedule for all time lost.

Case 2—C. P. R. Company and Commercial Telegraphers

The second case had reference to wages and hours of commercial telegraphers employed by the Canadian Pacific Railway Company, and was an appeal from the award of a Conciliation Board which was published in the Labour Gazette, September, 1918, (page 724). The matters in dispute concerned certain proposed amendments to the schedule of September, 1917, which were requested by the telegraphers.

The decisions of the Board of Adjustment were briefly as follows:

1. DEFINITION OF "COMMERCIAL TELEGRAPHERS" AND RATES FOR "MORKRUM" OPERATORS.

Article 1 as proposed by the employees is amended as follows:

(1) Employees assigned to the commercial telegraph service, whether operated by the Morse system, telephone or any automatic device of any character, or who are required to devote any portion of their time to the transmission or receiving of telegraph matter by any device whatsoever (not including agents, wire chiefs, traffic supervisors or traffic chiefs having authority to hire or discipline employees) will be considered commercial telegraphers within the meaning of this schedule. This does not apply to employees handling such matter by telephone during the act of filing for transmission or delivery.

(2) Morse telegraphers, when not required to work as such, shall, if competent, have the right to operate any automatic device for the purpose of transmitting or receiving telegraph matter at the rate they were receiving in optional group as Morse operators in the office affected. Seniority shall govern.

Article 8, Clause 2, is amended as follows:

The rate for Morkrum employees shall be $75.00 per month for the first year's service and $85.00 per month thereafter.

Article 6, Clause 4, is amended as follows:

The average minimum performance on all Vancouver-Winnipeg, Montreal-Winnipeg, Montreal-Vancouver and Toronto-Winnipeg circuits, not including Morkrum operators, shall be 30 messages per hour, and on all other first-class circuits 33 messages per hour, allowing 30 words to count as one message in case of press, and 20 shall be counted as one message in R.S. business and night lettergrams. Chief operators and traffic chiefs shall determine the carrying capacity of the circuit, and any loss through interruptions shall not be charged against the telegrapher's average.

2. WORKING HOURS.

Article 6, Clause 1, is amended as follows:

At offices where two or more telegraphers are employed, the hours of duty shall be as follows: Eight hours shall constitute straight day duty, beginning and ending between 7 a.m. and 6 p.m. Seven hours shall constitute all night duty beginning at or later than 8 p.m. Seven and one-half hours shall constitute all other tricks. No trick shall be split more than once or extended over 12 hours. At all other offices the hours of duty shall be 10 consecutive hours, including one hour for lunch.

3. OVERTIME RATE.

Article 6, Clause 3, is amended as follows:

Overtime accruing within eight hours' service shall be paid for *pro rata*. Overtime after eight or nine hours, as the case may be, shall be paid for at time and one-half.

4. INCLUSION OF TELEGRAPH CHIEFS IN SCHEDULE.

This was requested by the employees, but by the first decision of the Board, given above, it was ruled that the telegraph chiefs should not be included.

5. INTERPRETATION OF THE McADOO AWARD.

There was a difference of opinion between the company and the employees as to how the McAdoo Award increases should be applied to the percentage rates in effect in December, 1915, and both parties submitted schedules for two specific offices at Vancouver and Toronto. The Board decided that neither of the basic rates submitted was a correct application of the McAdoo Award, and on request of the parties to the dispute the Board established the following basis in these offices:

	Basic Rate, per month.	McAdoo Award, per month.
Vancouver Office—		
30 per cent	$100.00	$131.75
30 per cent	94.00	126.75
30 per cent	88.00	121.75
10 per cent	Optional.	
Toronto Office—		
30 per cent	90.00	123.25
30 per cent	84.00	117.60
20 per cent	78.00	109.98
20 per cent	Optional.	

A minimum rate of $85 per month shall be paid to Morse telegraphers in all percentage offices in both East and West.

The agreement is effective from May 1, 1918, to continue for one year in so far as it applies to wages. In its pertinence to rules, the agreement shall become effective October 1, 1918, and shall continue in effect both as to wages and rules until a date not later than April 30, 1919, subject to termination thereafter upon service of 30 days' notice by either party. The special overtime provisions under this award will be effective as of October 1, 1918. Overtime hours worked between May 1 and September 30, 1918, will be paid for at the increased rates on the basis of rules heretofore in effect.

INDUSTRIAL AND SOCIAL CONDITIONS IN GREAT BRITAIN IN RELATION TO EDUCATION

A COMMITTEE under the chairmanship of the Master of Balliol has been appointed by the Ministry of Reconstruction "to consider the provision for, and possibilities of, adult education (other than technical or vocational) in Great Britain, and to make recommendations." An interim report* recently issued briefly reviews the present situation in Great Britain with regard to this matter, and discusses the relation of industrial and social conditions to adult education. It is pointed out that there is a wide and growing demand among adults for education of a non-vocational character, arising from the desire for knowledge, for self-expression, for the satisfaction of intellectual, aesthetic and spiritual needs, and for a fuller life. The opinion is expressed that democracy can only be operative through an educated community, and facilities for adult education must be regarded as permanently essential, whatever developments there may be in the education of children and adolescents.

While for many years a number of agencies have been at work in this field, it is stated that since the opening of the present century the development of adult education has been most marked. University Extension Lecture courses, dating from 1873, are now part of the extra-mural work of most universities, and are attended every year by many thousands of people. Valuable work has been done by the Gilchrist Educational Trust, which expended nearly £40,000 from 1868 to 1909 on lectures to working men and women in various parts of Great Britain and Ireland. The adult school movement dates back to the end of the eighteenth century, although the modern movement really began in 1845. At the outbreak of the war the number of adult schools in existence was 1,883, with a membership of over 80,000 men and women. In 1903, the Workers' Educational Association was founded by a small group of trade unionists and co-operators to arouse and satisfy the desire for education among working men and women. According to its annual report issued in July, 1917, it had 186 branches in England and four in Scotland, comprising 2,333 affiliated societies and 10,700 individual members apart from those belonging to the affiliated societies. As a direct result of this organization the university tutorial class movement originated in 1907. The University of Oxford was the first to set up a joint committee consisting of an equal number of representatives of the University and of working class organizations to arrange for the provision of tutorial classes. These classes consist of not more than 32 men and women each, and are mainly working people. They are pledged to undertake a three years' course of study which "must aim at reaching within the limits of the subject covered the standard of university work in Honours." The classes are conducted by tutors approved by the university joint committees, and are reported on and inspected by the Board of Education and the universities. The subjects studied include general and industrial history, economics, political science, philosophy, biology, and literature. This movement rapidly grew, and every university and university college

*Interim Report of the Committee on Adult Education. Industrial and Social Conditions in Relation to Adult Education. 1918. 32 pp.

in England and Wales has participated in the work. In 1914, there were 152 classes in operation, containing 3,110 students. The war reduced the number of classes to 99 in the winter of 1916-17, but last winter the number rose to 121. Among other institutions and agencies for adult education that are mentioned are Ruskin College in Oxford and the Labour College in London, which provide residential courses to fit workingmen to take an active part in their trade union and other organizations, and education committees of co-operative societies, which provide instruction in co-operation, industrial history, citizenship, and economics.

These movements indicate a widespread desire for education among the working classes, but evidence obtained by the committee showed that the prevailing industrial and social conditions hindered employees to a large degree from availing themselves of opportunities for education to which, in the opinion of the committee, they are morally entitled. The following recommendations for the improvement of these conditions were made on educational grounds:

(a) That there should be a general shortening by law of the normal working day, and that, subject to qualifications in the case of certain industries, such as agriculture, it should not be more than eight hours.

(b) That in heavy and exhausting kinds of work, and work accompanied by special disabilities, the maximum legal working day should be shorter than the normal; and that heavy and exhausting occupations should be specially regulated, and wherever possible mechanical devices introduced.

(c) That overtime should be more closely regulated by law and reduced to a minimum.

(d) That where "shift" work continues, the hours should be reduced below those of a normal working day; and that, except where it is absolutely essential, regular night-work, whether periodical or continuous, should be prohibited by law.

(e) That efforts should be made to meet the evil effects of monotonous labour by alternating forms of employment, by creating opportunities for the exercise of initiative, and by establishing works committees for the consideration of matters affecting workshop life.

(f) That steps should be taken to guarantee to the worker some reasonable security of livelihood, either by such a reorganization of industry as may prevent or minimize fluctuations in the volume of production, or, where that is impossible, by some extension of the principle of insurance, which would protect the wage-earner against the ruinous effects of such fluctuations as cannot be prevented.

(g) That wage-earners should be entitled by law to an annual holiday, with pay; and that the weekly half-holiday should be extended by law to the worker in agriculture.

(h) That the preparation of schemes of housing and town-planning should be accelerated; that such schemes should be drawn up in consultation with the best expert advice available, and in co-operation with representatives of the people for whom such schemes are intended; and that, particularly, representatives of women, who are the persons most concerned, should be included in the Housing and Town Planning, Public Health and other committees dealing with this question.

(i) That adequate washing facilities should be required to be provided in all places of employment where the nature of the work makes it desirable.

(j) That special consideration should be given to the peculiar problems of rural housing.

(k) That a village institute, or at least a hall, should be established in every village under public control.

PRESIDENTIAL ACTION TO ENFORCE RULINGS OF THE WAR LABOUR BOARD

THE principles and functions of the War Labour Board of the United States have been reviewed in previous issues of the LABOUR GAZETTE* and it is therefore unnecessary to recapitulate them here. It will be sufficient to recall that the Board is composed equally of accredited representatives of capital and labour; and that hitherto in practically every instance its decisions have been obeyed by employers and workers alike. It comes as a surprise, therefore, and in the interests of industrial peace it is very much to be regretted, that it should now become necessary for the President of the United States to assert his authority in two instances to enforce the rulings of the Board—one of these instances being in the case of "recalcitrant" employers, and the other of "lawless and faithless" workers. In both cases the contending parties had agreed beforehand to be bound by the decisions of the Board.

A recent decision of the War Labour Board in the dispute between the Smith and Wesson Company, small arms manufacturers, of Springfield, Mass., and their employees, contained a recommendation that the company discontinue for the duration of the war its practice of compelling employees to sign "individual contracts," one clause of which binds the employee not to join any trade union. The Board in its ruling did not pass upon the validity or otherwise of these individual contracts, but urged merely that in the interests of industrial peace they should be discontinued during the war. The company in refusing to abide by the decision stated that it saw no reason why it should abandon a legitimate method of employment and one that has contributed to industrial peace and high efficiency in its plant "for the fantastic method outlined by the War Labour Board in its recommendation for dealing with its employees."

In order to nullify the undermining effect that this ill-judged criticism would otherwise have upon the authority of the War Labour Board, President Wilson immediately ordered the War Department to take over the plant and business of the Smith and Wesson Company at Springfield, Mass., for the duration of the war and to place an officer of the Ordnance Department in charge of all its further operations.

The other instance where presidential action became necessary occurred in various munitions plants at Bridgeport, Conn., shortly after that at Springfield, Mass. It has already been mentioned in a previous article (see August, 1918, issue, p. 620) that the munition companies of Bridgeport had, in agreement with their employees, asked the War Labour Board to investigate the whole system of industrial relations in the district and to make rulings thereon. The members of the Board, however, were unable to agree upon the findings, so an umpire was selected to decide the points in dispute, whose decision was adopted as the decision of the whole Board.

This decision granted wage increases to all the workers receiving less than 78 cents per hour, and established a minimum wage of 42 cents per hour for all male workers, skilled and unskilled, of 21 years of age or over, and a minimum wage of 32 cents per hour for all female workers 18 years of age or over. The decision also established the basic eight hour day in all the manufacturing plants of Bridgeport, and maintained the right of workers to bargain collectively and to join trade unions, and provided that women performing the

*See issues of May, 1918, p. 365; and July, 1918, p. 530.

same work as men should receive equal pay. On the question of classification, which was one of the main demands of the workers and the major point of difference among the members of the Board, the umpire decided against changing the method now in operation on the ground that to suddenly order a complete readjustment of the prevailing working system would not be in the interest of the Government which is directly concerned in the output of the Bridgeport industries.

With regard to classification it was the demand of the workers in the machine shops that in the performance of their respective duties they be classified as toolmakers, machinists, specialists and machinists' helpers, and that minimum rates of pay be established for each of these classifications. Joint Chairman Walsh, in commenting upon the decision, said: "The fact that the umpire did not immediately put a minimum wage into effect with a definite classification for skilled mechanics ought to be acceptable to all sides in view of the fact that provision is made for committees of the employers and employees of Bridgeport, democratically selected to take up all grievances, including the rates of pay and the classification of the employees, . . . and in case of a disagreement the right of speedy reference to a decision by the National War Labour Board." The machinists, however, refused to abide by the decisions of the Board, and after informing the President of the United States of their intention, went out on strike. The President, thereupon, in a letter to the machinists, outlined the course of action that would have to be taken if the strike were persisted in. In the course of his letter he says:

> . . . With the approval of the national officers of your union, you signed an agreement to submit the questions as to the terms of your employment to the National War Labour Board, and to abide by the award, which in accordance with the rules of procedure approved by me, might be made.
>
> The members of the Board were not able to reach a unanimous conclusion on all the issues presented, and, as provided in its constitution, the questions upon which they did not agree were carried before an arbitrator, the unanimous choice of the members of the Board.
>
> The arbitrator thus chosen has made an award which more than 90 per cent of the workers affected accept. You who constitute less than 10 per cent refuse to abide by the award, although you are the best paid of the whole body of workers affected, and are, therefore, least entitled to press a further increase of wages because of the high cost of living. But, whatever the merits of the issue, it is closed by the award. Your strike against it is a breach of faith calculated to reflect on the sincerity of national organized labour in proclaiming its acceptance of the principles and machinery of the National War Labour Board.
>
> If such disregard of the solemn adjudication of a tribunal to which both parties submitted their claims be temporized with, agreements become mere scraps of paper. If errors creep into awards, the proper remedy is submission to the award with an application for re-hearing to the tribunal. But to strike against the award is disloyalty and dishonour.
>
> The Smith & Wesson Company, of Springfield, Mass., engaged in Government work, has refused to accept the mediation of the National War Labour Board, and has flaunted its rules of decision approved by presidential proclamation. With my consent the War Department has taken over the plant and business of the company to secure continuity in production and to prevent industrial disturbance.
>
> It is of the highest importance to secure compliance with reasonable rules and procedure for the settlement of industrial disputes. Having exercised a drastic remedy with recalcitrant employers, it is my duty to use means equally adapted to the end with lawless and faithless employees.
>
> Therefore, I desire that you return to work and abide by the award. If you refuse, each of you will be barred from employment in any war industry in the community in which the strike occurs for a period of one year. During that time the United States Employment Service will decline to obtain employment for you in any war industry elsewhere in the United States, as well as under the War and Navy Departments, the Shipping Board, the Railroad Administration, and all other Government agencies, and the draft boards will be instructed to reject any claim of exemption based on your alleged usefulness on war production.

This letter had the desired effect: the workmen called a meeting and voted to return to work. It was reported, however, that the employers, in many cases, refused to reinstate them; whereupon the President wrote another letter, this time to the employers, in which he said:

On the thirteenth instant, I communicated with the workmen engaged in the strike, demanding that they accept the decision of the arbitrator and return to work, and stated the penalties which would be imposed if they refused to do so. The men at a meeting voted to return to work this morning, but I am informed by their representative that the manufacturers refuse to reinstate their former employees. In view of the fact that the workmen have so promptly complied with my directions, I must insist upon the reinstatement of all these men.

SUGGESTED CONSTITUTION AND FUNCTIONS OF A JOINT INDUSTRIAL COUNCIL

FOLLOWING the publication of the "Whitley Reports" and the adoption of the recommendations made therein as to the formation of Joint Standing Industrial Councils (which were fully discussed in the September issue of the Gazette), the British Ministry of Labour has issued a pamphlet (H.Q. 7A.) giving suggestions as to the constitution and functions of such councils. It may be stated that already a considerable number of trades have made draft constitutions based upon the recommendations contained in the pamphlet. The full text of the suggestions as to the constitution and functions of these councils is as follows:

The Whitley report on joint standing industrial councils, in discussing the constitution and functions of such councils, recommended that it should be left to the trades themselves to constitute schemes suitable to their special circumstances. The object of the following memorandum is not to lay down any hard and fast rules as to the constitution and functions of an industrial council, but to put forward certain suggestions which may serve as a basis for discussion and help in concentrating attention upon some outstanding points in the relations of employers and workpeople which must be taken into consideration in the actual formation of a council. Many of the clauses which follow are drawn from constitutions already drafted.

In a letter sent out by the Minister of Labour to the chief associations of employers and workpeople on October 20, 1917, the Minister announced that "the Government desire it to be understood that the councils will be recognized as the official standing consultative committees to the Government on all future questions affecting the industries which they represent, and that they will be the normal channel through which the opinion and experience of an industry will be sought on all questions with which the industry is concerned." In order to secure such official recognition the Minister of Labour will require to be satisfied that the composition of the joint industrial council is such that it will be regarded by the industry as being truly representative of the industry. The associations of employers and workpeople in any given industry should therefore, either directly or through a joint committee, if such a body has been established by them to carry out the necessary preliminary negotiations, send in to the Ministry of Labour an application for official recognition at some time during the negotiations and before the council is actually formed.

Functions of a Joint Industrial Council

1. To secure the largest possible measure of joint action between employers and workpeople for the development of the industry as a part of national life and for the improvement of the conditions of all engaged in that industry.

It will be open to the council to take any action that falls within the scope of this general definition. Among its more specific objects will be the following:

Note.—It is not possible and it is not the intention of the Minister to suggest any hard and fast policy as to what should constitute the functions of an industrial council. This is a question which the employers and workpeople in each industry must settle for themselves in their preliminary conferences in the light of their special needs and conditions.

2. Regular consideration of wages, hours, and working conditions in the industry as a whole.

Note.—In some cases a joint industrial council will contain representatives of a number of trades which have been accustomed in the past to deal with such questions as wages, hours, etc., through their already existing organizations. To meet such cases the following clause has been inserted in one of the draft constitutions: "Provided, that where any such matters have in the past been dealt with separately by any organization, such matters shall not be dealt with by the council as far as that organization is concerned without the consent of the representatives of that organization."

3. The consideration of measures for regularizing production and employment.

4. The consideration of the existing machinery for the settlement of differences between different parties and sections in the industry, and the establishment of machinery for this purpose where it does not already exist, with the object of securing the speedy settlement of difficulties.

5. The collection of statistics and information on matters appertaining to the industry.

6. The encouragement of the study of processes and design and of research, with a view to perfecting the products of the industry.

7. The provision of facilities for the full consideration and utilization of inventions and any improvement in machinery or method, and for the adequate safeguarding of the rights of the designers of such improvements, and to secure that such improvement in method or invention shall give to each party an equitable share of the benefits financially or otherwise arising therefrom.

8. Inquiries into special problems of the industry, including the comparative study of the organization and methods of the industry in this and other countries, and, where desirable, the publication of reports.

9. The improvement of the health conditions obtaining in the industry, and the provision of special treatment where necessary for workers in the industry.

10. The supervision of entry into, and training for, the industry, and co-operation with the educational authorities in arranging education in all its branches for the industry.

11. The issue to the press of authoritative statements upon matters affecting the industry of general interest to the community.

12. Representation of the needs and opinions of the industry to the Government, Government departments, and other authorities.

13. The consideration of any other matters that may be referred to it by the Government or any Government department.

14. The consideration of the proposals for district councils and works committees put forward in the Whitley report, having regard in each case to any such organizations as may already be in existence.

Note.—The following have also been included among the functions in some of the provisional constitutions which have been brought to the notice of the Ministry of Labour:

1. The consideration of measures for securing the inclusion of all employees and workpeople in their respective associations.

2. The arrangement of lectures and the holding of conferences on subjects of general interest to the industry.

3. Co-operation with the joint industrial councils for other industries to deal with problems of common interest.

The Constitution of a Joint Industrial Council

1. MEMBERSHIP.

The council shall consist of members, appointed as to one half by associations of employers and as to the other half by trade unions.

Associations of employers:

	Number of representatives.
(1).....	.....
(2).....	.....
(3).....	.....
etc.	
Total.....	.....

Trade unions:

(1).....	.....
(2).....	.....
(3).....	.....
etc.	
Total.....	.....

2. RE-APPOINTMENT.

The representatives of the said associations and unions shall retire annually, and shall be eligible for re-appointment by their respective associations and unions. Casual vacancies shall be filled by the association concerned, which shall appoint a member to sit until the end of the current year.

3. COMMITTEES.

The council may delegate special powers to any committee it appoints.

The council shall appoint an executive committee and may appoint such other standing or sectional committee as may be necessary. It shall also have the power to appoint other committees for special purposes. The reports of all committees shall be submitted to the council for confirmation except where special powers have been delegated to a committee.

4. CO-OPTED MEMBERS.

The council shall have the power of appointing on committees or allowing committees to co-opt such persons of special knowledge not being members of the council as may serve the

special purposes of the council, provided that so far as the executive committee is concerned: (a) the two sides of the council shall be equally represented, and (b) any appointed or co-opted members shall serve only in a consultative capacity.

Note.—It is desirable to take power to appoint representatives of scientific, technical, and commercial associations upon committees and sub-committees of the council, and the above clause would give this power.

5. Officers.

The officers shall consist of a chairman or chairmen, a vice-chairman, a treasurer, and a secretary or secretaries.

1. The chairman:

Note.—The Whitley report suggests that the appointment of a chairman or chairmen should be left to the council, who may decide that there should be: (1) a chairman for each side of the council, (2) a chairman and vice-chairman selected from the members of the council (one from each side of the council), (3) a chairman chosen by the council from independent persons outside the industry, or (4) a chairman nominated by such persons or authority as the council may determine, or, failing agreement, by the Government.

2. Secretary:

The council shall be empowered to maintain a secretary or secretaries and such clerical staff as it may think fit.

All honourary officers shall be elected by the council for a term of one year.

6. Meetings of the Council.

The ordinary meetings of the council shall be held as often as necessary and not less than once a quarter. The meeting in the month of shall be the annual meeting. A special meeting of the council shall be called within days of the receipt of a requisition from any of the constituent associations or from the executive committee. The matters to be discussed at such meetings shall be stated upon the notice summoning the meeting.

7. Voting.

The voting both in council and in committees shall be by show of hands or otherwise as the council may determine. No resolution shall be regarded as carried unless it has been approved by a majority of the members present on each side of the council.

8. Quorum.

The quorum shall be members on each side of the council.

9. Finance.

The expenses of the council shall be met by the associations and trade unions represented.

10. Relation of a Joint Industrial Council to the Government.

It is desirable that there should be intimate and continuous touch between the industrial councils and the various Government departments interested, not only to secure prompt attention from the right officials, but also to obtain information as to what other councils are doing. To meet this need, the Ministry of Labour has, at the request of the Government, set up a special section dealing with industrial councils.

Where any industrial council so desires, a civil servant with the necessary experience will be assigned the duties of liaison officer by the Ministry of Labour. He will act only as and when required and in a purely advisory and consultative capacity, and will be available when desired for any meetings of the council.

By this means similarity of method and continuity of policy in the various industrial councils will be assured, and the experience and proposals of one council will be available for all the others.

11. District Councils and Works Committees.

It will be necessary for the council when formed to consider the necessary arrangements for district councils and works committees if the conditions of the industry are such as to require them. Obviously existing local conditions and existing organizations will have to be taken into account and the variety of such conditions make it difficult to suggest any draft constitution which would be of value. The Ministry of Labour will, however, be glad to supply examples of existing schemes and other information at their disposal.*

*The report of an inquiry into works committees made by the Ministry of Labour and published as "Industrial Reports No. 2" was reviewed on pp. 744 of the September issue of the Labour Gazette.

TENTH ANNUAL CONVENTION OF THE CANADIAN FEDERATION OF LABOUR

THE tenth annual convention of the Canadian Federation of Labour was held at Toronto on September 3-6, and was attended by 16 delegates, representing various local unions affiliated with the Federation.

In his address, the president, Mr. Charles G. Pepper, asked the affiliated local unions to adopt every means provided by law for settling disputes, pointing out that the Federation had always believed in conciliation and arbitration. In commenting on the increased prices of foodstuffs, he noted that many workingmen are providing food for their families by cultivating vacant lots, but in the case of such articles as flour and sugar, which cannot be produced by the individual, he said they should urge upon the Dominion Government the necessity of bringing them under their immediate control. Reference was made to the growth of the idea of municipal control of public utilities, a principle which has been repeatedly endorsed by the Federation.

The following resolutions were adopted by the convention:

That the Provincial Governments be requested to provide such regulations as are necessary to facilitate the entrance of deserving poor to public hospitals.

That this convention request the Federal Government to pass legislation enforcing weekly pay in all factories and workshops.

That all enemy aliens be interned or given the privilege of working for $1.10 a day with subsistence allowance, the difference between this amount and their earning capacity to be devoted to soldiers' dependants.

That this convention request the Dominion Government to pass legislation enforcing eight hours a day for the workers.

It was decided to place an organizer in the field for the Federation, the executive officers having the power to take this step.

The following officers were elected for the ensuing year: President, James Higgins, Toronto; vice-president, Jabez Shaw, Toronto; secretary-treasurer, Charles E. Clay, 164 Grange avenue, Toronto; executive officers, William Chambers and William Harrison, Toronto; vice-president for Ontario, R. Sullivan, Toronto; vice-president for Quebec, George Marois, Quebec City.

REPORT OF PROCEEDINGS OF THE THIRTY-FOURTH ANNUAL CONVENTION OF THE TRADES AND LABOUR CONGRESS OF CANADA

THE thirty-fourth annual convention of the Trades and Labour Congress of Canada was held in the city of Quebec, Que., the sessions continuing from September 16th to 21st. The opening proceedings were preceded by a parade of the delegates through some of the principal streets to the Knights of Columbus Hall, where the sessions were held. The president of the Federated Trades and Labour Council of Quebec and Levis, Mr. M. J. Walsh, welcomed the delegates on behalf of organized labour of the district, while His Worhsip Mayor H. E. Lavigueur extended a welcome on behalf of the municipality, and the premier of the province, Sir Lomer Gouin, did similarly for the province. Hon. Alex. Taschereau, Provincial Minister of Public Works and Labour, and Mr. Stuart A. Hayward, of Buffalo, N.Y., fraternal delegate from the American Federation of Labour, also contributed to the opening proceedings.

Mr. J. C. Watters, president of the Congress, replied to the various addresses, thanking the representatives for the welcome extended, and declared the convention open. The first business was the report of the Credential Committee, which had been previously appointed by the Executive Council. The report, which was adopted, showed that credentials had been received for 440 delegates, the largest number in the history of the Congress. The representation was divided as follows: Forty-one international organizations which have affiliated all of their Canadian members were represented by one delegate each; one provincial federation had one delegate; 25 trades and labour councils were represented by 43 delegates, and 253 local branch unions had 351 delegates. The British Trades Union Congress, the American Federation of Labour and the Women's Trade Union League were represented by fraternal delegates. A representative of the Women's Labour League of Winnipeg was also accepted as a fraternal delegate.

REPORTS PRESENTED

Under this heading follows a synopsis of the reports submitted to the convention by the Executive Council, parliamentary representative, provincial convention committees, provincial federation of labour, fraternal delegate, immigration representative and secretary-treasurer.

REPORT OF THE EXECUTIVE COUNCIL.

The report of the executive council opened with a reference to the increased trade union membership in Canada and the disbursements which had been made by international organizations on account of benefits to members. The increased strength of labour organizations had enabled them to make a more effective stand for increased wages. Through the medium of the Industrial Disputes Investigation Act many disputes had been settled without resort to strikes, but in some instances it had been necessary to call strikes to enforce the demands. Reference was also made to the formation of the Independent Labour Party in the various provinces and to the appointment of labour representatives on commissions established by the Government, as well as to the necessity of women workers being enrolled in the ranks of organized labour.

Conference on War Problems. — Under this caption the executive council reported on a conference of labour representatives and members of the Government, which had been held early in the year. A number of important war problems had been considered, and as a result the following circular was issued and forwarded to the local labour bodies in Canada:

To Organized Labour in Canada:

This pamphlet is issued for the information of your organization, outlining the results of Conferences called by the Government and held between them and representatives of organized Labour of Canada.

The Government of this country having realized that no measures can be successful without the co-operation of the workers, and also that to obtain that expression of true co-operation it must recognize the organizations of the workers as only tangible means of expression. The methods of conference of all other allied countries in dealing with organized Labour representatives may have some bearing on their changed attitude or it may be other reasons, but we are not concerned for the purpose of this circular as to what has brought about the change. Their attitude is now one of co-operation with the organized Labour movement and, by tolerance on both sides, it is hoped that such co-operation will expand to its fullest degree.

With this introduction we submit in very condensed form the final decisions of three joint meetings with the War Cabinet of the Government, occupying over seven hours, at which free interchange of expression took place, and 14 private meetings of over 50 Labour representatives of different trades, from all parts of the Dominion. Although these delegates had no official instructions on any of the matters from their respective organizations, yet their official standing, and years of experience and observation, must be taken into account, and we therefore feel no hesitation in placing these findings before you as in no way a careless conclusion, but one arrived at in the full expectation that it represents the attitude of the members of organized Labour in this country.

The subjects dealt with are tabulated in condensed form as follows, with the additions of such comments as seemed advisable by the conference:

1. The acceptance of any position in the Union Government which would carry with it the necessity of subscribing to the platform of this or any other political Government, was not deemed advisable, and the conference so informed the Government in reply to their statement that it was their intention to create a position of Under Secretary of Labour, who would of necessity have to be a Member of the House of Commons, and accept a Government seat to obtain that position.

It was made plain that this decision did not prevent any member of organized Labour from accepting such a position, as an individual, but that organized Labour, as a body, could not tie itself to subscribe to any political party.

2. The Government agreed to our representations that on all advisory committees and commissions which would have to do with the prosecution of the war, or the reconstruction period after the war, and in which Labour was affected, that organized Labour should be given fair representation.

We further emphasized this at our last meeting with the Government by defining that such representatives, to be satisfactory to organized Labour, must be such as are recommended or acceptable to the recognized heads of our movement, or where the boards are of a strictly local character then acceptable to the local Trades Council, where such exists, or the organized movement in such district.

3. The Government were pressed to define what were in their opinion essential or non-essential industries for the carrying on of the war, and replied they were not in a position to say, as the question was now under investigation, reasonably claiming that this would necessarily have to be decided according to developments in the war.

In order that the least possible hardship may be done to any workers employed in any industry that may in the future be classed as non-essential, the conference asked the Government to arrange time for the organizations affected to place their views before them, before final action was taken.

4. The railroad labour problem had to be dealt with. We submitted three alternative proposals to the Government. First, the nationalization of all railroads, and their operation for the good of the Country instead of for private enrichment. The representatives of three of the Railroad Brotherhoods recorded themselves as opposed to this, on definite instructions from their membership, the chief reasons advanced being the bad conditions of employment insisted upon on present Government owned roads, and lack of protection through not applying compensation laws the same as when the roads are under private ownership. The movement as represented by the organizations affiliated with the Trades and Labour Congress of Canada disagrees, claiming that it is purely a matter of administration, and in no way affects the principle. As the three railway organizations are amongst the trades primarily affected, due consideration should be given to their views.

5. An alternative proposal (failing the taking over of the entire railway systems of the country by the Government), is the creation of a central control board to operate the railways during the war, and on which board Labour shall be fully and fairly represented.

A third alternative is the compelling of the companies (because of their public endowment in the past), to raise the wages of all necessary labour to a living standard. By one of these methods we are sure that the labour difficulties of the railways may be solved.

On none of the above have the Gov rnment committed themselves, simply stating that the subject was so large that they would require a longer time to reach their final conclusions.

5. On suggestion of the Government, the representatives of the Agricultural Departments of the various Provincial Governments and also the Superintendents of the Labour Bureaus of these Governments, who were meeting in Ottawa concurrently, submitted to us a memorandum which embodied their suggestions to the Government. Following out the suggestions of the Government they placed before us their recommendations for our consideration. Our conclusions were as follows, which we later submitted to the Government:

(a) With their proposal for the abolition of private employment bureaus and the addition to and encouragement of Provincial and Municipal Employment Agencies, also the creation of a Dominion Exchange for the tabulation of statistics and the standardization of such Bureaus, we agreed: Subject (1) The control to be regulated by advisory boards, on which Labour should have equal representation; (2) the acceptance to be finally judged by the nature of the regulations to be drawn up governing the same for the protection of Labour.

(b) Regarding the proposal that reduced railway rates be granted to all labourers travelling on all railways in Canada, to employment away from home: the conference went further than acceptance of this, and suggested to the Government free railway transportation to all labourers going from cities to farms or from farm to farm as evidence was submitted showing that a large percentage of the aggregate wages received for temporary service on farms was taken to cover transportation charges, preventing many workers assisting in farm production.

(c) We agreed to their proposition of exemption from compulsory Military Service of all farm help, as this is in line with our previous declaration on this subject.

(d) A proposal from the Provincial Government representatives to introduce a form of Compulsory Service on the farms was unanimously rejected. The conference substituted a proposition of a campaign of publicity, in which the hours, wages, and working conditions which the Government would guarantee for such work would be stated along with accurate information as to actual labour requirements. These conditions to be fixed by local wage boards, on which Labour, Farmers, and the Provincial Government Employment Bureaus would all be fairly represented.

The Government has these suggestions under consideration, and while some of the members of the Government expressed themselves as holding the opinion that any form of conscripted farm labour would be impracticable, no official pronouncement was made on this matter.

We also opposed a suggested amendment to the Criminal Code, to treat as a vagrant any man deliberately unemployed for a period of time. The Government agreed to our objection as it is impossible to define unemployment and would lead to many abuses.

(e) We also agreed to the use, temporarily, of teen age boys, during Summer Holidays, etc., and the undertaking of a full publicity campaign for the help required. The proposal to introduce farm help from the United States also received our support as it would be inconsistent with our international position to do otherwise.

6. On the subject of Labour shortage and the redistribution of same the Conference agreed that some steps were necessary to obtain accurate information as to the number of persons in Canada with experience at various trades or callings. This would serve the purpose of accurately answering by reliable statistics the oft repeated assertion of the Labour shortage. There was general agreement among the delegates that up to the present such shortage does not exist. It is simply faulty distribution of the same.

The Government suggestions to obtain compulsory registration of the man and woman-power of this Dominion, and to use the same for the purpose of securing a measure of voluntary enlistment, for essential industries and farming, was accepted, having in view the national necessity and the urgency of the situation as placed before us. Our acceptance, however, was contingent on Labour being fully represented on the committees dealing with this question, and the use of such Labour being for voluntary industrial service.

7. Alien Labour and its exploitation by private interests occupied our attention and we placed before the Government our protests against any man, alien or otherwise, being allowed to work under private employment, unless he is granted the full industrial freedom of a citizen of Canada. We disagree with the principle of any deduction from his wages under any guise, as it would inevitably lead to the lowering of the present standards of living of Canadian citizens.

Aliens not fit to be at large under the above conditions should be placed at work under Government detention, clearing lands, and producing farm produce on Government owned, and operated farms.

8. We drew the attention of the Government to the popular discontent against men of military age of Allied Nations being left to take the place of our citizens, called up for Military Service, and in order to establish equality of service, as far as is consistent for the safety of the country, left the Government to take such steps as may be possible with the Governments of the Allied Nations, to secure such equality.

9. The limitation and prevention of brewing of light beers in this country were objected to. Strong divergent opinions on the temperance question are known to exist in our ranks, and therefore the subject was dealt with on the broad basis as to whether it was really necessary for the continuance and the winning of the war to prohibit such light beers, and not from the point of view as to the merits or demerits of beer as an ordinary beverage.

The conference decided that inasmuch as some men considered it a necessity, and it did not need any food grains to produce, and that it might possibly prevent some men from freely changing their place of employment, that it was an unnecessary interference with the workers, and asked for the reconsideration of the Order-in-Council dealing with this as a war measure.

10. The introduction of Chinese labour was emphatically opposed, the Conference endorsing the stand that we can and must win the war without the destruction of the national standards at home which the introduction of Coolie labour would inevitably lead to, or otherwise victory would be a barren one so far as democracy is concerned.

11. We called upon the Government for the protection of women who enter industries to replace men, and suggested that they should only be placed there after full investigation had proven that all available man power had been absorbed. That full inspection of working conditions should be carried on at all times, also reports by women inspectors, in conjunction with representatives of men's organizations, as to the advisability of women undertaking any class of work (with the view of their responsibility towards the nation, as the mothers of our future citizens), should be a contingent condition of their employment in any industry.

12. Equal pay for women employed on work usually done by men, as men are receiving or were previously receiving for the same work. will be insisted upon, and the Government asked to make a declaration to that effect, and also to guarantee the right of women to protect themselves through trade unions the same as men.

13. Political equality for women should accompany the industrial use of women, so that through the ballot box the women can express their opinion of the treatment they may receive.

14. A revision by the Government of their land policy was asked, and the expropriation by them of lands held for speculative purposes and the necessary legislation to enable many to return to the land as owners of small farms, near the shipping points, and thus to assist production.

15. A protest was also lodged against the reported closing of places of amusement, such as theatres, etc., which provide necessary relaxation to workers, and relatives of those overseas, during these depressing times.

16. Another resolution to ask the Government to include the registration of the wealth of the country, at the same time as the man power, was presented to the Government.

The Government announced that they had cabled to the Premier of Great Britain, Hon. David Lloyd George, that they were in com-

plete accord with the war aims of the British Government as stated by him, and assured the British Government of the full co-operation of this country to carry the war to a successful conclusion, in accord with his declarations.

The Government were fully informed in our memoranda to them that our expressions of opinion were only to be accepted as the individual opinions of the delegates, and would be in no way binding on the movement as a whole.

All of which is fraternally submitted on behalf of the delegates present at the conference.

J. C. WATTERS, Chairman,
TOM MOORE, Secretary.

ANNUAL INTERVIEW WITH THE GOVERNMENT.—A report was given of the interview held on April 15, 1917, with the view of bringing to the attention of the Government legislation which was approved at the 1917 convention. The matters presented included (1) increased salaries for the letter carriers and an extension of the Saturday half-holiday during more months of the year, (2) old age pensions and pensions for widows and deserted wives, (3) labour representation on the commission dealing with the vocational training and industrial education of returned soldiers, (4) regulations of public eating places by the food controller and a request that a labour representative be appointed to the Food Board, (5) readmission of the paper known as the Jewish Forward, (6) asking for an amendment to prohibition legislation so as to permit the importation and exportation of beer with 2½ per cent of alcohol, (7) asking that the same rate of separation allowance, pensions, etc., as is paid to members of the Canadian overseas forces, be allowed to reservists in the allied armies who were resident in Canada at the outbreak of the war, (8) abolition of the Patriotic Fund, as now organized, and the raising of equivalent sums by direct taxation, (9) appointment of a labour representative on the Central Immigration Authority which it is proposed to establish, and also on the War Purchasing Commission and Canada Food Board, (10) fair wage schedules in all contracts for war supplies, (11) that election deposits be abolished and Federal election day be made a public holiday, (12) amendment to the criminal code to prevent the issuing of injunctions interfering with the right of strikers to picket, (13) proper registration of union labels, (14) enactment of an eight-hour law for all Government employees and employees working for contractors doing Government work or employed on work subsidized or assisted financially by the Government, (15) that Federal Government employees be covered by Workmen's Compensation Acts of the provinces in which they reside, (16) the enfranchisement of women and the extension of labour bureaus to assist in providing labour for the farms.

WAR.—In dealing with this subject the executive council makes reference to the former pronouncements and states: "While helping in every possible way the cause of the Allies, and doing all in our power to assist our own Dominion in the gigantic and patriotic work it has undertaken, we must not lose sight of the fact that new conditions have arisen which may materially affect our interests in the days that will follow the war." The executive reaffirmed the position of the Congress on the question of an international congress at the time and place to be indicated by the international diplomats for the establishment of peace terms when the war is over.

CONSCRIPTION.—The executive council after referring to the attitude of the Congress on this subject says that after the pronouncement at the polls on December 17, 1917, conscription has ceased to be a live issue in Canada.

DELEGATE TO AMERICAN FEDERATION OF LABOUR.—The executive reported having appointed Mr. Thos. Moore, of Niagara Falls, as fraternal delegate to the American Federation of Labour owing to the change in convention date of this body, and no meeting of the Congress intervening.

INTERNATIONAL PEACE CONGRESS.—An invitation had been received by the executive from Hon. Arthur Henderson to attend the conference of representatives of the allied nations to consider the war aims adopted by the British Trade Union Congress and the British Labour Party. The invitation was carefully considered, and it was de-

cided that as the conference was not of an international character, the three delegates elected at the Ottawa convention were not empowered to attend. It was recommended that the decision of the previous convention to elect delegates to the peace congress stand as the decision of the Congress, provided such conference is endorsed by the British Trade Union Congress.

Government Ownership of Railways.—The executive endorsed the principle of the Government in the proposed nationalizing of the Canadian Northern Railway and Grand Trunk Railway, but stated that they also desired the Canadian Pacific Railway to be included in the railway corporations to come under Government ownership and control. It was recommended that a demand be made for labour representation on the commission appointed to operate these railways.

Government Ownership of Air Craft.—The executive suggested that the Government should be requested to appoint a commission to make an investigation into the possibilities of utilizing air craft for commercial purposes. It was stated that it would be folly on the part of the Government to take over the railways and leave the commerce of the air in private hands. It was therefore important that a declaration of policy from the Government should be demanded at an early date.

Soldiers' Pensions—The executive regretted that very little had been done in reference to increasing the pensions of soldiers. A slight increase had been made, but it was stated it was inadequate. It was recommended that a demand be made for an adjustment of pensions in conformity with the declaration of the Ottawa convention.

Industrial Disputes Investigation Act.—The executive reported that despite the fact that the Toronto Convention had decided that a demand be made for the repeal of the Industrial Disputes Investigation Act, there is an increased demand for the application of the provisions of this act by the labour organizations of the Dominion, and recent amendments have made the law more in harmony with the wishes of these bodies which insist upon utilizing its provisions in times of threatened industrial trouble. From reports published by the Department of Labour it is shown that a large number of settlements have been made, and in many cases satisfactorily to the organized workers. There being no indication that the law would be repealed, it was recommended that the executive be empowered to press for such amendments as may be deemed necessary to make the act more useful.

Organizing of Women Workers.—The executive reported the success which has been made in organizing the women workers in Great Britain and pointed out that of over 200,000 organized workers in Canada only about 4,000 are females. Some progress has recently been made in organizing the female workers in Canada, and the executive recommended that they be empowered to take up this matter with the international unions with the view of increasing the number of female members.

Independent Political Action.—The executive reported that considerable activity was being displayed by the workers of Canada in organizing provincial labour parties, the object being ultimately to form a national Canadian Labour Party. It was recommended that this work be continued until all provinces are thoroughly organized, and that a convention be called by the joint executive committees of the provincial parties at as early a date as practicable.

Technical Education.—The executive stated that: "Despite the repeated refusals of the Government to take any steps to grant financial assistance to the Provincial Governments to extend the system of industrial training and technical education, we again recommend that the need for such assistance be urged upon the Government." This assistance was considered necessary by the executive in view of new industries being established, and the prospects of many more at the close of the war.

CONGRESS HEADQUARTERS.—The establishment of new headquarters in Ottawa was reported, and satisfaction was expressed at the convention being held in Quebec.

REPORT OF PRESIDENT AND PARLIAMENTARY REPRESENTATIVE.

The president, Mr. J. C. Watters, presented a report on matters which had engaged his attention during the year, among which were several which concerned some of the Government departments. He also reported (1) on his work in connection with the mine workers and steel workers of Nova Scotia, (2) the fuel problem, (3) strike of moulders at Toronto and Hamilton, and threatened strike of Great North Western telegraphers, (4) the demands of the letter carriers. The report contained mention of certain matters which had been before the last session of Parliament, and included (1) enfranchisement of women, (2) daylight saving, (3) titles, (4) workmen's compensation, (5) labour bureaus, (6) Industrial Disputes Investigation Act, (7) Civil Service Act, (8) income tax, (9) Winnipeg strike, (10) Pensions, (11) military service, (12) alien labour, (13) immigration and colonization, (14) soldier's civil re-establishment. A supplementary report of the president's trip to the Pacific coast was also submitted.

REPORTS OF THE PROVINCIAL CONVENTION COMMITTEES.

ONTARIO.—On January 28, 1918, the committee had met the Ontario cabinet and submitted the various matters referred to them for presentation to the Government: (1) respecting injunctions in trade disputes, (2) making it illegal to employ children under 16 years of age in any factory, (3) licensing of firemen operating steam boilers, (4) uniform blower laws in metal polishing factories, (5) apprenticeship for moving picture machine operators, (6) labour representative on Workmen's Compensation Board, (7) asking for union representation on the Board of License Examiners and that only qualified men be allowed to operate steam boilers of ten or more pounds pressure, (8) that all building trades employees, irrespective of who employs them, be covered by the Compensation Act, (9) rural credit to assist the settler of small means, (10) limiting the hours of labour of retail clerks to 53 per week, (11) war labour clauses prescribing standards of labour conditions to be included in treaty of peace, (12) fortnightly pay-day, (13) regulation of hours and a six-day work week for employees in eating houses, (14) against the making of clothes in the homes of the workers, (15) removal of wall coverings before redecorating any building, (16) appointment of inspector for over-head power wires, (17) to allow the use of 2½ per cent alcohol in temperance beer instead of 2½ per cent proof spirits, (18) abolition of property qualification for municipal office. The report contains correspondence giving the reply of the premier, Sir Wm. Hearst, to the various matters submitted telling how far the Government was prepared to meet them. The committee also reported on the call for a convention for political purposes, and the formation on March 29, 1918, of the Ontario Section of the Canadian Labour Party.

QUEBEC.—The committee reported that at a convention held on November 3-4, 1917, a labour party had been formed as the Labour Party of Canada, Province of Quebec Section. On December 20, 1917, the committee had met the Provincial cabinet and presented the following matters for consideration: (1) Agricultural credit, (2) protection of workers' salaries in case of bankruptcy, (3) allowing cooks a rest of 24 consecutive hours weekly, (4) preventing the manufacture of garments in the homes of the workers, (5) removing wall coverings before redecorating, (6) free technical schools, (7) abolition of taxes on workmen who do not reside in the locality in which they are employed, (8) free and compulsory education in the elementary grades, (9) inspection of factories, and inspectors' salaries, (10) for inquiry into the working of the Workmen's Compensation Act, (11) against the invoking of injunctions in

labour difficulties. The demand for a rest day for cooks had been acceded to. The request for inquiry into the Workmen's Compensation Act had not been granted, but certain amendments had been made. It was also reported that some progress had been made in the organizing of labour unions.

Nova Scotia.—The committee reported that an amendment had been made to the Workmen's Compensation Act which would have the effect of affording relief to those who were in greatest need of assistance. In reference to the explosion which occurred in Halifax on December 6, 1917, it was stated that 2,000 people were killed and 5,000 injured, included in which were hundreds of members of trade unions. A large increase was reported in the trade union membership of the province.

Manitoba.—On February 7, 1918, the committee had interviewed the cabinet Ministers and presented the following matters: (1) that the polls in elections in industrial centres remain open until 8 p.m. (2) anti-injunction law, (3) protection of open salamanders in buildings under construction or repairs, (4) transfer of jurisdiction over moving picture machine operators from the Provincial Treasurer's Department to the Bureau of Labour, (5) amendment to the War Relief Act, (6) official inspection of certain engineering plants, (7) free text books, (8) abolition of election deposit, (9) minimum wage law, (10) amendments to Workmen's Compensation Act, (a) state insurance, (b) commission of three. The formation of a labour party for the province was reported, as was also the launching of a new labour paper. Reference was made to the strikes which had been inaugurated in Winnipeg and the new labour unions which had been formed and had affiliated with the Trades and Labour Council. Demands Nos. 3, 4 and 6 were acceded to by the Legislature; No. 9 was met by the appointment of a commission to deal with the minimum wage matters, and a commission of three was appointed to deal with workmen's compensation.

Saskatchewan.—On November 6, 1917, the committee presented the following matters to the provincial Ministers: (1) amendments to the Factories Act, (2) more rigid application of the various protective measures now in force, (3) minimum wage for women workers, (4) abolition of poll tax and raising the income tax minimum to $1,800, (5) free medical and dental attention for school children and extension of the system of free education to the furnishing of all school supplies, (6) protesting against street cars being operated by one man, (7) pensions for mothers. The formation, on November 9, 1917, of the Labour Party of Saskatchewan was reported. The committee further stated that there had been few labour disputes, better working conditions in most cases having been secured without strikes.

Provincial Federations of Labour

New Brunswick.—The report submitted by the New Brunswick Federation of Labour showed that considerable activity had been manifested during the year. Many requests for legislation in the interests of the workers had been made to the Provincial Government. A workmen's compensation act and a law respecting public health had been passed by the Legislature, as well as other enactments of more or less interest to labour.

Alberta.—The Alberta Federation presented a report dealing with the matters which had been laid before the Provincial Government for attention, and the action thereon. A compensation act had been passed and the Coal Mines Act had been amended. Other legislation adopted included an amendment to the Factories Act and the passage of a law governing the operation of boilers. The Federation was not in favour of the policy of the Military Hospitals Commission sending returned soldiers to workshops and factories for vocational training, and recommended that the Government appoint a commission to inquire into the best method of extending vocational training. A number of new trade unions had been organized,

and increased wages and improved working conditions had been secured by a large number of the affiliated unions.

BRITISH COLUMBIA.—The report from this federation gave a list of the legislative proposals which had been presented to the Provincial Government in March, 1917. Of the various demands submitted some had been acceded to, viz.: eight-hour day and better protection for men employed in the metalliferous mining industry, eight-hour day for all workers around coal mines, appointment of a commission to fix a minimum wage for women workers, and for the protection of printers by abolishing the use of basements as printing offices. The federation had appointed a committee to deal with the question of the returned soldiers and was considering the matter of vocational training. The formation of the Federated Labour Party was also reported.

REPORTS OF FRATERNAL DELEGATES

Mr. Wm. Lodge, of Ottawa, Ont., who was the fraternal delegate to the 37th annual convention of the American Federation of Labour held in Buffalo, N.Y., in November, 1917, reported on his attendance and the impressions gained. Mr. Thos. Moore, of Niagara Falls, Ont., the fraternal delegate to the 38th convention of the American Federation held in St. Paul, Minn, in June, 1918, in his report dealing with the activities of the federation reported that the two fraternal delegates from the British Trade Union Congress were not present owing to some difficulties at the last moment in securing passports to leave England.

REPORT OF IMMIGRATION REPRESENTATIVE

Mr. W. R. Trotter, of Vancouver, B. C., submitted a report dealing with the new emigration bill which had been introduced in the British House of Commons this year. He dealt with the provisions of the measure and pointed out its two main objects, which were (1) to constitute a central authority to be known as the Central Emigration Authority, which would have executive powers in connection with emigration from the United Kingdom, and (2) to control those who are actively connected with emigration, such as passage brokers and their agents and emigration societies.

REPORT OF SECRETARY-TREASURER

Mr. P. M. Draper submitted a report of the finances which showed the Congress to be in a sound financial and flourishing condition. The total receipts including a balance of $4,871.45 from last year, were $25,803.80. The expenditure amounted to $14,441.64, leaving a balance for the fiscal year of $11,362.16. In addition there is $10,000 in reserve fund. The affiliations include the Canadian membership of 55 national and international organizations. Three provincial federations, 45 trades and labour councils and 50 federal unions are under charter from the Congress. The total membership numbers 117,498, an increase for the year of 35,811. The report was referred to the Committee on Audit, who reported as having found the accounts correct in every detail. The report was adopted.

Report of Committee on Officers' Reports

The majority of the committee to which the above reports were referred in the main concurred in them, but in some instances made a few slight alterations and amendments. In dealing with the report of the Executive Council satisfaction was expressed at the appointment of labour representatives on several Government commissions, as reported under the caption "Conference on War Problems," but the committee non-concurred in clause (d) of section 6 *re* compulsory service on farms. In regard to the annual interview with the Government the committee stated that instead of making visits to the Cabinet Council, labour should elect its own representatives to the houses of legislation. On the question of Conscription the committee recommended that the matter be deleted from the report, and also protested against the action of the British Government in refusing pass-

ports to the fraternal delegates from the British Trade Union Congress to the American Federation of Labour. The committee recommended that the Congress do not participate in any conference other than the International Peace Conference, and that delegates be elected at each convention.

The committee concurred in the report of the president and offered a recommendation that a representative of labour be appointed by the Government to act in conjunction with the fuel controller. The committee recommended that the executive be instructed to work for the enfranchisement of all women, and concurred in the amendments to the Industrial Disputes Investigation Act, with the exception of one which it alleged savoured of compulsory arbitration. In regard to the civil service, the committee was opposed to any law which would debar civil servants from any privileges enjoyed by other citizens. Concerning the Winnipeg strike the committee stated that they understood that no strikers would be brought under the provisions of the 'Anti-loafing law' and disapproved of any suggestion in that regard. The executive council was urged to press for further increase in soldiers' pensions, and the committee recommended vigorous opposition to the method of Government by order-in-council.

The reports of the Provincial Executive Committees were approved by the Committee on Officers' Reports. Gratification was expressed at the progress which had been made in securing favourable legislation. Recommendation was made that efforts be continued to have a commission appointed by the Quebec Government to study the question of workmen's compensation and also that the executive council seek the adoption of an anti-injunction law.

The committee concurred in the reports of the provincial federations and recommended that the executive council take up the question of securing the appointment of a commission by the Government to inquire into the matter of vocational training for the disabled soldiers and the rehabilitating at the close of the war of the soldiers who return.

The report of the immigration representative was concurred in and he was recommended as the overseas representative of the Congress on immigration matters.

For the first time in the history of the Congress a minority report on officers' reports was presented. The minority report took exception to the manner in which the representatives to the conference with the Government on war problems were chosen and also to the actions of the conference. Objection was taken (1) to the national registration scheme, and also to the secretary of the conference becoming a member of the Canada Registration Board, (2) the formation of local wage boards to fix wages for farm labour, (3) to section 8, *re* men of allied nations not being called for military service. The minority recommended that whenever conferences are held with the Government the delegates shall be elected by the organizations they are supposed to represent, and also that the Congress repudiate in entirety the actions of the conference reported on by the executive council.

After a debate which was only closed by the calling of the previous question, the majority report of the committee was adopted.

Ways and Means Committee

The Ways and Means Committee recommended the payment of the following amounts, the recommendation being adopted: To the assistant secretary, $80; translator, $80; messenger, guard and janitor of the hall, $30 each; fraternal delegate to the British Trades Union Congress, $600; fraternal delegate to the American Federation of Labour, $300. The committee also recommended that the salary of the Congress stenographer be increased to $85 per month; that three months' salary be allowed to the retiring president, and that the hotel expenses of the three regularly-elected fraternal delegates be paid. These recommendations were adopted, as was also a motion that the allowance

to the retiring president should not be taken as a precedent. In reporting on demands for organizers, the committee's recommendation that they be referred to the Executive Council was adopted.

Report of Committee on Constitution and Law

Among the resolutions referred to the Committee on Constitution and Law were eight from Winnipeg and vicinity which asked that the Congress take a referendum vote on the question of reorganizing the workers in Canada on industrial lines. The committee rejected the proposal, and the convention approved. A proposition to increase the salary of the president by $500, making it $2,500 was adopted. A resolution seeking to bring about an understanding between the Canadian Brotherhood of Railroad Employees and the International Brotherhood of Railway Clerks was approved, a conference of the parties interested to be held as soon as possible. Among other resolutions referred to the committee which were non-concurred in was one designed to debar a person holding office or appointment under the Government from being eligible to hold office in the Congress. The committee's recommendation was adopted.

Report of Union Label Committee

The recommendations of the Union Label Committee which were adopted without discussion are as follows: That the Congress recommend all trades and labour councils in the cities and towns of Canada to investigate and find out what stores are carrying union label goods and to prepare same in the form of a directory and have a copy sent to all organizations, whether or not they are affiliated with the Trades and Labour Congress; that a Union Label Department be created by the Trades and Labour Congress along the lines of that in existence under the American Federatilon of Labour; that the Executive Council be instructed to recommend to the various trades and labour councils in Canada the formation of union label leagues. The committee recommended that the Executive Council be instructed to outline a series of suitable suggestions relative to progressive label agitation that may be utilized by the various label leagues in the successful prosecution of their work; that every delegate to next year's Congress be requested to have three distinct union labels on his person, and that immediately upon the adoption of the report of the Credential Committee a committee of three previously appointed by the Executive Council and consisting of delegates who either represent or are members of label bearing crafts shall investigate and determine the number of labels upon the person of each delegate to the convention. It shall then be the duty of this committee to read to the convention the names of the delegates investigated and the number of distinct labels in their possession, and also that the Executive Council send a copy of this recommendation with the official convention call.

Special Committee on Organization of Police and Firemen

Resolutions having been submitted in favour of police and firemen being permitted ot organize into labour unions, it was decided to appoint a special committee to bring in a report on the subject. The report which was adopted was embodied in the following resolution:

Whereas, it is necessary for all wage-earners including police and firemen to organize in order to secure better working conditions, and to associate themselves with other organizations of workers for mutual protection;

And whereas, the authorities in some cities have attempted to deter police and firemen from exercising their legal right to form unions and affiliate with trades and labour councils, and are endeavouring to obtain legislation to curtail the liberties of these wage-earners;

Therefore, be it resolved that the Trades and Labour Congress pledges its support to the police and firemen, and instructs its officers, provincial executive committees and federations of labour to oppose any legislation that is designed to interfere with the organization of police and firemen; and further urges all local unions and trades and labour councils to use all means at their disposal to assist these workers in their endeavour to organize and maintain labour organizations and affiliate with trades and labour councils.

Special Committee on Vocational Training

Four resolutions dealing with vocational training of returned soldiers were presented, and it was decided to appoint a special committee to consider them and report. The resolutions were: (1) against giving employers the services of the returned soldiers free of charge; (2) that employment be selected for returned men in other trades than where a recognized term of apprenticeship is required; (3) in favour of the appointment of a board of award to protect the economic interests of the returned men; (4) in favour of a labour representative being appointed on the Invalided Soldiers' Commission.

The special committee recommended concurrence in the resolutions and further recommended that a member of the Executive Council be immediately appointed to act as chairman of a standing Congress Dominion-wide committee on vocational training of returned soldiers, whose duty it will be to receive reports and suggestions from trade unionists, to scrutinize legislation and administration dealing with vocational training, and to make representation to government officials charged with such work; and that the personnel of said committee be located in the different industrial centres of the Dominion. The committee also commended to the attention of the proposed committee a draft plan of regulations governing vocational training. The report was adopted and it was decided that printed copies be furnished the delegates.

In connection with vocational training, Lieut. F. Holmes, Toronto, Ont., an officer of the Invalided Soldiers' Commission, addressed the convention at one of the sessions. Mr. Holmes explained the organization and functions of the vocational training branch of the commission and asked for the co-operation of organized labour in the matter of the care of returned soldiers. Mr. Holmes also reported that Sir James Lougheed had asked him to inform the Congress that a representative of organized labour would be appointed to the commission.

Delegates to Peace Conference

In accordance with the recommendation of the Committee on Officers' Reports that the delegates to the Peace Conference be elected at each convention preliminary to the holding of such conference, the convention, which adopted the recommendation, elected the representatives. When nominations were opened nineteen delegates were nominated, eleven of whom declined. Of the remaining eight nominees, three of whom were to be elected, the successful ones were P. M. Draper, J. C. Watters and Gus. Francq. Mr. Draper and Mr. Watters securing an equal number of votes, it was necessary in the event of only one representative being allowed, to make a selection. On a standing vote Mr. Watters was chosen.

Fraternal Messages

One of the sessions was mainly given up to hearing the fraternal delegates. Mr. Stuart A. Hayward of the Buffalo Central Labour Council, fraternal delegate from the American Federation of Labour, in presenting the fraternal greetings of that body, stated that organized labour in the United States was strongly behind the Government in the prosecution of the war. He referred to the various boards appointed by the Government to deal with war activities, on which labour was represented. The policy of collective bargaining had been recognized by the Government, and as a result, the labour movement in the United States had made great strides during the past year.

John G. Hancock, M.P., miners' agent, Nottingham, England, representing the British Trades Union Congress, in his address referred to the critical times through which Great Britain was passing. It was a great pleasure to know that Canadians were fighting side by side with their British brothers. He paid tribute to the valour of the Canadian soldiers and referred to the wholehearted manner in which the United States had entered the war. Mr. Hancock said the first duty was to win the war; second, to make war utterly im

possible in the future; and third, to take proper care of the men who survived the war. Reference was made to what was being promoted as an after-the-war policy, which included the proper housing of the people. The great work of the British women in the war was eulogized. For the purpose of greater production during the war, organized labour had given up much that it had taken years to secure. This was done so that it could never be said that the British Labour Party had held aloof in the hour of the country's need.

Miss Rose Schneiderman, of New York, N.Y., fraternal delegate from the National Women's Trade Union League, in her fraternal address outlined the objects of the league, which stood for equal pay for equal work, and stated that the league also endeavoured to educate the women workers for organizing purposes. The Congress was invited to send a fraternal delegate to the meeting of the league in June of next year. Endeavours were being made to arrange with the women's organizations of the Allied countries for a convention of women workers at the same time and place that the peace terms were arranged. The convention accepted the invitation to send a fraternal delegate to the league meeting, the selection being left in the hands of the Executive Council.

Mrs. Helen Armstrong, who by special vote was accepted as a fraternal delegate from the Women's Labour League of Winnipeg, stated the objects of the association and the work which had been accomplished. The desire was to have the league become Dominion-wide, and the Congress was asked for support in the work.

Among other visitors to the convention who made addresses were Mrs. Rose Henderson, probation officer of the juvenile court of Montreal; Mr. Wm. H. Johnston, president of the International Association of Machinists, Washington, D.C., and Wm. D. Mahon, president of the Amalgamated Association of Street and Electric Railway Employees, Detroit. Mich.

Mrs. Henderson asked for the freeest access of women workers into the ranks of organized labour with the view of emancipating them from the conditions which surround them in the economic field. She also urged the organized workers to elect their own members to the houses of legislation, and appealed for the elimination of petty differences in the ranks of organized labour.

Mr. Johnston, who is a native of Nova Scotia, having been born in Westville, but who left Canada for the United States when 12 years of age, referred to the part his adopted country was taking in the war, and although tardy in entering, he believed the United States would make a good record. The machinists had been adding members at the rate of 10,000 per month this year, the membership now being 250,000. Reference was also made to the labour proclamation of the President of the United States, which, it was stated, had given a great impetus to labour organization.

Mr. Mahon congratulated the delegates on the great growth of the Congress, and referred to his visit to Europe at the time war was declared and to his attendance at the Birmingham convention of the British Trades Union Congress as fraternal delegate from the American Federation of Labour. He was strongly in favour of prosecuting the war until victory was achieved, and was going to support the Government of the United States in its war activities, but he would not give up the right of workmen to strike if unfair conditions were imposed.

The following telegram from Senator G. D. Robertson was read by the secretary:

Secretary, Dominion Trades and Labour Congress, Convention Hall, Quebec, Que.

To the officers and delegates attending the 1918 session of Canada's labour Parliament,

The undersigned respectfully sends greeting. The events of the past year have amply justified labour in its determination to carry on. With victory for freedom and justice to all peoples in sight that determination should be renewed and strengthened. The hundred thousand wage earners in Canada's army overseas would be cheered if those at home would send them greet-

ing and promise of continued support, which I hope may be done. Best wishes for a harmonious and profitable convention.

G. D. Robertson.

On motion it was decided to carry out the suggestion offered by Senator Robertson.

Greetings were also received and accepted from the General Synod of the Church of England then in session in Toronto.

A message from the Toronto Council of the Russian Workmen extending greetings was received and filed.

At one of the sessions the fraternal delegate from the American Federation of Labour was presented with a diamond ring, the delegate from the British Trades Union Congress with a gold watch, the delegate from the Women's Trade Union League with a gold wrist watch, the chairman, secretary and treasurer of the local reception committee with gold stick pins, and the retiring president with diamond set cuff links and stick pin.

To appeal for Funds

It was announced during the convention that an appeal would shortly be made for funds to defend two trade unionists in British Columbia who, it was claimed, had been unjustly imprisoned. Subsequently it was stated that the balance in the defence fund of the St. John Plumbers' Union would be turned over to the Committee in charge of the British Columbia case.

Military Service Act

Under the constitution of the Congress resolutions to be brought before the convention are to be in the hands of the secretary ten days previous to opening, which in turn are referred to the Resolution Committee. Although many other resolutions, which had not been received in conformity with this rule were accepted by the convention, objection was taken to one presented by lodge No. 111, of the International Association of Machinists, of Montreal, which was as follows: "We demand the immediate repeal of the Military Service Act."

The secretary stated that the attitude of the Congress on this question had been settled after mature deliberation at the Ottawa convention in 1917. The matter was so important that the law requiring a two-thirds vote to get the question before the convention should be adhered to. After a brief debate it was decided to refuse to accept the resolution, the vote being 116 in favour to 264 against.

Intervention in Russia

The following resolution was introduced by Toronto Lodge No. 438, I.A. of Machinists: "Resolved that this Congress goes on record as being opposed to any intervention on the part of the Allies in the internal conditions in Russia, in the belief that in the best interests of democracy every nation should have the right to determine its own destiny."

The Resolution Committee, when the resolution was reached, asked for further time to consider the subject. The convention, however, took the matter out of their hands and proceeded to deal with it. Some doubt existed as to the legal right of the convention passing on the subject, and it was moved that the resolution be laid on the table indefinitely. This proposal was agreed to.

Programme for Reconstruction

The Resolution Committee recommended approval of the following resolutions with an addition that a report be submitted to this convention if possible, or as soon as practicable thereafter to the Executive Council:

Whereas, the continuation of the present European War gives evidence that at its completion the world will be faced with a grave social and economic situation, affecting the existence and life of the workers; and whereas, our energies should be directed towards the future, both immediate and after the war, for the protection of our interests by a declaration of principles, the nature of social and economic development depending largely upon the principles which the workers shall demand; and whereas, the Trades and Labour Congress have not formulated any

plan or made any declaration of policy in defining a programme of reconstruction; be it resolved, that a committee of five (5) be elected to draft a manifesto with a declaration of principles for a programme of reconstruction after the war, as an instruction to the workers of Canada governing their actions in their future efforts to establish better social and economic conditions.

It was moved in amendment that the resolution be referred to the Executive Council for attention, instead of to a committee. An amendment to the amendment was submitted: "That in the event of the committee being unable to submit a programme before the close of the convention, that the proposed policy be referred to the whole membership for ratification." The debate which arose on the several propositions continued for some time, and was brought to a close by the demand for the previous question. The amendment to the amendment was lost on a vote of 78 to 265, and the original resolution as amended, referring the question to the Executive Council, was carried by a vote of 256 to 45.

The following resolutions dealing with after-the-war conditions were referred to the Executive Council to be taken into consideration in the preparation of the manifesto dealing with the policy of the Congress on reconstruction after the war:

"That a demand be made on the Federal and Provincial Governments for an assurance that three months after the close of the war a six-hour day shall apply to all underground mine workers and an eight-hour day to all surface workers in all mining properties in the Dominion.

"That the Congress declare for a six-hour day and a five-day week for all labour."

Asking for the complete control by Canada of her immigration policy, with a Dominion Board of Immigration; that the said board work in co-operation with proposed labour exchanges and provincial labour bureaus, and also with the Imperial Government; the discontinuance of bonuses to emigration agents; literary tests for immigrants; prohibition of immigration until the returned soldiers have been provided with employment; registration of immigrants; and legislation against the entry of Asiatics.

Asking for the creation of a Federal labour exchange to co-operate with provincial exchanges, through which the returned soldiers may be registered according to trade, etc.

Against Coolie Labour

The Resolution Committee amended the following resolution by deleting the last twenty words, and substituting "*the workers using their best efforts to prevent the introduction of coolie labour,*" and recommended adoption:

Whereas, representatives of the Federal Government are continually broaching the question of the introduction of coolie labour into the coal mines of this country; and, whereas the men working in the mines cannot be and are not fully employed, and for the last two years have never got out a normal day's work, because of the lack of machinery, material and horses; and, whereas, in any case this Local Union is absolutely opposed to the introduction of coolie labour because of its cheapness and the pernicious competition that such labour would let loose among the workers of this country; therefore, be it resolved, that Local Union No. 16 Amalgamated Mine Workers of Nova Scotia ask this Convention of the Trades and Labour Congress of Canada to declare its position on this question by urging all the workers to, and approving of, a general strike from coast to coast, in the event of the Government attempting to bring coolie labour into Canada.

It was moved as an amendment that the Executive Council take a referendum vote on assessing the membership for the support of any workers who go on strike in opposition to the introduction of coolie labour.

An amendment to the amendment proposed the acceptance of the resolution as originally presented.

In the discussion which followed the presentation of the resolution, the prevailing opinion was that some drastic action should be taken to prevent the further introduction of coolie labour into Canada. Delegates who were returned soldiers stated that the returned men were strongly opposed to coolie labour, and it was also brought out in the debate that the miners in the Crow's Nest Coal district had decided to strike

if such were introduced in their locality. The resolution as amended by the committee was adopted.

(During the discussion on the resolution the conduct of President Watters in connection with the letter carriers' dispute was interjected, in which he was accused of being derelict in his duty. The president left the chair to make an explanation and to defend himself. He gave an account of the various conferences with the Government and the efforts made to effect a settlement. The Executive Officers of the letter carriers were responsible for ordering the men back to work, and had he undertaken to interfere it would mean the reversal of the whole functions of the labour movement. Secretary Draper was about to speak on the same matter when a point of order was raised that he was not entitled to make any explanation. The chairman ruled in favour of the secretary speaking. The decision of the chair being disputed, a vote was taken. The chair was sustained and Mr. Draper also gave an account of the negotiations with the Government *re* the demands of the letter carriers, and the incident was closed.)

For a Minimum Wage

The following resolution seeking to have a minimum wage established was adopted without any opposition:

Whereas, the need of a National Minimum Wage is being advocated on all sides by Organized Labour; and, Whereas, the Federal Government has also seen fit to recommend its adoption; be it resolved, that this 34th Convention of the Trades and Labour Congress of Canada endorse the principle of a Minimum Wage based on local conditions, and instruct its Executive to at once take up the matter with the Federal Government, and to have the said Minimum Wage established on a weekly basis, with further adjustments to the said minimum every four months should the increase in the cost of living warrant it.

In favour of Control of Prices

Five resolutions dealing with the cost of living were presented. It was moved that the following be the one adopted:

Whereas, the fundamental source of the discontent and unrest that agitate the public mind and are constantly provocative of dislocation of t ade and industries, as well as being a menace to the peace and prosperity of the people of Canada, is the disproportion that exists between the incomes, revenues, salaries or wages, and the exorbitant and constantly rising prices of food stuffs and necessaries of life; therefore, be it resolved, that it is expedient that the Government of Canada should immediately assume full and effective control of all prices of essential food stuffs, cereals, meats, etc., etc. That such fixed prices be not more than those now existing in each case, thereby preventing further increases in the cost of these essential articles to the consumer, assuming that present prevailing prices are ample to stimulate production. That such control be exercised effectively, uncompromisingly, and with penalties attached to the violation of such regulations as, from time to time, are established by the Government.

Some objection was offered to the fixing of prices, the claim being put up that the workers should demand wages high enough to meet the increased cost of commodities, and that wages should automatically rise with such increase.

The following amendement was proposed: "Whereas, the price of food, clothing and shelter is rapidly advancing from day to day, thereby making it difficult for the working classes to retain their standard of living, and whereas, various attempts have been made from time to time to meet this situation by control of prices without success; Therefore, be it resolved that the organizations affiliated with this Congress from now on use the only means to offset the advance in prices under the present system, namely, by an increase in wages."

To close the debate the previous question was called and carried, the resolution being adopted. A resolution was also adopted urging that an effort be made to have the price of bread standardized throughout the Dominion.

Want a Fuel Department

The following proposition asking for the establishment of a fuel department was adopted:

Whereas, the miners of the Dominion of Canada, after four years of war, have not been

able to secure equal representation on the various departments created by our Government for the successful prosecution of the war (especially the miners); and, whereas, the United States of America, in less than one year of War, has given the Labour Movement representation on every commission; therefore, be it resolved that the Trades and Labour Congress of Canada, in Convention assembled, demand that the Dominion Government create a fuel department similar to United States of America.

Government Ownership of Railways

Although the following proposal is included in the Platform of Principles of the Congress, the convention reaffirmed its attitude by approving of the following resolution:

Whereas, owing to the great necessity of finances of our Dominion of Canada, and fully realizing that the greater portion of our earnings are being paid to the C. P. R. and other railway companies and building up individuals as millionaires owing to the great access that they have to our lands and homes, for which our boys are giving their lives; and whereas, what we find for our returned soldiers, is taxation in abundance; therefore be it resolved, that the Government take over all railways and lands connected therewith and collect all profits.

Propose penalty for violation of Fair Wage Clause

A proposal to penalize contractors who violate the terms of the fair wage clause in Government contracts was approved by the adoption of the following resolution:

Whereas it has come to our knowledge that abuse of the fair wage clause in Government contracts is being done by unscrupulous contractors, and whereas no penalty is provided for such cases; be it resolved, that we ask the incoming executive of the Trade Congress to seek the following amendment to the fair wage clause, to be inserted in Government contracts, no progress certificates be issued until approved by the Minister of Labour, and that any contractor guilty of wilful violation be debarred from tendering for further Government work for a period of one year.

A resolution was also adopted that in contracts for boots certain changes be made in the fair wage clauses; that the Government be asked to publish the names of contractors, price per pair, and wage scales in the *Labour Gazette*; and also that accredited representatives of labour organizations whose members are working on Government supplies be furnished upon application with the names of the contractors, price paid for supplies and scale of wages paid by the contractors.

Want stronger beer

A resolution was submitted which recited in the preamble the efforts which had been made to have a uniform definition of an intoxicating liquor for the whole Dominion, and asked that 2½ per cent of alcohol by weight be fixed as such standard. As this suggestion had been approved by other conferences of labour representatives, the following resolution was submitted:

Whereas, the working men of Canada have been asked by the Government to co-operate with them in increasing production, and the working men have expressed a willingness to do so, even to the extent of working longer hours; now, therefore, be it resolved, that this Convention of the Trades and Labour Congress of Canada endorses the action of its Ontario Executive and other resolutions as above referred to and requests the Dominion and Provincial Governments to enact legislation whereby it may be legal to manufacture and sell anywhere in Canada any beverage not exceeding 2½ per cent of alcohol by weight.

Some objection was taken to the introduction of the resolution, and a strong opposition developed. On the other hand fault was found with prohibition having been put in force by Order-in-Council, it being contended by some of the speakers that a referendum should have been taken. The resolution was adopted.

In support of War Bonds

Favourable action on the following resolution was recommended:

Whereas, democracy and freedom are now in deadly conflict with lawlessness and barbarism, and, whereas, it becomes us as citizens and trade unionists to support to the utmost of our ability our fellows engaged in this conflict for honour and right; and, whereas, success is only possible by keeping our armies equipped and supplied with all necessary foods and materials it is possible to produce; and, whereas, production depends largely upon the Government's ability to furnish funds necessary to purchase for over-

seas use food and munitions, the future prosperity of Canadian industry being limited only by the Government's ability to finance it; resolved, that the Trades and Labour Congress of Canada do recommend to all members of organized labour that hearty support and co-operation be given in making the coming War Loan a success; and be it further resolved, that the various Provincial Executive Committees offer to co-operate with the War Loan Organization and to take particular charge of the campaign among labour men; and be it further resolved, that it is desirable that every worker who can, should invest whatever sum he may be able in War Bonds and thus assist Canada's war effort, promote production, increase employment and encourage thrift.

Opposition was immediately taken and an amendment was proposed to the effect that no interest should be paid on war bonds to be issued in the future, and the interest provision in the bonds now outstanding should be repudiated.

An amendment to the amendment that all future issues of war bonds be devoid of interest was also proposed.

After a very heated discussion during which the president had to appeal to the delegates to show proper decorum, the resolution as introduced was adopted by a large majority.

Another resolution asking that the forthcoming issue of war bonds be made liable to taxation was also approved.

Conscientious Objectors

The following resolution offered by the Winnipeg Trades and Labour Council, was reported unfavourably upon by the Resolution Committee:

Resolved, that this Trades and Labour Council recommend to the Trades and Labour Congress of Canada that representations be made to the Minister of Justice requesting him to consider the matter of conscientious objectors now in the penitentiary with a view to their temporary release on parole to work on farms or to give their assistance in the interest of National Food Production.

After a protractd debate, the report of the committee was adopted by a vote of 107 to 83. A demand was made for a roll call vote, which was the first to be sufficiently supported during the convention. This made a change in the figures, but the report of the committee was sustained by 99 to 90.

Other Resolutions Approved

Approximately 145 resolutions were submitted for consideration, and referred to the various Committes. In addition to those which have been previously taken into account, resolutions on the following subjects were adopted, no reference being given to those which were not favourably considered:

In favour of increased compensation to children under the Nova Scotia Workmen's Compsensation Act, and repeal of section 4.

In favour of amendments to the Nova Scotia Coal Mines Regulation Act.

In favour of coal miners' output being paid for at the rate of 2,000 pounds to the ton, instead of 2,440, and that the same be set by statute.

In favour of a national fund to meet the needs of dependents in case of disasters causing loss of life.

In favour of a compulsory insurance law.

In favour of an eight in ten hour day for street railway employees, similar to that in force in British Columbia.

In favour of the more careful handling of lead.

In favour of legislation demanding the denaturing of wood alcohol used by painters.

In favour of protection of painters by the proper inspection of ropes, tackles, etc., and for more accommodation in paint shops.

In favour of the removal of wall coverings before redecorating the interior of buildings.

In favour of the free entry into Canada of trade union supplies.

In favour of greater protection for coal miners and union check off.

In favour of the hours of polling in Dominion elections being from 9 a.m. to 8 p.m.

In favour of designating on the box the manner in which the cigars contained therein are made,—either hand, mould or machine.

In favour of the nationalization of the medical and dental professions and the control of all hospitals by the State.

In favour of every union in Canada being notified of the unfair conditions prevailing in certain cigar factories in Hamilton, Toronto and Montreal.

In favour of no changes being made in certificates of stationary engineers until those now in the expeditionary forces return.

In favour of efficient blower systems in factories where metal polishers are employed, and the appointment of practical metal polishers as inspectors.

Against the use of spraying machines used in painting on work required by the Dominion Government on the Imperial Munitions Board.

In favour of the better protection of moving picture machine operators.

In favour of assisting the strikers of the Lauzon shipyards who claimed that they were being discriminated against owing to having joined the International Brotherhood of Boilermakers.

In favour of all steam and operating engineers being certificated.

In favour of all printing used in the Department of Labour bearing the label of the allied printing trades.

In favour of the Government being asked to adopt an old age pension scheme.

In favour of asking the Government to appoint a fair wage officer for the Maritime Provinces.

In favour of its being made compulsory that all children attend school until they reach 16 years of age.

Pledging support to the International Ladies' Garment Workers' Union in negotiations with employers.

In favour of abolishing the practice of clothing being made in the homes of wage-earners.

In favour of a substantial tax on land values.

In favour of having the label of the Allied Printing Trades placed on all school books.

In favour of action being taken to have the immigration laws and Alien Labour Act enforced.

In favour of the establishment of a department of health.

In favour of certain persons being brought under the provisions of the Nova Scotia Workmen's Compensation Act.

In favour of the appointment of a commission to report workmen's compensation for the Province of Quebec.

In favour of the abolition of all private employment agencies.

In favour of increase in the budget of the Department of Labour of Quebec; increase in number of inspectors and appointment of a deputy minister; pensions for employees of the department with fifteen years of service and limiting the age of inspectors; establishment of a scale of salaries for inspectors, and that candidates for position of factory inspector be subject to examination as to their capability.

In favour of free and compulsory education in the Province of Quebec and prepared rules pertaining to education in the province.

In favour of labour being represented on commissions governing public utilities.

In favour of licensing employers and employees engaged in the electrical industry in the province of Ontario.

In favour of amendments to Coal Mines Regulation Act of the Province of Nova Scotia.

In favour of asking that moving picture machine operators in Ontario be placed under the provisions of the Workmen's Compensation Act.

In favour of proper shelter being provided for men engaged in car repairing.

In favour of the provinces enacting legislation providing for a minimum wage of at least $12 per week for women workers.

In favour of the two-platoon system for civic firemen.

In favour of asking the Quebec Legislature to enact legislation that will permit a tenant to change an annual tenancy to a monthly tenancy.

In favour of the American Federation of Labour being asked to place an organizer in the Maritime Provinces.

In favour of the Federal Government issuing industrial bonds.

In favour of factory inspectors being selected by a referendum vote of organized labour.

In favour of Dominion Government employees being placed under a workmen's compensation law.

In favour of assisting the barbers by creating a demand for the union shop card.

In favour of the establishment of rent courts to deal with house rents.

In favour of assisting the Canadian Pacific Railway dining car employees.

In favour of a better observance of Labour Day.

In favour of the appointment of foundry inspectors.

Condemning any authority which seeks to imprison or banish men for their industrial or political activities.

Protesting against the manufacturers of Kitchener discriminating against their employees.

In favour of the abolition of running boards on street cars.

Indorsing the demands of the letter carriers.

Protesting against legislation prohibiting drugless therapy.

In favour of men using artificial limbs being allowed compensation for time lost owing to such limbs being broken during employment.

In favour of all workers being brought under the provisions of workmen's compensation.

In favour of the employees of the Marine Department of Quebec being granted increase in wages and the reinstatement of all men now on strike.

In support of the demands of the potters of St. John's, Que.

In favour of securing some remedy to prevent private employment agencies from supplying strike-breakers.

In favour of the Government providing for the insurance of the men in the Canadian expeditionary forces.

In favour of legislation to afford simple, cheap and effective facilities for the legal incorporation, regulation and control of co-operative societies.

In favour of the separation allowance to soldiers' wives being increased to $100 per month.

In favour of pensions to soldiers being paid in proportion to the disabilities incurred, without regard to rank.

In favour of asking the Government to grant free medical attention to the wives, children and dependants of soldiers overseas.

In favour of witness fees in the province of Quebec being based on the salaries earned by such witnesses.

In favour of boiler inspectors being selected from the ranks of practical boilermakers.

In favour of petitioning the Quebec Legislature to remove all restrictions on the electoral right.

In favour of supporting the mine workers of Northern Ontario and all other workers in Canada in their efforts to establish amicable working relations with employers and to assist them in resisting discrimination.

Referred to Executive Council

Resolutions on the following subjects were referred to the Executive Council without recommendation:

In favour of a monthly or quarterly report of the proceedings of the Executive Council of the Congress forwarded to all affiliated organizations.

That the Congress supply all federal labour miners with due cards, honourable withdrawal cards and travelling cards.

That the Executive Council consider the advisability of investing in the proposed war loan.

That the Executive Council co-operate with the returned soldiers' associations with the view of establishing a Workmen's and Soldiers' Council.

Asking for support in securing the release of two aliens, members of Porcupine Miners' Union, who it was claimed had been unjustly interned.

Refuse to Hear Russian Workers

The privileges of the convention, with the view of giving them an opportunity of being heard, was asked for two delegates from the Canadian Russian Workers. In the appeal in their behalf it was stated that the organization was not an economic one, but was formed for the purpose of protecting the Russian workers from persecution. There were 20 local branches in Canada with a membership of 10,000. Several delegates in opposing the proposal stated that the members comprising the Russian workers had the privilege of joining the established labour unions, but would not do so, though often solicited. The request was refused.

Election of Officers

The election of officers, which was presided over by the fraternal delegate from the American Federation of Labour, resulted as follows:

President—Thomas Moore, Organizer, United Brotherhood of Carpenters and Joiners, Niagara Falls, Ont.

Vice-President—Arthur Martel, member of Executive Board, United Brotherhood of Carpenters and Joiners, Montreal, Que.; Robert Baxter, Vice-President Amalgamated Mine Workers of Nova Scotia, Glace Bay, N. S.; David Rees, member United Mine Workers, Vancouver, B. C.

Secretary-Treasurer—P. M. Draper, member International Typographical Union, Ottawa, Ont.

Provincial Executives—Nova Scotia: vice-president, R. V. Eisnor, Halifax; committee, A. R. Maston, Halifax; C. C. Dane, New Glasgow; Robert Baxter, Glace Bay. Quebec: vice-president, Narcisse Arcand, Montreal; committee, Napoleon Belleau, Quebec; Hector Monette, St. Hyacinthe. Ontario: vice-president, H. J. Halford, Hamilton; committee, Joseph Gorman, Cobalt; Joseph Dean, London; James Ralph, Toronto. Manitoba: vice-president, W. M. Coburn, Winnipeg; committee, E. Robinson, Winnipeg; A. F. Landry, Winnipeg; D. R. Duncan, Transcona. Saskatchewan: vice-president, H. Perry, Regina; committee, R. H. Chadwick, Moosejaw; F. B. Judson, Prince Albert; D. F. England, Saskatoon.

The provinces of New Brunswick, Alberta and British Columbia have their own organization; hence the Congress does not elect an executive committee.

Fraternal delegate to American Federation of Labour.—M. J. Walsh, Quebec, Que.

Fraternal delegate to British Trade Union Congress.—James C. Watters, Ottawa, Ont.

Hamilton, Ont., was chosen as the convention city for 1919.

REPORTS OF EMPLOYMENT OFFICES

DURING August there was an increase of about 14 per cent in the demand for labour on the basis of the daily average of vacancies notified to 110 employment offices (81 commercial, 17 public and 12 philanthropic). As compared with the demand reported for August of last year by practically identical offices there was a decline of about 24 per cent. The total number of vacancies notified to all offices in August was 46,815, a daily average of 1781.96, as compared with 1566.12 in July, 1918, and with 2353.8 in August, 1917. The number

of persons placed was 21,612, a daily average of 837.48, as compared with averages of 788.3 and 974.7 in the preceding month and in August of last year. The proportion of the total vacancies filled to the total vacancies notified was 46.2 per cent, as compared with 50.3 per cent in July and with 41 per cent in August, 1917.

As to employment for women and girl workers, the number of vacancies notified was 6,428, a daily average of 238, as compared with 228.5 in July and 299.9 in August, 1917. The number of such workers placed was 2,223, a daily average of 82.3, as compared with 99.1 in July and 82.1 in the corresponding month of 1917. The proportion of vacancies filled to vacancies notified for men and boys was 48 per cent and for women and girls 34.43, as compared with 51.8 per cent and 43.4 per cent, respectively, for July, and with 43.7 per cent and 27.4, respectively, for August, 1917.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Toronto and Edmonton reported increases in the demand for labour both as compared with July, 1918, and August, 1917. Vancouver reported a decline in both cases, while at Montreal and Winnipeg there was an increase over the preceding month and a decrease in comparison with the same period of last year. Of the smaller centres, Halifax, Hamilton, Fort William and Port Arthur all showed decreases as compared with July, but increased over August of last year. Ottawa showed a decrease as compared with July, 1918, and August, 1917. Regina and Calgary showed increases as compared with July, 1918, and decreases as compared with August, 1917.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies was 1,663, a daily average of 61.7, as compared with averages of 66.6 in July and 80.4 in August, 1917. The number of casual jobs secured was 4,222, a daily average of 156.3, as compared with averages of 172.5 in the preceding month and 157.8 in August of last year.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed a decline in September as compared with the previous month, the total value of building permits falling from $5,018,092 in August to $2,690,821 in September, a decrease of $2,327,271, or 46.3 per cent. All the provinces except New Brunswick show decreases as compared with the previous month. As compared with the corresponding month of 1917 there was a decrease of 5.76 per cent, the value for September, 1917, being $2,855,123. In this comparison Nova Scotia and British Columbia showed increases and all the other provinces showed decreases.

Of the larger cities Montreal-Maisonneuve, Winnipeg and Vancouver showed decreases as compared with the preceding month while at Toronto there was a slight increase over the preceding month. Montreal-Maisonneuve, Toronto, Winnipeg and Vancouver showed increases as compared with September, 1917. Of the smaller centres Halifax showed a noteworthy gain over September, 1917, but a decrease as compared with August, 1918. Hamilton, Regina and Calgary showed decreases in both comparisons.

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

REPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid those employees during the first pay-roll period of two weeks in September showed a decrease of not quite 3 per cent in the number of workers and a decrease of slightly more than 4 per cent in the wages paid in comparison with August. In September, 1918, 7,533 persons were temporarily employed in the two weeks, and the pay-rolls amounted to $277,373.60, as compared with 7,757 employees and an aggregate pay-roll of $289,055.80 in August.

In comparison with the same period of last year, there are indicated declines of about 22 per cent in the number of persons employed and of slightly over 7 per cent in the wages paid.

Montreal was the only city to report an increase in the number of employees in comparison with both August, 1918, and September, 1917. In respect of the pay-rolls Montreal was the only city reporting an increase as compared with August, 1918, but Montreal, Ottawa and Regina all showed increases in comparison with the pay-rolls of September, 1917.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, SEPTEMBER, 1918, COMPARED WITH AUGUST, 1918, AND WITH SEPTEMBER, 1917.

FAIR WAGES CONTRACTS, SEPTEMBER, 1918

DURING September the Department of Labour received for insertion in the Labour Gazette information relative to 28 fair wage contracts, 26 of which were awarded by the Department of Public Works, and the remaining two by the Department of Railways and Canals. All but one of the contracts contained the usual fair wage clause, a fair wage schedule being contained in the other one.

Department of Public Works.—Construction of 18 Cell Building adjacent to Detention Barracks, Esquimalt, B.C. Name of contractors, Knott and Jones, Victoria, B.C. Date of contract, August 15, 1918. Amount of contract, $6,490.00.

Department of Public Works.—Extension of Breakwater and dredging of channel, Inverness, N.S. Name of contractors, Reid & Archibald, Amherst, N.S. Date of contract, August 27, 1918. Amount of contract, Unit prices.

Department of Public Works.—Wharf, Chimney Corner, N. S. Name of contractor, Thomas D. Morrison, D'Escousse, N. S. Date of contract, August 26, 1918. Amount of contract, $5,700.00.

Department of Public Works.—Breakwater, McKay's Point, N. S. Name of contractor, Alex. Gillis, Judique North, N.S. Date of contract, August 29, 1918. Amount of contract, $3,740.00.

Department of Public Works.—Supply and delivery of pig lead required in connection with water service, William Head, B.C. Name of contractors, North West Supplies, Limited, Victoria, B. C. Date of contract, August 1, 1918. Amount of contract, per ton $145.00 delivered.

Department of Public Works.—Dredging, North West Miramichi (Lawlor's Shore) N.B. Name of contractor, Peter England, Chatham, N.B. Date of contract, September 4, 1918. Amount of contract, Class "B" $0.44 cents per cu. yd. (scow meas.)

Department of Public Works.—Renewal of South Pier, Bayfield, Ont. Name of contractors, Weston Bros., Bayfield, Ont. Date of contract, September 3, 1918. Amount of contract, Unit prices.

Department of Public Works.—Fitting up of a building in Naval Yard for accommodation of Naval Cadets, Esquimalt, B.C. Name of contractors, Knott & Jones, Victoria, B.C. Date of contract, September 3, 1918. Amount of contract, $13,000.00.

Department of Public Works.—Repairs and renewals to Wharf, Metaghan, N. S. Name of contractors, A. W. Girroir & W. F. MacKinnon, Antigonish, N.S. Date of contract, September 4, 1918. Amount of contract, $3,950.

Department of Public Works.—Coaling Jetty, Esquimalt, B. C. Name of contractors, Palmer Bros., Vancouver, B.C. Date of contract, September 4, 1918. Amount of contract, $45,157.60.

Department of Public Works.—In connection with military hospital at Ste. Anne de Bellevue, Que. Name of contractor, Wm. H. McGillivray, Ottawa, Ont. Date of contract, September 11, 1918.

Contract for:	Amount of contract.
Grading and Roadwork	$5,075.00
Medical Officers' Building	32,772.00
Nurses' Building	77,782.00
Orderlies' Building	50,838.00
Storage Building	10,441.00

Department of Public Works.—Military Isolation Hospital, Halifax, (Rockhead, N.S.). Name of contractors,

Rhodes, Curry Co., Ltd., Amherst, N. S. Date of contract, August 21, 1918. Amount of contract, $63,202.00 and schedule of prices.

DEPARTMENT OF PUBLIC WORKS.—Repairs to East Pier, Cobourg, Ont. Name of contractor, R. Brewder & M. H. Lynn, Cobourg, Ont. Date of contract, September 7, 1918. Amount of contract, schedule of prices.

DEPARTMENT OF PUBLIC WORKS.—Alterations and additions to Public Building and Post Office Fittings, Port Colborne, Ont. Name of contractors, The J. T. Schell Co., Alexandria, Ont. Date of contract, September 13, 1918. Amount of contract, $1,500.00.

DEPARTMENT OF PUBLIC WORKS.—Military Isolation Hospital, Kingston, (Ongwanada), Ont. Name of contractor, Wm. Henry Harvey, Kingston, Ont. Date of contract, September 12, 1918. Amount of contract, $34,382.00.

DEPARTMENT OF PUBLIC WORKS.—Addition to South Breakwater, Battery Point, N. S. Name of contractor, W. H. Anderson, Parker's Cove, N. S. Date of contract, September 11, 1918. Amount of contract, $3,450.00.

DEPARTMENT OF PUBLIC WORKS.—Protection works, being improvements to protection dyke, Laprairie, Que. Name of contractors, Noé Poupart & Apl. Duranceau, Laprairie, Que. Date of contract, September 14, 1918. Amount of contract, Unit prices.

DEPARTMENT OF PUBLIC WORKS.—Temporary Barracks, Barriefield, (Lower Common) Kingston, Ont. Name of contractors, Bate, McMahon & Co., Ottawa, Ont. Date of contract, September 18, 1918. Amount of contract, $310,500. and $2.00 per cu. yd. for grading of site.

DEPARTMENT OF PUBLIC WORKS.—Temporary Military Barracks, Cove-Fields, Quebec, Que. Name of contractors, Bate, McMahon & Co., Ottawa, Ont. Date of contract, September 20, 1918. Amount of contract, $293,620.00 and $1.50 per cu. yd. for grading of site.

DEPARTMENT OF PUBLIC WORKS.—Temporary Barracks, London, Ont. Name of contractors, Bate, McMahon & Co., Ottawa, Ont. Date of contract, September 20, 1918. Amount of contract, $304,750.00 and $2.00 per cu. yd. for grading of site.

DEPARTMENT OF PUBLIC WORKS.—Construction of water supply system from Town of Sutherland to Forest Nursery Station, in Province of Saskatchewan. Name of contractors, R. B. McLeod & R. J. Arrand, Saskatoon, Sask. Date of contract, September 17, 1918. Amount of contract, Unit prices.

DEPARTMENT OF PUBLIC WORKS.—One wooden Shed, Trackage, etc., on Pier No. 3, Victoria, B.C. Name of contractor, R. Moncrieff, Vancouver, B. C. Date of contract, September 7, 1918. Amount of contract, $76,495.00.

Trade or Class of Labour.	Rates of Wages. Not less than the following rates.
Foreman carpenter	$7.50 per day of 8 hours.
Carpenters	6.60 " " 8 "
Blacksmith	6.00 " " 8 "
Blacksmith's helpers	4.50 " " 8 "
Ordinary labourers	3.85 " " 8 "
Stationary engineer	7.00 " " 8 "
Metal workers	6.00 " " 8 "
Electricians	6.00 " " 8 "
Plumbers	6.00 " " 8 "
Painters	5.50 " " 8 "
Roofers (tar and gravel)	5.00 " " 8 "
Timekpeeer	90.00 per month.
Driver, 2 horses and wagon	8.00 per day of 9 hours.

DEPARTMENT OF RAILWAYS AND CANALS.—Erection of a two pocket coaling plant and approach trestle at Port Borden, P. E. I. Name of contractors, P. J. Lynch, Sydney, N. S.; F. C. Peckham, Portage du Fort, Que.; and T. C. Gorman, Afton, N. S. Date of contract, September 17, 1918. Amount of contract, $4,700 with schedule prices for additions and deductions.

DEPARTMENT OF RAILWAYS AND CANALS.—Fabrication and erection of the steel superstructure for the River du Gouffre Bridge, on the Quebec & Saguenay Railway. Name of contractors, The

Canadian Bridge Company, Limited, Walkerville, Ont. Date of contract, September 17, 1918. Amount of contract, $0.0755 per lb.

Post Office Department.—The following is a statement of payments made in September for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions:

Nature of Orders.	Amount of Orders
Making metal dating stamps and type and making other hand stamps and brass crown seals	518.75
Making rubber stamps	47.80
Supplying stamping material and repairing stamping pads	1,212.50
Supplying new mail bags and bag material	553.00
Repairing mail bags and satchels	177.03
Supplying mail bag fittings	473.00
Making and repairing miscellaneous articles of postal stores	98.15
Repairing railway mail clerks' tin travelling boxes	54.50
Supplying cloth for letter carriers' uniforms, making and supplying articles of official uniform	7,488.32

SUPPLEMENT No. 7 OF THE McADOO AWARD APPLIED TO CANADIAN RAILWAY EMPLOYEES

At the time the Canadian Railway War Board first announced its intention of applying the McAdoo Award to Canadian railway employees (see August issue, page 615) various amendments to the award were under consideration by the United States railroad administration. These amendments were subsequently made effective and applied as supplements to the original award. Following this the Canadian Railway War Board, on September 30, announced its decision to apply the principles of Supplement No. 7 of the McAdoo Award (see page 861 of this issue) to the employees of certain Canadian railways.* In general terms this means that an increase of $25 per month will be granted to all employees in the classes to which the Supplement refers. The increases will date from September 1. This is in lieu of the former somewhat complex scale of increases provided by the original McAdoo Award. Instead of adding a percentage to the wage paid for a certain kind of work on December 31, 1915, the lump sum referred to will be added to the wage paid on January 1 of this year.

It is estimated that about 75,000 clerks, station employees, stationary engine men, section men, freight handlers, labourers in shops, roundhouses, storehouses, etc., and others will be affected by the award, and that the present payroll of railways will be increased by more than twenty-two million dollars.

The Railway War Board further ordered that hereafter the eight hour day shall prevail in all railway freight sheds on and after October 15. The sheds will open at 7.30 a.m. and close at 5 p.m., except on Saturdays, when the closing hour shall be 1 o'clock. Hitherto hours have been from 7 a.m. to 5.30 or 6 p.m.

The Canadian Railway War Board's Interpretation of certain Clauses of Supplement No. 7*

In announcing its decision, the Board states that the Supplement is subject to some further interpretation of parts which are not altogether clear. In or-

*A list of these railways appeared in the Labour Gazette for September, 1918, p. 759.

*For the purpose of making further interpretations and for the adjustment of any future differences, a special committee of the Board has been appointed. See under Article 15.

der, however, to avoid delay in applying the increased rates of pay, the Supplement, with the following interpretations of certain clauses, shall be made effective as from September 1, 1918:

ARTICLE 1.

(a) This clause includes: All clerical forces, train announcers, station gatemen, freight shed checkers, car checkers, freight shed car service men, baggage and parcel room employees, train and engine crew supervisors.

This clause does not include: Any employees covered in the telegraphers' schedule, clerical forces under 18 years of age, call boys (see Article 6).

Pending the receipt of more definite information, an increase of $25.00 will be applied to the established rates of all positions as of January 1, 1918. It is understood that in a few instances this may produce decreases from rates approved under the original application of General Order No. 27.

(b) This clause covers chief clerks, freight shed foremen, sub-foremen, traffic supervisors, travelling auditors, travelling freight and passenger agents, and positions of similar character.

(c) This clause includes: Office boys, messengers, chore boys, clerical forces under 18 years of age, station and waiting room attendants regardless of age.

This clause does not include: Employees covered by telegraphers' schedule (see clause (a), Article 1), charwomen (see Articles 6 and 9), "Red Cap" porters (see Articles 6 and 9), call boys (see Articles 6 and 9).

This clause provides for an increase of $25.00 per month over the rates in effect on January 1, 1918, and establishes a minimum of $45.00 per month.

(d) This clause includes: Janitors, elevator operators, telephone switchboard operators, watchmen (office, station and warehouse).

This clause provides for an increase of $25.00 per month over the rates in effect on January 1, 1918, and establishes a minimum of $70.00 per month.

(e) This permits the continuation of the present practice of paying employees on monthly, daily and hourly, or any other basis, provided that increases on the basis of $25.00 per month, 96 cents per day or 12 cents per hour are added to the rates in effect on January 1, 1918.

ARTICLE 2.

(b) For chief stationary engineers and all stationary engineers (steam), this clause provides for an increase of $25.00 per month over the rates in effect on January 1, 1918, and establishes a minimum of $110.00 per month.

(c) For stationary firemen and power house oilers this clause provides for an increase of $25.00 per month over the rates in effect on January 1, 1918, and establishes a minimum of $90.00 per month.

ARTICLE 3.

Covered by Canadian Railway War Board Wage Agreement No. 1, Article 7, clause (b).

ARTICLE 4.

Operators of power driven transfer tables are covered by Canadian Railway War Board Wage Agreement No. 1, Article 7, clause (e).

For employees regularly assigned to operate power driven turntables this clause provides for an increase of 12 cents per hour over the rates in effect on January 1, 1918, and establishes a minimum of 33 cents per hour and a maximum of 45 cents per hour.

ARTICLE 5.

(a) This clause includes: Engine watchmen, engine wipers, fire builders, ashpit men, boiler washer's helpers, flue borers, coal passers, coal chute men, hostler's helpers, truckers, stowers, shippers, coopers, derrick men (freight yard) car sealers, freight shed car service men's helpers, employed in and

around shops, roundhouses, stations, storehouses and warehouses, and provides for an increase of 12 cents per hour over the rates in effect on January 1, 1918, and establishes a minimum of 31 cents per hour and a maximum of 43 cents per hour.

(b) For all unclassified labour employed in and around shops, roundhouses, stations, storehouses and warehouses, this clause provides for an increase of 12 cents per hour over the rates in effect on January 1, 1918, and establishes a minimum of 28 cents per hour and a maximum of 40 cents per hour.

Article 6.

This article includes: Chief draughtsmen, draughtsman, call boys, "Red Cap" porters (except as covered by Article 9), charwomen (except as covered by Article 9).

For those and all other monthly, weekly or daily rated employees in the departments covered by Supplement 7, and not otherwise provided for, this article provides for an increase on the basis of $25.00 per month over the rates in effect on January 1, 1918.

This article does not include restaurant help, sleeping, parlour and dining car employees, when employed on cars in train service.

To these employees, General Order 27 will apply except as provided by Supplement No. 2.

Article 8.

(a) As already stated, it is understood that in a few cases this may produce decreases from rates approved under the original application of General Order 27.

This clause requires the maintenance permanently of rates established for positions under Supplement No. 7. If, however, the duties required in any position are changed, the compensation for the position may be changed in conformity therewith. [See Article 1, clause (f)].

Article 10.

This article definitely establishes the eight hour day, and when and where practicable the working hours of the day for all classes of employees covered by Supplement 7 should be limited to eight consecutive hours, exclusive of the meal period. Regular working hours for the various classes of employees at the different points should be established and reasonable notice of any change (not less than 48 hours) should be given.

In view of the fact that Supplement No. 7 does not clearly set forth how monthly or daily rates are to be arrived at for the basic eight hour day pending the issue of any further interpretation, monthly or daily rates in effect as of January 1, 1918, covering more than eight hours' service per day, should be converted to an eight hour basis and increases of $25.00 per month and 96 cents per day respectively added thereto, resulting rates to cover eight hours' service per day. The examples shown below are worked out on this basis. This basis is justified by the language of Article 5, which, for hourly rated men provides increased compensation *per hour* on rates employees were receiving *per hour* as of January 1, 1918.

The principle of converting monthly and daily rates to an eight hour basis is confirmed by the method set forth in Article 3, General Order 27, for applying basic eight hour day rules.

Examples:

Method of applying Basic 8-Hour day Rules.

(1) Position which on January 1st, 1918, paid $2.00 per 9-hour day.

Old rate for 9 hours service $2.00.
Old rate for 8 hours (8/9 of $2.00)—$1.78.
New rate for 8 hour basic day $1.78 plus 96c (8 hours at 12c)—$2.74.
If employees continue to work 9 hours per day, wages would be $2.74 plus one hour overtime at 34¼ cents (1/8 of $2.74)—$3.08.

(2) Position which on January 1st, 1918, paid $2.40 per 10 hour day.

Old rate for 10 hours service $2.40.
Old rate for 8 hours (8/10 of $2.40)—$1.92.
New rate for 8 hour basic day $1.92 plus 95c (8 hours at 12c)—$2.88.

If employee continues to work ten hours per day, wages would be $2.88 plus 2 hours overtime at 36c (1/8 of $2.88) 72c—Total $3.60.

(3) Position which on January 1st, 1918, paid $75.00 per month working ten hours per day for 26 working days.

Old rate for month's service $75.00.

Old rate for 8 hours (8/10 of $75.00) —$60.00.

New rate per month for 8 hour basic day ($60.00 plus $25.00)—$85.00.

If employee continues to work ten hours per day, wages would be $85.00 plus 52 hours overtime at $40.87c ($85.00 divided by 208 hours) —$21.25—Total $106.25.

(4) Position which on January 1st, 1918, paid $100.00 per month working 11 hours per day for 31 woring days.

Old rate for month's service $100.00.

Old rate for 8 hours (8/11 of $100.00) —$72.73.

New rate per month for 8 hour basic day ($72.73 plus $25.00)—$97.73.

If employee continues to work 11 hours per day, wages would be $97.73 plus 62 hours overtime at 39.4c ($97.73 divided by 248 hours) and 31 hours overtime at 59.1c (one and one-half times 39.4c) $42.75. Total $140.48.

If we consider a 30 day month in place of a 31 day month as above and the employee continues to work 11 hours per day, wages would be $97.73 plus 60 hours overtime at 40.7c ($97.73 divided by 240 hours) and 30 hours at 61.1c (one and one-half times 40.7c) $42.75.—Total $140.48.

ARTICLE 11.

(a) This clause requires the payment of overtime after eight hours' work on any day for all classes of employees covered by Supplement No. 7, but only at a pro rata rate (except where there is an existing agreement or practice more favourable to the employee) for the ninth and tenth hours of continuous service, exclusive of the meal period, and at the rate of time and one-half after ten hours' work. [See Article 14, clause (a)]. Pay for overtime should not be allowed unless specifically ordered to be worked.

With reference to the last sentence in clause (a) it is permissible and preferable to pay for the actual hours and fractions thereof complete at the end of each pay period instead of carrying forward the fractions of hours.

(b) This clause is applicable only when employees have been called after they have gone off duty for the day. When service is continuous, except for the meal period, this clause does not apply.

ARTICLES 12 AND 13.

It is intended that for employees not already covered by schedule agreements the spirit of the regulations should be applied. See under Article 15.

ARTICLE 15.

The Canadian Railway War Board have approved a special committee, consisting of:

George Hodge, assistant to the general manager, Canadian Pacific Railway;

J. Coleman, superintendent, car department, Grand Trunk Railway;

A. E. Crilly, assistant to the general manager, Canadian Government Railways.

This committee will consider further interpretations of Supplement 7 to General Order 27 and make recommendations for uniform practice in connection therewith. If any questions arise on any railway as to the intent of this supplement or interpretations, no action should be taken until such questions have been referred to the Canadian Railway War Board. This committee will deal with these questions as submitted and copies of the questions and rulings thereon will be forwarded to all railways connected with the Canadian Railway War Board.

In the event of employees being unable to adjust any differences with the heads of their departments in accordance with the method established by Article 13, such differences may be referred to the Canadian Railway War Board for consideration and decision by this special committee.

FURTHER AMENDMENTS TO THE McADOO AWARD IN THE UNITED STATES

In the September issue of the Labour Gazette it was stated that four amendments in the form of supplements had been made to General Order No. 57 —the McAdoo Award—of the Director General of Railroads in the United States. The following four additional supplements have since been made to the General Order.

Supplement No 5.

Supplement No. 2 applied the original McAdoo Award to the employees of the operating department of the Pullman Company; and the terms and conditions of Supplement No. 4 to the Award is now also applied to these employees by means of Supplement No. 5, which is as follows:

Effective August 1, 1918, wages, hours and other conditions of employment of employees of the operative department of the Pullman Company will be the same as those in Supplement No. 4 to General Order No. 27 for corresponding classes of railroad employees, but none of the provisions named therein will be retroactive prior to August 1, 1918.

Supplement No 6.

This supplement has to do with the interpretations placed upon the Director General's wage orders and provides that in cases where employees and officials disagree upon any such interpretation that "a joint statement quoting the language of the wage order, and including the contentions of employees and the contentions of officials, will be transmitted to the Director of Labour, who will record and transmit same to the Board of Railroad Wages and Working Conditions, which will promptly investigate and make recommendation to the Director General. Upon the receipt of the interpretation from the Director General, the Director of Labour will transmit such interpretation to the various Railway Boards of Adjustment for their information and guidance in the application of such interpretation to existing conditions."

Supplements No. 7 and No. 8

These supplements were issued in accordance with recommendations made by the Board of Railway Wages and Working Conditions in order to stabilize wages and remove inequalities occurring in General Order No. 27. Certain basic minimums are established and the wage increases, as compared with wages paid on January 1, 1918, amount to about $25 per month for employees paid on a monthly basis and 12 cents per hour for employees paid on an hourly basis.

Under these supplements eight hours is established as the basic day with overtime up to ten hours on a pro rata basis, while overtime above ten hours is to be paid at one and one half the regular rate. Promotions shall be based on ability, merit and seniority; and in cases where ability and merit are sufficient, seniority shall govern. In the case of higher officials however, the management is to be judge as to promotions.

In reference to grievances the supplements specify that an employee who has been disciplined, or who considers himself unjustly treated, must be given a fair hearing by his immediate superiors if he requests this in writing within five days. A decision must be rendered within a week, and the employee may then appeal to the next higher official. In these proceedings he may be assisted by a committee of his fellow employees. These rules are said to have been framed with the idea of giving unorganized clerical forces the same measure of protection as that already obtained through unions for other classes of employees. General order No. 27 is now cancelled in so far as it applies to the classes of employees covered by the supplements.

Supplement No. 7 affects all clerks, station employees, stationary enginemen, boiler washers, power transfer and

turntable operators, and common labourers in shops, roundhouses, stations, storehouses and warehouses. It contains general rules for promotion and adjustments of grievances.

Supplement No. 8 affects all maintenance of way department employees working on tracks, bridges, and buildings, and includes painters, mason and concrete workers, water-supply employees, plumbers, etc.

The full texts of the two supplements follow:

Text of Supplement No. 7

Effective September 1, 1918, superseding General Order No. 27, and in lieu thereof, as to the employees herein named, the following rates of pay and rules for overtime and working conditions for all clerical forces in all departments, and for certain employees in stations, storage, or terminal warehouses, docks, storehouses, shops, and yards upon railroads under Federal control are hereby ordered:

ARTICLE I.—RATES OF PAY

(a) For all employees who devote a majority of their time to clerical work of any description, including train announcers, gatemen, checkers, baggage and parcel room employees, train and engine crew callers, and the operators of all office or station equipment devices (excepting such as come within the scope of existing agreements or those hereafter negotiated with the railroad telegraphers) establish a basic minimum rate of $62.50 per month; and to this basic minimum rate and all rates of $62.50 and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $87.50 per month.

(b) This order shall apply to chief clerks, foremen, subforemen, and other similar supervisory forces of employees herein provided for.

(c) For office boys, messengers, chore boys, and other employees under 18 years of age filling similar positions, and station attendants establish a basic minimum rate of $20 per month, and to this basic minimum rate and all rates of $20 per month and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $45 per month.

(d) For all other employees not otherwise classified, such as janitors, elevator and telephone switchboard operators, office, station and warehouse watchmen, establish a basic minimum rate of $45 per month, and to this basic minimum rate and all rates of $45 per month and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 der month, establishing a minimum rate of $70 per month.

(e) The same increases provided for in sections (a), (b), (c), and (d) of this article shall apply to employees named therein paid on any other basis

(f) The wages for new positions shall be in conformity with the wage for positions of similar kind or class where created.

ARTICLE II.—STATIONARY ENGINEERS (STEAM) FIREMEN, AND POWER-HOUSE OILERS.

(a) For all stationary engineers (steam), establish a basic minimum rate of $85 per month, and to this basic minimum rate, and all rates of $85 and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $110 per month.

(b) This order shall apply to chief stationary engineers.

(c) For all stationary firemen and power-house oilers, establish a basic minimum rate of $65 per month, and to this basic minimum rate, and all rates of $65 and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $90 per month.

ARTICLE III.—LOCOMOTIVE BOILER WASHERS.

For all locomotive boiler washers who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 26 cents per hour, establish a basic minimum rate of 26 cents per hour, and to this basic minimum rate and all hourly rates of 26 cents and above, add 12 cents per hour, establishing a minimin rate of 38 cents per hour, provided that the maximum shall not exceed 50 cents per hour.

ARTICLE IV.—POWER TRANSFER AND TURNTABLE OPERATORS.

For all operators of power-driven transfer and turntables who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 21 cents per hour, establish a basic minimum rate of 21 cents per hour, and to this basic minimum rate, and all hourly rates of 21 cents and above, add 12 cents per hour, establishing a minimum rate of 33 cents per hour, provided that the maximum shall not exceed 45 cents per hour.

ARTICLE V.—SHOP, ROUNDHOUSE, STATION, STOREHOUSE, AND WAREHOUSE EMPLOYEES, (EXCEPT EMPLOYEES PROVIDED FOR IN HARBOUR AWARDS.)

(a) For all labourers employed in and around shops, roundhouses, stations, storehouses, and warehouses (except employees provided for in harbour awards), such as engine watchmen and wipers, fire builders, ash pitmen, boiler washer helpers, flue borers, truckers, stowers, shippers, coal passers, coal-chute men, etc., who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 19 cents per hour, establish a basic minimum rate of 19 cents per hour, and to this basic minimum rate, and all hourly rates of 19 cents and above, add 12 cents per hour, establishing a minimum rate of 31 cents per hour, provided that the maximum shall not exceed 43 cents per hour.

(b) For all common labour in the departments herein referred to and not otherwise provided for, who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 16 cents per hour, establish a basic minimum rate of 16 cents per hour, and to this basic minimum rate and all hourly rates of 16 cents and above add 12 cents per hour, establishing a minimum rate of 28 cents per hour, provided that the maximum shall not exceed 40 cents per hour.

Article VI.—Monthly, Weekly, or Daily Rates.

For all monthly, weekly, or daily rated employees in the departments herein referred to, and not otherwise provided for, increase the rates in effect as of January 1, 1918, prior to the application of General Order No. 27, on the basis of $25 per month.

Article VII.—Maximum Monthly Wage.

No part of the increases provided for in this order shall apply to establish a salary in excess of $250 per month.

Article VIII.—Preservation of Rates.

(a) The minimum rates, and all rates in excess thereof, as herein established, and higher rates which have been authorized since January 1, 1918, except by General Order No. 27, shall be preserved.

(b) Employees temporarily or permanently assigned to higher rated positions shall receive the higher rates while occupying such positions; employees temporarily assigned to lower rated positions shall not have their rates reduced.

Article IX.—Exception.

The provisions of this order will not apply in cases where amounts less than $30 per month are paid to individuals for special service which only takes a portion of their time from outside employment or business.

Article X.—Hours of Service.

Eight consecutive hours, exclusive of the meal period, shall constitute a day's work.

Article XI.—Overtime and Calls.

(a) Where there is no existing agreement or practice more favorable to the employees, overtime shall be computed for the ninth and tenth hour of continuous service pro rata on the actual minute basis and thereafter at the rate of time and one-half time. Even hours will be paid for at the end of each pay period; fractions thereof will be carried forward.

(b) When notified or called to work, outside of established hours, employees will be paid a minimum allowance of three hours.

(c) Employees will not be required to suspend work during regular hours to absorb overtime.

Article XII.—Promotion and Seniority.

(a) Promotions shall be based on ability, merit, and seniority. Ability and merit being sufficient, seniority shall prevail except, however, that this provision shall not apply to the personal office forces of such officers as superintendent, train master, division engineer, master mechanic, general freight or passenger agent, or their superiors in rank and executive officers. The management shall be the judge, subject to an appeal as provided in Article XIII.

(b) Seniority will be restricted to each classified department of the general and other offices and of each superintendent's or master mechanic's division.

(c) Seniority rights of employees referred to herein—to (1) new positions; (2) vacancies—will be governed by paragraphs (a) and (b) of this article.

(d) Employees declining promotion shall not lose their seniority.

(e) Employees accepting promotion will be allowed 30 days in which to qualify, and failing will be returned to former position without loss of seniority.

(f) New positions or vacancies will be promptly bulletined for a period of five days in the departments where they occur. Employees desiring such positions will file their aplications with the designated official within that time, and an appointment will be made within 10 days thereafter. Such position or vacancy may be filled temporarily pending an assignment. The name of the appointee will immediately thereafter be posted where the position or vacancy was bulletined.

(g) In reducing forces seniority shall govern. When forces are increased employees will be returned to the service and positions formerly occupied in the order of their seniority. Employees desiring to avail themselves of this rule must file their names and addresses with the proper official. Employees failing to report for duty or give satisfactory reason for not doing so within seven days from date of notification will be considered out of the service.

(h) A seniority roster of all employees in each classified department, who have been in the service six months or more, showing name, date of entering the service, and the date of each promotion or change, will be posted in a place accessible to those affected.

(i) The roster will be revived and posted in January of each year, and shall be open to correction for a period of 60 days from date of posting, on presentation of proof of error by an employee or his representative. The duly accredited representative of the employee shall be furnished with a copy of roster upon written request.

Article XIII.—Discipline and Grievances.

(a) An employee disciplined, or who considers himself unjustly treated, shall have a fair and impartial hearing, provided written request is presented to his immediate superior within five days of the date of the advice of discipline, and

the hearing shall be granted within five days thereafter.

(b) A decision will be rendered within seven days after the completion of hearing. If an appeal is taken, it must be filed with the next higher official, and a copy furnished the official whose decision is appealed within five days after date of decision. The hearing and decision on the appeal shall be governed by the time limits of the preceding section.

(c) At the hearing or on the appeal the employee may be assisted by a committee of employees or by one or more duly accredited representatives.

(d) The right of appeal by employees or representatives, in regular order of succession and in the manner prescribed up to and inclusive of the highest official designated by the railroad, to whom appeals may be made, is hereby established.

(e) An employee on request will be given a letter, stating the cause of discipline. A transcript of evidence taken at the investigation or on the appeal will be furnished on request to the employee or representative.

(f) If the final decision decrees that charges against the employee were not sustained, the record shall be cleared of the charge; if suspended or dismissed, the employee shall be returned to former position and paid for all time lost.

(g) Committees of employees shall be granted leave of absence and free transportation for the adjustment of differences between the railroad and the employees.

Article XIV.—Rules for Application of This Order.

(a) It is not the intention of this order to change the number of days per month for monthly paid employees. The increases per month provided for herein shall apply to the same number of days per month which were worked as of January 1, 1918.

(b) The pay of female employees for the same class of work shall be the same as that of men, and their working conditions must be healthful and fitted to their needs. The laws enacted for the government of their employment must be observed.

Article XV.—Interpretation of This Order

The rates of pay and rules herein established shall be incorporated into existing agreements and into agreements which may be reached in the future, on the several railroads, and should differences arise between the management and the employees of any of the railroads as to such incorporation, intent, or application of this order prior to the creation of additional railway boards of adjustment, such questions of difference shall be referred to the director of the division of labour for decision, when properly presented, subject always to review by the Director General.

Agreements or practices, except as changed by this order, remain in effect.

W. G. McAdoo,
Director General of Railroads.

Text of Supplement No. 8

Effective September 1, 1918, superseding General Order 27, and in lieu thereof as to the employees herein named, the following rates of pay and rules for overtime and working conditions for all employees in the maintenance of way department (except mechanics and helpers where provided for in Supplement No. 4, General Order No. 27, and clerical forces) upon railroads under Federal control are hereby ordered:

Article 1.—Rates of Pay.

(a) For all building, bridge, painter, signal and construction, mason and concrete, water supply, maintainer, and plumber foremen, establish a basic minimum rate of $90 per month, and to this basic minimum rate and all rates of $90 per month and above, in effect as of January 1 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $115 per month.

(b) For all assistant building, bridge, painter, signal and construction, mason and concrete water supply, maintainer, and plumber foremen, and for coal wharf, coal chute, and fence gang foremen, pile driver, ditching and hoisting engineers, and bridge inspectors, establish a basic minimum rate of $80 per month, and to this basic minimum rate and all rates of $80 per month and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $105 per month.

(c) For all track foremen establish a basic minimum rate of $75 per month, and to this basic minimum rate and all rates of $75 per month and above in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $100 per month.

(d) Rates of pay for all assistant track foremen will be five cents per hour in excess of the rate paid labourers whom they supervise.

(e) For all mechanics in the maintenance of way and bridge and building departments, where not provided for in Supplement No. 4 to General Order No. 27, who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 40 cents per hour, establish a basic minimum rate of 40 cents per hour, and to this basic minimum rate and all rates of 40 cents per hour and above add 13 cents per hour, establishing a minimum rate of 53 cents per hour.

(f) For helpers to all mechanics in the maintenance of way and bridge and building departments, where not provided for in Supplement No. 4 to General Order No. 27, who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 30 cents per hour, establish a basic minimum rate of 30 cents per hour, and to this basic minimum rate and all hourly rates of 30 cents per hour and above add 13 cents per hour, establishing a minimum rate of 43 cents per hour.

(g) For track labourers and all other classes of maintenance of way labour not herein named,

who on Jnauary 1, 1918, prior to the application of General Order No. 27, were receiving less than 16 cents per hour, establish a basic minimum rate of 16 cents per hour, and to this basic minimum rate and all hourly rates of 16 cents per hour and above add 12 cents per hour, establishing a minimum rate of 28 cents per hour, provided that the maximum shall not exceed 40 cents per hour.

(h) For drawbridge tenders and assistants, pile driver, ditching and hoisting firemen, pumper engineers and pumpers, crossing watchmen or flagmen, lamplighters and tenders, add to the rate in effect as of January 1, 1918, prior to the application of General Order No. 27, $25 per month.

(i) The wages for new positions shall be in conformity with the wages for positions of similar kind or class in department where created.

Article II.—Monthly, Weekly, or Daily Rates.

For all monthly, weekly, or daily rated employees in the departments herein referred to, and not otherwise provided for, increase the rates in effect as of January 1, 1918, prior to the application of General Order No. 27, on the basis of $25 per month.

Article III.—Maximum Monthly Rate.

No part of the increases herein specified shall be applied to establish a salary in excess of $250 per month.

Article IV.—Preservation of Rates.

(a) The minimum rates, and all rates in excess thereof, as herein established, and higher rates which have been authorized since January 1, 1918, except by General Order No. 27, shall be preserved.

(b) Employees temporarily or permanently assigned to higher rated positions shall receive the higher rates while occupying such positions; employees temporarily assigned to lower rated positions shall not have their rates reduced.

Article V.—Exception.

The provisions of this order will not apply in cases where amounts less than $30 per month are paid to individuals for special service which only takes a portion of their time from outside employment or business.

Article VI.—Hours of Service.

Eight consecutive hours, exclusive of the meal period, shall constitute a day's work.

Article VII.—Overtime and Calls.

(a) Where there is no existing agreement or practice more favorable to the employees, overtime shall be computed for the ninth and tenth hour of continuous service pro rata on the actual minute basis, and thereafter at the rate of time and one-half time. Even hours will be paid for at the end of each pay period; fractions thereof will be carried forward.

(b) When notified or called to work outside of established hours, employees will be paid a minimum allowance of three hours.

(c) Employees will not be required to suspend work during regular hours to absorb overtime.

Article VIII.—Promotion and Seniority Rights.

(a) Promotions shall be based on ability, merit, and seniority. Ability and merit being sufficient, seniority shall prevail. The management shall be the judge, subject to an appeal as provided for in Article IX.

(b) The seniority rights of labourers, as such, will be restricted to their gangs, except where gang is abolished they may displace labourers in other gangs, who are junior in service.

(c) Except as provided for in section (b) of this article, the seniority rights of employees referred to herein—to (1) new positions; (2) vacancies—will be governed by section (a) of this article, and will be restricted to the maintenance division upon which employed.

(d) Employees declining promotion shall not lose their seniority.

(e) Employees accepting promotion will be allowed 30 days in which to qualify, and failing will be returned to former position without loss of seniority.

(f) New positions or vacancies will be promptly bulletined for a period of five days at the tool house or in the department where they occur. Employees desiring such positions will file their applications with the designated official within that time and the appointment will be made within 10 days thereafter. Such position or vacancy may be filled temporarily pending assignment. The name of the appointee will immediately thereafter be posted where the position or vacancy was bulletined.

(g) In reducing forces, seniority shall govern; foremen will displace other foremen who are their junior in service before displacing labourers. When forces are increased, employees will be returned to the service and positions formerly occupied in the order of their seniority. Employees desiring to avail themselves of this rule must file their names and addresses with the proper official. Employees failing to report for duty or to give satisfactiory reason for not doing so within seven days from date of notification will be considered out of the service.

(h) Employees furloughed for six months or less will retain their seniority.

(i) A seniority roster of all employees in each classified department, showing name, date of entering the service, and date of promotion, will be posted in a conspicuous accessible place in each roadmaster's or supervisor's office. The names of labourers who have been in the service at least six months prior to date roster is posted or revised will be shown, with their relative standing and the date they entered the service.

(j) The roster will be revised and posted in January of each year, and shall be open to correction for a period of 60 days after date posted on presentation of proof of error by an employee

or representative. A copy will be furnished to each foreman or duly accredited representative upon request.

ARTICLE IX.—DISCIPLINE AND GRIEVANCES.

(a) An employee disciplined, or who considers himself unjustly treated, shall have a fair and impartial hearing, provided written request is presented to his immediate superior within five days of date of advice of discipline, and the hearing shall be granted within five days thereafter.

(b) A decision will be rendered within seven days after completion of hearing. If an appeal is taken it must be filed with the next higher official and a copy furnished the official whose decision is appealed within five days after date of decision. The hearing and decision on the appeal shall be governed by the time limits of the preceding section.

(c) At the hearing, or on the appeal, the employee may be assisted by a committee of employees or by one or more duly accredited representatives.

(d) The right of appeal by employees or representatives, in regular order of succession and in the manner prescribed, up to and inclusive of the highest official designated by the railroad to whom appeals may be made, is hereby established.

(e) An employee on request will be given a letter stating the cause of discipline. A transcript of the evidence taken at the investigation or on the appeal will be furnished on request to the employee or representative.

(a) If the final decision decrees that charges against employee were not sustained the record shall be cleared of the charge; if suspended or dismissed, the employee shall be returned to former position and paid for all time lost.

(g) Committees of employees shall be granted leave of absence and free transportation for the adjustment of differences between the railroad and the employee.

ARTICLE X.—GENERAL RULES.

(a) For main line, branch line, and yard section men the day's work will start and end at point designated to report for duty at their respective sections or yards.

(b) Employees taken from their regular assignment or outfit to work temporarily elsewhere will be furnished with board and lodging at the railroad's expense.

(c) Unless they so desire, except in emergency, employees shall not be transferred from one division to another.

ARTICLE XI.—RULES FOR APPLICATION OF THIS ORDER.

(a) It is not the intention of this order to change the number of days per month for monthly paid employees. The increases per month provided for herein shall apply to the same number of days per month which were worked as of January 1, 1918.

(b) The pay of female employees, for the same class of work, shall be the same as that of men, and their working conditions must be healthful, and fitted to their needs. The laws enacted for the government of their employment must be observed.

ARTICLE XII.—INTERPRETATION OF THIS ORDER.

The rates of pay and rules herein established shall be incorporated into existing agreements and into agreements which may be reached in the future, on the several railroads, and should differences arise between the management and the employees of any of the railroads as to such incorporation, intent or application of this order prior to the creation of additional railway boards of adjustment, such questions of difference shall be referred to the director of the division of labour for decision, when properly presented, subject always to review by the Director General.

Agreements or practices except as changed by this order remain in effect.

W. G. MCADOO,
Director General of Railroads.

AWARD OF WAR LABOUR BOARD OF THE UNITED STATES AFFECTING MOULDERS AND FOUNDRYMEN

SOME time ago a dispute over wages and hours of labour affecting moulders and foundrymen of Wheeling, West Virginia, was referred to the United States National War Labour Board for settlement. The Board agreed: (1) that eight hours constitute a day's work for all moulders and coremakers; (2) that the wage rate be $6.50 for the basic eight-hour working day; (3) that all overtime be paid for at the rate of time and one-half; (4) that Sundays and legal holidays be paid for at the rate of double time. The Board, however, could not agree on the point whether the eight-hour day should be considered merely as a basis for determining wages, or as a limit beyond which the men should not go except in emergencies. The question was referred to Chief Justice Walter Clark of the North Carolina Supreme Court as arbiter, who delivered his decision in September. This decision was based on the proclamation

of President Wilson creating the National War Labour Board, which provided, among other things, that "The basic eight-hour day is recognized as applying in all cases in which existing law requires it. In all other cases the question of hours of labour shall be settled with due regard to governmental necessities and the welfare, health and proper comfort of the workers." It was held by Justice Clark that the welfare, health and comfort of moulders and foundrymen demanded an eight-hour day, and this fact having been established it was necessary for the arbiter to devise a means to prevent a too easy appeal to the cupidity of some workers, and yet provide for a temporary suspension of the rule in order to meet emergencies. "Such emergencies," he said, "can ordinarily be met by the adoption of the three-shift system or an increase in machinery. It is better that the machinery be worn out than the bodies of the employees. Man passes through this world but once, and he is entitled, in the language of the great Declaration, to some 'enjoyment of life, liberty, and pursuit of happiness.'" On the basis of these principles the following decision was delivered by him:

(1) Overtime shall be paid for at the rate of time and one-half for all hours in excess of eight hours, with double time for Sundays and holidays.

(2) The question whether or not an emergency exists, together with the length of time over which such emergency may extend, and the number of extra hours per day, shall be determined by an agreement between the management and the working moulders in the shop.

(3) For the purpose of effectuating this agreement a permanent committee of four persons is hereby created, two of whom shall be designated by the management of the plant and two by the working moulders in the shop, the assent of at least three of whom shall be necessary for permission to work more than eight hours in any day of 24 hours.

An interesting sequel to this decision was an announcement of the United States Steel Corporation that the eight-hour day would be made operative, as the basis for fixing wages, with its whole army of workmen.

PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1918, AND IN OTHER COUNTRIES

THERE was little change in wholesale prices, as reflected in the Department's Index Number for September, the increases in some commodities being offset by the decreases in grains, fruits, potatoes, and dressed lamb. Flour showed an advance over the previous month, also coffee, sugar, glucose and honey. Among the textiles, cotton, increased, and flax products, also table oilcloth. Anthracite coal at Montreal was higher in price and matches showed a slight gain. Tin ingots fell in price, while iron and steel were higher. Prepared paints declined, putty and rosin showed considerable increases. Raw furs rose also several points.

The Index Number of wholesale prices is based upon the quotation of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100. In September, the Index Number stood at 285.3 as compared with 284.3 in August of this year, and with 246.1 in September, 1917, 183.4 in September, 1916, 150.3 in September, 1915., 141.3 in September, 1914, and 134.4 in September, 1913.

In retail prices, the average cost of a weekly budget of staple foods was

$13.31 as compared with $13.41 in August, 1918, and $11.65 in September, 1917, $8.97 in September, 1916, and $7.83 in September, 1914. The chief decrease was in the price of potatoes, all the provinces but Quebec showing a considerable decline. Beef averaged lower, also mutton, but sugar was quoted higher in all the provinces. Coal increased generally, particularly in the western provinces. Ontario showed a slight decline, but there was an increase in the Dominion average for fuel and lighting, while rents showed a little falling off in Quebec and Saskatchewan, and an advance in British Columbia.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood, and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen..

Retail Prices

BEEF was downward, the price falling in several of the cities east of Fort William. Pork products and mutton were steady. Lard was higher in several of the cities. Fresh eggs were higher in many of the cities, but storage eggs came on the market in several of the cities, reducing the average. Milk was higher, being up in several of the cities. Butter was slightly higher, being up in several of the cities throughout the country. Sugar showed advances in many of the cities. Flour was slightly higher. Potatoes were considerably lower throughout the Dominion; advances, however, occurred in some of the cities. Anthracite coal was higher in several of the cities, but in other cases there were slight reductions. Bituminous coal was higher in several of the cities, particularly in the West. Wood showed little change. Rent decreased in Moose Jaw, Sask., and advanced at Victoria, B.C.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA

Wholesale Prices

Grains and fodder.—Wheat at Winnipeg, No. 1 Northern, was up to $2.24½, the price fixed at the end of August by the Board of Grain Supervisors. Ontario winter wheat was also higher. Barley had fallen to $1.05 per bushel at Winnipeg, but rose slightly and decreased again. Barley at Toronto rose from $1.03-1.05 to $1.07-1.12. Oats at Winnipeg rose from 85c to 88c, but declined to 84c. Ontario oats were steady at 76-78c. Corn was down to $1.80-1.85. Flaxseed declined to $4.19 at the beginning of the month, and was as low as $3.93 on the last day. Hay was up to $17.00 for No. 2 at Montreal.

Animals and meats. — The best butchers' cattle at Toronto were steady at $16.00, but declined 50c at the end of the month. Cattle at Winnipeg were higher at $15.50, but eased off slightly. Dressed beef rose from 22-25c per pound to 24-26c for hindquarters. Veal was higher for the cheaper grades. Live hogs advanced from $18.25 per hundred to $18.75. Bacon was higher at 43c and ham at 37c. Sheep were slightly easier at $14.50 per hundred. Dressed lamb was lower at 25-28c per pound.

Dairy products. — Butter advanced from 43c per pound to 48c at Montreal for finest creamery, and at Toronto from 45c to 48c for creamery solids. Dairy products rose from 38-42c to 44-45c in the last week. Eggs, fresh at Montreal, advanced from 55c to 60c. At Toronto they advanced from 54c to 58c.

Fish.—Whitefish at Toronto advanced from 14-15c per pound to 16-17c. The price of dried cod on the Nova Scotian coast was as high as $12.75 per quintal, ex-vessels. It was reported that difficulties of transportation had curtailed the demand for export. Supplies of salt fish continued to be lower.

Fruits and vegetables. — Lemons were easier at $7.50 per box. Prunes were slightly higher at 13½-14c per pound. Raisins were also slightly up at 10½-11c. Potatoes were down to $2.35 per bag in small lots and $1.90 at Montreal in large lots. Canned tomatoes were lower at $2.40-2.75 per dozen. Oatmeal and rolled oats were slightly lower and rice and tapioca were slightly higher. Flour was higher at $11.50. Coffee was higher at 26-32c at Toronto. Sugar was somewhat higher in some of the markets. Glucose advanced and honey rose to 25-28c. Pepper was firmer.

Hides, leather, boots and shoes.—Calfskins rose from 42c per pound to 45c.

Metals and implements.—Iron black sheets were firmer, also cast steel. Lead was firmer. Tin was down to $1.05 per pound.

Fuel and lighting.—A line of matches advanced from $22.85 per gross to $23.10. Anthracite coal advanced 30c per ton at Montreal.

Building materials.—Spruce deals in New Brunswick advanced from $26.00 per thousand to $29.00. Brick rose to $18.00 per thousand at Toronto. Plaster of Paris and sash cords advanced. White lead was up, but linseed oil was lower. Resin advanced, also putty.

House furnishings. — No changes were reported.

Drugs and chemicals.—Carbolic acid was lower at 85c per pound. Caustic soda was lower at 9c per pound.

Miscellaneous.—In raw furs, raccoon rose to $4.00-4.50 per skin and skunk to $5.75-6.00. Malt declined from $1.90 to $1.80 per bushel.

Prices in Other Countries

In the United Kingdom, the LABOUR GAZETTE, published by the Ministry of Labour, reports that retail prices of food averaged slightly lower at the beginning of September than at the first of August, the change being due to a fall in the price of potatoes of 22 per cent. An advance of four per cent in the average price of milk and of two per cent in the price of cheese are noted as the only other price movements of any importance. The increase in the retail prices of the principal articles of food at the end of September as compared with July, 1914, is estimated at 116 per cent; at the beginning of August the increase was 118 per cent.

Statistics are also given to show the approximate percentage increases since July, 1914, in the cost of a family budget including, in addition to food, rent, clothing, fuel and lighting, etc. since July, 1914. "Through 1915, 1916, and 1917," the statement reads, "the increase in the prices of all items averaged about three-quarters of that in prices of food. Since then, however, the relatively small increase in the price of food, and the accelerated increases in the prices of other commodities, having resulted in the increase in respect of all items approaching to that for food. The approximate percentage increases since July, 1914, in the prices of all the items, are given in the following table, which shows the increased cost of maintaining a pre-war standard of living, no allowance being made for such varying economies as have been effected during the war.

AVERAGE PERCENTAGE INCREASE SINCE JULY, 1914, ALL ITEMS

Month (beginning of)	1914	1915	1916	1917	1918

October	10	30	50–55	75–80	.....
November	.....	30–35	60	85	.....
December	10	35	65	85	.....

In the United States, retail prices of food for July, 1918, showed an increase of 3 per cent over prices for the preceding month, according to the Monthly Labour Review of the Bureau of Labour Statistics. Beef, lamb, lard, navy beans and coffee decreased in price, while bread, flour and corn meal remained steady during the month. In wholesale prices, the month from August 1 to September 1 showed very little change, Dun's index number marking an advance of .4 per cent during the month and Bradstreets' a decrease of .7 per cent. A decline in the breadstuffs total was offset by increases in prices of meats and provisions. Foodstuffs, other than cereals, and building materials are very high, but there were recessions in textiles and metals. The fact that there are no wide fluctuations to report is imputed by both Dun's and Bradstreets' to regulation by the Government of the prices of various commodities. A modern record was made in the high price of raw cotton, however, the figure being above 37¼ cents.

The Danish Statistical Department estimates that the cost to a working-class family of five persons at Copenhagen of food, clothing, rent, fuel and light, taxation, etc., has increased from about $550.00 per annum according to prices current in July, 1914, to about $1,000 per annum according to prices in July, 1918. Allowance has been made in calculating the cost in the last period for the changes due to the fact that certain fats are unobtainable and that other articles such as bread, are rationed. Thus, the total cost of living is about 28 per cent higher in July, 1917, than in July, 1914, while the increase in food alone is over 87 per cent.

INVESTIGATION INTO THE PROFITS OF RESTAURANTS IN OTTAWA

The Cost of Living Branch of the Department of Labour has recently issued a statement based upon its investigations, under Order-in-Council No. 2777, (see page 1848, December, 1916, issue of the LABOUR GAZETTE) into the profits that are being made by the restaurants in the city of Ottawa. The necessary information was obtained through the medium of sworn statements which the restaurant managers were required to submit. These statements, which approximately covered three periods of time, gave the following information: The price charged customers for each portion served of certain specified commodities; the quantity or weight of such portion; the price paid per pound for the commodity, and the name of the firm from which it was purchased. From this information it would appear that the profits on bacon, beef, pork and veal have increased very rapidly during the last few months. In the table that follows it will be noticed that there has been a considerable reduction in the quantity of each portion served during August and September as compared with that served during June. The weights for June were taken from the sworn statements of the restaurant managers, while those of the subsequent period were obtained through actual purchase by a representative of the Labour Department.

The restaurants investigated are denoted in the table by numbers, and the percentage of gross profits represents the percentage of the increase in the prices charged to customers upon the prices paid by the restaurant.

DECEMBER 1, 1917.

ORDER-IN-COUNCIL AMENDING PREVIOUS ORDERS RESPECTING PRICES OF THE NECESSARIES OF LIFE

UNDER date of October 4, 1918, the Government, acting upon the recommendation of the Minister of Labour, passed an Order-in-Council designed to remedy certain defects in Orders-in-Council P.C. 2777 and P.C. 2957,* respecting the high cost of living. The regulations contained in the new Order are wider in their scope than those now rescinded: they provide extended facilities for investigation; publication of fair prices; prosecution by a municipality, or by the Minister of Labour, in addition to the present method of prosecution by the provincial attorney general. The rental values of dwelling houses is also included as a subject of investigation, and power is given to proceed against hotels and restaurants which sell necessaries of life at a price higher than is reasonable and just. Provision is made for the establishment by the council of any municipality of a Fair Prices Committee, which committee shall have authority to investigate the amount of any necessary of life held for sale in the municipality, the time when acquired, the original cost, and the price at which it is held for sale. These committees will also determine reasonable sale prices for commodities, and fair rental values of dwellings held or offered for rental in the municipalities. Provision is made for the publication of all findings of these committees in the newspapers published in the municipalities concerned or at the nearest point thereto. The full text of the new Order follows:

P.C. 2461.

Whereas, with the view to preventing undue enhancement of the cost of living, Orders-in-Council P.C. 2777 and P.C. 2957 were enacted, but in their administration certain defects therein have been disclosed;

Therefore, His Excellency the Governor-General in Council, on the recommendation of the Minister of Labour, and under and by virtue of the powers conferred by the War Measures Act, 1914, or otherwise, vested in the Governor-General in Council, is pleased to rescind and doth hereby rescind the above mentioned Orders-in-Council (P.C. 2777 and P.C. 2957) and is further pleased to make the following regulations, and the same are hereby made and established accordingly:

REGULATIONS.

1. For the purpose of these regulations the expression "council" means the governing body of a municipality. "Minister" means the Minister of Labour. "Necessary of life" means a staple and ordinary article of food (whether fresh, preserved, canned or otherwise treated), clothing, fuel, including the products, materials and ingredients into, from or of which any thereof are in whole or in part manufactured, composed, derived, or made, and any other item of common and ordinary household expenditure. "Municipality" means any county, district, township, parish, city, town, village, or other area within a province, which is governed municipally or by council or similar body. "Person" includes natural persons and bodies corporate.

2. (1) No person shall conspire, combine, agree, or arrange with any other person—

(a) to limit the facilities for transporting, producing, manufacturing, supplying, storing or dealing in any necessary of life; or,

b) to restrain or injure trade or commerce in relation to any necessary of life; or,

(c) to prevent, limit or lessen the manufacture or production of any necessary of life, or to enhance or maintain the price thereof; or,

(d) to prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation, insurance or supply of any necessary of life.

(2) Nothing in this section shall be construed to apply to combinations of workmen, or employees, for their own reasonable protection as such workmen or employees.

(3) Section 498 of the Criminal Code shall, as respects necessaries of life only, until the repeal of this section of these regulations, be deemed to have been repealed.

3. (1) No person shall accumulate or shall withhold from sale any necessary of life beyond

*For text of P.C. 2777, as amended by P.C. 2957, see Labour Gazette for December, 1916, page 1849.

an amount thereof reasonably required for the use or consumption of his household or for the ordinary purposes of his business.

(2) Every person who holds or offers for sale, or sells or provides or furnishes for consumption at a price, whether upon the premises which he occupies or not, any necessary of life, shall sell it, or provide or furnish the same for consumption as aforesaid, at a price not higher than is reasonable and just; and any person who leases or holds or offers for rental any property shall lease the same at a rental not higher than is reasonable and just.

(3) Provided, however, that this section shall not apply or extend to any accumulating or withholding by any farmer, gardener, or other person, of the products of any farm, garden, or other land cultivated by him; nor shall any manufacturer, wholesaler or jobber, because of anything herein contained, be under obligation to sell to other than such classes of persons as are accustomed to purchase from manufacturers, wholesalers, or jobbers, respectively.

The above proviso shall not relieve any person from liability for waste under Order of His Excellency the Governor-General in Council, P.C. 597.

4. The Minister may, by notice in writing under his hand or that of his deputy, require any person who produces, stores or deals in any necessary of life to make and render unto the Minister, within the time set in such notice, and such person shall make and render unto the Minister a written return under oath or affirmation containing any information that the said Minister may require, with respect to the production, purchase, sale, shipment, origin, destination or price of any necessary of life, produced, stored, or dealt in by such person.

5. The Minister shall have power to investigate the business and to examine the premises, books, papers, and records of any person respecting any necessary of life or rental value of any real estate, and for this purpose the Minster may appoint an examiner or examiners, and may authorize in writing any examiner so appointed to enter and examine the premises, books, records, and papers of such person, and to take evidence under oath or affirmation of any person whom such examiner or examiners may believe has knowledge relating to the matters under investigation, and for all such purposes the said examiner or examiners shall have the powers of a commissioner appointed under the provisions of Part I of the Inquiries Act.

6. (1) The Council of any municipality may appoint a committee or two or more of their officers, to be known as the "Fair Price Committee," and shall submit the names of the committee to the Minister, who shall in writing authorize it to investigate:

(a) The amount of any necessary of life specified by the said council and held by any person for sale or disposition, within such municipality, at any indicated time or times, including any time preceding the making of these regulations;

(b) The time when any or all of such necessary of life was acquired, produced, or brought within or into such municipality;

(c) The cost within such municipality of such necessary of life, including all charges of an overhead or other nature affecting such cost;

(d) The price at which such necessary of life is held in such municipality for sale, or at which any sales of part of the same or of a similar necessary of life have been made by such persons within such municipality at any indicated time or times, including any time preceding the making of these regulations;

(e) The price which in the opinion of such committee would be a just and reasonable one at which to hold such necessary of life for sale within such municipality;

(f) The amount of wastage or destruction of any such necessary of life, and the reason for same;

(g) The fair rental value of any dwelling held or offered for rental within the municipality.

(2) For all such purposes the committee shall have the powers of a commissioner appointed under the provisions of Part I of the Inquiries Act.

(3) Whenever in the opinion of the committee or of the council there is evidence disclosing any offence against these regulations, either the committee or the council may take such proceedings thereunder as they may deem proper, or may remit the evidence to the attorney general of the province within which such offence shall have been committed for such action as such attorney general may be pleased to institute.

(4) All lawful expenses incurred by the said committee shall be payable by the municipality.

7. Immediately upon the close of the investigations the said committee shall report their findings to the Minister and to the council by which they are appointed, and shall publish over their signatures in the paper or papers published in the said municipality, or where there is no such paper, in a paper published at the nearest point thereto, the fair price to the consumers in that municipality of the necessaries of life investigated.

8. (1) Except in investigations had by a "Fair Price Committee," whenever in the opinion of the Minister there is evidence disclosing any offence against these regulations, the Minister shall take such proceedings as he may deem necessary or shall remit the evidence to the attorney general of the province within which such offence shall have been committed for such action as such attorney general may be pleased to institute.

(2) Prosecutions under these regulations shall be commenced only in the county or municipality in which some or all of the necessaries of life with respect to which the alleged offence was committed were situated at the time of the commission of the offence, or in the county in which the person charged resides or carries on business.

9. (1) Any person who contravenes or fails to observe any of the provisions of these regulations shall be guilty of an indictable offence and liable upon indictment or upon summary conviction under Part XV of the Criminal Code to a penalty not exceeding $5,000, or to imprisonment for any term not exceeding two years, or to both fine and imprisonment as specified; and any director or officer of any company or corporation who assents to or acquiesces in the contravention or non-observance by such company or corporation of any of the provisions of these regulations shall be guilty personally and cumulatively with his company or corporation and with his co-directors or associate officers.

(2) For the purposes of the trial of and indictment for any offence against these regulations, Section 581 of the Criminal Code, authorizing speedy trials without juries, shall apply.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

LABOUR LAWS IN CANADA AS EXISTING AT THE BEGINNING OF 1918

LAST year the Department of Labour undertook the preparation of a series of reports giving the text of all the labour laws enacted by the Dominion and Provincial Governments that were in effect at the end of 1917. The first report of the series was issued during last October, and contained all the labour laws enacted in Canada during the year 1916. A very complete summary of this report was given in the LABOUR GAZETTE for November, 1917, (page 937), but further reports have now been issued, of which one contains the labour laws of Canada as existing at the end of 1915, and the other, those laws enacted during the year 1917.*

The material for the report up to 1915 was selected from the last Revised Statutes, from the subsequent yearly volumes of Statutes up to the end of 1915, and, in the case of Quebec, from the Civil Code and the Code of Civil Procedure. For Alberta it was necessary to use the Consolidated Ordinances of the North West Territories, 1898, and the annual volumes of Ordinances up to 1906, as no Revised Statutes of Alberta have been published since the establishment of that province in 1905. For convenience, amending acts were consolidated with the Statutes which they amend except in a few instances where the form of the amendment rendered consolidation impracticable. As this report containing the earlier legislation was prepared after those containing the laws of 1916 and 1917, it was possible to omit Statutes which were in existence at the end of 1915 but which were repealed or were replaced by new legislation during 1916 and 1917; but in each instance where this has been done a note indicating the later legislation has been inserted in place of the Statute.

The report for 1917 contains all the laws enacted during the year except those for the province of Quebec, where the session opened late and extended into 1918. These will appear in the report for 1918. The report for 1917 contains a very complete general summary of the laws under the various heads to which they relate. This summary is reproduced below practically in its entirety:

Labour Departments and Bureaus

The Labour Department Act of British Columbia (chapter 32) added another to the list of provincial labour departments and bureaus, and now all the provinces west of New Brunswick,

*For text of some of the labour laws enacted during 1918 see the LABOUR GAZETTE for August, 1918, (page 654).

except Alberta, have departments of the kind. The British Columbia law, which follows somewhat closely the Ontario Trades and Labour Branch Act, charges the new department with the administration of the laws affecting labour, the collection and publication of information respecting trades and industries, the investigation of sanitary conditions relating to the health of the industrial classes, and the establishment and maintenance of employment bureaus. The department is empowered to obtain information respecting labour matters from labour organizations and from employers, and the Minister of Labour is required to submit an annual report containing information collected by the department, and recommendations based thereon. The Lieutenant-Governor in Council may make regulations supplementary to the Act.

The only other legislation in this field is chapter 15 of the Ontario Statutes, which amends the Trades and Labour Branch Act. The Branch is now charged with the administration of the new Employment Agencies Act, and a new section enabling the superintendent to obtain such information as he considers necessary for carrying out the Trades and Labour Branch Act, or any of the Acts administered by the Branch, is also added to the original statute.

Wages

The tendency towards the payment of wages at shorter intervals is one of the marked features of the laws enacted upon the subject of wages. The Dominion Parliament amended the Railway Act by adding a new subsection directing that the wages of employees on railways subsidized by the Parliament of Canada shall be paid at intervals of not more than two weeks. The new Factory Act of Alberta (chapter 20) prescribes semi-monthly pay days for all persons employed in any factory, office, office building or shop to which the Act applies. British Columbia also enacted legislation on this subject. Chapter 73 provides for the fortnightly payment of wages to all employees in the mining, lumbering and fishing industries who receive less than $2,000 per annum, and forbids employers to secure exemption from this provision by special contract with employees. The Mineral Survey and Development Act of the same province (chapter 41) includes sections requiring the semi-monthly payment of wages on mining claims under bond or option.

Mechanics' Lien Acts were amended in several provinces. The Nova Scotia Act was amended so that persons performing work upon ships are now included among those entitled to a lien for labour performed. An amending act rewrites section 23 of the Saskatchewan Mechanics' Lien Act respecting the duration of a lien. Section 9 of the British Columbia Act dealing with liens on mortgaged premises is modified with respect to liens performed in or about any mineral claim. An Ordinance of the Yukon Territory rewrites several sections of the Miners' Lien Ordinance, but makes no important change in the provisions of the law.

By the Trust Companies Act of Saskatchewan (chapter 24) it was provided that the directors of a trust company shall be jointly and severally liable to employees for three months' wages, provided that suit is brought within one year.

A schedule of wages for employees in the Dominion Government Printing Bureau was drawn up by the Secretary of State and approved by the Governor-General in October, 1917, under the authority of section 31 of the Public Printing and Stationery Act (R.S. 1906, chapter 80). The schedule, which is based on the rates of wages in printing establishments in Toronto and Montreal, provides for an increase in wages for employees in the Government printing establishment, and gives the new rates retroactive effect from June 15, 1917.

The subject of minimum wages will be considered in connection with the provisions respecting the employment of women and children.

Fair Wages in Government Contracts

The Saskatchewan Public Highways Act, 1916, was replaced by a new Act (chapter 7), which includes, as did the earlier statute, a fair wage clause. The Yukon Ordinance respecting the hours of labour on public works also contains a provision concerning fair wages.

A fair wage schedule, effective from August 14, 1917, to August 14, 1918, was drawn up by the Fair Wage Board of Manitoba and approved by the Minister of Public Works, under the authority of the Fair Wage Act. This schedule appears in the *Manitoba Gazette* of October 13, 1917, and also in the Labour Gazette for November, 1917.

Hours of Labour

Under this title falls that part of the Alberta Factory Act (chapter 20) which deals with the hours during which persons may be employed in establishments covered by the Act. This new law limits the hours of labour per day shift to ten, and per night shift to eight hours. The day shift must not start before seven o'clock in the morning, nor end after six o'clock in the afternoon, and employers are required to allow at least one hour per day between eleven and two o'clock for lunch. Unless for special reasons the inspector permits employment for a longer period, no person is to be employed for more than one shift in one day.

An amendment to the Federal Railway Act empowers the Board of Railway Commissioners to limit or regulate the hours of labour of any railway employees, with a view to the safety of the public and of the railway employees themselves.

The Council of the Yukon Territory passed an Ordinance (chapter 6) providing that no person employed on public works in the Territory shall be required or permitted to work more than eight hours in one day, except in cases of extraordinary emergency.

The remaining enactments respecting hours of labour affect employees in shops. The New Brunswick Legislature passed an Early Closing Act (chapter 33) repealing former legislation on the subject. Formerly the council of a city or incorporated town had power to pass by-laws fixing the hours of closing in shops, but the new law requires the council to pass a by-law with respect to hours of closing for any particular class of shops upon the presentation of a petition signed by three-quarters of the persons engaged in the line of business affected. Days preceding certain holidays and the days of the last three weeks of December were exempt from the early closing regulations under the old Act, and to these are now added the days during the first two weeks in January. The definition of "shop" in the Alberta Early Closing Act is amended to include the place in which a blacksmith or other artisan carries on his trade, and a clause providing that the time for closing blacksmiths' shops may be fixed at any hour after five in the afternoon is added to the Act. An amendment to the Towns' Incorporation Act of Nova Scotia enables town councils to pass by-laws respecting hours for closing shops, while the City Act of Saskatchewan is amended so that, in addition to the power of requiring shops to close at six o'clock already possessed by city councils in that province, such councils now have power to pass by-laws requiring any class of shops to remain closed after noon one day a week.

Holidays and Rest Days

All the enactments on this subject have to do with street railways. An amendment to the Nova Scotia Street Railways Act empowers the Public Utilities Board to make regulations, under certain conditions, limiting the number of days in every eight during which street railway employees may be required to work. An amendment to the Ontario Railway Act exempts the London Street Railway Company, in respect to

a part of its line, from the provision prohibiting the operation of street railways on Sunday. Saskatchewan in the new Rural Municipalities Act (chapter 14), replacing a former Act of the same title, reproduces the section respecting Sunday street cars without change. The council of a municipality may pass a referred by-law permitting Sunday

Regulation and Inspection of Factories

The most important enactment under this head was the new law regulating factories and office buildings passed by the Legislature of Alberta. The first Canadian legislation on this subject was enacted by Ontario in 1884. Other provinces have followed suit from time to time until, with the passing of the Alberta Factory Act (chapter 20), Prince Edward Island is now the only province in the Dominion without a factory law. Various provisions of the Alberta law, such as those dealing with wages, are considered under other headings, and only those respecting the sanitary condition of factories, fire prevention, factory inspection and kindred subjects will be noted here. The Act applies to shops and office buildings in cities and towns having a population over 5,000, and to all factories within the province. The Lieutenant-Governor in Council is empowered to appoint inspectors, male or female, who are given extensive powers in respect to examining premises and making inquiries. An inspector may prohibit the eating of meals in a room in which a manufacturing process is carried on, and may require employers to furnish suitable eating places for employees. Food is not to be taken into a room where any poisonous substance is exposed or where there are poisonous gases. The Act includes regulations with respect to furnishing conveniences for employees, supplying pure drinking water, heating premises, ventilation, overcrowding, washrooms, etc. Provision is also made for the keeping of a register of the names and addresses of all persons engaged in the manufacture of clothing at home. Permits are to be issued by the inspector stating that the places in which the work is done are in good condition. Detailed instructions are given in the Act respecting the guarding of machinery, the construction and equipment of elevators, and fire prevention and protection in factories and office buildings. Sanitary regulations for bakeshops are also included in the law. The provisions touched upon above are practically identical with those on the same subjects in the Ontario Factory Act, but several sections of the latter Act apply only to women and children, whereas the corresponding sections in the Alberta statute are made to apply to all employees, by the substitution of the word "person" where the Ontario Act has the words "women and children."

An amendment to the Public Health Act of Nova Scotia prohibits the use of common drinking cups, common towels or similar articles in any shop or office building in the province. A similar prohibition appears in regulations issued by the New Brunswick Board of Health applying to factories, shops and office buildings. Other regulations of the Board require that wiping rags shall be sterilized before being furnished to employees in industrial establishments.

Manitoba replaced the Fires Prevention Act by a new Act with the same title (chapter 35). The industrial interest of this Act lies in its relation to fires in buildings in which persons are working. It is not to apply, however, to any factory, shop or office building covered by any law in force in the province previous to the passing of the Fires Prevention Act. The Lieutenant-Governor in Council is empowered to appoint a fire commissioner, a deputy fire commissioner and other employees. The commissioner is charged with the enforcement of laws relating to the prevention of fire, the storage, sale and use of explosives, fire escapes, etc. All fires are to be investigated, and insurance companies are required to furnish state-

ments respecting fires which affect them. When the commissioner finds a building in a condition which makes it liable to fire, it is his duty to order the condition remedied, and penalties are provided for the non-observance of such an order.

An amendment to the Manitoba Passenger and Freight Elevator Act provides that no person shall be eligible to act as an elevator inspector under the Act who is connected in any way with the business of building, repairing or altering elevators. In this connection it may be noted that rules and regulations, adopted by the Lieutenant-Governor in Council under the authority of section 3 of the Act, are now in operation. They provide in detail for the construction, operation and maintenance of elevators.

An amendment of minor importance to the Steam Boiler Act was enacted by the Manitoba Legislature. An amendment to the Steam Boiler Act of Saskatchewan was also passed at the first session of the Legislature of that province. Provision is made for the operation of steam portable and traction engines in such a manner as to minimize the danger of fire, and the inspector is charged with the duty of seeing that engines are furnished with fire-prevention appliances. The same Act was further amended at the second session. The various types of boilers are defined in the amending Act, and provision is made for the registration of boilers by the owners, and for the issuing of numbered licenses. Annual inspection of boilers is provided for in the principal Act, and inspection may also be made whenever the inspector thinks advisable.

Regulation and Inspection of Mines

Saskatchewan enacted a Mines Act (chapter 10) replacing former legislation for the regulation of coal mines. The new Act is practically a continuation of the Coal Mines Act, but the change in title is significant as an indication of the widened scope of the Act to include the mining of other minerals. New sections provide that where wages are regulated by the weight of mineral recovered, the mine employees may appoint a checkweigher at their own cost, and may station him at the place where the mineral is weighed. The checkweigher so appointed must be a practical working miner of at least three years' experience, and is to work under conditions set forth in the Act. A further addition empowers an inspector, in any case not expressly provided for in the Act, to order defects or dangerous practices in any mine remedied, and if such defects or practices cannot be remedied, to order the withdrawal of the men from the mine in question. If the owner of the mine objects to the alterations ordered by the inspector, he may appeal to an arbitration board, and must comply with the award made by such board. The schedule of general rules for the safety and comfort of mine workers is altered in a few instances to conform more closely to modern practice.

The Nova Scotia Legislature amended those sections of the Coal Mines Act which have to do with the special rules made by mine owners for their respective mines. The amending Act also prescribes further precautions in connection with shot firing.

Regulation and Inspection of Buildings and Excavations

The Manitoba Legislature amended the existing law of the province respecting the protection of employees on buildings and excavations. The Lieutenant-Governor in Council is now empowered to adopt regulations, in addition to those contained in the Act, for the protection of such employees, and the Minister of Public Works may appoint a board of qualified persons to draft rules and regulations. The chairman of the board is to be an official of the Department of Public Works, and the other members are to represent employers and em-

ployees in equal numbers. The amending Act also directs that in municipalities where building permits are required, the official issuing such permits must make a weekly return to the Bureau of Labour.

Regulation and Inspection of Electrical Construction and Apparatus

The Alberta Legislature enacted an interesting law (chapter 7) aiming at the protection of electrical workers. In Ontario the Power Commission, and in Saskatchewan the Lieutenant-Governor in Council, has power to make regulations concerning the construction and use of electric wires, etc., while in British Columbia there is a law providing for the inspection of all machinery, works and appliances used in connection with generating, transmitting or supplying electrical energy, and empowering inspectors to order the remedying of defects. Alberta, however, is the first province to pass an Act setting forth in detail the requirements to be observed in connection with electrical construction and installations. The Act includes precise specifications respecting wires, cables, transformers, poles, manholes, etc., and directs that all such wires and other electrical apparatus are to be made to conform with the provisions of the Act within ten years. The Board of Public Utility Commissioners is charged with the administration of the Act, and may order the erection of protection devices previous to the expiration of the ten years. The Board is also empowered to supplement the Act by additional regulations.

Employment of Women and Children

Legislation bearing upon this subject was passed in several provinces during the current year. The Alberta Factory Act (chapter 20) forbids the employment of children under the age of 15 years in any establishment to which the Act applies. Employers are directed to furnish seats for female employees, and to permit their use when the employees' work will not be interfered with. The provisions of the Act respecting minimum wages also fall under this head. Alberta is the first province to enact legislation on the subject, and the section in question (section 24) fixes a minimum wage of $1.50 per shift for all persons employed in factories, shops, offices or office buildings, except apprentices, who may be paid a minimum wage of $1 per shift. Day shifts are limited to ten, and night shifts to eight hours.

The Nova Scotia Legislature enacted a new Children's Protection Act (chapter 2) repealing former legislation on the subject. Part IV of the Act is concerned with the hours of labour for young persons in shops. Boys under 14 and girls under 16 years of age are not to be employed in any shop for more than eight hours on any day, or for more than four hours on Saturday, and on every day that employees work more than four hours at least one hour is to be allowed for lunch. Employers are directed to furnish seats for female employees, and to post notices referring to the provisions of Part IV.

The Manitoba Legislature amended the Factories Act and the Shops Regulation Act in respect to the employment of children. Employers are now required to obtain birth certificates or statements signed by parents from persons under 16 years of age before permitting such persons to work in any factory, shop or office. When a factory inspector grants an exemption from the provisions of the Factories Act respecting the hours of labour for female employees, such exemption is not to apply to persons under 17 years of age. Similarly, the emergency limit of 70 hours a week allowed by the Shops Regulation Act is not to apply to female employees under 16 years of age. The chapter amending the latter Act alters the definition of "shop," which appears in the division of the Act dealing with the hours of labour for young persons, so that premises used in connection with messenger ser-

vice are now included. A further clause of the amending Act directs that the provisions respecting the hours of labour for young persons in shops shall apply also to offices.

The Children's Protection Act of Nova Scotia (chapter 2) and the corresponding Act passed in Saskatchewan (chapter 13) contain clauses respecting the employment of children in certain occupations. The former statute provides that any child under 16 years of age who is employed in a brewery, or in any place where intoxicating liquors are made or sold, may be apprehended as a neglected child. The latter statute makes a similar provision with regard to children employed anywhere between 10 o'clock at night and 6 o'clock the next morning. The Saskatchewan law also empowers municipal councils to pass by-laws for regulating and licensing children engaged in street trades. Licenses are not to be granted to girls of any age or to boys under 12 years of age, and boys between the ages of 12 and 14 years must have written authority from their parents before licenses may be granted. Children are forbidden to engage in street trades after 8 o'clock at night in December, January and February, or after nine o'clock throughout the rest of the year.

The subject of school attendance is considered in several laws. An amendment to the Prince Edward Island law respecting school attendance makes the law applicable to children between the ages of eight and 14 years, instead of to those between the ages of eight and 13 as formerly. The period of attendance required is raised to 30 weeks in Charlottetown and Summerside, and to 20 weeks elsewhere in the province. The Nova Scotia law regulating school attendance in cities and towns is amended so that its application may be extended to country school sections, upon the adoption of a resolution to that effect by the majority of the qualified voters present at the annual school meeting. In such case, however, the provisions are to apply to children from seven to 14 years of age, instead of to those between six and 16, as in cities and towns. The Manitoba Legislature made a minor amendment to the School Attendance Act respecting the employment of children in husbandry during a school term. Saskatchewan repealed the sections of the School Act dealing with compulsory attendance, and enacted a School Attendance Act (chapter 19) which requires children from seven to 14 years of age to attend for the whole school year. The Act also forbids any one to employ a child under 14 years of age during school hours, unless such child is lawfully excused from school attendance.

Workmen's Compensation

One new law and a number of enactments amending existing legislation appear under this head. The Council of the Yukon Territory passed a Workmen's Compensation Ordinance (chapter 1) which, while it differs markedly in many respects from the compensation laws enacted by several of the provinces in recent years, is based upon the modern principle that a workman is entitled to compensation under any circumstances except when the injury is attributable solely to the wilful misconduct or intoxication of the workman himself. Compensation is not payable under the Ordinance unless the workman is disabled for at least 14 days from earning full wages, but where compensation is payable the amount is to be calculated from the date of the accident. The Ordinance does not establish a Workmen's Compensation Board, but provides that questions as to the right to compensation or as to the amount of compensation payable under the Ordinance are to be settled by a judge of the Territorial Court according to regulations set forth in a schedule to the Ordinance. With respect to the scale of compensation the Yukon has not followed the practice established by Ontario, Nova Scotia, British Columbia and

Manitoba. The Ordinance does not provide for periodical payments in case of death or total disability, but fixes lump sums of $2,500 as compensation in the former case, and of $3,000 in the latter event. Lump sums varying in amount from $150 to $2,000 are also provided for certain specified injuries causing permanent partial disability. The only periodical payment under the Act is for temporary disability when the workman is to receive a weekly payment equal to 50 per cent of his daily average wages, but it is provided that the period for such payment shall not exceed six weeks. The Ordinance does not make provision for medical aid nor does it apply to industrial diseases.

Probably the most important amending Act was that passed by the Ontario Legislature. In addition to making a number of minor changes in the principal Act, the amendment adds new sections which make specific provision for medical aid. Workmen are now entitled to medical aid and hospital service made necessary by an injury, for one month from the time such injury is received. In industries included in schedule 1, the board is to furnish or arrange for such aid; while in industries in schedule 2, the responsibility rests upon the individual employers. No contribution towards the medical aid provided is to be collected from employees by the employer. Arrangements other than those provided by the statute may be approved by the board if they are not less favourable to the workmen. The amendment also adds miners' phthisis to the list of industrial diseases to which the Act applies. An amendment to the Northern and Northwestern Ontario Development Act extends the benefits of the Ontario Workmen's Compensation Act to workmen employed in any work undertaken under the Development Act.

Two regulations, numbers 87 and 88 were passed by the Workmen's Compensation Board of Ontario during the year. Number 87 re-enacts regulation 51 which penalizes employers who delay in paying assessments. Regulation 88 was passed under the authority of section 44a, one of the new sections respecting medical aid added to the Workmen's Compensation Act by the amendment noted above. The regulation in question directs that every employer who has from 15 to 300 workmen usually employed shall provide and maintain in his establishment a first aid kit, which shall contain certain specified articles and be in charge of some suitable person. Where more than three hundred workmen are usually employed the employer is required to have an emergency first aid room, equipped according to specifications, in charge of a person who has taken a first aid course. The regulation also requires that crews in charge of vessels and railway trains shall be provided with minimum first aid kits.

Two chapters of the Nova Scotia statutes amend the Workmen's Compensation Act of that province. The first amendment makes a number of minor changes in the Act, and the second fixes $5 per week as the minimum compensation in case of permanent total disability, unless the workman's earnings average less than that amount, when compensation shall be an amount equal to the average earnings. The amendment also provides for the payment of compensation to an invalid child without regard to age.

By an amendment to the New Brunswick compensation law the maximum compensation for fatal accidents is raised from $2,000 to $2,500 and the maximum weekly payment in cases of total or partial disability from $12 to $16. Other minor changes were also made. Another New Brunswick statute (chapter 35) enlarges the powers of the commission appointed at the beginning of 1917 to inquire into the working of the Ontario and Nova Scotia Workmen's Compensation Acts by authorizing inquiry into any legislation on the subject. To assist the commission in making its inquiry, the Act directs employers to file with the Provincial Secretary-Treasurer certified copies of their pay rolls.

In Manitoba an amendment to the Workmen's Compensation Act brings certain industries within the operation of Part I of the Act, while certain other industries are excluded.

The workmen's compensation law of Saskatchewan was amended at both sessions of the Legislature. The amending Act passed at the first session allows indebtedness incurred for care and treatment in a hospital receiving provincial aid to be set off against compensation recoverable under the Act. The amendment of the second session added a new section respecting cases where settlement of the claim for compensation has been agreed upon either before or after the commencement of an action.

Examination and Licensing of Workmen

Laws regulating chauffeurs are the most numerous under this head. Amendments to the Motor Vehicles Acts of Nova Scotia and New Brunswick include minor changes respecting the licensing of chauffeurs, and in Saskatchewan earlier legislation on the subject of motor vehicles was replaced by a new statute (chapter 42). The Saskatchewan Act provides for the licensing of chauffeurs, and prescribes 18 years as the minimum age, with the proviso that an applicant under the prescribed age, but over 16, who proves by a special examination test that he is skilled and capable, may be granted a license. A licensed chauffeur must wear the numbered badge issued to him by the Provincial Secretary's department.

The licensing of electricians is the subject of a law enacted by the Manitoba Legislature (chapter 29). A board of examiners is to be appointed by the Lieutenant-Governor in Council, upon the recommendation of the Minister of Public Works. All electrical contractors and journeymen will be examined by the board, and licenses will be issued to them upon their qualifications being established. Certain certificates issued under the Steam Boiler Act entitle the holders to perform journeymen electricians' work on the premises where they are employed as stationary engineers. Special licenses may also be issued to workmen engaged in repair or maintenance work on electrical equipment in some particular industrial establishment.

The examination of mine workers of certain classes is treated by two provinces, Nova Scotia and Saskatchewan. The Coal Mines Act of the former province is amended in respect to the appointment of examiners for ascertaining the fitness of applicants for certificates of competency as managers, underground managers and overmen. The new Mines Act of the latter province makes a change in the system of exam-

ination for managers', pit and fire bosses' certificates. Formerly the examination was conducted by a board of examiners and no appeal from their decisions was allowed. Under the new system the examination will be conducted by one of the government mining inspectors, and a dissatisfied candidate may appeal to the Minister.

Employment Offices

The Ontario Legislature passed a new Act (chapter 37) replacing a statute passed in 1914 which had not been brought into operation. The earlier Act applied only to private employment offices charging a fee for service, whereas the new law applies also to voluntary employment agencies which charge no fees. The Act provides for the issuing of licenses by the Superintendent of the Trades and Labour Branch instead of by the Provincial Treasurer as formerly, and empowers the Lieutenant-Governor in Council to make regulations respecting a number of matters connected with the conduct of employment agencies. Regulations already passed under the authority of the Act relate to a number of different points. The fee for a license to a private employment agency is fixed at $25, and to a voluntary or municipal agency at $1, and security to the amount of $200 must be given for the observance of the Act and the regulations. The maximum charge for securing employment for any person is fixed at $1, and the same maximum is set for the fee charged an employer for each employee secured. Provision is made for refunding fees under certain conditions. The forms used by employment agencies must be filed with and approved by the Superintendent, who may direct changes in any form of contract which he considers unfair or oppressive. Employment agencies must make returns to the Trades and Labour Branch, and the Superintendent, or any inspector appointed upon the recommendation of the Minister of Public Works, may hold an inquiry into the operations of any employment agency.

The Department of Labour created by chapter 32 of the British Columbia Statutes is charged with the establishment and maintenance of employment bureaus.

Under this head may be noted also the Returned Soldiers' Employment Act passed by the Saskatchewan Legislature (chapter 30), although the text of the Act is not reproduced. A commission named in the statute is charged with the duty of making an industrial and commercial survey of the available sources of employment for returned soldiers, and of arranging for placing them through the medium of soldiers' aid leagues, employment bureaus and other agencies. Another type of legislation concerning returned soldiers which bears very indirectly upon the subject of employment is found in acts such as chapter 185 of the Nova Scotia Statutes. This Act incorporates a returned soldiers' association, which has as one of its objects to ensure that employment will be provided for returned men.

Accidents

Provisions on this subject occur chiefly in legislation respecting factories, mines, railways and workmen's compensation. The Factory Act passed by the Alberta Legislature (chapter 20) requires notice of accidents, explosions and deaths. When an employee is prevented from

working for more than six days as the result of an injury sustained in a fire or accident, the employer must send a written notice of such accident to the Chief Inspector immediately after the expiration of the six days. When an explosion occurs, however, whether any person is injured or not, or when any person is killed or fatally injured, notice of such explosion, death or injury must be sent within 24 hours.

The Saskatchewan Mines Act (chapter 10), which repeals the Coal Mines Act, reproduces those sections of the earlier Act which dealt with the reporting of accidents with practically no alteration. All accidents must be reported to the secretary of the Bureau of Labour by the owner, agent or manager of the mine, within 24 hours of their occurrence. If death occurs after notice has been given, a further notice must be forwarded.

An amendment to the Dominion Railway Act adds to the section which requires that notice of accidents shall be sent to the Board of Railway Commissioners a further requirement that a conductor or other employee making a report of an accident to the company shall notify the Board of such accident by telegraph as soon as possible after the occurrence of the same.

Civil Rights of Employees

New sections are added to the Saskatchewan Election Act enabling railway employees, commercial travellers and other persons whose absence from their place of residence is necessitated from time to time by their employment to vote at provincial elections. Special polling places are to be open from 7 to 10 o'clock in the evening on the three days before the day of the election, for the use of those voters who declare that they expect to be absent in the course of their employment from their regular voting places on the day of the election. Another section of the same amending Act declares that polling day is to be a public holiday after 1 o'clock in the afternoon, and an amendment to the Manitoba Election Act makes a similar provision for that province.

Vocational Training

The only legislation on this subject was an amendment to the School Grants Act of Saskatchewan. Districts establishing industrial evening schools, in which persons employed during the day may be instructed in the trades or occupations with related instruction in other subjects, as provided for in the School Act, are to be encouraged by an annual grant equal to 40 per cent of the cost of tuition up to a maximum of $250.

Mothers' Pensions

There are only two enactments on this subject to be noted. Saskatchewan followed the example set in 1916 by Manitoba and passed a Mothers' Pensions Act closely resembling that of the latter province. Manitoba amended the section of the Mothers' Allowance Act which deals with the levy upon the municipalities for part of the moneys required for the purposes of the Act.

Co-operative Associations

Alberta amended the section of its Co-operative Associations Act which outlines the procedure for the incorporation of an association. The number of persons necessary for incorporation is raised from seven to 20, and the clause inserted in 1916 requiring the holding of a

public meeting in connection with the formation of a society is struck out.

Loans and Financial Aid for Settlers

As in 1916, laws on this subject are mentioned because of their bearing upon the problem of the re-absorption of returned men into civil life.

The most important enactment was the Soldier Settlement Act (chapter 21) passed by the Parliament of the Dominion. The Act in question provides for the appointment of three commissioners, upon whose request the Minister of the Interior may reserve Dominion lands. Returned soldiers may be granted free entry on such land under conditions to be determined by the Governor in Council. The Board is empowered to make loans to such settlers, to provide for agricultural instruction for returned soldiers, and to make regulations respecting settlement, subject to the approval of the Governor in Council.

Prince Edward Island enacted legislation (chapter 4) with a view to organizing and preparing land for settlement by returned soldiers.

Ontario passed the Returned Soldiers' and Sailors' Land Settlement Act (chapter 13), which is to be read as part of the Northern and Northwestern Ontario Development Act. The Lieutenant-Governor in Council may set apart and appropriate land suitable for settlement by returned soldiers and sailors, and may make regulations concerning such settlement. Among the subjects enumerated upon which regulations may be made are instruction depots, farm colonies, loans to settlers, co-operative arrangements, and the erection of churches and schools.

The Legislature of British Columbia enacted the Land Settlement and Development Act (chapter 34) to promote increased agricultural production. The Act creates a Land Settlement Board with wide powers respecting land development, land settlement and agricultural loans. Section 45 provides that a returned soldier of any rank on his first purchase of land from the Board shall be entitled to an abatement of five hundred dollars on the purchase price. The Act is to come into force upon proclamation by the Lieutenant-Governor. The Soldiers' Homestead Act, 1916, was repealed, and in the repealing Act it was provided that no volunteer or reservist who was an applicant for the purchase of Crown lands on August 4, 1914, should lose his right to obtain a Crown grant on account of failure in the payment of purchase moneys, interest or taxes during the war or for six months after its termination, provided a notice of the land applied for is filed in the Department of Lands.

The text of these laws is not reproduced.

RECENT LEGAL DECISIONS AFFECTING LABOUR

A WORKMAN engaged on the erection of a building in Montreal was killed by an elevator which was used for the hoisting of material, and his widow sued his employers for damages on account of his death. The evidence showed that the deceased, who was assistant foreman on the fourth floor, rang the bell for the elevator, and it was set in motion by the engineer in charge in the basement. While it was rising, another employee in a higher storey called down to the deceased. The latter put his head into the well of the elevator in order to answer his fellow employee, and in doing so, he neglected to ring the bell a second time as a signal to the engineer to stop the elevator. As a consequence it struck him on the head and killed him.

By French law the custodian of an object that causes damages is presumed at fault

The claim of the plaintiff was based on

Articles 1053 and 1054 of the Civil Code of Quebec, which are in part as follows:

1053. Every person capable of discerning right from wrong is responsible for the damage caused by his fault to another, whether by positive act, imprudence, neglect or want of skill.

1054. He is responsible not only for the damage caused by his own fault, but also for that caused by the fault of persons under his control and by things which he has under his care; . . . Masters and employers are responsible for the damage caused by their servants and workmen in the performance of the work for which they are employed.

The trial judge of the Superior Court found that the death of the plaintiff's husband was ascribable solely to his own imprudence. The Court of Review reversed this judgment and assessed the damages at $8,000. The Court of King's Bench reduced the damages, holding that there was contributory negligence on the part of the deceased. Both sides appealed to the Supreme Court of Canada against this judgment. It was pointed out that according to French jurisprudence in the case of an accident caused by an inanimate object, there is a presumption of fault in respect to the custodian of this object, and the burden of proof lies upon him. In the present case, the fellow employee of the plaintiff's husband was held to be partly to blame for the accident in calling to him when the elevator was in motion, and for this reason the defendant company was liable. The deceased workman, however, was held to have been also guilty of imprudence, but this fault was not the only one which contributed to the accident. The Supreme Court accordingly upheld the judgment of the Court of King's Bench and dismissed both appeals with costs. (*Canada — Norcross Bros. Co. v. Gohier.*)

A member of I. C.R. Employees' Association is bound by its rules and cannot claim damages from Government for accident after accepting allowance from Association

A labourer employed on the Intercolonial Railway sought by petition of right to recover damages in the sum of $10,521 for the loss of an arm through an accident sustained while he was at work. On behalf of the Crown, the plea was set up that the suppliant being a member of the Intercolonial and Prince Edward Island Railways Employees' Relief and Insurance Association, it was relieved by the rules and regulations of that association, and by the suppliant's agreement on becoming a member thereof, of all liability for the claim. This plea was upheld by the Court and the action was dismissed. In the judgment of the Court it was pointed out that at the time the suppliant entered the employ of the railway he was given a booklet intituled "Intercolonial and Prince Edward Island Railways Employees' Relief and Insurance Association, Rules for the guidance of members of the Temporary Employees Accident Fund." He signed a document acknowledging the receipt of this booklet, and agreeing to be bound by and to abide by the rules and regulations of the association, as a condition to his employment. Furthermore, after the accident he was paid and received a certain weekly sick allowance during 26 weeks from the association, and the receipts for these allowances contained the words "as full of all claims against said association on account of injury to arm . . . in accordance with constitution, rules and regulations." Among the rules is the following:

Rule 3.—In consideration of the contribution of the Railway Department to the association, the constitution, rules

and regulations, and future amendments thereto, shall be subject to the approval of the chief superintendent, and the Railway Department shall be relieved of all claims for compensation for injury or death of any member.

It was held by the Court that such contract of service is perfectly valid and is not against public policy. The suppliant having accepted the weekly allowance and given his receipt therefor in the manner described above, he was estopped from setting up any claim inconsistent with those rules and regulations, and was therefore precluded from maintaining this action. (*Canada—Gagnon vs. The King.*)

Window cleaners must be given safety guards on public buildings, but cleaner is negligent if he does not ask for them

A man engaged in cleaning a window of an hotel in Montreal, without using a safety appliance, fell and injured his feet. He sued the hotel company for $3,000, basing his demand on the defective state of the window, and on the failure on the part of the defendant to furnish him with proper appliance and safeguards for his protection. The defendant company claimed that the plaintiff had engaged himself as an experienced window cleaner, and that if he sustained any injury, it was due to his own fault and negligence. The action was dismissed by the Superior Court, and the plaintiff appealed to the Court of Review. In the judgment of the Court of Review it was declared that when the plaintiff was put to work no instructions were given to him as to using the safety guards. It was admitted at the argument that the safety guards kept in the store-room of the hotel do not comply with the requirements of section 68 of the regulations concerning public buildings in the province of Quebec, which reads as follows:

"68. In public buildings generally, people having to do the cleaning of windows from the outside must use a platform balcony solidly built and fit to prevent the fall of persons or objects." It was the opinion of the Court that the company defendant was bound to supply such safety appliances and give the necessary instructions to its employees. Knowing the danger of this kind of work, the plaintiff should have asked the defendant to supply him with safety appliances. In doing the work as he did he took a certain amount of risk, and in the opinion of the Court he also was negligent. It was therefore declared that the accident was due to the common fault of both plaintiff and defendant. Damages for which the company defendant was responsible were assessed to the sum of $1,500. *Quebec—Johansen v. The Windsor Hotel Company.*)

REVIEWS

UNITED KINGDOM.—Annual Report of the Chief Inspector of Factories and Workshops for the Year 1917. 24 pp.

Factory Inspection in Great Britain

THE Report of the Chief Inspector of Factories and Workshops for Great Britain for 1917 touches upon many important phases of war work. Most of the time of the staff devoted to special work arising out of the war was occupied in dealing with applications for emergency orders, and investigations into conditions of employment and processes with a view to the substitution of women for men. The Dangerous Trades Inspector devoted most of his time to the ventilation of aeroplane factories in order to minimize the injurious effects of the fumes in the doping rooms. The electrical inspector reports that there has been an enormous increase in the

use of electrical energy during the war. A new feature of this industry is the employment of women in electrical stations either as general cleaners or assistants on switchboards. In some substations women are in sole charge of the plant, running the motor generators or rotary converters, with the accompanying switching and regulating duties. This work, however, is regarded as more suitable for men, and disabled sailors and soldiers are being trained for it, a number being already so employed. Further trade conferences were held with employers and workers for the release of men for army or national service and the substitution of women in several industries.

The enforcement of welfare conditions in factories is now part of the ordinary duty of the staff. After conferences with employers' and workers' representatives, orders were made requiring the provision of: (1) protective clothing and cloak and messroom accommodation in factories in which the manufacture of tin or terne plates is carried on; (2) a supply of drinking water in all factories and workshops in which 25 or more persons are employed; (3) first-aid boxes, and, in some cases, ambulance rooms in blast furnaces, iron mills, and other metal works. The importance of securing competent welfare supervisors is increasingly recognized by occupiers of factories and workshops, and following a conference at the Home Office with educational authorities special courses of training for this kind of work have been started in many of the large industrial centres.

Special reports are appended to this report, dealing with Hours of Work and Emergency Orders, Extent and Effect of Substitution of Women and Girls in Industry, Doping in Aircraft Works, and Trinitrotoluene Poisoning.

United States.—Mortality From Respiratory Diseases in Dusty Trades (Inorganic Dusts). By Frederick L. Hoffman, United States Department of Labour, Bureau of Labour Statistics, Bulletin No. 231. 458 pp.

Mortality from lung diseases in dusty trades

The mortality of workers in dusty trades from respiratory diseases caused by the inhaling of inorganic dust is the subject of a report recently issued by the United States Bureau of Labour Statistics. It is stated that the continuous and considerable exposure of workmen to the inhalation of metallic dust is generally recognized by authorities on occupational diseases as probably the most serious health hazard, with particular reference to liability to pulmonary tuberculosis and non-tuberculous respiratory diseases. Statistics of the United States Census for the years 1908 and 1909 show that among workers exposed to metallic dust 21 per cent of deaths from all causes were from pulmonary tuberculosis, whereas the percentage was 14.9 for all occupied males and only 8.7 for farmers, planters and farm labourers. In occupations where there is exposure to mineral dust there appears to be less liability to pulmonary tuberculosis, but more liability to other respiratory diseases, particularly asthma and bronchitis. The greatest mortality from respiratory diseases is found in occupations where the dust is composed of hard, sharp particles, which cut and irritate the lung tissues and thus provide a lodgement for germs. The most unfavourable occupations from this point of view are those of brass workers, metal grinders, printers, including lithographers and pressmen, and engravers.

Of the occupations in which there is exposure to mineral dust, those in which the dust is composed of particles of silica show the greatest mortality from diseases of the lungs. In the cement industry and in coal mining there is a remarkably low death rate from pulmonary tuberculosis.

The report concludes with a quotation from a recent circular of the United States Bureau of Mines on "How a Miner Can Avoid Some Dangerous Diseases," in which is emphasized the importance of guarding against the breathing of dust by using water when drilling and by wearing respirators. It is observed that these recommendations apply to a large section of the mining population and to men employed in metallurgical industries. In a broader sense, however, all inorganic dust in industrial occupations demands the most effective safeguarding of employees against unnecessary hazards to health and life. What has thus far been done has unquestionably resulted in far-reaching benefits to the wage-earners, but much more is required if the excessive mortality from lung diseases in the dusty trades is to be materially reduced.

THE

LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.
DEPUTY MINISTER—F. A. ACLAND.
EDITOR OF 'THE LABOUR GAZETTE'—BRYCE M. STEWART.

Volume 18 NOVEMBER, 1918 Number 11

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

The percentage of unemployment among the members of trade unions at the beginning of October was 0.72 as compared with 1.7 at the same time last year, and 0.5 at the beginning of July, 1918.

During October the labour market was disturbed by the influenza epidemic, which caused both employment and unemployment. Apart from this, however, while there was a general demand for labour, it was not so pronounced as in the preceding months. In civic employment a slight decline was noted in comparison with September and a larger decline in comparison with October, 1917.

The time loss on account of industrial disputes during October was less than during September, but greater than in October, 1917. There were in existence during the month 25 strikes, affecting 4,801 workpeople and involving a time loss of 65,969 working days.

The average cost of the weekly budget of staple foods increased during the month, the October figure being $13.54 as compared with $13.31 in September, 1918, and $7.99 in October, 1914. The index number of wholesale prices rose from 285.3 in September to 289.6 in October, while the index number for October, 1914, was 139.0.

Proceedings under the Industrial Disputes Investigation Act

During the month of October the Department received reports from nine Boards of Conciliation and Investigation appointed to inquire into disputes affecting (1) The Canadian Northern Railway Company and its clerks, station employees, etc.; (2) The Winnipeg Electric Railway Company and its machinists, blacksmiths, electricians, trackmen, carpenters, painters, car cleaners, switch greasers, specialists, and helpers to these crafts; (3) The National Manufacturing Company, Limited, Ottawa, and certain of its employees; (4) The Canadian Express Company, and certain of its employees; (5) The Winnipeg Electric Railway Company and its conductors, motormen, etc.; (6) The Bell Telephone Company of Canada, Toronto, and its operators, clerks, messengers. etc.; (7) The John Inglis Company, The Polson Iron Works and The Canadian Allis-Chalmers Company, Toronto, and their boilermakers, iron shipbuilders, etc.; (8) The Nicholson File Company, Port Hope, Ontario, and certain of its employees; and (9) The British Chemical Company, Trenton, Ontario, and its carpenters and millwrights. A report was received from the Board of Appeal to which had been referred the dispute between certain

firms in Toronto, being members of the Employers' Association of Toronto, and various classes of their workmen; also a report from the Royal Commission established under the Inquiries Act to inquire into alleged unrest existing in the Province of Quebec between various firms engaged in the shipbuilding industry and their employees, with special regard to wages, working hours, overtime and other conditions of labour.

Six applications were received for Boards, and three Boards were established in connection with applications which had been received during the previous month.

Peace and the food supply

In a recent statement, the Canada Food Board points out that the declaration of peace will not add one ounce of food to a hungry world, but rather, that it will increase the claims on this continent to share what it has with others. The Allies have announced their intention of co-operating with Germany, Austria, Turkey and Bulgaria in making available, as far as possible, supplies of food and other necessaries for the lives of the civilian population of those countries. Besides these, there are in Poland, in the Balkans and in Russia, other millions of people at present on the verge of semi-starvation.

Only a part of the Allied shipping will be free for many months to come to make the long voyages to Australia, New Zealand, South Africa, India and to Argentina, where there are undoubtedly stocks of food. Repatriation of troops, which cannot be made to any great extent for some time to come, will take up for two years an incredible part of Allied shipping. No more vessels will be detached than are imperatively necessary for the distant voyages. "The North American route," says the Canada Food Board, " must remain the great canal of food supply for the whole world."

Classification of Luxuries for Purposes of Taxation

Last April, a Select Committee of the British House of Commons was appointed to consider and report what articles and places ought respectively to be classed as articles of luxury and places of luxury for the purposes of taxation. The Committee presented its report in August, and it has since been issued as Parliamentary Paper (101). The Committee began by taking the French Lists A and B (translated in the White Paper No. 57, 1918), which classify articles of absolute luxury under 26 heads, and articles with a price limit under 77 heads. In conformity with this plan, the Committee drew up two schedules, of which Schedule A contains a list of articles considered as essentially luxuries without regard to price, and Schedule B articles which should be considered luxuries and subject to duty if above a certain price. Although not strictly "articles of luxury," there are included in Schedule A rents for shooting, fishing, etc., and in Schedule B payments for hairdressing, etc., exceeding a specified amount, as, in the opinion of the Committee, these should also be subject to a luxury duty. The articles to be included in Schedule B were divided into four groups: (a) Articles used chiefly by men; (2) articles used chiefly by women; (3) furniture and household articles; (4) objects of art, fancy goods and miscellaneous articles. Each of the groups was assigned to a sub-committee, and a number of women were invited to serve on the sub-committees.

The expression "places of luxury" in the terms of reference was held to refer to hotels, restaurants and other places where meals and accommodation of a temporary character are provided. It was the opinion of the Committee that, apart from the taxation of certain occupied rooms, it would be better, in the interests both of the revenue and of all concerned to tax the articles consumed rather than the places of consumption.

Under Schedule C of the Report is given a list of articles that should be exempt from the tax, although falling within the previous schedules. These include articles purchased by or for museums, art galleries or public libraries, articles for the entertainment of or use by forces of the Crown, and any instrument or apparatus for use in any business, trade, or profession.

Dominion Power Board created

In order that the water-power resources of Canada may be developed to the greatest advantage in the future, a Dominion Power Board, under the chairmanship of the Minister of the Interior, has recently been created by the Government. The functions of the Board will be as follows:

1. Collecting and systematizing all the information available in the various Government departments regarding the fuel and power resources of Canada.

2. Obtaining, where practicable, through existing organizations and elsewhere, such additional information as may be found necessary to supplement that which is already available.

3. Studying all such data with a view to making from time to time, appropriate recommendations respecting the most advantageous use of the fuel-power resources of the Dominion, including water-powers on boundary rivers.

4. Consulting with responsible bodies and persons carrying on water resources of power investigations in Canada, with a view to bringing about united effort and mutual co-operation.

5. Making a systematic study with a view to co-ordinating, as far as possible, all work now carried on respecting water and fuel resources, and all related investigations, so as to avoid overlapping of effort and to make the results available to the interested public in the most acceptable and economical manner.

6. Conferring with and, where necessary, securing the advice or assistance of—

(a) Power or fuel producing interests.

(b) Specialists or experts in the development or use of power whether produced from one or another agency.

(c) Provincial or Dominion commissions, councils boards, or officials interested in one or another of the various power producing agencies.

7. When necesary for the consideration of any particular problem, appointing, with the consent of the Minister of the Interior, assessors who shall, in connection with any such particular problem, represent Provincial departments, Dominion, Provincial or Municipal commissions, councils or boards, and power producing interests.

8. Reporting, from time to time, progress and results of their work to the Minister of the Interior, who shall be Chairman of the Board.

Government Grants to Unemployed in Switzerland

The Federal Council of Switzerland issued a Decree, in August last, concerning the payment of compensation to workpeople in private industrial undertakings in respect of unemployment resulting from economic conditions arising out of the war. The provisions of the Decree are summarized in the British *Labour Gazette*, as follows:

Where it is necessary to restrict the output of a factory or workshop the employer must, if possible, reduce the length of the working day or in some way re-organize the work rather than discharge his workpeople.

If the time lost owing to such reduction does not exceed 5 hours weekly, or 10 per cent of the normal working hours, the employer is not required to pay compensation. Should the working-day be reduced by an amount which exceeds these limits and yet be not less than 60 per cent of its normal length, the employer is required to add to the normal wage for the work actually per-

formed a sum equal to 50 per cent of the wage for the time lost. When the working hours are reduced to less than 60 per cent of the normal, or when the factory or workshop is closed down, the worker is to receive, in addition to his pay for the time actually worked (if any), compensation for a period equal to 50 per cent of the time lost (after deduction of the 10 per cent referred to above). In this case the provision is made that the total wage paid shall not be less than 60 per cent of the normal full wage, or if the worker is married and has not received public relief, not less than 70 per cent. One-third of the cost of compensation in such cases will be defrayed by the employer, one-third by the Canton in which the worker resides, and one-third by the Federal Government.

The Decree makes provision for the settlement of disputes concerning the obligations of employers or the rights of workpeople.

* * *

Maternity and Child Welfare

According to the 1916-17 report of the Local Government Board in the United Kingdom, much progress was made in that country during the year in the adoption and development of schemes for safeguarding the health of expectant and nursing mothers and infants and young children. The importance attachnig to home visiting in maternity and child welfare schemes is indicated in the report, from which the following paragraphs are taken:

At the end of the year the councils of nearly all the large towns and 51 of the 61 county councils outside London had made some provision for home visiting. In 41 of the 51 county councils referred to, the schemes cover the whole county except the districts with separate local schemes, and some of the remainder are considering the question of extending their schemes to areas not hitherto covered either by a county scheme or by local schemes. The only large boroughs in the case of which we have been unable up to the present to induce the local authority to make such provision are Camberwell, Gateshead, Heywood and Peterborough.

The number of health visitors appointed by local authorities rose from 600 in March, 1914, to 812 at the end of 1915, and to 1,445 at the end of February, 1917. In addition, health visiting is undertaken on behalf of county councils by about 800 district nurses under arrangements with nursing associations. According to our information, the number of salaried health visitors appointed by voluntary societies at the nd of 1916 was 136. Substantial progress has thus been made, but a large additional number of health visitors is still required to provide what we regard as an adequate service for the whole country.

There has also been a rapid increase in the number of maternity and child welfare centres, and up to March, 1917, we had information as to 396 municipal and 446 voluntary centres. There are still several thickly populated areas in which a centre is needed, and in these cases we are urging the local authority to supply the need. In some districts the system of centres has been developed so as to provide one centre and one health visitor for each area with about 500 births per annum. We are glad to report that a number of county councils are now making arrangements, in consultation with the county nursing associations, for placing trained midwives in districts at present without such service, and we hope that by this means a complete midwifery will be provided in the rural as well as in the urban areas of England and Wales.

During the past year we made grants in respect of Maternity and Child Welfare Schemes amounting to about £68,000, viz., £48,000 to local authorities and £20,000 to voluntary agencies, as compared with £42,000 in the previous year, viz., £35,500 to local authorities and £8,500 to voluntary agencies. The work is hampered by the fact that the powers

of local authorities in England and Wales are more limited than the powers of local authorities in Scotland and Ireland.

* * *

Child Labour in the United States

According to official and semi-official reports, there has been a very considerable increase in the use of child labour in the United States since last June, when the Federal Child Labour Law, 1916, was declared to be invalid (See LABOUR GAZETTE, July, 1918, p. 469). It is estimated that in the state of Maine the number of employed children between fourteen and sixteen years of age is between two and three times that of last year; while in Missouri more permits were issued in one week in June, 1918, than during the entire month of June, 1917. The same condition exists in many, if not all, of the other states. This is attributed to a number of causes, among which are the high cost of living and the high wages due to war conditions. In some cases the necessity of parents, and in others, their cupidity, has been the cause of forcing children into employment unsuited to their years and physical conditions. There is also, undoubtedly, a praiseworthy, though ill-advised desire on the part of many children to be doing a man's work and helping out in the war work of the nation.

Some months ago the War Labour Policies Board placed the Government's stamp of disapproval upon employers and industries that use child labour for profit. It lately became necessary, however, for the Department of Labour to reiterate the Board's ruling on this point, which is as follows: (1) No child under fourteen years of age shall be employed on war work; (2) no child between fourteen and sixteen years of age shall be employed more than eight hours a day, nor before 6 a.m., nor after 7 p.m., nor more than six days a week on war materials. The Department of Labour adds:

"The prohibition of the employment of children below certain ages does not mean that the employment of children above those ages is favored. To recruit children of fourteen or sixteen years of age for industry is ignoring their future value as trained workers. Neither the patriotic desire to serve immediately, nor the attraction of high wages should draw children from school to work.

"Children above the minimum ages of permitted employment must still be considered as potential citizens, and not merely as present producers. The sacrifice involved in the premature labour of children is not yet necessary. The curtailment of non-essential industry and the employment of men and women not now productively engaged, will undoubtedly prove sufficient to care for the requirements of the conduct of the war.

"In order to satisfy the claims of the future, the maintenance of present educational and child-labour standards is indispensable. The formative years of youth should be safe-guarded by purposeful training of developed usefulness in the nation. The time is not yet in sight when the defence of the nation must be assumed by children. The men and women of America are competent to the task."

Some protest has been made to the ruling of the War Labour Policies Board on the ground that the Board is exceeding its administrative powers in arbitrarily fixing labour standards which Congress itself has been unable to do. The Federal Child Labour Law, 1916, was repealed by the Supreme Court on a point of constitutional law; but nobody regretted its repeal more than the judges themselves. The new Keating bill, designed, as far as possible, to take its place, is in the nature of an emergency measure. This bill, which has the approval of President Wilson and is now in the committee stage, will, if passed, supplement the ruling of the War Labour Policies Board by forbidding child labour under its standards not only in Government work, but in

all factory work, and in mines and quarries throughout the country. Its enforcement will be in the hands of the Child Labour Division of the Department of Labour. It re-establishes the standards of the repealed law by direct prohibition of Congress through the auhtority conferred upon it in its relations to war matters. It will establish a minimum standard for all the states, "for the purpose of conserving the man power of the nation and thereby more effectively providing for the national security and defence." It is claimed for the bill that it will effectively control the "premature and excessive" employment of children during the war, and for six months after, during which time a careful study could be made of the whole situation as a basis for permanent legislation.

How Bloemfontein relieves the housing shortage

The Canadian Municipal Journal printed in its August, 1918, issue a letter from the town clerk of Bloemfontein, South Africa, in which are given many interesting details in reference to the action taken by the Town Council of Bloemfontein to meet the demand for workers' dwellings within the district. Following the boom days a housing shortage, which began to make itself felt in 1908, had gradually become a serious problem. The district needed to retain its workers and the working population needed houses. But the speculative builder no longer considered house property an attractive investment, so that public action in the matter became necesary.

The town council of Bloemfontein had its accumulating sinking and depreciation funds to invest and, instead of buying up its own four per cent stock, decided to make loans to municipalities, farmers, and to citizens of the town on first mortgage on the homes that the loans would enable them to build. At first large margins were insisted on, but it was soon realized that this would not help the artisan and the clerk in steady employment but with small savings, the class who most felt the scarcity of housing. In order, then, that the loans should be available for service where most needed, the present scheme was developed, which is as follows: (1) The applicant provides the ground on which the home is to be built; (2) The Council advances the amount of the building at seven per cent per annum, payable monthly, to be reduced to six per cent when the loan has been partly redeemed; (3) The loan shall be redeemed at the rate of five per cent per annum payable monthly. In this way the interest and redemption are paid monthly as if they were rent.

In the past seven years, according to the letter, over £160,000 ($800,000) has been advanced in Bloemfontein, of which amount nearly £60,000 ($300,000) has been repaid. There are no bad debts or arrears of interest. The difference of one per cent in the amount of interest charged has been treated as a reserve against possible bad debts, and amounts now to nearly £4,000 ($20,000). The success of the scheme is said to be in the monthly payment, which, in most cases, is paid by the wife as a part of her household expenses. In encouraging the erection of such houses the Council realizes that it means another rate account, and another water and light consumer.

Stimulated by the success of the scheme the Council has gone further. For the benefit of those labourers who have no savings of any kind and whose wages will merely procure a bare means of existence, decent housing for whom private enterprise has always failed to provide, the Council has erected for modest rental a number of two-roomed and three-roomed sottages. It is proposed to erect more of this type of cottage, while a further scheme is under consideration to erect four-roomed houses, 20 at a time, thereby reducing the cost of each, and to hand them over to citizens in return for a first mortgage and payment for the land.

Land settlement for soldiers and sailors in Great Britain

In July, 1915, the president of the Board of Agriculture and Fisheries in the United Kingdom appointed a committee to report what steps should be taken to promote the settlement on the land of discharged soldiers and sailors. The committee accordingly presented a report (Cd. 8182) in which it was recommended that the State should provide land for all suitable ex-service men who may desire fully equipped and self-supporting "small holdings". Emphasis was placed on the adoption of the Colony system, as it was only on grouped holdings that the very necessary expert agricultural advice and business organization on co-operative lines—the most essential part of the scheme — could be provided. These recommendations were adopted by the Government, the small Holding Colonies Act was passed in August, 1916, and a Land Division of the Board of Agriculture and Fisheries formed to acquire land suitable for the purpose of providing "experimental small holding colonies" during the war and for twelve months after. During 1917, the Land Division, after careful consideration of soil and situation, cost of equipment, proximity to market and prospect of financial return, acquired four estates, three in England and one in Wales, amounting in all to nearly 6,000 acres, this being the maximum amount of acreage authorized by the Act for the time being.* Of these estates, two were leased for 99 years from the Crown, and two were purchased outright from two private landowners. For purposes of experimentation, it is proposed to devote one of the estates to corn growing and mixed farming and to work it on the "profit sharing" system; though eventually a limited number of settlers may, after serving a period of probation, be provided with separate small holdings. Another estate will be devoted to market garden crops and will be worked on the "small holding" system, provision being made for 80 holdings of ten acres each. Two other estates will combine market gardening and dairying. One will be worked on the "small holding" system, and the other, partly on the "small holding" system and partly on the "profit sharing" system. The holdings will average 20 acres in extent and suitable cottages and outbuildings will be provided under either system.

Under the "profit sharing" system the Colony will be managed by a skilled director as one farm, the settlers being employed by him at the current rate of wages for the district, but receiving in addition a share of any profits arising out of the farming operations in the form of a dividend on the amount of their year's wages. In addition each settler, if he so desires, may have about half an acre of land adjoining or near his cottage, the produce of which he will be assisted in selling. Settlers will be entitled to invest any portion of their dividends or other capital in the form of shares in the farm.

Under the "small holding" system, the Colony will begin as one large farm under the management of a Director. Selected applicants will be employed at the current rate of wages during the necessary period, at the end of which an approved applicant will be allotted, at a reasonable rent, such area of land as he appears likely to be able to cultivate successfully on his own account. But as his ability increases, and if his capital justifies it, the settler may be allotted further land from time to time. Even when all the small holdings have been taken up, a certain portion of the Colony will be retained as a Central Farm under the Director and will be equipped with sufficient machinery, implements, horses, etc., to let on hire to settlers requiring them. A co-operative depôt will be established, through which settlers will be able to purchase their requirements and dispose of their produce.

No advances of capital will be made by the State to enable settlers to take

*On June 6, 1918, a bill was passed in the third reading, increasing the limit to 45,000 acres in England and 20,000 acres in Wales and Scotland.

up holdings. But of the 178 applications for holdings considered by the Board of Agriculture during 1917, more than 70 per cent of the applicants possessed capital varying from £50 to £400. In the case of those Colonies where the Board own the freehold of the estate, holdings may be disposed of to the occupiers who may pay for them by instalments spread over a term of years.

In regard to the selection of applicants, the Colonies are not inteded to make provision for disabled men as such, but rather to ascertain by actual experiment how far small holdings grouped on the Colony system can be successfully organized. While, of course, disabled men will be considered, the first consideration must be the applicant's prospective capacity for earning a living on the land. Other conditions being equal, preference will be given to married applicants whose wives have some knowledge of farm work.

Labour Jottings

The United States Department of Labour has authorized the addition of two women, one representing management and one representing labour, to each state advisory board of the Federal Employment Service, and to each local community labour board.

The recently appointed Minimum Wage Board of British Columbia, acting under authority of section 6 of the Minimum Wage Act, 1918, recently called a public meeting at Vancouver for the purpose of hearing the opinions of those interested in the establishment of a minimum wage for women engaged in mercantile occupations within the province.

A committee has been appointed by the Spanish Ministry of Finance to work out a comprehensive economic programme, which includes (1) the purchase of the railroads and their operation by the State; (2) the utilization of the waterfalls for motive power; (3) a special mining law providing for the participation of the State in "extra profits"; (4) the creation of a national industrial bank; and (5) the rebuilding of the nation's industries.

The Third Industrial Safety Congress of New York State will be held in Syracuse, N.Y. during December 2-5, 1918. Among the subjects to be discussed are: health and safety of women in industry, safe practices in the shop, industrial good housekeeping, infection, rehabilitation of maimed workmen, safety organization, etc.

In the spring of 1917, the mine managers in the Cobalt silver area, treating with their employees individually, decided to pay a bonus of 25 cents daily above the regular wage for each ten point increase in the price of silver above 60 cents an ounce. Silver then stood at 70 cents an ounce. Since the "war time high price of silver bonus" was first paid silver has gradually risen in price until it now stands at $1.00 an ounce, as a result of which the miners are receiving $1.25 daily in addition to the regular wage.

The first conference of trade union women, called by the United States Government, recently met in session at Washington. Twenty-five women representing national and international labour organizations were present and adopted a platform of principles. It calls for a rigid enforcement of the principle of equal pay for equal work, the fixing of the minimum wage for a woman with dependents the same as that for a man, the appointment of women on all labour boards, the eight-hour day, better pay for school teachers, the enforcement of sanitary regulations, and the principle of health insurance.

The recent strike situation at the Clyde shipyards, according to a statement issued by the British Admiralty, arose out of a demand on the part of the workers for a minimum wage of £5 ($25) per week. The demand was refused by the employers and numerous shipwrights gave a week's notice of a strike. Before the expiration of that

time, however, the men made application to the Committtee on Production for a hearing on their claim. This was granted and a day was fixed for the hearing. But before the day arrived between 1,000 and 2,000 men struck work, causing a complete tie-up in the Clyde shipyards. In accordance with the invariable practice, the committee on Production could only deal with the claim when the men resumed work. The executives of the Engineering and Shipbuilding Trades Federation and the Shipwrights' Trade Union dissociated themselves from the strike and urged the men to return to work.

INDUSTRIAL CONDITIONS DURING OCTOBER, 1918

I.—GENERAL REVIEW

The Labour Market

During the month the labour market was much disturbed by the influenza epidemic, which caused both employment and unemployment. In most cases employers were endeavouring to obtain workers to replace those who were sick, but in some instances unemployment resulted through the closing, in the interest of health, of some of the larger plants and of places of amusement. The prospects of an early peace also had its effect in reducing slightly the demand for labour in war industries. The slackening in farming and ranching operations towards the end of the month released a number of men, which helped to some extent to reduce the shortage of unskilled labour in the cities. Generally, however, the demand for labour was well maintained, especially in the case of coal mines and lumber camps.

Employment was very good in all shipyards, except that at Fort William some hands were laid off owing to completed contracts. Machinists and toolmakers were being sought and employment was good in stove factories. There were a few deductions of staffs in automobile and agricultural implement plants. In the food group the flour and feed mills throughout the country were all very well employed and in need of additional help. Employment was good also in the sugar refineries and packing houses. In parts of Ontario apple pickers were in great demand. The cotton mills generally were well employed, while those at Montreal and Toronto were short of help, due partly to the epidemic. In the clothing group there was a demand for labour in the laundries and dyeing and cleaning establishments. There was some shortage in the overall and whitewear factories. The Victory Loan compaign gave considerable employment in the larger cities to job printers, engravers, and lithographers. Paper box and bag factories were busy on Christmas orders. In the woodworking group, employment was good in the piano and organ factories and very good in the coffin factories. Sash, door and planing mills were steadily engaged. In the tanneries employment was better in October than in the preceding month, and the shoe factories were in some cases advertising for help. Drug and medicine manufacturers and chemical plants were in need of additional help, due to the epidemic. In the transportation group, employment was very good on the railways and in the repair shops. Owing to the epidemic the hours of employment were very irregular and much overtime was worked to make up the labour deficiency. Liveries and garages had a very busy month owing to the number of funerals. 'Longshoremen

were well employed. In mining there was a steady demand for coal miners. The gold mines were practically closed down owing to the shortage of labour. The Cobalt silver mines, however, owing to the bonus that was being paid to workers, had practically all the labour required. Several of the lumber mills discontinued operations for the season, but there was a great demand for men for the camps. The lumber camps were especially hit by the epidemic, owing, it was said, to the lack of proper nursing and medical attendance. In the building trades employment varied, but generally the situation was not so good as in the two preceding months. The value of building permits issued in 35 cities increased from $2,690,821 in September to $2,850,428 in October, or 5.93 per cent. As compared with October, 1917, there was a decrease of 21.41 per cent.

Strikes

The loss of time on account of industrial disputes during October was less than during September but greater than in October, 1917.

There were in existence at some time or other during the month 25 strikes, affecting 4,801 workpeople and involving a time loss of 65,969 working days, compared with 30 strikes, 7,416 workpeople and 102,563 working days in September; and 21 strikes, 4,237 workpeople and 42,086 working days in October, 1917. On October 1 there were on record 17 strikes, affecting 3,715 workpeople. Eight strikes were reported as having commenced during October as compared with 19 in September; seven of the strikes commencing prior to October, and six of those commencing during October were reported terminated, leaving 12 unterminated strikes, affecting approximately 1,282 workpeople, on record at the end of October.

Prices

Prices were again upward, both the index number of wholesale prices and the weekly budget of staple foods being higher in October than in September. Grains, dairy products, fruits and vegetables, house furnishings, and raw furs were higher. In retail prices the family budget averaged $13.54 in some 60 cities, as compared with $13.31 in September and $11.81 in October, 1917. Meats were slightly lower in the average, but eggs, milk, and butter were higher. Bread, flour, rolled oats, rice, prunes, and sugar were upward, but evaporated apples and beans declined. Potatoes also advanced. In coal the average was slightly higher, but in wood there were considerable advances. In wholesale prices the index number based on the prices of 272 commodities rose to 289.6 for October, as compared with 285.3 for September, and 242.6 for October, 1917. The chief increases for the month were in the groups Grains and Fodder, Dairy Products, Fish, Fruits and Vegetables, Miscellaneous Foods, House Furnishings, and Raw Furs. There were slight decreases in Animals and Meats, Textiles, Metals, and Paints, Oils, and Glass.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

Sydney reported a slight increase over the small production of the Dominion Steel Company in September. The output for October being in tons as follows: pig iron, 24,000; rails 13,500, rods and wire products, 4,300; blast furnaces, four, as compared with 18,000 tons of pig iron and 12,000 tons of rails during September. At the Sydney Mines Plant the production of iron was 9,500 tons and steel 14,200 tons, as compared with 8,160 tons of iron and 10,300 tons of steel last month. At Halifax employment was very good in the shipyards, ship carpenters and general labourers being specially in de-

mand. Employment generally in the stove and furnace foundries and other metal industries was very good, while electrical workers continued to work overtime. Westville reported that all steel working plants were very busy during the whole month. The steelworks at Truro ran two shifts and were short of help. St. John reported that the Portland Rolling Mill was working steadily and that employment was good in the shipyards and in the sheet metal lines. Moncton and Fredericton reported that the activity of the previous month was maintained, with a steady demand for machinists. Montreal reported that the epidemic and the prospects of an early peace had resulted in a considerable curtailment of shop production. Quebec reported considerable employment in boat and shipbuilding and repairing yards, in the manufacture of stoves and furnaces, and in foundries generally. Iron workers at St. Hyacinthe had an active month. Agricultural implement plants were very well employed. At Three Rivers the steel foundry worked day and night throughout the month. The Canada Iron Foundry worked full time and the shipyards were all well employed, though in some cases the epidemic reduced the number of workers by half. At Sorel employment was steady in the metal industries. Toronto reported metal machinery industries generally active except as affected by the epidemic and the scarcity of raw material. Hamilton and Niagara Falls reported the metal trades very active with a demand for labour including, in some instances, female labour. About 500 hands were employed at the new International Nickel Co.'s refinery at Port Colborne. The Canada Carriage Company at Brockville was practically destroyed by fire, which threw about 200 workers out of employment temporarily. Kingston reported that the locomotive works needed hands and that employment was good in the shipyards. Belleville reported that employment was steady in the rolling mills and in the motor engine factories. Peterborough reported a demand for moulders and labourers in the foundries also tool makers and machinists. Galt reported continued activity in the metal group. Brantford reported that employment was good at the Waterous Engine works and the Buck stove factory. There was a shortage of help in the agricultural implement plants. Kitchener reported employment steady in the portable and stationary engine and bicycle companies, with a shortage of lathe hands in the foundries. Guelph reported a demand for moulders. At Stratford, the foundries and machine shops were very busy. Woodstock reported a continued demand for moulders and polishers at the stove factories. London reported that the rolling mills were working to full capacity and that the threshing machine manufacturers were well employed. The Ford Motor Company closed up their assembling plant until January next. The carriage, automobile and wagon works at Chatham were very quiet and the International Harvester Company ran with a reduced staff. Windsor reported that the Canadian Bridge Works ran full time on munition work, but was quiet in other departments. The Ford Automobile Company were steadily employed making tractors. The Kelsay Wheel Company, the Auto Top Company, etc., were all quiet. The machine and tool shops were well employed. One of the munition factories at Orillia closed down for a few days owing to the epidemic. Fort William reported employment good generally in this group except that the car works and shipyards, owing to completion of contracts, laid off some hands. Winnipeg reported a steady demand for workers in the metal industries. Brandon reported that the agricultural implement foundries and machine shops continued to be well employed. Medicine Hat reported the rolling mills well employed, and some improvement in metal working industries generally. Calgary reported the iron works and automobile

and motor engine firms well employed but that implement firms were quiet. The iron company at Edmonton continued to employ 40 hands. The wooden and steel shipyards at Vancouver were very active. Machine shops and auto repair shops were busy with a supply of available help equal to the demand. Electrical workers were fully employed, but structural iron workers were dull. New Westminster and Victoria reported the shipyards and machine shops working to full capacity. At Victoria, however, the non-delivery of timber at the wooden shipyards caused some temporary unemployment. In the steel shipyards large numbers of men were laid off for a week or more due to the epidemic.

Foods, liquors and tobacco

Halifax reported that bakers were fully employed, but that confectioners were quiet and that the aerated water plants were dull. The flour and grinding mills at Westville were busier than last month, though still quiet. Charlottetown reported that the food and tobacco workers were quiet. At St. John, the flour and feed mills and sugar refinery ran steadily and bakers reported business good. Breweries were active in the manufacture of two per cent beer. At Fredericton the packing houses and soft drink establishments were doing a good business. Montreal reported normal conditions in the food group, but a difficulty in the delivery of bread and milk on account of the epidemic. Quebec reported the bakeries were dull, the abattoirs active, and creameries, dairies and aerated water plants well employed. Tobacco workers were active, but brewers were dull. The flour and cereal and grist mills at St. Hyacinthe were very busy. Cigar factories were very active, but breweries were quiet. Bakers, confectioners and tobacco workers at Three Rivers reported a good month. Toronto reported the flour, feed and cereal manufacturers and the abattoirs and meat packing houses busy with large orders ahead. Employment fell off in the confectionery business, but fruit and vegetable canners were busy. Soft drink and brewery workers were quiet, but cigar factories were active. Niagara Falls reported a shortage of labour during the first part of the month in the fruit and vegetable canneries. At Kingston, the flour and feed mills, bakeries, creameries and breweries were all well employed. Belleville reported the flour and feed mills exceptionally busy in the grinding of feed. Bakeries and creameries were also well employed. The flour and feed mills and cereal companies at Peterborough were working night and day shifts, and the condensed milk factories well employed. The flour mills at Galt were advertising for help. Employment was good in the flour mills at Brantford. At Kitchener the flour mills worked full time and the Dominion Sugar Company, starting up on the 25th, employed more than 200 hands in double shifts. Help was wanted in the packing houses and bakeries and cigar factories. Guelph and Stratford reported flour and feed mills active. At London the flour mills and cereal and biscuit companies were all very active, and the cigar factories were busy. Chatham reported that owing to the excessive beet crop, the Dominion Sugar Company ran day and night and was advertising for more help. The abattoir and packing houses remained closed down. The Postum cereal company at Windsor employed a big staff, and the Stearns Company employed extra help in the chocolate department. The fruit and vegetable canneries were working overtime and advertising for help. The cigar factories were rather quiet, but the breweries were well employed. Winnipeg reported the confectioneries and creameries handicapped by shortage of sugar and cream. Employment was good in the vegetable canneries. Brandon reported the flour mills and bakeries busy, the cigar factories dull and the breweries well

employed. Moosejaw reported employment was good at the flour and feed mills and in the abattoirs. Prince Albert reported the flour mills resumed activity with the arrival of wheat and that the abattoir was very actively employed. The flour mills at Medicine Hat were working day and night. Employment was good in the flour mills, packing houses and abattoirs at Calgary. At Edmonton, the Swift Canadian Packing Company employed some 150 hands. Fernie reported slackness in the breweries, although the employees had not been reduced. Vancouver reported that the sugar refinery workers were fully employed, also workers in abattoirs and meat packing houses, but that there was no difficulty in obtaining all the help needed. Cigar makers were well employed, but a number of fruit and vegetable canning establishments closed down for the winter. New Westminster reported the abattoir running full time with a complete staff, while the evaporating plant worked in double shifts with orders for months ahead. The cigar factories provided work for all the available help. The flour and feed mills of Victoria were working to capacity, and breweries were well employed on export orders.

Textiles, cordage and carpets

Truro reported the knitting mills running to capacity, and the mattress factory working full time. At St. John, the cotton mills were steadily employed and at Fredericton they were working to full capacity. The cotton mills at Montreal reported many idle looms on account of the epidemic. Quebec reported the cotton factories very busy, and the tent, awning and sail makers active. At St. Hyacinthe, the Penman Manufacturing Company had a very busy month, several departments running day and night. The Wabasso Cotton Company at Three Rivers reported a shortage of hands. Toronto reported much overtime in the textile industry generally, with a shortage of help, due partly to the epidemic and partly to increased trade. Kingston reported that all textile factories were active and short of help. The woollen mills at Peterborough and Galt were very well employed. The cordage company at Brantford was advertising for labour. The Dominion Twine factory at Kitchener was advertising for help. Employment was good in the woollen and knitting factories and linen mills at Guelph and the carpet mills were advertising for male finishers. At Stratford, the woollen hosiery and knitting factories ran full time, and at Woodstock there was a demand for female help in these lines. The hosiery companies at London were very busy and the Helena Cotton Company was very busy. Employment was good in the woollen and textile mills at Chatham. Winnipeg reported that the bag manufacturers were working overtime and in some cases taking on extra help. The knitting factories were unable to fulfil their orders owing to shortage of material, but the staffs remained the same as last month. Business was quiet in tent and awning, but manufacturers in most cases continued to employ their hands on automobile supplies. At Edmonton, the Great Western Garment Company continued to employ some 200 hands. Vancouver reported the knitting factories well employed. The shirt and overall factories in Victoria continued to employ full staffs.

Clothing and laundering

Halifax reported employment good in the ready-made clothing establishments and steam laundries and especially good in the cleaning establishments. Truro reported that the cap factory was working with half its former staff. The clothing and fur establishments and steam laundries at St. John were reported busy. At Fredericton clothing manufacturers were looking for help. Montreal reported that as a result of the epidemic some of the clothing establishments were working with seventy

per cent of their normal staffs. Quebec reported the glove and fur factories were very busy. At St. Jean-Iberville, the Cluett-Peabody Company reported a quieter month. Toronto reported activity in this group, with a shortage of operators and hand sewers in dress and whitewear establishments. Hamilton reported a demand for labour in the steam laundries and dyeing and cleaning establishments. Kingston reported employment good in the ready-made clothing firms. The Deacon Shirt Company at Belleville was handicapped by a shortage of help. The Overall and Shirt Company at Brantford was very busy. Kitchener reported the shirt, collar and whitewear establishments very busy. London reported that the Green-Swift Company were working overtime on ready-made clothing. The Peabody Overall Company at Windsor secured large contracts during the month from the American Government and were in need of extra help. The steam laundries were quiet, but dry cleaners were very busy. Winnipeg reported that the furriers increased their staffs and that the glove factories were advertising for help, but that otherwise there was no change in employment. Vancouver reported a difficulty in obtaining skilled operators in the overall and shirt factories. The steam laundries remained practically closed down throughout the month owing to industrial trouble, but the dyeing and cleaning establishments were busy. The steam laundries at New Westminster were working overtime.

Pulp, paper and fibre

St. John reported that employment was normal at the pulp mill. At Three Rivers, the Wayagamack Pulp and Paper Company reported a shortage of help. St. Catharines reported that the employment was good at the Beaver Board and pulp and paper mills. Hamilton reported employment good in the felt and tar paper factories. The Canada Paper Company at Windsor Mills, Quebec, were forced to close down during the month on account of the epidemic. Vancouver reported that the pulp and paper mills were busy during the first part of the month, but later some 200 employees were sick, which made production difficult. Victoria reported the employment in the pulp and paper mills very good.

Printing, publishing and paper goods

Halifax reported a continued shortage of compositors and pressmen and that overtime was general in all offices. The paper box factory of Moir's Limited was busy. Truro reported great difficulty in getting experienced printers. St. John reported normal conditions in printing, but that in the paper box factories overtime was worked. Montreal reported that there was plenty of employment for printers. Quebec reported printing trades and book-binding had a quiet month, but the paper box and bag factories were well employed. St. Hyacinthe reported active conditions in this group. Three Rivers reported the printing establishments quiet. Toronto reported the printers, engravers and lithographers well employed, much additional work having been created by the Victory Loan campaign. Employment was good in the paper box and bag factories. Kingston reported the newspaper and job printing houses well employed, and Peterborough reported them very busy. At Galt the paper box factory was very active. Kitchener reported the paper box factory well employed and that there was a shortage of printers. The newspaper offices at Stratford reported a shortage of help, while at Woodstock there was a constant demand for job printers. At London, the Somerville Paper Box Company was very busy, while some overtime was worked in printing houses. St. Thomas reported job printers very busy. Windsor reported the paper box and novelty companies very busy, but

the binderies quiet. Winnipeg reported that the paper box manufacturers had slightly increased their staffs, but that the book binderies were quiet. Medicine Hat reported quietness in this group, but Calgary reported conditions normal. At Edmonton there was a demand for skilled compositors. At Vancouver the job printing houses were fully employed and paper box workers were busy. The printing offices at New Westminster were fully employed, and at Vancouver the paper factories also were very busy.

Woodworking and furniture

Halifax reported sash, door and planing mills working to capacity. Westville reported the planing mills well employed. Amherst reported that employment was good in piano repair work, and that the Christy Bros. coffin factory worked continuously day and night. Charlottetown reported the woodworking group fairly well employed. St. John reported conditions normal. The Simms brush factory were advertising for boy and girl apprentices. At Fredericton the sash, door and planing mills were busy. The door and sash factories at Quebec reported a dull month, but the wooden box and packing case factories were very busy. At St. Hyacinthe the sash and door factories were active, the box factory was busy, and the furniture and organ factories had a good month. Three Rivers reported employment good in the sash, door and planing mills. Sorel reported quietness in this group. Toronto reported that the woodworkers including piano makers were all active. Brush makers were in demand. Kingston reported the broom and piano factories busy with a shortage of help in the sash, door and planing mills. Peterborough reported normal conditions in the sash door and planing mills, while Galt reported a shortage of help. The Brantford Piano Case Company were short of experienced hands. At Kitchener the furniture and cooperage factories were short handed. At Guelph, piano and sewing machine makers were very active. At Stratford there was a shortage of help in the furniture and chair factories and at Woodstock there was a demand for machine and bench hands and for unskilled labour, also cabinet makers and piano action makers. At London, the barrel works were short handed, and employment was good in the piano and organ factories. At Chatham, the wooden box factories were well employed, but at Windsor some quietness prevailed. Prince Albert reported employment normal in the planing mills. The Rutherford Planing mills at Medicine Hat were totally destroyed by fire during the month, the estimated damage being $25,000. At Edmonton there was a slight demand for sash and door workers. Fernie reported a slackness in the sash and door factories, but fair activity in the planing mills. Vancouver reported the sash, door and planing mills and wooden box factories busy. At New Westminster the wooden box factories were very busy and at Victoria normal conditions prevailed.

Leather, boots, shoes and rubber

St. John reported that the Peters's tannery were advertising for a number of men. The shoe and larrigan factories at Fredericton reported a good month. The tanneries at Montreal reported an improvement over the previous month, although there was still a difficulty in obtaining South American dry hides. The boot and shoe factories were very well employed. Quebec reported activity in this group, and St. Hyacinthe reported saddle makers and other leather workers very busy. At Three Rivers the boot and shoe factories were slightly handicapped by shortage of labour. At Sorel, the tanneries and shoe factories together gave employment to some 60 hands. Toronto reported a considerable improvement in activity in this group. The tanneries at Kingston were working overtime.

The shoe factory at Peterborough was very busy, and Guelph reported shortage of help in the shoe factories. Kitchener reported the Dominion Tire Company short of help and the Kaufmann Rubber Company advertising for 25 apprentices. The rubber tire factories closed down entirely for one week on account of the epidemic. The tanneries at Stratford and Woodstock were active with a slight demand for unkilled labour. The Hyman Company, at London, continued to work to full capacity, and the shoe factories were short of help. Windsor reported harness makers rather quiet. Brandon reported the tanneries only fairly well employed. At Calgary the trunk, harness and horse goods workers were fully employed. Vancouver reported that shoe workers, both male and female, were fully employed. New Westminster reported normal conditions at the tannery.

Clay, glass and stone

Halifax reported that stonecutters and granite workers were now very quiet, but that men laid off had readily secured work in other lines. St. John reported that stone and granite cutters were well employed, but at Fredericton they were rather quiet. Quebec reported general dulness in this group. St. Hyacinthe reported that the lime kilns at St. Dominique worked full time. Brickmakers at Toronto reported a good demand for their output, but a falling off in production owing to the difficulty in obtaining labour and fuel, in consequence of which several brick making companies had gone out of business. The glass works were in steady operation. Belleville reported that employment was normal in the pottery and porcelain houses. Kitchener reported that the Braum Marble works was well employed. Stratford reported brick, tile and sewers pipe workers well employed. Chatham reported the brick companies very quiet, but the cement block and tile companies very active. Windsor reported this group very dull. Medicine Hat reported that the stoneware industry continued to be well employed.

Paints, oils, chemicals, explosives

Halifax reported the paint and varnish concerns working to capacity. Three Rivers reported that the Red mill paint works had a very busy month. Toronto reported that the paint and varnish plants were actively engaged, and the drug and medicine manufacturers were unable to cope with the demand created by the epidemic. Niagara Falls reported that the electro-chemical plants were very busy. The Scarfe Varnish Works at Brantford reported a very busy month. Employment was good at the Monarch Oil and Grease Company's plant at Kitchener. At Windsor the Standard Paint and Varnish Company reported a quiet month, but the soap and perfume company was fairly well employed. The manufacturers of patent medicines were in need of female help. Winnipeg reported normal employment in the soap factories. The Alberta Linseed Oil Mills at Medicine Hat recommenced operations during the month and reported business fairly brisk. At Vancouver the Imperial Oil refinery reported a shortage of help due to the epidemic. Employment was fairly good at the Crown Soap Works. Victoria reported that the paint and soap factories were steadily employed, and that the chemical and explosives plants were working to full capacity.

Railways, shipping and 'longshore work

The earnings of the Canadian Pacific Railway during September were $13,584,770, as compared with $12,244,341 for the same month in 1917. Halifax reported that employment was very good on the street railways due to more cars being put on to comply with the Board of Health's regulations that there should be no crowding during the epide-

mic. 'Longshore work showed a very considerable increase over last month. Garages were very active. Truro reported that railway men were working very irregularly on account of the epidemic. Charlottetwon reported that railway employees were very well employed, but that 'longshore men were quiet. St. John reported a considerable improvement in 'longshore work. Fredericton reported that employment was very good in railway work. Montreal reported that the railways were handicapped by sickness of employees and by a scarcity of box cars, also that 'longshoremen and harbour men had a busy month. Quebec reported that the steam railways had reduced their summer passenger trains, but had increased their freight trains so that employment had remained about normal. Railway repair shops had a busy month. Employment was good on the street railways. In navigation there was a reduction in passenger service and an increase in freight service. 'Longshoremen and ship labourers were well employed. St. Hyacinthe reported that all classes of railway workers were fully employed. Three Rivers also reported a good month. Toronto reported that railway traffic was heavy, but the working forces considerably reduced through sickness. Railway repair shops were well employed. The Toronto street railway took on 194 additional men. Navigation slackened off towards the end of the month. Hamilton reported a demand for 'longshoremen and teamsters. The Canadian lines at Niagara Falls of the International Electric Railway were idle for some weeks owing to a wage dispute originating on the company's lines in the United States. Brockville reported that the railways were advertising for brakemen and firemen. 'Longshore work was dull except for an occasional cargo of coal. Kingston reported steam railways and repair shops well employed, but that the electric railways had curtailed their service due to shortage of hands. Navigation was rather slack, but 'longshoremen were still busy handling coal. Belleville, Galt and Brantford reported transfer companies, liveries and garages exceptionally busy due to the epidemic. Kitchener reported the steam railways active in transporting sugar beets. By order of the Board of Health the street car service was suspended for a few days, and due partly to this and partly to the number of funerals, the liveries and garages had a very busy month. Stratford reported the railway repair shops very busy and short of help. London reported that the privately owned electric transportation company had paid off their employees and gone out of business. St. Thomas reported that the traffic on the steam railways was exceptionally heavy with a scarcity of hands on account of the epidemic. Winnipeg reported a decline on street railway business due to the epidemic which, however, had not affected the number of men employed. Moosejaw reported a heavy movement of wheat, but slow unloading as one-third of the railway staff was absent on account of sickness. Prince Albert reported a shortage of help in some departments of the railway service. At Medicine Hat employment of freight handlers was disorganized by the strike. Garages, transfers and liveries were well employed. The Ogden railway shops at Calgary made a reduction of 200 in their staff. Employment generally on the railways was

disorganized by the strike. Fernie reported that the resumption of the operations at the coal mines had favourably affected employment on the railways, but that conditions were still considerably below normal. Vancouver reported employment good in the railway repair shops and on the street railway, but that 'longshore work was rather quiet. At New Westminster the railway repair shops were absorbing all the labour available and the auto repair shops were very busy.

Mining and quarrying

Quebec reported that stone quarrying was practically at a standstill. Cobalt reported that the mines were working to full capacity. In some instances a shortage of about 5 per cent of labour was reported. The fact that supply and demand were so nearly equal was attributed to the "war time high price of silver" bonus, which had reached $1.25 daily above the regular wage. During the month a total of 59 cars containing approximately 4,416,487 pounds of ore were shipped, as compared with 34 cars containing 2,510,270 pounds of ore in September. Bullion shipments during October amounted to 1,042,944 ounces, as compared with 480,298 ounces in September. In the Porcupine Gold area the Hollinger and McIntyre mines continued to produce although the working forces were far below requirements. In the Porcupine, Kirkland Lake and Boston Creek camps less than 2,500 men were employed as against a normal requirement of 5,000. Many gold mines have closed down for the duration of the war. There was no special activity in the Nelson, Trail and Rossland districts although the mines smelters and refineries were operating.

Sydney reported the output of the Dominion Coal Company as 275,000 tons of coal and 45,000 tons of coke with 544 ovens in operation, as compared with 250,000 tons of coal and 33,500 tons of coke in September. The output at the Sydney mines was 44,000 tons of coal and 99,000 tons of coke with 175 ovens in operation, as compared with 40,250 tons of coal and 8,800 tons of coke with 184 ovens in operation in September. Westwille reported that the coal mines were working steadily, but that the scarcity of labour had affected the output which amounted to 40,000 tons for the district. Fredericton reported that operations at the Minto mines had been greatly interfered with by the epidemic. Calgary reported that the coal mines of the district were being developed to the fullest extent with the labour available. The strike at the Michel mines terminated on October 7 and normal conditions were restored.

Building and construction

Halifax reported that, despite poor weather conditions, employment was very good in the building trades. Unskilled labour was in demand. Charlottetown reported that building tradesmen and labourers had a very busy month. St. John reported a shortage of bricklayers. Montreal reported a scarcity of labour due to the epidemic. Quebec reported very little employment offering in building trades. St. Hyacinthe reported a very dull month, but Three Rivers was fairly active. Sorel reported that building tradesmen and unskilled labour were very well employed. The building

trades at Toronto were fairly active, but the construction of large buildings was delayed owing to the difficulty of procuring structural steel. Hamilton reported a demand for bricklayers, carpenters and painters. Niagara Falls reported activity. St. Catharines and Brockville reported a continued fair demand for labour, while at Peterborough the demand was good. Brantford reported that the erection of 20 workmen's houses for the Dominion Steel Products Company gave good employment. Carpenters were well employed at Guelph, but bricklayers and stone masons were very dull. The building of several military huts near London gave employment to over 100 carpenters and several painters. Chatham reported a decrease in employment, while at Windsor general dulness prevailed. At Winnipeg there was enough building going on to take care of the available labour. General dullness prevailed at Brandon and Moosejaw, but at Prince Albert all available labour was being used. Calgary reported a fair amount of activity in the building trades. Vancouver and New Westminster reported general dullness.

The value of building permits issued in 35 cities increased from $2,690,821 in September to $2,850,428 in October, or 5.93 per cent. As compared with October, 1917, there was a decrease of 21.41 per cent.

Lumbering

Westville reported that several lumber firms had discontinued operations until the winter months. Charlottetown reported that the lumber and sawmills had a quiet month. St. John and Fredericton reported that the sawmills were still running and were likely to do so until the freeze-up. Difficulty was being experienced in getting sufficient men for the lumber camps. Quebec reported that the saw and shingle mills of the district had practically completed the season's cut by the end of the month and that there was great shortage of men for the woods. Sorel reported that the sawmills were well employed. Peterborough reported that only one mill was cutting. Sault Ste. Marie reported a big demand for lumber, the supply of which is limited by the labour shortage. Prince Albert reported that the lumber camps were advertising for men in large numbers. The lumber industry at Fernie reported a very good demand for certain classes of lumber. Logging operations were carried on, but were seriously affected by the epidemic, which in some cases rendered entire unable to operate. The Rainbow Creek Lumber Company lost practically its stock of about 6,000,000 feet by fire. The plant expected to re-open shortly. The saw and shingle mills in the Vancouver District worked at full capacity at the beginning of the month, but several closed down later. New Westminster reported some slackening in employment in saw and shingle mills, but at Victoria the industry was brisk in all its branches in supplying shipyards.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING OCTOBER, 1918

DURING the month of October the Department received reports from nine Boards of Conciliation and Investigation appointed to inquire into disputes affecting: (1) the Canadian Northern Railway Company and its clerks, station employees, etc.; (2) the Winnipeg Electric Railway Company and its machinists, blacksmiths, electricians, trackmen, carpenters, painters, car cleaners, switch greasers, specialists, and helpers to these crafts; (3) the National Manufacturing Company, Limited, Ottawa, and certain of its employees; (4) the Canadian Express Company and certain of its employees; (5) the Winnipeg Electric Railway Company and its motormen, conductors, etc.; (6) the Bell Telephone Company of Canada, Toronto, and its operators, clerks, messengers, etc.; (7) the John Inglis Company, the Polson Iron Works, and the Canadian Allis-Chalmers Company, Toronto, and their boilermakers, iron shipbuilders, etc.; (8) the Nicholson File Company, Port Hope, Ont., and certain of its employees; and (9) the British Chemical Company, Trenton, Ont., and its carpenters and millwrights. A report was received from the Board of Appeal to which had been referred the dispute between certain firms in Toronto, being members of the Employers' Association of Toronto, and various classes of their workmen; also a report from the Royal Commission established under the Inquiries Act to inquire into alleged unrest existing in the province of Quebec between various firms engaged in the shipbuilding industry and their employees, with special regard to wages, working hours, overtime, and other conditions of labour.

Six applications were received for Boards and three Boards were established in connection with applications which had been received during the previous month.

Applications received

An application was received from the employees of the Harbour Commissioners of the port of Montreal, members of Federal Labour Union No. 1629 of Harbour Employees, for a Board to deal with a dispute concerning wages. The application was under consideration at the close of the month.

An application was received from the employees of the H. Mueller Manufacturing Company, Limited, Sarnia, Ont., members of the Imperial City Lodge, No. 792, International Association of Machinists, for a Board to deal with a dispute concerning wages and classification of work. A Board was established, Messrs. A. T. McKinley, Sarnia, and Fred. Bancroft, Toronto, being appointed members thereof on the recommendation of the company and employees respectively.

An application was received from the employees of various elevator operators at Port Arthur and Fort William, members of Local No. 934, International 'Longshoremen's Association, for a Board to deal with a dispute concerning wages and hours. A Board was established as follows: the Honourable Mr. Chief Justice Mathers, Winnipeg, chairman, appointed on the recommendation of the other two Board members, Messrs. E. L. Taylor, K.C., Winnipeg, and L. L. Peltier, Fort William, nominees of the company and employees respectively.

An application was received from the employees of the Administrative Commission of the city of Montreal, being engineers, firemen, and oilers engaged in the Water Works Department, for a Board to deal with a dispute concerning wages. This being a municipal corporation, a Board could not be established except by the joint consent of the disputants. The Administrative Commission granted this consent, and a Board

was established, Messrs. Charlemagne Rodier and J. T. Foster, Montreal, being appointed members thereof on the recommendation of the employer and employees respectively.

An application was received from the employees of J. R. Booth, members of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, for a Board to deal with a dispute concerning wages. This industry did not fall within the scope of the Industrial Disputes Investigation Act, and a Board could, therefore, be established only by the mutual consent of the disputants. The employer refused this consent, and no action looking to the establishment of a Board could be taken.

An application was received from the employees of the Polson Shipbuilding Company, Toronto Shipbuilding Company, and Dominion Shipbuilding Company, Toronto, Ont., being ship carpenters, caulkers, joiners, and woodworking machinists, members of the United Brotherhood of Carpenters and Joiners of America, for a Board to deal with a dispute concerning wages. The employers were members of the Employers' Association of Toronto, and the secretary of that body was authorized to speak for the employers concerned. A Board was established as follows: Mr. J. A. McAndrew, Toronto, chairman, appointed on the joint recommendation of the other two Board members, Messrs. James G. Merrick and John Doggett, Toronto, nominees of the employers and employees respectively.

Other Proceedings under Act

A Board was established during October to deal with the dispute between the Nicholson File Company and certain of its employees, being file workers. The personnel of the Board and the text of the report presented appears in the present chapter.

A Board was established during October to deal with the dispute between the British Chemical Company and certain of its employees, being carpenters and millwrights. The personnel of the Board and the text of the report presented appears in the present chapter.

A Board was established during October to deal with the dispute between the Temiskaming and Northern Ontario Railway and its clerks, station baggagemen, and freight handlers, consent to this procedure having been received from the company. The Board was composed as follows: His Honour Judge J. H. Denton, Toronto, chairman, appointed on the joint recommendation of the other two Board members, Messrs. R. H. Parmenter and J. G. O'Donoghue, Toronto, nominees of the company and employees respectively.

Report of Board in Dispute between the Canadian Northern Railway Company and its clerks, station employees, etc.

AN interim report was received from the Board established to deal with the dispute between the Canadian Northern Railway Company and its clerks, station employees, etc., members of the Canadian Brotherhood of Railroad Employees, concerning wages and rules. The Board was composed as follows: the Honourable Mr. Chief Justice Mathers, Winnipeg, chairman, appointed on the joint recommendation of the other two Board members, Messrs. C. E. Dafoe, Winnipeg, and Fred. Urry, Port Arthur, nominees of the company and employees respectively. The report, which had to do with western lines only, was unanimous, and was accompanied by a proposed schedule of wages and rules to apply to that portion of the railroad.

Report of Board

To the Honourable
Thomas W. Crothers, K.C.,
Minister of Labour of Canada.

Sir,—

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Northern Railway Company and certain of its employees, being clerks, station employees, etc., members of the Canadian Brotherhood of Railroad Employees.

We, the undersigned members of the Board of Conciliation appointed by you, by order dated the fifth day of June, 1918, beg to report as follows:

We entered upon the investigation on the eleventh day of July last, and were then attended by J. G. Cameron, assistant general manager of the railway company, and by A. Wilcox, general superintendent, and Mr. Pratt, superintendent of dining cars, and by A. F. Landry, deputy grand president of the Brotherhood of Railroad Employees; A. Dixon, chairman of the General Grievance Committee; John Howard, secretary of the General Grievance Committee, and A. L. Lydiard, general chairman of the Dining Car Committee, and their respective committees.

The employees concerned in the dispute are the clerks, station and dining car employees in the service of the company, some of whom are members of the above named Brotherhood.

The subject matter of the dispute is the recognition by the railway company of the Canadian Brotherhood of Railroad Employees; the adoption of a schedule of rules and regulations, and an improvement in the scale of wages paid.

At the opening of the proceedings, Mr. Cameron declined to represent the company respecting its eastern lines, and it was therefore agreed between him and Mr. Dixon that the dispute in so far as it affected eastern lines should be left over until some officer representing the company with respect to these lines should be present, and in the meantime the inquiry should proceed with respect to the western lines only.

Meetings of the Board were held on July 6, 11, 12, 16, 17, 18, 23, 24, 25, 26, 27, 29, 30, and 31, and August 1, 29, 30, and September 3, 4, 6, and October 5 and 9. Separate schedules were asked by the clerks and station employees, and by the dining car employees, and the right to separate schedules was conceded. Negotiations were conducted concurrently by Mr. Dixon's committee, on behalf of the clerks, etc., and by Mr. Lydiard's committee, on behalf of the dining car employees, and, finally, Mr. Dixon's committee arrived at an agreement for a schedule of rules, working conditions and rates of pay, leaving only two questions in dispute, namely: the recognition of the Brotherhood by the railway company, and the date upon which the new rates agreed upon should take effect. The railway company emphatically refused to recognize the Brotherhood, but was willing to enter into an agreement with a committee of employees only. Mr. Lydiard's committee also succeeded in negotiating with Mr. Pratt, the dining car superintendent of the company, a schedule of rules, with the exception of five points, namely: (1) the recognition of the Brotherhood; (2) a claim by the men for two weeks' leave of absence per year, with pay; (3) a re-arrangement of the runs so that the dining car crews would have a longer lay-over at their home terminals; (4) some of the rates of pay; (5) the date upon which the new rates of pay should take effect. Both schedules, covering all matters in dispute except those reserved for our consideration, were handed to us, signed by Mr. Dixon on behalf of the employees, and Mr. McLeod, general manager of the company, and Mr. Pratt, superintendent of dining cars, respectively.

At the conclusion of the hearing respecting western lines, on July 31, it was assumed by Mr. Dixon that no difficulty would be experienced in arriving

at an agreement with the company respecting eastern lines, and the Board met and agreed upon the following disposition of the several points reserved for its consideration:—

Recognition of the Brotherhood:

The Board believes it would be inexpedient to deal with this question until the evidence respecting eastern lines has been placed before it. It therefore defers consideration of this portion of the dispute until that time.

DINING CAR SCHEDULE.

Leave of Absence:

The claim made by the employees for two weeks' leave of absence under pay was based upon the fact that such leave is granted by the Canadian Government Railways, and that the company had agreed to grant such leave to the clerks and station employees. On the other hand, it was admitted that neither the Canadian Pacific nor the Grand Trunk Pacific grant such leave of absence. It is true that the Canadian Government Railways western line schedule does contain a provision for two weeks' holidays each year, but the Government Railways do not operate dining cars west of Toronto, this service being performed by the Grand Trunk Pacific under its schedule, and, by the Government Railways schedule, such leave is only granted to permanent employees who have been in continuous service for not less than one year. It is also expressly stated that such leave is granted to offset any extra hours or time the employees may be on duty on account of delayed trains, or dining car crews being called on, in special cases, to put stores in their cars, etc. The fact that the company has conceded two weeks' leave of absence to their clerks and station employees does not appeal to us as a reason why a similar concession should be made to the dining car employees. Many of the clerks and station employees are confined to the one office and are much more in need of change of scene periodically than are dining car employees, whose duties are less confining. We cannot, therefore, recommend that the company grant this leave.

Lay-over:

The lay-over asked by the men is covered by Articles 57 to 59 inclusive of their presentation. At present the railway operates but three through trains between Winnipeg and Vancouver per week. Upon each of those through trains it is necessary to have a dining car. Dining car crews residing in Winnipeg run through to Vancouver, and those residing in Vancouver run through to Wininpeg. It not infrequently occurs that a crew whose residence is in Winnipeg, when returning East from Vancouver, find that they are three hours or more late on reaching Edmonton. When that occurs, they are turned back to Vancouver instead of coming through. It thus happens that sometimes a Winnipeg crew is held away from their home terminal from 17 to 20 days at a time. It was admitted by both Mr. Cameron and Mr. Pratt that this was a condition that should, and would, be remedied just as soon as it was reasonably possible to do so.

The men contended that, by the expenditure of a little money, it could now be remedied. They suggested that the terminus of the Vancouver crews should be Edmonton, and that they should run only between Vancouver and Edmonton, and that the terminus of the Winnipeg crews should be Paynton, and that the crews, upon reaching Paynton, should turn back to Winnipeg. The officials of the company, however, pointed out that the adoption of such a course would leave the trains between Edmonton and Paynton, a distance of some 200 miles, unprotected by dining car service, and that the risks of delays and accidents were such that the company could not undertake to operate a through train over that territory without a dining car attached. They further pointed out that they had facilities for provisioning, cleaning, renovating and repairing the cars at Winnipeg which do not exist and could not be installed and main-

tained without a large expenditure at any other points on the line. They pointed out that just as soon as conditions justified the inauguration of a daily through train, provision could be made for the amount of lay-over at the home terminal now asked for by the men, but that with their present facilities, and under the present day conditions, it was out of the question for them to do so. They have at present only three spare dining cars on the western division; two of these are in continuous use by the military authorities, and they must always have at least one spare car for the purpose of relieving one that may have to undergo repairs. The men pointed out that this same condition has prevailed since 1913, and that in that year the company's officials made similar promises with respect to it. The obvious explanation of that is, that since 1914 the country has been at war, and conditions have been abnormal; otherwise the company might have been in a position to have implemented its promises of relief.

We find that the grievance complained of by the men is a real one, but that under present conditions it is impossible for the company to grant them the relief that they would otherwise be entitled to. We strongly recommend, however, that the company take steps to improve these conditions, and to give the men a lay-over at their home terminal such as they are entitled to, and that this be done just as soon as it is reasonably possible and practicable. Mr. Pratt offered to, in the meantime, give any crew held away from its home terminal longer than the usual time an additional lay-over upon application for that purpose. We recommend that this practice be adopted.

Rates of Pay:

The company tendered the so-called McAdoo scale of wages to both committees. The clerks and station employees' committee accepted the offer, with a few minor exceptions, conceded by the company. The dining car committee declined to accept the McAdoo award, and we have therefore considered the question on its merits. We find that in every instance the McAdoo award, as applied to the dining car employees, gives them a substantial increase over their present remuneration, such increase varying from $2.70 per month to $28.25 per month, and the resultant scale of wages we believe to be fair and reasonable, with three exceptions, namely: the second dining car cook, $65, which we think ought to be raised to $71.50; second cook on cafe car, $55.00, which we thing ought to be raised to $57.50; and waiters, $45.00, which we think ought to be raised to $50.00. The reason for the latter raise is that since the commencement of the war, and particularly since the sale of liquors in dining cars has been prohibited, the tips received by waiters on these cars has materially fallen off. It is a well known fact that the railway companies have in the past paid low wages to this class of employees, and the employees have been willing to accept low wages, because the remuneration was largely augmented by tips received from railway patrons. As these have materially fallen off, we think the scale of wages should be somewhat raised to compensate them for the loss.

Date at Which Scale of Wages Should Come Into Effect:

All parties agreed that the rules should take effect as of August 15, but there was considerable difference of opinion as to the dates when the rates of pay should take effect.

The Railway War Board has ordered that the McAdoo award should in no case take effect earlier than the first of May. The employees asked that the increases be dated back to a much earlier period, and urged as a reason, delay in appointing a Conciliation Board after their application had been made.

We are of opinion that if the various steps necessary for the constitution of a Board, and the prosecution of the enquiry had followed each other without

any delay, the enquiry could not have been completed sooner than from the twentieth to the end of April. Under these circumstances, we think that if the rates take effect as of the first of May, neither party will have any reason to complain. In fact, Mr. Cameron, on behalf of the company, raised no objection to that being the date fixed. We therefore recommend that the date when the increased rates of pay shall take effect shall be the first of May.

Duration of Agreement:

We have considered with great care the question of adopting some provision which will, at least during the period of war, prevent strikes and lockouts, and give both employees and employers the assurance that while the nation is engaged in a struggle for its life they may devote their energies to the prosecution of the business of the country, without the fear that their operations may be interrupted by industrial strife. To us it appears absolutely essential that during this period of peril all the forces of the country should be mobilized and applied to the successful prosecution of the war, and we believe there is sufficient good sense and patriotism in the ranks of both the employees and employers to induce them to adopt some method of settling their disputes without the interruption of business which is always involved in a strike or a lockout.

We, early in the negotiations, outlined a proposal to this end. This proposal involved three considerations: (1) that during the period of war there should be no strike or lockout; (2) that periodically there should be a comparison of the increased cost of living with that existing at the time when the scale was adopted, and an increase of wages sufficient to take care of the increased cost of living, if any, should from time to time be granted; (3) that in the event of any dispute as to the interpretation of the rules and rates of pay, or their application, a reference should be made to some constituted Board, whose decision should be accepted as final by both parties.

The proposal was, at the request of Mr. Dixon and Mr. Howard, put in concrete form. After it was drafted, a joint meeting of members of this Board, and of members of a Board consisting of the present chairman, Mr. Dafoe, and Mr. Campbell, then holding an enquiry into a dispute between the Canadian Northern Express Company and its employees, was held. At this meeting all the members of both Boards were present, as well as Mr. Dixon and Mr. Howard, chairman and secretary of the clerks and station employees committee, and Mr. Watson, chairman of the express employees committee.

At the conference referred to, all were unanimous that an agreement such as outlined was most desirable. We believe that no British subject who wants to see the Empire successful in the terrible struggle in which we are engaged will hesitate for a moment to agree to the clauses we have drafted. In the event of any dispute arising in the future, the merits of the dispute must necessarily be submitted to a Conciliation Board, and the experience of the past is that in a large majority of the cases the decision of the Board has been accepted. Under these circumstances, little, if anything, would be lost by agreeing to abide by the decision of such a Board in advance, and thus giving the employers the assurance that until victory has been achieved and peace restored, labour and capital will work in harmony for the achievement of that end.

Mr. Lydiard, chairman of the dining car employees' committee, was not present at the conference referred to, and he subsequently informed the Board that he declined on behalf of those he represented to agree to the proposed article, notwithstanding Mr. Dixon's attitude. We nevertheless recommend that it be incorporated in the dining car schedule, and that the dining car employees accept it.

The Board was ready to report re-

specting western lines on the second day of August, but were requested to withhold it until the eastern lines' dispute had been cleared up. Subsequently, on the thirtieth August, an application was made to us by some of the men's committee to re-open the enquiry respecting several of the matters covered by the signed schedules hereinbefore referred to, particularly with respect to the exclusion of three classes of employees, namely: ashpit men, clerks in superintendent's office, and certain men included in the O.R.T. schedule.

The application was heard on the fourth and sixth September by the chairman and Mr. Dafoe, Mr. Urry being unable to attend. The representative of the company took the position that the question of including the three classes referred to had been the subject of discussion with Mr. Dixon before the agreement now sought to be opened was entered into, and he refused to re-open it. It appears to us that the employees are bound by the result of the negotiations conducted by their accredited representative, and in the absence of the company's consent we have no power to again open the matter.

We append hereto the schedule of rules and rates of wages for both clerks and station employees, and the dining car employees, with certain articles left blank. Both schedules have been signed on behalf of the employees by Mr. Dixon, general chairman, and on behalf of the company by Mr. McLeod, general manager, and Mr. Pratt, dining car superintendent, respectively. We have stated in this report how, in our opinion, these blanks should be filled up. In our opinion the second paragraph of the twenty-third article of the clerks' schedule and the second paragraph of the article numbered 32 in the dining car schedule, should be amended, and we recommend that the following be substituted therefor:

"Provided, that there shall be a revision of the wage scale at the expiration of every six (6) months hereafter if it appears that since the last revision of wages there has been a general increase in the cost of living of 10 per cent or more, in which case an increase of wages will be granted sufficient to absorb such increased cost of living. The cost of living statistics tabulated by the Department of Labour and published in the LABOUR GAZETTE first issued after the expiration of such six (6) monthly period shall be accepted as conclusive as to such increase, if any, and the extent thereof."

The dispute respecting eastern lines has not yet, so far as we are advised, been disposed of, and until that has been done we cannot make a final report.

All of which is respectfully submitted, this eleventh day of October, A.D. 1918.

(Sgd.) T. G. MATHERS,
Chairman.

(Sgd.) C. E. DAFOE,
Member of Board.

(Sgd.) FREDERICK URRY,
Member of Board.

Rules and Rates of Wages covering employees holding certain positions at points specified herein. Effective .....

ARTICLE 1.

ARTICLE 2.

For the purpose of this schedule the word "employee" shall be understood to mean any employee filling any position incorporated in these rules, regulations, and rates of pay.

ARTICLE 3.

(a) Members of general committee shall be relieved when required for committee work, and will be furnished necessary transportation. Sufficient notice must be given to superior officer so that the interests of the company will not suffer.

(b) Employees will, if circumstances permit, be relieved not exceeding four (4) times each year, and furnished transportation for the purpose of attending their meetings, such transportation to extend only to the limits of the superintendent's division on which they are employed. The relief of employees for this

purpose will be arranged with due regard to the company's interests, and no more men will be relieved from any office, department, or shop that can, in the discretion of the officer in charge, be spared.

ARTICLE 4.

Employees held off duty on company's business, or by order of the company's officials, will be paid therefor at their schedule rates of wages, and actual reasonable expenses, if away from home, on production of receipts.

Employees required by the company to attend coroner's inquests, court cases, or other public investigations, will be reimbursed for time lost on basis of schedule rates, and for actual reasonable expenses, if away from home, on production of receipts. In such cases the witness or other court fees to go to the company.

ARTICLE 5.

If, owing to illness, an employee is forced to cease work for an indefinite period, such employee shall not lose his seniority rights to the position held at the time of reporting sick, provided the absence does not extend beyond a term of six (6) months from date of stopping work.

Employees entitled to steady positions will lose their seniority standing after thirty (30) days' service in any other class of work, except by special arrangement — through the proper channels — with the superintendent or head of department.

ARTICLE 6.

(a) Monthly rated employees shall be given two (2) calendar weeks (twelve working days) leave of absence each year with pay, after one (1) year's service. In the event of the company not being able to relieve the employee and grant leave of absence at any time in any one year, such leave of absence will be added to the leave of absence in the following year.

(b) Application for leave of absence filed in January of each year will be given preference in order of seniority of applicant, and applicants wil be advised in February of date allotted. January applicants will have preference over later applicants, and applicants after September 30 will not be entitled to leave if the company is unable to relieve them in that year. The company will, if possible, relieve all applicants during the summer season, when so desired.

(c) If the company is unable to grant leave of absence in any one year, as per paragraphs (a) and (b) of this Article, the employee will be paid regular wages in lieu of leave, if so desired. Employees entitled to leave who do not apply for it, or who do not take leave when granted, will not be allowed any wages in lieu thereof.

ARTICLE 7.

Any qualified employee called upon by proper authority to do relief work temporarily for a period of one week (seven days) or more will receive the same rate of pay as the employee relieved, provided it is not less than the employee's own. It being understood that the reliever will not receive more than fifteen (15) dollars over his or her own wages for the first month.

The above rule also applies to relief work done on account of annual holidays, and the maximum increase of fifteen (15) dollars per month in rate would cover the full period an employee is assigned to relief work.

Example:

An employee is called upon to relieve three other employees for a period of two weeks each:

Relieving employee's regular rate is, say	$70.00
Employee "A's" regular rate is, say ..	75.00
Employee "B's" regular rate is, say ..	80.00
Employee "C's" regular rate is, say ..	90.00

The reliever would be paid as follows:

While relieving "A" at rate of	$75.00
While relieving "B" at rate of	80.00
While relieving "C" at rate of	85.00

If the rates of the three employees relieved were $90.00 the reliever would be paid at the rate of $85.00 for the six weeks he would be assigned to the work.

ARTICLE 8.

All employees will be promoted in the order of their seniority; fitness and ability to govern. Seniority will count from the date employees last enter the service, but seniority in any position will date from the time employee last enters into such position.

ARTICLE 9.

It is understood and agreed that the rules for promotion and seniority do not include employees having less than six (6) months' service.

ARTICLE 10.

(a) Employees shall be considered for promotion on their respective superintendent's divisions, or within their respective departments; ability and seniority to govern. Employees not promoted in accordance with their seniority shall, upon request to their superior officer, be advised the reason therefor.

Note.—Nothing herein is to be construed to mean that an employee cannot be transferred from one division, district, or department to another, and where such transfer is made the employee affected will not lose any seniority rights.

(b) An employee engaged in clerical work placed in a position by promotion or otherwise, who is unable, for any reason, to perform the duties pertaining to such position acceptably to the company, will not receive the full salary accruing to the position until the employee has become proficient in the work, except that an employee under such circumstances will not be granted a period longer than sixty (60) days within which to qualify. During the probationary period herein specified the remuneration of such employee will be augmented by an amount representing fifty per cent (50%) of the difference between the rates scheduled for the two positions involved.

(c) Employees not wishing to accept promotion offered them by the management become junior to employees accepting such promotions, for such positions only.

(d) When an employee is transferred at the company's instance and by order of the proper official, such employee shall receive free transportation for family and household goods, and will suffer no loss of time in consequence thereof.

Note.—This clause is not to be construed as governing instances where employees transfer to accept positions obtained on bulletin.

ARTICLE 11.

In the event of reduction of staff, senior qualified employees shall be given preference of employment, and employees laid off shall be given preference of re-employment when staff is increased, if available.

ARTICLE 12.

Employees shall, on application, have returned to them all service cards or letters of recommendations that may have been taken up for inspection.

ARTICLE 13.

When an employee is dismissed, or leaves the service, after giving due notice required by the rules, such employee, on request, shall be given a certificate of service showing the capacities in which employed and whether discharged or leaving of own accord. If discharged, cause of dismissal to be stated.

ARTICLE 14.

An employee laid off on account reduction of staff and re-employed within six (6) months shall be given credit for length of time previously worked.

ARTICLE 15.

(a) No employee shall be suspended (except for investigation), discharged or disciplined, until given a fair and impartial hearing. The decision in such case to be arrived at within fifteen (15) days from date of suspension. An employee found blameless will be reinstated and paid schedule wages for time so lost; one day for each twenty-four (24) hours so held, and, if away from home, will be reimbursed reasonable expenses, on production of receipts. An employee may have the assistance of one or two employees during an investigation, if such employee so desires. The employee so affected will be given one day's notice of an investigation, but this shall not be construed to mean that a proper officer, who may be on the ground at the time when the cause for investigation occurs, shall be prevented from making an immediate investigation.

(b) If the decision is considered to be unjust an appeal may be made in writing to a higher officer by an employee within fifteen (15) days of the date decision is rendered; such appeal shall set forth the grounds on which it is made. If requested, the employee directly concerned will be furnished with a copy of his statement.

(c) The procedure for settlement of grievance shall be as follows:

First.—By the employee to the foreman or officer immediately in charge.

Second.—By the local grievance committee to the officers or officials.

Third.—By the general grievance committee to the general superintendent or head of department.

Fourth.—To the assistant general manager or general manager.

Local grievances which can be adjusted on the ground shall be adjusted in the railway company's time.

ARTICLE 16.

For the purpose of this schedule it is understood and agreed that employees in the passenger service shall mean station baggagemasters and their staffs when handling baggage where passenger trains run on Sundays and holidays; ticket agents and assistants at stations where passenger trains operate on Sundays and holidays.

ARTICLE 17.

Employees will be subject to the general rules of the company in regard to leave of absence and free or reduced transportation.

ARTICLE 18.

(a) The time of monthly rated employees will be based upon the calendar months, Sundays excluded.

(b) The following holidays will be granted with pay to the employees rated by the month not engaged in passenger service, viz.: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, and Christmas Day.

When it is necessary to call upon such employees to work on the above specified holidays, they will be paid for the time work on the following basis:

Two (2) hours or less: not to count;

Over two (2) hours but not in excess of one-half (½) day: one-quarter (¼) day's pay;

Over one-half (½) day: one-half (½) day's pay;

Such amounts to be added to monthly salary.

(c) Monthly rated employees required to work on Sundays will be paid for actual time so worked at time and one-half; thirty (30) minutes or less not to count, over thirty (30) minutes to count as one (1) hour. Such amounts to be added to monthly salary. Except that where the company arranges to relieve clerical and yard staffs one day a week, work on Sundays will be treated the same as work on week days. The intent being that where possible to do so, the employees will be given one day's rest in seven days.

(d) Hourly or daily paid employees required to work on holidays specified in clause (b) or on Sundays will be paid for such work on the basis of time and one-half.

(e) Night employees to receive the same consideration as day employees in the matter of holiday and Sunday work.

(f) Employees will not be expected to work on specified holidays or on Sundays, and unless they are specially instructed to do so by the head of the department, they will not be paid any extra time.

(g) The present practice in regard to the half holiday on Saturdays will be continued.

ARTICLE 19.

(a) Ten (10) consecutive hours, exclusive of meal hours, shall constitute a day's work for all employees, except for such employees as previous to the coming into effect of this schedule worked less than ten (10) hours for a day's work, in which case the hours to constitute a day's work shall not be increased.

When twenty-four (24) hours' continuous service is necessary, ten (10) hours within twelve (12) consecutive hours shall constitute a day's work.

(b) Employees will start and finish work between the hours of 6.00 o'clock and 19.00 o'clock for day work, and between 18.00 o'clock and 7.00 o'clock for night work, except passenger employees at stations who will start and finish work at hours to suit local conditions, but if kept on duty more than ten (10) hours they will be paid for such time pro rata.

(c) Employees shall not be required to take more than one and one-half (1½) hours for meals.

(d) Senior employees to have preference of night or day work.

(e) Employees called upon to work outside of the regular hours of duty will be paid for such work on straight time basis.

ARTICLE 20.

Classification:

An "assistant freight shed foreman" is an employee who has charge of a number of freight checkers and porters in either inward or outward freight sheds, yards, etc., under the supervision of a general foreman.

A "freight checker" is an employee receiving inward and outward freight from steamer or car to shed, or vice versa, responsible for the accuracy of weight, number of packages, addresses and marks.

A "freight porter" is an employee working as loader, floor man, or car man, responsible for the proper handling of freight.

Note.—The above mentioned definitions are made for the classification of the employees enumerated, and for the purpose of arriving at their rates of pay.

ARTICLE 21.

Within sixty (60) days after the adoption of this schedule by the management, the management shall prepare lists showing the seniority in the groups in each district of all employees covered thereby, such lists to be supplied to the general chairman. These lists shall be subject to correction upon proper representation from any employee. Seniority lists shall be revised at least once a year and furnished to the chairman of the General Grievance Committee on application.

ARTICLE 22.

Employees who are discharged and not re-employed within six (6) months will be regarded as new employees, except that an employee who has been discharged more than six (6) months may be reinstated when such action has been sanctioned by the General Committee and the proper officer of the company.

ARTICLE 23.

This schedule of rules and rates of pay shall continue in force until terminated by a thirty (30) day notice by either party after the conclusion of peace between Great Britain and her present enemy nations, and until that time there shall be no strike of employees and no lockout by the employers.

Provided, that there shall be a revision of the wage scale at the expiration of every six (6) months hereafter if it appears that "during the preceding six (6) months" there has been a general increase in the cost of living of ten per cent (10%) or more, and an increase will be granted sufficient to absorb such increased cost of living. The cost of living statistics tabulated by the Department of Labour and

published in the LABOUR GAZETTE first issued after the expiration of such six (6) monthly period, shall be accepted as conclusive as to such increase, if any, and the extent thereof.

Provided further, that should any dispute take place as to the interpretation of these rules, or as to the right of any employee or employees to an increase in accordance herewith, or as to the carrying out of these rules, the parties agree to refer the same to any board or tribunal constituted by the Dominion Government for the settlement of labour disputes, or, if no such board or tribunal be constituted, then to a Board of Conciliation under the Industrial Disputes Investigation Act, 1907, and to abide by the decision of such board or tribunal, or a majority thereof.

In the event of its becoming necessary to apply for a board under the said Act, the application may be made by either party, and in such application it shall not be necessary to make the statements required by S.S. 1 (b) of Section 15 of said Act as amended.

Rules and Rates of Wages covering dining and cafe car employees.

Rates of wages effective.....

Rules effective.....

ARTICLE 1.

ARTICLE 2.

For the purpose of this schedule the word "employee" shall be understood to mean any employee filling any position incorporated in these rules, regulations and rates of pay.

ARTICLE 3.

(a) Members of general committee shall be relieved when required for committee work, and will be furnished necessary transportation. Sufficient notice must be given to superior officer so that the interests of the company will not suffer.

(b) Employees will, if circumstances permit, be relieved not exceeding four (4) times each year and furnished transportation for the purpose of attending their meetings, such transportation to extend only to the limits of the superintendent's division on which they are employed. The relief of employees for this purpose will be arranged with due regard to the company's interests, and no more men will be relieved from any office, department or shop than can, in the discretion of the officer in charge, be spared.

ARTICLE 4.

Employees held off duty on company's business or by order of the company's officials will be paid therefor at their schedule rates of wages, and actual reasonable expenses, if away from home, on production of receipts.

Employees required by the company to attend coroner's inquests, court cases, or other public

investigations, will be reimbursed for time lost on basis of schedule rates, and for actual reasonable expenses, if away from home; on production of receipts. In such cases the witness or other court fees to go to the company.

ARTICLE 5.

If, owing to illness, an employee is forced to cease work for an indefinite period, such employee shall not lose his seniority rights to the position held at the time of reporting sick, provided the absence does not extend beyond a term of six (6) months from date of stopping work.

Employees entitled to steady positions will lose their seniority standing after thirty (30) days' service in any other class of work, except by special arrangement — through the proper channels — with the head of department.

ARTICLE 6.

Claim for leave of absence.

ARTICLE 7.

In the event of reduction of staff, senior qualified employees shall be given preference of employment, and employees laid off shall be given preference of re-employment when staff is increased, if available.

ARTICLE 8.

Employees shall, on application, have returned to them all service cards or letters of recommendation that may have been taken up for inspection.

ARTICLE 9.

When an employee is dismissed, or leaves the service, after giving due notice required by the rules, such employee, on request, shall be given a certificate of service showing the capacities in which employed and whether discharged or leaving of own accord. If discharged, cause of dismissal to be stated.

ARTICLE 10.

An employee laid off on account of reduction of staff and re-employed within six (6) months shall be given credit for length of time previously worked.

ARTICLE 11.

(a) No employee shall be suspended (except for investigation), discharged or disciplined, until given a fair and impartial hearing. The decision in such case to be arrived at within fifteen (15) days from date of suspension. An employee found blameless will be reinstated and paid schedule wages for time so lost; one day for each twenty-four (24) hours so held, and, if away from home, will be reimbursed reasonable expenses, on production of receipts. An employee may have the assistance of one or two employees during an investigation, if such employee so desires. The employee so affected will be given one day's notice of an investigation, but this shall not be construed to mean that a proper officer, who may be on the ground at the time when the cause for investigation occurs, shall be prevented from making an immediate investigation.

(b) If the decision is considered to be unjust an appeal may be made in writing to a higher officer by an employee within fifteen (15) days of the date decision is rendered; such appeal shall set forth the grounds on which it is made. If requested, the employee directly concerned will be furnished with a copy of his statement.

(c) The procedure for settlement of grievance shall be as follows:

First.—By the employee to the foreman or officer immediately in charge.

Second.—By the local grievance committee to the officers or officials.

Third.—By the general grievance committee to the general superintendent or head of department.

Fourth.—To the assistant general manager or general manager.

Local grievances which can be adjusted on the ground shall be adjusted in the railway company's time.

ARTICLE 12.

Employees will be subject to the general rules of the company in regard to leave of absence and free or reduced transportation.

ARTICLE 13.

It is undrstood and agreed that the rules for promotion and seniority do not include employees having less than six (6) months' service.

ARTICLE 14.

Seniority lists will be posted in conspicuous places at all home terminals, twice each year, such lists to be subject to correction upon proper representation by any employee within sixty (60) days from date of issue of such seniority lists.

ARTICLE 15.

All employees will be promoted in the order of their seniority; fitness and ability to govern. Seniority will count from the date employees last enter the service, but seniority in any position will date from time employee last enters into such position.

Senior men to be entitled to preference positions.

Example:

A steward who, for any reason (including reduction of staff) is reduced, will rank accord-

ing to his seniority in the service with the men holding positions similar to that to which he has been reduced.

ARTICLE 16.

(a) All positions vacated or new ones created will be bulletined for fifteen (15) days.

(b) Employees will be given reasonable time to qualify for promotion, such time, however, not to exceed fifteen (15) days from the date of bulletin.

(c) Employees absent through sickness or by permission of the company will not lose any promotion rights, provided they can pass the necessary examinations.

(d) An employee failing to qualify for promotion will retain his seniority standing in the position held, but thereafter will rank junior to the men promoted in his place.

Employees failing to qualify will be given another opportunity to do so at the expiration of ninety (90) days.

Employees failing to pass the required examination will be notified in writing, stating cause of failure.

Note.—It is understood that should there be no application received for a bulletined position or no employee qualifies, the company has the right to fill such position at the discretion of its officers.

ARTICLE 17.

(a) No fines will be imposed on employees.

(b) Unless negligence is established, employees will not be required to pay for lost, broken, or damaged equipment.

ARTICLE 18.

(a) Employees required to report for duty prior to time set for departure of train will be paid for such time at pro rata rates; one hour and thirty minutes or less not to be counted.

(b) Except in case of completing a meal, employees held on duty after arrival of train at home terminal will be paid for such time at pro rata rates; thirty (30) minutes or less not to be counted.

ARTICLE 19.

Employees granted leave of absence for more than thirty (30) days will be replaced by the senior man applying for the position. Vacancies of less than thirty (30) days will be filled at the discretion of the company's officers.

ARTICLE 20.

Employees entering the service will be required to report to the company's physicians for physical examination.

ARTICLE 21.

No loss of time will be incurred by the employees—

(a) Laying-over at terminals on order of the proper officers;

(b) Transferring from car to car;

(c) Deadheading to or from assigned cars.

Employees deadheading will be provided with meals and sleeping accommodation without charge.

ARTICLE 22.

Under normal conditions, three (3) waiters will be assigned to thirty-chair cars. Waiters will be assigned to stations. The number of chairs allotted to such stations to be decided by the steward in charge.

ARTICLE 23.

Where practicable, dining cars will be cleaned at terminal, such cleaning to include kitchen and pantry, and the polishing of all fixed metal work.

Car employees will be required to do necessary cleaning, and keep car in neat and tidy condition en route.

ARTICLE 24.

Except in cases of emergency, employees will not be used off their assigned runs; if so used, they will be restored to their assigned runs at the earliest practicable opportunity.

ARTICLE 25.

Employees who are discharged and not re-employed within six (6) months will be regarded as new employees, except that an employee who has been discharged more than six (6) months may be reinstated when such action has been sanctioned by the general committee and the proper officer of the company.

ARTICLE 26.

At intermediate terminals, stores and provisions will be delivered to car by employees other than members of the crew.

ARTICLE 27.

(a) Pantrymen will be employed on all standard dining cars.

(b) The kitchen staff of a dining car crew shall, under normal conditions, and when practicable, consist of one chef, one second cook, and one third cook.

ARTICLE 28.

(No. 57.)

ARTICLE 29.

(No. 58.)

ARTICLE 30.

(No. 59.)

ARTICLE 31.

(a) Regularly assigned employees used on troop trains shall receive time and one half in operation; straight time deadheading.

(b) The necessary additional staff will, when practicable, be employed to assist in the handling of military movements on regular trains. When such movements consist of sixty (60) men or more, time and one-half will be allowed the crew.

ARTICLE 32.

This schedule of rules and rates of pay shall continue in force until terminated by a thirty (30) day notice by either party after the conclusion of peace between Great Britain and her present enemy nations, and until that time there shall be no strike of employees and no lockout by the employers.

Provided, that there shall be a revision of the wage scale at the expiration of every six (6) months hereafter if it appears that during the preceding six (6) months there has been a general increase in the cost of living of ten per cent (10%) or more, and an increase will be granted sufficient to absorb such increased cost of living. The cost of living statistics tabulated by the Department of Labour and published in the LABOUR GAZETTE first issue after the expiration of such six (6) monthly period, shall be accepted as conclusion as to such increase, if any, and the extent thereof.

Provided, further, that should any dispute take place as to the interpretation of these rules, or as to the right of any employee or employees to an increase in accordance herewith, or as to the carrying out of these rules, the parties agree to refer the same to any board or tribunal constituted by the Dominion Government for the settlement of labour disputes, or, if no such board or tribunal be constituted, then to a Board of Conciliation under the Industrial Disputes Investigation Act, 1907, and to abide by the decision of such board or tribunal, or a majority thereof.

In the event of it becoming necessary to apply for a board under the said Act, the application may be made by either party, and in such application it shall not be necessary to make the statements required by S.S. 1 (b) of Section 15 of said Act as amended.

Sleeping, Dining and Parlor Car, Hotel and News Department.

Memorandum to Committee representing Dining and Cafe Car Employees:

It is understood as follows:

First.—That a sufficient supply of white coats, caps, and cooks' trousers will be supplied to dining and cafe car crews for use in the discharge of their duties.

Second.—That white shirts and collars required to be used by dining and cafe car stewards while in uniform and on duty will be laundered free by the company.

Third.—That dining and cafe car employees will be provided with suitable lodging free of charge when away from home terminal.

Fourth.—That the present practice of supplying dining and cafe car stewards with uniforms will be continued, viz.:

Dining car stewards—

In service over (10) years, all uniforms free.

From five (5) to ten (10) years, one uniform free per year.

Under five (5) years, pay one-third cost of uniforms.

Cafe car stewards—

Pay one-third cost of uniforms.

Overcoat free.

General Superintendent.

Winnipeg, Man., July 29, 1918.

Report of Board in dispute between the Winnipeg Electric Railway and its machinists, blacksmiths, etc.

A REPORT was received from the Board established to deal with the dispute between the Winnipeg Electric Railway Company and certain of its employees, being machinists, blacksmiths, electricians, trackmen, carpenters, painters, car cleaners, switch greasers, specialists and helpers to these crafts, concerning wages and working conditions. The Board was composed as follows: Mr. Isaac Campbell, Winnipeg, chairman, appointed on the joint recommendation of the other two Board members, Messrs. John C. Sullivan and Ernest Robinson, Winnipeg, nominees of the company and employees respectively. The report was unanimous, and was accompanied by a copy of an agreement between the company and its employees as to hours of labour, holidays, shop rules, and settlement of grievances. The disputants did not agree as to rates of wages, but a proposed schedule was submitted by the Board with the report.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Winnipeg Electric Railway Company, employer, and certain of its employees, being machinists, blacksmiths, electricians, trackmen, carpenters, painters, car cleaners, switch greasers, specialists and helpers to these crafts.

The Honourable
the Minister of Labour.

The undersigned, being the Board appointed under the above Act for the purpose of determining this dispute, met on August 19, 23, 29, and 30, September 3, 5, 6, 9, 10, 11, 12, and 30, and October ...., 1918. A full discussion took place between the members of the Board and the representatives of the parties, Mr. F. L. Butler acting for the railway company, and Messrs. R. B. Russell and J. L. McBride being the chief representatives of the men. Progress was made in the direction of reaching an agreement. The parties themselves concluded a mutual agreement under the advice of the Board respecting the hours of labour, the rules of employment, and in fact all the matters at issue excepting the wage schedule.

Considerable discussion took place as to whether the trackmen and labourers along with the tradesmen should be considered, the company claiming that labour was a fluctuating quantity, the men being here to-day and away soon after, that they were not largely unionized, and that the ordinary laws of supply and demand should determine their scale of wages. There was some hesitation also as to whether the labourers should be included in the reference to us from your department as they were not specifically mentioned therein. It was, however, finally decided that the Board would consider the trackmen and shop labourers when making up the schedule of wages, and it was agreed to by the parties on both sides, with the approval of Board, that our inquiry should be as between the company and its employees, thus eliminating any question of the position of the Metal Trades Council.

Appended hereto is a statement agreed to unanimously by the Board, showing first the wages paid up to the present time for the various classes of tradesmen and labourers employed by the company named in the schedule, and also the scale of wages now found to be fair by us and so reported herewith. We also all agreed that the schedule of in-

creased wages should date back and take effect as of August 15, 1918.

All the members of the Board recognized that the additions to the wage schedule are indeed considerable and brings the Winnipeg Street Railway's rates equal to that of any similar company operating under parallel conditions, except possibly Vancouver, where shipbuilding and mining conditions have created a special labour situation. But with one hour's work less in Vancouver per day, the result is that the daily rate of wage we have found for the Winnipeg Electric Railway Company is considerably higher than that in the western city. In making these schedules the Board have recognized two factors: First, the abnormal circumstances now existing; and, second, the generally constant employment afforded to the employees of street railways.

The Board also had in mind as a virtual advantage to the men the fact that the railway company in this city issues a pass to all its employees for use either for business or pleasure and that the value of this is practically the equivalent of 2 cents per hour.

The Board asked the parties during the discussion if they would agree to accept the award that should be made. The representatives of the men stated that they were opposed on principle to anything they regarded as compulsory arbitration and must therefore decline to agree to accept the award in advance. For the railway company it was said it would agree. The Board, however, has strong hopes that the men will accept its report as to the wage schedule.

We find that the matters herein mentioned, including the time of operation for the new schedule of wages, should extend to August 31, 1919, and that the increased schedule of wages should apply or date back to August 15 of this year (1918). The company will make new or amended pay-rolls for second half of August and for the month of September of this year.

We append copy of the agreement arrived at by the company and its employees as to hours of labour, holidays, shop rules, and settlement of grievances.

Accompanying this report is the time record of the meetings held by the Board and signed by the chairman.

The Board cannot close its report without a reference to the unfailing courtesy during the arguments of the representatives of the two parties — a courtesy shown to the members of the Board and to each other.

We beg with respect to submit this our report.

Dated at Winnipeg, this third day of October, 1918.

(Sgd.) Isaac Campbell,
Chairman.

(Sgd.) Ernest Robinson.

(Sgd.) J. G. Sullivan.

SCHEDULE OF RATES OF WAGES

WINNIPEG ELECTRIC RAILWAY

First column, present rate in cents per hour.

Second column, the rates in cents approved and reported to the Minister of Labour, October 3, 1918, by the Board of Conciliation.

(Sgd.) ISAAC CAMPBELL.

(Sgd.) ERNEST ROBINSON.

(Sgd.) J. G. SULLIVAN

AGREEMENT.

This agreement made and entered into this .... day of ....., 1918, by and between the Winnipeg Electric Railway and the employees hereinafter mentioned.

SECTION No. 1.

That each party to this agreement herein made agrees and consents to the following rules and regulations which shall govern the mutual relations of the parties hereto mentioned.

SECTION No. 2.

Hours of Work—Shops and Car Barns:

(a) For men employed in Main Street shops and in Fort Rouge shops, nine hours work between the hours of 7k. and 17k., with one hour off for dinner between the hours of 12k. and 13k., shall constitute a day's work. On Saturdays during the months of June, July and August, five hours work between the hours of 7k. and 12k. shall constitute a day's work. All time worked over nine hours per day, except during the months of June, July and August, when five hours shall constitute a day's work on Saturdays, shall be considered overtime and shall be paid for at the rate of time and a half. All time worked over five hours on Saturdays during the months of June, July and August shall be considered overtime and shall be paid for at the rate of time and a half.

(b) For car maintenance men, which includes painters, carpenters, controllermen, airbrake men, pitmen, and car cleaners, nine hours work between the hours of 7k. and 17k., with one hour off for dinner between the hours of 12k. and 13k., shall constitute a day's work, except that two men from the car maintenance force shall be required to work on watch from 17k. to 19k. when necessary for emergency. These two men required to work between 17k. and 19k. will commence work two hours later in the morning. On Saturdays during the months of June, July and August, all men not absolutely necessary to maintain equipment shall be worked only five hours, which shall be between the hours of 7k. and 12 noon. All time worked in excess of nine hours per day, or 54 hours per week, by car maintenance men, shall be considered overtime and shall be paid for at the rate of time and a half.

(c) For night men nine hours shall constitute a night's work, with one hour off for lunch—the time of commencing work on night shifts shall be between the hours of 18k. and 20k. six nights, total 54 hours, shall constitute a week's work for night men in all car barns. All time worked over nine hours per night, or 54 hours per week, shall be considered overtime and shall be paid for at the rate of time and a half.

SECTION No. 3.

Hours of Work—Trackmen:

Ten hours, from 7k. to 18k., with one hour off for dinner, between 12 and 13k., shall constitute a day's work—60 hours shall be considered a week's work. All time worked over 10 hours per day shall be paid for at the rate of time and a half.

When men are assigned to regular night work, or to shift work, 10 hours shall be considered a day's work and be paid for at the regular rate of pay per hour with overtime rate of time and a half for all time worked in excess of 10 hours.

SECTION No. 4.

Pass Privileges:

Employees will enjoy the same privileges as regards passes over company lines as previously.

SECTION No. 5.

All grievances which may arise shall be given consideration as follows:

1. All complaints and grievances to be adjusted by the foreman in charge, if possible.

2. When such adjustment cannot be made between the foreman and the men directly interested, the matter will be taken up with the company direct by the committee representing the

men having the grievance, and they shall endeavour to reach a mutual understanding.

3. In the event an understanding cannot be reached by the company and the men involved, a committee of representatives from the different crafts employed by the company affected by this agreement will meet the company and try to bring about an adjustment of the grievance. It is distinctly understood by the parties hereto that in the meantime there will be no lockout on the part of the company or strikes on the part of the men.

SECTION No. 6.

No employee representing his fellow workmen will be discriminated against.

SECTION No. 7.

The following minimum wage shall prevail during the life of this agreement:

SECTION No. 8.

This agreement shall become operative and remain in effect until .....

Signed on behalf of the Employees:

Report of Board in dispute between the National Manufacturing Company, Limited, Ottawa, and certain of its employees

A REPORT was received from the Board established to deal with the dispute between the National Manufacturing Company, Limited, Ottawa, and certain of its employees, being members of the Munition Workers' Federal Labour Union, No. 56, concerning wages and union recognition. The Board was composed as follows: Mr. Hamnett P. Hill, Ottawa, chairman, appointed on the joint recommendation of the other two Board members, Messrs. Geo. F. Henderson, K.C., and Romeo R. Marcil, Ottawa, nominees of the company and employees respectively. The report was unanimous and was accompanied by a proposed schedule of wages and recommendations as to settlement of the dispute. Advice was received in the Department that the award was acceptable to the company.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of the dispute between the National Manufacturing Company, Limited, of Ottawa (employer) and its employees, being members of the Munition Workers Federal Labour Union, No. 56 (employees).

Hon. Thomas W. Crothers, K.C., M.P.,
Minister of Labour, Ottawa.

Dear Sir,—

The Board of Conciliation and Investigation in this matter have the honour to report as follows:

Immediately on our appointment we commenced a series of sittings with representatives of the employer and employees with a view to bringing about a conciliation between the parties.

The employer is engaged in the manufacture of 6″ shells under a contract with the Imperial Munitions Board. The members of the Munitions Federal Labour Union, No. 56, are machine operators or machine specialists working on what is known as piece work pay, and also labourers. We have made an investigation of the rates of wages paid unskilled labour in the city of Ottawa, and have also had the assistance of Mr. Peterson, of the Imperial Munitions Board, in formulating a scale of wages based on a piece work rate.

We regret that we were unable to bring about an agreement between the

parties hereto, but after our investigations and after considerable discussion between the members of the Board, we are pleased to be able to advise you that we are enabled to make a unanimous recommendation for the settlement of the dispute according to the merits and substantial justice of the case.

We would therefore recommend as follows:

1. That the following scale of wages should be paid for piece work:

No.	Operations.	Rate.
1.	Face bottom of bore	.03
2.	Cut off open end	.035
3.	Centring of R. C. drill	.02
4.	Rough turn or roughing	.09
5.	Rough bore	.07
6.	Rough profile	
7.	Finish bore	.10
	" " not requiring grinding	.12
8.	Bevel open end	.025
9.	Face open end	.02
10.	Cut off base end	.0425
11.	Base end grinding	.03
12.	Wall grinding	.0225
13.	Re-centre	.02
14.	Second rough turn	.035
15.	Nose press	.05
16.	Drill nose	.02
17.	Facing nose	.02
18.	Counterbore or reaming	.04
19.	Rough inside profile	.03
20.	Rough noses	.03
21.	Profile and fin. turn	.11
22.	" " " repairs	.04
23.	Finish inside profile	.05
24.	" " " repairs	.025
25.	Face base to weight	.03
26.	Wave and groove	.03
27.	Wave and groove repairs	.01
28.	Rough base recess	.0275
29.	Finish base recess	.04
30.	" " " repairs	.025
31.	Bevel fuse seat and recess	.02
32.	Threadmiller	.025
33.	Inside profile grinding	.03
34.	Rivetting base plates	.01
35.	Finish base ends	.0375
36.	" " " repairs	.01
37.	Turn copper bands	.0125
38.	Press copper bands	.01
39.	Reaming—final	.01
40.	Finish base plates	.02
41.	Putting on copper bands	.0065

2. That the unskilled labourers should be paid for day work at the rate of not less than 32½ cents an hour. This clause is not intended to affect boys under 18 years of age or girls of any age.

3. The company should continue to pay its inspectors at a wage of not less than is now being paid.

4. If delays occur for which employees themselves are not responsible and the delays continue for a period of one hour or longer in any day, and employees are asked by the foreman to remain in the plant, such employees should be paid at the day rate of 32½ cents per hour. If any employee is, however, asked by the foreman to work at some other occupation during the hour or portion thereof he should be paid for same at the rate of 32½ cents per hour.

5. The working day should consist of 10 hours. Holidays should mean Sundays, and New Year's Day, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas Day. Work on holidays should be paid for at the rate of time and one half for day work and regular schedule for piece work.

6. No employee should be prejudiced by reason of the fact that he is a member of the Munition Workers Federal Union, No. 56.

7. The company should recognize the principle that promotions in the shop should be based upon seniority and efficiency whenever practicable.

8. The Board are of opinion that the company should meet and treat with the properly accredited representatives of the men upon any question which may arise during the future.

9. The scale of wages as set forth herein should be considered to be in force from September 26, 1918, and remain in force for one year thereafter.

We have the honour to remain, Sir,

Your obedient servants,

(Sgd.) H. P. HILL,
Chairman.

(Sgd.) ROMEO R. MARCIL.

(Sgd.) G. F. HENDERSON.

Ottawa, October 22, 1918.

Report of Board in Dispute between the Canadian Express Company and certain of its employees

A REPORT was received from the Board established to deal with the dispute between the Canadian Express Company and certain of its employees, being members of the Canadian Brotherhood of Railroad Employees, concerning alleged violation of the existing schedule and the dismissal of four employees. The Board was composed as follows: His Honour Judge R. Ruddy, Whitby, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. F. H. McGuigan and J. G. O'Donoghue, Toronto, nominees of the company and employees respectively. The award was unanimous, and was accompanied by advice to the effect that most of the matters in dispute had been amicably adjusted.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the Canadian Express Company and certain of its employees, being members of the Canadian Brotherhood of Railroad Employees.

To the Honourable T. W. Crothers, K.C., Minister of Labour, Ottawa.

The Board of Conciliation appointed by you to investigate this dispute met in Toronto on October 1, 10, 11, 18 and 19, and in Montreal October 16, and were attended by Mr. M. J. Dundass, the officer for the Canadian Brotherhood of Railroad Employees, representing the said Brotherhood and the men. Mr. E. Allen, superintendent of the Canadian Express Company, and Mr. W. E. Norman, assistant superintendent, represented the company at Toronto, and Mr. A. J. Seaton, superintendent of the company, and Mr. Victor Bell, represented the company at Montreal. Mr. G. W. Hickey, the company's agent at Hamilton, was present for the company in connection with the cases from that city, and Mr. James Overend, the company's agent at London, was present in the interests of the company in the cases from London. Besides the following witnesses gave evidence: Arthur Corsant, a constable at London; J. Caniff, Manser Bowers, B. Hammond, Thomas Turner, J. H. McGill, S. Sicord and L. Wright.

The dispute was as to whether the company had, in violation of the schedule, discharged certain of its employees from the services of the company. The interpretation of certain articles of the schedule and rules in effect between the company and the men was also in dispute. Every opportunity and effort were made by the Board to have the matters in dispute amicably settled by the parties, but owing to the nature of some of the charges it was seen to be impossible for amicable adjustment, and the Board proceeded to take the evidence. Each case was then taken up by the Board and considerable evidence was adduced by both parties.

The following cases were inquired into:

Messrs. McGill and Turner were discharged at Hamilton. The majority of the Board are of the opinion that the company was justified in dismissing them because of the circumstances surrounding the case and as a lesson to all parties concerned and in the interests of discipline. Mr. O'Donoghue, in view of the salutary lesson taught and the length of service and general calibre of the men involved, is of the opinion that the company's interests would not suffer by the re-employment of the men.

Hammond was dismissed at London. While not agreeing that all the charges against Hammond were proved, sufficient was shown to justify the company's action.

The other cases in dispute have been amicably arranged and need no further reference.

The Board desires to express its appreciation of the fairness displayed by all parties concerned, as well as of the conciliatory spirit shown by the company, while at the same time endeavouring to maintain necessary discipline. The men were not less considerate and the Board feels that relations hereafter between all parties will be of a satisfactory character.

All of which is respectfully submitted.

Dated at Toronto, this nineteenth day of October, A.D. 1918.

Report of Board in Dispute between the Winnipeg Electric Railway Company and its motormen, conductors, etc.

A REPORT was received from the Board established to deal with the dispute between the Winnipeg Electric Railway Company and certain of its employees, being members of Winnipeg Division No. 99, Amalgamated Association of Street and Electric Railway Employees of America, concerning wages. The Board was composed as follows: the Honourable Mr. Chief Justice Mathers, Winnipeg, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. Isaac Pitblado, K.C., and Robt. S. Ward, Winnipeg, nominees of the company and employees respectively. The award was unanimous, and contained certain recommendations regarding additions to be made to the present existing agreement. The award was accepted by both the company and the employees.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Winnipeg Electric Railway Company, employer, and certain of its employees, being members of Winnipeg Division No. 99, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the
Hon. Thomas W. Crothers, K.C.,
Minister of Labour, Ottawa.

Sir,—

The undersigned, members of a Board of Conciliation and Investigation established on the eighteenth day of September, 1918, under the provisions of the above mentioned Act, relative to the differences above stated, have the honour to report as follows:

The Board held its first meeting on September 26, A.D. 1918, and thereafter held meetings in the course of the enquiry and negotiations on September 27 and 30, and October 1, 2, 3, 4, 7, 8, 9, 10 and 11.

The company was represented by Mr. A. W. McLimont, general manager; Mr. F. Butler, general superintendent, and Mr. Lawrence Palk, assistant general manager of the company, and the employees were represented by Mr. M. Sinclair, member of the general executive board of the Amalgamated Association of Street and Electric Railway Em-

ployees of America; Mr. Alfred Scoble, secretary and business agent of Winnipeg Division No. 99, and Mr. Alexander Gannack, president of Winnipeg Division No. 99.

Upon opening of the enquiry it appeared that the matter in dispute was a demand by the motormen and conductors employed by the company for a large increase in rates of pay and the number of employees affected is about 950. It further appeared that a Conciliation Board appointed under the said Act inquired into the rates of pay and working conditions of these same employees during the month of May, 1917, and that as a result of said investigation an agreement, terminable on the first May, 1918, was arrived at establishing the following rates of pay:

For the first six months, 28c per hour;
For the second six months, 30c per hour;
For the second year, 31c per hour;
For the third year, 33c per hour;
and thereafter, 36c per hour.

On the eighteenth February, 1918, a new agreement was entered into between the company and its motormen and conductors, to take effect on the first of May, 1918. This latter agreement was signed on behalf of the company by Mr. McLimont, general manager, and on behalf of the motormen and conductors by Mr. A. Gannack, T. H. Cheadle, C. A. Tanner and A. Scoble, and contained the following clause:

"Witnesseth, that in the event of competition to our street railway service as supplied by jitneys being abolished at the expiration of their license year, March 31, 1918, that on and after the first May, 1918, the following wage schedule shall take effect, continue in force and be binding upon the company and the motormen and conductors from May, 1, 1918, to May 1, 1919, and thereafter from year to year until changed by the parties hereto. Either party desiring to change this agreement on May 1, 1919, or any subsequent year, shall notify the other party in writing of a desire to change at least 30 days before such date."

The new rates of pay provided were as follows:

For the first six months, 30c per hour;
For the second six months, 32c per hour;
For the second year, 33c per hour;
For the third year, 35c per hour;
and for the fourth and succeeding years of continuous service with the company, 39c per hour.

The jitney competition was eliminated, and the new rates went into effect on May 1, 1918, and have been paid since that date.

Notwithstanding said agreement, on August 26, 1918, the motormen and conductors, through their secretary and business agent, Mr. Scoble, wrote the company's manager a letter asking that on and after September 15 the following rates of pay be granted:

For the first three months, 47c per hour;
For the next nine months, 55c per hour;
and thereafter, 60c per hour; and overtime to be paid at the rate of time and a half.

The letter informed the manager of the company that the unanimous conviction of the members of the union expressed at a mass meeting was that it was out of the question for the men to attempt to face another winter under prevailing conditions; that the only way out of the desperate situation in which they found themselves was an increase of wages, and that for that reason they had decided to ask the management to put the new scale into effect. It was further stated that the members had not overlooked the fact that an agreement existed between them and the company, which did not expire until April 30 next.

On August 29 the general manager of the company replied, refusing to accede to the men's request, and giving the following as his reasons:

(1) That there existed an agreement governing the rates of wages, which does not expire until April 30 next.

(2) That the rates of wages asked are entirely exorbitant and far exceed the rates of pay received by men in similar employment and under similar conditions.

(3) That to accede to the demands would be putting the company into immediate insolvency.

On September 3 the men applied for a Conciliation Board, which application was acted upon by the Minister on September 18, appointing the present Board.

The first question which confronted the Board was the existence of the agreement before referred to. It was felt that no countenance could be given to the idea that employees were at liberty to disregard their solemn engagements, and that where an agreement had been entered into, no Board had the right to say that either party should be absolved from its binding effect however much the conditions may have changed since it was entered into, or either party desired to have it changed.

It was pointed out to the representatives of the men that both their initial letter to the company's manager and the letter to the registrar of the department, applying for a Board, contained an intimation that they would disregard their agreement if their requests were not granted.

Mr. Sinclair, on behalf of the men, disclaimed any right to break their agreement. He asserted that the men held themselves bound by the terms of their agreement and that all they meant by their application for a Conciliation Board and all they now asked was an opportunity of showing that, owing to the rapid advance in the cost of living, the present scale of wages was inadequate to supply them with a reasonable living, and that the company ought to substitute for the present rates whatever rates this Board should decide to be fair and reasonable.

The attitude of the company's manager was that the men were bound by the agreement entered into, but as the Minister had so far acceded to the request of the men as to grant a Conciliation Board, he felt it to be the company's duty to lay its case before the Board.

The demands of the men are based solely upon the inadequacy of the present rate of wages, owing to the high cost of living.

In support of their demands the men presented to the Board very full and carefully prepared statements showing the Winnipeg prices of the various necessaries of life and the great increase which had taken place in such prices in recent years.

On behalf of the company it was pointed out that the present rate of wages paid to motormen and conductors by the company is higher than that paid by any other street railway company in Canada, with the exception of Windsor, Ottawa and Vancouver. The rates paid in other cities are as follows:

	Junior.	Senior.
Montreal	31c	37c
Toronto	30c	37c
Hamilton	30c	37c
Port Arthur	30c	36c
Fort William	30c	36c
Hull	29c	36c
London	30c	35c
Windsor	36c	41c
St. John, N.B.	30c	36c
Ottawa	35c	39c
Halifax		32½c
Vancouver	40c	51c

In the case of Ottawa the rates were established by the unanimous decision of the Labour Appeal Board rendered August 23, last, and the St. John rates by the majority report of a Conciliation Board dated August 6, last, concurred in by the chairman and the labour representative, the nominee of the company vigorously dissenting.

In each of these cases the employees were represented by Mr. Sinclair, and the evidence as to the cost of living adduced before these boards was of the same general character as that presented to us.

The above mentioned rates of pay have in the great majority of cases been established within the past four months either by the award of a Conciliation Board or the agreement of the parties, and it will be noted that with respect to all of them, except in the cases of Windsor and Vancouver, which were affected by exceptional local conditions, the rates are (except in the case of Ottawa) lower than those at present in force in Winnipeg.

It appears by the evidence before us that the company has paid no dividend to its shareholders since December, 1915, and at the present time, notwithstanding the elimination of the jitney competition, the operating expenses and fixed charges of the railway exceed by several thousand dollars per month the railway's actual earnings, and that there is no source of revenue from which increased wages can be paid.

The company also furnished us with evidence of the general rate of wages paid in other occupations in the city, and, as to the increased cost of living, relied upon the tabulated statement prepared by the Department of Labour published from time to time in the LABOUR GAZETTE, and also a statement furnished by the Department of Labour as to the increased cost of living in the city of Winnipeg.

The employees claim that, although the present scale of wages was arrived at by agreement in 1918, the then existence of the jitney competition was a matter considered by them, and that they were induced to enter into the agreement because they believed it was the best they could do under the circumstances, and they claimed the right to go back to 1913 and take into consideration the enhanced cost of living since that time.

The representatives of the company, on the other hand, contended that if the 1918 agreement is to be ignored, the starting point for any readjustment of wages should go no further back than the date of the 1917 agreement, and that all the men ought to receive by way of increased wages would be sufficient to take care of the increased cost of living since that date.

The Board has carefully considered the 1918 agreement and the increased cost of living since its date; the 1917 agreement, and the increased cost of living since its date, and the increased cost of living from 1913 to 1918, and has taken account of all these factors in the recommendation hereinafter contained.

Further, it appears that in the case of Ottawa street railway men, the Labour Appeal Board was of opinion that an increase of 9 cents per hour over the rates existing there in 1916 would be sufficient to take care of the increased cost of living, the resulting scale of wages being: junior men, 35c per hour, and senior men, 39c per hour.

The cost of living in the city of Ottawa, according to the Labour Department statistics, is about 3 per cent less than the cost of living in Winnipeg. Formerly there was a much larger difference in the cost of living between Ottawa and Winnipeg, so that the percentage of increase has been greater in Ottawa than in Winnipeg.

The Ottawa street railway employees received an increase of 3c per hour in 1916, whereas from 1913 to 1916 the Winnipeg street railway men received no advance. In order, therefore, to place the Winnipeg employees upon a level in so far as increases in wages are concerned with those in Ottawa it would be necessary to add 12c per hour to the wages paid in Winnipeg in 1916.

These wages were:

For the first six months, 25c per hour;
For the second six months, 27c per hour;
For the second year, 28c per hour;
For the third year, 31c per hour;
For the fourth year and after, 34c per hour.

If 12c per hour is added to this scale, the result would be 37c, 39c, 40c, 43c and 46c.

In awarding 9c per hour to the Ottawa employees, the Labour Appeal Board had this to say:

"The Board is of opinion . . . Having regard to the increased cost of all commodities, while making allowance for the economies now practised by all as well as for the substitution of cheaper commodities, that conditions would be fairly met as regards the men by granting increases as follows: (a) motormen and conductors, an increase of 9c per hour over existing rates."

We have carefully considered the whole situation and have spent several days since the hearing of the parties was concluded in anxious and earnest deliberation with a view of arriving at something upon which we could all agree and at the same time be fair to both the company and the men. Notwithstanding that with its present revenue the company is unable to pay even the present rate of wages, we think its employees should be paid fair living wages and that increase of revenue must be sought for to enable the company to perform this duty towards its employees.

In addition to asking for increased wages the men asked that the period to elapse before the maximum wage is obtainable be reduced. We think that some concession in this regard ought to be granted by the company.

Upon a review of the whole situation our recommendation is that the company put into effect on and from the first day of October instant the following scale of wages:

For the first six months, 39c per hour;

For the second six months, 41c per hour;

For the second year, 44c per hour;

For the third and succeeding years of continuous service in the employ of the company, 47c per hour.

The men also asked that they be paid at time and a half for overtime. We think this is reasonable and should be consented to by the company.

We recognize the fact that in order that the company may be able to pay these increased wages an increased revenue must be obtained.

In Bulletin No. 26, issued by the American Electric Railway Association War Board, dated August 1, 1918, there is this statement:

"With respect to the relation of the wage increases granted to-day to the financial conditions of the companies concerned, the arbitrators made the following statement and recommendations in each case: 'This increase in wages will add substantially to the operating costs of the company and will require a reconsideration by the proper regulating authority of the fares which the company is allowed by law to collect from its passengers.' This is not a question turning on the history of the relations between the local street railways and the municipalities in which they operate. The just claim for an increase in fares does not rest upon any right to a dividend upon capital long invested in the enterprise. The increase in fare must be given because of the immediate pressure for money receipts now to keep the street railroads running so that they may meet the local and national demand for their services. Over-capitalization, corrupt methods, exorbitant dividends in the past are not relevant to the question of policy in the present exigency. In justice the public should pay an adequate war compensation for a service which cannot be rendered except for war prices. The credit of these companies in floating bonds is gone. Their ability to borrow on short notes is most limited. In the face of added expenses, which this and other awards of needed and fair compensation to their employees will involve, such credit will completely disappear. Bankruptcy, receiverships and demoralization, with failure of service, must be the result. Hence our urgent recommendation on this head."

We adopt the above quoted extract as our own. The present financial situation of the Winnipeg Street Railway Company is not different from that of a great many other street railway companies in the United States and Canada.

With respect to the duration of the

present agreement, we would recommend that some such provision as is embodied in the report of a Conciliation Board between the Canadian Northern Express Company and its employees, published in the September number of the LABOUR GAZETTE, should be adopted. and for the reasons stated in that report. We therefore commend to the favourable consideration of the parties the following as an addition to their existing agreement:

"That the new rates of pay shall continue in force until terminated by a 30-day notice by either party after the conclusion of peace between Great Britain and her present enemy nations, and that until that time there shall be no strike of employees and no lockout by the employer; provided, that there shall be a revision of the wage scale at the expiration of every six months hereafter if it appears that since the last revision of wages there has been a general increase in the cost of living of 10 per cent or more, in which case an increase of wages shall be granted sufficient to absorb such increased cost of living. The cost of living statistics tabulated by the Department of Labour and published in the LABOUR GAZETTE after the expiration of such six-monthly period shall be accepted as conclusive as to the fact of such increase, if any, and the extent thereof. Provided, further, that should any dispute take place as to the interpretation of the existing rules and regulations or as to the right of any employee or employees to an increase or the amount thereof, in accordance herewith, or as to carrying out the existing rules, the parties agree to refer the same to the Labour Appeal Board, or to a Conciliation Board appointed under the Industrial Disputes Investigation Act, 1907, if the employees prefer the decision of such latter Board. In the event of an application being made for a Board under the said Act, the application may be made by either party, and in such application it shall not be necessary to make the statements required by subsection 1 (b) of section 15 of the said Act, as amended."

All of which is respectfully submitted, this eleventh day of October, 1918.

(Sgd.) T. G. MATHERS,
Chairman.

(Sgd.) R. S. WARD,
Member of Board.

(Sgd.) ISAAC PITBLADO,
Member of Board.

Report of Board in Dispute between the Bell Telephone Company of Canada, Limited, Toronto, and its operators, clerks, messengers, etc.

A REPORT was received from the Board established to deal with the dispute between the Bell Telephone Company of Canada, Limited, Toronto, and certain of its employees, being operators, clerks, messengers, etc., members of Local Union No. 83-A, International Brotherhood of Electrical Workers, concerning wages and working conditions. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. E. H. Ambrose, Hamilton, and Fred. Bancroft, Toronto, nominees of the company and employees respectively. The award was unanimous and was accompanied by a memorandum of agreement signed by both parties to the dispute.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Bell Telephone Company of Canada, Limited, em-

ployer, and certain of its employees, being operators, clerks, messengers, etc., members of Local Union No. 83-A, International Brotherhood of Electrical Workers, employees.

The Honourable
T. W. Crothers, K.C., M.P.,
Minister of Labour, Ottawa.

Sir,—

The Board of Conciliation established by you herein has the honour to report as follows:

On Wednesday, the second day of October inst., the Board met pursuant to appointment in Judge Winchester's Chambers, in the City Hall in Toronto, and all the members were present. The representatives of the employer and of the employees were in attendance at the first and at all subsequent sittings.

Sittings were held on October 2, 3, 4, 5 and 7, 1918, at all of which each member of the Board attended.

By continued effort one disputed point after another was amicably adjusted, until finally a complete schedule of rules, regulations and rate of wages was framed and agreed to. Your Board has therefore pleasure in reporting an agreement between the employer and employees on all matters, which agreement has been reduced in writing and signed by the parties, and is returned to your department herewith.

All of which we have the honour to respectfully submit.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) E. H. AMBROSE,
For Employer.

(Sgd.) FRED. BANCROFT,
For Employees.

Hamilton, October 7, 1918.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Bell Telephone Company of Canada, Limited, employer, and certain of its employees, being operators, clerks, messengers, etc., members of Local Union No. 83-A, International Brotherhood of Electrical Workers, employees.

Articles of agreement as to rules and regulations and rate of wages entered into between the employer and the employees in Toronto.

All Exchanges in Toronto.

ARTICLE 1.

1. An operator who has left the service of the employer in Toronto and returns to such service within six months thereafter shall receive the scale of wages contained in this schedule according to the length of such previous service.

An experienced operator from another company shall be given credit as to wages for such previous experience as she has had on similar equipment and operating methods, provided her absence from such previous experience is not longer than six months.

2. Promotion in all departments shall be made according to seniority with efficiency. (Present practice.)

3. Long distance messengers, when vacancies arise, may be promoted to long distance work provided they are at least 16 years of age. (Present practice.)

4. When an operator declines promotion, she may be allowed to retain her position, but shall forfeit her seniority to the one promoted and the operator next in line be given the promotion. (Present practice.)

ARTICLE 2.

Clause 1.—All operators with one year's experience or over with the employer shall receive two weeks' holidays with pay for each year's serice with the employer, and in case of leaving the service before receiving holidays to which she is entitled under this rule she shall receive equivalent pay in lieu thereof. Senior operators in all departments shall, as far as practicable, be given preference in fixing dates for holidays.

2. Operators may, with the consent of the superintendent of service, be permitted to exchange holiday periods. (Present practice.)

3. Operators desiring Saturday afternoon off shall, with the consent of the chief operator, be permitted to take it without pay. (Present practice.)

4. Operators shall have every third Saturday afternoon off with pay in so far as the necessities of the employer's service will permit, and in such cases where Saturday afternoon cannot be given, the afternoon of another day shall be given in lieu thereof.

ARTICLE 3.

Clause 1.—No operator shall work more than six days in any one week. Overtime work and

work on Sundays shall be paid for at the rate of time and one-half. (Present practice.)

All work done on holidays shall be paid for at the rate of double time. Holidays are New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day, and Christmas Day.

ARTICLE 4.

Where an employee has a dispute with, or an alleged grievance against, the employer or any person placed in authority over her, she shall have the right to be accompanied by a committee chosen for the purpose by and from among her fellow employees who are members of her union, and with them bring the dispute or grievance promptly before the traffic superintendent and other proper higher officer or officers of the employer, if necessary, for consideration and adjustment. In all such cases if she has been dismissed and the parties to the conference agree that the facts do not justify the dismissal, she shall be forthwith reinstated and paid full wages for the time lost.

ARTICLE 5.

Clause 1.—Employees who are members of the I.B.E.W. will not be discriminated against by the employer's officials for such affiliation.

2. The rates of pay agreed on are minimum rates and shall not be construed to reduce the rate af pay of any employee now receiving a higher rate unless where changing from a higher paid to a lower paid position.

3. Duly elected delegates to a general convention of a union shall be granted leave of absence without pay for a reasonable period not exceeding four weeks, for the purpose of attending such convention, without loss of standing, provided the number of delegates shall not exceed three at any one period.

ARTICLE 6.

Clause 1.—The schedule of wages as herein contained shall take effect as of September 1, 1918, as to present employees.

ARTICLE 7.

Clause 1.—Eight hours shall constitute a day's work for day operators and they shall be given 30 minutes relief each shift. (Present practice.)

2. No operators shall work more than two hours without a relief, except in a case of emergency.

3. Night operators shall be allowed not less than two hours' rest in any night shift, and not less than three hours on Saturday night shift, except in a case of absolute necessity. On Sunday morning no day operator shall be required to be on duty before 8 a.m., and night operators shall not be required to report before 10 p.m. on Sunday.

4. Time worked in excess of the regular hours at present in practice or as fixed elsewhere herein shall be overtime.

ARTICLE 8.

Clause 1.—Pay envelopes shall be issued to the employees not later than the fifth and twentieth of each month at 4 p.m.

Employees shall receive their pay envelopes at the Exchange where they work, on pay day.

ARTICLE 9.

All local Long Distance and Information operators shall be paid the following rates according to length of service, and if an operator is transferred from one classification to another she shall have the benefit of her length of service and its corresponding rate of pay in the classification to which she goes.

LOCAL.

	Day.	Evening.	Night.	
At start, one month (including school time)	$10.00	$11.00	$12.00	per week.
End of 1 month	11.00	11.00	12.00	"
End of 3 months	11.00	11.50	12.50	"
End of 6 months	11.00	12.00	13.00	"
End of 12 months	11.50	12.50	13.50	"
End of 18 months	12.00	13.00	14.00	"
End of 24 months	13.00	14.00	15.00	"
End of 36 months	14.00	15.00	16.00	"
End of 48 months	15.00	16.00	17.00	"

LONG DISTANCE AND INFORMATION.

	Day.	Evening.	Night.	
*At start, one month (including school)	$10.00	$11.00	$12.00	per week.
End of 3 months	11.00	11.50	12.50	"
End of 6 months	11.00	12.00	13.00	"
End of 12 months	12.00	13.00	14.00	"
End of 18 months	13.00	14.00	15.00	"
End of 24 months	14.00	15.00	16.00	"
End of 36 months	15.00	16.00	17.00	"
End of 48 months	16.00	17.00	18.00	"
*End of 1 month	11.00	11.00	12.00	"

2. Wages per week for Long Distance messengers shall be $8.00 for day work and $9.00 for evening work, with an increase of 50 cents per week at the end of first six months.

ARTICLE 10.

Clause 1.—In case of an operator being sent to another Exchange or P.B.X., the change will be made without loss of time to the operator and she shall receive her car fare.

2. All operators working on Private Branch Exchanges in the city which are operated by the employer shall be classified as Exchange operators of the Long Distance grade of pay.

3. Day operators wishing to change time of shifts should be allowed to do so according to seniority.

Dated at Toronto, this fifth day of October, 1918.

Report of Board in Dispute between the John Inglis Company, Polson Iron Works, Canadian Allis-Chalmers Company, and their boilermakers, iron shipbuilders and helpers

A REPORT was received from the Board established to deal with the dispute between the John Inglis Company, Polson Iron Works, and the Canadian Allis-Chalmers Company, and certain of their employees, being members of the Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of Canada, Local No. 1, concerning wages. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed on the joint recommendation of the other two Board members, Messrs. James G. Merrick and James Higgins, Toronto, nominees of the company and employees respectively. The employers were members of the Employers' Association of Toronto, and the secretary of that body, Mr. Merrick, was also authorized to speak for the employers concerned. The award, which was signed by the chairman and Mr. Merrick, was accompanied by a schedule of wages, rules and regulations. The portion as to rules and regulations was concurred in by all the Board, but Mr. Higgins did not agree as to the rate of increased wages recommended and presented a minority report. Word was later received in the Department that the award had been accepted by the employees.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the John Inglis Company, Polson Iron Works, Canadian Allis-Chalmers Company, employers, and certain of their employees, being members of the Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of Canada, Local No. 1, employees.

To the Honourable
T. W. Crothers, K.C., M.P.,
Minister of Labour, Ottawa.

Sir,—

The Board of Conciliation herein has the honour to report as follows:

On Tuesday morning, October 8, 1918 the Board established by you herein consisting of James G. Merrick, James Higgins, and Colin G. Snider, met, pursuant to appointment, at No. 4 Queen street East, in Toronto, all members being present. The members of the Board were duly sworn and sittings of the Board were held on Tuesday, Wednesday and Thursday, October 8, 9, and 10, instant. All the members of the Board and representatives of the employers and of the employees attended each of the sittings.

Every effort that appeared to have a chance of success was made by the Board to induce and assist the parties to agree, and, after full discussion of each item, the shop rules and regulations returned herewith were agreed upon by the employers and employees, but they were unable to agree as to an increase in wages. After the parties announced that no agreement on wages could be come to at their final conference, the Board took this matter under consideration and recommend for acceptance by the employers and employees the increases set out in the schedule returned herewith as clause No. 23 of such schedule as being in the opinion of the Board just and fair according to the facts and arguments submitted and having regard to the conditions prevailing and likely to continue during the period for which our recommended rate of wages would apply, according to rule No. 21, if accepted by the parties.

This recommendation by the Board is concurred in by all the Board as to the schedule of shop rules and regulations, not including clause No. 23 dealing with rate of wages.

James Higgins, acting for the employees on the Board, does not agree to the rate of increase in wages recommended, as this increase is not in his opinion enough. He will send in a Minority Report on the question of increase in wages. James G. Merrick, acting for the employers, and Colin G. Snider, the chairman, concur in recommending the whole schedule, including the increase in wages recommended in clause No. 23 of the schedule.

All of which we have the honour to report.

Toronto, October 10, 1918.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) JAMES HIGGINS,
Appointed by Employees.

(Sgd.) JAMES G. MERRICK,
Appointed by Employers.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the John Inglis Company, Polson Iron Works, Canadian Allis-Chalmers Company, employers, and certain of their employees, being members of the Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of Canada, Local No. 1, employees.

SCHEDULE.

1. Boilermaker's work covered by this agreement is as follows: laying out, flanging, patching, rivetting, chipping, caulking, rolling, punching and shearing, bracing, testing, patch bolts, all tube work, or cutting apart or fitting any part of steam, air or water-tight work; the building or fitting up of any sheet iron or steel work made out of No. 16 gauge iron or steel or upwards, also oxy-weld and cutting.

2. A machine hand's work shall be working on a machine drill, air motor drill, plate planer, and a machine cutting and threading stay bolts.

3. As far as possible no mechanic shall be compelled to work with unskilled or insufficient help.

4. That the manufacturers supply safety first glasses to all men that need them, and supply individual lockers.

5. A day's work shall be nine hours a day, commencing at 7 a.m. and ceasing at 5 p.m.; Saturdays from 7 a.m. till 12 o'clock noon.

6. Night gangs—5 nights shall constitute a week's work (from Monday night till Friday night inclusive); work to commence at 6 p.m. and cease at 6 a.m., and shall be paid at the rate of 14 hours per night, with half-hour for lunch, and double time for all overtime. Every man shall have 24 hours' notice before changing from one shift to another.

7. Men working days and required to work all night shall be allowed a reasonable time to go home, and shall be paid overtime for the same.

8. All overtime in the shops shall be paid at the rate of time and a half from 5 p.m. till 12 midnight, and double time after 12. Overtime not to be compulsory, but shall be optional with the men.

9. Nine hours shall constitute a day's work on all new work outside of shop in the city, with 10 per cent added; overtime shall be time and a half from 5 p.m. till 12 midnight, and double time after midnight. New work outside of city shall be paid at the same rate as in the city, with all expenses paid.

10. All repair work done in the shop, or on the premises, or outside of shop but in the city, shall be paid at the rate of 10 per cent over and above rate of wages, and double for all overtime.

11. All repair work outside of city shall be paid at the rate of 10 per cent over and above the shop rate of wages, and double time for all overtime, and nine hours shall constitute a

day's work. This is contract or day work, with all expenses paid.

12. All holidays and Sundays shall be paid at the rate of double time. Saturday afternoons, time and one half till 5 p.m., and double time after 5 p.m. Holidays are: New Year's, Good Friday, Victoria Day, Dominion Day, Labour Day, Civic Holiday, Thanksgiving Day, Christmas.

13. Apprentices shall serve the term of four years, and must be between the ages of 16 and 20. At the end of the term of four years they shall receive boilermakers' wages. There shall be one apprentice for the shop and one for every five mechanics employed, and they shall be given an opportunity to learn all branches of the trade and not kept on one class of work more than six months. All apprentices shall be bound.

14. Improvers can be taken from the ranks of the helpers on the recommendation of the shop foreman and shop committee, provided they have served two years as boilermakers' helpers, and they shall receive an increase every six months till the end of their term of an additional two years.

15. All stay-bolt hand rivetting shall be done by two boilermakers and holder-on to a gang.

16. All caulking done with a long-stroke pneumatic hammer shall be done by two boilermakers.

17. All double-long-stroke pneumatic hammer work shall be done by two boilermakers.

18. Any person or persons governed by this agreement having a grievance will first make a personal effort to adjust same with foreman. Failing in this, it will be turned over to the shop committee, who will in turn first confer with the foreman, and finally with the manager, if necessary, to adjust it satisfactorily.

19. If, upon investigation, an employee governed by this contract has been discharged unjustly, he shall be reinstated and paid for all lost time.

20. Business agents representing local unions shall be permitted to enter shops during noon-hour, but must promptly leave works upon expiration of same.

21. This agreement is to continue in force for one year from the date on which it comes into effect, subject only to a reconsideration of the rate of wages at the end of six months if the cost of living shown by the LABOUR GAZETTE has materially altered in the meantime. Thirty days' notice is to be given for any desired change.

22. In case of any dispute or difficulty arising in the shop, there shall be no cessation of work until every effort of adjustment has been exhausted.

23. Each boilermaker is to receive 3½c increase on the rate of wages he is being paid on October 10, 1918, such increase to take effect as of September 15, 1918. Each boilermaker's helper and each machine-hand is to receive 3 cents increase on the rate of wages he is receiving on October 10, 1918, such increase to take effect from September 15, 1918.

Dated at Toronto, this tenth day of October, A.D. 1918.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) JAMES G. MERRICK,
For the Employers.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the employers of the John Inglis Company, Polson's Iron Works, and the Canadian Allis-Chalmers Company, all of the city of Toronto, and their employees, namely, the boilermakers, machine hands and helpers, members of the Canadian Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of Canada, Local No. 1, Toronto.

To the Honourable
Thomas W. Crothers, K.C.,
Minister of Labour, Ottawa.

Dear Sir,—

Pursuant to your appointment, dated September 27, A.D. 1918, the Board of Conciliation, to which the above dispute was referred, proceeded with the hearing of the parties involved in the city of Toronto on October 8, and concluded on October 10, 1918. The employers were represented by the following gentlemen, namely, Mr. Bate, of the Canadian Allis-Chalmers Company, Mr. Inglis, of the John Inglis Company, and Messrs. Millar and Taylor, of the Polson Iron Works Company. Representatives of the employees were: Messrs. Bray, Outhwaite, and Kingdon. Efforts to bring about a settlement by conciliation met with a fair amount of success. The different matters pertaining to the schedule were adjusted to the satisfaction of both parties concerned and the Board concurred with the same. The majority report, which I am sorry I could not agree to with the other members of the Board, consists of clauses 22 and 23 in

the schedule submitted to you *re* the question of increase in wages. The representatives of the employees asked for an increase of 10 cents per hour above the present rate of wages for boilermakers, machine hands and helpers, their contention being that the boilermakers, machine hands and helpers working in other shops, namely, railroad shops and shipyards, were receiving a larger wage than the employees of the above firms, and having always received a larger wage than the employees of the railroad shops and yards, they contend that they will not work for any less. The employees claim that their work is more strenuous and subjects them to deafness, and therefore they cannot follow up their work to the age limit of other trades. The employees agreed to take a lower increase than their original request, namely, all boilermakers receiving less than 62½c per hour to be granted an increase of 7½c per hour above the present rate of wages, and all boilermakers receiving over 62½c per hour be granted 5c per hour above present rate of wages; all machine hands and helpers to receive 7½c per hour above present rate of wages. Representatives of the employers would not consider the request, and, again, the employees proposed that they be granted an increase of 5c per hour above the present rate of wages, and another 5c on January 1, 1919, which was rejected by the employers.

The employers offered a 5 cent increase all round, with the proviso that any man who had received an increase since March 1, 1918, said increase be deducted from the said 5 cents they offer now.

In my opinion I cannot see why such a small offer should be accepted, as the employees of the above firms are not receiving the wages in proportion that other corporations are paying.

In my humble opinion, that in fairness to the employees who are all engaged on marine work of great importance, they should receive the same considerations that are given to others of the same trade who follow the same occupation.

Respectfully submitted,

(Sgd.) JAS. HIGGINS,
Representative for the Employees.

October 11, 1918.

Report of Board in Dispute between the Nicholson File Company, Port Hope, Ont., and certain of its employees

A REPORT was received from the Board established to deal with the dispute between the Nicholson File Company, Port Hope, Ont., and certain of its employees, being file workers, concerning wages, union recognition, and working conditions. The Board was composed as follows: His Honour Judge R. Ruddy, Whitby, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. A. E. Pipher and Chas. M. McElroy, Port Hope, nominees of the company and employees respectively. The award included a proposed schedule of wages and certain recommendations as to the settlement of the dispute. Advice was received in the Department that the award was acceptable to the company.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Nicholson File Company, of Port Hope, Ont., employer, and its employees, being members of File Workers' Federal Labour Union, No. 54, employees.

To the Honourable T. W. Crothers, K.C., Minister of Labour.

The Board of Conciliation and Investigation appointed by you to investigate this dispute met at the town of Port

Hope on October 22, 23, and 24, and were attended by Mr. H. W. Harper, Mr. L. Taylor, and Mr. A. Rowe, representing the men. Mr. E. M. Thurber and Mr. F. H. Briden, manager and superintendent, respectively, of the company at Port Hope, represented the employers.

The dispute was as to the rates of wages proper to be paid to the class of workmen in the company's employ, and as to pay for overtime, and also as to the proper wages for female workers engaged at the company's factory; and the employees asked that the company recognize their labour union by permitting the appointment of a committee from time to time in the matter of disputes.

Every opportunity and effort were made by the Board to bring about an amicable settlement without entering into the evidence, but the parties could not be brought together on all matters in dispute and the Board proceeded to take the evidence.

Evidence was submitted on behalf of the men showing the cost of living at Port Hope, and the rate of wages paid labourers engaged in similar work in Port Hope and other towns, and the company also submitted evidence as to wages paid for unskilled labour in similar institutions throughout the province.

The labourers contended that they were entitled to an increase of 23 per cent for all earning $3.00 or less per day, and 18 per cent increase over $3.00 per day and up to $3.50 per day, and 13 per cent above $3.50 per day, and an increase of 18 per cent on all piece work; and asked for female workers $2.50 for 10 hour working days. The company on the other hand contended that having recently increased the wages of their employees all round, the present rates under local conditions in Port Hope were sufficient.

The following witnesses were in attendance on behalf of the employees: Mr. A. Howe, Wm. Mallett, Wm. Lowe, Wm. Douglas, Chas. Lyall, W. L. Rathé, F. Page, and Chas. Cornthwaite.

The Board, after carefully considering the evidence submitted to them, and hearing the arguments of both parties to the dispute, have unanimously reached the conclusion that the following schedule of wages is a fair and proper one as between these employers and their employees at Port Hope:

Clause No. One.—The minimum rate for male and female employees below the age of 18 years be not less than 20 cents per hour to start, with an increase of 2½ cents per hour after one month's service, and an additional increase of 2½ cents per hour after they have been in the service of the company for three months.

Clause No. Two.—The minimum rate for male employees being 18 years or over be not less than 32 cents per hour, with an increase of 3 cents per hour after one month's service, and an additional increase of 2½ cents per hour after three months' service.

Clause No. Three.—That all male employees, 18 years or over, having more than three months' service and receiving less than 35 cents per hour, day work, to receive 15 per cent increase. Where this does not bring employee up to minimum rate he shall receive minimum.

Clause No. Four.—That all male employees having more than three months' service and who now receive 35 cents per hour or over, to receive an increase of 10 per cent.

Clause No. Five.—All employees on piece work to receive an increase of 10 per cent on piece work rates.

Clause No. Six.—All employees who are not covered by the above clauses to receive 10 per cent increase.

Clause No. Seven.—All employees being re-engaged on the same class of work will not have to serve a second probationary period.

Clause No. Eight.—Time and a half shall be paid on Sundays and the fol-

lowing holidays: New Year's Day, Good Friday, Empire Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day, and Christmas Day.

Clause No. Nine.—If any grievance arise during the term of this award the employer agrees to receive a committee of its employees from department affected, and, if possible, adjust said grievance, but there shall be no cessation of work until negotiations between the highest representative of both parties have failed to reach a settlement.

Clause No. Ten.—This award shall remain in force for six months, beginning on September 24, 1918, and shall continue in force after the said six months, unless 30 days' notice be given by either party of a desired change.

All of which is respectfully submitted.
Dated at Port Hope, October 24, 1918.

(Sgd.) ROBT. RUDDY,
Chairman.
(Sgd.) A. E. PIPHER,
Member.
(Sgd.) CHAS. A. MCELROY,
Member.

Report of Board in Dispute between the British Chemical Company, Trenton, Ont., and its carpenters and millwrights

A REPORT was received from the Board established to deal with the dispute between the British Chemical Company, Trenton, Ont., and certain of its employees, being carpenters and millwrights, members of Local No. 1622, United Brotherhood of Carpenters and Joiners, concerning wages. The Board was composed as follows: His Honour Judge J. F. Wills, Belleville, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. F. H. McGuigan, Toronto, and J. F. Marsh, Niagara Falls, nominees of the company and employees respectively. The award was unanimous, and contained recommendations as to increased wages and certain changes in the working conditions. The award was accepted by the company.

Report of Board

In the matter of the Industrial Disputes Investigation Act of 1907 and difference between the British Chemical Company, Limited, of Trenton, Ont., and certain of its employees, being carpenters and millwrights, members of Trenton Local, No. 1622, United Brotherhood of Carpenters and Joiners.

To the Honourable
T. W. Crothers, K.C., M.P.,
Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation appointed by you to investigate this dispute met at Toronto on October 18, A.D. 1918; at Belleville, on October 22, instant, and at Toronto on October 29 and 30, instant. There were present, besides the Board, at the several times mentioned: Mr. Mark H. Irish, of Toronto, and Mr. George Patterson, of Trenton, representing the British Chemical Company, Limited, and J. W. Galloway, of Trenton, representing the employees; and also at the sitting of the Board at Belleville, the witnesses for the employees who gave evidence were: John K. Young, Gilbert Sarles, and Alvin Jones, of Trenton, and at Toronto, John Cottam, of Toronto.

The dispute was as to the rate of wages to be fixed, the employees claiming they were lower than those of the same class outside the plant, and also the increased cost of food and clothing in Trenton since the last date of fixing wages on January 6, 1918.

We beg to report that we have taken evidence of the witnesses of both parties to this dispute and have gone thoroughly into the matter of the cost of food

and clothing in the town of Trenton at present, as compared with the prices prevailing in January, 1918, and we find that there has been an increase in such cost, and recommend in consequence of such increased cost the following as a reasonable and equitable settlement of the dispute:

Working Conditions for the Government of Carpenters and Millwrights Employed by the British Chemical Company, Limited, of Trenton, Ont.

1. This notice shall apply to all carpenters and millwrights employed by the British Chemical Company, Limited. All millwrights that are employed shall be specially classified as such.

2. Three shifts may be worked at such hours as fixed by the company from time to time. Eight hours shall be considered a full day or shift.

3. The rates of wages shall be:

Millwrights—seventy (70c) cents per hour;

Carpenters—sixty-five (65c) cents per hour.

4. All hours worked in excess of the above shall be considered as overtime and paid for at the rate of time and one-half; except work done on Sundays, Dominion Day, Thanksgiving Day, Labour Day, and Christmas Day, for which double time shall be paid.

5. Overtime shall only be worked in case of emergency, but the decision of the company shall be absolute as to the necessity. All employees will assist in obviating overtime as much as possible.

6. In case of misunderstanding as to the interpretation of this notice, any representative agreeable to the employees or selected by a majority of the employees concerned shall be recognized by the company in discussing complaints.

7. The above rules and rates of pay to become effective November 1, 1918, and continue in effect until May 1, 1919, and thereafter, except upon thirty (30) days' notice in writing (by either party) of their desire for change.

All of which is respectfully submitted.

Dated at Toronto, October 30, A.D. 1918.

(Sgd.) J. F. WILLS,
Chairman.

(Sgd.) F. H. MCGUIGAN,
Member for the Company.

(Sgd.) J. F. MARSH,
Member for the Employees.

Report of Board of Appeal in Dispute between certain firms in Toronto, being members of the Employers' Association of Toronto, and their blacksmiths, engineers, etc.

A REPORT was received from the Board of Appeal, to which was referred the dispute between certain firms in Toronto, being members of the Employers' Association of Toronto, and various classes of workmen, members respectively of the Brotherhood of Blacksmiths and Helpers, and of the Amalgamated Society of Engineers. The findings were unanimous.

Report of Board

Under the Industrial Disputes Investigation Act, 1907. Board of Appeal Under P.C. 1743.

Present: Honourable Mr. Justice Maclennan (chairman), Gus. Francq, S. R. Parsons, John W. Bruce, G. H. Duggan.

Re appeal in cases of certain firms, being members of Employers' Association of Toronto, and various classes of workmen, members respectively of the International Brotherhood of Blacksmiths and Helpers and of the Amalgamated Society of Engineers.

The Board of Appeal, having heard the parties through their representatives on the appeal and cross-appeal from the decision and award of the Board of Con-

ciliation and Investigation herein, dated September 27, 1918, examined the said decision and reasons of appeal, and having duly considered the same, renders the following decision:

The companies appealing from the award of the Board of Conciliation do so on four points:

(1) The rate of wages;
(2) Extra 10 per cent for night shifts;
(3) Readjustment of wages at the end of six months;
(4) The date from which the award is to be effective.

The most important question raised by the companies involved is with regard to the rate of wages, and the most numerous class of workmen affected are the general blacksmiths. In fixing wages, minimum rates of pay should be established; this is one of the principles laid down by the Order-in-Council, P.C. 1743, approved on July 11, 1918. Mr. Bate, for the employers, in presenting the reasons of appeal, submitted that in the absence of classification as to skill and output it was necessary to fix a minimum, and in the present scarcity of skilled labour it was necessary in all trades to hire men without certificates of competency; that minimum rates fixed a rate of pay for a trial engagement, and that the workman who shows competency in his trade is, owing to the large demand for such labour, very soon paid higher rates than the minimum.

The most numerous class of workmen affected by the award under appeal is that of general blacksmiths. It was contended for the employers that the trade of a blacksmith did not call for higher skill than that of boilermakers and machinists, and it was pointed out that the boilermakers and machinists in the shops in question entered into an agreement on April 1, 1918, at a rate of 55 cents per hour, and that on October 10, 1918, a Board of Conciliation, of which the chairman was the same chairman who rendered the award now under appeal, granted the boilermakers an advance of 3½ cents, bringing their rate to 58½ cents per hour. This has some bearing on the rate of 68 cents for general blacksmiths in the award under appeal. If the two trades are classed for about the same skill, it is difficult to understand why the same chairman should have made this difference. The McAdoo award now applied to railway employees gives properly qualified blacksmiths 68 cents, and while there are some firms in Toronto paying their blacksmiths that amount, it is not the prevailing rate for blacksmiths in ordinary industrial companies. Forging machine operators are now frequently unskilled workmen, the die setting or skilled part of the operation being performed by die setters rated as machinists. When workmen can be obtained capable of setting their own dies and operating as well as feeding their machines, no doubt higher rates will be paid.

The decision of the Board, therefore, is that the rate of pay for general blacksmiths be reduced from 68 to 62½ cents per hour, and forging machine operators be reduced to 57½ from 60 cents per hour, and with these amendments Rule 3 of the Schedule fixing rates of pay is confirmed. Men at present receiving more than these rates shall not be reduced.

The second question on which the employers appeal is the extra 10 per cent paid to the night shifts as provided for in Rule 4. The Board finds that it is the general practice to allow something additional for night work over the rates paid for day work. In some cases an additional half hour or more is added to the time worked at night, and in other cases an additional rate varying from 5 to 25 per cent is allowed. In this case the Board of Appeal sees no reason to interfere with the additional 10 per cent for night work allowed by Rule 4 of the Schedule of Rules. The rule is therefore confirmed.

The employers also appeal against Rule 7 of the Schedule of Rules providing for the date on which the in-

creased wages shall take effect and for the revision of rates at the end of six months. In this case the demand of the employees for increased wages was made and had been under discussion since the end of June, 1918, without arriving at any definite result. On August 7, a strike occurred which lasted for about two weeks, when the employees made an application for a Board of Conciliation and returned to work with the expectation that any increase in their wages which might be given them by the Board would be effective from the date of the application for the Board. The decision of the Board was made effective from August 20, 1918, which is in accordance with the Order-in-Council, which provides that any settlement of a dispute referred to a Board of Conciliation shall be effective not later than the date on which the application for a Board of Conciliation was filed. Rule 7 provides further that the agreement shall remain in effect for 12 months with a right to a reconsideration of the wages scale at the end of six months from August 20, 1918, if the cost of living has materially increased in the meantime. The right to readjust the wages scale at the end of six months is also in accordance with clause 16 of the Order-in-Council of July 11, last. The Board considers that the word "increased" should be struck out and replaced by "altered," in order to provide for a reduction in the wages scale if the cost of living in the meantime will have come down. With the substitution of the word "altered" for the word "increased," Rule 7 of the Schedule of Rules is confirmed.

The cross-appeal of the workmen is dismissed.

(Sgd.) F. S. MACLENNAN, Chairman.
(Sgd.) GUS. FRANCQ.
(Sgd.) S. R. PARSONS.
(Sgd.) JOHN W. BRUCE.
(Sgd.) G. H. DUGGAN.

Montreal, this twenty-fifth day of October, 1918.

REPORT OF ROYAL COMMISSION APPOINTED TO INQUIRE INTO THE ALLEGED UNREST EXISTING IN THE SHIPBUILDING INDUSTRY IN THE PROVINCE OF QUEBEC

A REPORT was received from the Royal Commission appointed under the Inquiries Act to inquire into the alleged unrest existing in the province of Quebec as between various firms engaged in the shipbuilding industry and their employees, with special regard to wages, working hours, overtime, and other conditions of employment. The Commission was composed as follows: The Honourable Mr. Justice F. S. Maclennan, Montreal (chairman), Mr. Thomas Robb, Montreal, and Mr. J. M. Walsh, Quebec. The award was accompanied by copies of signed agreements entered into between various firms and their employees; also recommendations as to the settlement of disputes in other localities where signed agreements had not been effected.

Report of Royal Commission

To the Honourable
T. W. Crothers, K.C., M.P.,
Minister of Labour, Ottawa.

Sir,—

The Royal Commission appointed under the Great Seal of Canada, on July 29, 1918, to inquire into alleged unrest existing in the province of Quebec between firms engaged in the shipbuilding industry and their employees, with special regard to wages, working hours, overtime, and other conditions of labour, and as to the nature and cause of the

grievances alleged, has the honour to report as follows:

The first meeting of the commissioners was held at the chairman's chambers, in the Court House, Montreal, on August 6, 1918, when the commissioners took oath of office and examined the complaints from different employees and applications for Boards of Conciliation which had been placed before the Commission by the Minister. The general plan of executing the Commission was discussed, and it was arranged to begin the inquiry in the city of Quebec, where the most serious grievances seemed to exist. On the following day another sitting was held in the Court House, Montreal, at which Captain W. J. Gerrard, C.E., was appointed secretary to the Commission, and, being present, entered upon the discharge of his duties. Mr. Bertrand, fair wages officer of the department, appeared and explained the efforts he had made to try and bring the employers and their workmen together in some of the shipyards where disputes had arisen. Mr. Cameron, of the Canadian Vickers, Limited, appeared and explained the working agreement between his company and the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America.

The Davie Shipbuilding and Repairing Company, Limited, of Lauzon, Quebec, and the representatives of the boilermakers, iron shipbuilders, blacksmiths and helpers were advised by telegram that the commissioners would be in Quebec on the following day to take up their complaints and disputes.

The Davie Shipbuilding and Repairing Company, Ltd.

On August 8 the commissioners sat in the Court House, in the city of Quebec, to investigate the complaints respecting the Davie Shipbuilding and Repairing Company, Limited. At this sitting there were about 200 strikers present. The Order-in-Council creating the Commission was read by the secretary, after which the chairman made the following statement:

"This Commission is not directly constituted like a court of justice; we are commissioners for the purpose of investigating and hearing any disputes which may exist between the shipbuilding firms and their employees, with the view, if possible, of restoring harmony between the employers and the workmen in order that the very essential and important work of ship construction may not be delayed or retarded during the great crisis through which our country is passing. I may say that the commissioners approach this matter with open minds, anxious to do justice to all parties and willing to hear fully all the complaints and representations which may be made, in order that any misunderstandings which may heretofore have existed or which at present exist between the employers and their workmen may be removed and harmony restored, so that this important work may go on. This is a time when there should be give and take between employers and employees. Nothing should be permitted to stand in the way of the very important work of shipbuilding and ship repairing, which should be proceeded with without interruption and to the utmost capacity of the plants so far as work is presented for them to do.

"With that view we hope to be able to bring about a better understanding, if misunderstandings exist, and to bring about an arrangement by which everybody will be satisfied, if both parties will be reasonable, and everybody will have to be reasonable at this time.

"We are willing to hear you at all reasonable length.

"The Commission proposes this morning to take up the troubles which have arisen at the Davie Shipbuilding and Repairing Plant."

Mr. J. P. Merrigan, third international vice-president of the International Union of Boilermakers, Iron Shipbuilders and Helpers of America, and Mr. Arthur Martel, of the general executive board of the United Brotherhood of Carpenters and Joiners, and vice-president of the Trades and Labour Con-

gress of Canada, appeared for their respective unions. Honourable A. Galipeault appeared at the second sitting as their counsel. Mr. Emile Gelly appeared for the National Union of the South Shore (Union Nationale de la Rive Sud). Mr. A. Bernier, K.C., appeared for the company. Mr. George Duncan Davie, of Lauzon, general manager of the Davie Shipbuilding and Repairing Company, Limited, was examined, and testified to the work which his company had on hand and the contracts which were in process of execution. The Davie plant has existed at Lauzon for about 28 years, and, at the time of the investigation, had in its employ about 600 workmen; last year it had as many as 1,500. Both steel and wooden ships are built at this plant, which is situate opposite the city of Quebec, on the south shore of the St. Lawrence river, and adjoins the two Government dry docks where large repairing work can be done. The plant could not be better situated for executing repairs to all sizes of ships. Additions and extensions to the company's plant are under construction which will cost in the neighbourhood of one million dollars when completed. Since the war several hundred vessels have been constructed, and at the time of the investigation a number of steel trawlers were on the stocks and some large steel vessels were under repair or construction. In addition to these several other vessels were under contract for repairs or new construction. Mr. Davie testified that climatic conditions during the winter months were a serious handicap, and that his principal competitors, particularly for repairing, were shipyards in New York and other places on the American seaboard where work could be carried on during the whole year. In May, 1917, the workmen had been given a general increase in pay of 15 per cent, and in May, 1918, a further increase of 20 per cent. Mr. Davie filed an agreement between his company and the South Shore National Labour Union which has been in force since March 21, 1918.

The wages paid to the different classes of workmen were the following:

Ship fitters, Sr.	80-60	cents per hr.
Ship fitters, Jr.	51-48-42 & 36	"
Ship fitters' helpers	36-32 & 27	"
Ship riggers	43	"

Overtime (night work and Sundays), double time on repairs.

Overtime (night work), time and one-half on new construction.

Overtime (Sundays), double time on new construction.

Sunday work only when extremely necessary.

Rivetting gangs were paid at piece work rate of $2.50 and $3.00 per hundred.

The rates above stated were accepted by the South Shore National Union on May 11, and went into operation on May 17, 1918.

The International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America, on May 23, 1918, made a demand for increased rates, a

nine hour day, and other conditions, and submitted a proposed agreement.

The International Brotherhood of Blacksmiths and Helpers, on June 22, 1918, submitted an agreement for execution by the company, asking for shorter hours and increased pay.

The company did not reply to either of these communications or demands, as it had already an agreement with the National Union, which was working satisfactorily.

An application for a Board of Conciliation from the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America, Local No. 380, the International Brotherhood of Blacksmiths and Helpers, Local Union No. 235, and the United Brotherhood of Carpenters and Joiners, Local Union No. 2033, was forwarded to the Minister by the third vice-president of the International unions, under letter dated July 12, 1918. This application claims to directly affect 290 workmen, and indirectly 460.

As the International and National unions were claiming the right to be recognized, the Commission requested that both submit their books for examination in order to see what representation each union had in the workmen in the yard. The books showed the following results: Out of 707 workmen whose names appeared on the pay-roll of the company, 250 were members of the International and 457 were members of the National union. The books further showed that the National union had 18 blacksmiths and the International 8, and that the National had 363 boilermakers and iron shipbuilders and the International 188 in the employ of the company.

On July 25 the company dismissed 10 of its employees for alleged failure to properly perform their work and other misconduct. On the following day 240 employees went on strike through sympathy for the 10 dismissed men, alleging that the men were dismissed because they belonged to the International union. It was therefore necessary for the Commission to investigate whether the company had proper and sufficient cause for these dismissals, or whether they had been dismissed on account of their membership in the International union. The discharged men consisted of six riveters, one holder-on, one assistant machinist, one helper, and one shipfitter, the latter being practically an apprentice. According to the evidence of Mr. Davie, the riveters had for some time been putting in 45 to 150 rivets a day of 10 hours. This was a very poor showing. Mr. Davie had personally watched these men on several occasions spending their time without proper results. The majority of them had been dismissed several times and taken back. A comparative statement of general work in the iron shipbuilding in May, June and July, 1917, with the corresponding months in 1918, shows that the workmen were doing this year less than 50 per cent of the work which they did in the previous year. It was established by two witnesses that one of the discharged men, a few days before the discharge, had thrown hot rivets, bolts and washers at a fellow workman, and also had made threats of bodily harm against him. Another of the dismissed men made threats to a crippled employee to induce him to join the International union, and also made a threat against Mr. Davie. The superintendent of the yard testified that the dismissed men were not working satisfactorily, were idling their time, and engaging in discussions and arguments with their fellow workmen, and that if he had had a free hand he would have dismissed them long ago. A special constable in the employ of the company made a report against several of the dismissed men, that they had been wasting their time, talking instead of working. He was not asked to report specially on the 10 dismissed men, but had the whole yard under his supervision. An opportunity was given to all the dismissed men to appear before the Commission. Nine of them appeared and gave evidence. They all assumed that they were

dismissed on account of their connection with the International union, but not one of them inquired from the manager or the superintendent why they had been dismissed. The dismissals were made after the company had obtained the advice of its solicitor that there was just and sufficient cause for the dismissals. The general manager of the company, on May 14, had posted up in the yard a notice in the following terms:

"It has been brought to my notice that there are certain parties in this yard who are trying to form a union. I have recognized the National Union of South Shore Labourers, and any employees of this plant trying to organize or cause friction through dealing with other unions, which are not recognized by this company, will be immediately discharged.

"Davie Shipbuilding & Repairing Company, Limited,

"(Sgd.) GEORGE D. DAVIE,
"General Manager."

The National union, at Lauzon, was organized in March, 1917, and is registered under the provisions of the Trade Unions Act, R.S.C., ch. 125. It succeeded an organization which had existed there for some time before. The secretary of the National union was examined on August 9, and testified that, on July 26, 1918, it had a membership of 510, all working for the company, with the exception of six members, and that from July 26 to August 9 the National union had taken in 125 new members; copies of its constitution and by-laws were filed as exhibits. The International union began organizing at Lauzon in March or April, 1918, and at the date of investigation its local organizer was Alfred Bourget, who, at one time, had been a workman for the company, and had been dismissed about February, 1918. Both Mr. Davie and his superintendent stated in evidence their willingness to take back the men who went on strike, in so far as their positions had not been filled, but they were unwilling to take back the 10 dismissed men. During the first two weeks succeeding the strike, 102 new men were taken on the works, and, according to the superintendent, the work in the yard was proceeding better than during the three months prior to the strike. The work was not seriously affected by the strike, the conditions were more settled, and the men were easier to handle. New men were taken on without distinction as to whether they were union or non-union men. The company was willing to deal with one union, but it did not think that it was possible to have two unions recognized in the same yard, as the existence of two separate organizations would lead to strife and reduce production. At the end of the first day's sitting, the chairman, in the presence of 150 or 200 of the strikers, after Mr. Davie had expressed his willingness to take the strikers back, advised them to return to their work, stating that their position would thereby be improved and that, in so far as the 10 dismissed men were concerned, the cause of their dismissal would be fully investigated by the Commission. The strikers did not accept this advice; they remained on strike.

Ten hours constituted a day's labour in this yard, except during the winter when the days are short when the men worked eight or nine hours. The company paid for overtime time and one-half on new construction, and double time on repairs, and also double time for all work on Sundays.

The investigation into the disputes connected with this company extended from August 8 to 15, 41 witnesses in all were heard. The shipyard was also visited and the actual conditions under which the men worked were inspected.

After full consideration and examination of the evidence, the commissioners are unanimous in finding that the wages paid since May, 1918, were reasonable, sufficient, and equal to any prevailing in the locality. The chairman and Commissioner Robb are of opinion that the dismissal of the 10 men was justified and

was made for sufficient cause, and that the sympathetic strike was not justified, but Commissioner Walsh does not concur in this finding on this one question. The commissioners were also of the unanimous opinion that nine hours should constitute a day's work and invited the general manager of the company and representatives of the National union to appear again before the Commission in Montreal. This resulted in a new agreement being entered into between the company and the National union, on September 7, 1918, providing for a nine hour day, for overtime payments, for the adjustment of disputes, for wages at the rates which prevailed since May, 1918, and for the continuation of the agreement during the duration of the war subject to such changes in rates of pay as fluctuation in cost of living may justify, such adjustment to be made on February 1, 1919, according to the fluctuation in the cost of living shown by the LABOUR GAZETTE.

A signed triplicate of the Agreement accompanies this report.

Quinlan and Robertson, Limited, and Quebec Shipbuilding and Repair Co., Ltd.

The Commission investigated the complaints with reference to these two companies at Quebec, on August 15, 16, 17, and 19, 1918.

Mr. Albert E. Laroche, local manager, appeared for Quinlan & Robertson, Limited; Mr. R. A. Carter, vice-president and managing director, and C. L. Campbell, superintendent, appeared for the Quebec Shipbuilding and Repair Company, Limited, and Messrs. Arthur Martel and Alfred Robitaille appeared for the United Brotherhood of Carpenters and Joiners of America.

Quinlan & Robertson, Limited, are general contractors, have carried on that business for a number of years, and, in July, 1917, obtained a contract from the Imperial Munitions Board for the construction of a number of wooden ships. The work of these ships was well advanced at the time of the investigation. The company at that time had about 700 men on its pay-roll. A schedule showing the rate of wages paid to all trades was filed; carpenters were paid from 40 to 45 cents per hour; joiners, 40, 45 and 50 cents; caulkers, 40 and 45 cents per hour; night gangs were allowed 13 hours for 12½ hours' work, and for Sunday an hour or two extra time was allowed; no extra pay was given for overtime; 10 hours constituted the day's work.

When the company started shipbuilding it paid carpenters 34½ cents per hour, and advanced them from time to time as their ability increased. Thirty cents per hour was the ordinary rate for carpenters in Quebec when the company started to build ships. As a general rule the company provided tools; both union and non-union men were employed and the yard was run on the principle of open shop. Under date of June 20, 1918, the United Brotherhood of Carpenters and Joiners of America, Local No. 730, Quebec, applied to the Minister for a Board of Conciliation and Investigation, and asked for an increase in wages with a minimum of 50 cents per hour, nine hours per day, and time and one-half for overtime till midnight, and double time from midnight to 7 a.m., double time for Sundays, New Year's Day, Labour Day, and Christmas Day. About 20 of the workmen were heard. There was not much complaint about wages, but the men asked for shorter hours and extra pay for overtime.

The Quebec Shipbuilding and Repair Company, Limited, began business in October, 1916; its business is building and repairing wooden ships. It has a shipyard at the Island of Orleans, which was closed at the time of the investigation, and another shipyard in Quebec. A schedule of the rates of pay in both yards was filed. Shipwrights and carpenters were paid from 35 to 45 cents per hour according to their ability. No extra pay was given for overtime and 10 hours constituted a day's work. The company has built some wooden ships on its own account and has a contract from the Imperial Munitions Board. When

the company started its operations it was unable to secure a practical wooden shipbuilder in Quebec, but it brought an expert and some caulkers from New Brunswick who have since trained and instructed the local workmen secured in Quebec. As the work went on the workmen became more expert in the art of wooden shipbuilding and had got on so well that they planked the second ship for the Imperial Muntions Board in one half the time it took to plank the first. At the date of the investigation the work in the yard was proceeding satisfactorily and there was no shortage of men. Both union and non-union men were in the yard, which was run on the principle of open shop. Under date of July 8 the United Brotherhood of Carpenters and Joiners of America, Local No. 730, made an application to the Minister for the appointment of a Board of Conciliation and Investigation, and asked for increased wages, shorter hours, and extra pay for overtime. Before leaving Quebec the commissioners suggested to the representatives of both companies that in the opinion of the commissioners extra pay should be given for overtime work, and both companies readily acceded to this suggestion.

On September 6, 1918, the commissioners invited representatives of these two companies and of the workmen to meet the Commission in Montreal, when the commissioners advised the parties that it was desirable that an agreement for the duration of the war should be entered into with the carpenters and joiners, and submitted to them a draft agreement which would meet with the approval of the Commission, with the result that, on September 9, 1918, each company signed an agreement with the United Brotherhood of Carpenters and Joiners providing for a day of nine hours, extra pay for overtime, for the settlement of disputes, minimum rate of wages for carpenters, shipwrights, and joiners at 45 cents per hour; the agreement to continue during the duration of the war subject to such changes in rates of pay as fluctuation in cost of living may justify; such adjustment to be made on February 1, 1919, according to the fluctuation of the cost of living shown by the official reports of the LABOUR GAZETTE.

Signed triplicates of these Agreements accompany this report.

Tidewater Shipbuilders, Limited, and the Three Rivers Shipyards, Limited

The Commission investigated the complaints with reference to these two companies at Three Rivers on August 20 and 21, last.

Mr. Robert Duguid, manager, appeared for the Tidewater Shipbuilders, Limited, and Thomas M. Kirkwood, president and manager, Harold L. Clifford, superintendent, and Walter Joseph Shea, secretary-treasurer, appeared for the Three Rivers Shipyards, Limited; Mr. Arthur Martel appeared for the United Brotherhood of Carpenters and Joiners of America, Local No. 1793.

The Tidewater Shipbuilders, Limited, began putting up its plant in Three Rivers for steel shipbuilding in November, 1917, and at the time of the investigation had several steel ships under construction and about 450 workmen on its pay-roll. The plant is not yet fully completed. Ten hours constituted a day's work; overtime was paid at the rate of time and a half for week days and double time for Sundays and holidays. A schedule of the wages paid to all trades was filed before the Commission; carpenters' pay was 40 to 45 cents an hour; no distinction was made between union and non-union men. The United Brotherhood of Carpenters, in April last, asked for a minimum wage of 45 cents per hour and for a nine hour day. The Three Rivers Shipyards, Limited, began operations on August 20, 1917. Its business is entirely the building of wooden ships, and, at the time of the investigation, it had a contract with the Imperial Munitions Board. It employed between 700 and 800 men; when it started, carpenters were paid 35 cents per hour, and the company had no trouble getting

them at that rate. Overtime was paid at the rate of time and one-half, and double time was paid for Sundays and holidays. On July 23, 1918, the United Brotherhood of Carpenters and Joiners, Local No. 1793, wrote a letter to the Minister asking that the minimum wages for carpenters in both companies be fixed at 45 cents per hour, and that the hours of work be reduced to nine hours per day, with time and a half for overtime and double time for Sundays and holidays. At the time of the inquiry both these yards were paying their carpenters 40 to 45 cents per hour, and a few who were more expert, 50 and 52½ cents per hour in the yard of the Tidewater Shipbuilders, Limited. On September 10, 1918, the Commission invited representatives of both companies and of Local 1793 of the United Brotherhood of Carpenters to appear again, and the Commission suggested that it was desirable that an agreement should be entered into by each company with its carpenters, and the question then arose as to the standing of a local union at Three Rivers, known as Corporation Ouvrière Catholique des Trois-Rivières, which has been in existence since 1913. On further investigation at Three Rivers, it was found that this local union had much stronger representation in both yards than the United Brotherhood of Carpenters and Joiners of America. The companies were willing to enter into an agreement with the local union, but not with the United Brotherhood, and after further conference and discussions, an agreement was executed by each company with La Corporation Ouvrière Catholique des Trois-Rivières on September 23, providing for a day of nine hours, payment for overtime, provisions for settlement of disputes, a minimum wage for shipwrights, carpenters, joiners and caulkers at 45 cents per hour, the agreement to continue during the duration of the war, subject to such changes in rates of pay as fluctuation in cost of living may justify, such adjustment to be made on February 1, 1919, according to the fluctuation in the cost of living shown by the official reports in the LABOUR GAZETTE.

Signed triplicates of these Agreements accompany this report.

Fraser, Brace and Company, Limited

The Commission began its inquiries in connection with this company in Montreal on August 22. Mr. Charles Edward Fraser, president, and Mr. George G. Underhill, superintendent, appeared on behalf of the company; Mr. Joe Wall appeared for the Montreal Marine Trades Federation; Messieurs Narcisse Arcand, Arthur Lamothe, and Arthur Martel appeared for the carpenters and joiners; Mr. Ed. J. Sinclair appeared for the electrical workers, and Mr. Wilbrod Vachon appeared for the steamfitters and plumbers.

The company for many years has carried on business as general contractors. Its operations in the province of Quebec have been extensive. In November, 1917, it was given a contract by the Imperial Munitions Board for the construction of some wooden steamers not yet completed, and recently it has received from the French Government a contract for a number of wooden ships. The latter were obtained in competition with shipyards in Canada and the United States.

On February 15, 1918, the Montreal Marine Trades Federation made a demand upon the company for shorter hours and increased wages on behalf of blacksmiths, electrical workers, machinists, painters, sheet metal workers, carpenters, joiners, plumbers and steamfitters. The workmen engaged in wooden ships were mainly shipwrights and carpenters. The evidence submitted to the Commission shows that the company had no difficulty in getting all the workmen which it required. There was, however, a scarcity of skilled shipwrights and ship carpenters as the industry of wooden shipbuilding had practically gone out of existence at the time the company began wooden shipbuilding, at the end of 1917.

When the company started its shipbuilding operations it paid its carpenters 40 cents an hour, working 10 hours per day, with time and a half for all overtime. About the beginning of May these wages were increased to 45 cents, and on May 15, 1918, to 50 cents per hour. On or about May 16 a strike occurred, when some 300 men went out and remained away for 10 or 12 days. A fair conclusion from the evidence submitted is that they returned to work upon the understanding that the demand for shorter hours and other improved working conditions and higher pay would be considered. On June 15, 1918, the Montreal Marine Trades Federation applied to the Department of Labour for the appointment of a Board of Conciliation and Investigation. At the time of the strike, in May, the company had about 920 workmen in its employ, and at the time the matter was investigated by the Commission it had about 600 workmen.

The main dispute between the company and the representatives of the workmen was with reference to the number of hours which should constitute a day's work. The company had been working 10 hours per day except during the winter months, when, on account of shortened days, nine hours per day was worked. So far as the rate of wages is concerned, there was not much difference between the company and its men. The wages had been advanced from time to time as the men's capacity and ability justified an increase. After several conferences between the representatives of the company and of the workmen the Commission succeeded in bringing the parties together, with the result that, on September 4, 1918, an agreement was signed providing for a nine hour day and other working conditions, rates of wages for the different trades employed, and for a revision of these rates on February 1, 1919, according to any fluctuation in the cost of living which may be shown at that time by the official reports in the LABOUR GAZETTE.

A signed triplicate of this Agreement accompanies this report.

Montreal Dry Docks and Ship Repairing Company, Limited

This company carries on the business of repairing wooden and steel ships in all branches and has been under the present name and management for seven years. Mr. Thomas Ball, managing director, Walter Carroll, timekeeper, and William Brunton, superintendent, appeared for the company, and Messrs. Martel, Wall, Arcand, Lamothe and Vachon appeared for the workmen. At the time the investigation began, on August 23, 1918, the company had about 350 on its pay-roll. The schedule of the rates paid to the various trades was filed, showing boilermakers were paid from 47½ to 50 cents; helpers, 37½ to 42½ cents; carpenters and caulkers, 45 cents; and painters, 40 to 45 cents. These rates are about 10 cents an hour in advance of what was paid in the corresponding month in 1917. Before the war, in 1914, the general rate of wages for mechanics was about 30 cents per hour. The company worked 10 hours per day, and all overtime was paid as double time. In October, 1917, the business agent of the Local Boilermakers' International Union made a demand for increased wages and shorter hours. Some correspondence took place between the company and the Department. The company interviewed its workmen, with the result that they declared themselves satisfied with the then existing conditions and pay. In May, 1918, the boilermakers made a demand for 55 cents an hour, and, after an interview with their business agent, the company agreed to pay them 50 cents an hour, which was accepted by the union.

While the Commission was in session the Montreal Marine Trades Federation made a demand for increased wages and shorter hours. The company made a full disclosure of its relations with its workmen. Many of the latter had to be specially trained for the nature of the

work carried on by the company. Repairs to ships, as a general rule, were made in the harbour and the company was obliged to send its workmen to the ships where the repair operations were performed. Some of the workmen drew very substantial weekly payments. On the pay-roll for the week of June 27, 1918, one man drew $126.75; another, $112.75, and three men $77.50 each.

After numerous conferences between the general manager of the company, the secretary of the Montreal Marine Trades Federation, and the business agent of the boilermakers, the company agreed to accede to the demand for the nine hour day and for increased wages to the different classes of workmen employed by the company, as follows:

Boilermakers	55	cents per hour
Helpers	45	"
Heaters	25	"
Carpenters	50	"
Painters	45	"
Steamfitters and plumbers	55	"
Electrical workers	..	
Charge hands	55	"
Journeyman	50	"
Armature winders, 1st	50	"
Helpers	35	"
Motor attendants	40	"
Cranemen (overhead)	38	"
Cranemen (jib)	35	"
Temporary light men	37	"
Power station operators, per eight hour shift, $3.50.		

The boilermakers now refuse to accept the rate of 55 cents per hour, giving for their reason that the boilermakers in the railway shops are paid 68 cents per hour under the award of the Canadian Railway War Board.

As far as the commissioners have been able to ascertain from the investigation of different shipyards brought to their attention, 55 cents per hour appears to be the highest rate of pay for boilermakers in shipyards in the province of Quebec. The Montreal Dry Docks is willing to pay this rate, and, in the opinion of the commissioners, it should be accepted. In the opinion of the commissioners the foregoing rates for carpenters, painters, steamfitters, plumbers and electricians should also be accepted.

The Shipyards in Sorel

While the Commission was investigating conditions in some of the shipyards in the city of Montreal, the Minister brought to its attention communications received by him from the secretary of the International Brotherhood of Boilermakers and Iron Shipbuilders of America, Local Lodge No 373, at Sorel, requesting the Minister to permit the Commission to investigate the existing conditions there. It was alleged that the local lodge had 350 members; that the Leclaire Shipbuilding Company had dismissed several workmen because they had joined the union; that wages were low, the hours long, and that it was desirable to have the conditions investigated. The Commission sat at the Court House in Sorel, on August 29, 1918. Mr. J. M. Arthur Leclaire appeared, representing the Leclaire Shipbuilding Company, and Mr. J. P. Merrigan appeared on behalf of the boilermakers, and Mr. Narcisse Arcand appeared on behalf of the United Brotherhood of Carpenters and Joiners, Local No. 671. The Leclaire Shipbuilding Company had under construction a number of steel trawlers and wooden ships; had then about 450 workmen in its employ; worked 10 hours a day and paid from 27½ to 40 cents per hour in the various trades. Riveters were mainly paid by piece work at from $2.00 to $3.00 per hundred, some of the riveters earning as high as $5.92 per day. An alleged case of intimidation by dismissal was investigated, and it was established that the man in question was not dismissed on account of his connection with the union, but for proper and sufficient cause. The wages paid in the Leclaire Shipbuilding Company are substantially the same as are paid by the Sincennes McNaughton Line, Limited, in its yard at Sorel, where it builds and repairs its own boats and where carpenters are paid from $3.00 to $3.50 per day, boilermakers from $3.00 to $4.00 per day, and labourers from $2.00 to $2.50 per day. Substantially the same wages were paid by the Department of Marine in its ship-

yard at Sorel. Wages are lower in Sorel than in any of the other shipyards in the province of Quebec. The majority of the workmen there own their own houses, in connection with which they usually have a small garden where a considerable portion of their supplies are raised. Ten hours constitute a day's work; it is the general rule, and no instance was brought to the attention of the Commission where shorter hours were worked in any shop at Sorel. The International union was not organized to the extent represented by Mr. Aristide Cournoyer, secretary of the boilermakers, who stated in his communication to the Minister that the local lodge had 350 members.

A further conference was held in Montreal, on October 2, with the representatives of the Leclaire Shipbuilding Company and the Sincennes McNaughton Line, Limited, at which Mr. Arthur Martel, representing the carpenters, was present, and the whole situation was discussed. Labour in Sorel is plentiful at the wages now paid and men are advanced in pay according to their ability and efficiency. Extra pay is given for overtime and no shop or establishment in Sorel has adopted the nine hour day; they all work 10 hours and pay overtime rates for all work over 10 hours and for Sundays and holidays. The Leclaire Shipbuilding Company is willing to advance their wages as the cost of living increases, and claims it has done so in the past.

Under all the circumstances disclosed to the Commission, the hours of work and rates of pay in the shipyards at Sorel are in accordance with what prevails in the locality, and it is not deemed advisable for the present to make any recommendation.

The commissioners desire to place on record their appreciation of the manner in which all employers who appeared before them made full disclosure of their relations with their workmen and also of the readiness of the different unions to submit their books showing the membership in the respective organizations.

All trade unions doing business in Canada, in the opinion of the commissioners, should be required to register under the Trade Unions Act. Local unions do so, and all labour organizations having their principal place of business outside of Canada should, when they attempt to control labour in this country, be subject to the same rule.

Commissioner Walsh reserves his right to make a minority report on the situation in Lauzon and Sorel, and also with respect to the registration of trade unions.

The whole respectfully submitted,

(Sgd.) F. S. MACLENNAN,
Chairman.

(Sgd.) THOMAS ROBB,
Commissioner.

(Sgd.) J. M. WALSH,
Commissioner.

Montreal, October 2, 1918.

Minority Report

To the Hon. T. W. Crothers,
Minister of Labour.

Dear Sir,—

As member of the Royal Commission, instituted by an Order-in-Council to investigate the industrial unrest in the shipyards of the province of Quebec, I feel it is my duty in the circumstances to make a minority report in the cases of the Davie Shipbuilding Company, of Lauzon, Que., the situation in Sorel, the signing of agreements with independent labour organizations, and the registration of trades unions.

In the case of the Davie Shipbuilding Company, as you are aware, 240 men did not report to work in the morning of July 26, due to the fact that 10 of their men had been discharged July 25. The 10 men and the men that did not report to work were men belonging to the International union. During the inquiry several witnesses have been heard from the union, and have testified that on Monday, July 22, it was reported and known to every one that on Thursday,

July 25, 10 men belonging to the International were to be discharged, and they were discharged as the rumour had been circulated. Mr. Davie testified that these men had been discharged for cause. Asked what was the cause, he said that these men were not doing their work as they should, that they were neglecting their duty, but the testimony proves that they have never been told or reprimanded either by the foreman or the superintendent.

In reading Mr. Davie's testimony you will find contradiction. He said (page 27 on last line): "the cause is that they would not do the work," and then on page 37 of his testimony he said: "and I am to be criticized by 10 men. Never, sir. I cannot stand it from anybody," which in my opinion indicates that these men have been reported as criticizing Mr. Davie, and that they have been discharged on that account without ascertaining whether it was true or not, and without giving those men a chance to answer any accusations of the kind, and that when a Board of Conciliation had been applied for, the men have been brought before the Commission and denied ever having said anything of the kind against Mr. Davie. It has not been proven that these men were not doing their work. We have had before us the foremen of different gangs of men and they have testified that the 10 men discharged were amongst the best men in the yard, and that they were not neglecting their duty, and that they were very much surprised when they heard that they were discharged, for they know no charges against them.

Detective St. Laurent, who is in the employ of the company, testified that his duty in the yard was to see that nothing was stolen in the yard. Asked if he had anything to do with the men, he said that his duty was to see that they lose no time, as he considered that losing time when at work was stealing from the company, and that he looked after that also. Asked if the 10 men discharged were to his knowledge losing their time, he said he had never seen them losing time. Asked if he had ever received letters from the members of the National union against those men, he answered in the affirmative, saying that he had received letters; some were signed, others were not. He reported to the office of the company, but kept the letters. I asked that those letters be produced, but they have never been.

So in no evidence did they prove that the men were not doing their work as usual, and I sincerely believe that these men were discharged on account of reports of Detective St. Laurent that were given to the office and taken from letters that he had received from members of the National union and others, anonymously.

Mr. Davie complained that since there were two unions in his yard the men were losing their time canvassing other men to join their respective unions. It has been proven that the National union has used methods that would not have been permitted by other employers had he not consented and been favourable to it. In the month of July the National union posted cards saying that on the seventeenth every man in the yard had to have a card of the National union, otherwise he would be instantly discharged. Those cards bore the name of Geo. Davie. Mr. Davie denies having any knowledge of it, although he admits further in his testimony that it had been shown to him and that he had permitted same to be posted outside the yard. On the morning of the seventeenth all International men refused to take a card of the other union. It is on the following Monday, July 22, that they have been informed that 10 of their men were going to be discharged on Thursday, twenty-fifth, and they were discharged on that date as they had been informed. On the morning of the twenty-sixth, 240 men refused to go back to work unless the 10 men were reinstated, and they are still out. Mr. Davie said in his testimony that it was not a shipyard he was running; it was more of a hospital. He was then operating his plant with men of the National union.

It is clear in my mind that these men have not been discharged for neglecting their duty and that they should have been reinstated pending investigation.

SITUATION IN SOREL.

I sincerely regret that the majority, and, in fact, all the employers in Sorel, refused to come to an understanding with their employees, and I fail to see how the majority of the Commission did not see fit to make some recommendation for Sorel. Sorel is a town of about 10,000 population, with one industry, shipbuilding, and the building of boilers and engines for the ships. The men are the lowest paid on the continent in that industry. They have not had in the past any organization to protect them, and have, therefore, been more like slaves than free men. They have always been compelled to work for whatever they could get. As a result they are yet building ships for 30 cents per hour and work 10 hours per day. The majority of the Commission based their judgment on the principle that the majority of them own their own houses and have gardens. If we take into consideration the wages that have been paid and are paid yet, one can imagine the kind of house and garden they possess, and I personally protest against any system which penalizes a man in granting him low wages for all time because of his thrift in the past; and then it is not the majority that own their own houses and have gardens. The cost of living in Sorel is just as high as it is in other places in the province, while foodstuffs are as dear in Sorel as in Montreal. One can safely say that clothing and coal are dearer in Sorel than in Montreal, so I fail to see any reason why the majority of the Commission refuses to recommend an increase in the wages and the nine-hour day as established in other shipyards of the province. You will find in the majority report that 10 hours is the general rule, and that they are all paying about the same wages. I may say that apart from the private concerns, the Government is operating a shipbuilding and repairing yard in Sorel, and which I regret that the Commission failed to recommend an increase; more so do I regret that the Government is keeping their men under the same starving wages as the private concerns are. I hope the Government will realize the situation and pay at least what is paid in other shipyards in other parts of the province.

In conclusion I strongly recommend that some steps be taken to establish living wages and conditions based on the wages and conditions established in other shipyards of the province.

SIGNING OF AGREEMENT WITH INDEPENDENT UNIONS.

Regarding the signing of agreements between the Davie Shipbuilding Company, of Lauzon, the Tide Water Shipbuilding Company, and the Three Rivers Shipyards of Three Rivers with independent organizations of their employees.

I wish to strongly emphasize that, in my judgment, this will lead to further and more serious industrial unrest. The Commission was charged with power to investigate the conditions over an area covering practically all yards from Montreal to Quebec, or, in other words, the St. Lawrence river shipbuilding area. As you will note by the majority report an attempt has been made to have the companies, so far as possible, standardize the minimum conditions. The International unions were shown to be the predominant factor in this area, and the majority of agreements existing between the shipbuilding companies and their employees are executed with their respective International unions. In order therefore, to standardize not only wages and hours, but also to facilitate a general interchange of workers, it is advisable that all companies should enter into agreements with the same organization. Where this is not done it is plain to be seen that immediate friction would arise when men were required in the national interest to change their place of employment from one yard to another.

The independent organizations made no efforts on their own behalf to institute this inquiry, and, further, as the membership in some cases is confined clearly to men professing one religion, no recognition should be given to agreements existing between them and the companies referred to, and the companies should be advised to immediately recognize and make agreements with the various international organizations recognized generally in this area and throughout the other shipyards of Canada.

REGISTRATION OF UNIONS.

That section of the majority report recommending the registration of trades unions should, in my opinion, be entirely eliminated. There was no evidence submitted during the inquiry to show that lack of registration was in any way connected with the industrial unrest prevailing or that the registration of trade unions would remedy any of the existing conditions.

During the great number of years that this Act has been on the statute books of Canada, the larger trade unions, for reasons of their own, have not availed themselves of the option of registering under it, and I cannot see that any good would be served by this recommendation being complied with.

Yours very truly,

(Sgd.) J. M. WALSH,
Commissioner.

Agreement between Davie Shipbuilding and Repairing Co., Ltd., and Union Nationale des Ouvriers de la Rive Sud

1. Nine hours shall constitute a day's work and shall be worked from 7 a.m. to 12 noon and from 1 p.m. to 5 p.m. from Monday to Saturday inclusive.

2. All overtime shall be paid at the rate of time and one-half on new construction, and at the rate of double time on repairs, and all work on Sundays and the following Dominion holidays, to wit: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, shall be paid as double time whether on repairs or new construction.

3. Night shifts shall be worked from 7 p.m. to midnight and from 1 a.m. to 6 a.m., Monday to Friday. For all time worked outside of these nights overtime shall apply.

4. Should a man work on a shift to mid-day and then be notified to cease work and return to start on night shift, that night he shall be paid overtime rates for that night only.

5. The management will not discriminate against any employee or committee of employees who may from time to time be elected to represent their craft.

6. In the event of any disputes arising between the parties to this agreement, it must be referred to those interested as herein provided for, and no strike or lockout shall take place until such time as it is found that it is impossible to adjust same satisfactorily.

All complaints and grievances must first be reported to the foreman in charge of such work or department, who shall endeavour to adjust same; failing an adjustment, the matter shall be taken up with the works manager or general superintendent by a shop committee of the men and their representative, and they shall endeavour to reach a settlement. In the event of their inability to reach a successful adjustment of the dispute or grievance, the same shall be referred to the decision of three arbitrators, one to be chosen by the men or their representative, one by the company, and the third by these two, and, in the event of their not being able to agree, the third arbitrator shall be named by a judge of the Superior Court in Quebec.

7. To avoid strikes and to bring about satisfactory conditions, the business agent of the unions will be allowed free access to the yards or shops, when necessary, provided he will not interfere or cause the men to neglect their work, and provided he obtains permission from the company before entering the premises.

8. In the event of there being any shortage of labour from any cause, such as insufficient supply of men, the local unions will endeavour to supply, as far as possible, competent men from other districts.

9. In consideration of this agreement it is distinctly understood that the yards and shops are to be run on the principle of open shop, and the company shall be free to engage both union and non-union men.

10. The minimum scale of wages per hour shall be as follows:

Ship-fitters, Sr.	80-60	cts. per hr.
Ship-fitters, Jr.	51-48-42 & 36	"
Ship-fitters' helpers	36-32 & 27	"
Ship riggers	43	"
Ship riggers' helpers	32	"
Riveters, Sr.	48	"
Riveters, Jr.	43	"

United Brotherhood of Carpenters and Joiners—	
Ship carpenters	50 "
Carpenters	50 "
Caulkers	50 "
Joiners	50 "
Steamfitters and plumbers	55 "

11. This agreement shall apply to the company's shipbuilding yards and shops only.

12. This agreement will take effect on September 1, 1918, and shall continue during the duration of the war, subject only to such changes in rate of pay as fluctuation in cost of living may justify, such adjustment to be made on February 1 of each year, and according to the fluctuation in the cost of living, as will be shown by the official reports in the LABOUR GAZETTE.

13. There may be one apprentice to every five journeymen or majority fraction thereof, and he shall serve at least four years.

Signed and executed in triplicate at the city of Montreal, this fourth day of September, 1918.

For Fraser, Brace & Co., Ltd.:

(Sgd.) GEO. G. UNDERHILL,
Superintendent.

For the Montreal Marine Trades Federation:

(Sgd.) JOS. WALL,
Secretary.

In the presence of:

(Sgd.) F. S. MACLENNAN,
Chairman, Royal Comm.

(Sgd.) J. M. WALSH,
Commissioner.

(Sgd.) THOMAS ROBB,
Commissioner.

INDUSTRIAL DISPUTES DURING OCTOBER, 1918

EIGHT strikes, affecting approximately 1,086 employees, were reported as having commenced during October. There were in existence at some time or other during the month 25 strikes, directly affecting 4,801 workpeople. The total time loss on account of industrial disputes was estimated at 65,969 working days, as compared with 102,563 in September, 1918, and 42,086 in October, 1917. The time loss occasioned by the eight strikes which began in October was 11,552 working days, while a loss of 54,417 is charged to the 17 strikes commencing prior to October. Termination of disputes was reported in the case of seven of the disputes commenced prior to October. Six of the strikes which commenced during October terminated during the month, leaving the following 12 strikes, affecting approximately 1,282 workpeople, on record October 31: pottery workers, St. Johns, Que.; iron shipbuilders, Lauzon, Que.; moulders, Sarnia; painters, Toronto; pipefitters, Nobel; tailors, Brockville; knitting mill operatives, Toronto; cigarmakers, Hamilton, London, and Montreal; laundry workers, Vancouver, B.C.; waiters and waitresses, Regina; tailors, Ottawa; and telephone employees, Regina.

Disputes by Industries

The following is a review of the disputes by industries in the order in which these appear in the statistical table. A brief summary is given of the more important strikes.

MINES, SMELTERS AND QUARRIES. — There were three disputes in existence, involving 1,295 employees and a time loss of 9,307 working days. Two of the disputes were settled during the month. Work at the Fernie and Michel mines was resumed on October 8, the men accepting the order of the Director of Coal Operations providing for the single shift system and an investigation by a Provincial Royal Commission. Full particulars in regard to the terms of the order are given elsewhere in the present issue of the LABOUR GAZETTE. A strike of coal miners at Cardiff, Alta., for recognition of the union, which affected only 37 employees, was adjusted on October 9, the company conceding the men's demands. In the table under this group will be found reference to a lockout of pottery workers at St. John's, Quebec. This dispute arose as far back as the year 1913, at which time the employers affected, claiming to be unable to meet British competition in the pottery they were manufacturing, proposed to put in force a reduction in wages of approximately 25 per cent. The employees concerned, who had an agreement which had some time yet to run, refused to submit to the proposed reduction, but offered to accept a reduction of 15 per cent. The employers, however, claiming they were unable to operate at a profit unless they could put into effect the larger reduction, closed down their plant. Later on the companies were reorganized and started operations with a new labour force. As the operations of the plants concerned appeared to be no longer affected by the lockout or strike, reference to the dispute has not been carried in the LABOUR GAZETTE. Recently, however, circumstances have arisen which have brought about a revival of the difficulty, and the Department has deemed it desirable to place the dispute upon its statistical record.

METALS, MACHINERY, AND CONVEYANCES.—There were five strikes in existence in this group, involving 343 employees and a time loss of 8,873 working days. All of the strikes were carried

over from the previous month. One strike, that of machinists at Montreal, was terminated, leaving four unsettled strikes on the record at the end of the month.

WOODWORKING.—There was only one strike, involving 210 employees and a time loss of 1,050 working days. This strike—sash and door men at Winnipeg—which was carried over from the previous month, was settled early in October, the men returning upon the appointment of a Board of Arbitration.

CLOTHING.—There were two strikes in the clothing group, involving 108 employees and a time loss of 1,363 working days. One of these strikes, that of tailors at Brockville, was carried over from the previous month, and the other—tailors at Ottawa—commenced during the month. Both strikes were unterminated.

TEXTILES.—There was one strike in existence, involving 88 employees and a time loss of 2,288 working days. This was a strike of textile workers at Toronto, which was carried over from the previous month's record.

FOODS, LIQUORS AND TOBACCO.—There were two strikes, involving 71 employees and a time loss of 1,846 working days. Both of these strikes were carried over from the previous month's record and affected cigarmakers. In one case, that of cigarmakers who had been locked out at Toronto and Montreal, all of the employees with the exception of two secured work elsewhere.

TRANSPORTATION. — There were five strikes, involving 1,750 employees and a time loss of 29,210 working days. Two of these disputes—wharfmen at Quebec, and freight handlers on C.P.R., western lines—carried over from the previous month, were terminated during October. The freight handlers' strike was settled by negotiations between the parties in which the Hon. Senator Robertson assisted. It was agreed that all employees with the exception of 25 men at Calgary would be re-instated, and that the cases of the accepted men would be dealt with by the Canadian Railway Board of Adjustment. The other three strikes in this group which occurred during October were also settled during that month. These comprised street railway employees at Calgary, who had come out in sympathy with the freight handlers, conductors and motormen at Niagara Falls, who asked for the payment of wages on the basis of the McAdoo award and whose demands were granted, and about 250 elevatormen who went on strike at Fort William and Port Arthur for recognition of the union and increased wages. The elevatormen were later joined by the coal handlers. All employees returned to work October 27, upon the establishment of a Board of Conciliation and Investigation appointed under the Industrial Disputes Investigation Act.

PUBLIC UTILITIES. — There was one strike, involving 300 employees and a time loss of 2,400 working days. This was a strike of telephone employees at Regina who ceased work on being refused a revised schedule of wages or an arbitration board. The strike was unterminated at the end of the month.

MUNICIPAL EMPLOYEES. — There were two strikes, involving 261 employees and a time loss of 722 working days. Both strikes occurred during the month and affected civic employees at Calgary and firemen at Victoria. The former strike was in sympathy with that of the freight handlers at Calgary and terminated with the adjustment of that dispute. Firemen at Victoria who had presented a demand for shorter hours and increased wages were out only two days when the parties agreed to adjust the matter by negotiations.

MISCELLANEOUS. — There were three strikes in this group, two — laundry workers at Vancouver and waiters and waitresses at Regina—carried over from the previous month and unsettled at the end of October, and a strike of garbage collectors at Victoria, B.C., which occurred during the month. This strike, which affected about 35 employees and was for increased wages, lasted only three days when the men secured their demands.

INDUSTRIAL DISPUTES DURING OCTOBER, 1918

Industry or Occupation.	Particulars.	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO OCTOBER, 1918.		
MINES, SMELTER AND QUARRIES:—			
Coal miners, Cardiff, Alta.	Commenced September 28. For recognition of the Union, and against alleged dismissal of employee. Company recognized the Union. Work resumed October 5.	37	259
Coal Miners, Fernie & Michel, B. C.	Commenced September 4. Demand for single shift system in operation of mines. Settled by mediation through B.C. Department of Mines and Director of Coal Operations. Single shift granted. Work resumed October 8.	1,183	7,098
Pottery workers, St. John's, Que.	Commenced November, 1913. Against reduction in wages. Unterminated.	75	1,950
METALS, MACHINERY AND CONVEYANCES:—			
Iron shipbuilders, Lauzon, Que.	Commenced July 26. Demand for reinstatement of dismissed employees and for recognition of International Union. Unterminated.	239	6,814
Machinists, Montreal, Que.	Commenced March 23. Demand for increased wages and a nine-hour day. Settled by negotiations between the parties. Demands granted. Work resumed October 14.	43	473
Moulders, Sarnia, Ont.	Commenced September 12. For increased wages and recognition of union. Unterminated.	9	234
Painters, Toronto, Ont.	Commenced September 28. Protest against the use of a spraying machine. Unterminated.	22	572
Pipefitters, Nobel, Ont.	Commenced June 29. Demand for increased wages. Unterminated.	30	780
WOODWORKING:—			
Sash and door men, Winnipeg, Man.	Commenced September 27. For increased wages and a nine-hour day. Men decided to submit their differences to a Board of Arbitration. Work resumed October 7.	210	1,050
CLOTHING:—			
Tailors, Brockville, Ont.	Commenced September 3. Demand for increased wages.	13	338
TEXTILES, CORDAGE AND CARPETS:—			
Knitting mill operatives, Toronto, Ont.	Commenced June 12. Demand for increased wages. Unterminated.	88	2,288
FOODS, LIQUORS AND TOBACCO:—			
Cigarmakers, Toronto and Montreal.	Commenced May 16-20. Employees locked out. Employees secured work elsewhere.	.....	.....
Cigarmakers, Hamilton, London & Montreal.	Commenced July 11. Employees at Hamilton presented demands for increased wages and one company operating at Hamilton, London and Montreal closed its doors. General strike or lockout unterminated.	71	1,84
TRANSPORTATION:—			
Wharfmen, Quebec, Que.	Commenced August 1. For increased wages. Some employees returned, others secured work elsewhere. Shops re-opened Oct. 25.	160	3,200
Freight handlers, (C.P.R.) Calgary, Lethbridge and Western Lines.	Commenced September 21. For recognition of the Union and retroactive payment of the McAdoo award. Most of strikers re-instated cases of others referred to Railway Adjustment Board. Work resumed October 22.	1,195	18,675
MISCELLANEOUS:—			
Laundry workers, Vancouver, B. C.	Commenced September 9. For increased wages and Union conditions. Unterminated.	290	7,540
Waiters and waitresses, Regina, Sask.	Commenced September 11. Demand for reduction in working hours. Unterminated.	50	1,300
	DISPUTES COMMENCING DURING OCTOBER, 1918.		
CLOTHING:—			
Tailors, Ottawa, Ont.	Commenced October 12. Demand for a weekly wage scale and piece work. Unterminated.	95	[1,025
TRANSPORTATION:—			
Street railway employees, Calgary, Alta.	Commenced October 19. In sympathy with the freight handlers' strike at Calgary. Returned to work on termination of other strike. Work resumed October 22.	125	375
Conductors and motormen, Niagara Falls, Ont.	Commenced October 3. Men demanded payment according to McAdoo award. Demands granted, payment to date from June 1. Work resumed October 26.	20	460
Elevator men, Port Arthur and Fort William, Ont.	Commenced October 7. For recognition of union, increased wages and better working conditions. The men returned to work pending findings of a Conciliation Board under I. D. I. Act. Work resumed October 27.	250	6,500
PUBLIC UTILITIES:—			
Telephone employees, Regina, Sask.	Commenced October 23. Government refused to grant Arbitration Board or accept schedule of wages. Unterminated.	300	2,400
MUNICIPAL EMPLOYEES:—			
Civic employees, Calgary, Alta.	Commenced October 18. In sympathy with freight handlers' strike at Calgary. Work resumed October 22.	200	600
Firemen, Victoria, B.C.	Commenced October 1. For shorter hours and increased wages. Settled by negotiations between the parties. Work resumed October 3.	61	122
MISCELLANEOUS:—			
Garbage collectors, Victoria, B.C.	Commenced October 18. For increased wages. Increase granted. Work resumed October 21.	35	70

PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

APPLICATION was made to the Canadian Railway Board of Adjustment No. 1 for an interpretation of its rulings on Case No. 2, concerning the Canadian Pacific Railway Company and its commercial telegraphers, an account of which is given on page 821 of the October issue of the LABOUR GAZETTE. There were two points on which information was desired. The first was as to the meaning of the following words in Article No. 1: "Not including agents, wire chiefs, traffic supervisors or traffic chiefs having authority to hire or discipline employees." The second point was as to the basis for computation of staff percentages in so-called "Percentage Offices", the employees asking whether the percentage of staff should be determined by the total number of telegraphers, both Morse and Morkrum employed in the offices or based on the Morse telegraphers alone.

Supplement No. 1 to case No. 2

With regard to Article No. 1, the interpretation of the Board was as follows: "It was contemplated by this language that some of the above specified employees would be included in the schedule, but not such chiefs, agents, or others specified as having official authority to hire or discipline employees. The Board asumed that the Company and the Committee would jointly decide for each point what employees could consistently be regarded as having authority to hire or discipline employees, and we now recommend that such action be taken."

With regard to the computation of staff percentages the Board ruled that Morse telegraphers only are to be taken into account, but without prejudice to future negotiations.

Case No. 3.—T. H. & B. Railway and Conductors and Trainmen

The third case was submitted to the Canadian Railway Board of Adjustment No. 1 by the Toronto, Hamilton & Buffalo Railway and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen. Decisions were rendered on four questions that were put to the Board. The first was as to the rates of pay of passenger conductors and trainmen in the Hamilton-Waterford and Dunnville Branch Services. It was claimed by the company that in December, 1915, there were in effect different rates of pay, specially agreed upon, which were somewhat lower than the standard rates for passenger train service in the territory, and that the increases established by General Order 27* should be applied on these rates. The men contended, on the other hand, that the rates of pay having been brought to the standard basis by negotiation since 1915, it would not be in accord with the spirit of General Order 27 to so apply it as to produce rates of pay lower than standard rates in the locality for such services. The decision of the Board was to the effect that the rates paid to conductors and trainmen on these lines having, since December, 1915, by mutual agreement, been brought to a standard basis and applied to all passenger service, the base rates to which the increases established by General Order 27 are to be applied for the services in question shall be the standard rates for "all other assigned passenger service" as existing in December, 1915, as it would be inadvisable to recreate inequalities that had been removed by mutual agreement.

The second question was with re-

*For text of General Order see LABOUR GAZETTE, June, 1918, pp. 432-9.

ference to what rates should apply to men employed in yard service. In December, 1915, the yardmen on the T. H. & B. were paid one cent per hour less than the so-called first class standard yard rate, but on July 1, 1916, they were given one cent per hour increase, bringing their pay up to the standard rate. The company contended that the increases should be added to the rates actually in effect on December 31, 1915, while the men contended that the increases should be applied on the revised rates of July 1, 1916. The decision of the Board was that the yard rates claimed by the men should be applied, as it would be inadvisable to recreate inequalities in yard rates that had been eliminated by mutual agreement.

The third question was as to the rate for brakemen in the local passenger service between Hamilton and Waterford. The company contended that they should not be required to pay an increased differential rate to this brakeman, but that the passenger brakeman's rate should apply. The men claimed that the brakemen on these runs should be paid an increased rate equal to that of flagmen on the Michigan Central Railway, on the ground that there was only one brakeman on these trains, who was required to perform the duties of flagman in addition to his other duties. The Board sustained the contention of the company, as there is no generally recognized increased flagman's rate on the T. H. & B. or other Canadian lines.

The fourth question was as to the date when General Order 27 should become effective on the T. H. & B. Railway for conductors, trainmen and yardmen. The company contended that a communication addressed to them on December 1, 1917, was not in reality a notice for a revision of the schedule, but that a revised notice was served by the men dated June 24, 1918, and the increased rates should therefore date from July 24, 1918, thirty days after the notice. The men claimed that they had served notice on the company for a revision of their schedule on December 1, 1914, and therefore the increased rate should date from January 1, 1918. The Board decided that the new rates should become effective from May 1, 1918.

Case No. 4.—C. P. R. Company and Locomotive Engineers and Firemen

Case No. 4 had to do with the base rates on which to calculate the increases in wages of locomotive engineers and firemen on the western lines of the Canadian Pacific Railway. It appears that on July 11, 1918, the locomotive engineers on these lines requested the company to grant increases on schedule rates that would correspond with increases awarded by the United States Railroad administration to be effective as of January 1, 1918, at the same time requesting changes in the rules governing initial and final terminal delay. The company offered to make the new rates effective from August 1, 1918. On August 22, the engineers and firemen submitted a joint proposal for higher rates of pay, and, on September 7 the company advised the men that they were agreeable to applying the rates in General Order 27 and supplements thereto to their schedule of rates as awarded in 1915 and applied in 1916, effective August 1, 1918. The company contended that the increases provided for in the Award should be applied to the schedules in effect in December, 1915, but they were

willing to concede the application of the awarded increases to the engineers' and firemen's schedules which were made effective February, 1916, as the result of an arbitration decision of 1915. The engineers contended that the percentage increases provided for in General Order 27 should be added to the increased rates for engineers made effective by a later schedule revision in 1917.

The decision of the Board was that the memorandum of agreement of August 7, 1918, contemplates that the application of the increases provided for in General Order No. 27 shall be based upon the rates for the various classes of service as in effect December 31, 1915, and that any increased rates made effective during 1916 or 1917 can only be regarded as part payment on account of increases granted by General Order No. 27, except as provided in Supplement No. 1 to the Order, which reads:

"(15) Where wages were increased through arbitration or other general negotiations, which cases were definitely closed out prior to December 1, 1915, but which for any reason were not put into effect until after January 1, 1916, the increases fixed by General Order No. 27 will be applied to such basis of wages as if they were in effect in December, 1915."

In giving this decision the Board pointed out that the arguments offered on behalf of the Brotherhood of Locomotive Engineers indicated some misapprehension regarding the intent of certain provisions of the agreement of August 7, 1918, under which the Canadian Railway Board of Adjustment No. 1 was created. Article 7 of this agreement provides that wages and hours established by General Order No. 27 and amendments thereto shall be incorporated into existing agreements on the several railways. This, according to the Board, does not mean that the percentage increases as provided by the Order (to be applied to rates of pay in effect in December, 1915) should be added to rates named in existing agreements, if such rates have been increased since 1915, otherwise than in accordance with supplement No. 1 to General Order 27.

Case No. 7.—C. P. R. Company and Maintenance of Way Employees

Case No. 7 deals with the employment of Oriental labour. From the joint statement of both parties, it appears that on the British Columbia Division of the Canadian Pacific Railway certain Orientals are employed as sectionmen or in other service. Heretofore Oriental employees engaged in the Maintenance of Way or Bridge and Building Departments had not been regarded as being included in the provisions of the schedule governing that service. Prior to February 1, 1918, the following article was included in the schedule.

"Section 1.—By permanent Maintenance of Way Employees is meant employees who take their orders from the roadmasters and bridge and building masters on such parts of the line as are open for traffic, and who have been in the maintenance of way service continuously for one year or more, or who have had one year's cumulative service during the three years immediately preceding, and who will hereinafter be referred to as 'Employees.' Labourers in extra gangs, unless engaged practically all the year round, will not be ranked as permanent employees."

Since February 1, 1918, this section was changed to read as follows:

"Section 1.—By maintenance of way employees is meant employees working in the track and bridge and building department, for whom rates of pay are provided in this schedule, who have been in the service continuously for three months or who have had three months' cumulative experience in the three years immediately preceding. Labourers in extra gangs, unless those practically engaged all the year round, will not be considered as coming under this schedule."

It was held by the company that under the schedule existing prior to February 1, 1918, no claim had been made by the Maintenance of Way Organization that it applied to Orientals, and that in the schedule that became effective on February 1, 1918, there was no change in the wording to justify the claim that the Orientals who had been excluded by previous practice and understanding had been brought within the provisions of the schedule. It was further claimed that the officers of the company who conducted the negotiations in connection with the framing of the new schedule received no understanding to the effect that the requested and adopted changed language of section 1 was intended to include Orientals who had beeen excluded from the provisions of the old schedule.

It was claimed by the men "That the schedule rates for the various classes of employees specified in the schedule apply to the individual employee performing the service in the class without regard to whether the individual was black, white or yellow."

In delivering their decision, it was stated by the Board that at the hearing representatives of the employees advised that there had been no change in section 1, as incorporated in the schedule of February 1, 1918, that included or was intended to include the specific claim of the organization to represent Oriental labour. They further advised that the claim made by the organization on behalf of Oriental labour at this time was chiefly on account of the fact that the laws of the organization had been recently changed so as to permit admission to membership of Orientals. The finding of the Board, therefore, was that in this particular case Orientals had been excluded from the provisions of previous schedules and understandings between the company and the committee representing the maintenance of way employees, and that as there had been no changed understanding reached by mutual discussion at the conference preceding the adoption of the latest schedule revision, it would appear reasonable and consistent to hold that the same conditions relative to the representation of Orientals were to continue in effect. It was pointed out, however, that General Order No. 27 and supplement No. 8 thereto made it quite clear that the same rate of wages should be paid for the same class of work in the same territory, and the Board therefore ruled that the Oriental labour should be placed on the same basis under the provisions of the schedule as other maintenance of way employees as of September 1, 1918, the date upon which supplement No. 8 became effective.

REGULATIONS GOVERNING PROCEDURE OF THE LABOUR BOARD OF APPEAL, ESTABLISHED UNDER ORDER-IN-COUNCIL 1743

THE Minister of Labour has approved the following regulations governing the procedure of the Board of Appeal, lately established under paragraph 17 of Order-in-Council 1743,* to hear appeals from the findings of Boards of Conciliation, appointed under the Industrial Disputes Investigation Act, 1907.

Regulations

1. No appeal shall be permitted unless the Minister receives notification therof within 30 days after the representatives of the parties to the dispute shall have received copies of the findings of the Board of Conciliation and Investigation from which appeal is being taken; provided that the period of thirty days may be extended if, before the expiry, the Minister is notified that an appeal is contemplated and the arrangements for the same are under way.

2. The party appealing shall forward to the Registrar of Boards of Conciliation and Investigation a statement setting forth clearly the portion of the findings or of the report of the Board of Conciliation and Investigation against which appeal is being made, and the reason for such appeal.

3. The Registrar shall, on receipt of the statement of appeal, forthwith notify the chairman of the Board of Appeal of the receipt of such statement, and shall transmit to each member of the Board a copy of the findings of the Board of Conciliation and the statement of appeal, and shall forward to the chairman of the Board of Appeal such other documents and information as may be deemed to bear thereon.

4. The chairman of the Board of Appeal shall, on receiving the copy of the findings of the Board of Conciliation and the statement of appeal, take immediately the steps necessary to have the same considered and dealt with by the Board, and the Board shall with all due expedition pass on the matters in appeal and render their decision.

5. Three members of the Board, consisting of the chairman and one nominee of the Trades and Labour Congress and one nominee of the Canadian Manufacturers' Association, shall constitute a quorum. If the full Board is not present no decision shall be rendered unless the members present are unanimous, and in case of disagreement the matter shall be considered by the full Board.

6. In the event of any member of the Board being unable to act on the hearing of any appeal, on account of illness, absence, or other inability to be present, such member shall be replaced for such appeal by a substitute appointed by the Minister on the recommendation of the body recommending the member who is unable to act.

7. A permanent member of the Board may not sit on an appeal in which the institution he is connected with is interested or would be directly affected by the findings of the Board.

8. The members of the Board shall be remunerated for their services and be paid their travelling and hotel expenses at the rates provided for members of Boards of Conciliation under the Industrial Disputes Investigation Act, 1907.

9. A copy of the findings of the Board shall be forwarded to the Registrar of Boards of Conciliation and Investigation, and shall be filed with the report to which the appeal relates, and the Registrar shall forward the parties each a copy of the said findings.

10. No member of the Board shall communicate the findings of the Board to any person except to the Minister without the latter's consent.

Personnel of Board

The personnel of the Board, as stated in previous issues of the LABOUR GAZETTE, is as follows:

Chairman: Hon. Justice F. S. Maclennan, of Montreal.

For the Canadian Manufacturers' Association: S. R. Parsons, of the British American Oil Company, Toronto, and G. H. Duggan, of the Dominion Shipbuilding Company, Montreal.

For the Trades and Labour Congress of Canada: John W. Bruce, of Toronto, and Gustave Francq, of Montreal.

*For text of Order-in-Council 1743, see LABOUR GAZETTE, August, 1918, pp. 616-8.

MEMORANDUM OF AGREEMENT CREATING THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

SOME confusion having arisen in the public mind in regard to the creation, purposes and functions of the Canadian Railway Board of Adjustment No. 1, it is desirable that a brief statement on these points should precede the Memorandum of Agreement printed below.

In the first place, it should be emphasized that the Board of Adjustment must not be confused with the Canadian Railway War Board. The latter Board is an association of the Canadian Railways, through which joint action is taken in connection with important transportation matters affecting the operation of all railway systems throughout the country. It is composed of railway officers who represent and act for practically all railway lines in Canada.

In August, last, an agreement was made between the Canadian Railway War Board and the representatives of six railway Brotherhoods, which provided that an equipartizan board, to be known as the Canadian Railway Board of Adjustment No. 1, should be created for the period of the war, to which should be referred for settlement all railway labour disputes that may arise during that period and that cannot be promptly adjusted between the officers and employees of the railways concerned. It was also provided that the Board of Adjustment should render decisions on all matters of controversy arising out of interpretations of the McAdoo award, and other future wage agreements that may be made.

As the Railway War Board takes joint action for all railways, the representatives of the railways on the Board of Adjustment were selected by the Railway War Board. Beyond this the official connection of the two boards does not go. For the sake of convenience during the formative period of the Adjustment Board, the staff and offices of the War Board were placed at its disposal, but the Board of Adjustment has now appointed its own secretary and has entirely separate offices.

The full text of the Agreement creating the Board of Adjustment, together with a list of the members, follows:

Text of agreement

Memorandum of agreement made between The Canadian Railway War Board, acting for the Railways of Canada, members thereof, of the one part; and

The Brotherhood of Locomotive Engineers, The Brotherhood of Locomotive Firemen and Enginemen, The Order of Railway Conductors, The Brotherhood of Railroad Trainmen, The Order of Railway Telegraphers and The International Brotherhood of Maintenance of Way Employees, acting for the said classes of employees on the said railways, of the other part.

Whereas the parties hereto in united desire to avoid disputes or misunderstandings which would tend to lessen the efficiency of transportation service in Canada during the war have resolved upon the appointment of a Board composed of members to be selected as hereinafter prescribed, which shall have full power and authority to determine all differences which may arise between any of the said railways and any of the classes of its employees above mentioned and which shall not be promptly adjusted between the officers and employees of the railway concerned, including the interpretation or application of wage schedules or agreements, and the application to the railways of Canada of General Order No. 27 of the Director General of the United States Railroad Administration; with authority to make such amendments or additions in line with such amendments or additions as may be made thereto for the railroads in the United States as may be necessary, having due regard to the rights of the several classes of employees and of the railways respectively.

Now therefore it is agreed by and between the parties as follows:—

1. There shall be at once created a Board to be known as Canadian Board of Adjustment No. 1 to consist of twelve members, six to be selected by the Canadian Railway War Board, and compensated by the railways and six by the executive

officers of the organizations of employees hereinbefore named and compensated by such organizations.

2. The Canadian Board of Adjustment No. 1 shall meet in the City of Montreal within fifteen days after the selection of its members and select a Chairman and a Vice Chairman, who shall be members of the Board. The Chairman or Vice Chairman will preside at meetings of the Board, and both will be required to vote upon the adoption of all decisions by the Board.

3. The Board shall meet regularly, at stated times each month and continue in session until all matters before it are considered.

4. Unless otherwise mutually agreed, all meetings of the Board shall be held in the City of Montreal; provided, that the Board shall have authority to empower two or more of its members to conduct hearings and pass upon controversies when properly submitted at any place designated by the Board; provided further, that such division of the Board will not be authorized to make final decision. All decisions shall be made, approved or ratified by the Board as herein provided.

5. Should a vacancy occur in the Board for any cause such vacancy shall be immediately filled by the same appointive authority which made the original selection.

6. The Canadian Board of Adjustment No. 1 shall render decisions on all matters of controversy arising from interpretations of wage agreements and other matters in dispute as provided in the preamble hereof, and when properly submitted to the Board.

7. Wages and hours established by General Order No. 27 of the Director General of the United States Railroad Administration and amendments thereto shall be incorporated into existing agreements on the several railways and should differences arise between the management and the employees on any of the railways as to such incorporation, such question of differences shall be decided by the Canadian Board of Adjustment No. 1 when properly presented thereto.

8. Personal grievances or controversies arising under interpretation of wage agreements and all other disputes arising or now properly pending between officials of a railway and its employees covered by this understanding will be handled in their usual manner by general committees of the employees up to and including the chief operating officer of the railway (or some one officially designated by him) when, if an agreement is not reached, the chairman of the general committee of employees may refer the matter to the executive officer of the organization concerned, and if the contention of the employees' committee is approved by such executive officer, then the chief operating officer of the railway and the executive officer of the organization concerned shall refer the matter with all supporting papers, to the Canadian Board of Adjustment No. 1, which Board shall promptly hear and decide the case, giving due notice to the chief operating officer of the railway interested and to the executive officer of the organization concerned of the time set for hearing.

9. No matter will be considered by the Canadian Board of Adjustment No. 1 unless officially referred to it in the manner herein prescribed, provided, however, that no case having origin in circumstances occurring prior to the date hereof shall be referred to the Board except those arising out of the application of the said General Order No. 27, or arising out of disputes properly pending at the date of this agreement as mentioned in Clause 8.

10. In hearings before the Canadian Board of Adjustment No. 1 in matters properly submitted for its consideration, the railway shall be represented by such person or persons as may be designated by the chief operating officer, and the employees shall be represented by such person or persons as may be designated by the executive officer of the organization concerned.

11. All clerical and office expenses will be borne equally by the Canadian Railway War Board and the organizations above mentioned. The railway directly concerned and the organization involved in a hearing will, respectively, assume any expense incurred in presenting a case.

12. In each case an effort should be made to present a joint concrete statement of facts as to any controversies, but the Board is fully authorized to require information in addition to the concrete statement of facts and may call upon the chief operating officer of the railway or the executive officer of the organization concerned for additional evidence, either oral or written.

13. All the decisions of the Canadian Board of Adjustment No. 1 shall be approved by a majority vote of all members of the Board.

14. After a matter has been considered by the Board, and in the event a majority vote cannot be obtained, then any six members of the Board may elect to refer the matter upon which no decision has been reached to a referee to be unanimously agreed upon by the Board, and in failure to agree, application shall be made to the Governor-General-in-Council for appointment of a referee whose decision shall be final.

15. The Canadian Board of Adjustment No. 1, shall keep a complete and accurate record of all matters submitted for its consideration and of all decisions made by the Board.

16. A report of all cases decided, including the decisions, will be filed with the Canadian Railway War Board, and with the Chief Operating Officer of the railway affected and with the executive officer of the organization concerned.

17. The Canadian Railway War Board further agrees that the Canadian Board of Adjustment No. 1 shall have like authority to determine differences between any of the railways represented herein and any other classes of employees of such railways who may request and consent to submitting differences to the Canadian Board of Adjustment No. 1 and to agree that the decision of the said Board of Adjustment shall be final.

18. This Agreement shall remain in full force and effect during the period of the present war, and thereafter unless the Canadian Railway War Board, on the one hand, as representing the railways, or a majority of the executive officers of the organizations, on the other hand, as representing the employees, shall desire to terminate the same, which can in these circumstances, be done on thirty days' formal notice.

Signed on behalf of each of the above named parties this Seventh day of August, A.D. 1918.

THE CANADIAN RAILWAY WAR BOARD,

By { U. E. GILLEN, Chairman.
S. R. Payne.
W. M. NEAL, General Secretary.

Personnel of the Board

Reference has been made in previous issues of the LABOUR GAZETTE to the personnel of the Board, which is at present constituted as follows:

For the Railway Companies: U. E. Gillen, vice-president, Grand Trunk Railway; A. D. MacTier, general manager of eastern lines, Canadian Pacific Railway; F. P. Brady, general manager of western lines, Canadian Government Railways; S. J. Hungerford, general manager, Canadian Northern Railway; George Hodge, eastern lines, Canadian Pacific Railway; A. J. Hills, Canadian Northern Railway.

For the Brotherhoods: Ash Kennedy, Brotherhood of Locomotive Engineers; Geo. W. Wark, vice-president, the Brotherhood of Locomotive Firemen and Trainmen; S. N. Berry, vice-president, Order of Railway Conductors; James Murdock, vice-president, Brotherhood of Railroad Trainmen; J. M. Mein, deputy president, Order of Railway Telegraphers; W. V. Turnbull, vice-president, International Brotherhood of Maintenance-of-Way Employees.

Secretary: R. Chapple.

The offices of the Board are in the Eastern Townships Bank Building, Montreal.

ORDER-IN-COUNCIL FORBIDDING STRIKES AND LOCKOUTS DURING THE WAR

ACTING upon the recommendation of the Minister of Labour that the Industrial Disputes Investigation Act, the Labour Board of Appeal created under Order-in-Council 1743* of July 12, 1918, and the Railway Board of Adjustment No. 1, created by agreement between the Canadian Railway War Board and certain brotherhoods of railway employees,† provide adequate legal machinery for the prompt and equitable settlement of disputes between employers and workers, the Government, on October 11, passed a further Order-in-Council forbidding strikes and lockouts for the duration of the war. The complete text of the order follows:

Text of the Order-in-Council

Whereas the Minister of Labour represents:
That under the provisions of the Industrial Disputes Investigation Act and amendments thereto, provision is made for the establishment of conciliation boards for the adjustment of disputes between employers and employees in

*For text of Order-in-Council 1743, see LABOUR GAZETTE, August, 1918, pp. 616-8.

†The Memorandum of Agreement creating the Canadian Railway Board of Adjustment No. 1 is printed on p. 981 of this issue.

the manner in said Act and amendments thereto provided:

That by Order in Council P. C. 1743 of the 12th July, 1918, provision is made for a Board of Appeal to which resort may be had when any party interested feels aggrieved by the decision of any such Board of Conciliation;

That there has been constituted by the Canadian Railway War Board, with assent of representatives of the organized bodies of railway employees, a Board of Adjusters for the settlement of disputes that may arise between the employees engaged in railway work and their employers;

That by these different dispositions full and adequate provision is made for the just and equitable settlement and adjustment of all matters of dispute that may arise between the employers and employees in the different industries affected by the Industrjal Disputes Investigation Act and its amendments or between employers and employees in connection with the carrying on of the operations of Railways in Canada, but no provision is made for enforcement of obedience to and compliance with the orders or decisions of such boards, nor is there any prohibition of strikes or lockouts, after report has been made by a Board of Conciliation;

That in view of the provisions so made and of the injurious and detrimental effects resulting from the occurrence of strikes and lockouts in the different industries affected by the Industrial Disputes Investigation Act and in connection with the operation of the railways, which strikes or lockouts are of a nature to seriously interfere with the carrying on of said industries and the operation of the said railways, both of which are essential to the efficient performance of Canada's duty in aiding in the effective prosecution of the present war, it is necessary and advisable that under the powers conferred upon the Governor in Council by the War Measures Act of 1914, such strikes and lockouts in connection with such industries or railway operations should be absolutely prohibited during the continuance of the present war;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the provisions of the War Measures Act, 1914, is pleased to make the following regulations and the same are hereby made and enacted accordingly:—

REGULATIONS

1. In the present regulations, the word "person" wherever used, shall, save where the context otherwise requires, include every company, firm, partnership or other association of persons incorporated or unincorporated;

2. Any person who during the continuance of the present war shall incite, order or participate in a lockout or strike as defined in the said Industrial Disputes Investigation Act and amendments thereto, in any industry mentioned therein or to which the said Act is applicable either in virtue of its terms, or of any Act of Parliament or Order in Council amending the same, or in connection with the operation of any Railway in Canada, before, during or after any investigation by a Board of Conciliation established under the said Act or amendments, or by a Board of Appeal or the Board of Adjusters above mentioned, shall be guilty of an offence punishable as hereinafter provided.

3. Any employer of labour shall be guilty of an offence and liable to the penalties hereinafter provided who during the continuance of the present war shall discharge or refuse to employ workers (other than those holding positions or employment which shall be by judgment of the Board of Appeal or the Board of Adjusters above mentioned, determined to be incompatible with membership in a union) merely by reason of membership in trade unions or for legitimate trade union activities outside of working hours.

4. Every worker shall be guilty of an offence and liable to the penalties as hereinafter prescribed who in the exercise of his right to organize uses either coercion or intimidation of any kind to influence any person to joint his organization.

5. Every decision or order of any Board of Conciliation shall, if unappealed from within thirty days after it is rendered or made, and every decision or order of the Board of Appeal or Board of Adjusters above mentioned, shall be binding upon all persons affected thereby and any person who during the continuance of the present war fails or refuses to comply with any such order or decision of any Board of Conciliation or of the Board of Appeal or Board of Adjusters above mentioned shall be guilty of an offence and liable to the penalties hereinafter prescribed.

6. Any person violating any of the foregoing regulations shall be liable upon summary conviction to a penalty not exceeding one thousand dollars ($1,000) or to imprisonment for a period not exceeding six (6) months or to both fine and imprisonment.

7. (*a*) Any male person, employer or employee, of military age as defined by the Military Service Act, who violates any of the hereinabove enacted regulations and any director of such military age of any company who acquiesces in the violation by the said company of any of said regulations, shall *ipso facto* be deemed to be a soldier enlisted in the military forces of Canada and subject to military law for the duration of the present war and of demobilization thereafter and shall forfeit any exemption granted to him and any right to apply for or obtain any exemption from military service under the Military Service Act.

(*b*) In any prosecution for acquiescence on the part of a director of any company in a violation by the said company of any of the present regulations, it shall be upon the party charged to prove non-acquiescence by him in such violation.

RODOLPHE BOUDREAU,
Clerk of Privy Council

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF SEPTEMBER, 1918

THE present article on unemployment among the members of local trade unions, which is the eleventh quarterly report on the subject, deals with unemployment as at the end of September, 1918, and is based on returns received from 1,369 labour organizations with a total membership of 162,940, or over 79 per cent of the entire trade union membership of the country. Trade unionists out of work on account of trade disputes or disability were not included. For all occupations erepresented, .72 per cent of the members were unemployed, as compared with .5 per cent in June, 1918, 1.7 per cent in September, 1917, and 1.4 per cent in September, 1916. That the percentage unemployed at the end of September is slightly larger than in the previous quarter is due to less activity in the manufacturing, mining (other than coal), and quarrying and miscellaneous groups of industries.

Employment in the manufacturing and mechanical industries, as reported by 359 unions, having a combined membership of 41,504, was not as brisk in September as in June, 1918, but was much better than the same quarters in 1917 and 1916, there being only .96 per cent of the members idle. In the first comparison, this is due to greater slackness in metals, machinery and conveyances, pulp, paper and fibre, and glass bottle blowing. Food, tobacco and liquors, clothing workers, and woodwork and furniture men were much better engaged, while printing, publishing and paper goods were not quite as active. As compared with September, 1917, there was a considerable improvement in the food, tobacco and liquors, clothing, printing, publishing and paper goods, leather workers and glass bottle blowers, but metals, machinery and conveyances, and pulp, paper and fibres were less active. In comparison with September of 1916, there was less activity in metals, machinery and conveyances, food, tobacco and liquors, and pulp, paper and fibres, but clothing workers, glass bottle blowers, and leather, boot and shoe workers were better employed.

Reports from 573 organizations of transportation workers, having a total membership of 67,840, indicate that .38 per cent of the members were out of work, as compared with .42 per cent in June, 1918, .55 per cent in September, 1917, and .6 per cent in September, 1916. Steam railway employees, whose returns constitute over 77 per cent of the total group membership reporting, were better engaged than in any previous quarter. Street and electric railway men reported no members out of work in September, 1918, as compared with no members unemployed in June, 1918, .4 in September, 1917, and no members in September, 1916. Navigation workers were better engaged than in the previous quarter and in September, 1917, but the percentage out of work was slightly larger than in September, 1916. Teamsters and chauffeurs were slacker than in any previous quarter.

In the mining, quarrying and refining of ores group, reports were received from 59 unions, having an aggregate membership of 21,148. The percentage of unemployment was larger than in June, 1918, and September, 1917, but an improvement was shown over September, 1916.

The percentage unemployed in the building and construction trades, as reported by 213 unions, with 19,722 members, was 1.31 per cent. That this is the smallest percentage yet recorded is due to the noteworthy improvement in the volume of employment afforded carpenters and joiners and electrical workers particularly, while painters, decorators and paperhangers, bridge and structural iron workers, and hod carriers and building labourers were well employed in comparison with former reports.

In the public employment group, as reported by 55 unions with a combined membership of 3,886, 1.5 per cent of the members were unemployed, as compared with .02 per cent in June, 1918, .04 in September, 1917, and .1 in September, 1916.

Employment in the group of miscellaneous trades, as indicated by returns received from 110 unions with 8,840 members, was slacker than in June, 1918, or September, 1917, but more brisk than in September, 1916. Retail clerks were better employed than in previous quarters. Hotel and restaurant workers, musicians and theatre employees, and stationary engineers were somewhat slacker than in last June or in September, 1917 and 1916. Barbers showed greater activity as compared with June, 1918, but a falling off in comparison with September, 1917 and 1916.

The percentages reported unemployed in the different groups of occupations are indicated in the following table:

TABLE 1.

Occupation.	Sept. 1918	June 1918	Mar. 1918	Dec. 1917	Sept. 1917	June 1917	Mar. 1917	Dec. 1916	Sept. 1916	June 1916

The following table summarizes the returns by provinces. In Nova Scotia and Ontario the percentage reported unemployed was smaller than in June, 1918, or in September, 1917, and 1916. In Quebec, Manitoba, Saskatchewan and British Columbia, there were more members unemployed than in June, 1918, but fewer as compared with September, 1917 and 1916. In New Brunswick the percentage showed an increase in each comparison, while in Alberta improvement was shown over September, 1916, only.

TABLE II.

Province.	Sept. 1918	June 1918	Mar. 1918	Dec. 1917	Sept. 1917	June 1917	Mar. 1917	Dec. 1916	Sept. 1916	June 1916

REPORTS OF EMPLOYMENT OFFICES

DURING September there was an increase of over 6 per cent in the demand for labour, as compared with August, on the basis of the daily average of vacancies notified to 110 employment offices (81 commercial, 17 public, and 12 philanthropic). As compared with the demand reported for September of last year by practically identical offices, there was a decrease of almost 16 per cent. The total number of vacancies notified to all offices in September was 49,887, a daily average of 2022.95, as compared with 1780.25, in August, 1918, and with 2388.32, in September, 1917. The number of persons placed was 19,252, a daily average of 800.69, as compared with averages of 828.01 and 894.03 in the preceding month and in September of last year. The proportion of the total vacancies filled to the total vacancies notified was 38.6 per cent, as compared with 46.2 per cent in August and with 36.2 per cent in September, 1917.

As to employment for woman and girl workers, the number of vacancies notified was 5,967, a daily average of 238.7, as compared with 259.0 in August and with 310.6 in September, 1917. The number of such workers placed was 2,148, a daily average of 85.9, as compared with 90.7 in August and with 86.0 in the corresponding period of 1917. The proportion of vacancies filled to vacancies notified for men and boys was 38.94 per cent, and for women and girls 36.0 per cent, as compared with 47.6 per cent and 34.0 per cent, respectively, for August, and with 39.39 per cent and 27.68 per cent, respectively, for September, 1917.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton, and Vancouver—Montreal showed increases in the demand for labour both as compared with August, 1918, and with September, 1917. Toronto, Edmonton and Vancouver recorded declines as compared with the preceding month and gains as compared with the same month of last year, while Winnipeg reported an increase in comparison with August, 1918, and a decrease as compared with September, 1917.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association, and other agencies was 2,660, a daily average of 106.6, as compared with averages of 66.5 in August, 1918, and 111.2 in September, 1917. The number of casual jobs secured was 4,211, a daily average of 168.4, as compared with averages of 168.9 in the preceding month and 194.9 in September of last year.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the Building Trades, as indicated by the value of building permits issued in 35 cities, showed an increase during October, 1918, as compared with the previous month, the total value of building permits rising from $2,690,821, in September to $2,850,428 in October, an increase of $159,607 or 5.93 per cent. Quebec, Ontario and Saskatchewan recorded increases as compared with the previous month. As compared with the corresponding month of 1917, there was a decrease of 21.41 per cent, the value for October, 1917, being $3,627,102. In this comparison Nova Scotia, Quebec, Manitoba and Saskatchewan were the only provinces to indicate an increase.

Of the larger cities Montreal-Maison-

neuve reported an increase both as compared with the preceding month and with October, 1917. Calgary showed a gain as compared with September and a decline in comparison with October, 1917, while at Winnipeg there was a decrease as compared with September and an increase over October of last year. Of the smaller centres, Sherbrooke, Three Rivers, Kingston, St. Catharines and Brandon all showed large increases in both comparisons, London, Ottawa and Moosejaw being especially noteworthy.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

REPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in October showed a decrease of slightly over 1 per cent in the number of workers and an increase of almost 2 per cent in the wages paid in comparison with September. In October, 1918, 7,419 persons were temporarily engaged in the two weeks, and the pay-rolls amounted to $280,974.37, as compared with 7,533 employees and an aggregate pay-roll of $277,373.60 in September. In comparison with the same period of last year, a decline of nearly 11 per cent in the number of persons engaged and an increase of slightly over 7 per cent in the wages paid, are indicated, there being 8,286 employees, with a total pay-roll of $260,924.35 in the first two weeks in September, 1917.

St. John, Montreal, Ottawa and Calgary reported increases in the number of employees as compared with September, while in comparison with October, 1917, Regina and Victoria showed gains. As to wages, at Montreal, Ottawa, Regina, Saskatoon, and Edmonton, the pay-rolls were larger than in September, 1918, and in only six cities—Toronto, Hamilton, London, Saskatoon, Edmonton, and Vancouver—were they smaller than in October, 1917.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORK PEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, OCTOBER, 1918, COMPARED WITH SEPTEMBER, 1918, AND OCTOBER, 1917.

PUBLIC EMPLOYMENT OFFICES IN THE UNITED STATES

THE United States Bureau of Labour Statistics have recently issued a Bulletin* based on an investigation into the methods and practices of public employment offices in the United States, and the influences which have led to their creation and development. There is, according to the Bulletin, a growing sense that unemployment is a matter of deep concern to the public; the unquestionable "right to work" contended for by the workers is now being regarded as a fundamental principle, and the granting of steady employment to the willing workers with the least possible loss of time a matter of common justice and of sound economics.

The Bulletin contains an indictment of the methods of private employment agencies, whose "irregularities and abuses have become too notorious to be overlooked." The wastage from the labour turnover resulting from the practices of "fee splitting" and "job selling", too often indulged in by these agencies, is said to be incalculably great. When the opportunity for splitting a new fee or exacting a fresh price accompanies each job supplied, short term employment and frequent discharges will too often result.

In discussing the development of the public employment office idea, the Bulletin states that when, in 1890, Ohio established five public employment offices, organized labour declared in their favour, but that no interest was taken in their creation or maintenance on the part of employers. In spite of this, however, their numbers were added to each year, so that in 1916 there were 96 of these offices in existence in various states throughout the country. Of this number, 15 offices were controlled by cities; 2 by a combination of city and county; 60 by States; 11 by combination of city and states; 1 by a combination of city, county and state; while in the case of 5 offices the Federal Government co-operates with varying combinations of city, county and state. In addition to those enumerated above, there are others of a somewhat different nature, which, however, hardly come within the purview of this article.

The Bulletin contains many practical suggestions in regard to the establishment of public employment offices and the manner in which they should conduct their operations. Suggestions are made as to choice of location, equipment, personnel, office hours, appropriations and expenditures, fees, methods to secure applicants, preference in placements, investigations into moral conditions at places of employment, policy with reference to industrial disturbances, seasonal and temporary placements, etc. A summary of the findings of the investigators on each of these questions follows:

Suitability of location

A public office should, of course, be located within easy access of a considerable part of labour supply and so far as possible in the business section of the city. A clear-cut division should be

*Bulletin No. 241, July, 1918, Public Employment Offices of the United States. 100 pp.

made between the wholesale, retail and manufacturing districts, although this is sometimes attended with difficulties, particularly in the case of the smaller cities. In actual practice, however, it too often happens that locations are determined by the meagreness of the appropriations for maintenance. The Bulletin cites one instance, where the authorized expenditure for an office created by the State Legislature is $250 per annum for equipment, rent, heat, telephone and postage. In another instance the office is a room in the basement of a city hall, a mile and a half from the business section of the city. It was chosen because it could be had rent free. So long as such a penurious policy is continued these offices can never amount to anything. Emphasis is placed on the location with reference to street level. The office entrance or, preferably, entrances, should be plainly visible from the street. In many cases the investigation showed that in these respects many of the existing offices are well placed.

Equipment

The matter of equipment, states the Bulletin, is of vital importance if results are to be obtained. In larger cities the quarters should be spacious enough to avoid crowding; with separate rooms for unskilled labourers, skilled male applicants, women and juveniles. There should be private offices where the superintendents or other officials can have personal conversations with applicants. Light and ventilation of course should be good and toilet accommodations sufficient and sanitary.

Of the 96 offices studied in detail, separate waiting rooms for male and female applicants are provided in exactly half this number. Separate waiting rooms for juvenile applicants were found in only two offices. The superintendents of 36 of these public employment bureaus have offices which are more or less private, and which may be used for consultation with employers seeking help or with individual applicants having special matters to bring to the attention of the superintendent. Filing cabinets and ample telephone service are mentioned among the prime essentials. In the health interest of applicants and of the office staffs frequent cleaning and fumigation is recommended.

Personnel

Of the 96 public employment offices investigated, 24 have but one employee each. In seven of these offices a single employee gives but part of his time to employment matters. The other extreme is found in an office which has a general superintendent, a chief clerk, three departmental superintendents, three assistant departmental superintendents, six business solicitors, five general clerks, four department clerks, three filing clerks, one interpreter, four stenographers, two telephone operators, two policemen, (office paid) one messenger and two janitors. The great majority, however, come between these limits. Of the superintendents, the Bulletin states that far too many run their offices on the *laissez-faire* principle. They take the attitude that the function of a public employment office is to "match" applications for help with applications for employment; not to seek business, but to accept such as comes to it. Only six offices have enployees whose chief duty is the solicitation of new business. It should be stated, however, that a number of offices, though having to depend

solely in this matter upon the initiative and interest of the superintendent, attempts to find positions for applicants who seek work in lines for which no applications for workers have been received, or to secure applicants to fill calls already received.

Office hours

The hours at which an office should open in the morning should be determined by the kind of labour with which that particular office chiefly deals. In the case of offices that recive applications for help and supply it on the "mail order" basis, the opening hour might be 8, 8.30 or 9. a.m. On the other hand, offices which chiefly supply factory hands ought to open early enough to make it possible for applicants seeking jobs to report for work the same day in time to do a full day's work. Further, the fact that the unskilled labour branch of an office opens at 6 or 7 a.m. is no reason why the mechanical and industrial, or clerical and professional branches ought to open at the same hour. Four of the Michigan State offices investigated opened in the mornings only, for no other reason than because the legislature had failed to make appropriations large enough to properly maintain them. As a result of the investigation into afternoon conditions in many of the offices visited, it is recommended that special hours should be set apart for the receipt of applications for different forms of employment. It would then be possible for each office to more evenly distribute its work over the day, which would result in a more thorough examination of applications for help and employment, and in better placements, than is possible under other conditions.

Fees

In the case of one office only has the practice of collecting fees been retained, and even in this case the fees are limited. No fee is charged employers, and in actual practice not all fees are collected. This particular office has adopted the plan of arranging with the employer for the collection of such fees and also for transportation advanced in deserving cases. When this is done the applicant signs a statement of willingness to have such deductions made from his wages.

Methods used to secure applicants and places for applicants

The investigation disclosed the fact that in many instances little or no effort is made to secure work for applicants, or workers for prospective employers. In the words of the Bulletin, the policy pursued is often, "one of waiting, Micawber-like, for something to turn up." There are, however, some instances recorded where effective publicity campaigns have been conducted. Mention is made of a western office that purchased two automobiles for use by two of its regular employees, whose duties consist solely in soliciting new business. They drive about the surrounding country advertising the office, telling of its purposes, and asking the co-operation of all employers and of all those seeking work. Its officials frequently address business organizations, civic associations and women's clubs on the work of the office. Another office in an important city has secured an agreement for free advertising with two of the most important city dailies. There is also regular advertising free of charge in certain foreign language publications. Another office in a small city of the middle west has a superintendent who makes it a part of his regular duties to visit at least once each week every employer within his district. He keeps on file a classified list of employers showing, not only the sort of work in which they are engaged, but also, in detail, the number of men and women they employ. Whenever an applicant for employment comes into his office and specifies that he is able to do work for which no call has been received, the superintendent will telephone to first one and then another of the employers who are likely to need labour of the sort

which the applicant states he can do, and continues to call them until either the list is exhausted or he has placed the applicant. Of another office, the members of its staff have a speaking knowledge of 18 distinct European languages.

Preference in placements

This term is used in reference to the choice which must often be made between a number of applicants, of approximately equal ability, for any given position. The attitude of a large number of superintendents on this point is, that priority of application should be the governing factor; while others hold that the need of the applicants should determine which should be assigned to the vacancy. In many cases availability is the determinant. In the case of offices maintained by municipalities, residents are given preference over non-residents. In other offices married men are preferred to single ones; and sometimes the preference is given to the applicant living nearest to the job.

Efforts to ascertain moral conditions at places of employment

According to the Bulletin, it seems to be generally observed as a principle that no girl or woman should be referred to any place of known disrepute, or where she would be likely to be subject to immoral influences. It is evident that no office, however large its staff, is capable of investigating thoroughly every request for female help, and that it is therefore necessary for the superintendent to use his, or her, judgment in determining what investigations should be made. The investigation shows that but few offices were concerned with the morality or immoralty of the surroundings of places of employment for boys. The state-city office of Cleveland, Ohio, is cited as the most painstaking in this respect. In this office the placement clerks, both male and female, are required to make a thourough study of the prevailing standards of life and morals in each of the sections of the city. In the juvenile department care is taken to keep youths from being employed in vicious neighbourhoods. In the female departments a special investigator is employed for this purpose. Investigations are made, not only of questionable calls for help, but also of all "blind ads" appearing in the city's newspapers, in which work the newspapers co-operate heartily.

Policy in reference to industrial disturbances

Owing to sharp differences of opinion as to the proper functions of an employment office, practice varies as to the sending of applicants to positions affected by strikes or lockouts. The majority of the offices, acting on the theory that employment offices supported by the public must serve the public impartially, have adopted the practice of informing the applicants fully as to the existing conditions and leaving the decision to them. A large majority of the offices hold that the existence of a strike or lockout does not indicate any labour shortage; and, therefore, they ignore all applications from plants or localities so affected, and give out no information to applicants about the jobs left vacant by striking or locked-out employees. One office holds that the function of a public employment office is merely to introduce the applicant for work to the employer who needs workers, and that having done this the responsibility of the office ceases.

With reference to the policy in regard to industrial disturbances, the Bulletin gives the follwing: "The opponents of the majority practice (that of giving the applicant full information and leaving the decision with him) say that giving out information as to all vacancies, including those due to strikes or lockouts, enables unscrupulous employers to use public employment offices as strike-breaking agencies, which will thus become centres for recruiting casual la-

bourers and undesirable job seekers who are willing to accept any wages or conditions for a short time, and, by so doing, defeat the attempt of the regular employees to secure adequate wages and conditions."

"In reply it is asserted that those who hold the view that positions made vacant by strikes or lockouts do not constitute a demand for labour are really prejudging the labour dispute in favour of the workers without hearing the evidence. Strikes and lockouts may and do frequently occur, it is alleged, because of unreasonable demands by the workers as to wages, hours, conditions, and recognition of the union. To refuse to employers, under such conditions, the services of the public employment offices, which they are taxed to support, would be gross injustice."

Seasonal and temporary placements

Nothing of a very definite nature has yet been done by the employment offices to reduce the labour turnover in their respective districts. Some attempt has been made in Wisconsin to reduce unemployment due to certain seasonal activities, such as ice-cutting, berry-picking, summer farmwork, logging, and lumbercutting. It is pointed out that, on account of their seasonal character, the same person might be given employment at each of these in turn throughout the year with scarcely any lay-off. In some instances city councils, acting on the advice of employment offices, have undertaken considerable repair work on streets and have graded and laid out parks in the winter season in order as much as possible to eliminate unemployment.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE THIRD QUARTER OF 1918

DURING the third quarter of 1918, 78 changes in rates of wages and hours of labour were brought to the attention of the Department. Of these 78 changes, 73 were wage increases, 4 were increases in wages with a reduction in hours, and 1 a reduction in hours. Particulars of these changes are given in the following table.

A number of disputes reached amicable settlement in the form of new agreements. Examples are those of the British Columbia Electric Railway and its Street Railway Employees, the City of Calgary and the Calgary Federation of Civic Employees, the British Columbia Electric Railway and Western Power Company and their Electrical Workers, and the Ottawa Electric Railway Company and its employees.

The daily bonus granted to miners in the Cobalt silver area has reached the $1.25 mark. In the spring of 1917, with silver at 70 cents an ounce, the managers decided that with silver above 60 cents the most desirable form of bonus for their workers would be an increase of 25 cents daily, with future daily increases of 25 cents for every ten point advance in the monthly average of silver, based on quotations as per Handy and Harman of New York. Thus 70 cent silver meant a 50 cent daily bonus, and 80 cent silver a 75 cent daily bonus, with further increases in the same general ratio.

It is unnecessary to do other then refer to the general increase granted to Canadian Railways under the McAdoo award, by which some 75,000 clerks, station employees, stationary engineers, sectionmen, freight handlers, labourers in shops, roundhouses, storehouses, etc., were affected. A list of the railways to which the award applies appeared in the September issue of the LABOUR GAZETTE, page 759.

CHANGES IN WAGES AND HOURS DURING JULY, AUGUST, AND SEPTEMBER, 1918.

Class of workpeople affected	Firm or Establishment	Approximate number of workpeople affected	Date from which change took effect.	Particulars of change
METALS, MACHINERY AND CONVEYANCES:—				
Shipyard workers	Fraser, Brace and Co., Montreal; Davie Shipbuilding and Repairing Co., Lauzon, Que.; Quebec Shipbuilding and Repairing Co., Quebec, Que.; Quinlan and Robertson, Quebec, Que.	2,200	Sept. 1	Decrease in hours per day from 10 hours to 9 hours.
Shipyard workers	Various British Columbia firms.	.....	August	General increase in wages.
Lathers	Contractors in Hamilton.	.....	Sept. 1	Increase of 2 cents per hour.
Automobile employees	Ford Motor Co.	.....	.....	Increase of 12½ cents per hour.
Moulders	Hamilton..... Brown Boggs Co., Hamilton Foundry Co., Karr and Coombs Co., Kartsboro Thompson Pipe and Foundry Co., Canada Iron Foundries	200	July 15	Minimum wage of $5.40 for 9-hour day.
Moulders	St. John, N.B.— Union Foundry and Machine Co.	5	Sept. 1	Decrease of 5 per cents per hour.
Moulders	Brockville, Ont.:— James Stewart Mfg Co.	35	Oct. 1	Increase of 15 per cent.
Forge workers	Toronto:..... Dominion Shipbuilding Co., Leeside Munitions Co., Universal Steel Tool. Co., Bowden Machine Co., Martin Pump and Machine Co., Steel and Radiation Co., Cluff Mfg. Co., Jas. Blank.	.....	.....	Minimum wage of $1.00 per hour on heavy forges. Minimum wage of 70c per hour, blacksmiths Minimum wage of 80c per hour on heavy fires.
FOODS, ETC:—				
Confectionery and Biscuit workers.	Employers, Winnipeg...	160	Sept. 30	Hours per week decreased from 53 to 49, and minimum wage of $10.00 per week.
Bakers and cake makers	40 shops, Vancouver....	40	Aug. 1	General increase.
TEXTILES AND CLOTHING:—				
Custom tailors	Hamilton merchant tailors.	150	Sept. 1	Increase on day work ranging from 25 cents to 30 cents per hour. Increase of $1.50 per coat, and corresponding increases on other garments.
Textile workers	Dominion Textile Co., Kingston, Ont.	.....	Sept. 3	Increase of 10 per cent.
Textile workers	Hamilton, Ont..... Canadian Cottons, Hamilton Cotton Co.	700	Sept. 1	Increase of 10 per cent.
PRINTING, ETC:—				
Bookbinders	Various firms, Victoria..	35	July 1	Increase ranging from $2.00 to $3.50 per week.
Pressmen	" " " ..	.....	Sept. 1	Increase of approximately $3.50 per week.
Pressmen	Various firms, Hamilton.	.....	Sept. 1	General increase.

Telegraph operators	Canadian Pacific Railway Co.	800	Aug 29	Former award of conciliation board giving general increase to be retroactive from May 1st instead of August 1st.
Orderlies and storekeepers	General hospital, Winnipeg, Man.	20	July	Increase of 3 cents per hour, and 33⅓ per cent respectively.

FAIR WAGES CONTRACTS, OCTOBER, 1918

DURING October the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to 20 fair wage contracts, 14 of which were awarded by the Department of Public Works, and 6 by the Department of Railways and Canals. All but one of the contracts contained the usual fair wage clause, a fair wage schedule being contained in the other one.

A statement was also received as to supplies ordered by the Post Office Department subject to the Regulations for the suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Construction of Temporary Barracks, Rosedale, Toronto, Ont. Name of contractors, Ross Meagher Co., Ottawa, Ont. Date of contract, September 30, 1918. Amount of contract, $327,020.70 and $1.35 per cu. yd. for grading.

Construction of improvements and general repairs to warehouse on public wharf, Belleville, Ont. Name of contractor, Lucius E. Allen, Belleville, Ont. Date of contract, October 2, 1918. Amount of contract, unit prices.

Repairs to Pier, Port Burwell, Ont. Name of contractor, F. E. Tifft, Erieau, Ont. Date of contract, October 3, 1918. Amount of contract, Unit prices.

Plumbing, Heating and Lighting in Nurses' Home, Military Hospital, Charlottetown, P. E. I. Name of contractors, J. A. Currie & J. F. Murnaghan, Charlottetown, P. E. I. Date of contract, October 17, 1918. Amount of contract, $6,400.00.

Construction of Temporary Barracks, Partridge Island, St. John, N.B. Name of contractors, McDonald & Farren, St. John, N.B. Date of contract, October 10, 1918. Amount of contract, $28,-959.00.

Construction of roadways, grading, removal of buildings, etc., at Military Hospital, Fredericton, N.B. Name of contractors, Scott & Forbes, Fredericton, N.B. Date of contract, October 5, 1918. Amount of contract, $6,323.00.

Supply and installation of non-gravity heating apparatus, — boiler house and smoke stack for Naval Cadets College (Naval Dock Yard), Esquimalt, B.C. Name of contractors, Vancouver Island Marine Plumbing and Heating Company, Victoria, B. C. Date of contract, October 7, 1918. Amount of contract, $20,574.00.

Plumbing and heating at Mowat Sanatorium Kingston, Ont. Name of contractors, McKelvey & Birch Limited, Kingston, Ont., Date of contract, October 3, 1918. Amount of contract, $1,-211.00.

Electric wiring and fixtures at Mowat Sanatorium, Kington, Ont. Name of contractors, Halliday Electric Co., Kingston, Ont. Date of contract, October 17, 1918. Amount of contract, $350.25.

Construction of necessary works required in connection with the supply of fresh water for Quarantine Station, Lawlor's Island, Halifax, N.S. Name of contractors, Farquhar Bros. Ltd., Halifax. N. S. Date of contract, October 15, 1918. Amount of contract, $7,950.00.

Erection and completion of Active Treatment Wards, Power House, Laundry and conduit System, Neurological Ward and Officers' Ward in connection with Military Hospital, Ste. Anne de Bellevue, Que. Name of contractors, E. G. M. Cape & Company, Ltd., Montreal, Que. Date of contract, October 21, 1918.. Amount of contract, $509,000.00.

Service and Dining Room Block Unit "G" in connection with Military Hospital, London Ont. Name of contractors, Canadian Contractors & Builders, Ltd., Brockville, Ont. Date of contract, October 21, 1918. Amount of contract, $53,900.00.

Construction of Administrative and Surgical Buildings in connection with Military Hospital, London, Ont. Name of contractors, Bate, McMahon & Low, Ottawa, Ont. Date of contract, October 24, 1918. Amount of contract, $102,-494.00.

Installation of automatic sprinkler system in two wooden freight sheds on Government Wharf, Vancouver, B. C. Name of contractors, Canadian General Fire Extinguisher Company, Ltd., Vancouver, B.C. Date of coutract, September 27, 1918. Amount of contract, $32,-853.45.

Trade or Class of Labour	Rates of wages. Not less than:
Foreman in charge	$7.50 per day of 8 hours
Foreman steam fitters	6.50 " 8 "
Steam fitters	6.00 " 8 "
Steam fitters helpers	4.00 " 8 "
Foreman plumbers	6.50 " 8 "
Plumbers	6.00 " 8 "
Plumbers' helpers	4.00 " 8 "
Foreman electrcian	6.50 " 8 "
Electricians	6.00 " 8 "
Carpenters	6.00 " 8 "
Blacksmiths	6.00 " 8 "

Department of Railways and Canals.

Rebuilding a portion of the northeast Guide Pier at the Lower Entrance of the Carillon Canal, at Carillon, in the County of Argenteuil and Province of Quebec. Name of contractor, Philias Dore, Valleyfield, Que. Date of contract, October 16, 1918. Amount of contract, schedule rates.

Renewing a portion of the wharf on the west side of the Upper Entrance of the Chambly Canal at St. Johns, in the Province of Quebec. Name of contractors, The Laurin & Leitch Engineering & Construction Company, Limited, Montreal, Que. Date of contract, October 16, 1918. Amount of contract, schedule rates.

Supply and installation of oil storage tanks, pumps and water outfits at the following points on Canadian Government Railways: — Graham, Ontario; Chaudiere Junction, Quebec; Campbellton, New Brunswick; St. John, New Brunswick; Edmundston, New Brunswick; Sydney, Nova Scotia, and Charlottetown, P. E. I. Name of contractors, S, F. Bowser & Co., Inc., Toronto, Ont. Date of contract, October 7, 1918. Amount of contract, $25,464.30.

Erection and completion of a temporary station, with baggage express and commissariat buildings at or near the site of the new station at Halifax, Nova Scotia. Name of contractors, Morrison & Downing, Halifax, N.S. Date of contract, October 7, 1918. Amount of contract, $68,772.00.

Erection and completion of a concrete oil storage vault at St. John, New Brunswisk. Name of contractors, Engineers & Contractors, Limited, St. John, N.B. Date of contract, October 15, 1918. Amount of contract, $2,800.00.

Erection and completion of two (2) 200 tons capacity coaling plants, one at Stellarton, Nova Scotia, and one at Springhill, Nova Scotia. Name of contractors, Williams & Wilson Limited, Montreal, Que. Date of contract, October 16, 1918. Amount of contract, $20,250 each with schedule rates for additions or deductons.

POST OFFICE DEPARTMENT.

The following is a statement of payments made in October for supplies ordered by the Post Office Department subject to the Regulation for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions:

Nature of orders.	Amount of orders
Making metal dating stamps and type and making other hand stamps and brass crown seals	$463.80
Making rubber dating stamps	42.12
Supplying stamping material and repairing stamping pads	573.87
Repairing parcel scales	2.75
Repairing satchels	44.52
Supplying mail bag fittings	1,715.15
Making and repairing miscellaneous articles of postal stores	125.10
Repairing railway clerks' tin travelling boxes and portable boxes	88.50

FURTHER REGULATIONS AFFECTING WESTERN COAL MINES*

ADDITIONAL orders governing conditions in the coal mining industry have recently been issued by Mr. W. H. Armstrong, Director of Coal Operations for the mines in southeastern British Columbia and southwestern Alberta. These orders are summarized as follows:

ORDER No. 81.—In view of a tax of 5 cents per ton imposed by the Government of Alberta upon all coal produced in that province, coal operators who had not already done so were authorized to increase the price of their commodity by 5 cents per ton, dating from June 1, 1918.

ORDER No. 82.—In consequence of the increased cost of production, the following advances were authorized in the selling price of coal f.o.b. the mines in Alberta and southeastern British Columbia: Bituminous coal mines in the districts of the Crow's Nest Pass, Edmonton, Brazeau and Canmore were authorized to increase their price 18 cents per ton; lignite coal mines in the Drumheller and Edmonton areas, 16 cents per ton, and in the Lethbridge area, 20 cents per ton. An increase of 25 cents per ton was allowed for anthracite coal, and 36 cents per ton for coke.

*For previous regulations see LABOUR GAZETTE, September, 1918, p. 753, and various preceding issues.

ORDER No. 83.—At the mines of the Hillcrest Collieries, Limited, the following new rates of wages were established for "flat work," where small dump cars are used, to be effective up to March 31, 1919:

Mining and shooting coal, 60 cents per ton.

Loading coal, 20 cents per cubic yard.

Laying track, not exceeding 16 lbs., 1½ cents per cubic yard.

Pushing and dumping small cars up to 200 ft., 6½ cents per cubic yard.

These rates and conditions were based upon the width of rooms as has been the custom at this mine, and the order does not affect any existing prices at the Hillcrest collieries. A previous order, No. 46, is rescinded.

ORDER No. 84.—A dispute arose at the mines of the Crow's Nest Pass Coal Company regarding payment of post timbering where used in entries or levels to take the place of boom timbers. A ruling was made by the Director that in levels or entries where the coal is low or the roof strong enough to stand safely without the use of boom timbers, but where it is necessary to set up post timbers with caps for permanently supporting the roof, such posts shall be paid for at the rate of 4c per lineal foot. This shall apply to the payment for posts in all entries and levels in the mines at Coal Creek and Michel, except where provision is made in the Tentative Agreement for a different method of post timbering.

ORDER No. 85.—An order was issued authorizing the following maximum prices per net ton for all coal sold f.o.b. the mines in Edmonton and vicinity: lump coal, $4.91; nut coal, $3.91; mine-run coal, $3.81; these prices to be in force from August 1, 1918.

ORDER No. 86.—A further order was issued with reference to the mines of the Crow's Nest Pass Coal Company at Coal Creek and Michel. The miners employed at those places made a request for the adoption of a single shift instead of a double shift in all the mines, alleging the dangerous conditions of the mines due to working double shift. It was pointed out by the Director that the question of the safety of the mines is one that comes within the jurisdiction of the Department of Mines under the Coal Mines Regulation Act of British Columbia, and does not fall under the jurisdiction of the Director of Coal Operations. The representatives of the men and company disagree as to whether the operation of these mines would be more dangerous on a double than on a single shift. In view of this difference of opinion, the company was instructed to install a single shift system at their mines, and a request was made by the Director to the Minister of Mines of British Columbia to appoint a Royal Commission as proposed by him to determine the question at issue. When the Commission has made its report the matter under dispute will again be reviewed. The single shift system is not to apply to development places nor to necessary repairs in the mines.

CANADIAN RAILWAY WAR BOARD'S ADDITIONAL INTERPRETATIONS OF SUPPLEMENT No. 7 OF THE McADOO AWARD

THE October, 1918, issue of the LABOUR GAZETTE contained the full text of Supplement No. 7 of the McAdoo award (see pages 861-864), and also the Canadian Railway War Board's interpretation of certain clauses of the Supplement (see pages 857-860) that will govern its application to railways in Canada. On October 17 the Board issued the following additional interpretations, supplementing those previously issued, to be effective as from September 1, 1918:

Additional interpretations of Supplement No. 7

Previous interpretations which conflict with the following are hereby cancelled.

ARTICLE I.

Question 1.—Does Article 1, clause (a) apply to all clerical forces to which minimum of $87.50 per month is granted?

Answer.—Yes.

(NOTE.—Owing to the inequalities and probable dissatisfaction arising from application of $87.50 minimum to employees new to the service such as beginners at stenography, comptometer operators, ticket assorters, and junior clerks, as well as to the more experienced and competent employees to whom the same rate at present applies, it is anticipated that a revision of classification will shortly take place providing for the establishment of an "apprentice" class, in which will be included positions such as those specifically mentioned above, and to which a lower rate will apply. It is anticipated that the proposed "apprentice clerk" classification will provide for a reasonable age limit, and that $25 per month increase, without the $87.50 minimum, will be awarded.

It is suggested that the employees who are concerned in the anticipated re-classification be informed as to what is contemplated, with a view to avoiding possible difficulty when the reductions are made effective.)

Question 2.—Under what clause should red cap porters be considered?

Answer.—Article 1, clause (c).

ARTICLE II.

Question 3.—Is it permissible to retain stationary engineers, "steam" firemen and power house oilers on other than monthly basis?

Answer.—Hourly rates may be continued provided established minima are paid.

ARTICLE V.

Question 4.—Is it proposed to give any further consideration to question of overtime worked by employees named in this Article, though working alongside men provided for by Supplement 4? Supplement 7 allows pro rata for ninth and tenth hours, whereas Supplement 4 provides time and half over eight hours worked?

Answer.—Not at present. There is a possibility of further consideration.

ARTICLE VI.

Question 5.—Are parlour, sleeping and dining car employees, conductors, porters, stewards, waiters, cooks and help intended to be provided for by Supplement No. 7?

Answer.—No, General Order No. 27.*

Question 6.—Are station restaurant help intended to be provided for by Supplement 7?

Answer.—No, General Order No. 27.

ARTICLE X.

Question 7.—Is it the intent to grant $25.00 per month increase in salaries in effect January 1, 1918, irrespective of reduction of hours as result of application of Article 10? The text of Supplement does not make clear how this is applied to hourly rated employees.

Answer.—Yes, irrespective of hours previously worked, for an eight-hour day, but not to produce a rate in excess of the maximum given.

ARTICLES XII AND XIII.

Question 8.—Is it the intent that these Articles be literally and generally applied?

Answer.—Yes, in matter of investigations, absolutely yes; in matter of seniority, generally speaking, yes. Clerks themselves were in doubt what they wanted, so can give no definite opinion at present.

*For text of General Order No. 27, see LABOUR GAZETTE, June, 1918, pp. 432-439.

AN INTERPRETATION OF THE McADOO AWARD IN THE UNITED STATES

THE Director General of Railroads in the United States recently issued Interpretation No. 3, covering (1) the application of General Order No. 27* to pieceworkers, and (2) Supplement No. 4† with Addenda Nos. 1 and 2, and Interpretation No. 1 and Amendment No. 1 thereto.

The full text of the Interpretation follows:

Interpretation No. 3 to General Order No. 27 and to Supplement No. 4, etc.

METHOD OF APPLYING INCREASES TO PIECEWORKERS.

ARTICLE I.

(a) The increases provided for in General Order No. 27 apply to each hour worked and not to piecework prices per item or operation.

(b) Overtime hours, prior to August 1, 1918, will be paid for at the rate in effect as of December 31, 1917, and up to and including July 31, 1918; from August 1, 1918, at the rate of one and one-half times the average straight time hourly piecework earnings for the current pay period, provided that the straight time piecework earnings plus one-half additional, equals the guaranteed minimum at the hourly rate of one and one-half time.

(c) Any increase in wages due to increased rates of compensation granted between January 1, 1916, and December 31, 1917, shall be deducted from the amount of increase provided for in General Order No. 27, but in no case shall such deduction operate to reduce earnings based on rates in effect as of December 31, 1917.

(d) In the absence of established standard hourly rates for any one or more of the seven classifications designated in Supplement No. 4, the going rate in each craft in accordance with the classification existing prior to the application of Supplement No. 4 for mechanics or helpers at each point on each of the several railroads, shall be used as the base rate to which will be added the increases provided for in Section C, Article II, General Order No. 27.

(e) Example 1.—Assume that in Yard B, 75 wood freight car builders or repairers are employed, the base hourly rates in December, 1915, were:

15 at 32 cents per hour.
31 at 33 cents per hour.
17 at 34½ cents per hour.
12 at 36 cents per hour.

Thirty-three (33) cents thus becomes the going rate for the basis of computing the hourly increase for all wood freight car builders or repairers in Yard B. General Order No. 27, Article II, Section C, using the going rate of 33 cents, establishes a rate of 46.75 or 13.75 cents increase over the December, 1915, hourly rate. Between January 1, 1916, and December 31, 1917, increases amounting to 9 cents per hour had been put into

*For text of General Order No. 27, see LABOUR GAZETTE, June, 1918, pp. 432-439.

†For text of Supplement No. 4, see LABOUR GAZETTE, September, 1918, pp. 755-759.

effect. The net increase established by General Order No. 27 is therefore 4.75 cents per hour to hourly workers, and represents the total increase per hour to pieceworkers of the same class in Yard B. The same method of procedure will apply to each of the respective groups of employees, such as upholsterers, coach carpenters, cabinetmakers, passenger or freight steel car body builders or repairers, truck builders or repairers, coach painters, locomotive painters, locomotive carpenters, moulders, coremakers, electricians, signal men and signal maintainers, tinners, pipe fitters, coppersmiths, sheet metal workers, and all men classified and used as helpers.

(f) Where piecework rates or pieceworkers received no increase between January 1, 1916, and December 31, 1917, it is evident that the average earning rate was sufficiently in excess of the hourly rate to cover any increases that may have been granted hourly workers. In determining the increases to such pieceworkers, they shall receive the same increase per hour as accrues to the hourly worker under General Order No. 27, illustrated herein by example 1, paragraph (e).

(g) The application of increases to machinists, boilermakers, and blacksmiths, who are on the piecework basis, shall be as above outlined (see example 2), except where the establishment of the minimum rate of 55 cents per hour is less than the increase provided for in Section C, Article II, General Order No. 27, in which case the greater increase will apply. (See example 3.)

(h) Example 2.—In December, 1915, machinists in Shop C were paid a going rate of 35 cents per hour. Section C, Article II, General Order No. 27, establishes a rate of 49.50 cents per hour. This would automatically go to the minimum rate of 55 cents per hour, or 20 cents increase over the December, 1915, hourly rate. Between January 1, 1916, and December 31, 1917, increases amounting to 9 cents per hour had been put into effect. The net increase established by General Order No. 27 is therefore 11 cents per hour to hourly workers and represents the total increase per hour to the machinists on piecework in Shop C.

(i) Example 3.—In December, 1915, machinists in Shop D were paid a going rate of 42 cents per hour. The new rate provided for in Section C, Article II, of General Order No. 27, is 58.25 cents per hour, making an increase of 16.25 cents per hour over the December, 1915, hourly rate. Between January 1, 1916, and December 31, 1917, increases amounting to 9 cents per hour had been put into effect. The net increases established by General Order No. 27 is therefore 7.25 cents per hour to hourly workers, and represents the total increase per hour to the machinists on piecework in Shop D.

(j) If the increases for pieceworkers under General Order No. 27 added to their average hourly straight time piecework earnings, by pay period, do not equal the minimum hourly rates established for hourly workers of the same class, the back pay due such pieceworkers, by pay periods, January 1, 1918, to July 31, 1918, inclusive, will be computed on the basis of the minimum hourly rates applicable to the respective classes, as per Supplement No. 4.

(k) Example 4.—Pieceworker E, guaranteed a 58-cent minimum hourly rate by Supplement 4, worked 208 straight-time hours in March, 1918; his

average piecework earnings for this pay period were 55 cents per hour, including the increase under General Order No. 27. Pieceworker E therefore receives the minimum rate of 58 cents per hour for the March pay period.

(l) Example 5.—Pieceworker F, guaranteed a 58-cent minimum hourly rate by Supplement 4, worked 208 straight-time hours in March, 1918; his average piecework earnings for this pay period equals 60 cents per hour, including the increase under General Order No. 27. Pieceworker F, having exceeded the minimum rate of 58 cents per hour for the March pay period, receives back pay at the 60-cent rate.

(m) Example 6.—Pieceworker G, guaranteed a 58-cent minimum hourly rate by Supplement 4, worked a total of 268 hours in August, 1918, divided as follows: Fifty straight-time hours on hourly work at 58-cent rate, 158 straight-time hours on piecework, average earnings per hour 65 cents, 20 hours overtime on hourly work at the rate of one and one-half time, or 58 plus 29, equalling 87 cents per hour, and 40 hours overtime on piecework, or 65 plus 32.50, equalling 97.50 cents per hour (as per Art. II, Sec. A). The total earnings for the August pay period are as follows:

50 hours at 58 cents per hour..	$ 29.00
158 hours at 65 cents per hour.	102.70
20 hours at 87 cents per hour..	17.40
40 hours at 97½ cents per hour	39.00
Total.....	$188.10

GENERAL APPLICATION OF INCREASES SUPPLEMENT 4 TO GENERAL ORDER 27.

ARTICLE II.

(a) The increases provided for in Supplement No. 4 to General Order No. 27 apply only to hourly, daily, weekly, or monthly rates, with the proviso that in no case shall a pieceworker be compensated for service rendered from January 1, 1918, to July 31, 1918, or thereafter, at a less rate per hour for each straight-time hour worked, than the minimum rate established, for the hourly worker as per the respective classifications. Effective August 1, 1918, the one and one-half time rate for overtime applies to pieceworkers as well as to hourly rated employees.

(b) Increases provided for in General Order No. 27 for hourly, daily, weekly, and monthly paid employees were cancelled with the issuance of Supplement No. 4, and in no manner refer to or affect the increases provided for in Supplement No. 4 to General Order No. 27.

(c) The hours of service and overtime provisions of Supplement 4, Article IV, section 2, do not apply to supervisory forces on monthly salary referred to in Supplement 4, Article III, section 5.

(d) Monthly supervisory forces specified in Supplement 4, Article III, section 5, assigned to inspect new equipment under construction by contract, shall receive the salary increase of forty ($40) dollars per month.

(e) Excepting salaried supervisory forces and coach cleaners, employees coming within the classifications specified in Supplement No. 4 to General Order No. 27, shall be paid for overtime as provided in section 2, Article IV, of Supplement No. 4.

(f) Employees voluntarily leaving the service.—The amount accruing under the provisions of Supplement 4 to General Order No. 27 will not accrue to those employees who left the service voluntarily to accept or secure employ-

ment at some other point on the same railroad or on another railroad, or elsewhere, because remaining in the service at the point employed, unless transferred, was the consideration upon which the promise to make the increases effective as of January 1, 1918, was based.

ARTICLE III.

Rates based upon years of experience (Supplement No. 4, Art. II, secs. 2, 2-A, and 2-B).—(a) Employees performing work recognized as mechanics' work in the respective trades who, by agreement with duly authorized committees representing the craft or crafts, have had their rates levelled up to that of the mechanic, shall receive the mechanics' rate as per Article II, sections 1 and 1-A; otherwise Article II, sections 2, 2-A and 2-B will apply. The period of experience on mechanics' work, in the trade employed, shall be cumulative.

Example 7.—Employee H worked:

Twelve months on machinists' work for railroad C.

Six months on machinists' work in navy yards D.

Twelve months on machinists' work in manufacturing plant E.

Eighteen months on machinists' work for railroad by whom now employed.

Total, four years.

Such employees should be paid the machinists' rate.

(b) Nothing in the above section shall be construed to mean that mechanics of the respective trades who have qualified as such in other industries shall be paid less than the minimum rates specified in Article II, sections 1 and 1-A of Supplement No. 4, upon entering railroad service.

ARTICLE IV.

Expense allowance (sections 4 and 5, Article IV, Sup. No. 4 to General Order No. 27).—The allowance for expenses provided for in section 4, Supplement No. 4 to General Order No. 27, is the same as shown in section 5, and is at the rate of $2 per day for three meals and lodging; 50 cents per meal, 50 cents for lodging. It is not intended to make this feature retroactive prior to August 1, 1918.

ARTICLE V.

Supervisory forces (section 4, Article III, Supplement 4 to General Order 27).—This section applies to minor supervisory forces who are held responsible for the work of their gang, have been so recognized, and who shall receive 5 cents per hour in excess of the minimum hourly rate established for the craft.

ARTICLE VI.

Wheel shop employees (General Order 27, Supplement 4, Article I, sections 1 and 1-B).—(a) Employees boring and turning wheels, and turning axles in wheel shop, are classified as machinists by section 1, Article I, of Supplement No. 4 to General Order No. 27.

(b) Employees pressing on and off wheels are classified as machinists' helpers by section 1-B, Article I of Supplement No. 4 to General Order No. 27, and receive an increase of 13 cents per hour over rate in effect January 1, 1918, prior to application of General Order No. 27, with a minimum guaranteed rate of 45 cents per hour.

ARTICLE VII.

Flue work (Supplement No. 4, Art. I, secs. 2 and 2-B).—(a) Flue work, boiler department, includes flue welders under boiler foremen.

(b) Heaters and helpers assisting welders shall be classed as boilermaker helpers.

ARTICLE VIII.

Rivet heaters.—(a) Include rivet heaters in Supplement No. 4, Article I, section 2-B. Rivet heaters under 18 years

of age shall be paid 25 cents per hour until they reach the age of 18, and thereafter helpers' rates.

(b) Rivet heaters in Supplement No. 4, Article I, section 6-B, under 18 years of age shall be paid 25 cents per hour until they reach the age of 18, and thereafter helpers' rates.

ARTICLE IX.

Electrical workers (Supplement No. 4, Art. I, secs. 5 and 5-A).—It is not necessary for an electrical worker to be competent to perform all items of work specified. Employees skilled in any of this work shall be paid the rate established for the respective class.

ARTICLE X.

Material carriers and helpers.—(a) Material carriers in Supplement No. 4, Article I, section 6-b, applies only to employees regularly engaged in selecting and distributing material to mechanics in car department.

(b) Labourers shall not be classified as helpers in the seven basic trades, unless they actually perform work recognized as helpers' work.

ARTICLE XI.

Locomotive crane operators (sec. 6, Art. I, Supplement No. 4 to General Order No. 27).—Locomotive crane operators, when employed in the car and locomotive shop yards, shall be considered under the same classification as "wrecking derrick engineer" in section 6, Article I, Supplement No. 4 to General Order No. 27, and receive 13 cents per hour over the rate in effect January 1, 1918, prior to the application of General Order No. 27, with a guaranteed minimum of 58 cents per hour. (Where employed in other departments they shall be considered under the same classification as pile driver, ditching and hoisting engineers, in Article I, section b of Supplement No. 8* to General Order No. 27.)

ARTICLE XII.

Derrick engineer (sec. 6, Art. I, Supplement No. 4 to General Order No. 27).—"Wrecking derrick engineers" covers the engineer operating a power-driven crane employed principally for clearing up wrecks.

ARTICLE XIII.

Moulders and helpers.—Cupola tenders (Supplement No. 4, Art. I, secs. 7 and 7-B).—(a) A cupola tender is interpreted to be one who supervises the cupola and prescribes the charge, the fuel to be used, and drawing the melt.

(b) Cupola tender helpers shall receive an increase of 13 cents per hour over rates in effect as of January 1, 1918, prior to the application of General Order No. 27, with a guaranteed minimum rate of 45 cents per hour.

(c) Employees in charge of brass melting in foundry shall receive not less than the moulder's minimum rate, and helpers the same as helpers in section (b) of this Article.

ARTICLE XIV.

These interpretations shall apply to all addenda, amendments, and interpretations to Supplement No. 4 to General Order No. 27, from their respective effective dates.

W. G. McADOO,
Director General of Railroads.

*For text of Supplement No. 8, see LABOUR GAZETTE, October, 1918, pp. 864-6.

PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1918, AND IN OTHER COUNTRIES

THE general movement of prices was upward, owing to seasonal advances in grains, fodder, dairy products, fish, in certain fruits and vegetables, and in some manufactured goods and raw furs. Meats continued to decline gradually in line with cattle prices. Hogs and sheep were down steeply.

In retail prices the weekly budget of staple foods averaged $13.54 in some 60 cities, as compared with $13.31 in September and $11.81 in October, 1917. Meats were slightly lower, but eggs, milk and butter were higher, while potatoes were upward. Bread, flour, rolled oats, rice, prunes and sugar averaged higher, but beans and evaporated apples declined. Coal was slightly higher, but wood showed considerable advances.

In wholesale prices, the index number rose to 289.6 for October, as compared with 285.3 for September and 242.6 for October, 1917. The chief increases for the month were in the groups, Grains and Fodder, Dairy Products, Fish, Fruits and Vegetables, Miscellaneous Foods, House Furnishings, and Raw Furs. There were slight decreases in Animals and Meats, Textiles, Metals, and Paints, Oils and Glass.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT, IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA

Retail Prices

There were decreases in some lines of meats, beef being slightly lower in several of the cities. Veal showed some increases, but in mutton there were some declines. In fresh pork several advances occurred. Bacon, fish, and lard were almost unchanged. Eggs advanced 5c per dozen in some of the cities and 10c in some cases. In several of the cities, however, there were no increases. Milk advanced in some localities, the increase being 1c in some cases and 2c in others. In most of the cities, however, the price was unchanged. Butter advanced sharply, being up from 2c to 6c per pound owing to the sharp rise in wholesale prices at the end of September when the Government took over the output of creamery butter. In bread, increases occurred at Sydney and Regina. In flour, prices advances slightly in some of the cities. Rice and tapioca showed some increase. Canned tomatoes, peas, and corn were practically unchanged, but in beans prices declined. In sugar there were several advances. Potatoes rose in some of the cities, but declined in others, according to local conditions. Anthracite coal was slightly higher in some of the cities. There were also some increases in bituminous coal. Wood was considerably higher in many localities. Rent was up in St. Hyacinthe, Que.

Wholesale Prices

GRAINS AND FODDER.—Wheat was unchanged at the prices fixed in August. Barley rose from 99c per bushel to $1.05 at Winnipeg, but declined from $1.10 to $1.07 at Toronto. Oats fell from 84c to 81c at the end of September, but later rose to 86c at Winnipeg. Ontario oats eased off from 76-78c to 75-78c. Flaxseed was down to $3.93 at the end of September, continued to decline to $3.19 toward the end of October, but later advanced. Hay at Montreal rose to $24.00-25.00 per ton, and at Toronto to $21.00-22.00. Baled straw was $1.00 higher at $9.00-9.50. Bran and shorts were up $2.25 per ton at $37.50 and $42.25 respectively.

ANIMALS AND MEATS. — Cattle were down from $14.00 to $13.50 at Winnipeg, and from $15.00 to $14.00 at Toronto. Beef was 1c lower at 23-25c per pound at the beginning of the month, and at the end of the month was 1c lower again. Veal eased off to 18-22c per pound. Hogs declined from $18.75 per hundred to $16.75-17.00. Bacon was firmer at 42-43c, but ham was easier at 35c. Lard was ½c higher at 31-31½c per pound. Sheep was down at Toronto to $10.00-12.00 per hundred. Mutton eased off from 24c per pound to 22c. Fowl was down to 27-30c. Turkeys were up to 36-38c.

DAIRY PRODUCTS. — Butter advanced considerably at the end of September when the Government took over the output of creamery butter for the next few weeks. At Montreal, finest creamery butter had risen to 46½-47c per pound by September 23, and reached 49-50c by October 1. At Toronto, creamery butter rose from 45c to 48c in the last week of September, and by the end of October reached 52c. Dairy butter rose from 38-42c to 44-45c in the last week of September, and advanced another cent by the middle of October. Eggs rose from 58-60c to 65-70c per dozen at Montreal, and at Toronto from 57-58c to 62-63c.

FISH.—Dried cod rose from 11c per pound to 12c, and haddock from 9c per pound to 10c. Halibut advanced from 20c per pound to 22c, and salt mackerel from 10c per pound to 12c. Salmon trout and whitefish were 1c per pound lower at Toronto at 14-15c per pound and 15-16c per pound respectively.

FRUITS AND VEGETABLES.—Apples at Toronto were up to $4.50-6.00 per barrel. Bananas, lemons, and oranges were considerably higher. Evaporated apples and prunes were firmer. Potatoes were down to $1.75 per bag at Toronto and $1.85 at Montreal. Onions were up to $2.00 per bag of 70 lbs. and $2.50 per bag of 100 lbs. Canned corn was easier at $2.25-2.65. Canned tomatoes declined from $2.40-2.75 per dozen to $1.82-2.10.

MISCELLANEOUS FOODS.—Oatmeal declined from $6.00-6.50 per bag to $5.65-6.50, and rolled oats from $5.25-5.50 to

a July of each year. *b* Foods. *c* 1901-1900—. *Quarter beginning that month.

$5.15-5.50. Flour was steady at the prices reached in September. Molasses advanced from $1.06 per gallon to $1.16. Maple sugar rose to 29-30c per pound. Sugar was steady at the higher prices reached in September. Salt advanced from $1.80 to $1.92 per barrel.

TEXTILES. — Unwashed wool was steady at the lower price, 58-64c per pound, reached in September. Beaver cloth was 10c per yard higher at $4.50. Raw cotton was down from 35c per pound to 32c. Coloured cottons averaged higher. Raw silk, Japan, was higher at $7.30 per pound.

HIDES, LEATHERS, BOOTS AND SHOES.—Horsehides and tallow were somewhat higher, while some lines of beef hides were easier.

METALS AND IMPLEMENTS.—Iron and steel were steady. In other metals, tin was easier at 90c-$1.00 per pound. Crowbars were higher, also grindstones and soldering irons.

FUEL AND LIGHTING.—Coal oil was higher at 18c per gallon.

BUILDING MATERIALS. — Lumber was steady. Soil pipe was higher, also cut nails, wire nails, and copper wire. Wire screen was easier. Linseed oil was lower. Prepared paints and varnish were higher.

HOUSE FURNISHINGS.—Wooden furniture advanced 10 per cent to 15 per cent owing to higher costs of materials and labour. Crockery also advanced 10 per cent.

DRUGS AND CHEMICALS.—No changes were reported.

MISCELLANEOUS.—In raw furs, muskrat, raccoon, and skunk were higher. Newsprint paper advanced from $2.85 per hundred to $3.45. Pulp, ground wood and sulphite also advanced.

Prices in Other Countries

In the United Kingdom, food prices at the first of October were higher than a month before, according to the record of the LABOUR GAZETTE, owing to higher prices of meat, butter, milk, and eggs. In other articles there was little or no change. The level of prices was, therefore, 129 per cent higher than in July, 1914, but it was stated in the LABOUR GAZETTE that, allowing for changes in dietary, the expenditure on foods had increased by only 89 per cent.

In Holland, a report by the *Municipal Statistical Journal* of Amsterdam showed the cost of food in June, 1918, to be 86.8 per cent higher than in 1913.

In Italy, the monthly journal of the Municipality of Milan reported that the cost of maintaining a pre-war standard of living for a working-class family of five persons in August, 1918, was 207 per cent greater than in the first half of 1914. Food showed an increase of 251 per cent, clothing 207 per cent, fuel and lighting 120 per cent, while rent remained unchanged. It was computed, however, that owing to changes in consumption of the various commodities and the introduction of rationing, the general increase was only 138 per cent.

In South Africa the Cost of Living Commission reported the cost of maintaining a family of five in Capetown in June was 43.5 per cent higher than before the war apart from rent, but if rent were included the average increase would be 36.2 per cent.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1918

DURING the third quarter of 1918 the Department received reports of 266 fatal accidents, 84 of which occurred in July, 95 in August, and 87 in September, as compared with 168 during the previous quarter. During the corresponding quarter of 1917, there were 265 fatal accidents reported, 132 of which occurred in July, 77 in August, and 56 in September. The Department is unable to secure reports of all fatal industrial accidents, but reports are received from all available sources.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1918

Trade or Industry	Locality	Date	Cause of fatality
AGRICULTURE:—			
Farmer	Sullivan, Ont.	July 8	Caught in mower.
Farmer	Branchton, Ont.	" 28	Hit by auto.
Farmer	Crosshill, Ont.	" 26	Fell off wagon.
Farmer	Algonquin, Ont.	Aug. 3	Horses ran away.
Farmer	McLeod, Alta.	" 15	Struck by lightning.
Farmer	Chatham, Ont.	" 20	Crushed by separator.
Farmer	Lovetteville, Alta.	" 18	Fell off load of hay.
Farmer	Blythe, Ont.	" 5	Dragged under binder.
Farm helper	Wellesley, Ont.	" 26	Thrown from motorcycle.
Farmer	Thetford, N. S.	" 24	Caught in machinery.
Farmer	Hillsboro, N. S.	Sept. 16	Fell under wagon.
LUMBERING:—			
Employee of sawmill	Sorel, Que.	July 3	Struck by piece of wheel.
Logger	Okishallow Channel, B.C.	" 5	Hit by falling tree.
Log driver	Gatineau Point, Que.	" 18	Drowned.
Logger	Riviere Belle, Que.	" 2	Struck by falling tree.
Setter with lumber company	Bala, Ont.	" 23	Drowned.
Labourer	Vancouver, B.C.	" 23	Struck by falling timber.
Employee of planing mill	Brantford, Ont.	" 20	Struck by piece of wood.
Workman with timber company	Frederickhouse, Ont.	" 22	Caught in shafting.
Labourer in lumber mill	Vancouver, B. C.	" 27	Hit by piece of lumber.
Labourer	The Pas, Man.	" 12	Struck by falling block.
Labourer	Buctouche, N.B.	" 8	Struck by circular saw.
River driver	John Creek, Ont.	" 18	Drowned.
Lumberman	Phœnix, B. C.	" 19	Caught between cars.
Employee of lumber company	Qualicum, B. C.	" 27	Hit by piece of steel.
Employee of lumber company	Caipha, B. C.	Aug. 7	Drowned.
Labourer	Maillardville, B. C.	" 1	Struck by falling snag.
Employee of lumber company	Shawanaga, Ont.	" 21	Struck by tree.
Trail cutter	Chudleigh, Ont.	" 26	Struck by tree.
Teamster	Thessalon, Ont.	" 18	Crushed under wagon.
Employee of lumber company	Pembroke, Ont.	" 12	Caught in belt.
Logger	Port Haney, B. C.	" 10	Drowned.
Labourer	Charlottetown, N. S.	" 17	Struck by piece of steel.
Labourer	Strathroy, Ont.	" 30	Infection.
Labourer with lumber company	Penetanguishene, Ont.	Sept 17	Struck by flying board.
MINES, SMELTERS AND QUARRIES:—			
Miner	Thetford Mines, Que.	July 5	Fall of rock.
Miner	Fernie, Alta.	" 10	Fall of rock.
Miner	Copper Mt., B. C.	" 3	Fall of rock.
Miner	Michel, B. C.	" 13	Crushed.
Miner	Thetford Mines, Que.	" 26	Run over by train.
Miner	Stellarton, N. S.	" 12	Fall of rock.
Driller	Gravenhurst, Ont.	" 12	Skull fractured.
Labourer at Mines	Stellarton, N. S.	" 5	Fell off coal car.
Fireboss	Coal Creek, Alta.	" 8	Cave in.
Employee of stone quarry	Beauport, Que.	" 30	Fall.
Employee of brick yard	Chatham, Ont.	" 31	Run over by train.
Miner	Sydney, N. S.	Aug. 22	Crushed by boxes.
Miner	Greenwood, B. C.	" 18	Fall of rock.
Miner	Coleman, Alta.	" 16	Fall of coal.
Miner	Scotia Mines, N. S.	" 27	Fall of coal.
Miner	Reserve Mines, N. S.	" 29	Fall of rock.
Miner	Sydney Mines, N. S.	" 24	Fall of rock.
Miner	Sydney Mines, N. S.	" 23	Fall of stone.
Miner	Sydney Mines, N. S.	" 29	Fall of rock.
Miner	Florence, N. S.	" 27	Fall of stone.
Miner	Merritt, B. C.	" 31	Fall of rock.
Blaster	Creighton Mines, Ont.	" 3	Explosion.
Labourer	Springhill, N. S.	" 30	Struck by empty boxes.
Overman	Canmore, Alta.	" 14	Struck by empty boxes.
Miners (16)	Nanaimo, B. C.	Sept. 10	Cable broke, allowing cage to fall.
Miner	Herb Lake, Man.	" 5	Struck on head.
Miner	Thetford Mines, Que.	" 24	Struck by box.
Miners (2)	Notre-Dame, Que.	" 23	Explosion.
Labourer	Coppercliff, Ont.	" 6	Fell off truck.
Miner	Sydney Mines, N. S.	" 25	Fall of stone.
Labourer	Springhill, N. S.	" 12	Struck by coal.
Powderman with quarrying company	Port Neebish, Ont.	" 25	Explosion.

FATAL INDUSTRIAL ACCIDENTS DURING THIRD QUARTER OF 1918.—(*Continued*)

Trade or Industry	Locality	Date	Cause of fatality
RAILWAY, CANAL AND HARBOUR CONSTRUCTION:—			
Labourer	Toronto, Ont.	July 20	Electrocuted.
Lock tender	Port Colborne, Ont.	Aug. 16	Drowned.
Painter on ship	Prince Edward Island.	Sept.26	Fell in hold of vessel.
BUILDING AND CONSTRUCTION:—			
Employee of roofing company	Toronto, Ont.	July 30	Fall.
Labourer	London, Ont.	" 13	Crushed under earth.
Labourer	Sault Ste. Marie, Ont.	" 13	Caught in shears.
Electrician	New Toronto, Ont.	" 18	Fall.
Labourer	Sherbrooke, Que.	" 31	Fall.
Labourer	South Mountain, Ont.	" 24	Overcome by heat.
Painter	Ottawa, Ont.	Aug. 1	Fall.
Labourers, (2)	Winnipeg, Man.	" 10	Hit by derrick.
Labourer	Sudbury, Ont.	" 20	Struck by tree.
Painter	LaTuque, Que.	" 13	Fall.
Painter	Hamilton, Ont.	" 23	Fall.
Engineer	Vancouver, B. C.	" 28	Struck by flying fragment.
Plasterer	Halifax, N. S.	" 2	Fall from scaffold.

Foreman	Renfrew, Ont.	" 31	Drain caved in.
Labourer	Longue Pointe, Que.	" 29	Fall.
Plasterer	Toronto, Ont.	" 21	Fall from scaffold.
Labourers (2)	Sault Ste. Marie, Ont.	Sept. 18	Drowned.
Employee of Hydro-Electric Co.	Niagara Falls, Ont.	" 4	Struck by dump car.
Employee of Hydro-Electric Co.	Niagara Falls, Ont.	" 12	Crushed by cars.
Labourer	Montreal, Que.	" 26	Fall.
Labourer	London, Ont.	" 30	Fall.
Carpenter	Montreal, Que.	" 9	Kicked by a mule.
METALS, MACHINERY & CONVEYANCES:—			
Employee of steel plant	Welland, Ont.	July 3	Crushed by steel bars.
Employee of steel plant	Sydney, N.S.	" 3	Struck by falling steam line.
Shipyard employee	North Vancouver, B.C.	" 17	Burned.
Shipyard employee	Port Arthur, Ont.	" 15	Falling iron.
Shipyard employee	Toronto, Ont.	" 27	Drowned.
Machineman's helper	Natal, B. C.	" 7	Caught between drum and post.
Employees of metal products (5)	Montreal, Que.	" 13	Touching live wire.
Employee of carbide works	Welland, Ont.	" 31	Machinery.
Employee of iron works	Pembroke, Ont.	" 1	Strained abdomen lifting material.
Shipyard employee	Quebec, Que.	Aug. 1	Fall.
Shipyard employee	Quebec, Que.	" 21	Fall.
Employee of steel plant	Trenton, Ont.	" 23	Runover by train.
Employee of steel plant	Welland, Ont.	" 10	Electrocuted.
Employee of steel plant	Sault Ste. Marie, Ont.	" 12	Drowned.
Employee of iron works	Toronto, Ont.	" 10	Fall.
Employee of iron works	Guelph, Ont.	" 13	Overcome by heat.
Steamfitter	Toronto, Ont.	" 23	Drowned.
Employee of machine plant	Sherbrooke, Que.	" 27	Fall.
Shipyard employee	Montreal, Que.	Sept. 19	Fall.
Shipyard employee	Ship Harbour, N. S.	" 19	Struck by timber.
Shipyard employee	Welland, Ont.	" 22	Hit by propeller.
Employee of steel plant	Sault Ste. Marie, Ont.	" 1	Run over by cars.
Employee of metal plant	Montreal, Que.	" ..	Fall of lead.
Employee of nickel plant	Port Colborne, Ont.	" 12	Running telpher over open switch.
Labourer	Cobalt, Ont.	" 4	Caught in machinery.
Labourer	Sault Ste. Marie, Ont.	" 29	Boiler fell on him.
Engineer	Welland, Ont.	" 22	Crushed by shafting.
Yardman	Welland, Ont.	" 27	Struck by steel.
WOODWORKING TRADES:—			
Labourer in factory	West La Have, N. S.	July12	Drowned.
PULP AND PAPER MILLS:—			
Pulp mill employee	Donnacona, Que.	July17	Electrocuted.
CLOTHING:—			
Labourer	Toronto, Ont.	July 17	Crushed by elevator.
Foreman in factory	Moncton, N. B.	Sept. 24	Crushed by elevator.

FATAL INDUSTRIAL ACCIDENTS DURING THIRD QUARTER OF 1918.—(*Continued*)

Trade or Industry	Locality	Date	Cause of fatality
FOOD, TOBACCO AND LIQUOR:—			
Employee of milk product company	Tillsonburg, Ont	July 30	Crushed.
Employee of packing house	Winnipeg, Man	Aug. 19	Explosion.
Employee of packing house	Winnipeg, Man	" 19	Explosion.
Employee of packing house	Winnipeg, Man	" 8	Caught in machinery.
Employee of abattoir	Winnipeg, Man	" 11	Crushed by elevator.
Employee of rolling mills	Montreal, Que	" 21	Struck by piece of steel.
Helpers with canning company (3)	Beamsville, Ont	" 22	Struck by train.
Employee of creamery company	Peterborough, Ont	" 6	Crushed by elevator.
Employee of cannery	Esquimalt, B. C	" 16	Drowned.
Foreman with distillers	Walkerville, Ont	" 26	Struck by drift pin.
Employee of flour mill	Chesley, Ont	Sept. 23	Struck by machine.
Driver with dairy company	Toronto, Ont	" 28	Thrown by horse.
Helper with biscuit company	Toronto, Ont	" 21	Caught in elevator.
CHEMICALS AND EXPLOSIVES:—			
Employee of explosive plant	Woodstock, N. B	July 5	Explosion.
Employee of explosive plant	Nobel, Ont	" 4	Burned.
Employee of explosive plant	Nobel, Ont	" 1	Burned.
Employee of explosive plant	Trenton, Ont	" 11	Burned.
Munition worker	Leaside, Ont	Aug. 2	Fell against machine.
Munition worker	Côte St. Paul, Que	" 21	Fall.
Munition worker	Long Branch, Ont	" 16	Infection.
Munition worker	Toronto, Ont	Sept. 7	Crushed by truck.
Employee with oil company	Montreal, Que	" 14	Burned.
Employee of paint company	Winnipeg, Man	" 21	Lockjaw.
Employee with oil company	Sarnia, Ont	" 22	Burned.
Pressman with munition plant	Paris, Ont	" 15	Fall.
STEAM RAILWAY SERVICE:—			
Fireman	Revelstoke, B. C	July 3	Locomotive blew up.
Brakeman	Toronto, Ont	" 9	Run over by engine.
Brakeman	Bellevue, Que	" 27	Crushed between cars.
Engineer	Montreal, Que	" 23	Run over by engine.
Engineer	Stamford, Ont	" 2	Crushed by engine.
Sectionman	Fredericton, N. B	" 9	Fell from trolley.
Section foreman	Athalmer, B. C	" 13	Collision of speeders.
Sectionman	St. Clet, Que	" 26	Run over by car.
Sectionman	Coal Creek, B. C	" 8	Fall of roof.
Signal man, T. H. & B. Railway	Cainsville, Ont	" 16	Run over by train.
Employee of car shop	Trenton, Ont	" 21	Fall.
Employee of engine works	Midland, Ont	" 5	Caught in machinery.
Yardman	Leaside, Ont	" 7	Fell under cars.
Car checker	North Bay, Ont	" 15	Crushed between cars.
Timekeeper	St. Lambert, Que	" 17	Run over by train.
Fireman	Ladysmith, Man	Aug 12	Run over by train.
Fireman	Alberni, B. C	" 10	Fell under cars.
Brakeman	Stellarton, N. S	" 8	Run over by train.
Brakeman	Smith Falls, Ont	" 11	Run over by train.
Brakeman	Glenada, Ont	" 21	Run over by train.
Brakeman	Vancouver, B. C	" 21	Run over by train.
Brakeman	Courteney, B. C	" 24	Run over by train.
Section man	Regina, Sask	" 13	Struck by train.
Section man	Lindsay, Ont	" 13	Struck by train.
Yardman	Vancouver, B. C	" 17	Stepped between cars.
Engineer	Qualicum, B. C	" 24	Caught in machinery.
Labourer	Montreal, Que	" 10	Run over by train.
Labourer	Transcona, Man	" 23	Struck by train.
Fireman	St. Helene, Que	Sept. 6	Derailment.
Fireman	South Indian, Ont	" 1	Collision.
Brakeman	Baie St. Paul, Que	" 9	Scalded.
Section man	Point St. Charles, Que	" 22	Run over by cars.
Conductor	Hamilton, Ont	" 19	Crushed by train.
Car inspector	Hochelaga Est, Que	" 6	Struck by car.
Labourer	Baie St. Paul, Que	" 4	Struck by steam crane.
Workman	St. Anne, Que	" 6	Rupture.

FATAL INDUSTRIAL ACCIDENTS DURING THIRD QUARTER OF 1918.—(*Continued*)

Trade or Industry	Locality	Date	Cause of fatality
STEAM RAILWAY SERVICE:—(*Continued*)			
Trackman	Fairview, N. S.	Sept. 14	Run over by train.
Labourer	St. John, N. B.	" 16	Run over by train.
Welder with railway company	Stratford, Ont.	" 14	Explosion.
Yardman	North Bay, Ont.	" 16	Crushed by cars.
Employee of C. P. R. shops	Montreal, Que.	" 26	Not known.
Labourer	Winnipeg, Man.	" 30	Blood poisoning.
Carpenter	Leaside, Ont.	" 6	Fell off roof.
Sectionman	Carleton Place, Ont.	" 16	Shot.
Trackman	Ottawa, Ont.	" 24	Struck by car.
ELECTRIC RAILWAY SERVICE:—			
Brakeman	Vancouver, B. C.	Aug 21	Died of shock.
Lineman	Ottawa, Ont.	" 31	Fell from ladder.
MISCELLANEOUS TRANSPORT:—			
Driver	Victoria, B. C.	July 3	Collision.
Deckhand	Kingston, Ont.	" 3	Drowned.
Teamster	Calgary, Alta.	" 18	Run over by horses.
Barge captain	Quebec, Que.	" 23	Drowned.
Truck driver	Levis, Que.	Aug 6	Crushed under motor truck.
Seaman	Chatham, Ont.	" 18	Drowned.
Teamster	Halifax, N. S.	" 6	Fell under wagon.
Ambulance driver	Montreal, Que.	Sept. 29	Collision with street car.

Truck driver	Montreal, Que.	" 28	Fall from motor truck.
Chef on steamship	Cornwall, Ont.	" 20	Fell off ladder.
Mate on steamship	Murray Bay, Que.	" 22	Scalded.
PUBLIC UTILITIES:—			
Electrician	Meaford, Ont.	July 29	Electrocuted.
Electric worker	Ottawa, Ont.	Aug. 15	Electrocuted.
Employee of power company	Montreal, Que.	" 26	Electrocuted.
Telephone employee	Montreal, Que.	Sept. 6	Electrocuted.
Telephone employee	Carleton Place, Ont.	" 13	Electrocuted.
Telephone employee	Carleton place, Ont.	" 13	Electrocuted.
Electrical worker	Moncton, N. B.	" 16	Electrocuted.
Conductor with power company	Hamilton, Ont.	" 19	Crushed between cars.
Labourer with power company	Stamford, Ont.	" 3	Skull fractured.
MUNICIPAL EMPLOYMENT:—			
Labourer	Carleton Place, Ont.	July 5	Crushed by roller.
Electrician	Penticton, B. C.	" 19	Electrocuted.
Fireman	Toronto, Ont.	" 22	Inhaling nitric acid fumes.
Fireman	Victoria, B. C.	Sept. 1	Explosion of fire extinguisher.
MISCELLANEOUS:—			
Bookkeeper	Toronto, Ont.	July 18	Killed by auto.
Clerk	Toronto, Ont.	" 22	Fell down elevator shaft.
Labourers (2)	Montreal, Que.	" 13	Collapse of floor.
Steam fitter	Montreal, Que.	" 13	Collapse of floor.
Employee of store	Toronto, Ont.	Aug. 7	Fell down elevator shaft.
Elevator operator	Winnipeg, Man.	" 11	Crushed by elevator.
Employee of stock yards	Montreal, Que.	" 19	Trampled by bull.
Employee of cement company	Longue Pointe, Que.	" 26	Fall.
Employee of cement company	Montreal, Que.	" 28	Fall.
Employee of Jenkes shop	Sherbrooke, Que.	" 27	Electrocuted.
Fireman	Winnipeg, Man.	" 7	Trap door fell on him.
Labourer	Montreal, Que.	" 27	Electrocuted.
Plumber	St. John, N. B.	Sept. 4	Fall.
Tester with auto company	Walkerville, Ont.	" 16	Infection.
Operator with refinery co.	Port Coborne, Ont.	" 12	Skull fractured.
Carter	Montreal, Que.	" 26	Electrocuted.
Labourer with storage company	Cornwall, Ont.	" 21	Caught in gear.

PROGRESS OF THE 'SAFETY FIRST' MOVEMENT IN CANADA

DURING the past few years considerable progress has been made in the prevention of industrial accidents in Canada through the medium of educational campaigns, teaching both the employer and the worker the necessity for safety devices and for the exercise of ordinary care and commonsense in preventing accidents and the attendant suffering and financial and economic loss to the worker and to industry.

A number of accident prevention associations in Canada owe their origin to the Workmen's Compensation Acts in operation in various provinces. For example, Section 101 of the Ontario Act provides that, if the Compensation Board is of opinion that a safety association formed for any particular industry sufficiently represents that industry, the board may make a grant towards the salaries of inspectors and other expenses of the association. Similar provisions are incorporated in the acts of other provinces. In this connection the Workmen's Compensation Board of Ontario expended more than $38,000 during 1917. Among the organizations assisted in this manner may be mentioned the Industrial Accident Prevention Associations Incorporated, which includes in its membership the safety associations of the Furniture Manufacturers (Class 3 in the Act), Woodworkers (Class 4), Clay Products and Quarrymen (Class 5) Glass Manufacturers (Class 7) Metal Trades (Class 8 and 10), Implement and Vehicle Manufacturers (Class 11) Bottlers (Class 15) Pork Packers Class 18), Tanners (Class 19) Leather Manufacturers (Class 20) Textile Manufacturers (Class 26) Wearing Apparel Manufacturers (Class 27), and the Printing Trades (Class 29). Among others may be mentioned, the Lumberman's Safety Association, the Electrical Employers' Safety Association and the Ontario Pulp and Paper Makers' Safety Association.

For the purpose of this article, which is to describe in a general way the manner in which the various safety organizations operate, three typical associations will be discussed in the light of information received through the courtesy of their secretaries.

The Industrial Accident Prevention Associations Incorporated, the head office of which is in Toronto, retains a staff of inspectors who visit every industry in the classes represented in its membership from two to four times in each year. These inspectors, who are educated in the most up-to-date methods of mechanical devices for protection, recommend the installation of safeguards wherever danger is presumed to exist. These recommendations are followed up by the head office of the Association until they are complied with. A record of the inspection and disposition of the recommendations is filed with the Workmen's Compensation Board, which enables them to determine whether the employer is making any real effort towards the prevention of accidents. All information that comes to the notice of the Association is at the disposal of employers, and is brought to the attention of the employees through the inspectors. The inspectors also encourage the educational feature among employers and workers through the introduction of bulletins into the plants and workshops. Between 600 and 700 sets of bulletins are now being issued each week by this Association alone.

In 1914, the Electrical Employers' Association of Ontario was formed among the privately owned power and telephone companies of the province, for the prevention of accidents both to the companies' employees and to the general public. The Association's inspectors make regular inspections of the

plants of the member companies, and offer suggestions as to where guards can be placed and serious hazards eliminated from the mechanical and electrical features of the plants. During these inspections, short talks of accident prevention are given to the employees, and, in some instances, accident prevention committees have been organized in some of the larger plants. Instruction and training is given employees in the Schaeffer Prone Pressure Method of Resuscitation from electric shock, gas poisoning and drowning. Regular practices and examinations in resuscitation have been carried out since the early part of 1915. In a number of companies such practices are carried out once every two weeks among the employees. As a result of this training, numerous cases of successful resuscitation have taken place.

The Association, of course, keeps in touch with the latest progress in accident prevention in Canada and the United States, and sends out from time to time circular letters drawing attention to the more serious hazards and the ways to prevent them. Safety-first outfits are prepared for the member companies, and information supplied as to where various devices for accident prevention can be purchased.

According to the secretary of the Association, very gratifying results have been obtained by the hearty co-operation between the executive officers of the companies and the workers. "There is no doubt," says another official, "that the keystone of any work in accident prevention is the foreman directly in charge of the men. With interest of the men in their own and their fellow-workers' safety, intelligent direction by well trained foremen and hearty co-operation on the part of executive officers, successful results in accident prevention are practically assured."

The Ontario Pulp and Paper Makers' Safety Association attach the greatest importance to the formation of safety committees in the mills, and to this end seek the sympathy and active co-operation of the employers, superintendents and foremen. When established, the members of these committees are urged to use their influence among fellow-employees to eliminate chance-taking and carelessness. In some of the large plants departmental safety committees as well as central committees are formed. By this means each department is responsible for its own safety management. In order to secure a more general co-operation the chairmen of the departmental committees are members also of the central committees. It is stated that this method of interesting the workers has produced very satisfactory results. This Association also arranges safety rallies which are held periodically in different districts. In these rallies moving pictures and addresses by safety engineers form the bulk of the programme A bulletin issue is also a part of the service, the bulletins used being those of the National Safety Council of Chicago, with which the Association is in close co-operation

Comparative statistics of accidents are issued from the office of the Association every month to each mill showing its position in comparison with other mills. This is said to have created a competitive spirit among the mills to secure a good position on the monthly statements.

The Workmen's Compensation Board of Ontario in introducing the "merit rating" scheme of assessment* will do much to promote action on the part of employers, if only from motives of self-interest, towards reducing the number of accidents among their employees. This "merit rating" system is designed to enable employers who have reduced the hazards in their plants by the installation of safety devices and by other measures of accident prevention, to secure a proportionate reduction on rates through merit credits, and on the other hand to penalize employers who neglect safety equipment in their plants by imposing a demerit differential in

*Authorized in sub-sec. 4 of s. 85 ,added by s. 14, c. 34 1917.

addition to the regular rate. It should be stated that other provinces are also giving consideration to this system of "merit rating."

It is claimed that the turnover of labour and lack of training are two very serious factors in the causation of accidents. A very high percentage of accidents is also reported among alien workers, who either do not understand the English language, or understand it very imperfectly.

The following is a plan for the formation of central and departmental safety committees as outlined by the Ontario Pulp and Paper Mills Safety Association:

Personnel and Duties of Central and Departmental Safety Committees

1. Central committee composed of not less than three members nominated by the management, and the Chairman of each Departmental Committee.

2. Committee of four in each Department, popularly elected by the employees of each department. Chairman elected by the Committee.

3. Period of service on Committees to be fixed by Central Committee.

DUTY OF CENTRAL COMMITTEE

1. Appoint sub-committee of two each month to carry out a systematic inspection of all departments of the mill. This inspection to include:

(*a*) Inspect and report on condition of existing safeguards.

(*b*) Make suggestions for guarding of dangerous points throughout the mill.

(*c*) Report on general order and arrangemen t of materials.

(*d*) Cleanliness of plant.

(*e*) Lighting in buildings and in yard.

(*f*) Sanitary conditions.

(*g*) Make suggestions for the placing of danger signs throughout plant.

(*h*) Inspect and report on condition of all fire fighting apparatus.

2. Review and approve at the monthly meeting the report of the inspecting committee.

3. Encourage employees to offer suggestions for Safety operation, and when suggestions are turned in, pass on same, determining the practicability as well as the advisability of carrying them into effect.

4. Members to familiarize themselves with the causes of accidents and near accidents, which have happened between the meetings. Discuss ways and means of preventing accidents.

5. Take charge of bulletin boards, including:

(*a*) Distribution of bulletins from outside sources to each department.

(*b*) Distribution of clippings of articles of interest to each department.

(*c*) Distribution of items of Mill interest to each department.

(*d*) Distribution of monthly report of accidents to each department.

(*e*) Distribution of safety rules to each department.

6. Formulate rules for Safety of Operation.

7. Encourage cleanliness and order throughout the mill.

8. Watch out for dangerous practices, cautioning men against same, and reporting at committee meeting.

9. To have general charge of all items relating to welfare, safety and education of all employees.

10. Minutes of all meetings to be kept by a duly appointed secretary.

DUTY OF DEPARTMENTAL COMMITTEES

1. Make monthly inspection of department and report to central committee.

2. Encourage all employees in department to offer suggestions for safe operation.

3. See that men from other departments do not visit department unnecessarily.

4. See that new employees are properly instructed as to the hazards of their work and means of preventing accidents to themselves and others.

5. Take charge of department bulletin board, see that bulletins are changed regularly, and board kept clean and tidy.

6. Encourage cleanliness and order throughout department.

7. In case of accident render minor first aid until doctor can be called.

8. Watch out for dangerous practices, cautioning men against same, and reporting to committee.

9. Inculcate, by precept and example, the spirit of co-operation and good comradeship and so make the work of the department a pleasure as well as a duty.

CANADIAN GOVERNMENT RAILWAYS EMPLOYEES' RELIEF AND INSURANCE ASSOCIATION

THE twenty-ninth annual report of the Canadian Government Railways Employees' Relief and Insurance Association, which appears in the October issue of the *Canadian Government Railways Employees Magazine*, presents a satisfactory financial statement notwithstanding an unusually heavy drain upon its funds due to the war and the great disaster at Halifax. There were 212 death claims during the fiscal year ending June 30, 1918. Of this number, 59 lives were lost in the Halifax disaster, and 37 died on military service. The statement of the expenses of management is as follows:

Total receipts	$186,143.08
Credit balance, June 30, 1917	62,647.42
	248,790.50
Total expenditures	179,320.84
Leaving credit balance	69,469.66
Less estimated outstanding liabilities	12,050.00
Net surplus, June 30, 1918.	$57,419.66

The expenditures from the sick and accident fund were $74,292.78, an increase of $20,735.81 over the previous year. Out of the temporary employees' accident fund there was spent $17,990.33. During the year 186 death and total disability claims, amounting to $75,250, were paid to regular members or their heirs. In the previous year these claims totalled $52,000.

A statement recently prepared by the secretary of the association, covering the period from May, 1890, to December 31, 1917, shows a total expenditure of $1,744,331.01 on indemnities and claims, made up as follows:

Regular members—	
Sick and accident claims.	$ 465,029.92
Medical and surgical attendance	378,946.60
Death claims	625,207.20
Total disability claims	143,500.00
Total	$1,612,683.72
Temporary members—	
Accident indemnity	61,824.29
Surgical attendance	39,323.00
Death indemnity	30,500.00
Total	$ 131,647.29
Total amount of claims of all members	$1,744,331.01

MIGRATION AND SETTLEMENT

HOMESTEAD ENTRIES. — During the third quarter of 1918 there were 245 homestead entries in Manitoba, 371 in Saskatchewan, 663 in Alberta, and 14 in British Columbia, a total of 1,293 for the three months, as compared with 1,472 for the second quarter of 1918 and 2,531 for the corresponding period of 1917. The following statement shows the number and nationality of those who took up homesteads in the various provinces during the third quarter of 1918, with a comparison of the figures for the same period in 1917:

HOMESTEAD ENTRIES BY PROVINCES AND NATIONALITY OF HOMESTEADERS—JULY-SEPTEMBER, 1918.

LANDS PATENTED.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia, and the Yukon Territory for the third quarter of 1918, the number of patents was 3,410 and the number of acres 543,551.86, as compared with 4,784 patents and 792,863.83 acres in the second quarter of 1918, and 5,490 patents and 876,885.37 acres in the corresponding quarter of 1917. The following statement gives details of lands patented during the third quarter of 1918, with a comparison of the figures for the same period in 1917:

RECENT LEGAL DECISIONS AFFECTING LABOUR

Interpretation of Accident Insurance policy

A BUILDING contractor took out an accident policy with an insurance company, by which the company agreed to indemnify him for all damages that might be imposed upon him for the death or injury of his employees. On August 23, 1917, one of his workmen received an injury to his eye. On September 3 he went to a hospital for treatment, but the trouble became worse and he finally lost his eye. The employer heard of the accident for the first time on October 15, and at once reported it to the accident insurance company. In reply, the company declined all responsibility, claiming that he had not conformed to the conditions of the policy, in particular that he had not given notice of the accident immediately. A little later the injured workman entered suit against his employer for compensation to the amount of $2,025 for the loss of his eye. The contractor did not contest this suit, but reported it to the insurance company. On the refusal of the company either to adjust the claim or to contest it, he entered an action against the company in the Superior Court of Quebec. The

company based its defence on the following condition in the policy:

"When an accident takes place, the insured shall immediately give to the head office of the company at Montreal, by letter, a notice containing the most complete details that can be procured at that moment. And if a claim arises concerning this accident, the insured shall immediately give notice to the said office, and furnish it with all the details. The whole time the insured shall give every aid and assistance possible to the company."

It was held by the Superior Court of Quebec that the word "immediately" in an insurance policy means without unnecessary delay or with reasonable diligence under the circumstances of the particular case. The same doctrine is quoted from another source as follows: "It seems to be the general rule that where, because of circumstances and conditions surrounding the transaction, the giving of notice within the time specified becomes impossible, it will be excused and held sufficient if given within a reasonable time after the removal of the obstacle." It was further stated as a principle of jurisprudence that "when an insurance policy is ambiguous, equivocal, arbitrary, giving room for injustice, it ought always to be interpreted against the company, since it is the company which is always charged with drawing up a contract of insurance." Under these considerations the Court ordered the defendant to pay the plaintiff the sum of $1,134, with interest and costs. (*Quebec—Parent v. Merchants Assurance Company.*)

Jurisdiction of Manitoba Workmen's Compensation Board

A machinist employed by the Canadian Northern Railway Company at Fort Rouge, Manitoba, died while at work, and the company was ordered by the Workmen's Compensation Board of Manitoba to pay his widow a monthly sum of $20, so long as she should live and remain unmarried, and certain smaller sums to her children. The company objected to this order and moved in the Court of King's Bench for an injunction to restrain the three members of the Board from filing the order in that Court. The claim for an injunction was based on the ground that the Commissioner who made the order had no jurisdiction because the deceased workman died of natural causes, and his death was not caused by an accident arising out of or in the course of, his employment as required by the Workmen's Compensation Act.

On behalf of the defendants two preliminary objections were raised: (1) The form of the action is misconceived, for if any remedy exists it should be asserted against the Board, which is created a corporation under the Workmen's Compensation Act, and not against the individual members. (2) The Court has no jurisdiction to deal with any transactions by the Board, as all such interference by the Court is expressly taken away by the Workmen's Compensation Act. The first objection was overcome by permission being given the defendants to amend their statement of claim by adding the Board as a party defendant. With regard to the second objection, it was held by the Court that the Workmen's Compensation Board was legally an inferior Court with very limited jurisdiction, whereas the Court of King's Bench is a Superior Court of Record, whose jurisdiction certainly extends to prohibition of inferior Courts from dealing with matters beyond their jurisdiction. On the other hand, an inferior Court, when acting within its jurisdiction, cannot be restrained by prohibition no matter how erroneously it may decide on either facts or law. In the present case, in the opinion of the Court, the Board acted without jurisdiction, because, as was admitted by the counsel for the defendants, it failed to give notice to the plaintiffs of its proceedings, to which they were entitled.

Both of the preliminary objections were overruled. (*Manitoba—Canadian Northern Railway v. Wilson.*)

Quebec Workmen's compensation law covers accidents in other Provinces

A workman was engaged in Montreal to work at Port Arthur, Ont., and while there a piece of iron fell on his foot and caused the loss of the first joint of his second toe. He claimed compensation under the Workmen's Compensation Act of Ontario, and the Workmen's Compensation Board of that Province awarded him $54.56 as partial payment to June 27, 1916, the accident having taken place on June 1. From June 27 he continued at work until July 20, when he with some others was discharged as there was not enough for them to do. He returned to the province of Quebec, but for two months he was unable to do any work on account of pain from the injury. He then made a claim under the Quebec law for $9. a week from July 20, for the time during which he was incapable of work, being half his wages, and $2 a week thereafter as compensation for half of his permanent partial loss of capacity for work. It was claimed by the defendant company that the plaintiff could not invoke the law of Quebec, because he had already been awarded an indemnity by the Workmen's Compensation Board of Ontario, and because his yearly wages exceeded $1,000. It was further denied that his capacity for work had diminished in consequence of his accident.

The Superior Court held that from the evidence of the two doctors who examined him, and from the statements of authors of tables showing the extent of incapacity from wounds, the plaintiff did not suffer any permanent incapacity for work due to his accident. It was further held that the plaintiff had a right to appeal to the courts of Quebec for compensation, in view of the fact t at the obligation to give compensation forms, acording to the law, a part of the contract of service, and that the source of this obligation is only in this law, which does not limit it to accidents sustained in the province of Quebec. In the absence of such limitation the courts cannot impose it. With reference to the wages of the plaintiff, the Court held that he only earned $4.50 per day temporarily, and that in the twelve months preceding the accident his wages did not amount to $1,000.

The claim of the plaintiff was therefore admitted in part, and the defendant was condemned to pay him half his wages for the two months during which he was idle, amounting to $117, with interest from September 21, 1916, with costs. (*Quebec—Burdeau v. Dominion Bridge Company, Ltd.*)

Settlement of compensation for accident ratified by Court

A workman was injured when at work and was incapacitated for four weeks. Six months after the accident took place, he accepted $200 from his employer as compensation, but when application was made to the Superior Court of Quebec for the sanction of this arrangement, the workman opposed the motion on the advice of his lawyer. The grounds of his opposition were that he had been induced to make the settlement by the threats and false representations of his employer's agent, that he had given his consent by mistake and without consulting his lawyer, that the act was illegal,

contrary to the law and null and void. The Superior Court of Quebec held in its judgment that the settlement was made freely and voluntarily, and with due knowledge of the plaintiff, and there was no reason to take into consideration the facts alleged in the plaintiff's affidavit, since he declared as witness that he had not well understood the sense and purpose of it, seeing that it was drawn in the English language. In consequence, the Court maintained the motion of the defendant, ratifying the settlement, and declaring extinguished all claims that the plaintiff could have against the defendant by reason of the accident.

An appeal was taken to the Court of Revision, which confirmed the judgment of the Superior Court, declaring that in the settlement nothing was done contrary to the law. Application had been made to the Court for its sanction of an agreement, and in its discretion it had approved the agreement. This is final. Such an agreement, it was pointed out, could, however, be set aside even after the judgment for reasons which annul contracts, namely, if the workman had been defrauded, or had yielded to false representations. (*Quebec—Patenaude v. Canada Cement Company.*)

Employer liable for accident due to unprotected machinery

The widow of the caretaker of a grain elevator, who was killed when at work, brought action in the Court of King's Bench of Saskatchewan against the company that employed him to recover damages for his death. While there was no witness to the accident, the theory of the plaintiff as to how it took place was accepted by the Court as the most probable one. From this it appears that the deceased workman was on the first floor when he was summoned by his foreman to go down to the ground floor. Before descending, he mounted a ladder and stepped onto a platform, in order to get a rag which he had left there. Upon this platform is a drum around which are coiled the cables that operate a lift from the ground floor. In some way the workman slipped, and in order to prevent himself from falling through a hole between the drum and the platform, he grasped the moving cable, became entangled in it and broke his neck.

It was held by the Court that the defendant was guilty of a breach of statutory duty in not having had the drum protected and the hole covered, as these matters come within section 19 of the Factories Act, which provides in part as follows (a) In every factory all dangerous parts of mill gearing, machinery, vats, pans, caldrons, reservoirs, wheel races, flumes, water channels, doors, openings in the floors or walls, bridges, and all other dangerous structures or places shall be as far as practicable securely guarded. It was further held that this breach of duty was the cause of the accident. The plaintiff was therefore awarded damages to the amount of $5,000 with costs. (*Saskatchewan—Hilton v. Robin Hood Mills, Ltd.*)

REVIEWS

NEW SOUTH WALES.—Department of Labour and Industry. Report on the working of the Factories and Shops Act, 1912, during the year 1917. 52 pp.

Industrial conditions of New South Wales

THE Report on the working of the Factories and Shops Act, 1912, of New South Wales, Australia, for the year 1917, shows that general industrial conditions continued to be good in that part of the Commonwealth, although some industries were hampered by lack of raw materials. Statistics collected for the week ended December 1 show that there were 8,099 factories in the State, employing 95,251 persons, an increase of 34 factories and 2,599 persons over the previous year. The effects of the war have not yet been serious enough to disturb the comfort of the people in Australia. Prices have risen, shortages in shipping, machinery, and certain materials have become manifest, but it is stated that the people are as well fed, clothed, and housed as in pre-war days, and there are few unemployed. The restriction of imports has caused a number of new industries to spring up in New South Wales, among which are mentioned the manufacture of motor cycles and cars, tin and lead tubing for toilet articles, asbestos roofing, fire-bricks and roofing tiles, white lead, paint and varnish, musical instruments, sewing machines and toys. The steel works at Port Waratah, Newcastle, have expanded tremendously owing to war demands, and another company has established a new industry by obtaining tar from the coke ovens of the steel works, and producing from it by distillation benzol, naphtha, carbolic acid, and other by-products.

UNITED STATES.—Effect of the Air Hammer on the Hands of Stonecutters. Bulletin of the United States Bureau of Labour Statistics, No. 236. 1918. 147 pp.

Effect of the air hammer on stonecutters' hands

A bulletin has been issued by the United States Bureau of Labour Statistics, dealing with the effect of the air hammer on the hands of stonecutters. The investigation on which the bulletin is based was made on the request of the American Association for Labour Legislation, as the result of a speech made before it by the president of the Journeymen Stonecutters' Association of North America. It was alleged by him that the incessant vibration of the pneumatic hammer, striking 3,400 blows every minute, paralyzes the hands, by reducing their circulation. He claimed they had tried every possible way to induce the employers to investigate the results of using it, and recently during a controversy in a certain district, the men were told by the employers that if they refused to use the pneumatic hammer after the expiration of their agreement, they would be locked out under the terms of the agreement with the international union.

Inquiries as to the harmful effects of the pneumatic hammer made by the Bureau in the limestone belt of Indiana elicited replies from 97 employees and 18 firms. Of the employees, 68 reported that they had been injured by its use, and 29 that they had not. Of the in-

jured, 16 stated that their left hand and arm were affected, and 13 complained that the hammer had a bad effect on their nerves. The employers claimed that the pneumatic hammer was a necessity of their business, as it enabled them to compete with makers of artificial stone. A number of them claimed that any ill effects caused by this hammer were due to the wrong use of it and should not be attributed to the tool itself. Although it is only intended for a finishing tool, it was alleged that many of the men employed it for all purposes, instead of taking up the mallet and chisel for rough work. It was also claimed by them that numbing caused by choking the exhaust with the thumb could not be held chargeable to the hammer.

Various medical examinations in connection with this inquiry were made from which the following conclusions were drawn: Among men who use the air hammer for cutting stone, there appears very commonly a disturbance in the circulation of the hands, which consists in spasmodic contraction of the blood vessels of certain fingers, making them blanched, shrunken and numb. These attacks usually come on early in the morning or after work. This form of anemia is very slow in disappearing, but there seem to be no serious secondary effects, and according to the opinion of the majority of stonecutters the condition does not impair the skill in the fingers for ordinary interior stone cutting and carving, but may make it impossible for a man to do outside cutting in cold weather, or to take up a skilled trade which exposes the hands to cold. The trouble seems to be caused by three factors: long-continued muscular contraction of the fingers in holding the tool, the vibration of the tool, and cold. It is increased by too continuous use of the air hammer, by grasping the tool too tightly, by using a worn, loose air hammer, and by cold in the working place. With the elimination of these features, it is thought that the trouble can be decidedly lessened.

UNITED STATES.—Lessons in Community and National Life. Series A, for the Upper Classes of the High School. Series B, for the First Class of the High School and the Upper Grades of the Elementary School. Series C, for the Intermediate Grades of the Elementary School. Department of the Interior, Bureau of Education. 264 pp. each.

Lessons in Community and National Life

The United States Bureau of Education, in co-operation with the United States Food Administration, has issued three volumes of Lessons in Community and National Life, Series A being for the use of the upper classes of high schools, Series B for the third class of high schools and the upper grades of elementary schools, and Series C for the intermediate grades of the elementary schools. These courses were prepared by direction of President Wilson, who explains their purpose in a letter to school officers, which is in part as follows:

"The war is bringing to the minds of our people a new appreciation of the problems of national life and a deeper understanding of the meaning and aims of democracy. . . . The urgent demand for the production and proper distribution of food and other national resources has made us aware of the close dependence of individual on individual and nation on nation. The effort to keep up social and industrial organizations in spite of the withdrawal of men for the army has revealed the extent to which

modern life has become complex and specialized. These and other lessons of the war must be learned quickly if we are intelligently and successfully to defend our institutions. When the war is over we must apply the wisdom which we have acquired in purging and ennobling the life of the world. In these vital tasks of acquiring a broader view of human possibilities the common school must have a large part. I urge that teachers and other school officers increase materially the time and attention devoted to instruction bearing directly on the problems of community and national life. . . . In order that there may be definite material at hand with which the schools may at once expand their teaching, I have asked Mr. Hoover and Commissioner Claxton to organize the proper agencies for the preparation and distribution of suitable lessons for the elementary grades and for the high school classes. Lessons thus suggested will serve the double purpose of illustrating in a concrete way what can be undertaken in the schools and of stimulating teachers in all parts of the country to formulate new and appropriate materials drawn directly from the communities in which they live."

The series are each divided into eight chapters, arranged under the following headings: Social Organization and the Effects of the War; Production and Wise Consumption; Machine Industry and Community Life; National Control and Food Conservation; Customs, Laws, and Forms of Government; Business Organization and National Standards; Concentration of Population, Industries, and Institutions; The Worker and the Wage System. Nearly every chapter contains three or four lessons by specialists in the various subjects treated.

The objects of these lessons are further set forth in an Introduction by Charles H. Judd, Director of the School of Education of the University of Chicago, under whose direction the series were prepared. He states that they are intended first of all to lay the foundations for an intelligent enthusiasm for the United States. They are accordingly filled with concrete descriptions of American institutions and their significance is made as clear as possible. In the second place, the lessons aim to bring industry into the schools in a way which will appeal to the intelligence of pupils and will intellectualize all later contact with practical affairs. They accordingly tell how industries have originated and evolved, so that the pupil may see that industry is a part of man's intellectual conquest of the world. In the third place, the lessons are intended to create a sense of personal responsibility, which can result only when the pupil is shown how his life is interdependent with the life of other members of society.

UNITED STATES.—Report of Decisions of the Industrial Accident Commission of the State of California for the Year 1917. Vol. 4, 1917. 471 pp.

Workmen's compensation law of California

The Report of Decisions of the Industrial Accident Commission of California for 1917 contains a brief review of the Workmen's Compensation Acts of that State. The Employers' Liability (Compensation) Act of 1911, popularly known as the Roseberry Act, was an elective compensation act and applied only to those filing notice of their intention to come under its provisions. In that year an amendment to the State Constitution was carried, authorizing further legislation to provide for compensation in a compulsory form.

In 1913, the Workmen's Compensation, Insurance and Safety Act, known as the Boynton Act, was passed, superseding the prior Roseberry Act, and went into effect on January 1, 1914. This Act is a compulsory measure, and includes all classes of labour with the exception of farm, dairy, agricultural, viticultural or horticultural labour, stock or poultry raising, domestic service, and employments which are both casual and not in the usual course of the business of the employer. Various amendments have since been made to this law, the only important one being the extension of the Act to cover occupational diseases. This was accomplished by striking out the requirement of proof of an accident, leaving all injuries compensable which occur in the course of and rise out of the employment, whether accidental or otherwise.

THE

LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.
DEPUTY MINISTER—F. A. ACLAND.

Volume 18 DECEMBER, 1918 Number 12

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

During November the labour market was disturbed by the signing of the armistice; also, to a lesser degree, by the influenza epidemic, which particularly affected the lumber camps and coal mines. Many hundreds of munition workers were discharged, most of whom were absorbed by other industries. In civic employment there was a small decrease in the number of workers, but a slight increase in the wages paid in comparison with October.

The time loss on account of industrial disputes during November was less than during October, but greater than in November, 1917. There were in existence during the month 23 strikes, affecting 4,330 workpeople and involving a time loss of 36,843 working days.

The average cost of the weekly budget of staple foods averaged $13.49 at the middle of November as compared with $13.54 for October, 1918, $12.10 for November, 1917, and $7.96 for November, 1914. The index number of wholesale prices stood at 290.9 for November, as compared with 289.6 for October, 1918, 247.3 for November, 1917, and 135.8 for November, 1913.

Proceedings under the Industrial Disputes Investigation Act

During the month of November the Department received reports from three Boards of Conciliation and Investigation appointed to inquire into disputes affecting: (1) the Algoma Steel Corporation and Algoma Construction Engineering Company, of Sault Ste. Marie, Ont., and their enginemen, firemen, conductors, brakemen, electrical and steel workers; (2) various elevator operators at Port Arthur and Fort William and certain of their employees; and (3) the Polson Shipbuilding Company, Toronto Shipbuilding Company, and Dominion Shipbuilding Company, of Toronto, and their ship carpenters, caulkers, joiners and woodworking machinists.

Sixteen applications were received for the establishment of Boards; two other Boards, established during the previous month, were completed by the appointment of chairmen, and the dispute between the Canadian Northern Railway Company and its clerks, station employees, etc., was referred to the Labour Appeal Board.

The new Minister of Labour

On November 7 the Honourable Gideon Robertson was sworn in as Minister of Labour in succession to the Honourable T. W. Crothers, K.C., M.P. Mr. Crothers had held the portfolio since 1911 and had been compelled by ill health to resign. The new Minister had been prominent as a labour leader, particularly in connection with the Order of Railroad Telegraphers. Mr. Robertson became in 1907 chairman of the adjustment committee of his union for the Canadian Pacific Railway lines, and was, in 1914, elected vice-president for Canada of the Order of Railroad Telegraphers. In January, 1917, Mr. Robertson was appointed to the Senate, becoming later in the same year a member of the Government without portfolio, and, early in 1918, chairman of the Board of Registration. Senator Robertson is also chairman of the labour sub-committee of the Reconstruction and Development Committee of the Cabinet.

A letter which has been made public was addressed by the Prime Minister to the retiring Minister, in which the Minister's resignation was acknowledged. The communication read as follows:

"Dear Mr. Crothers,—

"I beg to acknowledge your letter conveying to me your resignation as Minister of Labour, which, under the circumstances disclosed to me at our interview, I must accept, but with much regret. You told me some eighteen months ago that your health was not good, but that you hoped to continue your duties until the end of the war. I expressed to you my desire and my hope that your strength would prove sufficient for that purpose, and I realize the unremitting labours which you have since discharged with great ability and devotion to the public interest.

"During the period of more than seven years in which you have been Minister of Labour you have been confronted from time to time with many difficult questions, and this has been especially true during the past four years. It must be a matter of great satisfaction to you, as it is to me, that during that period there have been fewer labour disturbances in Canada than in any other part of the Empire. This is a tribute not only to the moderation and patriotic spirit of organized labour, but also to the wisdom and ability with which you have discharged your duties as Minister.

"May I venture to express my hope that the well-earned holiday which you are about to take will prove most beneficial, and that, although you find your strength unequal to continuing the labours incident to the head of the important department over which you have presided, you will take an active and energetic interest in public affairs.

"Believe me, dear Mr. Crothers,

"Yours faithfully,

"(Sgd.) R. L. BORDEN."

* * *

British Government to pay return passage of Canadian workmen

The Department of Labour has received word to the effect that all British subjects who, since the beginning of the war, have gone to Great Britain for employment on government contracts and have, so far as possible, worked continuously, will be given free conveyance home. The wives and children of these men who went over and joined them in England or Scotland will also be brought back free of charge. This provision applies only to boys under 16 years of age and girls under 18. The arrangement is presumably intended specially to affect the Canadian workmen who removed from Canada to Great Britain in the summer of 1915 by agreement with a British Mission which visited Canada to secure suitable workmen then unemployed. About 2,000 men went across. Many have since returned, but it is estimated that about 400 Canadian workmen are yet in Great Britain. In a few cases

the families of the workmen remaining have also remained in that country.

* * *

Canadian National Reconstruction Groups

Last year the organization of Canadian National Reconstruction Groups was begun in Montreal for the purpose of studying the problems arising from the war, and making suggestions for their solution. It is proposed to create small study groups throughout the Dominion, including wherever possible representatives of the returned soldier, capital, production, and labour. For this purpose the parent body has constituted itself a Standing Committee on Plans and Propaganda, and has issued a pamphlet bearing the title of "The Problems of Reconstruction," in which are collected the opinions and suggestions of many writers on various social and economic problems arising out of the new conditions brought about by the war. The object of the publication is to afford some concrete material for the groups to work upon. A wide variety of subjects are discussed in it, and a bibliography is given containing the names of publications referred to in the text and others that would be of benefit to the study groups. This pamphlet and other information may be obtained from the honorary secretary, 201 Coristine Building, Montreal.

* * *

Cabinet Committee to co-ordinate reconstruction programs

A special committee of the Cabinet has been formed under an Order-in-Council to co-ordinate the policies of the various government departments having to deal with the absorption into civil life and occupation of discharged soldiers. The committee, which is known as the Repatriation and Employment Committee of the Dominion Government, will also consider industrial and labour conditions which may arise from industrial dislocation and re-adjustment following the termination of the war. The Honourable J. A. Calder is chairman of the committee, and Mr. H. J. Daly has been appointed to direct the committee's work.

The text of the Order-in-Council is as follows:

"The committee of the Privy Council have had before them a report, dated November 14, 1918, from the Honourable Sir Thomas White, the Acting Prime Minister, stating that with the conclusion of peace important industrial problems relating to employment are likely to arise through the dislocation of business and the re-adjustment of our industries to a peace basis.

"Further, the demobilization of the Canadian forces is likely to be proceeded with continuously from this time forward, and it is desirable that every effort should be made to meet the problem of the absorption of discharged soldiers into the civil life of the community as rapidly as possible.

"The Minister observes that the necessary governmental machinery has been created to deal with these and other cognate problems through the Department of Soldiers' Civil Re-establishment, the Department of Labour, and the Department of the Interior through the agency of the Returned Soldiers' Land Settlement Board.

"The Minister submits that it is desirable that steps should be taken to provide for the fullest co-operation of the various departments and agencies now existing or that may be hereafter created for the purposes aforesaid.

"The Minister, therefore, makes the following recommendations:

"That there be constituted a committee of the Privy Council consisting of the following members, namely, Hon. Sir James Lougheed, Hon. Mr. Rowell, Hon. Mr. Crerar, Hon. Mr. Robertson, Hon. Mr. Meighen, and Hon. Mr. Calder, of which Hon. Mr. Calder shall be chairman, charged with the duty and responsibility of securing the closest co-operation of all the departments of the Government and of other agencies now

existing or that may be hereafter created for the purpose of dealing with the following:

"(a) The absorption into civil life and occupation of discharged soldiers; and,

"(b) Industrial labour conditions which may arise from industrial dislocation and re-adjustment.

"The Minister further recommends that the said committee be authorized to engage such officers, clerks, and employees as may in their view be necessary and, subject to the approval of Your Excellency in Council, to create such further organizations and agencies as may in their judgment be required to effectually discharge the duties and carry out the work hereby assigned to them.

"The Minister further recommends that all expenditures incurred by the committee be charged to the War Appropriation Vote.

"The committee concur in the foregoing recommendations, and submit the same for approval."

Gratuity paid to widow of deceased workman through Department of Labour

In January, 1917, a workman in the employment of Messrs. T. McAvity and Sons, Limited, of St. John, N.B., died as the result of injuries received from the bursting of an emery wheel, while at work. He had originally come from St. Vincent, West Indies, in order to enlist in the Canadian forces, but had been discharged as physically unfit. The acting Governor of the Island wrote to the Minister of Labour stating that the widow and seven children of the deceased were destitute, and asking the assistance of the Department in securing if possible compensation from the employers concerned. Correspondence with the former employers of the deceased workman and with the Assurance Company with which they were insured against liability for accidents to their employees, elicited the information that under the Workmen's Compensation Act of New Brunswick there was no legal liability on the part of the employers to pay compensation for this man's death, as his dependents were not residents of Canada at the time of the accident, and as it was due to his own negligence. The employers, however, expressed their willingness to make a gratuity to the widow and children, and ultimately the sum of the gratuity was placed at $500, and this sum was in November last forwarded by the Minister of Labour to the family at St. Vincent. A communication received by the Minister of Labour, in acknowledgment of the gratuity, mentioned that the money was used in the purchase of a wooden house and plot of land which will materially help the family.

During the present year a Workmen's Compensation Act has been passed in New Brunswick, under Section 8* of which provision is made, under certain circumstances, for the payment of compensation to a deceased workman's dependents when they live outside the province, if similar laws are in force in the province, state or country where they live.

Reconstruction plans of Canadian Manufacturers' Association

A general meeting of the Council of the Canadian Manufacturers' Association was held in Montreal on November 14. At this meeting a special report from the committee on labour and reconstruction was considered. The report followed a conference between representatives of the Association and the labour sub-committee of the Reconstruction committee of the Dominion Government. A number of suggestions were included in the report with a view to preparing a national scheme to avert the danger of unemployment with the cessation of the manufacturing of war supplies and the return of the soldiers. It was suggested that a survey of imports be taken with a view of determining what articles

*See LABOUR GAZETTE, August, 1918, p. 671.

could advantageously be manufactured in Canada so as to furnish continued activity to factories engaged in the manufacture of munitions when these activities ceased. It was also suggested that bureaus be established to collect data as to the need for labour in the various parts of the Dominion and to co-operate with the Militia Department in the problem of demobilization. It was urged that the Government should give the closest attention to industrial research and should make a grant of not less than $1,000,000 a year for this work. As a result of the recent conference at Ottawa it was stated that there would be in the near future a conference at Ottawa between representatives of the Canadian Manufacturers' Association and the executive of the Dominion Trades and Labour Council with a view of seeing what common ground could be arrived at in the work of reconstruction, for the presentation of a complete programme between employers and employees for consideration by the Government. After some discussion the report was adopted.

* * *

Reconstruction Conference in the United States

A conference to consider problems of reconstruction was recently held in Rochester, N.Y., under the auspices of the National Municipal League and the Rochester Chamber of Commerce. Among the speakers were officials of the United States Department of Labour, the Emergency Fleet Corporation, the Housing Bureau, and other Government departments, officers of various municipal and social organizations, and official representatives of France and Belgium. The following were among some of the interesting points brought out at the conference:

Mr. Thomas Adams, of Ottawa, stated that Canada would have to build 30,000 houses, England 67,000, and the United States 350,000 houses annually for some years to come to meet the unusual demand caused by the cessation of building operations during the war; and that in this respect the British Government was prepared to sink $18,000,000 without any financial return. Mr. Adams pointed to the recent epidemic as a warning that in future our housing plans should give more consideration to public health.

Lieutenant Boyer, of the French High Commission, stated that 600,000,000 days of work was necessary to reconstruct the devastated portion of France; and that France would need 1,000,000 plows and other agricultural implements, together with raw materials, which she looked to this continent to supply. Also that labour would be wanted, including engineers, to restore the railways. He stated further that England had agreed to give France 500,000 tons of shipping.

Professor Van den Ven, of the Belgian Embassy, emphasized that machinery and raw material would be required, but that Belgium had sufficient labour, that "America could help Belgium more in America than in Belgium."

Professor McBain, of Columbia University, expressed the opinion that aid to the unemployed during the transitional period would obstruct rather than aid the work of rehabilitation. He advocated the expansion of public employment bureaus with statutory support for labour unions in respect of Collective Bargaining. He suggested that an era of prosperity lay immediately before the United States.

Dr. Charles Beard, late of Columbia University, predicted "increased governmental functioning," resulting in an increase of public employees. He held that these employees should have the right to organize into unions and strike if necessary.

Richard S. Childs, of the United States Housing Bureau, stated that the Government had erected more than 30 garden villages for industrial housing purposes, with a cost of more than $50,000,000. He intimated that the houses, which were permanent structures, would

probably be sold to individual tenants or organizations of tenants at about 75 per cent of their original war time cost.

The members of the conference were practically unanimous in their approval of the United States Employment Service, and a strong resolution was passed that not only should the Employment Service be maintained, but that it should also "be encouraged to extend its sphere to include education of employers in modern principles of employment."

* * *

Temporary Industrial Reconstruction Committees recommended for the United Kingdom

The British Ministry of Reconstruction recently issued a Memorandum recommending the formation of Interim Industrial Reconstruction Committees in certain industries in which progress in the formation of Joint Standing Industrial Councils* along the lines indicated in the Whitley Report must of necessity be very slow. Until such time as these industries are sufficiently developed as to warrant the establishment of Industrial Councils, the Ministry of Reconstruction, in association with the Board of Trade and the Ministry of Labour, has undertaken to promote the formation of interim Industrial Reconstruction Committees, consisting equally of representatives of employers and trade unions. These committees, although set up at the suggestion of the Government, will be independent bodies and will themselves determine what functions they shall assume.

The Memorandum suggests the following questions for the consideration of such committees:

(a) Demobilization as it affects the industry; (b) problems of employment (*e.g.*, wages, hours, apprenticeship and training, working rules and conditions, unemployment); (c) the problem of raw materials (*e.g.*, supply, method of allocation in case of shortage); (d) the financial position of the industry; (e) the improvement of processes and methods.

The Ministry of Reconstruction will arrange to put Interim Committees in touch with Government departments and committees, and will supply them with all terms of reference of Government committees in which they are likely to be interested.

* * *

Report of Women's Committee on workmen's houses

The British Ministry of Reconstruction some time ago appointed a Women's Housing Sub-committee of the Advisory Housing Council, an account of which was given in the LABOUR GAZETTE for October, 1918, on page 785. This sub-committee was authorized to visit specimen houses erected by the Ministry of Munitions, or other selected houses, in order to make suggestions, and to advise on plans received from the Architects' Committee, with special reference to the convenience of the housewife. The sub-committee has presented its first interim report, which deals with urban housing. The members of the sub-committee regard it as essential that each house should contain as a minimum three rooms on the ground floor, living room, parlour, and scullery (or kitchen), as well as a larder, and three bedrooms above, with a separate bathroom. As regards the size of bedrooms, they agree with the report of the Advisory Committee on Rural Cottages appointed by the Board of Agriculture that "the desirable standard to keep in view is a minimum of 500 cubic feet for each adult and 250 cubic feet for each child under 10 years old." The living room should be as large as possible and should have a good aspect. There should be a regular and efficient hot water supply both for the bathroom and the scullery, but the sub-committee were not yet in a position to recommend any particular scheme. The scullery should be large enough to hold the necessary fittings and

*See LABOUR GAZETTE, September, 1918, pp. 742-4, and October, 1918, pp. 827-9.

utensils, and the floor should be made of a non-absorbent material that would be easy to clean. The floor and walls of the larder should also be made of a clean, non-absorbent material. Other features recommended are a place for the storage of coal to hold one ton, an outhouse for tools, perambulator, etc., and a garden.

Land settlement for soldiers and sailors in Australia

In a recent issue of *The Survey* an article appeared giving much information relative to the laws that have been enacted during the past two years by the Federal Parliament of Australia and the legislatures of several of the States for the purpose of assisting returned soldiers and sailors to secure land and other facilities for successful farming. These Acts have been framed with the double purpose of giving the soldier access to the land for which he has fought and at the same time providing a solid and stable contribution to the colonization of the Commonwealth. The group or "colony" system of settlement, which is being put into effect in Great Britain (see LABOUR GAZETTE, November, 1918, p. 903) is also being adopted, as far as possible, in Australia. Up to May, 1918, the Government of New South Wales had acquired 18 estates, amounting to 171,213 acres, and had placed about 500 returned men in grouped holdings. Suitable areas are provided for mixed farming, fruit growing, and dairying. In this undertaking the Commonwealth of Australia co-operates with the State in New South Wales in the following manner:

(1) The State sells the land to the soldier settler at 5 per cent interest and 1 per cent sinking fund per annum, which will pay for the liability in about 38 years, and (2) in the meantime the Commonwealth Government, in order that the settler may be enabled to live while developing the land, advances up to $2,500 for improvements, in the purchase of stock, implements, etc. This amount is repaid very gradually, beginning with an instalment of 3½ per cent for the first year. Loans will also be made to suitable applicants desiring to engage in share-farming. Soldiers desiring to purchase land privately will be provided with the services of an expert whose report will be necessary to satisfy the authorities that the loan can safely be made.

In Australia, as in Great Britain, the greatest importance is attached to the educational and advisory aid features of the scheme. Agricultural and pastoral experts are co-operating with the land settlement authorities to bring the best knowledge and experience to bear upon the selection of the estates, their planning and improvement, and everything else necessary to insure business success. In many places new railroad extensions and other public works have been carried out to make these settlements more accessible to the necessary markets. It is provided that parents and friends of absent soldiers may apply for blocks of land to put them into working order before the soldier returns. Transfers of such land are permissible only to other returned soldiers who have claims equal to those of the original holders.

Other states of the Commonwealth have passed similar measures. More than a year ago Victoria empowered the Government to issue stocks to the amount of $9,000,000 in three years from which to purchase land for soldiers and to make advances up to $2,000 to each soldier settler. The measure further includes provisions for the training of unskilled men and for loans not exceeding $600 to enable men to become share farmers or to enter into partnership with land owners. No instalment of purchase money, interest or rent is to be charged for the first three years. Queensland has reserved all public land for returned soldiers. For several years they will be permitted to occupy it rent free; for the next 12 years the rent will be 1½ per cent of the capital value as fixed by the opening notification; and after that

rents for a 15 year lease period will be fixed by rent courts. Loans for productive purposes, not exceeding $2,500, and re-payable within 40 years, will be made at the rate of 3½ per cent for the first year with increases of ½ per cent per year up to a maximum of 5 per cent. Of the three large areas in Queensland already being used for settlement purposes, one of them is being devoted to growing semi-tropical fruit, and some 40 men with their families have already been established on small holdings, another is being planted by the State nursery with apple, pear, peach, plum and other fruit trees, and the third area is being divided into dairying, and sugar cane farming.

* * *

Labour Jottings

The need for long working hours in railroad shops having in some degree passed, the Director General of United States Railroads has ordered that as far as practicable the hours shall be reduced to nine hours per day, effective November 25, and to eight hours per day, effeceive December 9.

Early in December, an announcement was made by the British Government that it had decided to grant all railway employees an eight-hour day. It was estimated that this step would increase the yearly wages bill by £25,000,000, or about 20 per cent of the total amount that will be paid to railway employees in wages and bonuses.

In order to assist in meeting the immediate demand for 10,000 men for the lumber camps, and also to help in the work of demobilizing war workers, the Department of Labour has issued circulars to the men employed in various munition plants advising them to apply to the nearest lumber concerns for employment. At the same time the Canadian Lumbermen's Association have advised its members to get into communication with the nearest munition plant. By agreement with the Department it is understood that the prevailing wages are to be paid.

The United States War Labour Policies Board has written the mayors of the principal cities urging that delayed public works be proceeded with as far as possible during the transition period from war to peace, and that the United States Employment Service be kept informed concerning the number and kinds of workers needed for carrying out these plans.

The *Alberta Gazette* of November 15 contains regulations issued under authority of section 138 of the Alberta Mines Act. The new orders cover such points as the use of safety lamps and explosives, ventilation of mines, and the providing of wash-houses and emergency hospitals for miners. They also include detailed instructions concerning the use of electricity in mines. The general effect of the new regulations is to bring the requirements respecting the safety and comfort of mine workers in Alberta well in line with modern practice elsewhere.

Following the recent conference between officers of the Civil Service Federation of Canada and the Dominion Cabinet, an Order-in-Council was passed on November 7, providing (1) that the ministers of the several departments present to Council recommendations for the payment of a war bonus to employees in the outside service on principles previously adopted, and (2) that a bonus not to exceed $250 be paid to those civil servants in the inside service who receive salaries less than $1,800 a year, provided that the aggregate of bonus and salary shall not exceed $1,880 a year. The principle upon which the bonus was to be paid was left to a subcommittee of Council and it was decided that employees without dependents be given a bonus of $150; those with dependents receiving $250.

INDUSTRIAL CONDITIONS DURING NOVEMBER, 1918

I.—GENERAL REVIEW

The Labour Market

During November the labour market was disturbed very considerably by the signing of the armistice and the consequent cessation of munition orders. The influenza epidemic also caused some dislocation during the earlier part of the month, particularly in the case of the lumber camps and coal mines. Several hundreds of munition workers were discharged, but in most cases these were absorbed in other industries, leaving only a small number unemployed at the end of the month. Of the 25,000 men and women munition workers in Toronto, about 6,000 were discharged during the month, most of whom received other employment. The agricultural implement makers in Toronto took on 500 additional workers. Employment was good in the steel plants and in the stove and furnace factories, and machinists and toolmakers were being sought. Employment was well maintained in the steel shipyards, except at Fort William, where some hundreds of men were discharged. There was some reduction in employment in the wooden shipyards, except in the case of those on the west coast. In the food group, the flour and feed mills, abattoirs and packing houses and sugar refineries generally were very active. The aerated water plants experienced the usual seasonal dullness. Creamery workers were well employed, but confectionery workers were dull, owing to the continued restrictions on the use of sugar. Tobacco workers generally were well employed. In the textile group, employment was good throughout and there was some demand for help. Normal conditions prevailed in the clothing group. Employment was very good in the paper box, bag and novelty factories owing to the Christmas trade. In the woodworking group there was some demand for help in the furniture factories. The tanneries in most cases were in need of additional hands, as were also some of the boot and shoe factories. The rubber factories were active, and the leather goods workers were well employed. There was some reduction in the staffs of the explosives factories. The clay, glass and stone group was dull, except that there was some activity in the cement industry. In the transportation group some additional employment in the yards was created by the adoption of the eight-hour day on the Canadian Government Railways. The repair shops were all well employed and some additional hands were taken on. Train crews were busily engaged with shipments of grain and lumber and in transporting soldiers. 'Longshore work continued to increase at the winter ports and was more active elsewhere than is usual for the season. There was a fair amount of navigation on the lakes during the early part of the month. In the mining industry the demand for labour was not so pronounced as in the preceding months. In the Cobalt silver mines the supply of labour nearly equalled the demand, but in the gold area the shortage continued. The coal mines at Fredericton and Fernie were seriously affected by the influenza epidemic and in the latter district by fire also. The shortage of labour in the lumber camps was further accentuated by the epidemic, in some cases entire camps being stricken; the demand for labour, however, was not as great as in the preceding months. The sawmills were practically closed down for the

season. Employment in the building trades remained about the same as in the month of October, though an improvement in the near future was predicted. The value of building permits issued in 35 cities decreased from $2,850,428 in October to $2,387,045 in November, or 16.26 per cent. As compared with November, 1917, there was an increase of 11 per cent.

Strikes

The loss of time on account of industrial disputes during November was less than during October, but greater than in November, 1917. There were in existence at some time or other during the month 23 strikes, affecting 4,330 workpeople and involving a time loss of 36,843 working days, compared with 25 strikes, 4,801 workpeople, and 65,969 working days in October; and 18 strikes, 2,988 workpeople, and 29,445 working days in November, 1917. On November 1, there were on record 12 strikes, affecting 915 workpeople. Eleven strikes were reported as having commenced during November, as compared with eight in October; six of the strikes commencing prior to November, and six of those commencing during November were reported terminated, leaving 11 unterminated strikes, affecting approximately 1,384 workpeople, on record at the end of November.

Prices

In prices the general level was very little changed, increases and decreases tending to counteract each other, while seasonal changes were numerous. Some markets were lowered by the cessation of hostilities, but others advanced. In grain, wheat, oats and barley were little changed, but corn, rye and peas were lower, the new crops being also a factor. Fodder, however, was higher. Livestock and meats continued to decline owing to the scarcity and high price of feed. Dairy produce, fish, fruit and vegetables fluctuated owing to the season. Textiles showed some increases, and while beefhides were up, calfskins were down. There were some changes in metals, particularly decreases in tin and quicksilver. Anthracite coal was higher. New Brunswick lumber was up, but British Columbia lumber was lower. Naval stores raised the average for the paint, oil and glass group. In retail food prices, meats continued slightly lower and potatoes declined considerably, but dairy products advanced appreciably, and there were slight advances in several other lines. The index number of wholesale prices stood at 290.9 for November, as compared with 289.6 for October, 247.3 for November, 1917, and 135.8 for November, 1913. In retail prices the food budget averaged $13.49 at the middle of November, as compared with $13.54 for October, $12.10 for November, 1917, and $7.96 for November, 1914.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances

The output for the Dominion Steel Company at Sydney was practically the same during November as for the previous month, being in tons as follows: pig iron, 26,000; rails, 12,000; rods, 3,200; billets and bars, 5,000; wire products, 600, as compared with 24,000 tons of pig iron, 13,500 tons of rails, and 4,300 tons of bars and wire products. Four blast furnaces and 518 coke ovens were in operation. The output of the Sydney Mines plant was 9,600 tons of steel and 7,500 tons of pig iron, as compared with 14,200 tons of steel and 9,500 tons of iron in the preceding month. One blast furnace and 18 coke ovens were in operation. Halifax reported that employment was good in

the rolling mills and shipyards, ship carpenters, bench carpenters and ironworkers being particularly in demand. At the stove and furnace foundries, considerable overtime was worked. A scarcity of metal workers was reported. Westville reported that steelworking plants were fairly well employed in completing Government orders. At Amherst the Canada Car and Foundry Company reported a shortage in car builders and blacksmiths. St. John reported employment good in the rolling mills and some scarcity of help in the shipyards. Tin and sheet metal workers were well employed. Employment was very steady in the Government railway shops at Moncton. The foundries and machine shops at Fredericton were very busy. Quebec reported that employment was very good in the shipbuilding and repairing yards and in the stove and furnace foundries. Sherbrooke reported that of the 2,000 men discharged by the munition companies a considerable number were still out of employment at the end of the month. At Three Rivers one of the steel foundries closed down, but the other continued to be well employed. Employment was good at the shipyards. St. Johns and Iberville reported considerable unemployment in the iron and electrical trades. Sorel reported that some men had been discharged from the munition factories and the Government shipyards, but that most of them had obtained other employment, many being employed by the city of Sorel on repair work. In other branches of this group employment was good. Toronto reported that of the 25,000 men and women employed in munition plants about 6,000 had been laid off, but that most of these had been absorbed in other lines of industry. Structural steel manufacturers reported an improved supply of raw material. Engine and boiler plants were busy. The shipbuilding industry was very active and took on additional hands. Automobile, bicycle and motor engine factories were in steady operation. The Massey-Harris Company took on 500 additional workers and needed more moulders. Hamilton reported the metal trades very active, with a demand for labour, and employment good in the boatbuilding and repairing yard. Niagara Falls reported a continued demand for labour. St. Catharines reported that electrical workers were busy and that boilermakers were in demand. Brockville reported employment rather quiet in this group. At Kingston the locomotive company was very well employed and the shipyards were busy on new boats and repair work. Some overtime was worked in the rolling mills at Belleville. At Peterborough the iron foundries and machine shops were well employed. The electrical workers were busy and manufacturers of hydraulic and sawmill machinery were very active. Galt reported activity throughout the metal group and Brantford reported a shortage of skilled and unskilled labour. At Kitchener there was a shortage of tinsmiths and machinists. Guelph reported that the munitions companies had discharged about 600 men, but that most of these had been absorbed in other industries. A fire at the agricultural implement plant of the T. E. Bissell Company, of Elora, threw 165 men out of employment. Stratford reported a demand for blacksmiths and machinists. At London there was a demand for help in the agricultural implement and sheet metal companies. The munition plants at Chatham laid off 300 hands, many of whom secured other work. Employment was quiet in the automobile works. The Canadian Bridge Company at Windsor discharged a number of munition workers. Employment was very good at the Ford and Maxwell Company in the manufacture of tractors and autos. Employment was good in the stove and furnace foundry. The foundries and machine shops at Owen Sound were engaged almost entirely in the production of marine machinery and had plenty of work on hand for some time to come. The stove foundry at Orillia reported a continued demand for moulders. The Tudhope Carriage Company engaged about 25 men who had been

thrown out of employment due to the burning of the Canada Carriage Company's factory at Brockville. The Algoma Steel Company at Sault Ste. Marie, having secured large steel rail contracts, expected to have plenty of employment in the near future. There was a slight demand for moulders and machinists. Fort William reported that the shipyards discharged several hundred men during the month, most of whom received employment elsewhere. The shipyards at Port Arthur continued to employ all their hands. Winnipeg reported that employment in the metal trades was well maintained. Employment was good in the agricultural implement factories at Brandon, but quiet in Regina. Medicine Hat reported the rolling mills working day and night. Calgary reported the various iron works fully employed, but the farm implement firms rather quiet. Vancouver reported that steel shipyards were very active and that there was a slight shortage of boilermakers. The wooden shipyards laid off some men near the end of the month. Employment was good on automobile parts and repair work. New Westminster reported employment conditions normal in the shipyards, but that all machine shops continued to operate to full capacity with a steady demand for men. Victoria reported that the assembling plant of the Imperial Munition Board continued to employ several hundred skilled mechanics. It was anticipated that in the near future there would be employment in the steel shipyards for a large additional number of men. About 1,000 men were employed in the wooden ship yards, and it was expected that when sufficient timber became available this number would be materially increased.

Foods, liquors and tobacco

Sydney reported the abattoirs and meat packing houses active. Employment was quiet at the Arcadia Sugar Refinery Company at Dartmouth awaiting the arrival of the new crop. Bakers were busy, but confectionery workers continued to be quiet. Flour and feed mills at Westville were well employed. Charlottetown reported butchers, bakers and tobacco workers busy. St. John reported the flour and feed mills and sugar refinery steadily employed. The creameries and dairies were very busy owing to the epidemic. Aerated water and soft drink establishments were exceedingly busy. Flour mills at Moncton were well employed. All cheese factories closed operations for the season, but a few butter plants continued running to a limited extent. At Fredericton the flour mills and the meat packing houses had a busy month. At Montreal the flour mills gave considerable employment to male and female hands, but the sugar refineries were dull owing to the scarcity of raw sugar. Quebec reported that ordinary conditions prevailed in the food group, except that confectionery and brewery workers were dull. Sherbrooke reported that the abattoirs and meat packing houses continued to be busy and cigarmakers were fairly well employed. At St. Hyacinthe the flour and feed mills worked full time. Employment was dull in the soft drink plants, but cigar and tobacco workers were active. Toronto reported that the flour and feed plants, abattoirs and meat packing houses were busy, and that bakers and confectioners were better employed owing to the modifications in food restrictions. Fruit and vegetable canners and cigarmakers had plenty of employment, but soft drink workers were quiet. St. Catharines reported that the flour mills were well employed. The flour and feed mills at Belleville were exceptionally busy handling grain for feed. Peterborough reported the creamery, condensed milk and cheese factories very busy. At Galt the bakers and confectionery workers were very well employed. At Brantford employment was good in the food group generally, and cigar workers were well employed. Kitchener reported the sugar company running day and night. The flour mills were active and the wholesale sausage

and meat packing houses very busy, with a demand for butchers and meat cutters. Help was also wanted in biscuit and candy factories. Tobacco and brewery workers were very well employed. The flour and feed mills at Guelph were active, but the breweries were quiet. Employment was very good in the abattoirs and meat packing house at Stratford. London reported that some overtime was worked in the biscuit factories. Chatham reported that the sugar refinery was running night and day, that the flour mills were quiet, and that the abattoirs and packing company were practically idle. Windsor reported that the Canadian Cereal Company was again running with a full staff. All bakeries reported an improvement in business. The majority of the canning factories closed down for the season. Cigar workers were in demand. Winnipeg reported a steady demand for experienced help in the confectionery establishments. Flour and feed mills at Brandon were busy, but those at Regina were closed down owing to financial difficulties. The abattoir at Regina ran full time. Employment was quiet in the aerated water plants. Prince Albert reported the flour mills busy and the abattoirs working to capacity. Medicine Hat reported the flour mills running day and night, including Sundays. The flour mills, abattoirs and meat packing houses at Calgary were all fully employed, but the cigar factories, breweries and soft drink establishments were dull. The dairies at Fernie were very active and reported a considerable increase in the demand for their products. Employment was very dull in the breweries. The milling companies and sugar refinery and packing plants at Vancouver were active, but fruit and vegetable canning operations were practically concluded for the year. New Westminster reported the meat packing plant working full time and the canning factory and evaporating plant working to capacity. Cigar factories were rather dull, but employment was normal in the brewery and distillery.

Textiles, cordage and carpets

Truro reported that the woollen mills were running to capacity. St. John reported that both cotton mills continued to be active. At Moncton the Humphrey woollen mill and the Atlantic underwear factory continued to be well employed. Montreal reported that the cotton mills were increasing their staffs and that employment was good in the woollen mills. Quebec reported that the cotton mills were very busy, and that the flag and sailmaking companies were well employed. The cotton and woollen mills at Sherbrooke were active, while at St. Hyacinthe the knitting mills and blanket and felt factories worked some overtime. The Wabasso Cotton Company at Three Rivers had work for a large number of additional hands. Toronto reported employment very good in the woollen and knitting factories. Hamilton reported activity in this group. Brockville reported that tent, awning and sail makers were dull. The Dominion Textile Company at Kingston worked some overtime, and the woollen hosiery mills were well employed. Peterborough reported textile workers very active. Galt reported that operators were in demand in the woollen and silk mills. Brantford reported a shortage of both male and female help in the woollen mills. The Brantford Cordage Company was well employed. The Dominion Twine Factory at Kitchener was in need of hands. The carpet and rug manufacturers at Guelph were active. At Stratford the woollen hosiery and knitted goods factories were active. The hosiery companies at London were very active. Winnipeg reported that owing to the increased supply of raw materials the knitting company was able to increase its staff. The Great West Garment Company at Edmonton increased their staff. Vancouver reported that the knitting factories and the tent and sail makers were well employed.

Clothing and laundering

Halifax reported that the demand for winter suits and overcoats resulted in steady employment in the ready-to-wear clothing factories. The usual activity in the steam laundries, dyeing and cleaning establishments was also reported. The cap factory at Truro ran with a reduced staff. St. John reported activity in the ready-made clothing group, while the steam laundries were busy. Employment conditions were very good in the tailoring business in Moncton. Fredericton reported that clothing establishments were advertising for help, while laundries and dye works were busy. Montreal reported normal conditions in this group. Quebec reported the ready-made clothing firms were quiet, but that glove and fur goods manufacturers were very busy. Sherbrooke reported ready-made clothing and steam laundries very busy. St. Johns reported that female labour was well employed in the Cluett-Peabody and Belding Paul Corticelli firms. Toronto reported that the ready-made clothing trades were rather slack, but shirt, overall, cap and glove factories were well employed. Whitewear firms were active and laundries fairly busy. There was a greater supply of labour available. Hamilton reported a demand for labour in this group. The Deacon Shirt factory at Belleville had a very active month. Galt reported a shortage of help in the hat factory, with activity in the dyeing and cleaning establishments. Kitchener reported that the shirt and collar factory was advertising for both skilled and unskilled hands. The glove factories were working overtime. More labour was required in the whitewear company. The whitewear factory at Guelph was short of workers. The button factories at Windsor were very busy. Orillia reported the ready-made clothing factories rather quiet. Winnipeg reported that the whitewear manufacturers had increased their staffs, that the glove manufacturers were short of experienced help, and that the furriers were working full time. Cleaning establishments were rather quiet. Regina reported a demand for help in the steam laundries and dyeing and cleaning works. Vancouver reported fair activity in the ready-made clothing groups, but that laundries were not running to full capacity owing to the strike. New Westminster reported that the steam laundry was exceptionally busy owing to the strike at Vancouver. The shirt and overall factories at Victoria were working with full staffs.

Pulp, paper and fibre

St. John reported that the pulp mill was running steadily. Montreal reported some activity in the paper mills. St. Catharines reported that the pulp and paper mills and beaver board companies were busy. Sault Ste. Marie reported the pulp and paper mills and chemical plants were running to capacity, with an increased amount of labour available. Vancouver reported that the pulp and paper mills of the province were all busy, but that a large number of sick men at Powell River mills had hindered production. Victoria reported that the pulp and paper industry was very well employed.

Printing, publishing and paper goods

Halifax reported a continued shortage of compositors and pressmen, with resulting overtime. St. John reported activity in the newspaper and job printing offices and fair activity in the binderies. Much overtime was worked in the paper box factories. Moncton reported that all newspaper and job printing offices were very active. At Fredericton the bookbinders were also active. Quebec reported dulness in the printing trades, but activity in the paper box and bag firms. Sherbrooke and St. Hyacinthe reported activity. Toronto reported the printers and bookbinders had a busy month, and that the paper box and bag companies were advertising for help. Niagara Falls reported printing companies and other paper-using concerns busy. Peterbor-

ough and Brantford reported the newspaper and job printing offices all busy. At Kitchener there was some demand for printers, while the paper box factories were very busy. The lithograph firms at London were exceptionally busy on Christmas novelties, while the paper box companies were in need of female help. Chatham reported a shortage of skilled operators. At Windsor the paper box manufacturers were all busy, but the binderies were very dull. Winnipeg reported that employment in the printing business was well maintained and that there was some demand for help in the bookbinderies. The paper box manufacturers were busy and in need of experienced help. Regina reported that the publishing companies and binderies were reducing their staffs. Medicine Hat reported the job printing houses and binderies quiet. At Calgary job printing houses were fully employed. Vancouver reported the newspaper printers active and the paper box manufacturers more active than during the previous month. New Westminster reported normal conditions in the job printing offices.

Woodworking and furniture

Sydney reported the sash, door and planing mills active. The woodworking plants and piano factories at Amherst reported a shortage of bench hands. Charlottetown reported a busy month for woodworkers. St. John reported the sash, door and planing mills running steadily, while the wooden box factory and brush and broom factories were well employed. The planing mills at Moncton and Fredericton were actively employed. Montreal reported increasing employment in the manufacture of wooden toys. Quebec reported the sash, door and planing mills and box factories active, while the broom factories were busy. Sherbrooke reported the sash and door and chair factories quiet. The sash, door and planing mills at Three Rivers had a very busy month. The toy factory was also active. Toronto reported that the planing mills were active, with a shortage of labour in the furniture factories. The planing mills at Niagara Falls were busy. St. Catharines reported the woodworking group active. Kingston reported activity in the sash, door and planing mills and the broom factories, and fair activity in the piano factory. Belleville reported that the furniture and chair manufacturers were handicapped by the shortage of skilled labour. Brantford and Kitchener reported sash and door manufacturers had a busy month. The piano and sewing machine factories at Guelph were very active. Woodstock reported a demand for a few machine hands and finishers in the furniture factories. London reported that the barrel company was exceptionally busy, with many orders ahead. The box factories at Chatham were quiet at the end of the month owing to the closing of munition works. Windsor reported dulness in this group. Orillia reported that the furniture factory took on additional hands, but that the planing mills were dull. At Winnipeg there was a pronounced demand for casket makers. Brandon and Regina reported the sash, door and planing mills running full time with full staffs. At Medicine Hat the planing mills were rather quiet, and at Fernie they were very dull. Vancouver reported that the sash, door and planing mills and casket manufacturers had a busy month, and that toy manufacturers were well employed. The box factories at New Westminster were working to full capacity, but at Victoria they were rather slack.

Clay, glass and stone

St. John reported employment fair among cut stone and granite workers. Quebec and Sherbrooke reported employment dull in cut stone and granite work, also in tile and sewer pipe making. The brick yards at Toronto were in most cases closed, owing to labour shortage and the difficulty of obtaining fuel; those in operation, however, had plenty of orders on hand. Employment was good in the

glass plants. There was some shortage of stonecutters at Brockville. Belleville reported that the Canada Cement mill in the vicinity was exceptionally busy, with a prospect of employing more labour in the near future. Brantford reported that the brick makers had a good month. Kitchener, London and Windsor reported dulness in this group. Regina also reported dulness. Medicine Hat reported that the stoneware industry was active.

Leather, boots, shoes and rubber

St. John reported the tannery busy, with a shortage of help. Fredericton reported that the shoe factory and larrigan works had a fairly active month, that the tanneries were busy and the harness makers well employed. The boot and shoe factories at Montreal were affected by the influenza epidemic. Quebec reported that the tanneries were busy and that the boot and shoe factories had orders for months ahead, with some shortage of labour. Trunk, bag and harness makers had an active month. St. Hyacinthe reported a shortage of labour. Toronto reported that the boot and shoe industry gave steady employment and that the rubber factories were working to capacity, and taking on extra help. The tanneries at Kingston were working overtime. The leather workers at Peterborough were well employed. The tanneries at Kitchener were in need of additional hands. The Dominion Tire Company had jobs for all the labour available. The rubber companies were very well employed. The rubber tire and rubber goods factories at Guelph were active, with large orders ahead. Woodstock reported the tannery and harness repairers very active. London reported that the tannery was rushed with orders, but affected by the shortage of hides. The shoe companies were exceptionally busy and the harness and leather goods makers had many orders ahead. Windsor reported conditions only fair in this group. Winnipeg reported that employment in this group was well maintained. The trunk, bag, harness and horse goods workers at Calgary were fully employed. At Vancouver the boot and shoe workers were fully occupied. The tannery at New Westminster operated with a normal staff.

Paints, oils, chemicals, explosives

Montreal reported that the paint manufacturers were fairly busy on orders for the coming season. Three Rivers reported that the paint mills were well employed, but that the ammunition factories were active only during the first part of the month. The manufacturers of acids, drugs and medicines in Toronto were busy. Niagara Falls reported that the electro-chemical plants needed men and that those producing abrasives were especially busy. The Galt soap factory had an active month. The Scarfe Varnish Company at Brantford was well employed. The oil and grease companies at Kitchener reported business good. The paint and varnish companies at London were rather quiet. The Canadian Salt Company was well employed as usual. The Seeley and the Park-Davis Company were busy on Christmas orders. The oil works at Regina ran full time with a complete staff. Medicine Hat reported active conditions at the linseed oil mills. Vancouver reported the oil refinery and the soap works busy. Victoria reported that the explosives factory on James Island commenced reducing its force, which during the past three years numbered several hundred persons.

Railways, shipping and 'longshore work

The earnings of the Canadian Pacific Railway during October were $15,682,780, as compared with $14,733,774 for the same month in 1917. Halifax reported that all transportation employees were actively engaged, and that 'longshore work continued to increase.

Truro reported that the yardmen of the Canadian Government Railway were working eight-hour shifts, which necessitated an increased number of men. Trainmen were exceptionally busy in connection with the transportation of returned men from the front. Charlottetown reported transportation employees very busy running extra trains for the shipment of potatoes and oats from the Island. St. John reported that the railways were busy transporting freight for the winter port business. Fredericton reported that railway employees were steadily engaged, while liveries and garages had a good month. Montreal reported greater activity in 'longshore work than usual for the season of the year. Quebec reported the railway repair shops busy and the steam railways exceptionally busy, but the street railways quiet. 'Longshore men were active during the greater part of the month. Three Rivers reported that the water transportation companies were very active until the end of the month. Toronto reported that the railways had a busy month and were increasing their working forces. Additional men were taken on at the repair shops. The street railway also engaged additional help. Employment in navigation fell off considerably. Hamilton reported a demand for 'longshore men. Brockville reported that the Grand Trunk Railway was finding it difficult to get sufficient firemen. 'Longshore work was practically closed for the season. Railway repair shops at Kingston were actively employed. 'Longshore work fell off considerably. Kitchener reported the freight department of the steam railway was very busy, due to the large amount of sugar beets coming in. All the street railway lines reported a good month. Liveries and garages reported a slight falling off. London reported the Grand Trunk Railway car repair shops exceptionally busy. The London and Lake Erie railway and transportation company ceased operations and sold their equipment at scrap prices. St. Thomas reported heavy railway traffic during the month. All railway employees dismissed from active service during the month were reinstated in their former positions. The liveries and garages at Windsor reported business good. The railway at Owen Sound reported large shipments of heavy marine machinery. Winnipeg reported that the railway shops were well employed with a steady demand for experienced help. Regina reported that the steam railways were very busy during the early part of the month, but approached normal conditions later. The railway repair shops were well employed. Moosejaw reported that a considerable amount of wheat had been moved to the lakes and that there had also been heavy shipments of flour. Owing to the influenza epidemic the street railway discontinued 70 cars. The Canadian Pacific Railway at Medicine Hat reported a considerable increase in business. The railway shops at Calgary were fully employed. Fernie reported that transportation was seriously affected by the falling off in the lumbering and mining industries, due partly to the epidemic. Vancouver reported the railway shops and street electric railways, transfers and garages well employed, with fair employment also in 'longshore work. The railway repair shops at New Westminster were all very busy, and street railway men were very actively engaged

since the opening up of theatres and meeting places.

Mining and quarrying

Quebec reported that stone quarrying was practically completed for the season. Sherbrooke reported a demand for labour in the copper, asbestos and chrome iron mines. Cobalt reported that the silver mines operated at close to full capacity with a shortage of labour of not more than 5 per cent. It was anticipated that this deficiency would be made up in the near future. During the month of November a total of 51 cars containing approximately 3,782,437 pounds of ore were shipped, as compared with 59 cars containing approximately 4,416,487 pounds of ore in October. Bullion shipments amounted to 802,261 fine ounces of silver, as compared with 1,042,944 ounces in October. With silver remaining above $1.00 an ounce the bonus of $1.25 daily continued to be paid to the mines workers. In the Porcupine gold camp a slight improvement in the number of workmen available was reported, but not sufficient to cause any of the closed down mines to resume work. The Hollinger Consolidated continued to operate. The gold output from Porcupine and Kirkland Lake showed a slight increase over the corresponding period of last year. Sault Ste. Marie reported that operations at the Helen and Magpie Mines had been stopped on account of the epidemic. Towards the end of the month, however, the Magpie Mine resumed operations with a diminished force, but it was anticipated that the Helen Mine would remain closed until the spring.

Sydney reported the output of the Dominion Coal Company as 245,000 tons of coal and 45,000 tons of coke with 518 ovens in operation as compared with 275,000 tons of coal and 45,000 tons of coke with 544 ovens in October. The output of the Sydney Mines was 34,600 tons of coal and 8,000 tons of coke with 180 ovens in operation as compared with 44,000 tons of coal and 9,900 tons of coke with 175 ovens in operation. Westville reported that the coal mines of that district worked full time and that 43,000 tons of coal were raised during the month. Fredericton reported that employment at the Minto Coal Mines was considerably affected by influenza. Calgary reported that the coal mines of the district were working to full capacity with a surplus of labour. Fernie reported that the influenza epidemic so seriously affected operations that the mines of the district were obliged to intermittently suspend and in many cases mines closed altogether. Following the subsiding of the epidemic a fire was discovered in No. 1 South Mine, Coal Creek which resulted in the total suspension of production at that point. The work of extinguishing this fire was in progress at the end of the month and it was hoped that the mine would shortly be restored to a productive basis. The manufacture of coke was not seriously affected and regular shipments were made during the month.

Building and construction

Halifax reported that all the labour available was being used on both outside and inside building work and that much overtime was being worked. Truro reported that carpenters were fairly well employed, but that painters were very dull. Building labourers at Charlottetown had a busy month, but painters were quiet. Moncton reported a good demand for carpenters, masons and builders' helpers. Quebec reported very little employment offering in the building trades. Three Rivers reported fair activity. Toronto reported that the building trades showed increased activity with prospects of great expansion in the immediate future. Building trades at Hamilton were all well employed, there being a special demand for carpenters. Niagara Falls reported activity in the construction of dwellings with much employment on the Hydro works. Peter-

borough reported a decline in employment in the building trades. There was fair activity at Galt and Brantford. Kitchener reported that bricklayers were well employed, and that there was a demand for skilled carpenters. Windsor reported a fair amount of employment on small dwellings. At Winnipeg there was sufficient work to take care of the available labour. Brandon reported a good demand for bricklayers and carpenters, and for outside workers and unskilled labour generally, in connection with extensions to industrial plants. Regina reported that plasterers and painters were well employed. At Prince Albert practically all branches of the building trades were busy. Calgary reported that there was practically no demand for building mechanics. Edmonton reported a fair demand for carpenters in several of the small towns in the farming district. Vancouver and New Westminster reported that practically no work was being done.

The value of building permits issued in 35 cities decreased from $2,850,428 in October to $2,387.045 in November, or 16.26 per cent. As compared with November, 1917, there was an increase of 11 per cent.

Lumbering

The saw mills at Westville reported a very dull month, and similar conditions prevailed at Charlottetown. The sawmills at St. John and Fredericton were still operating, but expected to close shortly. Quebec reported a serious shortage of men for the lumber camps. Sherbrooke reported that the lumber camps were all busy, but that some of the sawmills had closed down for the winter. The sawmills at Sorel employed between 250 and 300 men. Peterborough reported that the lumber camps were advertising for men, but that the sawmills had shut down. Owen Sound reported activity in the lumber camps and saw mills, but that the tie mill was idle. Lumber operations at Sault Ste. Marie were being carried on in a limited manner as compared with previous years. Port Arthur reported that bush work was now well under way, with a shortage of labour. Prince Albert reported that the lumber companies had somewhat curtailed their proposed work for the winter owing to the restrictions on the shipping of lumber, but that men were still needed at various points. Calgary reported a continued demand for men for the lumber camps. Fernie reported that the lumber industry had been very seriously affected by the influenza epidemic and to a slight extent by the lumber market taking a noticeable decline consequent upon the signing of the armistice. In some cases entire camps were striken by influenza, there being as many as 50 men ill at the same time. Planing mills were also affected, but not to the same extent. Vancouver and New Westminster reported a falling off in the amount of employment in the saw and shingle mills. Victoria reported that the lumbering and logging industries continued fairly brisk notwithstanding that all contracts for the production of fir for aeroplane purposes had been cancelled. The shingle mill industry was quiet, due mainly to the fact that it was impossible to obtain cars to ship to Eastern markets.

Fishing

Port Arthur reported that from the middle of the month, a few days before herring fishing commenced, a fleet of 15 tugs had been very busy at Thunder Bay. Wages ranging from $5.00 to $7.00 per day were being paid to fishermen and a large number of men were engaged in this work. Prince Albert reported that preparations were being made to give lake fishing a decided impetus this winter.

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT DURING NOVEMBER, 1918

DURING the month of November the Department received reports from three Boards of Conciliation and Investigation appointed to inquire into disputes affecting: (1) the Algoma Steel Corporation and Algoma Construction Engineering Company, of Sault Ste. Marie, Ont., and their enginemen, firemen, conductors, brakemen, electrical and steel workers; (2) various elevator operators at Port Arthur and Fort William and certain of their employees; and (3) the Polsons Shipbuilding Company, Toronto Shipbuilding Company, and Dominion Shipbuilding Company, of Toronto, and their ship carpenters, caulkers, joiners and woodworking machinists.

Sixteen applications were received for the establishment of Boards; two other Boards, established during the previous month, were completed by the appointment of chairmen, and the dispute between the Canadian Northern Railway Company and its clerks, station employees, etc., was referred to the Labour Appeal Board.

Applications received

An application was received from the employees of the Toronto Railway Company, being members of the Toronto Railway Employees' Union, for a Board to deal with a dispute concerning wages. A Board was established as follows: His Honour Judge J. A. Barron, Stratford, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. the Honourable F. H. Phippen, K.C., and H. A. Harper, Toronto, nominees of the company and employees respectively.

An application was received from the employees of the Niagara, St. Catharines and Toronto Railway Company, being members of St. Catharines Local Union No. 846, Amalgamated Association of Street and Electric Railway Employees of America, for a Board to deal with a dispute concerning wages and union recognition. A Board was established as follows: His Honour Judge L. B. C. Livingstone, Welland, appointed on the joint recommendation of the other two Board members, Messrs. Albert Eastman, Kingsville, Ont., and Jas. F. Marsh, Niagara Falls, Ont., nominees of the company and employees respectively.

An application was received from the employees of various Toronto firms, being pattern makers engaged in war work, for a Board to deal with a dispute concerning increased wages. A Board was established as follows: His Honour Judge Emerson B. Coatsworth, Toronto, chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. James G. Merrick and Fred. Bancroft, nominees of the companies and employees respectively. The employers were members of the Employers' Association of Toronto, and Mr. Merrick, the secretary of that body, was authorized to speak for the employers concerned.

An application was received from about 20 former employees of the Polson Shipyards Company, being marine painters, for a Board to deal with a dispute concerning the use of a spraying machine which had been installed by the company. It was not clear that the dispute fell within the scope of the Industrial Disputes Investigation Act, but it was proposed to have the dispute referred by mutual consent to a Board dealing with a dispute in a kindred trade and in which the Polson Company

was concerned. Mutual consent was not, however, secured. Some of the men had refused to work unless the machine to which they objected on the ground of health was removed, and the firm had dismissed the remainder.

An application was received from the employees of the Steel Corporation of Canada, Gananoque, Ont., members of the Amalgamated Association of Iron, Steel and Tin Workers of North America, for a Board to deal with a dispute concerning wages. This industry did not fall within the scope of the Industrial Disputes Investigation Act, and a Board was established by the mutual consent of the disputants, as follows: Dr. E. L. Atkinson, Gananoque, and Mr. Fred. Bancroft, Toronto, nominees of the company and employees respectively. The chairman had not been named at the close of the month.

An application was received from the employees of the Winnipeg Joint Terminals, being station baggagemen, clerks, janitors, members of Canadian Brotherhood of Railway Employees, for a Board to deal with a dispute concerning the reinstatement of a dismissed employee. Advice was later received in the Department that the matter in dispute had been amicably adjusted between the disputants, and Board procedure, therefore, was rendered unnecessary.

An application was received from the employees of the Furniture Manufacturers' Association of Stratford, Ont., members of the United Brotherhood of Carpenters and Joiners, Local Union No. 1990, and Painters and Decorators, Local Union No. 772, for a Board to deal with a dispute concerning wages and hours. This industry did not fall within the scope of the Industrial Disputes Investigation Act, and a Board could, therefore, be established only by the mutual consent of the disputants. A departmental officer visited Stratford and the mutual consent of the parties to procedure under the Act was secured, a Board being established shortly after the close of the month.

An application was received from the employees of various shipping companies of St. John, N.B., being coal handlers, members of Local No. 810, International 'Longshoremen's Association, for a Board to deal with a dispute concerning wages. A Board was established as follows: Messrs. F. E. Sayer and Frank Freestone, St. John, N.B., nominees of the company and employees respectively. The employees ceased work, however, at this point, and Board procedure was suspended. The strike began shortly before the close of the month.

An application was received from the employees of the Montreal Transportation Company, Kingston, Ont., being ship carpenters and caulkers, for a Board to deal with a dispute concerning wages. A Board had not been established at the close of the month, pending direct negotiations between the parties concerned looking to the adjustment of the dispute.

An application was received from the employees of the Eastern Car Company, Limited, (Erection Department), Trenton, N.S., being rivetters engaged on a Government order, for a Board to deal with a dispute concerning wages. Prior to the application the employees had gone on strike, but were induced to return to work and apply for a Board of Conciliation. A Board was established as follows: His Honour Judge Coatsworth, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, the Rev. Dr. John Forrest and Mr. C. C. Dane, Halifax, nominees of the company and employees respectively. In the meantime direct negotiations between the disputants had resulted in an amicable settlement of matters in dispute, and procedure before a Board was unnecessary.

An application was received from the employees of the Grand River and Lake Erie and Northern Railways, Preston, Ont., being members of Division No. 833, Amalgamated Association of Street and Electric Railway Employees of

America, for a Board to deal with a dispute concerning wages and alleged discrimination against union members. The application was under consideration at the close of the month.

An application was received from the employees of the corporation of the city of Montreal, being firemen, members of the City Fire Fighters' Union, No. 125, International Association of Fire Fighters, for a Board to deal with a dispute concerning wages and working conditions. This being a municipal corporation a Board could be established only by the joint consent of the disputants. The Administrative Commission of the city of Montreal withheld consent on the ground that a budget covering increased wages was in the course of preparation, intimating, however, that consent to a Board might be given later when the budget was finished, and if the dispute then continued.

An application was received from the employees of the corporation of the city of Montreal, being teamsters, chauffeurs, stablemen and helpers, sanitary drivers and helpers, members of Local No. 409, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Sanitary Drivers and Helpers, for a Board to deal with a dispute concerning wages and working conditions. In this case the situation was identical with that in the last preceding case, and the same result followed as to procedure.

An application was received from the employees of the corporation of the city of Montreal, being members of the Federal Union of Police, No. 62, for a Board to deal with a dispute concerning union recognition. In this case the situation was identical with that in each of the two last preceding cases, and the same result followed as to procedure.

An application was received from the employees of the city of Winnipeg, being policemen and members of City Policemen's Federal Union, No. 40, for a Board to deal with a dispute concerning wages and union recognition. This being a municipal corporation, a Board, as in the preceding Montreal cases, could be established only by joint consent of the disputants. The Board of Police Commissioners refused its consent.

An application was received from the employees of the corporation of the city of Quebec, being firemen, members of the International Union of Fire Department, for a Board to deal with a dispute concerning wages. This case was similar to those of Montreal and Winnipeg. The consent of the corporation had not been granted at the close of the month.

Other Proceedings under Act

During November His Honour Judge Dromgole, of Sandwich, Ont., was appointed chairman of the Board established to deal with the dispute between the H. Mueller Manufacturing Company, Sarnia, Ont., and certain of its employees, members of Imperial City Lodge, No. 792, International Association of Machinists. The appointment was made by the Minister in the absence of a joint recommendation from the other two Board members.

During November the Honourable Mr. Justice Fortin, Montreal, was appointed chairman of the Board established to deal with the dispute between the Administrative Commission of the city of Montreal and certain of its employees, being engineers, firemen and oilers engaged in the Waterworks Department. The appointment was made by the Minister in the absence of a joint recommendation from the other two Board members.

During November, at the request of the employees, the findings of the Board appointed to deal with the dispute between the Canadian Northern Railway Company and its clerks, station employees, etc., was referred to the Labour Appeal Board.

Report of Board in Dispute between the Algoma Steel Corporation and Algoma Construction Engineering Company and their Employees.

A REPORT was received from the Board established to deal with the dispute concerning wages and union recognition between the Algoma Steel Corporation and Algoma Construction Engineering Company, Sault Ste. Marie, and certain of their employees, being enginemen, firemen, conductors, brakemen, electrical and steel workers. The Board was composed as follows: His Honour Judge F. R. Powell, Parry Sound, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other two Board members, Messrs. H. H. Dewart, K.C., and Fred. Bancroft, Toronto, nominees of the company and employees respectively. The dispute was dealt with by the Board under three heads, and recommendations were made in each case as to the settlement of the dispute. The findings were signed by all three members, although Mr. Bancroft presented a minority report concerning that portion relating to union recognition.

Report of Board
(Steel Workers)

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Algoma Steel Corporation and Algoma Construction and Engineering Company, employers, and their employees, being steel workers and members of Algoma Lodge, No. 5, Amalgamated Association of Iron, Steel and Tin Workers of North America, employees.

To the Honourable
the Minister of Labour, Ottawa.

A Board of Conciliation and Investigation was constituted in this matter, consisting of His Honour Judge F. R. Powell, chairman, appointed by the Minister of Labour; Mr. Fred. Bancroft, representative of the said employees, and Mr. Hartley Dewart, K.C., representing the said employers.

Before the Board had entered upon its duties, two other matters relating to the same corporations were referred to the chairman of the Board, one being at the instance of the International Brotherhood of Electrical Workers, Lodge No 726, Sault Ste. Marie, Ont., and the other being at the instance of the engineers, firemen, brakemen and conductors, employees of the said Algoma Steel Corporation, as to each of which applications it was subsequently agreed that the Board as constituted should deal with the matter of their complaints. As these in some respects differed from the original application, they are made the subjects of separate reports.

The case as submitted included the question of "recognition," the further question of increased pay for overtime and Sundays and holidays, also the question of adjustment of wages, demand being made that all employees of the corporations in question who were being paid 39 cents per hour and under should be advanced 12 cents per hour, and that all employees who were being paid over 39 cents per hour should be advanced 10 cents per hour.

Your Board opened its sittings at Sault Ste. Marie on August 13, sitting continuously on August 14, 16, 17, 18, and 19. At the opening of the sittings a number of amplified grounds of complaint relating to many details and particulars in various departments of the plant was presented. Its consideration was reserved and the document was filed as Exhibit 4 before the conclusion of the week's session to allow the company to make such reply as it desired and an adjournment was made, with the consent of all parties, until October 8.

The Board resumed its sittings at the Sault upon October 8, which were continued upon October 9, 10, 11, 12, 14, 15, and 16, including many night sessions and three sessions on Thanksgiving Day. During the latter part of this period the sessions of the Board were held as far as possible privately, owing to the prevalence of the influenza epidemic and with a desire to comply with the regulations of the medical health officers. Owing to that fact and with a view of shortening the proceedings by giving to the company time to submit its case in writing, a further adjournment was made.

The sittings of the Board were resumed at the Sault on Tuesday, October 29, when the Board again sat continuously, including evening sessions, on October 29, 30, and 31, and upon November 1 and 2, when an agreement was made with reference to the question of wages, and the Board adjourned to consider and settle its report at Toronto, on November 12 and 13.

Algoma Lodge, No. 5, was represented during the proceedings by Mr. E. Dalrymple, Mr. W. D. Mills, and Mr. J. J. Brothers. The corporations were represented throughout by Captain David Kyle, vice-president of the Algoma Steel Corporation.

In the course of the investigation it was made very clear that the questions raised, particularly those of wages, would of necessity apply to branches of the plant beyond the steel workers, who were more particularly concerned in the application of Algoma Lodge, No. 5, and the employers requested the Board to extend its investigation to all such branches of the plant.

The Minister of Labour consented to this, and, as a result of notices posted by the employers in the various departments, representatives of the other branches of the plant were appointed by the employees. The Board received written requests from the representatives to take up and consider the wages, overtime rates, and other conditions for adjustment. The Board having its powers extended accordingly consented to the hearing of these further applications and representatives of the following branches were heard, viz., the moulders, machinists, patternmakers, blacksmiths, boilermakers, frog and switchmen, shell plant employees, trackmen, bricklayers, stationary engineers, car oilers, wrecking gang crew and minor car repairers, physical test department employees, roundhouse men, water tenders and millwrights. These representatives covered many branches of organized labour.

Your Board believes that every branch of the plant has had an opportunity to present any grievances, and it has heard all matters in dispute. The Board made every effort during the enquiry to bring the parties together by conciliation and as a result many conferences were held. A spirit of conciliation was in evidence on both sides which the Board appreciated.

To Captain David Kyle, who was returned from the front where he was on active service, to resume superintendence of the men and the plant, and to whose intimate knowledge of the working conditions and fairness in presenting the case for the companies and the information he furnished, the Board is much indebted.

The Board also appreciates highly the spirit of co-operation and conciliation shown by the representatives of the men. These things combined have enabled the Board to report a settlement mutually agreed upon and satisfactory to all parties concerned.

Relative to a number of complaints of the men, not included in the original application but now set forth in detail in the said Exhibit 4, these were gone over with the representative of the companies and a number of adjustments were made and the complaints are all dealt with by the management in a written statement filed with the Board as Exhibit No. 11, and those detailed complaints not adjusted before the Board

were left to the final judgment of the vice-president, Captain Kyle, and this procedure was accepted by all present.

The settlement of the questions set forth in the application for the appointment of the Board, relative to increased wages, overtime, and Sunday labour was arrived at and concurred in by all parties concerned and by this Board, and is as follows:

"All hourly rates which have remained in effect since June 1, 1918, will be increased at November 1, 1918, by 5 cents per hour, except training rates, which will be specially adjusted.

"Straight tonnage rates will be equitably adjusted, and there will be no general change in tonnage bonus rates, except where revision of standards may be necessary to meet alterations in operating conditions.

"Certain day men being paid on a 10-hour day prior to November 1 will be changed to a 9-hour day, and will be paid the same amount for 9 hours as they would earn with the 5 cent increase in 10 hours. For example, a man receiving 40 cents an hour after the June 1 increase, if changed from a 10-hour day to a 9-hour day at November 1, would receive $40c - 5c \times 10$, or $\$4.50 + 9$, that is 50c per hour.

"A list of the departments in which the regular day for day men will be after November 1, 9 hours, is hereinafter set forth.

"Any 9-hour men who may be required to work on week days will be paid straight time for any time worked between 7 a.m. and 6 p.m., or between 6 p.m. and 7 a.m., but will be paid time and a half having worked the regular day for any time worked after 6 p.m., and similarly will be paid time and a half having worked the regular night for any time worked after 7 a.m.

"Time and a half will be paid to all men whether day men or shift men for all time worked after 6 p.m. or after 7 a.m., as the case may be, provided they have worked during the regular day or shift ending 6 p.m. or 7 a.m.

"Usual hours for 9-hour men will be—

Monday, Tuesday, Wednesday, Thursday, Friday, 7.30 a.m. to 12 noon, and 12.40 p.m. to 5.15 p.m.

Saturday, 7.30 a.m. to 12 noon, and 12.40 p.m. to 4.45 p.m.

Sunday, 7.30 a.m. to 12 noon, and 1 p.m. to 3 p.m.

"Usual hours for 10-hour men will be—

Monday, Tuesday, Wednesday, Thursday, Friday, 7 am. to 12 noon, and 12.40 p.m. to 5.50 p.m.

Saturday, 7 a.m. to 12 noon, and 12.40 p.m. to 4.45 p.m.

Sunday, 7 a.m. to 12 noon, and 1 p.m. to 3 p.m.

"Usual hours for shift men will be—

Day shift—7 a.m. to 6 p.m., that is, 11 hours.

Night shift—6 p.m. to 7 a.m., that is, 13 hours.

"Shift men working the regular shift at change of turn, which is usually Sunday and Sunday night, will be paid time and a half for the Sunday night shift, provided they have worked the day shift on Sunday.

"The same principles will be applied in case in any department the regular period of changing shifts at the present date is on some other day in the week.

"All day men, whether 9-hour or 10-hour men, or shift men who work the day shift only, and who therefore do not change from day shift to night shift will be paid their usual daily wage for working to 3 p.m. on Sundays, and will be paid time and a half for any overtime worked after 3 p.m. on Sunday. For example, a 9-hour man will receive 9 hours' pay for working to 3 p.m. on Sunday; a 10-hour man will receive 10 hours' pay for working to 3 p.m. on Sunday; an 11-hour man who usually works day turn only will be paid 11 hours for working to 3 p.m. on Sunday; subject, of course, to these men having reported for work on Sunday morning at the regular time.

"The usual working hours of men employed during the day in the following

departments or sections of departments will on and after November 1, 1918, become 9 hours:

Machine shop.
Iron foundry.
Steel foundry.
Blacksmith shop.
Boiler shop.
Frog and switch shop.
Pattern shop.
Shops yard.
General ironworkers.
General oxy burners and helpers.
Sheeters.
General riggers.
General pipefitters.
Tinsmith shop.
Carpenters.
Painters.
Standard gauge car repairmen.
Scale repairers.
Bricklayers and helpers.
Roundhouse.
Electrical repair shop and linemen.
Stores.

"That this revision of rates becomes effective November 1, 1918.

"That the wage rates established as a result of this revision remain in force during the ensuing period of twelve (12) months—that is, to November 1, 1919."

As to Recognition:

The Algoma Steel Corporation is engaged in the production of munition steel for war purposes. It operates an open plant and purposes to maintain it as such and has adopted a policy of non-discrimination as between union and non-union employees.

The above named Algoma Lodge, No. 5, A. A. of I. S. T. W. of N. A., was organized about December, 1916, and since then has been seeking recognition from the Steel Corporation. There are also many of the employees who are members of other trade unions and these employees have also recently been demanding recognition for their respective trade unions and there are at least six of these other trade unions. To all of these demands for recognition the Steel Corporation has made it clear that it refuses to recognize or to sign agreements with such trade unions or to deal with the officials of unions as such, in matters relative to wages and working conditions in the plant.

The majority of the Board of Conciliation is of opinion that this question of the recognition of unions by the said Steel Corporation should be left over for solution and determination until after the war and until the war conditions are passed and until after the said November 1, 1919, and that the Board should not now express any opinion on this question of recognition.

The said Steel Corporation has filed with this Board a written statement of its policy regarding its relations with its employees, and therein recognizes the right of its employees to "bargain collectively" by departments or sections of departments where these alone are concerned or by a representative group of employees when all are concerned. This Board is of opinion that with this right thus secured to the employees with perfect freedom in its application, it is not now necessary to deal with the question of recognition while the war lasts and until the said November 1, 1919.

The majority of the Board recommends that any representations, demands or claims of the employees should be presented through the usual channels of the Corporation, viz., in the first instance to the foreman or superintendents of departments, and failing redress, then to the higher officials of the company, and we recommend that a fair hearing and a reasonable answer should be given by the corporation officials respectively, and the management of the plant, to all reasonable requests, demands or claims of their employees of any department.

Captain Kyle, the vice-president, has also submitted in writing a scheme for elective representation of employees and for adjustment of disputes within the plant. This written statement was filed with the Board as Exhibit 17 at its last sittings at Sault Ste. Marie, and copies

have been furnished to the employees, and this Board requested the employees to give the scheme their careful consideration, and if found agreeable to them to take steps to carry it into effect, but, otherwise, that the former procedure for making known any grievances is to be continued in this plant during the term mentioned.

Since the last meeting of the Board at Sault Ste. Marie, a letter has been received by the Board from Mr. Dalrymple, president of Algoma Lodge, No. 5, in which he states that, "So long as the committees representing the different departments throughout the steel plant have the privilege of meeting the heads of their respective departments, and in failure there to adjust their disputes or grievances to proceed to the highest official of the corporation, that the employees will be contented."

In view of these facts your Board does not desire to make any further recommendation.

All of which is respectfully submitted.

Dated at Toronto, November 13, 1918.

(Sgd.) F. R. POWELL,
Chairman.

(Sgd.) H. H. DEWART.

(Sgd.) FRED. BANCROFT.

Fred. Bancroft joins in this report with the exception of that part under the caption of "As to recognition," upon which he will submit a report.

(Sgd.) FRED. BANCROFT.

(Railway Employees)

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Algoma Steel Corporation, employer, and their employees, engineers and firemen, conductors and brakemen, being members of the railway trainmen's organization, employees.

This matter being the second reference of the Minister of Labour to the Board of Conciliation and Investigation already constituted upon the application of Algoma Lodge, No. 5, the Board heard all the matters in dispute between the parties. The men's representatives who appeared before the Board to present the case were Messrs. Joseph Haney, Minor Lowry, Napoleon Barbeau, representing conductors and brakemen, and E. DeCourcy and R. Miller, the engineers and firemen, assisted by Mr. U. McFadden, their solicitor. The company was represented by Mr. J. E. Irving, their solicitor; the general superintendent, Mr. Nelson, and vice-president, David Kyle.

The members of the Board with the men's representatives and officials of the company spent an afternoon in the plant going over the tracks and equipment to inspect these from the standpoint of safety and working conditions, as the men had made a number of complaints about the conditions in this respect. There are in the neighbourhood of 40 miles of tracks in the big yards of the plant inside the fences, and a careful inspection was made. As a result of the visit, many improvements were promised the men before the Board which the company will carry out. It was generally admitted that since the return of Capt. Kyle much had been done to improve the general yard conditions. The men's representatives presented two schedules to the Board, one for the engineers and firemen, and the other for the conductors and brakemen. In these schedules were requests for increases of wages, overtime rates, and general working conditions, recognition of the union, and a signed agreement. The company also presented for the men's consideration a document covering general rules and regulations. All these documents were discussed in detail and at length.

During the second adjournment of the Board the men's representatives, with Mr. McFadden and the company officials, met in conference and later reported to the Board that the schedules and the rules with the exception of several of the rules, the wages, and lifetime of the conditions had been agreed

on. Upon the Board going over the rules still outstanding, all were agreed upon except one, clause 21 of the general rules. In the general scheme for the advancement of wages, it is set out that the men in this reference are to receive the rates being paid on the Algoma Central Railway, with further consideration and adjustment if these should change later. Capt. Kyle stated that he would file a document showing the rates of wages on the A.C.R. after submitting it to the men. This document is made part of this report showing the wages agreed upon. This leaves clause 21 to be settled by the Board, and two exceptions taken to the document filed by Capt. Kyle in reference to wages. The two schedules, rules and regulations, and wages are set out in the following documents:

SCHEDULE OF ENGINEERS AND FIREMEN.

ARTICLE 1.

Engineers and firemen will rank on seniority roster from date of promotion to same.

ARTICLE 2.

Hired engineers will not be classified, or placed on engineers' seniority list ahead of firemen who have had at least two (2) years' experience as locomotive firemen, and are eligible to handle engine, this being understood that firemen will show two (2) years' service papers.

ARTICLE 3.

Lists showing standing of engineers and firemen in seniority order will be posted in roundhouse, and corrected once each year, January 1. Lists to be open for protest for fifteen (15) days; if not protested within fifteen (15) days, list to be established. If it be proven within fifteen (15) days that engineer or fireman is not in proper place on his respective list a new list will be posted at the expiration of fifteen (15) days showing the correct standing of such men; additions to list to be made as men enter the service.

ARTICLE 4.

When there is a vacancy on an assigned engine, it shall be bulletined, and senior men applying shall have fair trial on same.

ARTICLE 5.

When schedule becomes effective all engines will be bulletined, and senior men applying shall have fair trial on same, it being understood that engines will not be bulletined until seniority lists have been established.

ARTICLE 6.

All engines will be bulletined for assignment, stating the class of service they shall be used in, and engine men applying for same shall be considered as applying for assigned position rather than a particular locomotive.

ARTICLE 7.

Should company see fit to promote an engineer for reason other than seniority to any official capacity, said engineer will hold seniority on engineers' seniority list for six (6) months. If further retained in this promoted capacity he shall forfeit his seniority.

ARTICLE 8.

An engineer or firemen who has been dismissed or resigned from the service, or who has been off without proper leave of absence and again taken into the employ of the company, shall rank on the seniority list as new man.

ARTICLE 9.

A list will be posted in roundhouse opposite seniority list, showing engineers and firemen assigned to engines, and when leave of absence is granted to an engineer or fireman it shall be so stated on this list, also engineer or firemen taking this man's place.

ARTICLE 10.

In case of reduction of staff, seniority shall rule, it being understood that if engineer, through any physical defect, is not able to take the place of fireman, it shall be taken up between engineers' and firemen's committee and proper official of company, and if so arranged this man may be retained as engineer, but will not establish any seniority from such arrangement.

ARTICLE 11.

Engineers and firemen, who have been called to the colours, or who have enlisted, shall retain their seniority standing on seniority roster.

ARTICLE 12.

Engineers and firemen will have a representative committee appointed by them to adjust any difference that may arise between engineers and company or firemen and company, and to discuss all matters which relate to their mutual advantage.

ARTICLE 13.

When an engineer or fireman is disciplined or dismissed from the service he will be advised of reason of such action and a full and impartial investigation will be held on notice to him of place and time of investigation to insure his attendance. He may be accompanied by another employee of his choice, and he shall be advised of decision within five (5) days. Should he feel unjustly dealt with, he may appeal to engineers' and firemen's representative committee, which shall take up appeal with proper official of company within five (5) days from date of decision. If found faultless, he shall be reinstated with pay for such time lost.

ARTICLE 14.

When engineer or fireman is dismissed he shall be paid within twenty-four (24) hours, and a certificate of service given.

ARTICLE 15.

Engine crews will be given proper time to eat meals.

ARTICLE 16.

Engineers and firemen held off on company business shall be paid for time lost and expense accrued.

ARTICLE 17.

Engines working day turn only, men will be given thirty (30) minutes to inspect engine, and same for preparatory time, as far as the exigencies of the work will permit. In cases of emergency at beginning of term, engineman will not be required to work over two (2) hours without inspecting engine.

ARTICLE 18.

When engine goes into shop for washout or repairs the rule applying to seniority will prevail if there is no shop work for the crew.

ARTICLE 19.

When engineers or firemen are called for service, and then cancelled, shall be paid for five (5) hours.

ARTICLE 20.

That all engines be properly equipped with tools, headlights and cab lights, and same kept in proper condition as far as possible, also squirt hose put on engine, between May 1 and November 1, it being understood that complete instructions have been issued by company to this effect.

ARTICLE 21.

All engines will be equipped with hopper pans or equivalent to relieve fireman from going under engine to clean pan.

ARTICLE 22.

Engineer will be allowed to use his own judgment and will not be ordered to work engine if steam leaks from cylinders obstruct his view, having regard to safety and plant operations. Steam leaks in cab to be kept tight. Should fireman in his judgment think leaks on left side of engine unsafe he may go on record in roundhouse to this effect.

ARTICLE 23.

When engineer or fireman is not fit for duty, he shall report same in report book kept for that purpose in roundhouse, it being understood that if man become sick while at home he shall notify locomotive foreman by phone at least three (3) hours before he should report for duty.

ARTICLE 24.

That all switches be put in proper condition and kept so as far as possible, such as targets painted and lights kept in proper condition.

ARTICLE 25.

That flood lights in yard be focused so they will not shine in cab of engine, thus obstructing the view ahead.

ARTICLE 26.

That proper sanding appliances be installed for sanding engines.

ARTICLE 27.

That hose be installed in roundhouse for the purpose of blowing out tubes.

ARTICLE 28.

Engineers will be held responsible for the burning of head lights or other damage caused by the overloading of iron or slag ladles or from defective wheels or frames on said ladles.

ARTICLE 29.

That all steam leaks coming from defective steam pipes in buildings be so piped or repaired as not to obstruct the view of engineer or fireman while performing his duty, and that all other escaping steam, as far as possible, be confined.

ARTICLE 30.

Should any misunderstanding arise as to the construction or meaning of these rules, the matter shall be decided by a conference between the general superintendent and the representative committee of engineers and firemen, being employees of the company.

ARTICLE 31.

The company will undertake to maintain one spare crew on each shift, so that all may

be given time off except in case of emergency.

ARTICLE 32.

The above rules will not be changed unless on thirty (30) days' notice by or to the engineers and firemen.

The above schedule is satisfactory to the company and to the men representing the engineers and firemen.

Signed for engineers and firemen:

(Sgd.) URIAH MCFADDEN.

Signed for Algoma Steel Corporation:

AGREEMENT BETWEEN ALGOMA STEEL CORPORATION, LIMITED, AND THE TRAINMEN, GOVERNING WORKING CONDITIONS OF YARDMEN.

Rules and Regulations:

SEC. 1. Hiring men. The company shall at all times hire experienced men when available. When experienced men are not available, and it becomes necessary to hire inexperienced men, said inexperienced men shall hold no rights for the first three (3) months' service, but shall then rank as senior brakemen from date they enter service.

SEC. 2. Reducing crews. If it becomes necessary to reduce the number of crews in the service, the oldest men in the service shall be given preference.

SEC. 3. Date of rank. The date of rank of conductors and brakemen shall commence on date of entering service, as shown on the time book, except as provided by Sec. 1, and they shall have the preference to fair trial on positions to which their seniority in service entitles them.

SEC. 4. Promotions and retentions. Promotions and retentions in the service shall be based upon rank, ability and fitness.

SEC. 5. Junior pay. Junior brakemen shall receive senior pay after three (3) months in the service as shown in the time book.

SEC. 6. Younger men run around older men. In case of spare men being called for work, the oldest men in point of service shall be called. If called and no work, he will be allowed six (6) hours' pay.

SEC. 7. Older men not to replace younger men. A man holding a regular run cannot be replaced for a day by an older man unless said older man wishes to take run regularly except in cases of older men doing spare running. When there is no running for said man he shall go back braking on his regular run.

SEC. 8. Rank list. A list showing names of all trainmen in the employ of the company shall be posted in the yardmaster's office on the first day of each year. This list to be accessible at all times, and to show the date on which men entered the service. Any employee whose standing is incorrectly stated on list must protest in writing within thirty (30) days thereafter or no action will be taken.

SEC. 9. Definition. When the term trainmen or yardmen is used it shall apply to conductors or brakemen.

SEC. 10. When a trainman is disciplined or dismissed from the service he will be advised of the reason of such action, and a full and impartial investigation will be held on notice to him of place and time of investigation, to ensure his attendance. He may be accompanied by another employee of his choice, and shall be advised of decision within five (5) days. Should he feel unjustly dealt with he may appeal to trainmen's representative committee, which shall take up appeal with proper official of the company within five (5) days from date of decision. If found faultless he shall be reinstated with pay for such time lost.

SEC. 11. Held on company business. Trainmen held off on company business shall be paid time lost and shall be allowed reasonable expenses.

SEC. 12. Any trainman serving on a committee representing trainmen as employees shall not be discriminated against, and shall have leave of absence upon request to serve on such committee.

SEC. 13. No fines on account of damages. Trainmen shall not be required to pay fines on account of damage.

SEC. 14. Bulletins to be issued. All bulletins, circulars and special instructions are to be re-issued on the first of each year, and any not re-issued on the first of each year will be considered not in effect.

SEC. 15. Re-instatement. Trainmen who may have been taken out of the service on account of a decrease in business shall be re-instated and hold their seniority rights if they report for work when wanted.

SEC. 16. Leave of absence. Trainmen shall be given leave of absence when the service will permit and satisfactory reasons are given, for a period not to exceed thirty (30) days, except in case of sickness.

SEC. 17. Shall be paid and given clearance. Trainmen leaving the company's service shall be paid at the earliest practicable time and shall be given a service letter over the signature of the superintendent, on application, stating reasons for leaving, capacity in which he was employed, and length of service with the company.

SEC. 18. Forfeit of rights. Any trainman having been absent to exceed three (3) months in succession thereby forfeits all rights with the company, except in case of sickness or when leave of absence has been granted. No leave of absence shall be extended to exceed six (6) months nor reinstatement made after six (6) months' continuous service, except in case of sickness or men on active service for the period of the war.

SEC. 19. Conductors to have control. Conductors having charge of trains, and responsible therefor, shall not be required to take two (2) inexperienced brakemen when experienced brakemen are available.

SEC. 20. Crews. All crews on engines shall consist of one (1) conductor and not less than two (2) brakemen, and no crew shall be required to work short-handed when men are available, after the expiration of two (2) hours. If no spare men are available conductors shall not be required to work short-handed for two (2) consecutive shifts.

SEC. 21. Engines properly equipped. Conductor shall use his own judgment about working any engine not properly equipped with sufficient grab irons in the proper places, and other appliances such as foot boards in good and safe condition, with due regard to safety and plant operations.

SEC. 22. Trainmen handling loaded slag or hot metal ladles shall be allowed to use their own judgment and protect fellow employees and company's property and shall not be ordered to ride said slag or hot metal ladles while in motion or on foot board of engine next to said ladles.

SEC. 23. Trainmen shall be allowed to use their own judgment, having due regard to their own safety and to the necessities of the plant operations and repairs; and shall not be ordered to work on trestles after dark which are not properly planked up, or to work on any track after dark where material or refuse is piled too close to the track to be safe. It being understood that the instructions of the corporation to all employees are that all trestles shall be kept properly planked and that material referred to should not be piled too close to the track to be safe.

SEC. 24. Cars not properly loaded. Conductors shall use their own judgment about handling cars not properly loaded, such as material piled too high, where it is liable to fall off, or where material is projecting over sides or ends of cars, it being understood that the instructions of the corporation to all employees are that all cars be properly loaded.

SEC. 25. Vacancies for assistant yardmasters will be bulletined for three (3) days and then will be given to the oldest yard man making application for the same, if competent, it being understood, however, that the company will reserve the right to fill such a position with other employees when deemed advisable. Yardmen when promoted to official positions, such as assistant yardmaster, may retain their yard rights, if arranged with company by letter at time of promotion.

SEC. 26. That as far as possible all engines to be properly equipped with headlights and all switch lights be kept clean and lighted all night, and that all switches have proper targets, said targets to be kept painted, it being understood that complete instructions have been issued by the corporation to all employees to this effect.

SEC. 27. That rules and regulations provided for in this schedule shall become effective November 1, 1918, and remain in effect for a period continuing from above mentioned time until 30 days' notice shall be given by or to the trainmen.

The above agreement is satisfactory to the corporation and to the men representing the trainmen.

Signed for the trainmen:

(Sgd.) URIAH MCFADDEN.

Signed for Algoma Steel Corporation, Ltd.:

(Sgd.) J. E. IRVING.

THE ALGOMA STEEL CORPORATION, LIMITED.

The rules and instructions herein set forth govern transportation operations of the Algoma Steel Corporation, Limited.

To take effect November 1, 1918, superseding all previous rules and instructions inconsistent therewith.

Special instructions may be issued by proper authority.

Approved:

GENERAL NOTICE.

To enter or remain in the service is an assurance of willingness to obey the rules.

Obedience to the rules is essential to the safety of employees and to the protection of property.

The service demands the faithful, intelligent and courteous discharge of duty.

To obtain promotion, capacity must be shown for greater responsibility.

Employees in accepting employment assume its ordinary risks.

GENERAL RULES.

(a) Employees whose duties are prescribed by these rules must provide themselves with a copy. Copies will be furnished all new employees upon entering the service.

(b) Employees must be conversant with and obey the rules and special instructions; if in doubt as to their meaning they must apply to head of department, or his immediate assistants, for an explanation.

(c) Employees must pass the required examinations.

(Note.—Not agreed on but left to Board.)

(d) Persons employed in any service on trains are subject to the rules and special instructions.

(e) Employees must render every assistance in their power in carrying out the rules and special instructions.

(g) The use of intoxicants by employees while on duty is prohibited. Coming on duty while intoxicated or losing time on account of being under the influence is sufficient cause for dismissal.

(h) In case of danger to the company's property, employees must unite to protect it.

(j) The Brown system of discipline will be followed in transportation department.

(j2) Any superintendent upon receiving service warranting his recommendation may propose merit marks for a train crew to the superintendent of transportation.

DEFINITIONS.

Engine: A locomotive propelled by any form of energy.

Train: An engine, or more than one engine coupled, with or without cars.

Main track: A track extending through yard upon which trains are operated.

Siding: A track auxiliary to the main track.

Yard: A system of tracks provided for the making up of trains, storing of cars, and other purposes.

RULES.

SIGNAL RULES.

1. Employees whose duties may require them to give signals will be provided with the proper appliances, and they shall be required to keep them in good order and ready for immediate use.

2. Flags of the prescribed colour must be used by day, and lamps of the prescribed colour by night.

3. Night signals are to be displayed from sunset to sunrise. When weather conditions obscure day signals, night signals must be used in addition.

VISIBLE SIGNALS.

4. Colour signals:

Colour. Indication.

(a) Red—Stop.

(b) Green—Proceed, and for other purposes prescribed by the rules.

(c) Yellow—Proceed with caution, and for other purposes prescribed by the rules.

(d) Blue—See Rule No. 9.

HAND, FLAG AND LAMP SIGNALS.

Manner of using. Indication.

(a) Swung across the track—Stop.

(b) Raised and lowered vertically—Proceed.

(c) Swung vertically in a circle at half arm's length across the track when the train is standing—Back.

(d) Swung vertically in a circle at arm's length across the track when the train is running—Train has parted.

Note.—The extent to which coloured signals are to be used in and about the plant to be decided by the superintendent of transportation.

6. Any object waved violently by anyone on or near the track is a signal to stop.

7. AUDIBLE SIGNALS.

ENGINE WHISTLE SIGNALS.

Note.—The signals prescribed are illustrated by "O" for short sounds, "———" for long sounds. The sound of the whistle should be distinct, with intensity and duration proportionate to the distance signal is to be conveyed.

Sound. Indication.

(a) O—Stop, apply brakes.

(b) ——— ——— Release brakes.

(c) ——— O O O—Flagman go back and protect rear of train.

(d) ——— ——— ——— ——— Flagman return from west or south.

(e) ——— ——— ——— ——— ——— Flagman return from east or north.

(f) ——— ——— ——— When running train parted. To be repeated until answered by signal prescribed by Rule 5 (d) answer to (5) (d).

(g) O O—Answer to any signal not otherwise provided for.

(h) O O O—When train is standing back, answer to rule 5 (c). Call for signals.

(j) O O O O—Call for signals.

(k) ——— ——— O O—Approaching public crossing at grade.

A succession of short sounds of the whistle is an alarm for persons or cattle on track.

TRAIN SIGNALS.

8. Yard engines will display the headlights to the front and rear by night. When not provided with a headlight at the rear two white lights must be displayed.

9. A blue flag by day and a blue light by night, displayed at one or both ends of an engine, car or train, indicates that workmen are under or about it. When thus protected it must not be coupled to or moved. Workmen will display the blue signals, and the same workmen are alone authorized to remove them. Other cars must not be placed on the same track so as to intercept the view of the blue signals, without first notifying the workmen.

USE OF SIGNALS.

10. A signal imperfectly displayed, or the absence of a signal at a place where a signal is usually shown, must be regarded as a stop signal, and the fact reported to the superintendent of transportation.

11. The engine bell must be rung when an engine is about to move.

12. The engine bell must be rung on approaching every public road, crossing at grade, and until it is passed.

13. The unnecessary use of either the whistle or the bell is prohibited; they will be used only as prescribed by rule or law, or to prevent accident.

MOVEMENT OF TRAINS.

14. When cars are pushed by an engine a trainman must take a conspicuous position on the front of the leading car.

15. All lead switches must be left in proper position after having been used. Conductors are responsible for the position of the switches used by them and their trainmen, except where switch tenders are stationed.

16. Both conductors and engineers are responsible for the safety of their trains, and, under conditions not provided for by the rules, must take every precaution for their protection.

17. In all cases of doubt or uncertainty the safe course should be taken and no unnecessary risks run.

SPECIAL RULES.

18. Applicants for positions in transportation service of this company must be of sound health and free from physical, mental or moral infirmities, between the age of 21 and 45, except as provided in Rule 20.

19. No person shall be employed in the train service who cannot read and write the English language, or who does not possess a knowledge of simple arithmetic; but this rule shall not apply to present employees.

20. Minors will not be employed in train or engine service without the written consent of parents, or guardians, together with the approval of the head of department, which must be filed with the application for employment.

21. No person defective in hearing, sight, or colour perception, shall be employed in any branch of the service involving the use of signals or the movement of trains and engines. All persons thus employed will be required to pass an examination by the authorized oculist and examiner of the company as to their hearing, sight and ability to distinguish colours.

Note.—Not agreed on but left to Board.

22. No person who is intemperate, dishonest, immoral, or otherwise vicious, will be permitted to enter or remain in the service.

23. No person shall be given employment in the service of the company unless his previous record, character and ability are satisfactory. Men whose intelligence, appearance, strength and character are such as to justify the belief that their services will be efficient and satisfactory and who will develop ability sufficient to merit advancements in the service will be carefully selected from among applicants.

24. Any change in the rate of wages of any employees must be authorized by the proper officers of the corporation.

25. No person, whatever may be his rank, will be allowed to absent himself from duty, or to change off with another, without permission from proper officer. No time or wages are to be returned except for work actually performed by the person whose name appears on the pay-roll.

26. All persons in the employ of the transportation department must devote themselves exclusively to its services, attending during the prescribed hours of the day or night.

27. All employees are required to report any misconduct or negligence, affecting the interest of the company, or employees, and withholding such information will be considered negligence or indifference.

28. Employees are warned not to attempt to get on the front or the rear of an engine, nor on the end of a car as it approaches them, nor to jump on or off trains in rapid motion, nor to go between cars in motion to uncouple them. These and all similar acts of imprudence are forbidden, and if done are at the sole risk of the employee.

29. Every employee is required to exercise the utmost caution to avoid injury to himself or to his fellows, especially in the switching of cars and in all movements of engines and trains; in doing which work each employee must look after and be responsible for his own safety. They are required to inform themselves respecting the location of all structures or obstructions along the line that will not clear them when on engines or cars.

30. It is made hereby the right and duty of every employee, and as a part of his employment, under all circumstances, to take sufficient time, before exposing himself to danger, to make such examination as may be necessary and refuse to obey any order which would unnecessarily imperil his life or limb. No person who is careless of others, or of himself, should be continued in the service of this company. Every case of injury to person or property must be promptly reported in writing to the head of the department, stating the names and residences of all witnesses, and all particulars of the occurrence, on the prescribed form.

31. All are especially cautioned not to walk upon or stand upon the tracks, except when necessary to do so; also to use their best endeavour as much as may be to prevent others from going upon the tracks.

32. It is dangerous to assume the signals given to the engineer or firemen have been seen, or if seen will be obeyed. When obedience to such signals on the part of the engineman or fireman is essential to the safety of an employee in the performance of his duty, he must know that the signal has been seen, understood and obeyed before placing himself in a dangerous position.

33. Yardmen, trainmen and all other employees are directed to communicate with superintendent of transportation or his assistants if they become aware of any defects in the construction of tracks, whereby an accident might occur to men in discharge of their duties.

34. Employees who witness, or have any knowledge whatever of an accident resulting in injury, must not give such information to any one except the company's officers, attorneys and claim agents, except when called upon to testify. In making personal injury statements give all the facts, whether favourable or unfavourable, to the company, the injured persons, or its employees.

35. The employee who opens a switch must see that there is no obstruction between switch point and stock rail, and when switches are closed the same precaution must be taken. The employee who locks a switch must pull chain to see that the lock is securely fastened.

36. Employees should use every precaution against losses by fire. A frequent cause of fire is that rubbish, such as oily waste, rags or waste paper, is carelessly left to ignite by spontaneous combustion.

37. In cases of accident to trains on roadway, employees are required to give their best efforts to clear the road, or to assist as may be required at the time, whether in the line of their usual duty or not. They, especially trackmen, should also notice the condition of passing trains, and if they observe anything in bad order, as a loose wheel, a defective coupler, or a fallen brake rod, they should notify the men upon the train by proper signals; also give a signal to stop if in their judgment it is endangered by the defect.

38. All persons entering the service of this department will be required to sign an acknowledgment that they have read, understand, and do agree to obey the rules and instructions of this department.

DUTIES OF EMPLOYEES.

Assistant Superintendent Transportation.

39. Assistant superintendent transportation reports to, and receives his instructions from, the superintendent of transportation. He will exercise a general supervision over all employees in the transportation department and see that the rules are fully understood, and observed by them. He will give special attention to the examination of conductors, enginemen and brakemen, as to the rules, and must know each understands those pertaining to his particular duties, before permitting him to go on duty. He will see that none but intelligent and reliable men are selected as trainmen. He will give special attention to the prompt movement of cars, and see that there is no unnecessary delay to trains doing work, or in taking fuel and water. In case of accident or blockade or detention of trains otherwise, he will proceed at once to the place and assist in moving the obstruction. He will see that every precaution is taken to protect and insure the safety of trains and all property, either in charge of or belonging to the company, making a detailed statement to the superintendent of transportation at the earliest practical moment. He must see that the trainmen are supplied with all necessary signals, and that they use them strictly in accordance with the rules, and will, as often as possible, check the signals of each train to see that they are in good condition and that no waste occurs.

Yardmasters.

40. Yardmasters report to and receive their instructions from assistant superintendent of transportation. They have charge of yards, the men employed and the movement of trains and cars therein. They must see that train crews and engines are ready for duty at the appointed time. They must not permit a train to start with a conductor, engineman or other trainman who is under the influence of liquor, or otherwise unfit for duty, nor fail to report such occurrences at once to the assistant superintendent of transportation. They must see that the yard is kept in good order, that cars are switched properly, and that all cars requiring shop repairs are promptly sent to repair tracks. They must report to the assistant superintendent of transportaion all disobedience of rules coming under their notice.

Conductors.

41. Conductors report to and receive their instructions from the yardmaster.

42. The general direction and movement of a train is vested in the conductor. He is responsible for its safe and proper movement, must be familiar with the duties of all persons employed thereon, exact a strict performance, reporting to the assistant superintendent of transportation any misconduct, insubordination or neglect of duty of such employees. All men employed on the train are required to yield a willing obedience to his order, except as provided in Rule 58. Under all circumstances the safety of the train is of great importance, and nothing must be left undone that will secure it.

43. Conductors will see that their trains are provided with proper tools and sufficient supplies of all kinds, and that these are kept in good order and not wasted.

44. In case of accident resulting in loss of life, injury to person, or damage to property,

conductors must use the utmost care in making reports, and such record as will enable them to furnish a full and complete statement of all the facts, with the names and addresses of all persons injured, also the names of all persons who witnessed or have information concerning the accident.

45. Where derailing switches on sidings are placed, they must at all times, when not in use, be left open or set for derail.

46. Each conductor must know that his train is supplied with danger signals and his trainmen instructed as to their proper use. They must also instruct their brakemen as to their duties, and see that they perform them. They will also caution them as to the special dangers of their business and enjoin them to watchfulness and care in the performance of duty.

47. They will advise the assistant superintendent of transportation of any dilatoriness or lack of attention upon the part of others, whose duties require their co-operation.

48. Running switches are prohibited, where it is possible to avoid making them. Conductor in such cases will use his own judgment as to handling switches and see that brakemen are at their posts, and understand what they are to do. Under no circumstances will running switches be made before switch is examined.

49. They will at all times do their work and place cars as instructed, and, when necessary to disturb cars that are being loaded or unloaded, great care will be taken to warn all persons in their vicinity and an opportunity given them to get out of danger before cars are moved. When cars are so moved they will be returned to the same position as found, or placed in an equally convenient place for loading or unloading.

Brakemen.

50. While on duty, brakemen are under the direction of the conductor. It shall be the duty of the brakemen of all trains, while on the main track, whether running or standing, to protect the rear of their train in the manner provided in the train rules, with which nothing must be allowed to interfere. It is their duty to be provided with, take care of, and properly display train and danger signals, for the safe and prompt movement of the trains. They will examine bulletin books and keep themselves posted on all instructions issued from time to time.

Enginemen.

51. Enginemen in all matters relating to motive power will report to and receive their instructions from the roundhouse foreman, but in all matters connected with the movement of trains they will receive their instructions from the conductor. Before leaving engine house tracks they must inspect their engines and know that they have the necessary tools and supplies, that the brakes, injectors, water glass, boiler, safety appliances and machinery are in good condition, and register the condition of engine and time leaving engine house on engine house register.

52. They must obey the orders of yardmasters or persons in charge in regard to switching.

53. They are jointly and equally responsible with conductor for the safety of the train and the proper use of all precautions required by the rules and instructions, and although they are under the direction of the conductor, as regards the management of trains, they will not obey any instructions which imperil the safety of the train or involve a violation of the rules.

54. When there is no conductor, or when the conductor is disabled, the senior brakeman of his train crew will temporarily have charge of the train and will be governed by the rules prescribed for conductors.

55. Before going out enginemen must have a copy of the rules and instruction, a full set of signals, and all necessary tools or implements for use in case of accident, and must examine the bulletin book and be fully informed as to all notices posted for their guidance. They must also have their engines in good working order and supplied with fuel and water.

56. They are required to observe the position of all switches, and must know (so far as it is possible for them to do so) that such switches are right before passing over them.

57. When approaching switches, which they are to use, they must know positively that they are in proper position, that cars on other tracks clear sufficiently, and that no portion of their train or engine is allowed to stand where it will obstruct other tracks improperly.

58. When switches are being shifted ahead of approaching engines, enginemen must as far as possible know that their train is under such control as to avoid derailment, in case of imperfection in the working of the switch.

59. They will report the absence of lights at switches where lights should be shown, and in approaching such switches they will reduce speed, with the train under control, until the position of the switch is determined.

60. When running after dark they must, when so instructed, have in the cab where it cannot be seen by passing trains, a red lamp lighted and in good order, in readiness to signal approaching trains in case of danger.

61. Except when absolutely necessary, engines must not be left standing within one hundred (100) feet of any road or crossing, and enginemen must be particular to see that there is no unnecessary escape of steam from cylinder cocks or safety valves, or anything that will frighten horses at such crossings.

62. They will not be permitted to change engines without permission of the roundhouse foreman.

63. They will allow no person to ride on their engines except the conductor of the train and the brakeman, the superintendent, his assistants or the yardmaster, without the permission of the superintendent.

64. They will themselves take their engines from and to the engine house, unless otherwise provided for.

65. No person is allowed to move or handle a locomotive except enginemen and hostlers, who have been regularly appointed.

65 (a) They are expressly prohibited from allowing their firemen to handle engines, while switching or elsewhere, or take them to or from engine house.

65. (b) The only exception permitted is that an engineman, while himself on the engine, may allow the fireman to handle it under his direct supervision, it being understood that the engineman is held strictly responsible for the movement of the engine at such times.

66. An engine should never be allowed to stand under steam without an engineman or some other responsible person on it. Should it be necessary to do so, brakes must be applied or wheels blocked (unless engine is attached to train), the reverse lever placed in the centre of the quadrant, and cylinder cocks open.

67. When a train backs in on a siding to meet or be passed by another train, the engineman, when his engine is clear of the main track, will see to it personally that the switch is properly set to the main track.

Firemen.

68. They will report to and receive their instructions from the roundhouse foreman. While on duty they will obey instructions received from enginemen.

69. They must, when on their engine, and not otherwise properly engaged, keep a careful watch upon the track, and instantly warn the enginemen of any obstructions or signals perceived.

70. They must familiarize themselves with all train rules, examine bulletin books, and must understand the use of the signals and use them properly, when necessary.

71. They must not run an engine without permission of the roundhouse foreman, except as provided for in 65 (b).

72. They must not go under engines to clean out ash pans, when on the road, except by permission of the engineman.

These rules and regulations, except as noted, are satisfactory to the corporation and to the trainmen.

Signed for Algoma Steel Corporation, Ltd.:
(Sgd.) J. H. IRVING.

Signed for the trainmen:
(Sgd.) URIAH MCFADDEN.

MEMORANDUM REGARDING RATES OF PAY FOR CERTAIN EMPLOYEES IN THE TRANSPORTATION DEPARTMENT.

Effective November 1, 1918, the wage rates of engineers, firemen, conductors and brakemen in the transportation department will be the same as those paid to similar classes employed in the Algoma Central railway yard at Sault Ste. Marie. These rates at this date are as follows:

Engineers	68c	per hour.
Firemen	51c	per hour.
Conductors	56c	per hour.
Senior brakemen	52¼c	per hour.

It has been reported by representatives of the trainmen in the plant that changes in the above rates affecting conductors and brakemen may immediately be made. If these changes should be made as affecting the Algoma Central yard at November 1, 1918, the wage rates of similar employees in our transportation department will be changed accordingly. Thereafter for a period of 12 months from November 1, 1918, that is, to November 1, 1919, the rates of the above classes of employees in our transportation department will be changed as the rates of similar men in the Algoma Central yard at Sault Ste. Marie are changed, though, except in the first instance, any such changes will not be ante-dated before the first day of any month in which these changes may be decided by the Algoma Central Railway or the Canadian Railway Wage Board.

The usual hours of work will be at the discretion of the corporation, that is, if the Algoma Central yard rates are on an 8-hour basis, the corporation may, if it desires, institute an 8-hour day or shift for the above classes of employees, or it may continue the present system of an 11-hour day, and 11 and 13 hour shifts. Straight time will be paid for all time worked in excess of the usual working hours, that is, overtime will be paid for *pro rata*.

McFadden & McMillan,
Barristers, Solicitors,
Notaries, Etc.,

Barnes Building,
Cor. Gore and Queen Streets,
Sault Ste. Marie, Ont.,
November 9, 1918.

His Honour Judge Powell,
Parry Sound, Ont.

Dear Sir,—

Re Steel Plant Employees and Board of Conciliation.

Captain Kyle has prepared a memorandum regarding rates of pay for certain employees

in the transportation department; Mr. Irving, solicitor for the Steel Plant, wishes to have this agreement sent to you.

We, on behalf of the men, beg to state our views of this document. The men take the stand that so far as the intention on the part of the company is to institute an eight-hour shift, that this is unfair. If the company should institute an eight-hour shift the result would be that there would be no increase in the monthly pay cheque, and the men feel that in that event they would have lost by the work done by the Arbitration Board.

Again the men feel that in reference to the last part of paragraph 2, which begins thus, "except in the first instance, any such changes will not be ante-dated before the first day of any month," the men understood from Captain Kyle that the present increase in rates, which the men on the Algoma Central are about to get, would be given them and dated as of November 1 of this year.

Those are the only two objections that the men seem to offer. They informed the writer that they gave the men in the different departments the information to the same force and effect as we are giving Your Honour.

Yours truly,

(Sgd.) McFADDEN & McMILLAN.

Relative to the questions raised in the foregoing correspondence and documents:

1. The Board construes the memorandum of Captain Kyle regarding rates of pay in the transportation department as meaning that the employees are to have the benefit of any increase of pay, under the pending application of the A. C. R. men, as effective from and after November 1, 1918, and to be ante-dated accordingly.

2. The Board understands the agreement reached as to hourly rates of wages to be based upon present working hours in the plant, and the question of an eight-hour shift was not taken into consideration.

As to Rules "C" and "21" of the General Rules—the majority of the Board thinks that as the work is of a hazardous character, both in respect to transportation and other employees, and as these rules aim at safety, they are reasonable and proper and should be established.

All of which is respectfully submitted.

Dated November 15, 1918.

(Sgd.) F. R. POWELL,
Chairman.

(Sgd.) FRED. BANCROFT.

(Sgd.) H. H. DEWART.

Fred. Bancroft joins in this report, with the exception of that part relating to "C" and "21", as to which he will submit a report.

(Sgd.) FRED. BANCROFT.

Electrical Workers

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Algoma Steel Corporation and Algoma Construction and Engineering Company, employers, and their electrical employees, members of Local 726 of the International Brotherhood of Electrical Workers, employees.

The Honourable
Senator Gideon Robertson,
Minister of Labour, Ottawa.

Pursuant to instructions referring this matter to the Board of Conciliation already constituted, when the representatives of Local 726 made application for a Board to the Department, the questions at issue between the employer and the employees were taken up by the Board. Captain David Kyle appeared representing the employers, and the men were represented before the Board by W. F. Prentice, H. Young, A. S. Higgins, assisted by J. A. Noble, international representative of the Brotherhood. The men's representatives presented a schedule containing 16 clauses, in which increases in wages, overtime rates and other general conditions of employment were asked for. Evidence in support of these requests was submitted at some length by the men's representatives. The men also asked for recognition of the union and a signed agreement. The vice-president of the corporation, after discussing many of the details of the schedule before the Board and with the men's representatives in attendance, took the whole matter into consideration, and a settlement was arrived at under the general scheme for reducing hours, increasing wages and overtime rates, and other working rules, as set out in documents submitted to the Board.

The following documents filed with the chairman of the Board and accepted by the men's representatives before the Board, outline the working arrangement arrived at:

His Honour Judge F. R. Powell,
Chairman Board of
Conciliation and Investigation,
Sault Ste. Marie, Ont.

Dear Sir,—

I am enclosing herewith for your information copy of my letter of October 24 to our chief electrician, regarding the points brought before your Board by a committee representing the men employed in our electrical department. I am informed that the proposals set forth in this letter are satisfactory to our electrical employees. There are two points mentioned in this letter which it may be desirable to make clearer.

With reference to Item 8, the understanding is that 10 hours at the present time is the usual day for day men.

With reference to Item 15, it is intended that in cases where a man receiving a lower hourly rate is sent temporarily to take an occupational job paying a higher occupational hourly rate, he will be paid the higher hourly rate.

I think that these points are fully understood in this sense by the men concerned, but think it necessary to outline them here so as to prevent any possible misunderstanding.

Yours very truly,

D. KYLE,
Vice-President.

October 29, 1918.

Mr. J. Donnelly,
Chief Electrician.

With reference to our meeting on the twenty-second instant with a committee representing the men employed in the electrical department to discuss the points brought before the Board of Conciliation and Investigation by this committee, I shall be glad if you will ascertain from them whether the following proposals are satisfactory: 1, 2, 3. We are looking for the assistance of the Board of Conciliation in deciding questions of rates and pay for overtime and Sundays, and the general principles which may be laid down by the Board will apply to men in our electrical department.

4. In cases of emergency calls, men in the electrical department will receive not less than three hours' pay.

5. Officials of the corporation will meet a representative committee of employees in the electrical department chosen by the men in that department to adjust any differences which may arise between the men in the electrical department and the corporation, and to discuss all matters which relate to their mutual advantage.

6. No discrimination will be shown against any employee in the electrical department elected by the men to represent them on this committe.

7. Holidays will be Dominion Day, Labour Day, and Christmas Day.

8. Ten hours constitute a day's work at the present time.

9. Six hundred and fifty volts or over will be considered as high voltage, and rubber gloves and protectors supplied by the corporation will be available for men working thereon.

10. A suitable ventilating and heating system will be installed in the main power house switchboard room.

11. It is considered that 8-hour men should not receive the same increases per shift as 12-hour men, but in the case of the power house operators a special arrangement may be possible. As soon as the general principles of the Board's award are known, we shall be in a position to make a definite statement of what is proposed for power house operators.

12. The operating force in the merchant mill sub-station will be increased by one helper on each shift.

13. Emergency lighting circuits will be installed at the power house switchboard, the merchant mill sub-station, and the coke plant sub-station.

14. Lavatory accommodations in merchant mill sub-station will be provided as soon as the new electrical repair shop is complete.

15. In cases where a man receiving a lower hourly rate is sent temporarily to do work paying a higher occupational rate, he will be paid the higher hourly rate.

I am enclosing an additional copy of this letter, and will be glad if you will give it to one of the members of the electrical department committee, asking them to let me know as soon as possible if this is satisfactory, so that I can communicate with His Honour Judge Powell. If there are any points which in their opinion require further discussion I shall be glad to meet you and the committee at any convenient time.

D. KYLE,
Vice-President.

October 24, 1918.

This working arrangement was arrived at during the second adjournment of the Board, and upon the matter being reported to the Board as above, the electrical workers' representatives stated it was satisfactory. This arrangement was arrived at before the rates of wages and overtime rates and reduction in hours were finally agreed upon later.

The general scheme adjusting wages, hours and overtime rates applies to electrical workers, and the foregoing documents will be interpreted so as to conform to the adjustments made therein. The general terms of the settlement mentioned, also disposes of clauses 1, 2 and 3 mentioned above.

The settlement of the questions of increased wages, overtime, working hours and Sunday labour is as follows:

All hourly rates which have remained in effect since June 1, 1918, will be increased at November 1, 1918, by 5c per hour, except training rates, which will be specially adjusted.

Straight tonnage rates will be equitably adjusted, and there will be no general change in tonnage bonus rates, except where revision of standards may be necessary to meet alterations in operating conditions.

Certain day men being paid on a 10-hour day prior to November 1 will be changed to a 9-hour day, and will be paid the same amount for 9 hours as they would earn with the 5c increase in 10 hours. For example, a man receiving 40c an hour after the June 1 increase, if changed from a 10-hour day to a 9-hour day at November 1, would receive $(40c+5c)\times10$, or $\$4.50\div9$, that is, 50c per hour.

A list of the departments in which the regular day for day men will be after November 1, 9 hours, is hereafter set forth.

Any 9-hour men who may be required to work on week days will be paid straight time for any time worked between 7 a.m. and 6 p.m., or between 6 p.m. and 7 a.m., but will be paid time and a half having worked the regular day for any time worked after 6 p.m., and similarly will be paid time and a half having worked the regular night for any time worked after 7 a.m.

Time and a half will be paid to all men whether day men or shift men for all time worked after 6 p.m. or after 7 a.m., as the case may be, provided they have worked during the regular day or shift ending 6 p.m. or 7 a.m.

Usual hours for 9-hour men will be—

Monday, Tuesday, Wednesday, Thursday, Friday, 7.30 a.m. to 12 noon, and 12.40 p.m. to 5.15 p.m.

Saturday, 7.30 a.m. to 12 noon, and 12.40 p.m. to 4.45 p.m.

Sunday, 7.30 a.m. to 12 noon, and 1 p.m. to 3 p.m.

Usual hours for 10 hour men will be—

Monday, Tuesday, Wednesday, Thursday, Friday, 7 a.m. to 12 noon, and 12.40 p.m. to 5.50 p.m.

Saturday, 7 a.m. to 12 noon, and 12.40 p.m. to 4.45 p.m.

Sunday, 7 a.m. to 12 noon, and 1 p.m. to 3 p.m.

Usual hours for shift men will be—

Day shift—7 a.m. to 6 p.m., that is, 11 hours.

Night shift—6 p.m. to 7 a.m., that is, 13 hours.

Shift men working the regular shift at change of turn, which is usually Sunday and Sunday night, will be paid time and a half for the Sunday night shift, provided they have worked the day shift on Sunday.

The same principles will be applied in case in any department the regular period of changing shifts at the present date is on some other day in the week.

All day men, whether 9-hour men or 10-hour men or shift men who work the day shift only and who therefore do not change from day to night shift, will be paid their usual daily wage for working to 3 p.m. on Sundays, and will be paid time and a half for any overtime worked after 3 p.m. on Sunday. For example, a 9-hour man will receive 9 hours' pay for working to to 3 p.m. on Sunday; a 10-hour man will receive 10 hours' pay for working to 3 p.m. on Sunday, an 11-hour man who usually works day turn only will be paid 11 hours for working to 3 p.m. on Sunday; subject, of course, to these men having reported for work on Sunday morning at the regular time.

The usual working hours of men employed during the day in the following departments or sections of departments will on and after November 1, 1918, become 9 hours:

Machine shop.
Iron foundry.
Steel foundry.
Blacksmith shop.
Boiler shop.
Frog and switch shop.
Pattern shop.
Shop yard.
General ironworkers.
General oxy burners and helpers.
Sheeters.
General riggers.
General pipefitters.
Tinsmith shop.
Carpenters.
Painters.
Standard gauge car repairmen.
Scale repairers.
Bricklayers and helpers.
Roundhouse.
Electrical repair shop and linemen.
Stores.

That this revision of rates become effective November 1, 1918.

That the wage rates established as a result of this revision remain in force during the ensuing period of twelve (12) months, that is, to November 1, 1919.

All of which is respectfully submitted.

Dated at Toronto, November 14, 1918.

(Sgd.) F. R. POWELL,
Chairman.
(Sgd.) FRED. BANCROFT.
(Sgd.) H. H. DEWART.

Minority Report

To the Minister of Labour,
Ottawa, Ont.

Dear Sir,—

The report and award of the Board of Conciliation and Investigation into the disputes between the Algoma Steel Corporation and Algoma Construction and Engineering Company and their employees, as set out in the report and award is a unanimous one with the exception of two items, regarding which I submit a separate, and in the case of the last item only, a minority report.

The first item is contained in the report of the Board, under the reference of the Minister of Labour, as the Algoma Steel Corporation and Algoma Construction and Engineering Company, employers, and their employees, being steel workers and members of Algoma Lodge, No. 5, Amalgamated Association of Iron, Steel and Tin Workers of America, employees, and the item mentioned is referred to in the report of the Board under the caption "As to Recognition."

In the third paragraph under this heading the majority members of the Board state:

"The majority of the Board of Conciliation is of opinion that this question of the recognition of unions by the said steel corporation should be left over for solution and determination until after the war and until the war conditions are passed and until after the said first day of November, 1919, and that the Board should not now express any opinion on this question of recognition."

In the paragraph immediately after the foregoing one in the report, the majority members of the Board, in my opinion, contradict this conclusion by expressing an opinion.

They state: "The said steel corporation has filed with this Board a written statement of its policy regarding its relations with its employees, and therein recognized the right of its employees to 'bargain collectively' by departments or sections of departments where these alone are concerned or by a representative group of employees when all are concerned. This Board is of opinion that with this right thus secured to the employees with perfect freedom in its application, it is not now necessary to deal with the question of recognition while the war lasts and until the said November 1, 1919."

In the foregoing, the majority members state it is not necessary now to deal with the question of recognition because of a "right thus secured." An inference may be taken from this, that this right has been secured in lieu of recog-

nition. Such an inference would be wrong.

By consent of both parties the channels of communication existing before the Board was constituted are to continue.

The majority members of the Board also state in the second paragraph of this section of the report that the answer of the corporation to the demands of the unions for recognition is as follows:

"To all of these demands for recognition the steel corporation has made it clear that it refuses to recognize or to sign agreements with such trade unions or to deal with the officials of unions as such, in matters relative to wages and working conditions in the plant."

The majority members of the Board in my opinion should not have expressed opinions on the subject of recognition when they decided not to make recommendations on the subject, and the statement about a "right thus secured" being given as a reason for laying it over is an opinion used as stated.

It is quite plain from the report that both parties were satisfied to continue existing channels of communication for presenting grievances, failing acceptance of any of the schemes proposed before the Board. I take issue therefore with the form of the report under the caption "As to recognition," and submit a report as follows:

As to Recognition:

The question of recognition came up many times during the sessions of the Board of Conciliation at Sault Ste. Marie. Representatives of Algoma Lodge, No. 5, Amalgamated Association of Iron, Steel and Tin Workers of America, the Railway Trainmen's Organization, and the International Brotherhood of Electrical Workers, Local 726, all of which unions applied for Boards—and the differences were references to the Board as constituted—asked for recognition and in two cases for signed agreements. Other representatives of employees who came before the Board when its powers were widened, to cover other branches of the industry, also asked for recognition, including the International Moulders and Coremakers Union, and International Association of Machinists, and several others were mentioned.

Much discussion took place as to the definition of "recognition" and the meaning of "collective bargaining."

It was suggested that the men's representatives make a proposal reflecting their idea on collective bargaining. On Oct. 31 the representatives of the employees presented a memorandum embodying an idea that the "Federated Body of the Algoma Steel Corporation" appoint a representative to act as mediator in presenting grievances to the company officials, in conjunction with departmental committees.

The vice-president of the company presented during the last day's session a very carefully compiled and comprehensive scheme for electing departmental representatives and committees, to provide channels to take up any differences that may arise. This was given to the representatives of the employees for consideration, so that a reply could be made to the Board later, and in time for the drafting of the final report. The following reply from President E. Dalrymple of Algoma Lodge, No. 5, makes the position quite plain:

(Copy.)

Algoma Lodge, No. 5, A. A. of I. S. and T. W. of N. A.,
Sault Ste. Marie, Ont.,
November 8, 1918.

F. R. Powell,
Judge's Chambers,
Parry Sound, Ont.

Honourable Sir,—

I take pleasure in submitting to you the feeling in general of the employees of the Algoma Steel Corporation in regard to Capt. Kyle's proposition, which was presented to the Board of Conciliation and Investigation here before adjourning on the second inst., regarding selecting and meeting of committees of his employees. I made a special effort endeavouring to place Capt. Kyle's proposition before the employees in the different departments throughout the steel plant as suggested by you. The employees in general requested me to inform you, as chairman of the Board of

Conciliation, that they could not accept Capt. Kyle's proposition, but that they were quite willing to drop the subject of recognition and to revert back to Capt. Kyle's adopted rules of June, 1917, and the channels set forth for the meeting of committees and adjusting disputes. So long as the committees representing the different departments throughout the steel plant have the privilege of meeting the heads of their respective departments, and in failure there to adjust their disputes or grievances, to proceed to the highest officials of the corporation, that the employees will be contented. On behalf of the employees of the Algoma Steel Corporation, please accept a hearty vote of thanks for your efforts towards conciliation.

I remain

Fraternally yours,

(Sgd.) E. DALRYMPLE,
President.

In the case of the electrical workers, the method of presenting grievances is mutually agreed upon as shown in the documents included in the report on that reference. In the schedule of the engineers and firemen, and the conductors and brakemen, representative committees are arranged for in the documents mutually agreed upon.

Neither party in question was disposed to accept the proposal of the other relating to recognition or collective bargaining, and all agree that, such being the case, the channels for presenting differences which arose between the employer and employees, before the Board was constituted, shall continue during the period agreed upon as applying to wages, etc., except as otherwise set out in the various reports of the Board of Conciliation.

The company officials made it perfectly clear before the Board that a policy of non-discrimination between union and non-union men was carried out in the plant, and that not the slightest objection was raised to men joining their respective unions. Therefore the reason why the Board does not make recommendations on recognition is because of the mutual acceptance of conditions in this respect as they existed before the Board sat, failing mutual acceptance of one of the schemes presented and not because of any secured right.

I respectfully suggest that next time a readjustment of wages and conditions becomes necessary that the officials of the company will seriously consider direct negotiations with the representatives of the international unions existing in their plant.

With regard to clause "C" of General Rules, and Clause 21 of Special Rules as set out in the documents in the report of the dispute between the Algoma Steel Corporation and its engineers, firemen, and conductors and brakemen, all the rules and schedules were agreed upon with the exception of these two. The majority report states:

"As to Rules 'C' and '21' of the General Rules—the majority of the Board thinks that as the work is of a hazardous character, both in respect to transportation and other employees, and as these rules aim at safety, they are reasonable and proper and should be established.

"Clause 'C' in the General Rules states:

"Employees must pass the required examinations.

"Clause '21' of the Special Rules states:

"No person defective in hearing, sight, or colour perception, shall be employed in any branch of the service involving the use of signals or the movement of trains and engines. All persons thus employed will be required to pass an examination by the authorized oculist and examiner of the company as to their hearing, sight, and ability to distinguish colour."

The representatives of the engineers and firemen and the conductors and brakemen strenuously fought these two clauses. That the work is hazardous and dangerous, all will agree. A glance at all the rules the men accepted will show that they are fully alive to the necessity of every precaution necessary for their own and fellow employees' safety. They pointed out that the transportation was purely a yard service, and that the equipment and rolling stock did not have to meet the requirements of the yard services which come under the jurisdiction

of the Dominion Railway Commission. They wanted to know, this being the case, why should the men be subjected to examinations which related to other standards. Their opposition was strong to the last moment of the sessions. The officials of the company declared that in the interests of safety, the examinations were absolutely necessary. Clause 21 was intended to cover present employees as well as new employees. Everyone agrees that safety in connection with such work is absolutely necessary, and I am convinced the men realize this as much as the company. It would appear from the men's objections throughout that more may be involved in this question than safety.

I therefore recommend against the two clauses as they stand.

As all matters were agreed upon in this reference except three points, two of which have been settled unanimously by the Board in their award, it would be very unfortunate if these two clauses should stand in the way of a complete settlement. I therefore recommend that unless these two clauses can be adjusted and mutually agreed upon by both parties, that the Board of Appeal, consisting of experienced and practical railway men, should be asked by one or both parties to decide on what is fair and just in this regard.

All of which is respectfully submitted.

(Sgd.) FRED. BANCROFT,
For the employees.

Toronto, Nov. 18, 1918.

Report of Board in Dispute between various Elevator Operators at Port Arthur and Fort William, and certain of their employees

A UNANIMOUS report was received from the Board established to deal with the dispute concerning wages and hours between various elevator operators at Port Arthur and Fort William and their employees, members of Local No. 934, International 'Longshoremen's Association. The Board was composed as follows: The Honourable Mr. Chief Justice T. G. Mathers, Winnipeg, chairman, appointed on the joint recommendation of the other two Board members, Messrs. E. L. Taylor, K.C., Winnipeg, and L. L. Peltier, Fort William, nominees of the companies and employees respectively. Recommendations as to settlement of matters in dispute were made by the Board, and it is understood that these recommendations were acceptable to both the companies and the employees.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the various elevator operators at Port Arthur and Fort William and their employees, members of Local No. 934, International 'Longshoremen's Association.

To the Honourable
Gideon D. Robertson,
Minister of Labour, Ottawa.

Your Conciliation Board in the above matter, consisting of Honourable T. G. Mathers, Chief Justice of the Court of King's Bench for Manitoba, Edmund L. Taylor, K.C., of Winnipeg, and L. L. Peltier, of Fort William, begs to report as follows:

Sessions of the Board were held at Fort William on November 12, 13, 14, 15, 19, 20, and 21, 1918, and at Winnipeg on November 26, 27, and 28, 1918.

At the opening session we were attended by Mr. James Dixon, Mr. William Gray, and Mr. William Sinclair, vice-president, secretary-treasurer, and member of the executive of Local No. 934 of the International 'Longshoremen's Association, representing the employees; and by Mr. J. R. Murray, for

the United Grain Growers Company, and Mr. G. F. Briggs, for the Empire Elevator Company and Thunder Bay Terminal Elevator Company.

At subsequent sittings of the Board, either at Fort William or Winnipeg, the following elevator companies were represented:

The Mutual Elevator Company, by Mr. Frederick Bole;
The North Western Elevator Company, by Mr. Harry Sellars;
N. M. Paterson & Company, Limited, by Mr. Norman Paterson;
C. P. R. Elevator Company, by Mr. A. F. Hawkins, Mr. R. C. Morgan, and Mr. Smart;
The Western Grain Growers, by Mr. C. Whelply;
The Grand Trunk Elevator Company, by Mr. R. F. Edmond and Mr. Byers;
The Western Terminal Elevator Company, by Mr. F. W. Cummings;
The Fort William Elevator Company, by Mr. David Horn;
The Ogilvie Elevator Company, by Mr. Cossett;
The Parrish & Heimbacker, by Mr. W. L. Parrish;
The Dwyer Elevator Company, by Mr. J. Delamater;
The Eastern Elevator Company, by Mr. R. D. Morgan;
The Dominion Government Elevator, by Mr. J. P. Jones;
The National Elevator Company, by Mr. N. L. Leach and Mr. Cunningham;
The Port Arthur Elevator Company, by Mr. E. W. Kneelands and Mr. McKinnon;
The Saskatchewan Co-operative, by Mr. E. G. Isaacs and Mr. McCallum;
The Roy Elevator, by Mr. John King;
Black's Elevator, by Mr. G. F. Briggs;
Empire Elevator, by Mr. G. F. Briggs and Mr. John A. Campbell.

The employees desired to bring about some arrangement with the various companies and parties operating elevators at the said points, whereby they might enter into some common agreement with the operators. It was found, however, after considerable effort in this direction that no such agreement could be reached.

The members of the Board then suggested that possibly the parties to the dispute could agree upon the rates of pay, hours of working, working conditions, and other matters pertaining to the employment of labour, and that after an agreement had been reached all these matters could be put into the form of a schedule, this schedule to be adopted by all of the elevator operators, each operator to publish it in the form of a little booklet for distribution to all of its employees. This suggestion was adopted by all parties, and we are glad to be able to report that complete unanimity was ultimately reached in the making up of the schedule. The schedule in question is hereunto annexed and marked Exhibit "A" to this report.

In regard to employees still out of employment at the time the Board began its sessions, we have to report that we were able during the time the Board was sitting to arrange for several of such employees to resume work, and at the present time only a very few of them are without employment. A number of the strikers have obtained employment in other lines of labour, and are satisfied with their new employment, and will not likely return to the elevator work. We fully expect that any of the employees still without work will be taken back as soon as there is any vacancy for them.

In regard to the striking employees who have been taken back, it is the opinion of the Board that such employees ought not to lose their seniority earned prior to the strike.

The members of the Board visited the elevators in Port Arthur and Fort William, with a view to having definite knowledge as to their sanitary conditions and provisions made for the comfort of the men in the way of cleanliness, eating, and other necessary working conditions. We may say that gen-

erally the conditions in these elevators are not as good as ought to be expected. We found a notable exception in the case of the new elevator of James Richardson & Sons being constructed at Port Arthur, and also in the new elevator of the Saskatchewan Co-operative Elevator Company at this point. These two elevators have made ample sanitary provisions, and also excellent provisions for lunch rooms, wash rooms, and other conveniences for the comfort of the labourers.

As to the remaining elevators, while some are no doubt better than others, there is a considerable lack in all of these necessities, and we are of the opinion that the cost of making suitable improvement in most of the elevators would not be excessive, having regard to the cost of the elevators and the importance of the work carried on in the same. We would therefore recommend to your Department that you urge upon the various elevator operators at these points to make considerable improvement along the line of better sanitary and other conditions for the comfort, cleanliness and health of the men working in these elevators.

In schedule hereunto annexed marked "B" we give the result of our inspection of the several elevators as to the conveniences supplied for the comfort of the men employed.

Before closing, we desire to express our appreciation of the courtesy, candour, and good temper with which the enquiry was conducted by both the representatives of the men and of the operators and the conciliatory spirit which animated them throughout. We hope and believe that if their relations in the future are animated by the same spirit it will make for industrial peace.

Dated at Winnipeg, November 28, A.D. 1918.

(Sgd.) T. G. MATHERS,
Chairman.
(Sgd.) E. L. TAYLOR,
For employers.
(Sgd.) L. L. PELTIER,
For employees.

SCHEDULE "A."

The following are the rules, regulations, and working conditions under which men are employed in the elevator of this company, effective on and after November 1, A.D. 1918.

1. (a) The hours of labour shall be 10 hours per day for each and every recognized working day, from 7.00 a.m. till 6.00 p..m, with one hour for dinner from 12.00 noon to 1.00 p.m., from the opening of navigation till December 31.

(b) From January 1 to the opening of navigation the hours of labour shall be eight hours per day for each and every recognized working day, from 8 a.m. till 5.00 p.m., with one hour for dinner from 12.00 noon to 1.00 p.m., except that hourly men employed in private non-storage inland cleaning elevators may enter into an agreement with their employer for not less than two weeks, to work one or two hours' overtime, up to 10 hours on week days only, at hourly rates; otherwise, they will be paid overtime rates for overtime worked as provided in this agreement.

(c) The rate of pay shall be fifty (50) cents per hour.

(d) Where it becomes necessary to run a night gang, 10 hours shall constitute a night's work, from 7.00 p.m. till 6.00 a.m., with one hour for supper from 12.00 midnight till 1.00 a.m., at the rate of fifty-three (53) cents per hour.

2. (a) Except in cases of emergency, for all monthly men the hours of labour shall be 10 hours per day for each and every recognized working day, the hours to conform with those of the hourly men.

(b) All monthly men receiving $105.00 or less per month prior to September 1, 1918, shall receive $120.00 per month, and all monthly men receiving $115.00 and over $105.00 per month, prior to such date, shall receive $130.00 per month, and all monthly men receiving $125.00 and over $115.00 per month prior to such date shall receive $140.00 per month.

(This paragraph does not refer to night watchmen.)

(c) No employee who, at the time these rules take effect, is in receipt of a larger wage than as provided in the preceding sub-paragraph (b) shall be reduced because of this clause.

3. All hourly men working overtime shall be paid at the rate of time and one-half up to midnight and double time after, and all hourly men working in the night gang shall be paid time and one-half for all time worked after 6.00 a.m. and up to 12.00 noon, and double time after.

4. There shall be no extra or overtime allowed to monthly men unless otherwise agreed, but they shall be entitled to two weeks' holidays in the year with full pay, or two weeks' extra pay instead of such holidays; such holidays to be taken at a time to be mutually agreed upon or at a time fixed by the employer, giving the employee two weeks' notice in advance.

5. Hourly men working on Sundays and legal holidays as hereinafter defined shall receive time and a half, except when entitled to double time as provided in paragraph 3.

6. Where night men in any particular case desire to work till 7.00 a.m. while waiting for street car, they may, with the consent of the employer, do so at straight time for the hour from 6.00 to 7.00 a.m.

7. (a) When the operating staff is reduced for any cause the reduction shall be made according to juniority of service, beginning with the junior employee, with due regard to competence.

(b) When the staff is increased the employee or employees so laid off shall be re-employed according to seniority of service beginning with the senior men, with due regard to competence.

(c) Employees laid off upon reduction of staff shall leave their addresses with the superintendent of the elevator and the superintendent shall give them three days' notice in writing when to return to work. Any employee not leaving his address or not presenting himself within that period shall forfeit his rights. In case of emergency the three days' notice may be dispensed with. Any dispute growing out of the application of sub-classes (a), (b) and (c) of this section shall be adjusted under the provisions of Article 11.

8. All men shall be paid twice a month.

9. In hiring and discharging men there shall be no discrimination between union and non-union men, or for any other cause.

10. The following shall constitute legal holidays, namely: Labour Day, Thanksgiving, Christmas, New Year's, Good Friday, Victoria Day, King's Birthday, and Dominion Day.

11. (a) When any difference arises between any employee and the foreman or superintendent, the employee shall have the right to a hearing before the superintendent, and may there have the assistance of a fellow employee in the same elevator chosen by him. If a satisfactory settlement of the difficulty cannot be arrived at by this means it shall be immediately taken to arbitration. For the purpose of such arbitration the employee and the employer shall each, within five days, choose one representative, these two to agree upon a third party. In the event of their being unable to agree upon such third man he shall be named by the Senior or Junior Judge of the District of Thunder Bay. The three men so chosen shall constitute a board of arbitration, and the decision of any two of them shall be final and both parties shall abide by said decision. If the employee has been discharged or suspended and the board of arbitration decides that he shall be reinstated, he will be entitled to his pay for the time lost; but in no case and under no circumstances will a suspended or discharged man have the right to remain at work in the elevator until the arbitration board shall have given their decision.

12. These rules, regulations, and rates of pay shall become effective on and after November 1, A.D. 1918, and shall continue in force until August 31, A.D. 1919, and thereafter unless either party gives to the other notice on or before August 1, 1919, of his or their intention to terminate them on August 31, 1919. If no such notice is given they shall continue in force after August 31, 1919, until terminated by either party giving to the other 30 days' notice. In the event of this schedule of rates, hours of labour, and working conditions being terminated, and the parties not being able to agree upon a new schedule, then both parties agree to submit such dispute to a conciliation board to be appointed by the Minister of Labour.

SCHEDULE "B."

This is Schedule "B" to the report of the Conciliation Board appointed *re* dispute between elevator operators at Fort William and their employees, being members of Local No. 934, International Longshoremen's Association.

C. P. R. Elevator A.—Operated by Eastern Terminal Elevator Company.—No water in building. Box closet on ground floor, flushed intermittently; odour bad. No lunch room for men. Water for fire protection in building.

C. P. R. Elevator B.—Operated by Grain Growers Grain Company.—Drinking water supplied in buckets. Box closet in basement, not flushed; odour bad. Water for fire protection in building. No lunch room.

C. P. R. Annex E.—Operated by Grain Growers Grain Company.—No closet; men use closet in B. No water or other accommodation.

James Richardson.—New elevator, Port Arthur.—In course of construction. Closet, wash-room and urinals in concrete room; one for foreigners and other for English-speaking. Separate lunch rooms; heated. Drinking water supplied. All very satisfactory.

Saskatchewan Co-operative Elevator, Port Arthur.—Closet and wash-room and lunch room adjoining; well heated and comfortable; modern plumbing; facilities for heating lunches. City water on. Very satisfactory.

Grain Growers Elevator, Port Arthur.—Outside box closet. Detached lunch room, heated by stove. Drinking water brought in pails from Saskatchewan building. City water not in building, but hydrant about 100 yards away.

C. N. R. Elevator, Port Arthur—Operated by Port Arthur Elevator Company.—Outside box closet on dock for men; door broken. Water closet in engine-room for office staff. Drinking water brought in buckets from Woodside's foundry, about 400 yards. Detached lunch room. No water or washing accommodation supplied. Informed plans out for new building which will contain all modern improvements.

Davidson & Smith's Elevator.—Water closet

for men in engine-room, with wash basin; warm and comfortable. Drinking water has to be carried about a mile. Comfortable lunch room, steam-heated, above garage.

Government Elevator.—One closet and urinal in detached transformer building; warm. Outside box closet on dock also. Drinking water mile away, brought in buckets. At present no lunch room. Detached room now occupied by military guard; can be used for this purpose when guard leaves. This room quite suitable and warmed with cook stove. Room in transformer building not occupied could be used as lunch room. Is also outside closet in detached wooden shack used by men.

Thunder Bay Elevator Company.—Outside closet for men on wharf. Drinking water kept in pail in office. At present no lunch room or washing accommodation. Propose using building now occupied by military guard.

Empire Elevator Company.—Outside closet for men on wharf. Drinking water kept in galvanized iron tank outside. No washing accommodation. No lunch room. Men take meals in engine room.

Grand Trunk Pacific Elevator.—Outside pit closet in unheated building. Washing accommodation in boiler room; hot and cold water. Detached heated lunch room. Washing accommodation there also. Drinking water kept in tank and pails around elevator, with wooden covers.

Roy Elevator.—Outside pit closet. Drinking water supplied at city tap in office. Lunch room, heated, in millwright shop. Intend putting in steam heating in flour mill next spring and will then put in modern improvements.

Parrish Elevator.—Closet and wash-room in detached office building for use of all employees; warm and comfortable. Drinking water in wash-room. Detached lunch room, with stove when required; only one employee takes meals at elevator, and he takes them in office.

C. P. R. Elevator D.—Three-seat warm water closet off engine-room; not particularly clean, but can be made so. Lunch room above carpenter shop, with tables and benches; electrically heated. Drinking water at tap in engine-room, and wash bowl; also one in millwright shop adjoining. Building at present occupied by military guard would make a very suitable and comfortable lunch room for the men when the guard leaves.

Western Terminal Elevator.—Closet in basement of office building, with wash bowl; city water in taps. Separate lunch room for foreigners; others eat in the office and millwright shop.

Fort William Elevator.—Outside box closet on dock. No city water. Drinking water carried in buckets. Men lunch and wash in engine-room. City water 100 yards away.

Consolidated Elevator Company.—Water closet in basement of office building, warm and comfortable, opening from outside, with wash basin there also. Drinking water carried in buckets. City water not on, but electric pump supplies water for closet. Lunch room in detached building with stove heater.

Mutual Elevator Company.—Closets with wash-room and urinal in basement of power-house; warm. Drinking water at tap. Lunch room for foreigners, stove heated. Others lunch in office.

Black's Elevator.—Outside pit closet. Men lunch in outer office, where there is wash-bowl and drinking water. Quite comfortable.

North Western Elevator.—Outside pit closets. Heated lunch room. No washing accommodation. Drinking water brought in buckets from Mutual. City water on in summer, but off in winter. Intend building drier plant in spring, and will then put in modern improvements.

Report of Board in Dispute between the Polson Shipbuilding Company, Toronto Shipbuilding Company, and Dominion Shipbuilding Company, Toronto, and their ship-carpenters, caulkers, joiners and wood-working machinists.

A REPORT was received from the Board established to deal with the dispute concerning wages between the Polson Shipbuilding Company, Toronto Shipbuilding Company, and Dominion Shipbuilding Company, Toronto, and certain of their employees, being ship carpenters, caulkers, joiners and wood-working machinists, members of the United Brotherhood of Carpenters and Joiners of America. The Board was composed as follows: Mr. J. A. McAndrew, chairman, appointed on the joint recommendation of the other two Board members, Messrs. Jas. G. Merrick and John Doggett, nominees of the company and employees respectively. The award, which was signed by the chairman and Mr. Doggett, contained certain recommendations as to the settlement of the dispute. Mr. Merrick did not concur in these findings and presented a minority report and requested that the matter be referred to the Labour Appeal Board.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Polsons Shipbuilding Company, Toronto Shipbuilding Company, Dominion Shipbuilding Company, employers, and certain of their employees, being ship carpenters, caulkers, joiners, and woodworking machinists, members of the United Brotherhood of Carpenters and Joiners of America, employees.

The Honourable the Minister of Labour having, on November 2, A.D. 1918, in pursuance of the provisions of Section 6 of the Industrial Disputes Act, 1907, established a Board of Conciliation and Investigation to be constituted as in the said Act provided, to which Board the above dispute was referred, and the Board so established having been constituted as in the said Act provided by the appointment by the Honourable the Minister of Labour of Mr. James G. Merrick, of Toronto, Ont., and Mr. John Doggett, of Toronto, Ont., as members thereof on the recommendations of the employers and the employees respectively, and of Mr. J. A. McAndrew, as a member thereof upon the recommendations of Messrs. Merrick and Doggett, and the Board so constituted (Mr. J. A. McAndrew being chairman thereof) having forthwith proceeded to deal with the matters referred to in the applications for the appointment of such Board and the statements and declarations accompanying such applications, reports as follows:

1. A preliminary meeting of the members of the Board was held at the office of the chairman, Lumsden Building, Toronto, on November 12, 1918, when it was arranged that the Board should meet at the City Hall, Toronto, on Thursday, November 14, at 10 o'clock a.m., and proceed with the investigation. The Board accordingly met at said time and place, and the respective oaths of office as provided in the Act were taken by the members and filed. There were present, Mr. George McKellar, representing the Dominion Shipbuilding Company, Limited, Mr. H. H. Miller, representing Polsons Iron Works, Limited, (wrongly described in the application as the Polson Shipbuilding Company), and Mr. Manley, representing Toronto Shipbuilding Company, Limited. The Board decided to appoint the following day, Friday, November 15, at 10 a.m., at the same place, to hear any statement or evidence which either party to the dispute might desire to bring before the Board. The Board deemed it expedient with a view to, if possible, bringing about a settlement of the dispute, which was one only in regard to the rate of wages, to ascertain what other, if any, matters were in dispute between the parties. A draft agreement submitted by the employees to the employers and including, in addition to a clause providing for wages at the rate of 80c per hour, clauses dealing with the number of hours to constitute a day's work, night shifts, overtime allowance, work on holidays, duration of agreement, settlement of grievances and other matters, was produced. The balance of the morning session on November 14 was occupied in ascertaining the views of the employers' representatives on the various clauses. During the afternoon of that day the members of the Board visited successively the yards and works of Dominion Shipbuilding Company, Limited, Polsons Iron Works, Limited, and Toronto Shipbuilding Company, Limited, all situated on the water front of the City of Toronto, and familiarized themselves with the character of work being done by the employees and the conditions under which such work was carried on.

3. On Friday, November 15, at 10 a.m., the Board again met at the City Hall, Toronto, there being present the same representatives of the employers as on the previous day; and as representatives of the employees, Messrs. F. Watkinson and John Cottam, business agent and secretary respectively of the organization to which the employees are

attached. After statements by Messrs. Watkinson and Cottam setting forth the claims of the employees for increase of the wage rate and the reasons therefor, and efforts made to adjust the dispute before making application under the above Act, the following witnesses in support were called and examined: Messrs. Ernest Davis, employee of Toronto Shipbuilding Company; John Stavert and John Stewart, employees of Polsons Iron Works, Limited, and John Raymond and John Ewan, employees of Dominion Shipbuilding Company, Limited. Statements setting forth what were claimed to be the necessary annual outlay for food, clothing, rent, etc., for an average family of the employees, and the tools and cost thereof, necessary for such employees, and a copy of an agreement signed on behalf of Dominion Shipbuilding Company, Limited, and of the employees were filed. Statements in answer to what had been put forward on behalf of the employees were made by the several representatives of the employers present, and subsequently Mr. Manley submitted lists of tools and value thereof said to be owned by the various employees of Toronto Shipbuilding Company, Limited. The Board, before adjourning at 5 p.m., announced that it would meet the following day at 11 a.m. to consider the draft agreement submitted on behalf of the employees to the employers prior to the application for a Board of Conciliation, and the objections thereto made by the employers, and would endeavour to draft such amended agreement as might be acceptable to both parties, the same to be submitted at a meeting of the Board at the same place on Monday, November 18, at 10 a.m., at which representatives of the employers and employees would be present.

4. The Board met at the City Hall on Saturday, November 16, and during its session, between 11 a.m. and 1 p.m., prepared a draft agreement covering all the matters referred to in the agreement submitted by the employees, the rate of wages being left blank.

5. The Board met at the City Hall on Monday, November 18, at 10 a.m., there being present, in addition to all the members of the Board, Messrs. Manley and Miller on behalf of the employers, and Messrs. Watkinson, McCallum and Day, of Toronto District Council of Carpenters, on behalf of the employees. The suggested agreement drafted by the Board was considered clause by clause. After some alterations had been made, most of the clauses were acceptable to both parties, but upon the vital matters of hours to constitute a day's work, the rate of wages and the duration of the agreement, the parties could not agree. After a full day's session and every attempt made to effect a settlement of the dispute referred to the Board, and incidentally of other matters which might be cause of friction or dispute, and neither party having any further evidence or information to lay before it, the Board announced that it would fully consider the matter in dispute and make its report to the Honourable the Minister of Labour as expeditiously as possible.

6. During the enquiry into the dispute and all matters affecting the merits and a right settlement thereof, the following facts and circumstances were ascertained:

(1) An agreement, a copy of which is annexed to this report and marked "A", was entered into between Dominion Shipbuilding Company, Limited, and Local Union No. 1756, Ship Carpenters, Joiners and Caulkers and Wood-working Machinists, and the two other companies, parties to this dispute, although not having executed such agreement, were complying with the terms thereof when this dispute arose.

(2) When this dispute arose the rate of wages being paid these ship carpenters, joiners, caulkers, and woodworking machinists was 55 cents per hour.

(3) On behalf of these employees a new agreement, a copy of which is annexed and marked "B", was submitted to the employers, and attempts made by con-

ferences between representatives of the employees and representatives of the several employers to arrive at a settlement of this dispute.

(4) None of the employers would agree to accede to the claim made on behalf of the employees for a wage rate of 80 cents per hour. Dominion Shipbuilding Company, Limited, offered a flat rate of 70 cents per hour, which offer was subsequently made conditional upon the other employers paying the same rate. This company has been paying for a short period prior to the reference of this dispute to this Board to some of these employees wages at the rate of 70 cents per hour, and to the others of their employees wages at the rate of 65 cents per hour. A representative of Polsons Iron Works, Limited, during negotiations for settlement of the dispute prior to application and reference thereof to a Board of Conciliation offered a rate of 67½ cents per hour, which offer was subsequently amended by the company to 65 cents per hour. Toronto Shipbuilding Company, Limited, offered during such negotiations a rate of 65 cents per hour, and at the time when application was made for a reference to a Board was paying some of their employees 65 cents and others 60 cents per hour.

(5) After htis Board had been constituted, and before its first session was held, the armistice between the Allies and Germany was signed, and in view of the changed conditions which it was thought would arise by reason of the probable early proclamation of peace, the employers declined to renew the offers made as set forth in the preceding paragraph hereof and withdrew same, claiming that the rates prevailing before the dispute arose should prevail.

(6) Until the month of April, 1918, the rate of wages of these employees was 45 cents per hour.

7. The Board met at the office of Mr. Merrick on November 19, and during a session, from 11 a.m. to 1 p.m. and from 2 to 3 p.m., having carefully enquired into the dispute and all matters affecting the merits thereof, and having made all such suggestions and done all such things as it deemed right and proper for inducing the parties to come to a fair and amicable settlement of the dispute, considered the matter fully and endeavoured to arrive at unanimous findings from the facts and circumstances and recommendation for settlement of the dispute according to the merits and substantial justice of the case.

8. The Board adjourned to meet again on November 20, at 2 p.m.

9. The undersigned members of the Board find and recommend:

(1) That none of the employers should reduce the wages of any of their employees below the rate being paid by it on November 11, 1918.

(2) That in order to standardize wages as far as possible, such of the employers as were on November 11, 1918, paying their employees a rate of wages lower than 65 cents per hour should pay a minimum rate of 65 cents per hour.

(3) That the rates mentioned should be paid as and from the date of the order of the Honourable the Minister of Labour establishing this Board, namely, November 2, 1918.

(4) That the rates mentioned should continue for a period of six months from November 11, 1918, and for successive periods of six months after May 11, 1919, unless either party shall have given to the other at least 30 days before May 11, 1919, or before the expiration of any of such successive periods of six months, notice of his desire to change such rates, in which event the rates mentioned should be no longer binding upon either party at the expiration of the period during which such notice is given.

All of which is respectfully submitted to the Honourable the Minister of Labour.

(Sgd.) J. A. McANDREW,
Chairman.

(Sgd.) JOHN DOGGETT,
Member of the Board.

November 20, 1918.

"A".

INTERIM AGREEMENT.

Schedule of wages and hours entered into by and between shipbuilding companies in Toronto, known as the Party of the First Part and Local Union No. 1756, Ship Carpenters, Joiners and Caulkers, and Woodworking Machinists, known as the Party of the Second Part.

1. This agreement shall cover the period as from April 22, 1918, until such time as the shipbuilding companies and shipbuilding employees agree upon a standard wage for all ship carpenters, joiners and caulkers, and woodworking machinists, covering the territory from Port Arthur to Kingston, Ont., but under no circumstances will this agreement be operative beyond April 21, 1919.

2. Wages under this agreement for ship carpenters and joiners and caulkers and woodworking machinists shall be 55 cents per hour. Nine hours per day for first five days of week and 4½ hours on Saturday, making in all 49½ hours per week. The overtime rates shall be as follows: Time and one-half shall be paid for all time between 5.30 p.m. till 12 p.m. for first five days of week, and from 12 noon till 12 p.m. Saturdays. All work performed on Sundays and public holidays, also between the hours 12 p.m. and 7.30 a.m., to be paid at the rate of double time. The following public holidays shall be observed by both parties: New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day, Christmas Day.

3. It is hereby further agreed that representatives of Local Union, No. 1756, of Ship Carpenters, Joiners, Caulkers and Woodworking Machinists shall be allowed access to the yard office, to the yards or shops, at all times. Proper credentials shall be furnished such representatives.

Signed on behalf of Party of the First Part of this agreement:

.....

Signed on behalf of Party of the Second Part of this agreement:

.....

"B".

AGREEMENT.

This agreement entered into by and between ..... Shipbuilding Co. of ....., Party of the First Part, and Local Union No. 1756, U. B. C. and J. of A., also of the city of Toronto, Party of the Second Part.

1. The following conditions shall take effect ....., 1918:

2. Wherever the term carpenters and joiners is used in this agreement it shall mean and include all carpenters, joiners, caulkers, woodworking machinists and other woodworkers, as defined in the general constitution of the U. B.

3. Nine (9) hours shall constitute a full day's work or shift from Monday until Friday, inclusive, to be worked between the hours of ..... a.m. and ..... p.m. On Saturdays half day only shall be worked, quitting time then being 12 noon.

4. More than one shift may be worked whenever deemed necessary by the company, when the hours may be as mutually arranged, but not to exceed in number on any shift more than those mentioned in clause 3. Night shifts shall only be worked five nights per week, and the men so engaged shall receive 10 per cent additional to the ordinary day rate. All overtime on night shifts shall be paid for at double time of the ordinary day rate.

5. All time worked in excess of the hours named in clause 3 shall be considered as overtime and paid for at the following rates: From quitting time until 10 o'clock p.m., at the rate of time and one-half. After 10 p.m. until starting time, all Sundays and the following holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day, Thanksgiving Day, and Christmas Day, shall be paid at the rate of double time. Men called upon to work during the regular noon time shall be paid for such work at the rate of time and half.

6. No work shall be done on Labour Day, except for the saving of life or property, when double time shall be paid.

7. The minimum rate of wages for all carpenters, joiners, etc., as defined in clause 2, shall be not less than 80 cents per hour.

8. All employees shall be paid on a regular pay day at least once every two weeks, in the company's time, and not more than three days shall be kept back.

9. Any man laid off, discharged, or quitting of his own volition, shall receive all that is due him immediately on the termination of his employment whenever possible, but in any event within twenty-four (24) hours.

10. Any complaints and grievances shall be adjusted, if possible, by the foreman in charge. Failing such adjustment, then the representative of the men shall endeavour to reach an adjustment with the employer. Whilst negotiating a settlement of any grievances or complaint in accordance with this clause, there shall be no lockout or strike.

11. Representatives of the carpenters' organization shall be allowed access through the office to the yards or ships at all times. They shall be furnished proper credentials.

12. The employer will acquaint the organization of his requirements as to additional carpenter help, and the organization will assist at all times in providing the necessary number of qualified men.

13. Men engaged upon repair work in or for vessels under repair shall receive 5 cents per hour extra, and double time for all overtime based on the rate mentioned in clause 7.

14. Men sent to work outside their home ports shall receive wages, transportation, and a reasonable allowance per day from the time of leaving their home ports until the time they return.

Signed on behalf of Local Union, No. ....., U. B. of C. and J. of A.:

.....

.....

For the ..... Shipbuilding Co., Ltd.:

.....

(Clause 13 of the above draft agreement is included in this certified copy. It should be, however, noted that against the clause in question appears the marginal note "waived." It is not clear if it is intended that clause 13 should become a portion of the draft agreement.)

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and *re* differences between Polson Iron Works, Limited, the Dominion Shipbuilding Company, Limited, the Toronto Shipbuilding Company, Limited, and certain of their employees, being ship carpenters, caulkers, joiners, and woodworking machinists, members of the United Brotherhood of Carpenters and Joiners of America.

To the Honourable Gideon Robertson,
Minister of Labour,
Ottawa, Ont.

Sir,—

I have the honour to submit the following Minority Report as a member of the Board of Conciliation and Arbitration appointed to settle, if possible, the wage scale between the woodworkers employed on ship construction and the above mentioned firms.

The demand for an increased wage scale was submitted to the firms prior to the date of the armistice which terminated active hostilities in connection with the war, which had such an important bearing on the industrial situation in Canada. Previous to applying to the department for a Board of Conciliation, it is true that various proposals and counter-proposals were discussed between employers and the representatives of the workmen for increases, which could not satisfactorily be adjusted owing to the inability of the firms and men arriving at a basis that could be acceptable to both parties.

It was brought out in evidence that the minimum rate for the classes of men under discussion was 45c an hour until April of 1918. At that time a provisional agreement was entered into, which is set forth in full as Exhibit "A" of the Majority Report, under which the rate was established at 55c per hour, with a proviso under paragraph No. 1 that the agreement was not to be operative beyond April 21, 1919. This agreement was signed by the Dominion Ship-

building Company, but its provisions were agreed to and were being followed by the two other firms without objection.

Taking advantage of the shortage of men and the urgency of the shipbuilding work, the men made individual demands in the yards, with the result that they succeeded in forcing the wages up in the Dominion Shipbuilding Company to 65c and in a few cases to 70c an hour, and at the Toronto Shipbuilding Company to 60c and 65c an hour.

Disregarding the terms of the agreement under Section "A," which looked for the continuance of the basic rate at 55c until April 21 of 1919, the demand was then made for a minimum rate of 80c an hour. The demand for such an extraordinary increase was looked upon as unreasonable by even some of the executive officers of the union.

In considering the facts before the Board, it was shown in evidence that under existing agreements groups of workmen allied with other unions were working on scales of wages more or less in conformity one with another. It was shown that the machinists were under an agreement for a minimum of 55c an hour, the boilermakers at 55c with 3½c an hour increase granted in October of 1918, or 58½c, and with the privilege of hiring new men at 55c. Moulders' and coremakers' rate was shown to be 60c. By the recent appeal award for blacksmiths their rate was established at 62½c.

All these rates were established under war conditions and in face of the fact that men were being taken constantly from the trade and drafted to military service, while at the same time there was the greatest pressure for war production.

The whole industrial situation in Canada has changed since the armistice has been signed. The rate for common labour has already dropped 5c, and men are being engaged, where agreements do not exist, at rates of wages in some cases 10c below the rate paid three weeks ago.

In my opinion there was no necessity to increase the basic rate from 55c to 65c an hour. If it had been considered advisable to increase the rate at all, it could have been adjusted on the 55c minimum. The workers at the 55c rate had already received a 22 per cent increase, and at 65c it means an increase from April of upwards of 44 per cent. This is a rate of advance entirely out of proportion with any claim made on the basis of cost of living, and can only be justified by reason of organization pressure, and not by any condition of the labour market.

I wish to acknowledge my appreciation to the chairman, Mr. McAndrew, and to my associate, Mr. Doggett, for the friendly conferences in connection with the Board, and for the fair manner in which they received the evidence submitted by both sides.

All of which is respectfully submitted.

(Sgd.) JAMES G. MERRICK,
Representaive for the employers.

Toronto, November 25, 1918.

INDUSTRIAL DISPUTES DURING NOVEMBER, 1918

ELEVEN strikes, affecting approximately 3,415 employees, were reported as having commenced during November. There were in existence at some time or other during the month 23 strikes, directly affecting 4,330 workpeople. The total time loss on account of industrial disputes was estimated at 36,843 working days, as compared with 65,969 in October, 1918, and 29,455 in November, 1917. The time loss occasioned by the 11 strikes which began in November was 18,142 working days, while a loss of 18,701 is charged to the 12 strikes commencing prior to November. Termination of disputes was reported in the case of six of the disputes commenced prior to November. Six of the strikes which commenced during November terminated during the month, leaving the following 11 strikes, affecting approximately 1,384 workpeople, on record November 30: pottery workers, St. Johns; iron shipbuilders, Lauzon; moulders, Sarnia; cigarmakers, Hamilton, London, and Montreal; laundry workers, Vancouver; waiters and waitresses, Regina; plumbers and steamfitters, London; moulders, London and Vancouver; pulp and paper workers and boilermen, Ottawa, and coal handlers, St. John, N.B.

Disputes by Industries

The following is a review of the disputes by industries in the order in which these appear in the statistical table. A brief summary is given of the more important strikes.

MINES, METALS, QUARRIES AND CLAY PRODUCTS.—There were four strikes in existence, involving 498 employees and a time loss of 4,477 working days. One of these strikes, that of pottery workers at St. Johns, Que., was carried over from the previous month's record and remained unsettled. The other three strikes, affecting western coal miners, arose during November. The first of these strikes, that at Rosedeer Mine, Wayne, Alta., arose through the men's objection to a system of dockage put into effect by the company without notice. The matter was settled by arbitration shortly after the men went out. Employees in other collieries at Wayne came out in sympathy with those of the Rosedeer Mine, but returned to work upon the settlement of that difficulty.

BUILDING AND CONSTRUCTION.—One strike commenced during the month and remained unsettled, that of plumbers and steamfitters at London, Ont. This dispute involved 30 employees and a time loss of 180 working days.

METALS, MACHINERY AND CONVEYANCES.—The largest number of strikes upon the month's record appear in this group, with seven strikes in existence, involving 579 employees and 10,122 working days. Four of the strikes, namely, painters at Toronto; pipe-

fitters, Nobel; iron shipbuilders, Lauzon, and moulders at Sarnia, were carried over from the previous month's record. The first two strikes were unterminated, but the last two were settled during the month. Three strikes, namely, moulders at London and Vancouver, and rivetters at New Glasgow, commenced during November. In the latter case a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act was established, but a settlement was subsequently reached by direct negotiations.

PULP AND PAPER.—There was one strike in this group—pulp and paper workers at Ottawa—involving 454 employees and a time loss of 4,994 working days. In this case the employees applied for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, but as the industry was one to which the provisions of the Act could be applied only by the joint consent of the parties, and the employers not consenting, no Board could be established; the strike was still in effect at the close of the month.

CLOTHING.—There were two strikes in the clothing group, tailors at Brockville and Ottawa, which involved 99 employees and 510 working days. Both of these strikes were terminated.

TEXTILES, CORDAGE AND CARPETS.—A strike of knitting mill operatives at Toronto, which commenced last spring and involved 88 employees and a time loss of 2,288 working days, was regarded as terminated at the end of November, the employees having secured work elsewhere and conditions apparently being no longer affected.

FOODS, LIQUORS AND TOBACCO.—In the food and tobacco group there was one strike, that of cigarmakers at Hamilton, London and Montreal, carried over from the previous month's record. During November there were but 21 employees affected, involving a time loss of 546 working days, a large number of the employees having secured employment elsewhere.

TRANSPORTATION.—In transportation there were three strikes in existence, involving 2,200 employees and 6,800 working days. All of these strikes arose at St. John, N.B., during November. Freight handlers to the number of 800 presented a demand for increased wages according to the McAdoo award, and after being out for three days a compromise was reached whereby the men received a partial increase. Following the strike of freight handlers, about 1,200 longshoremen ceased work, but went back after a few days, having also received a partial increase. About the same time 200 coal handlers who had been negotiating with shipping companies for something in regard to increased wages, ceased work. The employees had applied for a Board under the Industrial Disputes Investigation Act, which was established, but while Board representatives were arranging as to a chairman the men ceased work, and were still out at the end of the month.

PUBLIC UTILITIES.—In public utilities there was one strike—telephone employees at Regina—which was carried over from the previous month's record. This dispute was settled by negotiations, the employees returning to work upon being promised an increase.

MISCELLANEOUS. — There were two strikes in existence—laundry workers, Vancouver, and waiters and waitresses, Regina, involving 211 employees and 5,486 working days; both carried over from the previous month's record and both unterminated.

INDUSTRIAL DISPUTES DURING NOVEMBER, 1918

Industry or occupation	Particulars.	No. of employees affected	Time loss in working days
	DISPUTES COMMENCING PRIOR TO NOVEMBER, 1918.		
MINES, SMELTERS, QUARRIES, AND CLAY PRODUCTS:—			
Pottery Workers, St. Johns, Que.	Commenced November, 1913. Against reduction in wages. Unterminated.	51	1,326
METALS, MACHINERY AND CONVEYANCES:—			
Iron shipbuilders, Lauzon, Que.	Commenced July 26. Demand for reinstatement of dismissed employees and for recognitionof International Union. Unterminated.	239	6,214
Moulders, Sarnia, Ont.	Commenced September 12, for increased wages and recognition of Union. Unterminated.	9	234
Painters, Toronto, Ont.	Commenced September 28. Protest against the use of a spraying machine. Employees secured work elsewhere.	22	572
Pipefitters, Nobel, Ont.	Commenced June 29. demand for increased wages. Firm reduced staff; men left district. Settled November 1.	25	25
CLOTHING:—			
Tailors, Brockville, Ont.	Commenced September 3, demand for increased wages. Strikers' places filled and conditions no longer affected.	13	338
Tailors, Ottawa, Ont.	Commenced October 12. Demand for increased wages. Agreement signed and increase granted. Work resumed November 4.	86	172
TEXTILES, CORDAGE AND CARPETS:—			
Knitting Mill operatives, Toronto, Ont.	Commenced June 12. Demand for increased wages. Employees secured work elsewhere.	88	2,288
FOOD, LIQUORS AND TOBACCO:—			
Cigarmakers, Hamilton, London & Montreal.	Commenced July 11. Employees at Hamilton presented demands for increased wages and one company operating at Hamilton, London and Montreal closed its doors. General strike or lockout unterminated.	21	
PUBLIC UTILITIES:—			
Telephone employees, Regina, Sask.	Commenced October 23. Government refused to grant Arbitration Board or accept new wage schedule. Settled by negotiations; employees were promised an increase, and work resumed November 11	150	1,500
MISCELLANEOUS:—			
Laundry workers, Vancouver, B.C.	Commenced September 9. For increased wages and Union conditions. Unterminated.	161	4,186
Waiters and waitresses, Regina, Sask.	Commenced September 11. Demands for reduction in working hours. Unterminated.	50	1,300
	DISPUTES COMMENCING DURING NOVEMBER, 1918.		
MINES, MELTERS, QUARRIES, CLAY PRODUCTS, ETC.:—			
Coal miners, (Rosedeer Mine) Wayne, Alta.	Commenced November 18. Men objected to system of dockage put into effect by Company without notice. Settled by Arbitration. Work resumed November 28.	150	1,200
Coal miners, (Western Commercial Co., Ltd.) Wayne, Alta.	Commenced November 18. In sympathy with miners' strike at Rosedeer Mine. Work resumed November 28.	200	1,600
Coal miners, (Excelsior Collieries, Ltd., Peerless Coal Co., Ltd., and Hamilton Coal Company), Wayne, Alta.	Commenced November 18. In sympathy with the coal miners' strike at Rosedeer Mine. Work resumed November 22.	97	291
BUILDING AND CONSTRUCTION:—			
Plumbers and steamfitters, London, Ont.	Commenced November 25. For an increase in wages. Unterminated.	30	180
METALS, MACHINERY AND CONVEYANCES:—			
Moulders, London, Ont.	Commenced November 22. Demand for closed shop and recognition of Union. Unterminated.	32	256
Moulders, Vancouver, B.C.	Commenced November 22. Demand for an increase in wages. Unterminated.	137	1,096
Rivetters, Eastern Car Company, New Glasgow, N.S.	Commenced November 14. Demand for increased piece work rates. Work resumed November 30.	115	1,725
PULP AND PAPER:—			
Pulp and paper workers and boilermen, Ottawa, Ont.	Commenced November 19. Demand for increased wages and better working conditions. Unterminated.	454	4,994
TRANSPORTATION:—			
Freight handlers, St. John, N.B.	Commenced November 22. Demand for increase in wages according to the McAdoo award. Compromised; rates increased 12 cents a day. Work resumed November 26.	800	2,400
Longshoremen, St. John, N.B.	Commenced November 27. For increased wages. Partial increase granted. Work resumed November 30.	1,200	3,600
Coal handlers, St. John, N.B.	Commenced November 27. Demand for increased wages. Unterminated.	200	800

PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1*

THE Canadian Railway Board of Adjustment No. 1 rendered decisions in five cases during November. These comprised the Quebec Railway Light and Power Company and locomotive engineers, conductors and trainmen; the Canadian Northern Railway and telegraphers; the Great North Western Telegraph Company and employees; the Canadian Pacific Railway and freight handlers and station employees; and the Dominion Atlantic Railway and locotive engineers, firemen and conductors.

Case No. 10—Quebec Railway Light and Power Co. and locomotive engineers, conductors, and trainmen

Case No. 10 had reference to the rates of pay of employees on the railway line of the Quebec Railway Light and Power Company. The employees contended that the percentage of increase provided for in the McAdoo Award should be added to the hourly rates that were in effect on their line in 1917 agreements, and that any other application of the McAdoo Award increases would not be dealing fairly with the men in the classes of service mentioned, because it would leave the hourly rates for several classes very low in comparison with standard rates for similar classes of employees on other lines in and around Quebec. They claimed that the spirit and general intent of the McAdoo Award provide for equal pay for equal work and that the various employees should now be conceded a wage rate at least nearly in proportion to the rates paid for similar classes in neighbouring lines. On the other hand, the company contended that the increases provided for in the McAdoo Award should be applied to the schedule in effect in December, 1915; and further submitted that the employees had been paid from August 1, 1918, the percentage increases provided for in the McAdoo Award on the average hourly rates that had been in effect on the line in 1915.

The Board, finding it impossible to reconcile the varied contentions, appointed a sub-committee to meet the officers of the company and the committee representing the employees in an effort to arrange some basis of settlement. It was agreed that if a satisfactory settlement could not be reached, the remaining ten members of the Board would render final decision of the Board on any unsettled questions. After several hours' conference, the following rates of wages per hour were accepted by both parties:

Steam or Electric Way Freight: conductors, 48c; engineers or drivers, 49c; experienced brakemen, 36c; firemen, 36c.

Passenger and Work Steam Trains: conductors, 45c; engineers, 49c; experienced brakemen, 33½c; firemen, 33½c.

Electric Locomotive Passenger or Work Trains: conductors, 45c; drivers, 45c; experienced brakemen, 33½c; trolleymen (usually a fireman), 33½c.

Electric Trains: conductors over one year in service, 42c; conductors less than one year in service, 39c; drivers, 42c; experienced brakemen, 30½c.

The sub-committee advised that certain of the above rates were increases over and above those provided for in the McAdoo Award, and that the company's officers contended that such additional increases should be made effec-

*For other proceedings see LABOUR GAZETTE, October, 1918, pp. 821-2, and November, 1918, pp. 976-9.

tive from September 15, 1918, while the employers contended that the additional increases should be effective as of August 1, 1918. It was agreed to submit this point to the Board at a meeting from which the members of the sub-committee were excluded.

The decision of the Board was as follows:

The Board confirms the wage rates per hour for the various classes of employees specified above, as agreed to between the company and the employees. The Board decides that the additional increases (over and above the amounts provided for by the application of the McAdoo Award to the 1915 wage rates) shall be made retroactive to September 15th, 1918.

Case No. 11—Canadian Northern Railway (Western lines) and railroad telegraphers

Case No. 11 dealt with a dispute as to whether railroad telegraphers on the western lines of the Canadian Northern Railway should be paid for time lost when being transferred from one office to another. This point is governed by Article 7 of the telegraphers' schedule, which is as follows: "When a telegrapher is tranferred by order of the proper official he will suffer no loss of schedule wages in consequence thereof, and will be allowed reasonable time (not to exceed four days and without pay) to arrange for the shipment of his household goods." The men claimed that they should suffer no loss of schedule wages while transferring and travelling from one position to a new one which they had accepted on a bulletin issued by the company. The company, on the other hand, claimed that the men should transfer to positions for which they had applied in response to a bulletin on their own time, and not at any expense to the company, except where they are transferred for the company's convenience.

The decision of the Board was as follows:

In view of the representations of the men that the rule in dispute was incorporated in the Canadian Northern Schedule in toto from the C. P. R. Schedule, which was not disputed by the Company's representative, the Board's opinion is that the same application should be given to the Canadian Northern Railway as is in effect on the Canadian Pacific Railway. Upon enquiry the Board finds that a definite understanding exists as to the interpretation of the C. P. R. Article, which is follows:

"A telegrapher who loses no time from work during the month is entitled to full pay for the month, even though he be transferred from one station to another, and it is necessary to pay two telegraphers at the stations from which, and to which, he is transferred, while transfers are being made. It is not claimed that any additional time should be paid while travelling, at night, for instance, and it is pointed out that in almost all cases the distance is so short that there need be no loss of time.

"If the train service is such that a telegrapher being transferred from one point to another on his own district must spend a day travelling, he would, of course, suffer no loss of schedule wages in consequence thereof."

The Board also finds that under the second clause of this interpretation, telegraphers on the Canadian Pacific Railway are protected against loss of pay for time occupied in transferring from point to point on their own General Superintendent's District.

The decision of the Board, therefore, is that the above interpretation should apply to Article 7 of the Canadian Northern Railway (western lines) Telegraphers' Schedule.

Case No. 12—Great North Western Telegraph Co. and employees

Case No. 12 deals with various matters in dispute between the Great North Western Telegraph Company and its telegraphers, linemen and other employees. The principal questions at issue were the definition of "commercial telegraphers," the inclusion in the wage schedule of certain officers that had not been placed on a percentage basis, the inclusion of sub-chiefs in the wage schedule, the inclusion of gang foremen in the linemen's schedule, the wages of dis-

trict linemen, the date from which the schedule shall be effective, and the employment of students.

With regard to the definition of "commercial telegraphers", the decision of the Board was as follows:

Employees assigned to the commercial telegraph service, whether operated by the Morse system, telephone or any automatic device of any character, or who are required to devote any portion of their time to the transmission or receiving of telegraph matter by any device whatsoever (not including agents, wire chiefs, traffic supervisors or traffic chiefs having authority to hire or discipline employees) will be considered commercial telegraphers within the meaning of the schedule. This does not apply to employees handling such matter by telephone during the act of filing for transmission or delivery. Note.—The Board rules that the company and the committee shall jointly decide for each point what employees con consistently be regarded as having authority to hire or discipline employees.

With regard to the inclusion of certain offices in the wage schedule and the adoption of a scale of salaries proposed by the men, the decision of the Board was as follows:

That managers, agents, and such employees as hold the combined position of manager and operator, or agent and operator, at points where only one operator besides themselves is or may be employed, as well as all operators devoting their time exclusively to the company's work, shall be included in the wage schedule at rates ranging up from $75.00 per month in all offices, except that at certain city branch offices the minimum may be $70.00 per month. This does not apply to commission offices. That ticker operators be included in the wage schedule at a minimum of $60 per month.

From this decision, the company and the men agreed upon rates for all the places named in the proposed scale submitted by the men, with the exception of Calgary, Edmonton, Regina, Moosejaw, Oshawa and St. Catharines, and the rate for chief ticket inspector at Toronto. Rates for these places were fixed by the Board.

During these negotiations a question arose as to the right of the company to have clerks or messengers transmit or receive messages on the wires, the company contending that in offices where there was only an agent-operator such clerks or messengers could be put on the wires without coming under the minimum wage of $75. The men contended that clerks or messengers who devoted any portion of their time to wire work should be classed as Morse telegraphers, and that the minimum salary should apply. On this question the Board ruled that "it is not the intention or desire of the Board to stultify ambition or desire on the part of the clerks or messengers to learn telegraphy, or to prohibit office staffs from lending consistent aid in such direction, but that any such clerks or messengers who are required to perform any portion of their regular service as telegraphers, shall be paid the minimum rate applicable to such position."

With regard to the inclusion of certain sub-chiefs in the wages schedule, the Board referred to their decision on point No. 1, relating to the definition of "commercial telegraphers."

With regard to the inclusion of gang foreman in the linemen's schedule, the Board ruled:

That the position of general foreman shall not be included in the schedule. That gang or permanent foremen and cable splicers shall be included in the schedule and that their rates shall be $115 per month and board, which rates shall be subject to adjustment in the same manner as provided for in decision on point five (relating to wages of district linemen).

The men proposed a wage scale for district linemen of $125 per month and expenses at Montreal and Toronto, and $115 at all other points. The company proposed another scale ranging from $90

to $115 per month. The decision of the Board was:

That rates of pay for linemen shall be established in accordance with the offer of the company with a minimum af $95 per month, which rates shall be adjusted to the same basis and from the same date as revised rates for similar classes of service in corresponding territory are put into effect, which the Board has reason to believe will be accomplished in the near future. Rates as established shall be for the position and not for the individual.

With regard to the date from which the wage schedule should be effective, the Board ruled "That the effective date shall be September 1, 1918."

The company proposed a new rule permitting the employment of Morse students limited in number to 15 per cent of the Morse staff, the students to be paid according to their ability and to be retained in this classification for not longer than one year. The men objected to this rule, and the proposition of the company was denied by the Board.

Case No. 13—C. P. R. Co. (Western lines) and freight handlers

The principal matter in dispute between the Canadian Pacific Railway and freight handlers arose out of a strike* which began at Calgary on September 21, at the conclusion of which a month later the question of the reinstatement of twenty-five employees was left to the Canadian Railway Board of Adjustment No. 1. The Decision of the Board was as follows:

The issue on this point grows out of a claim by the freight shed employees at Calgary, that the company must promote the senior shed checker to assistant shed foreman, or at least offer such position to such senior checker. In the judgment of this Board, the representatives of the employees who waited upon the agent on September 31st, 1918, in connection with this matter, assumed an arbitrary and extreme position that cannot, by any line of consistent reasoning, be sustained.

The Board holds that the employer (the company) has been, and very properly is generally conceded the right to determine who shall be appointed to official positions in the service of the company. The employees' committee do not appear to have adhered to their own stated principle of recognizing "fitness and ability," unless by their attitude they intended to decide that the men should be the judges of "fitness and ability," rather than the officers of the company.

On the other hand, however, the agent was, in the judgment of the Board, lacking in the exercise of the diplomatic patience necessary in dealing with the committee. In stating his position it should have been self-evident that diplomacy and patience were required in dealing with a situation where all the employees of the freight shed had been worked up to the point of stopping in order to show their resentment to the position taken by him.

Both the employees concerned and the agent should have recognized the controversies involved as small and unimportant in comparison with the paramount issues before all Canadian citizens at the time, and all interested should have realized as stated in P. C. 1743, "the necessity of steady work and close and sympathetic co-operation between employers and employees to secure maximum results from war efforts."

The employees' representatives concerned in the commencement of this controversy cannot be excused by any alleged existing conditions, either real or imaginary, for the position taken in permitting the employees in the freight sheds at Calgary to leave the company's service on account of the circumstances involved. The entire occurrence from its inception and for almost one month thereafter was handled by the employees in an unbusinesslike and unstable manner that could not tend to inspire proper confidence and co-operation between employers and organized labour.

The Board finds no reasonable justification for this unfortunate and unnecessary occurrence. The freight shed and other employees at Calgary had no right to stop work at such a time and on such a pretext, and the employees at other points on C.P.R. (Western lines) were not justified in making a bad situation worse by withdrawing from the company's service later, and thereby appearing to countenance the unwarranted action taken by the employees at Calgary.

*See LABOUR GAZETTE, October, 1918, p. 819, and November, 1918, p. 974.

The Board finds, however, that on October 22nd an agreement was reached providing for the return to the company's service, without prejudice, of all employees at Calgary with the exception of twenty-five.

It has not been claimed or shown that any of the twenty-five persons held out of service were involved, nor were they to any extent more guilty of improper acts than the remaining employees who were returned to service on October 22nd. The Board, therefore, now decides that these twenty-five employees shall be returned to the service of the company at Calgary (without pay for lost time) not later than December 15th, 1918, in positions not less remunerative than positions they previously held, such employees to retain any seniority rights they may previously have held.

The second question in dispute had reference to the date when the increased rates under the McAdoo Award should be made effective. It was claimed by the men that in 1917 agreements were made covering certain freight shed employees at Winnipeg, Calgary, Medicine Hat, Lethbridge and Vancouver, that other employees were subsequently taken into membership, and in February, 1918, the various local organizations formed a Western Federation, which became affiliated with Division No. 4, Railway Employees' Department, that the company was notified of this towards the end of March, 1918, and was also so advised by the Secretary of Division No. 4, Railway Employees' Department on presentation of a schedule. The employees considered that these advices terminated existing agreements from April 30, 1918, and therefore the increased rates should date from May 1. The company contended that it did not receive any formal notice of the cancellation of these agreements, and the increases should therefore be made effective from August 1, 1918.

The decision of the Board was as follows:

Notwithstanding that the freight shed employees covered by local schedule agreements at Winnipeg, Calgary, Medicine Hat, Lethbridge and Vancouver, did not, as such, serve notice in proper form for the opening of their schedule agreements for revision as from May 1st, 1918, it is the opinion of this Board that these employees in good faith believed that the required notices had been given in the notifications served upon the company in connection with the proposed Western Lines Federation of Freight Handlers, Clerks and Station Employees.

The Board, therefore, decided that the application of the increases under the so-called McAdoo Award (General Order 27) to those freight shed employees specifically named in the agreements for the five places mentioned, should be effective from May 1st, 1918, pursuant to the Order of the Canadian Railway War Board that the increases would be made effective from the date of expiry of agreements dating back not earlier than May 1st, 1918.

The third point at issue was a claim made by the men's organization that the company's officers refused to meet a committee representing employees on western lines to discuss the schedule. From a statement of the Board it appears that at several important terminals on the western lines of the railway there had been in effect local schedule agreements relating to certain specified freight shed employees, which were subject to revision on May 1, 1918, upon thirty days' notice being given prior to that date. In March, 1918, at a meeting in Calgary it was decided to draw up a general schedule for railway clerks, freight handlers and station employees, and the proper local officers of the company were notified to this effect. These officials appear to have indicated a readiness to enter into discussion with the committee representing the employees in each branch of the service, and especially in the freight sheds where local schedules had been in effect which the employees intended to revise and enlarge.

The following decision was given by the Board on this point:

The issue involved appears to be one of lack of understanding or proper effort on the part of those concerned. The position of the employees' committee and their intentions or desires do not appear to have been clearly set forth in correspondence, and the connection of the organization involved does not appear to have been clearly established at the commencement of the efforts wihch it is stated by the employees were put forth to bring about a schedule revision that would be applicable to employees in similar service over the entire Western lines and would supersede several local schedules then in effect for freight shed employees at certain important terminals on the lines.

It is not shown to the Board that the position taken by the company was at variance with proper and businesslike practice, and the Board is of the opinion that it should have been self-evident that the desires and claims of the employees' committee or committees should have been more clearly set forth in the commencement of the efforts made by the employees to secure schedule revisions for freight shed employees.

It should not be necessary for the Board to deal with or decide this particular question, nor on the evidence submitted, is it in a position to do so.

The Board would, however, call the attention of the parties to Privy Council Order No. 1743, approved by His Excellency the Governor-General on the 11th July, 1918, reading in part as follows:

> "2. That all employees have the right to organize in trade unions, and this right shall not be denied or interfered with in any manner whatsoever, and through their chosen representatives should be permitted and encouraged to negotiate with employers concerning working conditions, rates of pay, or other grievances."

The Board commends to the parties a careful consideration of the principles involved in the above mentioned extract from Order of the Privy Council, but without in any way expressing an opinion as to the propriety or consistency of including in the same agreement employees of various classes of service.

Case No. 14—Dominion Atlantic Railway and engineers, firemen, conductors and trainmen

Case No. 14 had reference to the application of the McAdoo Award with respect to employees of the Dominion Atlantic Railway, the men claiming that the rates should be based on the Canadian Pacific Railway rates in effect in December, 1915, while the company claimed that they should be based on the Dominion Atlantic rates of that date, maintaining that there was no legitimate reason why they should be changed to those of the Canadian Pacific.

The decision of the Board was as follows:

There was not any request from either of the parties in this case for an oral hearing, but in addition to the statements above quoted there were further written statements submitted by each of the parties outlining their contending views in the matter in dispute, which were considered by the Board.

The Board finds that the increases in rates of pay to which the classes of employees mentioned are entitled under the so-called McAdoo Award (General Order 27) have been applied by the company in accordance with the provisions thereof.

The rates of pay for the classes of employees on the Dominion Atlantic Railway were, however, in December, 1915, much below the standard rates of pay for train service employees on the principal railways in Canada, and the application of the award restored the differences as they existed at the dates mentioned, although they had to some extent been reduced by subsequent negotiations.

It having come to the notice of the Board that the General Manager of the Dominion Atlantic Railway was in Montreal, it was suggested that a sub-committee of the Board, consisting of Messrs. Kennedy, Wark, Berry and Murdock, should interview him with a view to ascertaining if the company would be agreeable on account of the conditions mentioned, to put into effect rates of pay somewhat closer to the rates of pay now in effect on the principal railways in Canada and on other railways in the same territory as the Dominion Atlantic Railway.

The sub-committee was accordingly appointed and later reported it had met the General Manager of the Dominion Atlantic Railway, who had willingly consented to discuss the matter along the lines suggested.

As a result an agreement was reached to put into effect as from October 1st, rates of pay as follows:

Passenger Service—
(Regularly Assigned)
Conductor .... $157.50 per month
Bagageman ... 113.75 " "
Brakeman .... 107.16 "

Through Freight and Mixed Service—
Conductor .... $ 4.70 per hundred miles
Brakeman .... 3.60 " "

Way Freight and Mixed Service—
Conductor .... $ 5.30 per hundred miles
Bagageman ... 4.19 " "
Brakeman .... 4.10 " "

Yard Service—
Foreman ..... $ 4.72 per day
Helper ..... 4.40 "

	Engineers per day	Firemen per day
Passenger Service	$4.50	$3.35
Through Freight Service ..	5.20	3.75
Way Freight Service	5.55	4.00
Switching Service	5.00	3.35
Hostlers	45 cents per hour.	

These rates of pay are to continue in effect for one year from October 1st, 1918, and thereafter subject to thirty days' notice, unless otherwise revised by any General Order affecting the Railways of Canada as a result of the issue of any supplementary order or amendment to General Order 27 of the Director General of the United States Railroad Administration covering the classes of employees concerned.

The agreement as outlined is confirmed by this Board.

REPEAL OF ORDER-IN-COUNCIL FORBIDDING STRIKES DURING THE WAR

ON November 19 an Order-in-Council was passed rescinding Order-in-Council P.C. 2525,* passed on October 11, which forbade strikes and lockouts during the period of the war. The text of the rescinding order follows:

Text of the Order

(P. C. 2808.)

Whereas there has been laid before His Excellency the Governor General in Council a report from the Minister of Labour, submitting:

That since the date of the passing of the Order-in-Council of October 11, 1918, (P.C. 2525), the enemy powers have asked for an armistice, and have each in turn accepted the terms of the armistice submitted by the Allied powers; with the result that military operations have been suspended, and a formal conclusion of peace is confidently anticipated. The actual termination of hostilities has rendered unnecessary the sustained operation of war industries for the production of war materials, and in particular has rendered inapplicable that portion (clause 7-a) of the said Order-in-Council which provides for the drafting in the military forces of Canada all those who may infringe the regulations with respect to industrial disputes enacted by the said Order-in-Council.

That he is informed that concerted movements are now under way on the part of employers and workmen respectively, which aim at improvel relations as between employers and workmen, and looking to the elimination, so far as may be practicable, of lockouts and strikes in connection with industrial disputes, and

That in the opinion of the Minister the said Order-in-Council is no longer necessary,

Therefore His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, is pleased to repeal the said Order-in-Council (P.C. 2525) of the 11th day of October, 1918, and the same is hereby repealed accordingly.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

*For text of P.C. 2525 see LABOUR GAZETTE, November, 1918, p. 983.

LABOUR AND CAPITAL PRESENT JOINT RECOMMENDATIONS ON RECONSTRUCTION TO THE DOMINION GOVERNMENT

THE following is the complete text of a memorandum of joint recommendations embracing important suggestions of policy agreed upon by capital and labour as applicable to the reconstruction period in Canada. The memorandum was presented to the Cabinet by a small committee representing the Canadian Manufacturers Association, the Trades and Labour Congress of Canada and the Joint Committee on Technical Organizations.

Text of the Memorandum

MEMORANDUM of joint recommendations drawn up at a meeting held in Ottawa on Friday, November 29th, 1918, by representatives of the Trades and Labour Congress of Canada, the Joint Committee on Technical Organizations and the Canadian Manufacturers Association, for presentation to the Dominion Government.

BUREAU OF PUBLIC WELFARE:

That the Government be requested to establish immediately a Bureau of Public Welfare to deal with such matters as health, sanitation, town planning, housing plans, accident prevention, and every other matter pertaining to the physical efficiency of the nation.

Owing to the present dearth of suitable homes for workingmen, this particular subject should receive the Bureau's first consideration. Much could be accomplished through the co-ordination of the many agencies, private, philanthropic and governmental dealing with these matters.

SURVEY OF IMPORTS:

That a permanent representative bureau be estabished to take a survey of imports with a view to ascertaining what part of such imports could be avoided. Particular attention to be paid to the classification of the customs tariff.

The information thus gathered should be as accessible to interested parties as similar information is in any other countries.

RAW MATERIALS:

The good work already done by our Government in arranging to have more of our minerals refined in Canada, as in the case of nickel, should be continued as a general policy relating to all raw materials, so that such materials will leave the country in as advanced stage of manufacture as possible.

SCIENTIFIC AND INDUSTRIAL RESEARCH:

Having regard to the important part which research must necessarily play in Canada's industrial re-construction, the appropriation for that purpose shoud be increased to not less than one million dollars annually. The Board handling that work should not be merely advisory as at present, but should be clothed with specific executive powers, which powers should preferably be exercised by a Board of Managers, upon which Labour, Manufacturers and Engineers would all have representation.

IMMIGRATION:

That the establishment of a central empire authority on emigration be approved of for supplying information to parties intending to emigrate, as to conditions in the countries to which they desire to so emigrate, and that the established Immigration Department in Canada give serious consideration to the question of further restricting undesirable immigration.

PUBLIC WORKS:

All necessary public works, Dominion, Provincial and Municipal, should be carried forward as promptly and energetically as possible. As the chief consideration will be the matter of finances, we would suggest that the Government render all posible financial aid to works not coming strictly within its own scope.

TECHNICAL EDUCATION:

The advancement of technical education is of such vital concern to the whole country that the burden should not be left entirely to the municipalities and provinces. The Dominion Government should co-operate by such means as are best calculated to assist the authorities and expand the facilities for this work. It is urged, whatever plan be adopted, that there be kept constantly in mind the necessity of working it out on lines that will bring technical education within easy reach of all classes.

LAND SETTLEMENT:

That a practical land settlement plan be worked out at once and in connection with same the Publicity Department should start a campaign to interest our soldiers in the advantages of farming.

An interesting series of booklets should be supplied to our soldiers as soon as possible and prior to demobilization, particularly designed to show that community farm life can be made not only profitable, but socially attractive in the older as well as the newer provinces.

Educational facilities for the thorough training of soldiers who desire to settle on land should be provided.

It is further recommended that the Federal and Provincial Governments take such steps as are necessary to procure suitable land for such communities in proximity to already settled areas.

EMPLOYMENT BUREAUS:

The establishment of one chain of employment bureaus, operated by the provinces in co-operation with the Federal Government, is heartily endorsed, and in this connection the absolute undersirability of dual and private employment offices is emphasised and the abolition of such recommended.

DEMOBILIZATION:

The time having arrived for demobilization the Militia and other Governmental Departments should co-operate with the Government Employment Bureaus in order that the lapse of time between discharge and employment be as short as possible; due regard being given to priority on account of length of service, and to married men.

WATER POWER:

That the Government should adopt a fixed policy and a comprehensive scheme for the utilization of our water powers already and to be developed. This applies particularly to those on international waterways and especially to those of the St. Lawrence River.

To give industry the proper freedom for expansion power supply must be kept always well in advance of demand.

OPTIMISM CAMPAIGN:

That the Publicity Department of the Government start at once an optimism campaign and that in this the press of the country be requested to co-operate.

The country is drifting into a pessimistic state of mind as regards the immediate future which might easily bring about far-reaching depression unless it is quickly checked.

Respectfully submitted,

(Signed)

Labour representatives:

T. MOORE, President, Trades and Labour Congress of Canada, Ottawa, Ont.

A. MARTELL, Vice-President, Trades and Labour Congress of Canada, Montreal, Que.

D. REES, Vice-President, Trades and Labour Congress of Canada, Vancouver, B.C.

FEDERAL LOAN IN AID OF PROVINCIAL HOUSING SCHEMES

IN view of the great scarcity of houses throughout Canada owing to the cessation of building operations during the war, an Order-in-Council (P.C. 2997) was passed by the Dominion Government on December 3 for the purpose of affording financial assistance to the various provinces that were taking steps to remedy this condition. The complete text of the order follows:

Text of the Order-in-Council

The Committee of the Privy Council have had before them a report, dated December 2, 1918, from the Minister of Finance, submitting that at the conference recently held at Ottawa, between the Premiers and other members of the governments of the several provinces and representatives of the Dominion Government, one of the important subjects of discussion was that of creating better housing conditions for the industrial population of our larger centres.

The Minister observes that owing to the practical cessation of building operations during the war there is at present a great scarcity of housing accommodation in most of our cities, and this condition will become intensified with the return of our soldiers from overseas and their re-establishment with their families in civil life and occupation.

The Minister states that at the conference it developed that some of the provincial governments were considering the adoption of a policy of making loans to municipalities or otherwise, extending over a long period of years, and repayable upon the amortization plan, for the purpose of promoting the erection of dwelling houses of a modern character to relieve congestion of population in cities and towns in their respective provinces, and the question was raised as to whether the Dominion Government would aid the several provincial governments in carrying out such a policy by making loans to them to place them, to the extent that might be necessary, in funds for the purpose.

In view of the national importance of the matter, which touches vitally the health, morals and general well-being of the entire community and its relation to the welfare of returned soldiers and their families, together with the fact that the carrying out of such a policy on a substantial scale by provincial governments would afford considerable employment during the period of reconstruction and readjustment of industry following the war, the Minister recommends as follows:

(1) That the Minister of Finance be authorized under the provisions of the War Measures Act upon request from the Government of any province of Canada to make loans to such Government for the purpose mentioned.

(2) That the aggregate amount to be loaned to all provinces shall not exceed twenty-five million dollars, and the amount of loan to any one province shall not exceed the proportion of the said twenty-five million dollars which the population of the said province bears to the total population of Canada.

(3) That the loans made hereunder may be for a period not exceeding 20 years, with the right of any province to pay off the whole or any part of the principal of the loan at any time during the said term.

(4) That interest at the rate of five per cent per annum, payable half-yearly, shall be charged upon advances from the dates thereof respectively.

(5) The Minister of Finance may accept bonds, debentures, or such other form of security as he may approve evidencing the indebtedness of any provincial government for loans made hereunder.

(6) Advances shall be made from the War Appropriation.

(7) Advances may be made as soon as a general scheme of housing shall have been agreed upon between the Government of Canada and the Government of the province applying for a loan hereunder.

The committee concur in the foregoing recommendations and submit the same for approval.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

HOUSING FOR WORKERS IN GREAT BRITAIN—REPORT OF COMMITTEE OF LOCAL GOVERNMENT BOARD*

AS a result of a recommendation made by the Advisory Housing Panel† of the British Ministry of Reconstruction that the responsibility for securing promptly an adequate supply of houses lay with the Local Government Board, the president of that body duly appointed a committee "to consider questions of building construction in connection with the provision of dwellings for the working classes in England and Wales, and Scotland, and report upon methods of securing economy and despatch in the provision of such dwellings." The committee has now presented, under date of October 24, 1918, a very complete report dealing with methods of construction, supply of materials, organization of labour, etc.

In the introduction to the report it is stated that 409,000 houses are urgently needed in England, Wales and Scotland, but that if the present low standard of houses in many localities were but slightly raised it would probably add another 200,000 to the number required. In addition to the above, there is the ordinary demand for 100,000 houses per annum.

It is certain that, apart from what local authorities can do, a very large proportion of workingmen's houses will still depend upon public utility societies, speculative building and other forms of private enterprise. But private enterprise, owing to high prices and the difficulty of securing materials (which will be accentuated if there is any considerable demand for building materials for railways, public buildings and other works), is not likely, unless special facilities are afforded, to undertake much house building during the next two or three years. Some dynamic force, therefore, is necessary.

The report recommends the creation of a strong Housing Department at the Local Government Board of England and Wales, and of Scotland. The whole country should be divided into districts, and local commissioners appointed who, while working under central control, would have executive powers vested in them. The functions of those commissioners, who should be men of technical knowledge, should be "to encourage and assist local house building, and, primarily, to secure effective co-ordination between the various local authorities, public utility societies and other forms of private enterprise." In these commissioners might be vested "considerable discretionary powers with respect to building by-laws, so that modifications and relaxations might be made to suit the requirements of individual schemes and avoid the expenditure of unnecessary money, while at the same time safeguarding the public from doubtful experiments." The Housing Department, through its commissioners, would do much to prevent the confusion and competition (with resulting higher prices) which would certainly arise if local authorities, without reference to any central authority, invited tenders for large building schemes. The commissioners, of course, would give advice to the local authorities in selecting plans and making the desired adaptions to suit local conditions and local materials.

In regard to the supply of building materials, it is suggested that if any priority rights are set up, the government, acting upon information furnished by the Housing Department of the Local Government Board, should give preference to all housing schemes, whether public or private. With respect to the price of bricks, slates, cement and other

*Cd. 9191. October 24, 1918. 97 pp.

†The report of the Advisory Housing Panel was reviewed in the LABOUR GAZETTE, October, 1918, p. 785.

material, "the most effective policy for regulating the prices is stimulus of production."

In regard to the securing of land, the report states that there are undoubtedly large areas of suitable land available at reasonable prices; but there are, also, instances "where local authorities are penalized by having to pay high prices for land eminently suitable for housing purposes, or where such authorities have to resort finally to expensive methods of compulsory acquisition." In this connection the report states that the possession by the local authorities of a simple and expeditious method of compulsory acquisition would render the task of negotiation much easier, and it is advocated that "special powers might with advantage be vested in the Housing Department for a limited period of years until the general powers of local authorities as to land acquisition can be resettled upon a more satisfactory basis." In cases where belts of undeveloped land on the outskirts of towns are to be utilized, transportation facilities must be provided concurrently with development, for "if the acquisition of land is deferred until tramway extension schemes have been publicly projected and approved, the price of the land will rise immediately."

In reference to the organization of labour for building, the report has one or two interesting observations. The small speculative builder, it states, has always provided the greater proportion of houses, and, as he is dependent entirely upon the financial facilities available, the supply of houses has been somewhat erratic. There have been periods when speculative house building has been prosperous and exceeded the demand, followed by periods of depression and a consequent shortage of houses. The result has been "that workmen have come to regard speculative house building as an uncertain occupation giving no guarantee of regular employment, which has tended to demoralize the trade." To remedy this it is suggested that the trade of house building could be stabilized and good workmen attracted if a definite programme, embodying the erection of a better type of house, extending over a term of years and offering regular employment, were adopted. Representatives both of builders and of their employees, who gave evidence before the committee, laid special emphasis upon the importance of regular employment with a good spell of work ahead, instead of the sporadic manner in which this branch of the building trade has been previously conducted. The methods of construction and materials, or substitutes for such materials as may at present be scarce, were also the subject of very careful consideration and the conclusions at which the committee arrived are set out very completely in the report. In order to reduce the cost of transit and to harmonize cottage buildings with their surroundings, the fullest use of local materials is urged.

All the witnesses examined by the committee laid great stress upon the financial side of housing. From the evidence submitted it seemed clear that even before the war the financing of building schemes had become exceedingly difficult, and that, therefore, the former methods of obtaining money for building purposes were not likely to be again resumed, and that if any adequate housing schemes were to be carried out "States loans would be a necessary condition."

The introduction concludes with the expression of the committee's opinion that the critical period in industrial housing will be the first twelve months after the declaration of peace, and that during that time it is probable that the lines upon which industrial Britain will be rebuilt will be laid down. "If the policy adopted is merely a reversion to pre-war methods with the addition of State loans and doles, the result will be but little improvement upon the past. If, on the other hand, a bold and enlightened policy is pursued, by which all the housing agencies including local authorities, public utility societies and

the best forms of private enterprise have their due and fitting place under the supreme direction of a well-organized and efficient Central Department, we may have in the future, instead of gloomy streets and squalid dwellings, spacious suburbs with convenient and attractive houses designed by competent architects, with districts planned so as to provide the amenities of healthy social communities."

The second part of the report deals with general considerations affecting the problem of securing economy and dispatch in the provision of workers' dwellings. It is indicated that the problem is not confined to providing dwellings for the poorer sections of the workers (whose inability to pay rent has always discouraged speculative builders to provide for them); the shortage is common to all classes of industrial workers. Moreover, the general standard demanded in their dwellings by the workers has been steadily rising, and there is every prospect that the influence of war conditions will create a demand for still further improvement, and thereby cause a large number of existing houses to fall below the rising standard. In the face of this rising standard, therefore, the committee states that the only wise economy is to build dwellings which will continue to be above the accepted minimum for the next 60 years. the probable period of the State loan.

Other parts of the report deal with statutes, local acts and by-laws, sites, lay-out and development, convertion of existing buildings for occupation by workers (an alternative which finds but little favour with the committee), communal services, economy in construction, supply of building materials and labour, and organization.

Following the publication of the above report, the Local Government Board in November last issued a circular letter to the various borough, town, urban and rural district councils asking for an early reply to the following questions:

(1) Are the local authorities prepared to provide any necessary houses for the working classes of their district, so far as not otherwise provided at an early date?

(2) Are they prepared to do so on the terms set out in the Board's circular of the 18th March last?

(3) When will their scheme or schemes be ready for submission to the Board with the particulars asked for in the circular above referred to, and for how many houses will they provide?

(4) Have the necessary sites been—
(a) selected? (b) acquired?

(5) Is there any work such as the development of the housing sites and the construction of roads, sewers, etc., which can be put in hand immediately when demobilization begins, without waiting for the final approval of the plans of the houses?

AN EMPLOYER'S REASONS FOR FAVOURING THE CREATION OF WORKSHOP COMMITTEES

THE first issue of the reconstruction series of *The Survey* consists of an article, written by a large employer of labour in the north of England, dealing with the purposes, functions and uses of Works Committees* in the "highly developed and elaborate organisms which modern factories tend to become." At the outset the writer lays stress on the point that the failure of the conditions of industrial life to satisfy the deeper needs of the workers plays a very large part in creating labour unrest; and that the worker will never derive satisfaction from his work so long as he remains a "cog" in the industrial machine, without opportunity for self-expression.

*See summary of the Whitley Report in the LABOUR GAZETTE, September, 1918, pp. 744-6.

Cases where Workshop Committees will benefit the Workers

Under the above heading the writer considers what functions and powers, usually exercised by the management, could be delegated to the workers; and what questions, usually considered private by the management, could be made the subject of explanation and democratic discussion and joint action. With reference to Collective Bargaining, it is suggested that there is need for machinery for carrying that trade union principle into more intimate touch with the workshop, and that a workshop committee might supplement the ordinary trade union activities in the following directions:

WAGES:

To ensure the application of standard rates to individuals, to see that they get the benefit of the trade union agreements.

When a scale of wages, instead of a single rate, applies to a class of work (the exact figure varying according to the experience, length of service, etc., of the worker), to see that such scales are applied fairly.

To see that promises of advances (such as those made, for instance, at the time of agreement) are fulfilled.

To see that apprentices, on completing their time, are raised to the standard rate by the customary or agreed steps.

PIECE-WORK RATES:

To discuss with the management the detailed methods of rate fixing, as applied either to individual jobs or to particular classes of work.

Where there is an agreed relation between time rates and piece rates, as, for instance, in engineering, to see that individual piece rates are so set as to yield the standard rate of earning.

To discuss with the management reduction of piece rates where these can be shown to yield higher earnings than the standard.

To investigate, on behalf of the workers, complaints as to inability to earn the standard rate. For this purpose all the data and calculations, both with regard to the original setting of the rate and with regard to time booking on a particular job, would have to be open for examination.

TOTAL HOURS OF WORK:

To discuss any proposed change in the length of the standard week. This could only be done by the workers' committee of an individual firm, provided the change were within the standards fixed by agreement with e local union or those customary in the trade.

NEW PROCESSES OR CHANGE OF PROCE:

Where the management desire to troduce some process which will throw men o of employment, the whole position should placed before a shop committee to let the nesity be understood, and to allow it to discussow the change may be brought about with e least hardship to individuals.

GRADES OF WORKER FOR TYPES OF MACNE:

Due to the introduction of new pes of machines, and to the splitting up of ocesses, with the simplification of manipulati sometimes entailed thereby, the questio of the grade of worker to be employed on a given type of machine continually arises. Any such questions are so general as to be the ject of trade union negotiation, but many ore are quite local to particular firms. For eier kind there should be a works committee whin the works to deal with their application tere.

Under the head of grievanc, emphasis is placed on the necessy for quick ventilation of all grievanes and alleged injustices to individual orkers or to groups if good feeling i to be secured. A workshop committe will provide a suitable channel in cass such as the following:

Alleged petty tyranny by foremen.
Hard cases arising out of too rigidapplication of rules, etc.
Alleged mistakes in wages or piece-ork payments.
Wrongful dismissal, *e.g.*, for alleed disobedience, etc., etc.

In reference to general shop coiditions and amenities the following suggestions indicate the kind of questions that might be dealt with by workshop committees:

SHOP RULES:

Restriction of smoking; tidiness, cleaning of machines, etc.; use of lavatories ani cloakrooms; provision, care and type of overalls; time-booking arrangements; wage-paying arrangements, etc., etc.

MAINTENANCE OF DISCIPLINE:

It should be possible to promote such a spirit in a works that, not only could the workers have a say in the drawing up of Shop Rules, but the enforcing of them could also be largely in their hands. This would be particularly desirable with regard to: enforcing good timekeping; maintaining tidiness; use of lavatories and cloak-rooms; promoting a high standard of general behaviour, etc., etc.

WORKING CONDITIONS:

Meal hours, starting and stopping times; arrangements for holidays, etc.; arrangement of shifts; night work, etc.

ACCIDENTS AND SICKNESS:

Safety appliances and practices; machine guarding, etc.; administration of First Aid; rest room arrangements; medical examination and advice.

DINING SERVICE:

Consultation *re* requirements; criticisms of and suggestions *re* service; control of discipline and behaviour; seating arrangements, etc.

SHOP COMFORT AND HYGIENE:

Suggestions *re* temperature, ventilation, washing accommodation, drying clothes, etc.; provision of seats at work, where possible; drinking water supply.

BENEVOLENT WORK:

Shop collections for charities or hard cases among fellow workers; sick club, convalescent homes, etc.; saving societies.

Cases where joint discussion will assist the Management

Examples are given where, it is claimed, discussion between management and workers would be of great benefit to management. Among these are the following:

Interpretation of Management to Workers:

"In any case of new rules or new developments, or new workshop policy, there is always the greatest difficulty in getting the rank and file to understand what the management is 'getting at.' However well-meaning the change may be as regards the workers, the mere fact that it is new and not understood is likely to lead to opposition. If the best use is made of committees of workers, such changes, new developments, etc., would have been discussed, and explained to them; and it is not too much to expect that the members of such committees would eventually spread a more correct and sympathetic version of the management's intentions among their fellow-workers than these could get in any other way.

Education in Shop Processes and Trade Technique:

"The knowledge of most workers is limited to the process with which they are concerned, and they would have a truer sense of industrial problems if they understood better the general technique of the industry in which they are concerned, and the relation of their particular process to others in the chain of manufacture from raw material to finished article.

"It is possible that some of this education should be undertaken by technical schools, but their work in this respect can only be of a general nature, leaving still a field for detailed teaching which could only be undertaken in connection with an individual firm, or a small group of similar firms. Such education might well begin with the members of the committee of workers, though if found feasible it should not stop there, but should be made general for the whole works. Any such scheme should be discussed and worked out in conjunction with a committee of workers, in order to obtain the best from it.

Education in General Business Questions:

"This point is still more doubtful than the preceding. Employers continually complain that the workers do not understand the responsibilities and the risks which they, as employers, have to carry, and it would seem desirable therefore to take some steps to enable them to do so. In some directions this would be quite feasible, *e.g.*:

"The reasons should be explained and discussed for the establishment of new works departments, or the re-organization of existing ones, the relation of the new arrangement to the general manufacturing policy being demonstrated.

"Some kind of simplified works statistics might be laid before a committee of workers. For example: output; cost of new equipment installed; cost of tools used in given period; cost of raw material consumed; number employed; amount of bad work produced.

"Reports of activities of other parts of the business might be laid before them:

"(1) From the commercial side, showing the difficulties to be met, the general attitude of customers to the firm, etc.

"(2) By the chief technical departments, design office, laboratory, etc., as to the general technical developments or difficulties that were being dealt with. Much of such work need not be kept secret, and would tend to show the workers that other factors enter into the production of economic wealth besides manual labour.

"Simple business reports, showing general trade prospects, might be presented. These are perhaps most difficult to give in any intelligible form, without publishing matter which every management would object to showing. Still, the attempt would be well worth making, and would show the workers how narrow is the margin between financial success and failure on which most manufacturing businesses work. Such statistics might, perhaps, be expressed not in actual amounts, but as proportions of the wages bill for the same period."

Many schemes of organization are suggested in the article, but in each case emphasis is placed on the advisability of regular joint meetings of management and workers as opposed to meetings called only on special occasions to discuss particular grievances. With regular meetings, probably once a month, each side becomes used to meeting the other in the ordinary way when no special issue is at stake. With no tension in the air each side is better able to absorb something of the other's point of view. At special meetings, on the other hand, each side is apt to regard as its business, not the discussion of the question on its merits, but simply the making out of a case.

In the matter of representation, the workers' section should, when possible, cover all trades, organized and unorganized, skilled and unskilled; while the management section should, in general, contain the highest members of the management who are connected with the running of the works. It would be of little use to have subordinate officials to deal with matters which would, in many cases, be beyond their jurisdiction.

PROGRESS OF VOCATIONAL EDUCATION IN THE UNITED STATES

RECENT bulletins of the United States Federal Board for Vocational Education, operating under the Smith-Hughes Act, the text of which appeared in the LABOUR GAZETTE of June, 1917, page 496, show marked progress in the development of vocational education throughout the country. Although the organization of the Board was only effected in August, 1917, before the end of the year every State had accepted the provisions of the Act, and on January 1, 1918, the plan of the last State had been approved by the Federal Board. While many of the plans submitted by the various States will be subject to amendment, the foundations have been laid for a nation-wide system of vocational education adapted to the needs of each separate locality.

Owing to the participation of the United States in the war the Federal Board has issued a series of bulletins in which are outlined short courses of instruction designed to fit men to meet the specific demands of processes and operations carried on by an army under war conditions. These include courses for radio and buzzer operators, shipyard workers, chauffeurs, electricians, airplant mechanics, and radio mechanics and operators. A study has also been made by the Board of the re-education of disabled soldiers and sailors three bulletins having been issued on this subject. The first of these deals with general principles and policies with reference to the United States, and a review of foreign legislation and experience. The second bulletin deals with the training of teachers for occupational therapy for the rehabilitation of disabled soldiers and sailors, and the third bulletin of the series consists of a volume prepared by the Red Cross Institute for Crippled and Disabled Men on "The Evolution of

National Systems of Vocational Reeducation for Disabled Soldiers and Sailors."

During October the Federal Board for Vocational Education established a number of branch offices throughout the country for the training of disabled soldiers. Relations have been established for this purpose with 400 colleges and technical schools. When the soldier is ready to leave the hospital, vocational advisers will be put at his disposal. He will be paid a regular income while undergoing re-education, and his family will receive the same allowances as if he were still in the army. The training offered will include the professions as well as the manual trades. At the conclusion of the course agencies will be ready to help in placing the re-educated men in civil life. A preliminary sum of $2,000,000 has been appropriated for this purpose. This work was undertaken in accordance with the provisions of the "Smith-Sears Act," which became law last June.

ANNUAL LABOUR DELEGATION TO THE DOMINION GOVERNMENT

ON November 27 a delegation of the Trades and Labour Congress of Canada presented to the Dominion Government resolutions that had been passed at the last annual convention of the Congress. The delegation was received by Sir Thomas White, acting Prime Minister, Hon. J. D. Reid, Hon. Gideon Robertson, Hon. Frank Carvell, Hon. N. W. Rowell, Hon. A. K. Maclean and Hon. P. E. Blondin. The resolutions included requests for an increase in all allowances of dependents of soldiers to at least $100 per month, the equalization of pensions for all ranks and free medical attention of the wives and children of soldiers still in the service, Federal Government insurance for soldiers, pensions for soldiers and Allied reservists and for widowed mothers and deserted wives, and a Dominion system of old age pensions. The provision of a fund for insurance against sickness was urged and the creation of a Federal health department with national control of medical treatment in hospitals. Other recommendations made included Government ownership of railways, legislation making Dominion election day a public holiday and abolishing election deposits by candidates, higher land taxes, legislation in aid of the co-operative movement, the passage of an act making the use of injunctions against strikers illegal, more stringent regulations covering food and fuel control, the abolition of private employment agencies, registration of trade union labels, remission of duties on trade union supplies, an eight hour day on all public works, the publication of the names of Government contractors and regulations of contracts for shoes, etc., the appointment of a fair wage officer for the Maritime provinces, the establishment of minimum wages, protection of car builders and repairers by the erection of suitable buildings, protection of the health of painters by requiring the labelling of receptacles containing white lead, etc., the de-naturing of wood alcohol and prohibiting the use of spraying machines on outside work, against the introduction of coolie labour into the mines or industries, the appointment of a labour representative upon the proposed central immigration authority, a Saturday half holiday for postmen, an increase in the strength of alcohol in beer, legislation requiring cigar boxes to be labelled so as to show whether the cigars are hand or machine made, reinstatement of certain employees of the Marine Department in the city of Quebec, and against Government purchase of wares made by a company that had reduced wages. Some of the delegates made objection to the Order-in-Council directed against propaganda carried on by certain societies.

In reply, Sir Thomas White said that during the war it was necessary in Canada as in England that the Government should possess wide powers to permit of prompt action in emergencies. The signing of the armistice practically meant the end of the war, and therefore, there would now be a tendency to return to ordinary parliamentary methods. The Order-in-Council relating to the I. W. W. and like organizations was intended to apply only to societies propagating doctrines subversive of public order, and he suggested that the Minister of Labour might consider whether or not it was too wide in its application.

ORGANIZATION OF THE ASSOCIATION OF CANADIAN BUILDING INDUSTRIES

DURING the last week in November about 150 prominent contractors and builders met in convention at Ottawa and formed the Association of the Canadian Building Industries. The objects of the Association as expressed by the chairman of the conference are the stabilization of the building industry throughout Canada and the adaptation of the industry to the changed conditions confronting it. The association comprising general contractors and was divided into three sections, the first builders, the second sub-contractors and trade contractors, and the third suppliers of building materials. The following officers were elected: J. P. Anglin, president; C. A. Crane, Otawa, honorary treasurer, and A. H. Dancy, Toronto, honorary secretary. A vice-president was also elected for each of the various provinces.

CONFERENCE OF REPRESENTATIVES OF THE UNION LABEL CRAFTS OF ONTARIO

A CONFERENCE of representatives of the union label crafts of the province of Ontario was held in Toronto on November 23, last, with some 46 delegates in attendance. In explanation of the calling of the conference, it was stated that during the last convention of the Labour Educational Association many delegates had spoken of the impossibility of purchasing union-made products in the centres from which they had come. The executive of the Association, having been instructed to take action in regard to the matter, had, therefore, called the representatives of the union crafts together to devise a scheme to popularize the sale of union-made goods.

Organizations of the following trades and occupations were among those represented at the conference: Boot and Shoe Workers; Cigar Makers; United Garment Workers; Electrical Workers; Sheet Metal Workers; Hotel and Restaurant Employees; Brewery Workers; Printing Trades; Bar Tenders; Stereotypers; Typographers and Bookbinders.

The following resolutions and recommendations were unanimously agreed to by the conference:

A resolution to the effect that the conference should urge the Provincial Government, municipal corporations and all business concerns to have the union label placed on all books and stationery used by them; and should also urge that the union label be placed on all school text books and upon church printing and periodicals.

The following resolution arose out of an allegation that the Vocational Training Department of the Dominion Government had placed a returned soldier in the Tuckett tobacco factory to learn the trade at a time when a strike was in progress; and that the soldier was

paid by the Government and furnished free by the manufacturer. The resolution was as follows: "That this conference is opposed to that part of the Government's vocational training for soldiers which gives an employer the service of a soldier for six months free of charge, and that we deplore the fact that the Government saw fit to place a man in the Tuckett cigar factory, in London, while a strike was in progress for better conditions. We suggest that the secretary be empowered to write the Vocational Training Commission protesting against the action taken in this particular case."

Other resolutions and recommendations were as follows:

"That this conference ask the executive of the Trades and Labour Congress of Canada to try and secure legislation providing for the registration of the union label and that the secretary write urging the matter be taken up at the interview to be held with the Government on November 27th.

"That each central labour body be asked to form a union label section whose duty it shall be to obtain information as to where union label goods are procurable in their district, and report the same back for the benefit of the various trade bodies in the district. It is further suggested that these label sections keep in touch with the secretary of the Labour Educational Association, informing him as to what labels are procurable in their districts and to co-operate with the association in popularizing the demand of all union made goods in their locality.

"That delegates to the conference endeavour to have an order in business adopted in their various organizations to deal with the union label for a space of at least five or ten minutes at each meeting, and that delegations from time to time visit the different labour bodies to press for systematic support of union made products.

"That the label sections of the various districts forward news of the movement to the secretary of the Labour Educational Association at least every month and more frequently if possible and that the news thus compiled and articles dealing with union label propaganda be supplied to the various labour papers in Canada free, at stated periods for publication in order to create an added interest in union label propaganda."

MEMBERSHIP LIST OF WESTERN COAL OPERATORS' ASSOCIATION

THE following is a revised list of the various coal mining companies included in the membership of the Western Coal Operators' Association at the beginning of October, 1918:

List of Members

Bankhead Mines (Canadian Pacific Railway Company), Bankhead, Alta.

Galt Mines (Canadian Pacific Railway Company), Lethbridge, Alta.

The International Coal and Coke Company, Limited, Coleman, Alta.

West Canadian Collieries, Limited, Blairmore, Alta.

The Crow's Nest Pass Coal Company, Limited, Fernie, B.C.

Hillcrest Collieries, Limited, Hillcrest, Alta.

Corbin Coal and Coke Company, Limited, Corbin, B.C.

Chinook Coal Company, Limited, Commerce, Alta.

The Canada West Coal Company, Limited, Taber, Alta.

Pembina Colliery (North Amer. Coll., Limited), Evansburgh, Alta.

Pacific Colliery (North Amer. Coll., Limited), Lovett, Alta.

Monarch Colliery (North Amer. Coll., Limited), Drumheller, Alta.

Lethbridge Colliery (North Amer. Coll., Limited), Coalhurst, Alta.

McGillivray Creek Coal and Coke Company, Limited, Coleman, Alta.

Brazeau Collieries, Limited, Nordegg, Alta.

The Drumheller Land Company, Limited, Drumheller, Alta.

The Atlas Coal Company, Limited, Drumheller, Alta.

Western Gem Mining Company, Limited, Drumheller, Alta.

The Star Coal Mines, Limited, Aerial P. O., Alta.

Peerless Coal Company, Wayne, Alta.

Midland Collieries, Limited, Midlandvale, Alta.

The Rosedale Coal and Clay Products Company, Limited, Rosedale, Alta.

The Western Commercial Company, Limited, Wayne, Alta.

The Rose Deer Coal Mining Company, Limited, Wayne, Alta.

The Mountain Park Coal Company, Mountain Park, Alta.

Jasper Park Collieries, Limited, Pocahontas, Alta.

Premier Coal Company, Limited, Drumheller, Alta.

The Humberstone Coal Company, Beverly, Alta.

Hamilton Coal Company, Limited, Wayne, Alta.

Federal Coals, Limited, Lethbridge, Alta.

The Canmore Coal Company, Limited, Canmore, Alta.

Non-Members

The following is a list of mining companies operating in the districts not members of the Association:

Alberta Coal Mining Company, Cardiff, Alta.

Edmonton Collieries, Limited, Edmonton, Alta.

Newcastle Coal Company, Drumheller, Alta.

Blue Diamond Coal Company, Limited, Brule Mines, Alta.

Yellowhead Coal Company, Limited, Coalspur, Alta.

Clover Bar Coal Company, Edmonton, Alta.

Dobell Coal Company, Limited, Tofield, Alta.

Oliphant-Munson Collieries, Limited, Coalspur, Alta.

Island Lake Coal Company, Wabamun, Alta.

Round Hill Coal Company, Limited, Round Hill, Alta.

Redcliff Brick and Coal Company, Redcliff, Alta.

Consumers Coal Company, Wabamun, Alta.

Acme Coal Company, Limited, Wayne, Alta.

Sterling Coal Company, Drumheller, Alta.

Alberta Block Coal Company, Drumheller, Alta.

Byers Coal Company, Limited, Edmonton, Alta.

Diamond City Coal Company, Diamond City, Alta.

Lakeside Coal Company, Wabamun, Alta.

Regel Collieries, Limited, Taber, Alta.

McPeak Coal Company, Edmonton, Alta.

City Collieries, Limited, Edmonton, Alta.

McKay Coal Company, Edmonton, Alta.

Dawson Coal Company, Edmonton, Alta.

Crown Coal Company, Edmonton, Alta.

Tofield Coal Company, Tofield, Alta.

Great Northern Coal Company, Edmonton, Alta.

Sturgeon Consolidated Collieries, Limited, Cardiff, Alta.

Twin City Coal Company, Edmonton, Alta.

Great West Coal Company, Edmonton, Alta.

Campbell & Southgate (bush mine), Edmonton, Alta.

CO-ORDINATION OF EMPLOYMENT OFFICES IN CANADA

THE work of organizing the national system of employment offices for Canada under the provisions of the Employment Offices Co-ordination Act, 1918,* is now well in hand. As a result of recent conferences of provincial premiers and employment officials and representatives of the Department of Labour, many questions of policy have been decided and many plans worked out in connection with the organization of the system and the details of office routine, forms and records.

It must be remembered that employment work on a national basis has been undertaken in very few countries as yet and the work of organization presents formidable though not insuperable difficulties, especially in a country of Canada's extent. The new system will have a very good basis in the employment work that has already been done in the provinces of Ontario and Quebec as well as in the agricultural employment work of the western provinces. Quebec was the pioneer in this field in Canada, and for some years has had employment offices in the cities of Montreal, Quebec, and Sherbrooke. In the last two years Ontario has opened offices in about 10 of the more important industrial centres, while the prairie provinces have been doing some employment work, chiefly with regard to farm labour. British Columbia has a difficult problem in distributing the floating labour in the shipping, lumbering, and mining industries, but the work is being taken in hand seriously by the provincial government and an office has already been opened in Vancouver.

*For text of the Act see LABOUR GAZETTE, May, 1918, pp. 355-6.

Mr. McCoy, of the Department of Industries and Immigration of Nova Scotia, was the representative of his province at the employment conference. Ex-Controller Ainey, of Montreal, general superintendent of employment offices in Quebec province, was present, accompanied by Mr. Francis Payette of the Montreal employment office. Dr. W. A. Riddell, superintendent of trades and labour in Ontario, whose department is charged with employment work in that province, was also a delegate to the conference. The delegation from the West included Mr. Thomas Molloy, secretary of the Bureau of Labour of Saskatchewan, one of the foremost authorities on the labour situation in the western provinces, who also spoke for Manitoba; ex-Mayor Mitchell, of Calgary, recently appointed superintendent of employment offices for Alberta, represented his province, and Deputy Minister of Labour McNiven represented British Columbia.

The plan of organization drawn up by the Department of Labour was submitted to the provincial officials, and with their co-operation and criticism the whole organization scheme was outlined in the most minute detail. A local office will be opened in every important industrial centre, and in the larger cities it is proposed to have separate offices for unskilled labour and for skilled workers. These offices will report daily to a provincial clearing-house the number of workers unplaced and the situations unfilled, by trades; and on the clearing-house personnel will fall the duty of matching up vacancies in one part of the province with unabsorbed workers in other localities. Upon the provincial organizations will be superimposed a federal system of two clearing-houses, located probably at Winnipeg and Ottawa. When the provincial clear-

ing-houses have done their best to relate workers to positions in the provinces and find that there is still a deficiency or a surplus of labour in some parts, the federal clearing-house will take up the work at this point and will try to locate the surplus labour or secure the labour required in other provinces. The clearing-house at Winnipeg will function in this way for all the western provinces, while the Ottawa clearing-house will perform a similar task in the East. By this plan the Dominion Government will have always at hand accurate information as to the demand and supply of labour in all parts of the country, the extent to which private industry is absorbing the returned soldiers and demobilized war-workers, the volume of public employment that must be provided to take up any surplus and the localities and trades in which such employment is required.

In placing this machinery at the disposal of employers and employees the Dominion and provincial governments are anxious that it shall be operated for the common interests of both classes, and to that end advisory committees, equally representative of employers and employees, will be connected with all the larger offices. A national advisory committee, to be called the Employment Service Council of Canada, will be organized at once to supervise the administration of the entire organization. The provincial governments will appoint one member each on this committee and the Soldiers' Civil Re-establishment Departpartment, the Great War Veterans, the Canadian Manufacturers' Association, the Trades and Labour Congress, the Railway War Board, the Railway Brotherhoods, and the Canadian Council of Agriculture will also be represented. The Department of Labour appoints three members, two of whom must be women. A provincial advisory committee to safeguard the interests of employers and employees will also be appointed in each province.

One problem which remains to be settled is the relation of the employment organization to the work of the Department of Soldiers' Civil Re-establishment and the provincial Returned Soldiers' Commissions. There have been conferences, however, between the employment officials and the officials of the Department of Soldiers' Civil Re-establishment on this matter and the delimitation of the spheres of the two has been practically agreed upon. It is admitted by all who have given attention to the subject that a well thought out system of employment offices is indispensable in any programme of demobilization and reconstruction. The British system of labour exchanges has proven a most valuable instrument in organizing British labour to make its maximum contribution to war effort, and it is expected to play as important a part in the demobilization period. The United States government is devoting much energy and money to the establishment of an efficient employment service. Canada, it is hoped, will soon have an employment organization that will materially assist employers and workers to make the transition from a war to a peace basis.

REPORTS OF EMPLOYMENT OFEICES

DURING October there was an increase of almost 1 per cent in the demand for labour, as compared with September, on the basis of the daily average of vacancies notified to 110 employment offices (82 commercial, 16 public, and 12 philanthropic). As compared with the demand reported for October of last year by practically identical offices, there was an increase of about 4 per cent. The total number of vacancies notified to all offices in Octo-

ber was 50,360, a daily average of 1894.5, as compared with 2021.57, in September, 1918, and with 1744.55, in October, 1917. The number of persons placed was 20,121, a daily average of 827.71, as compared with averages of 799.82 and 826.19 in the preceding month and in October of last year. The proportion of vacancies filled to the total vacancies notified was 40.0 per cent, as compared with 38.6 per cent in September and with 45.9 per cent in October, 1917.

As to employment for woman and girl workers, the number of vacancies notified was 8,013, a daily average of 308.57 as compared with 238.7, in September and with 236.2 in October, 1917. The number of such workers placed was 3,471, a daily average of 133.58, as compared with 85.9 in September and with 84.2 in the corresponding period of 1917. The proportion of vacancies filled to vacancies notified for men and boys was 39.35 per cent, and for women and girls 43.32 per cent, as compared with 38.94 per cent and 36.0 per cent, respectively, for September, and with 47.8 per cent and 355 per cent respectively, for October, 1917. Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Toronto and Winnipeg showed increases in the demand for labour both as compared with September, 1918, and with October, 1917. Edmonton and Vancouver reported declines in both cases, while Montreal showed a decrease in comparison with September, 1918, and an increase over October, 1917. Of the smaller centres, Brantford, Kitchener, St. Thomas and Regina all showed increases in both comparisons, while Ottawa and Calgary reported declines in both cases.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association, and other agencies was 1,533, a daily average of 44.3, as compared with averages of 106.6 in September, 1918, and 86.0 in October, 1917. The number of casual jobs supplied was 3,794, a daily average of 144.4, as compared with averages of 168.4 in the preceding month and 185.5 in October of last year.

CASUAL EMPLOYMENT SUPPLIED BY VARIOUS OFFICES DURING THE MONTH ENDED OCTOBER 31, 1918.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 35 cities, showed a decrease during November, 1918, as compared with the previous month, the total value of building permits falling from $2,850,428 in October to $2,387,045 in November, a decrease of $463,383, or 16.26 per cent. Nova Scotia and Quebec recorded increases as compared with the previous month. As compared with the corresponding month of 1917, there was an increase of 11.07 per cent, the value for November, 1917, being $2,149,223. In this comparison Nova Scotia, Ontario, Manitoba, and British Columbia reported increases.

Of the larger cities, Hamilton showed an increase, both as compared with the preceding month and with November of 1917. Montreal-Maisonneuve, Calgary

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

and Vancouver recorded declines as compared with October and increases in comparison with November, 1917, while Edmonton indicated an increase in comparison with October, 1918, and a decrease as compared with November, 1917. Of the smaller centres, Halifax, Moncton, Three Rivers, Westmount, Brantford and Brandon all showed large increases in both comparisons; Halifax, Three Rivers and Brantford being especially noteworthy.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES

REPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid these employees during the first pay-roll period of two weeks in November showed a decrease of slightly over 3 per cent in the number of workers and an increase of almost 1 per cent in the wages paid in comparison with October. In November, 1918, 7,144 persons were temporarily engaged in the two weeks, and the pay-rolls amounted to $283,485.95, as compared with 7,419 employees and an aggregate pay-roll of $280,974.37, in October. In comparison with the same period of last year, a decrease of nearly 9 per cent in the number of persons engaged and an increase of slightly over 7 per cent in the wages paid, are indicated, there being 7,787 employees, with a total pay-roll of $263,590.36 in the first two weeks in November, 1917.

Ottawa, Winnipeg, and Calgary reported increases in the number of employees both as compared with October, 1918, and November, 1917, while Brandon showed an increase in comparison with October, 1918, and a slight decrease as compared with November, 1917. As to wages, Montreal, Ottawa, Brandon, and Calgary recorded increases in both comparisons. St. John, Winnipeg, Regina and Victoria showed a decrease as compared with October, 1918, and an increase over November, 1917. Toronto was the only city recording a noticeable decrease in both comparisons.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS—NOVEMBER, 1918, COMPARED WITH OCTOBER, 1918, AND WITH NOVEMBER, 1917.

MINIMUM WAGES FOR FEMALE EMPLOYEES IN MANITOBA

SINCE April 26, the date of the first meeting of the Manitoba Wage Board,* regulations have been issued by the Board affecting the following groups of occupations: (1) laundries; (2) abattoirs; (3) yeast factories; (4) creameries; (5) groceries; (6) pickle factories; (7) macaroni and vermicelli factories; (8) confectionery and biscuit factories; (9) retail stores; (10 paper box factories; and (11) soap factories. The awards covering laundries—group (1)—and food-stuff factories—groups (2), (3), (4), (5), (6) and (7)—have already been noted in the LABOUR GAZETTE,† but for purposes of comparison certain parts of these orders are recapitulated in the present article. The Board is now investigating the employment of women and girls in other industries. Further awards of the Board will be summarized from time to time in the LABOUR GAZETTE as the regulations bringing them into effect are published in the *Manitoba Gazette*.

Each set of regulations issued by the Board fixes a minimum weekly wage and maximum hours per day and week, and also prescribes the conditions under which female workers may be employed. The effect of the regulations is to standardize working conditions in the industries affected. Apart from slight variations due to the nature of a particular industry, as, for instance, the providing of guards for mangles in laundries, the requirements concerning the health, safety, and comfort of employees are identical in all the orders. The provisions respecting overtime, Sunday labour, weekly payment of wages, etc., are also standardized to a great degree. The regulations governing confectionery and biscuit factories are reproduced below, and, as regards working conditions in general, this one set of orders may be taken as typical of all. The wages and hours fixed by the different regulations, however, vary to some extent; and a table summarizing by industries the various sections dealing with wages and hours is, therefore, also included at the end of this article.

In fixing rates of wages the Board has divided female employees into three classes: (1) experienced workers of 18 years of age or over; (2) adult learners; (3) minors. The regulations fix a minimum wage for experienced adult workers. For adult learners two minimum rates are set, the first rate to be paid during the first three months of employment, and the second rate for the same employees during the second three months. After six months these employees shall be classed as experienced workers. In retail stores the probation period is 12 months instead of six months, and the second rate of learners' wages shall be paid at the end of six months instead of three months. In abattoirs, creameries, pickle and yeast factories, minors are treated as adult learners. In retail stores they are divided into three classes according to age. In all the other industries three minimum rates for minors are fixed. The first rate is for minors during the first six months of employment. At the end of six months these employees shall be paid according to the second rate, and after 12 months, according to the third rate. At the end of 18 months they shall be classed as experienced adults. The regulations also provide that any female employee who has been employed in a factory for at least six months, or in a detail store for at least 12 months, before reaching the age of 18 years, shall be classed as an experienced adult worker upon reaching that age. In retail stores an employee who reaches the adult age without experience

*For the text of the Act creating this Board see LABOUR GAZETTE, August, 1918, p. 681.

†See LABOUR GAZETTE, July, 1918, p. 537, and August, 1918, p. 637.

in selling goods shall serve a learning period of six months at a minimum rate of $11.00 per week.

The following is a typical set of regulations as issued by the Manitoba Minimum Wage Board:

REGULATIONS RESPECTING FACTORIES MANUFACTURING AND PREPARING CONFECTIONERY AND BISCUITS.

1. Conditions of Labour:

(1) Cleanliness.—Every room and the floors, walls, ceilings, windows, and every other part thereof, and all fixtures therein, shall at all times be kept in a clean and sanitary condition.

(2) Drinking Water.—A sufficient quantity of safe, fresh drinking water within reasonable access of all workers, and on the same floor as any regular working room, shall be provided with sanitary appliances for drinking. A common drinking cup shall not be used. When the water is iced, the ice shall not be in the same container as the water.

(3) Lighting. — Artificial illumination in every workroom shall be installed, arranged, and used, so that the light furnished will at all times be sufficient for the work carried on therein, and prevent unnecessary strain to the vision or glare to the eyes of the worker. Each workroom shall be lighted from outdoors, with windows at least equal in size to one-eighth of the floor space, and opening on a street, lane, or court at least 10 feet wide, except where the work requires a low temperature or a subdued light.

(4) Ventilations.—There shall be 400 cubic feet of air space for each employee in each workroom. All windows and sashes shall open freely. Air shafts shall be open to the outside air at top and bottom. Storm sashes shall either be on hinges or have a portion at least 80 square inches in size, which can be readily opened. In any workroom which cannot be ventilated by these means mechanical appliances shall be installed.

(5) Toilet Rooms.—There shall be provided suitable and convenient toilets, separate from those used by the opposite sex, and the number of such toilets shall not be less than one to every twenty-five female persons employed at one time, or fraction thereof. Such toilets must be thoroughly ventilated and open to the outside air, and must be kept in a clean and sanitary condition.

(6) Wash Basins, Etc.—Wash basins shall be provided in at least the proportion of one to twenty-five female persons employed at one time, or fraction thereof, and shall be separate from those used by the opposite sex. Individual towels, either cloth or paper, shall be furnished to the workers.

(7) Temperature.—There shall be a thermometer in each workroom, and the maximum temperature during working hours shall be between 60 deg. and 75 deg. Fahrenheit, except when the temperature outdoors exceeds 75 deg. Fahrenheit, and where the work requires a temperature lower than normal.

(8) Health and Injuries.—Each factory shall keep a First-Aid kit, and at least one reliable member of the working force of the factory shall be trained in its use. Where there are more than six employees, a couch or stretcher shall be provided for emergencies, and where no dressing rooms or similar apartment exists, a screen shall be provided.

2. Hours:

(1) Hours of Labour.—The hours of labour shall be not more than nine (9) hours in any day, nor more than forty-nine in any week. Saturday afternoon shall be a half-holiday. No female employee shall work between 9 p.m. and 7 a.m., nor between 12 o'clock Saturday night and 12 o'clock Sunday night.

(2) Overtime.—Overtime shall be governed by the regulations of "The Factories Act," viz., not oftener for any worker than 36 days in a year, and only on permit from the Bureau of Labour. There shall be extra payment at the regular rate if the work exceeds the number of hours allowed in these regulations to any industry.

(3) Lunch Hour.—One hour shall be allowed for lunch.

(4) Delays.—An employee waiting on the premises as required by the employer shall be paid for the time thus spent.

3. Wages:

(1) Method of Payment.—Wages shall be paid weekly.

(2) Notice to be Given.—Where the employees are engaged by the week, one week's notice shall be required on the part of the employer in dismissing an employee, and on the part of the employee on leaving employment, except in the case of flagrant insubordination on the part of the employee, or flagrantly unjust treatment on the part of the employer.

(3) The Minimum Wage.—No experienced female employee of 18 years of age or over shall be paid wages at a less rate than ten dollars ($10.00) per week.

(4) Adult Learners.—No inexperienced female employee of 18 years of age or over shall be paid wages at a less rate than eight dollars ($8.00) for the first three months after entering the factory and nine dollars ($9.00) for the second three months; after which period of six months she shall be considered an experienced employee. Not more than twenty-five per cent (25%) of the total adult female workers in any factory shall be learners.

(5) Minors.—Female employees under 18 years of age shall be paid not less than a weekly wage rate of seven dollars ($7.00) for the first six months; of seven dollars and a half ($7.50) for the second six months; and of eight dollars ($8.00) for the third six months. After 18 months' employment she shall receive

not less than the experienced adult rate of ten dollars ($10.00) per week. Any female employee who has been working six months or more in a factory before reaching the age of 18 years shall be considered, on reaching the age of 18 years, to be an experienced adult worker. The number of minors in any factory shall not exceed twenty-five per cent (25%) of the adult female employees.

4. Board, Lodging, Etc.:

Where lodging is furnished by the employer, there shall be deducted from the wage rate a sum which shall not be more than at a rate of two dollars ($2.00) per week; and for board at no more than a rate of four dollars and a half ($4.50) per week; and for both lodging and board at no more than a rate of six dollars ($6.00) per week.

5. Permits of Exemption:

Where exceptional conditions arise as in the case of extending or remodelling existing buildings, any deviation from these regulations shall be only by special permission from the Board.

6. Penalty:

Any violation of these regulations is punishable by fine or imprisonment, or both. See "The Minimum Wage Act," section 17.

7. Posting of Regulations:

Each factory shall keep a copy of these regulations posted in a conspicuous place.

The following is a summary of the various sections dealing with wages and hours in various industries contained in the regulations that have been published to date:

TABLE OF WAGES AND HOURS FOR FEMALE EMPLOYEES IN MANITOBA

Industry.	Maximum Hours.		Minimum Weekly Wage					
	Per day	Per week	Experienced Adults	Adult Learners		Minors*		
				(1st period)	(2nd period)	(1st period)	(2nd period)	(3rd period)
(1) Laundries	9	52	9.50	$8.00 for 1st 3 mos.	$9.00 for 2nd 3 mos.	$7.00 for 1st 6 mos.	$7.50 for 2nd 6 mos.	$8.00 for 3rd 6 mos.
(2) Abattoirs	9	48	10.00	8.00 for 1st 3 mos.	9.00 for 2nd 3 mos.	8.00 for 1st 3 mos.	9.00 for 2nd 3 mos.	....
(3) Yeast factories	9	48	10.00	8.00 for 1st 3 mos.	8.50 for 2nd 3 mos.	8.00 for 1st 3 mos.	8.50 for 2nd 3 mos.	
(4) Creameries	9	48	10.00	8.50 for 1st 3 mos.	9.00 for 2nd 3 mos.	8.50 for 1st 3 mos.	9.00 for 2nd 3 mos.	....
(5) Groceries	9	50	10.00	8.00 for 1st 3 mos.	8.50 for 2nd 3 mos.	8.00 for 1st 6 mos.	8.50 for 2nd 6 mos.	9.00 for 3rd 6 mos.
(6) Pickle factories	9	50	9.50	8.00 for 1st 3 mos.	9.00 for 2nd 3 mos	8.00 for 1st 3 mos.	9.00 for 2nd 3 mos.	..
(7) Macaroni and vermicelli factories	9	52	9.50	8.00 for 1st 3 mos.	9.00 for 2nd 3 mos	7.00 for 1st 6 mos.	7.50 for 2nd 6 mos.	8.00 for 3rd 6 mos.
(8) Confectionery and biscuit factories	9	49	10.00	8.00 for 1st 3 mos.	9.00 for 2nd 3 mos.	7.00 for 1st 6 mos.	7.50 for 2nd 6 mos.	8.00 for 3rd 6 mos.
(9) Retail Stores:—								
(a) Departmental stores.	8½	50	12.00	9.00 for 1st 6 mos.	11.00 for 2nd 6 mos.	7.00 if 14 or 15 yrs of age	8.00 if 16 years of age	9.00 if 17 years of age
(b) 5, 10, 15 ct. stores	9	48	12.00	9.00 for 1st 6 mos.	11.00 for 2nd 6 mos.	7.00 if 14 or 15 yrs of age	8.00 if 16 years of age.	9.00 if 17 years of age.
(c) Standard retail stores	8½	49	12.00	9.00 for 1st 6 mos.	11.00 for 2nd 6 mos.	7.00 if 14 or 15 yrs of age	8.00 if 16 years of age.	9.00 if 17 years of age.
(10) Paper box factories	9	49	10.00	8.00 for 1st 3 mos.	8.50 for 2nd 3 mos.	7.00 for 1st 6 mos. 8.00 for 1st 6 mos. if 17 years of age.	8.00 for 2nd 6 mos.	9.00 for 3rd 6 mos.
(10) Soap factories	9	49	10.00	8.00 for 1st 3 mos.	8.50 for 2nd 6 mos.	8.00 for 1st 6 mos.	8.50 for 2nd 6 mos.	9.00 for 3rd 6 mos.

* Minors who reach the age of 18 years after not less than 6 months' experience (12 months in retail stores) are classed as experienced adults.

EARNINGS OF CONTRACT MINERS IN ALBERTA AND BRITISH COLUMBIA

THE Director of Coal Operations for southwestern Alberta and southeastern British Columbia has compiled a schedule showing the earnings of contract miners in the principal mines in District 18 during the month of July, 1918. These earnings range from $4.72 to $17.06 per shift, the average earnings for each miner being $7.42 per shift. There were included in the schedule 47 mines, employing 3,028 contract miners, whose average total earnings per shift amounted to $22,488.79.

The schedule is as follows:

Name of mine.	Average earnings per man per shift	Average number of men employed	Average total earnings per shift
Canadian Pacific Railway Co. (Bankhead Mines)	$8.09	47	380.23
The Crow's Nest Pass Coal Co., Limited, (Coal Creek)	7.24	238	1,723.12
" " " " " " (Michel)	6.88	115	791.20
Hillcrest Collieries, Limited	7.43	80	594.40

Average	$7.42		

AWARD OF ADJUSTER OF WAGES IN B.C. SHIPYARDS

THE adjuster appointed by the Dominion Government for the settlement of grievances and rates of wages in British Columbia shipyards, in accordance with an agreement* which became effective on June 1, 1918, has made an award allowing employees an increase in wages of 2 cents an hour from September 1. The award is as follows:

Clause 15 of the working rules and rates of pay governing operations of shipbuilding and allied manufacturing plants in the province of British Columbia, as from June 1, 1918, provides as follows:

> "These rules to remain in effect for the period of the war; the wage rates will be revised every three months according to official information on the cost of living, as published in the LABOUR GAZETTE of the Department of Labour of the Dominion of Canada, as applicable to the province of British Columbia."

In accordance with the above clause I have investigated the cost of living in British Columbia and particularly in the area affected by the shipbuilding industry and have compared the figures for the month of June and for the month of August, as contained in the LABOUR GAZETTE, in order to arrive at the amount of increase, if any, to be added to the wages of employees governed by the agreement above referred to.

I find that the cost of living in the cities of Vancouver, Victoria, and New Westminster combined, as shown by the LABOUR GAZETTE, amounted for the month of June to $20,649, and for the month of August to $21,166, showing an increase of .517 or 52 cents per week. Dividing this by 44 hours, which is the ordinary working week in the shipbuilding yards, would give an increase of 1.2 cents per hour.

As the articles enumerated in the LABOUR GAZETTE do not include all the necessaries of life I have further investigated the increase in the cost of clothing, and other necessities, and find that such increases will be met by a further increase of .8 cents per hour to the wages, which in addition to the 1.2 cents per hour referred to above, makes a total of 2 cents per hour increase in the wages of all employees covered by the above agreement, such increase to be effective as and from September 1, 1918.

W. L. MACDONALD,
Adjuster.

*For text of the agreement see LABOUR GAZETTE, June, 1918, page 412.

REVISED SCHEDULE OF WAGES IN THE ANTHRACITE COAL MINING INDUSTRY IN THE UNITED STATES

READJUSTMENT of wages in the anthracite coal industry in order to stabilize them with reference to bituminous and other related industries was recently ordered by the United States Fuel Administrator, becoming effective on November 1. In general terms the readjustment provides for an average wage increase of $1.00 a day. The order embodies without change recommendations agreed upon by miners and mine operators after several conferences and submitted by them for the information of the conference of National Labour Adjusting Agencies. According to the findings of this conference the wages of the anthracite miners have been on a basis which tended to encourage the movement of miners to other occupations.

The new wage schedule is as follows:

(a) Contract hand and machine miners shall be paid an advance of 40 per cent on their gross earnings.

(b) Consideration miners shall be paid an advance of 25 per cent plus $1 per day for each day worked.

(c) Contract miners' labourers shall be paid an advance of 40 per cent on their earnings. As this increase of 10 per cent over the agreement of November 17, 1917, is less than $1 per basic shift, the difference between said increase of 10 per cent in the rate and $1 per basic shift shall be assumed by the operator.

(d) Consideration miners' labourers shall be paid an advance of 25 per cent plus $1 per day for each day worked.

(e) Day machine miners' labourers who received not less than $2.72 per day shall be paid an advance of 25 per cent plus $1 per day for each day worked.

(f) Outside blacksmiths, carpenters, electricians machinists, firemen, hoisting engineers on shafts and slopes where employment is limited by law or by the award of the Anthracite Coal Strike Commission to 8 hours per day, and engineers working on a 12-hour shift basis, shall be paid an advance of $2 per day for each day worked. All other outside company men who received $1.54 or more per day shall be paid an advance of $1.80 per day each day worked.

(g) Inside engineers and pumpmen working on a 12-hour shift basis shall be paid an advance of $2.20 per day for each day worked. All other inside company men who received $1.54 or more per day shall be paid an advance of $2 per day for each day worked.

(h) All employees paid by the day who received less than $1.54 per day shall be paid an advance of $1.20 per day for each day worked.

(i) Monthly men coming under the agreement of May 5, 1916, shall receive an advance per day for each day worked, equivalent to that provided for their respective occupations under paragraphs (f) and (g).

(j) The advances of $2.20 per day, $2 per day, $1.80 per day, $1.20 per day, and 25 per cent plus $1 per day provided above, are to be applied to a day, whether 8 hours or more, as established under the agreement of May 5, 1916; any proportionate part of a day to be paid a proportionate part of the advances herein provided.

(k) The employees of stripping contractors, paid by the day, working on the basis of a 9-hour or 10-hour shift, shall be paid the same increase per hour for each hour worked that is provided for outside company men working on an 8-hour basis.

The revised schedule of wages, which are based on the wage scale of May 5, 1916 (subsequently modified on account of war conditions), will be approximately as follows:

Occupation	Base, per hour		Adjustment, per hour	Rate, per hour	
OUTSIDE					
Blacksmith	$0.32	$0.35	$0.25	$0.57	$0.60
Carpenter	.32	.35	.25	.57	.60
Shaft engineers	.36	.40	.25	.61	.65
Firemen	.23	.28	.25	.48	.53
Machinery repairmen	.30	.32	.25	.55	.57
Labourers	.195	.235	.225	.42	.46
INSIDE					
Contract miners, average per start, August 18	*$5.63		$1.00		*$6.63
Contract labourers	.26		$0.40 30%+1.00	*3.70	*3.16
Consideration miners	.40		.45 25%+1.00	*5.00	*5.50
Company miners	.32		.35 .25	.57	.60
Inside labourers	.26		.29 .25	.51	.54

*Per day.

FAIR WAGES CONTRACTS, NOVEMBER, 1918

DURING November the Department of labour received for insertion in the LABOUR GAZETTE the following information relative to 23 fair wage contracts 18 of which were awarded by the Department of Public Works, and 5 by the Department of Railways and Canals. These contracts all contained the usual fair wage clause.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Construction of a Float, Hardy Bay, (Comox-Alberni District, B.C.). Name of contractors, McDonald & Watson, Victoria, B.C. Date of contract, October 2, 1918. Amount of contract, $2,136.00.

Construction of Main Sewer at Military Hospital Buildings, London, Ont. Name of Contractors, The John Hayman & Sons Company, Limited, London, Ont. Date of contract, October 31, 1918. Amount of contract, $10,945.00.

Repairs to Government Wharf, Victoria, B.C. Name of contractors, McDonall & Watson, Victoria, B. C. Date of contract, October 28, 1918. Amount of contract, Unit Prices.

Construction of Men's Mess Building and Guard House at Exhibition Grounds, St. John, N.B. Name of contractors, Kane & Ring, St. John, N.B. Date of contract, October 17, 1918. Amount of contract, $20,588.00.

Installation of Heating and Plumbing in Nurses Home, St. John, N.B. Name of contractor, R. E. Fitzgerald, St. John, N.B. Date of contract, September 26, 1918. Amount of contract, $5,940.00.

Alterations to Residence, Stable and Barn at Old Stewart Homestead, Hull, Que. Name of contractor, Joseph Bourque, Hull, Que. Date of contract, November 9, 1918. Amount of contract, $8,575.00.

Military Supply Depot, St. Johns, Que. Name of contractor, Pierre Trahan, St. Johns, Que. Date of contract, November 8, 1918. Amount of contract, $13,325.00.

Ordnance Store Building, Ottawa, Ont. Name of contractors, Doran & Devlin, Ottawa, Ont. Date of contract, November 15, 1918. Amount of contract, $14,483.00.

Installation of Heating and Plumbing in Medical Officers' Residence, St. John, N.B. Name of contractor, F. S. Walker, St. John, N.B. Date of contract, November 14, 1918. Amount of contract, $2,650.00.

Repairs to Government Wharf, Tofino, B.C. Name of contractors, McDonald & Watson, Victoria, B.C. Date of contract, November 15, 1918. Amount of contract, Unit prices.

Construction of New Boiler House—Quarantine Station, Grosse Isle, Que. Name of contractors, T. Beaumont & R. Belanger, Montmagny, Que. Date of contract, November 16, 1918. Amount of contract, $25,590.00.

Construction of Active Treatment Wards, Convalescent Wards in connection with Military Hospital, London, Ont. Name of contractor, A. B. Coleman, Toronto, Ont. Date of contract, November 27, 1918. Amount of contract, $295,000.00 for active Treatment Wards, and $170,000.00 for Convalescent Wards.

Construction of Floating pontoon, Ste. Anne de Chicoutimi, Que. Name of contractor, Jos. Bouchard, Ste. Anne de Chicoutimi, Que. Date of contract, November 19, 1918. Amount of contract, Schedule of prices.

Construction of Kitchen Wing in connection with Military Orthopaedic Hospital, Toronto, Ont. Name of con-

tractors, The Jackson-Lewis Co., Ltd., Toronto, Ont. Date of contract, November 18, 1918. Amount of contract, $56-000.00.

Detention Cell Building, Calgary, Alta. Name of contractor, W. H. Cawston, Calgary, Alta. Date of contract, November 6, 1918. Amount of contract, $3,100.00.

Construction of Boiler House in connection with Military Orthopaedic Hospital, Toronto, Ont. Name of contractors, Russell-Navin Construction Co. Ltd., Toronto, Ont. Date of contract, November 19, 1918. Amount of contract, $78,243.00.

Construction of Root, Seed and Implement Building at Experimental Farm, Ottawa, Ont. Name of contractors, Taylor & Lackey, Ottawa, Ont. Date of contract, November 19, 1918. Amount of contract, $9,950.00.

Dredging at Government Wharf, Fourchu, N.S. Name of contractors, Atlantic Dredging Company, Ltd., Louisburg, N.S. Date of contract, November 14, 1918. Amount of contract, Class "B" $0.60c p. c. yd. (scow).

Department of Railways and Canals.

Construction of a standard 40,000 gallon water tank at Hampton, N.B., and at West Bay Road, N.S. Name of contractor, M. A. Condon, Digby, N.S. Date of contract, November 6, 1918. Amount of contract, $4,890.00 and schedule rate for additions or deductions.

Construction of about 2.7 miles of railway, from a point near Moffatt Station, about Mileage 7.4 from Campbellton. N.B., on the main line of the Intercolonial Railway, District No. 2, Campbellton, to a junction with the I. C. R., about Mileage 7.4 from Campbellton. Name of contractor, R. B. Stewart, Perth, N.B. Date of contract, October 16, 1918. Amount of contract, schedule rate.

Construction of a radial brick chimney and erection of a lightning rod at the power house at Chaudiere Junction, P.Q. Name of contractors, Custodis Canadian Chimney Company, Limited, Toronto, Ont. Date of contract, November 27, 1918. Amount of contract, $5,787.00.

Construction of a car cleaning shop, stores and ice house at Halifax Ocean Terminals. Name of contractors, Bate, McMahon Maritime Company, Limited, Ottawa, Ont. Date of contract, November 27, 1918. Amount of contract, Force Account Basis plus 7½ per cent; not over $109,176.00.

Dismantling and removal of an old wooden highway swing bridge over the St. Peter's Canal, at St. Peter's, Nova Scotia, and the dismantling, adaption and erection in place thereof of an old steel swing bridge now lying on the Canal bank at Cardinal, Ont. Name of contractors, The Maritime Bridge Company, Limited, New Glasgow, N.S. Date of contract, November 27, 1918. Amount of contract, actual cost plus 10 per cent profit.

Post Office Department.

The following is a statement of payments made in November for supplies ordered by the Post Office Department, subject to the Regulation for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of Orders.	Amount of Orders
Making metal dating stamps and type and making other hand stamps and brass crown seals	2,082.70
Making rubber stamps	164.62
Supplying stamping material and repairing stamping pads	619.63
Repairing parcel scales and beam scales	50.35
Repairing satchels	24.36
Supplying new mail bags	540.00
Supplying mail bag fittings	8,971.11
Making and repairing miscellaneous articles of postal stores	18.15
Repairing railway mail clerks' tin travelling boxes and steel portable boxes	49.86

INVESTIGATION INTO THE COST OF LIVING FOR COAL MINERS IN THE PICTOU DISTRICT, NOVA SCOTIA

An inquiry to ascertain the increase in the cost of living in the Pictou coal mining district of Nova Scotia between January 1 and August 31 was made during October and November by a committee under the authority of C. A. Magrath, Fuel Controller for Canada, as Director of Coal Operations for the Maritime Provinces. The investigation was made in accordance with an agreement made on September 26 by the Fuel Controller with the Federation of Labour, to which the miners of the Pictou district belong, terminating a strike which had begun September 14 and lasted till September 28. The employees at the mines had been granted an increase in wages in April, and it had been agreed that a further increase should be given at the end of August to meet any further increase in the cost of living. The employees demanded an increase in wages of 10 per cent for all getting $3.50 per day or more, and 15 per cent for all getting less; and a minimum of $5.00 per day for all contract men, that is, coal cutters paid by the ton, etc. The employers offered a flat increase of 20 cents per man per day. The agreement made by the Fuel Controller, under which the strike was settled, stipulated that the committee should determine the increase in the cost of living between January 1 and August 31, and the men should receive an increase in wages according to the cost of living as so determined, but not less than 20c per man per day. It was further provided that wages so adjusted should remain in effect for four months from September 1, 1918. It was further provided that this committee should consist of three representatives of each side, aided by Mr. C. W. Bolton, an officer of the Department of Labour.

The representatives of the miners were Alex. MacLeod, Stellarton; H. F. Chabassol, Westville, and David Ryan, Thorburn, representing respectively Branches No. 2, 3, and 5 of the Federation of Labour; and the representatives of the coal operators were J. A. Cunningham, D. J. Holland, and C. J. MacKinnon, representing respectively the Acadian Coal Company, Limited, Stellarton, the Intercolonial Coal Mining Company, Limited, Westville, and the Greenwood Coal Company, Limited, Thorburn. The committee met at New Glasgow on October 10, and completed its report on November 6, awarding an increase in wages of 27c per man per day. (The present statement is furnished by Mr. Bolton, who acted as chairman of this committee.)

The calculation as to the cost of living was based upon the yearly expenditure of an average family of five, consisting of a man, wife, and three children, that is, a boy between 11 and 13 years of age, a girl between 7 and 10 years, and a child between 4 and 6 years of age; the family being, of course, purely imaginary, but typical. The members of the committee collected information as to the quantities and classes of goods purchased by the miners in the three mining centres of the locality, Stellarton, Westville, and Thorburn, and obtained information as to prices in January and August from bills in the possession of householders, from merchants' accounts, and from merchants themselves. As it appeared that the majority of the miners' families were living on an income of less than $4 per working day, the yearly budget for such an average family, living on $1,000 per annum, at the beginning of the year was calculated in terms of the prices prevailing in the district at the beginning of January and the end of August. The accompanying table shows the cost by the principal groups of expenditure at both dates.

Yearly expenditure for an average family of five in terms of prices prevailing January 1 and August 31, 1918:

Foods.	January.	August.
Meats and fish	$171.95	$190.54
Dairy produce, etc	169.15	171.80
Bread and cereals	85.44	88.67
Vegetables	45.80	51.25
Fruits	31.70	32.80
Sugar	40.45	42.85
Tea, etc.	21.30	24.80
Condiments	8.72	10.44
Clothing.		
Man	75.94	85.21
Woman	57.89	68.80
Boy	37.78	44.18
Girl	31.77	35.80
Child	19.83	23.01
	223.21	257.00
Rent	60.00	60.80
Fuel	38.00	38.66
Coal oil	4.50	5.04
Union dues, doctor, etc.	21.60	21.60
School supplies, etc.	14.78	16.76
Miscellaneous expenditure	63.40	68.40
	$1,000.00	$1,081.41

In determining the quantities of, and expenditure on, food and clothing to be used for the calculation on the basis of such an income the lowness of the rates paid by the miners for coal and rent was taken into consideration. As all the miners obtained coal from the mines at a rate about $5 per ton below the market price and as nearly all lived in company houses at rents averaging about $5 per month, or owned their own houses, it was found that the expenditure on fuel and rent was a small proportion of the total. The proportions allowed in the calculation for food and clothing were, therefore, as large as possible for such an income and the proportion for miscellaneous expenditure was, therefore, kept low,—owing to the difficulty in ascertaining the precise expenditure of the various families on the items in the miscellaneous group in the attached table and the prices of the articles. This was considered desirable as it ensured a full allowance being made for the increased cost of the ordinary necessaries and comforts in food, clothing, etc., for the families on the low incomes, whose expenditure on the other items would be necessarily low. As the adjustment of wages was by a flat increase per man per day, this would also be in accordance with the needs of the families on the larger incomes.

In calculating the cost of food and clothing for a family of five on such an income, it is deemed necessary to take largely the lower priced goods and to reduce the quantities of the higher priced grades. In clothing, a higher priced staple article will usually last longer than a cheaper article, but in food this principle does not apply to the same degree. In this case the quantities allowed and the prices used in the calculation for the food and clothing groups were as high as the limits of the estimated income would permit. In the expenditure on rent, fuel, lighting, deduction from pay for union dues, doctor, hospital, etc., the variations were slight and the expenditure to a great extent fixed.

In the groups for miscellaneous expenditure the amount allowed was the difference between the total expenditure on the other groups in January and the estimated total income of $1,000. The increase in prices for this group was allowed according to the average increase shown by the other groups, namely, 8 per cent, raising the figure for this group from $63.40 in January to $68.40 in August. The total cost of the budget in terms of August prices, therefore, appeared at $1,081.41, as compared with $1,000 at January prices, showing an increase of $81.41 per year. On the basis of three hundred working days per year the increase in wages to meet the increased cost of living was, therefore, determined at 27c per day.

PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1918, AND IN OTHER COUNTRIES

THE general movement in prices was very slight, there being increases in some lines but decreases in others. Some markets were affected by the cessation of hostilities, but seasonal changes were important factors also.

In retail prices the average cost of a family budget of staple foods in some 60 cities was $13.49 at the middle of November, as compared with $13.54 for October, $12.10 for November, 1917, and $7.96 for November, 1914. The slight decrease for the month was due to lower prices for potatoes, but this was largely offset by slight increases in several other lines, while the advances in dairy products were substantial. Meats, however, were slightly lower. Coal and wood showed very little change.

In wholesale prices the index number for November was almost unchanged, standing at 290.0, as compared with 289.6 for October, 247.3 for November, 1917, and 135.8 for November, 1913. For the month, however, there were important changes, there being substantial decreases in some grains, corn, peas, and rye; while all livestock and meats were lower except beef forequarters, bacon, ham, and lard. In dairy products there was a slight increase in the average, while in fish there was a slight decrease. Fruits and vegetables averaged higher, although there were decreases in several of the lines, but the prices fluctuated considerably owing to seasonal conditions. Textiles averaged higher, owing to advances in flax and oilcloths. Hides were up, but calfskins were down. In metals there were some decreases, particularly in quicksilver and tin. Anthracite coal was higher, also New Brunswick lumber, while British Columbia lumber was lower. Advances in naval stores raised the average for the Paints, Oils, and Glass group.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, oing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada

*December only. †Newcastle, N.B. and Nanaimo, B.C., omitted.

having a population of 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

Retail Prices

Meats continued to decline slightly, there being slight decreases in all the provinces. Dairy products, however, were higher, particularly eggs. Bread and flour were steady, but there were slight increases in several other lines. Canned tomatoes averaged lower. Sugar was up. In potatoes there was a considerable decrease, there being declines except in the province of Saskatchewan. Coal averaged lower owing to the decline in Nova Scotia, while there were slight decreases in Ontario and Quebec. Bituminous coal averaged higher. Hardwood was also up.

Wholesale Prices

GRAINS AND FODDER.—Wheat was unchanged at the prices fixed in August. Barley at Winnipeg rose from $1.04¾ per bushel at the beginning of the month to $1.10¾ in the third week, but declined to the previous level. Barley at Toronto rose 3c to $1.03-1.08. Oats at Winnipeg declined from 85c per bushel to 80c. At Toronto oats rose 2c, reaching 77-80c per bushel. Corn was down to $1.60 per bushel, but rose to $1.65. Flaxseed was down to $3.47 per bushel at the beginning of the month, rose to $3.79, but fell to $3.50. The new crop of peas came on the market at $2.10 per bushel and rye came on at $1.65. Hay at Montreal rose $1.00 to $25.00-26.00 per ton, and a similar price was reached at Toronto. Straw advanced $2.00 per ton to $11.50.

ANIMALS AND MEATS. — Cattle were again lower, butchers at Winnipeg declining from $12.00-13.00 to $11.00-11.75. At Toronto prices eased off at the middle of the month, but in the last week were firmer at $12.00-14.50. Dressed beef hindquarters were down 1c to 22-24c per pound. Veal was lower at 18-22c per pound. Live hogs were down to $16.75-17.00 at the end of October, but rose 25c in the first and second weeks of November and $1.00 in the last week, reaching $18.50. Dressed hogs were lower by 2c at 23-24c per pound. Sheep, mutton, lamb and poultry also averaged lower.

DAIRY PRODUCTS.—Butter at Montreal rose from 49-50c to 51-51½c per lb. Eggs continued at 65-70c per dozen at Montreal. Milk advanced to winter prices in some of the cities.

FISH.—Prepared fish were steady, but salmon trout and whitefish were lower at Toronto.

FRUITS AND VEGETABLES.—Apples were up to $5.50-7.00 per barrel at Toronto. Bananas and lemons were higher, but oranges declined when the Florida crop came on the market. Prunes and raisins tended higher. Potatoes were slightly higher at Toronto, but were lower at Montreal. Onions were down to $1.50-2.00 per bag of 75 pounds. Turnips were on the market at 75c per bushel. Canned corn was slightly easier. Canned tomatoes were down to $1.80-2.10.

MISCELLANEOUS FOODS.—Flour declined 15c to 25c per barrel. Rolled oats was also slightly lower. Tapioca was firmer at 14½-15c. Sugar rose nearly 60c per hundred pounds. Honey was higher at 28-30c per pound.

TEXTILES. — Raw cotton was down nearly 3c at 29.9c per pound. Cotton goods, however, averaged higher. Flax fibre, tow, and flax sewing twine and oilcloth advanced.

HIDES, LEATHER, BOOTS AND SHOES.—Beefhides advanced to 20c per pound, but calfskins declined to 40c per pound.

METALS AND IMPLEMENTS. — Quicksilver was easier at $125.00 per flask. Tin was lower at 85-95c per pound. Horseshoes were slightly easier.

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR NOVEMBER, 1918, OCTOBER, 1918, AND NOVEMBER, 1917, 1916, 1915, 1914, AND 1913.

(Average price 1890–1899—100.)

FUEL AND LIGHTING.—Anthracite coal was up to $10.85 per ton at Montreal.

BUILDING MATERIALS. — New Brunswick lumber advanced, spruce deals reaching $31.00 per thousand. British Columbia lumber declined, shiplap being down to $22.00 per thousand and flooring to $45.00 per thousand. Shingles also declined from $3.50 per thousand to $3.00. Building paper was firmer. Copper wire was easier at 29½c per pound. Linseed oil was lower, but turpentine and resin were higher. Shellac also advanced, while paints advanced about 5 per cent.

DRUGS AND CHEMICALS.—The markets were fairly steady owing to uncertainty as to war and peace conditions. The epidemic of influenza increased the demand for certain lines.

MISCELLANEOUS.—In raw furs mink advanced. Raw rubber was firmer at 57-59c per pound.

Prices in Other Countries

In the United Kingdom, the wholesale prices index number of the *Economist,* London, was lower at the end of October, there being declines in a few important commodities, cotton, wheat, copper, tin, rubber, while oats, potatoes and pork were higher.

In the United States, the index number of *Bradstreet's,* New York, for the first of November was again lower, continuing the decline since July. *Dun's* index number was also lower, decreases appearing in Breadstuffs, Meat, Clothing, Metals, and Miscellaneous, with slight increases in Dairy and Garden Produce and in Other Foods.

REGULATION OF THE ALBERTA WORKMEN'S COMPENSATION BOARD

THE *Alberta Gazette* for October 15 contains the first regulations made under the Alberta Workmen's Compensation Act, 1918.* These regulations supplement the provisions of the Act itself guarding against malingering on the part of employees claiming compensation. Section 43 of the Act provides that a workman who claims compensation or to whom compensation is payable shall submit himself for examination by a medical referee if so required by the Board. Section 62 requires every employer under the Act to give notice of accidents and every physician attending an injured workman to forward a report to the Board within seven days after the date of his first attendance upon such workman. The new regulations require the following additional reports from physicians and employers respectively:

1. In addition to the report required to be forwarded to the Board in accordance with the provisions of section 62, sub-section 2 of the Act, the physician or surgeon attending any workman shall forward to the Board progress reports on the first and fifteenth days of each month during the time such injured workman is unable to resume work as a result of injuries sustained by him, as stated in the report first mentioned herein, and shall also forward to the Board a final report within three days after said workman is, in his opinion, able to resume work. All reports required to be provided in accordance with this regulation shall be on a form which may be prescribed from time to time by the Board.

2. Every employer, in addition to the report required to be forwarded to the Board in accordance with the provisions of section 62 of the Act, shall also forward, on a form prescribed by the Board, within 24 hours after the same comes to his knowledge, notification that the injured workman has returned to work, or is, in his opinion, able to return to work.

The Compensation Acts of Nova Scotia, Manitoba, and British Columbia contain requirements respecting medical examinations and medical reports very similar to those of the Alberta Act supplemented by the above regulations. The

*For text of the Act see LABOUR GAZETTE, August, 1918, p. 658.

Manitoba Act, however, contains the additional provision, which appears also in the Ontario law, that a workman shall, upon request of his employer, submit himself for examination by a physician provided and paid for by the employer. The Ontario Act and the New Brunswick Workmen's Compensation Act, 1918, empower the Compensation Boards of Ontario and New Brunswick respectively to require a workman to submit to examination by a medical referee, but do not provide for periodical reports from physicians attending injured workmen.

WORKMEN'S COMPENSATION LAWS IN THE UNITED STATES

THE United States Bureau of Labour has issued a bulletin* summarizing and comparing the principal features of the workmen's compensation laws of the several states and territories which were in force at the end of the year 1917. A total of 40 states, territories and insular possessions have passed such laws, and of these 35 have made important statutory changes since their first enactment. This legislation only dates from March 14, 1911, when the compensation laws of Washington and Kansas were passed, although prior to that time various states had passed workmen's compensation laws which were later declared unconstitutional by the courts. There is a great variety in the system of compensation adopted and in the scope of the laws in the different states. Usually agriculture, domestic service, and casual occupations are exempted. In 12 states the compensation Acts are compulsory, and in the remaining 28, employers have the option of either accepting or rejecting the Act, but, in the latter event, they are usually prohibited from pleading the customary common-law defences of assumed risk, fellow service, and contributory negligence. In 35 states employers are compelled to carry insurance against loss through accidents, but the forms of insurance vary. In five states there is a state monopoly of insurance, but in three of these the compensation law is not compulsory. Eleven states have state funds to which employers are required to contribute, 27 allow employers to insure in private companies, and 28 allow them also to carry their own risk, under certain safeguards.

There are some differences in the nature of accidents for which compensation is granted in the various states. In most cases occupational diseases are not included, but the courts have been liberal in interpreting the law, and compensation has been granted for sunstroke, cerebral hemorrhage, nervous shock, pneumonia, typhoid, anthrax, and other diseases. In four states, as well as under the federal law, occupational diseases are included either specifically, as in California, or by implication and under rulings of the courts. Since the first enactment of the laws there has been little change in the employments covered by them, the more important additions being hotels of 50 or more rooms in New York, and cotton ginning in Texas. There is also a tendency to abolish the exemption of casual employments. In two states public employees have been added to those entitled to compensation. Out of 17 states which originally exempted employers having less than a certain number of employees, three have reduced the number of employees and two have abolished the numerical exemption provision altogether.

There is some variation in the length of time that must elapse between the occurrence of an accident and the date when compensation becomes due. The tendency has been the reduction of this waiting period, seven states having abolished it under certain circumstances, while 11 others reduced it, and only two have increased the waiting period. The longest period is three weeks, which is

*Comparison of Workmen's Compensation laws of the United States up to December 31, 1917. Bulletin of the United States Bureau of Labour Statistics, No. 240. 1918. 105 pp.

the time fixed in New Mexico. In 18 states disability must continue for more than two weeks, four require more than 10 days, and 13 more than one week. In Arizona no compensation is paid for the first two weeks, but if disability continues longer, compensation begins from the date of injury. This principle is followed in a number of other states.

The provisions as to medical service have undergone greater change than any other feature of the workmen's compensation laws. Sixteen states have increased the medical service originally provided either as to maximum amounts or length of time during which such service is to be furnished, and in four of these the time limit was abolished entirely, the employers being compelled to provide medical attendance as long as reasonably necessary. In a number of states compensation commissions were authorized to approve or supervise hospitals and benefit funds maintained by employers, and in three states the laws were amended specifically giving employees the right to choose their physician when the cost of the medical service is paid by the employer.

There are two systems of administering compensation Acts, the commission or board type, of which there are 30, and the court type, of which there are 10. In the commission type, which appears to be the most satisfactory, a board, usually of three or five members, is appointed; but five states have a single commissioner, and in some states the administration of the compensation Act is in the hands of an industrial commission, which has power to enforce all the various labour laws of the state. The commission receives accident reports, investigates claims, settles disputes, hears cases, grants awards, issues decrees, and where there is a state fund, classifies industries, fixes and collects premiums, and pays compensation. In the court type, the amount of compensation and other questions are settled directly by the employer or insurer and the injured employee. In cases of dispute, the matter may be referred to an arbitration committee and eventually taken to the courts.

It is pointed out in the report that very little has been done in the re-education of industrial cripples and their re-adaptation to vocational pursuits, and there have been very few systematic attempts to secure suitable re-employment for permanently disabled workmen. The necessary medical and surgical attention required for this purpose can only be obtained in the four states which provide for unlimited medical services. The great importance and social value of the speedy restoration of the earning capacity of injured workers has not been generally recognized, and as a consequence these unfortunates are generally left to shift for themselves. The greatest drawback has been the lack of definite and centralized responsibility to carry out this important work of economic rehabilitation.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Stepmother not entitled to damages under Quebec Workmen's Compensation Law

A WORKMAN was killed when in the discharge of his duties as boilermaker in the Government shipyard at Sorel, Que. His stepmother sought, by petition of right, to recover the sum of $5,000 for alleged damages arising out of his death. In the Exchequer Court of Canada, it was ruled that the suppliant was not entitled to any portion of the relief sought for by her petition of right inasmuch as a stepmother is not an "ascendant" within the meaning of the Quebec Civil Code, article 1056, which reads as follows: "In all cases, where the person injured by the commission of an offence or a quasi-offence dies in consequence, without having obtained indemnity or satisfaction, his consort and his ascendant and descendant relations have a right, but only within a year after his death,

to recover from the person who committed the offence or quasi-offence, or his representatives, all damages occasioned by such death." (*Canada.—Bonin v. The King.*)

Prior wage basis of compensation when work not continuous under Quebec law

A workman was injured when engaged on munitions work at Montreal and made a claim for damages under the Workmen's Compensation Act. It appears that he had at first been engaged as a labourer, but after a few months' time was advanced to the class of a skilled workman at a higher salary. He had been employed as labourer and skilled workman by the defendant company for the period of seven months. The company protested his claim upon the ground that the wages received by the plaintiff during seven months plus the wages of workmen of the class in which he was engaged at the time of the accident during the time necessary to complete the 12 months exceeded $1,000, which is the limit of wages to which the Workmen's Compensation Act of Quebec can be applied.

The Court of first instance decided in favour of the plaintiff on the ground that the work on which he was engaged at the time of the accident was not continuous. The basis of rent to which he was entitled should therefore be calculated according to his remuneration during the seven months he was engaged with the defendants and according to his earnings prior to his entering defendants' employ for a period sufficient to make up 12 months. This amount being less than $1,000, his action was held to come within the provisions of the Workmen's Compensation Act.

The case was appealed by the company and the judgment of the lower Court was sustained by the Court of Review. It was held that in view of the fact that he had not been working for the company for a full year, in ascertaining the average earnings of the plaintiff the wages of workmen of the class in which he was when he entered the defendants' service should be taken into consideration, and not the average earnings of the class in which he was working at the time he was injured.

It was held that the words "continuous" and "not continuous" apply not to the actual work of the employee, but to the nature of his work. It was, however, pointed out that the plaintiff had produced no proof to show the average wage of the class of workmen with whom he was engaged when he entered the defendants' service. This absence of proof would justify dismissal of the action, but under the circumstances, as the plaintiff's right of action was upheld, it was ruled that the record of the case be sent back to the Superior Court in order to allow the plaintiff to complete the proof requisite before final judgment. It was further ruled that the plaintiff must pay the costs in the Court or Review and the costs of the new hearing. (*Quebec.—Pelletier v. Montreal Locomotive Works.*)

A similar case was tried at the same time before another Division of the Court of Review. A workman had been engaged as a spare brakeman on the railway for three months when he met with an accident which caused his death. His widow sued for damages under the Workmen's Compensation Act of Quebec, but the railway company submitted that the action could not succeed under the Workmen's Compensation Act since the deceased workman was receiving wages at the rate of $3.60 per day, which would amount to more than $1,000 a year. The Superior Court ruled that the period calculated to complete the basis of 12 months' work in addition to the three months when he was employed as brakeman should be the nine months prior to the accident. This would bring the case within the provisions of the Workmen's Compensation Act and judgment was accordingly given in favour of the widow. This judgment was sustained

by the Court of Review. (*Quebec.—Duquette v. Grand Trunk Railway.*)

Questions of fact are exclusively within jurisdiction of juries

A workman employed in making cartridges in a munition factory in Montreal was standing beside his machine which was at rest, when it was suddenly set in motion, and a heavy punch dropped on his right hand, crushing it so that it had to be amputated. He sued the company for $11,300 damages, on the ground of negligence in not keeping the machine in good condition, claiming that the clutches which served to stop the machine and keep it at rest were defective. The company denied this, and laid the responsibility for the accident on the workman himself, since he must have set the machinery going by some act of imprudence. The case was submitted to a jury, which found there was a common fault, and assessed the damages at $8,000, of which sum the employers were charged with $6,000, and the workman with $2,000. The Superior Court rendered judgment accordingly. On appeal this judgment was sustained by the Court of Appeal. It was declared by the Court that questions of fact are exclusively within the jurisdiction of the jury, and in the face of contradictory evidence the jurors could reasonably arrive at the conclusion that the machine was set in motion because it was defective. It could not be said that the jury were unable to bring in any other verdict except one in favour of the appellant. (*Quebec.—Parent v. Montreal Ammunition Company, Limited.*)

Damages awarded for accident to minor illegally employed

A boy of fifteen years obtained employment in a factory for the manufacture of metal stoppers for bottles, and was set to work at a dangerous machine, in consequence of which he met with an accident, injuring the index finger of his right hand. His father brought an action for damages against the employer under the law relating to industrial accidents. The action was opposed by the employer on the grounds that the accident was caused by the fault and disobedience of the boy, that the consequences of the accident were of little importance, and that the sum of $10 which the plaintiff had given the injured boy was sufficient to indemnify him. The evidence showed that the factory was a dangerous establishment as defined in article 3833 of the Revised Statutes of Quebec, which forbids the employment of workpeople under sixteen years of age in such factories. In view of these facts the Court found that the accident was due to the inexcusable fault of the defendant, and as, on account of it, the boy was prevented from working for four months, the damages were fixed at $150 with costs. (*Quebec. —Vanier v. Bouthillier.*)

In lumber camps verbal contract with physician sufficient as affecting employees

A boy employed in a lumber camp in Ontario left work on account of illness and returned home. There it was discovered that he had contracted typhoid fever in the camp. His father sued the lumber company for the recovery of money expended by him in connection with the illness, and was awarded $144 and costs in the District Court of the District of Nipissing. The plaintiff's action was based on the claim that the company had violated the regulations of the Provincial Board of Health in not having a written contract with a physician for the supplying of medical attention to the employees. The company appealed from this decision, and the case was heard in the appellate division of the Supreme Court of Ontario. It was alleged by the company that the boy had been dismissed for theft, but no evidence in proof of this charge was produced. It was further claimed by the company that the camp had been regularly visited and inspected by a duly qualified medical practitioner under a

verbal contract which was of the same tenor as a written contract made in the previous year. It was ruled by the Court that the regulations did not require a written contract, except for the purposes of the Board of Health, and that so far as the employees were concerned, a contract, whether verbal or written, met the requirements of the Board. The appeal was therefore allowed and the action dismissed. The company, however, was not allowed costs on account of the unsupported charge of theft that they brought against the boy. (*Ontario.—Unger v. Hettler Lumber Co.*)

Employer liable when accident due to urgent and not unreasonable act

A railway employee left his caboose and started for the yard office to get his orders before taking out his train. Another train attached to a switching engine obstructed his path. After waiting a couple of minutes for the engine to move, he climbed the ladder attached to a car and descended the other side. At the moment of alighting, the train began to move, causing him to fall and break his wrist. He brought action against the railway company under the Workmen's Compensation Act. Damages were awarded by the District Court Judge, who found that the accident arose out of the plaintiff's employment. The case was taken to the Saskatchewan Court of Appeal, which sustained the decision of the lower Court and dismissed the appeal with costs. It was pointed out that it was a matter of urgency for him to pass that train, and the alternatives of going around it or crossing over it might both be dangerous. While there was no evidence that the defendant company was aware of any custom of its employees crossing between cars attached to an engine, yet to the knowledge of the company its employees were in the habit of getting on and off moving trains, and the act of the plaintiff under the circumstances was not unreasonable. (*Saskatchewan.—Cameron v. Canadian Pacific Railway Company.*)

REVIEWS

UNITED KINGDOM.—Ministry of Reconstruction. Reconstruction Committee. Forestry Sub-Committee. Final Report. 1918. 105 pp.

Afforestation in the United Kingdom

A SUB-COMMITTEE of the Reconstruction Committee of Great Britain was appointed by the Prime Minister in July, 1916, "to consider and report upon the best means of conserving and developing the woodland and forestry resources of the United Kingdom, having regard to the experience gained during the war." The sub-committee recently issued its final report, which contains a number of important proposals with reference to the adoption of a scheme of afforestation. It was estimated that the total area under woodland in the United Kingdom before the war was three million acres, the annual yield from which was believed to have been forty-five million cubic feet, about one-third of what it should have been under correct management, and less than 8 per cent of the consumption. The area of land utilized for rough grazing, but capable of growing first-class coniferous timber, is not less than three and probably more than five million acres. In order to render the United Kingdom independent of imported timber for three years in an emergency, it is necessary to afforest 1,770,000 acres. Taking 80 years as the average rotation, it is advised that two-thirds of the whole should be planted in the first 40 years, but in the first 10 years the quota to be planted should be limited to 200,000 acres, of which 150,000 acres should be planted by the state, and 50,000 by public bodies and

private individuals assisted by grants, or by co-operation between them and the State.

The sub-committee propose that a limited area of arable land should be acquired with the forest sites, wherever possible, in order to provide small holdings for the forest workers, thus affording the means for settling discharged soldiers on the land under healthy conditions. It is estimated that the policy recommended will begin to provide pitwood from the fifteenth year onward, and that by the fortieth year the plantations made in the first 10 years alone will contain sufficient timber to keep the pits supplied, in emergency, for two years on the scale of present consumption. The cost for the first 10 years is estimated at £3,425,000, and during the first 40 years the sum of £15,000,000. After that the scheme should be self-supporting. The first essential to carrying out the scheme, in the view of the sub-committee, is a Forest Authority equipped with funds and powers to survey, purchase, lease and plant land and generally to administer the areas acquired, with compulsory powers to be exercised, when needed, after due enquiry and the award of fair compensation, and the centralization of the care of forestry in this body. In conclusion, it is pointed out that the United Kingdom derives more than half its imported timber from virgin forests in foreign countries, which are steadily being depleted, and that Canada contains the only large reserves within the Empire. The sub-committee state that unless arrangements can be made with the Dominion Government for the effectual conservation of these reserves, it is inevitable that provision should be made within the British Isles on a far larger scale than is proposed for purposes of defence.

UNITED STATES.—Twenty-sixth Annual Report of the Maryland State Board of Labour and Statistics, 1917. 241 pp.

Child labour in Maryland

A large portion of the Report of the Maryland State Board of Labour and Statistics for 1917 deals with the enforcement of the Child Labour law, which is said to be the most important of all the duties that the Labour Bureau is required to perform. Under the law of Maryland, children under 14 years of age are required to attend school regularly, and after that age, until they complete the required grade at school a minimum of 100 days a year is required, unless they are legally employed. The number of minors who applied for permits to work during 1917 was 21,751, as compared with 16,557 in the preceding year, the increase being attributed to the great rise in the cost of living, and to the depletion of family incomes through the enlistment of sons of military age during the last half of the year. A very successful step taken by the Labour Bureau was in the establishment of a child welfare station for the purpose of caring for children under 12 years of age whose mothers were employed in the canneries. The children were given a daily bath, breakfast, and a warm meal at noon. The total enrolment was 231, with an average daily attendance of about 135. It is stated that as a result of this new enterprise there was a more general observation of the child labour law in East Baltimore, the canners were able to secure larger packs by reason of additional help, and the employees whose children were being cared for must naturally have been more efficient, while the employers were relieved of the responsibility of having children in the factories during working hours, and the children themselves were made happy.
